BY THE LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

CADOGAN.

To Wyndham Thomas, Earl of Dunraven, K.P.; Frederick, Baron Ashtown; J. L. Carow, Psy., M.P.; Lowry Egerton, Earl of Ennickillen; Sir Thomas Henry Grattan, Esmonde, Bart, M.P.; the Honourable William Henry, Fitswillian; Sir Walter Gilbey, Bart ; Charles Stewart, Marquess of Londonderry, K.G.; Percy La Touche, Esq.; Thomas, Baron Rathdonnell; Colonel T. A. St. Quintin; and Frederick Wronch.

Whereas, We have deemed it expedient that a Commission should fortbuith issue to examine and report upon the methods which should be adopted for the encouragement and improvement of the breeding of horses in the various districts of Ireland

Now, Wo, George Honry, Earl Cadogan, Lord Licutenant-General and General Governor of Irokand, do horoby nominate, constitute, and appoint you, Wyndliam Thomas, Earl of Dunnven, K.P.; Frederick, Raroa Asitowe; J. L. Carce, Esp., M.P.; Lowry Egerton, Earl of Emnikillen; Sir Thomas Henry Grattan Esmonde, Bart., M.P.; the Honourable William Henry Ertzwilliam; Sir Walter Gilbey, Bert.; Charles Stewart, Marquess of Londonderry, K.G.; Percy La Touche, Esq.; Thomas, Baron Rathdonnell; Colonel T. A. St. Quintin, and Frederick Wrench, Esq., to be Commissioners for the nurnose aforesaid.

And for the hetter effecting the purpose of this our Commission, we do by these presents authorise and empower you, or any two or more of you, to he named by you. to call hefore you or any two or more of you to be mamed such persons as you may think fit to examine, and by whom you may be the better informed of the matter hereby submitted for your consideration, and everything connected therewith; and generally to inquire of and concerning the premises by all other lawful ways and means whatsouver.

And also to call for and examine such books, papers, documents, writings, or records as you or any two or more of you as aforesaid shall think useful for the purpose of the

inquiry. And we also by these presents authorise and empower you or any two or more of you as aforesaid, to visit and personally inspect such places as you or any two or more of you may deem expedient for the purpose aforesaid, and also to employ such persons as you may think fit to assist you in undertaking any inquiry for the purpose aforesaid which you may doon expedient to make, and our pleasure is that you or any two or more of you as aforesaid do from time to time and with all convenient speed report to us what you shall find touching and concerning the premises.

And We further by these presents ordain that this our Commission shall continue in full force and viruse, and that you our Commissioners do from time to time proceed in the execution thereof, although the same be not continued from time to time by adjournment.

Given at Her Maiesty's Castle of Dublin this 20th day of July, 1896, by His Excellency's command.

D. HARREL

August 29th, 1896.

SIR. The Commission on Horse-breeding in Ireland, at their meeting to-day, appointed

you as Secretary to the Commission. You will be pleased to put yourself at once in communication with Sir David Harrel at Office of the Secretary to the Lord Lieutenant, Dublin Castle.

I am, Sir,

Yours faithfully, DUNRAVEN.

Hugh Neville, Esq.

COMMISSION ON HORSE BREEDING, IRELAND.

REPORT OF THE CHAIRMAN AND OTHERS.

TO HIS EXCELLENCY GEORGE HENRY, EARL CADOGAN, K.G., LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND,

MAY 12 PERSON VOUR TRANSPORTERS

- We, the undersigned Commissioners appointed by your Excellency's warrant bearing date the 20th day of July, 1896, to examine and report upon the methods which should be adopted for the encouragement and improvement of the board of horses in the various Districts of Ireland, have now the honour to submit our Report.
- 2. At the first meeting of the Commission held on the 29th day of August, 1896, a series of questions addressed to persons interested in the subject of borse-breeding was drawn up, and subsequently printed and distributed in all parts of Ireland. Many of the recipients were good enough to send answers, and much valuable information was thereby received and laid before the Commission at the next meeting held on the 19th October following.
- 3. The first meeting for the recention of evidence was held on the 20th day of October. 1896, and the last on March 12th, 1897. One hundred and nineteen witnesses were examined, including persons interested in horse-breeding, dealers in horses from all parts of Ireland, as well as experts on the subject of horse-breeding in Esgland, and Esglish dealers who buy horses in Ireland and trade in Irish-bred horses.
- 4. On January 6th of this year, the Commission inspected the horses belonging to the Congressed Districts Board at their Chautilly Stud Farm.
- All the stallions belonging to the Board are brought, at the end of the covering season, from their respective districts and are housed together for the winter at the Stud Farm, whereby a large saving in the cost of attendance and forage is effected. and the horses are brought under the supervision of one responsible person, and are easily accessible for inspection by the Members of the Board and others interested in the subject.
- Besides the Hackney, Thoroughbred, and Pony stallions, several Hackney mares, the property of the Board, are kept on the farm, from which it is hoped to breed stallions suitable to take the place of those now serving in various districts.
- We cannot too highly commend the general management of this Stud Farm, and we were much impressed with the admirable arrangements, and evident care taken of the horses located there.
- 5. In May the Commission visited the congested districts.
- Horses were brought together, through the instrumentality of the Congested Districts Moree were brought together, through the instrumentanty of the Conguston District, Board, at Strannfar and Ardam (County Donegal), Bellumilet (County Mayo), Achill and Clifden (County Galway), and Dingle and Calardween (County Kerry). The Commission had thereby an opportunity of seeing the broad mare and young stock of the country, the Boards stallions stationed at the places above-named, together with

several thoroughbred and "country-bred" stallions kept by private persons, and were better enabled to form an opinion as to the requirements of the people by personal investigation.

6. In March last the Commission visited the Shows of the Hackney Society and Hunter's Improvement Society in London. The latter Show is held in connection with the Royal Commission on Horse-breeling, the "Prunium Stallions" being there sciented to serve in the various districts under the scheme of that Commission.

The Commission held meetings in Loudon during the weeks of these two Shows and received much valuable evidence.

7. We have carefully considered the many letters and other documents which have

been submitted to us.—for which we take this opportunity of expressing our thnoles to the writers,—and also the Reports from Foreign Countries on Horse-breeding, and the aid given to that industry by the State in France, Italy, Germany, and Austria, which the Marquis of Salisbury was good enough to furnish for our consideration.

8. In January last Dr. Michael Cox was invited to supply the Commission with any available information on the History of the Irish Horse. We are greatly indicated to that gentleman for the trouble he has taken with respect to this work; from which we have derived valuable assistance, and also to Mr. Matthew Keeny for an interesting communication desling with the same subject.

We learn from the historical researches of Dr. Cox, and from other sources of information, that at a very early date much attention was devoted to Horse-breeding Ireland, and that distinct type of animal was established in the country, the superiority

Ireland, and that a distinct type of animal was established in the country, the superiority of which is attributed to the importation from Spain of sires of Eastern origin. Mr. Kenny describes the "old Irish mare" as "small, clean legged and hardy."

"This breed," he says, "originated in the numerous Scientish stalliness brought to Finded in the Stde century. There was a regular tends between the Seath and West resolving in return wise, also h, lorses and specie. The clause of Spanish heres intered was the adolated label. To this cleaness may be attributed the extraordinary influence of Spanish blood can at present in early recognized in the Comeronary pay." Maxwell, peaking of the Irish brone in "Wild Sports of the West, Published in

Maxwell, speaking of the link house in "Whit Sports of the West," published in 1883, asys:—During the last century the West of Ireland was celebrated for its breed of borses. They were of that class denominated the old Irish hunter, a strong, well-boned and enduring animal, that without any protention to activate ordinary spows, was sufficiently flat for fox hounds, as excellent weight carrier, and, better still, able

to live with any dogs, and in any country."
"As fencers, this breed was unequalled."

Dr. Cox quotes Sir William Temples as recefficing in 1679 that to had mat a beyer for the Fereich way who had purchosed twenty homes at from 20 to 260 spices. He speaks of the 16th horse as capable of improvement, and thereby becoming "a commodify, and only of greater was at home, but also fift for propriation into other countries." We have from 15th Cox that in 1500 1,500 and the horse were expected from countries. "We have from 15th Cox that in 1500 1,500 and the horse were expected from the contribution of the 15th and 15th contribution of the 15th and 15th contribution of the value of the spect at the 15th larger in the way of the 15th and 15th in the 15th contribution of the value of the spect that since 15th in the 15th contribution of the value of the spect that since 15th in the 15th contribution of the value of the spect that since 15th in the 15th contribution of the value of the spect that since 15th in the 15th contribution of the value of the spect that since 15th in the 15th contribution of the value of the 15th contribution of the 15th contribution

During the last 150 years many high-class flow expected is nearly 40,000 sanually.

During the last 150 years many high-class throughbred sizes and marce have been
imported from England, and money has been devoted to the improvement of horsebreeding by the Irisb Parliament pelor to the Union, by the Government during this
century, by the Royal Dublin and other Soudeties, and by many private individuals.

On the other hand, the native breed undoubtedly suffired ocverely from the consequences of the famine, and to some extent from the fact that considerable numbers of heavy agricultural stallions have from time to time been introduced into the country. This blood does not appear to have had a beneficial effect upon the already established.

This blood does not appear to have had a beneficial effect upon the already established type of animal.

9. The Irish cart or draught horses continually alluded to in eridence,—probably descended from the imported "draft" mars referred to by Dr. Cox,—must not be The former class of horse is no doubt in part the progenitor of the present Irish lemter, which is, generally speaking, free from any admixture of the latter class of blood, or of that of the undern Hackers

in It should be here numericed that some confusion may appear to crisis in relicance, areing to the indistrictants application of the nance terms to different types of similar the expression. Findance is the expression of "Radbaty" her instance in frequently used in the 'Wei' of Talenda to alone used principally advantage to the contract of the property of the contract of the con

11. The statistical information at our command is not sufficiently reliable to enable Statistics. m to formulate exact conclusions as to the volume and character of the expertation, er as to the precise producing capacity of various districts. The exportation and importation returns do not specify cases where horses are merely temporarily transhipped, nor is any classification of horses possible. The returns furnished by the constabulary of the number and breed of stallions can be relied upon only in respect of thoroughbreds, and even in that case mistakes may occur; in other cases the owner's description, from which the returns must be chiefly drawn up, cannot be checked. It is impossible to enumerate the purely agricultural horses with any degree of accuracy, as a large majority of hunter broad mares and their young stock-until the latter are sold—are used for farm work; there is no distinct return of horses kept for breeding surposes, or of young stock other than those under two years old. Any attempt to ascertain the relative horse producing capacity of different classes, by comparison of quantity or quality of produce with rateable values, is likely to be misleading, as statistical information is insufficient, and the production of some of the poorer districts is quite insignificant. Speaking generally we have no doubt that the great majority of busters and carriago horses exported are produced by comparatively large farmers, and this is, in our oninion, attributable, not to any ineapacity on the part of the small farmer to value valuable stock, but to his inability to obtain or pay for the service of a suitable stallion. These details are, however, of little practical importance to our inquiry, as we have conceived it to be our duty to consider the industry as a whole, both in

respect to the satisfaction of local requirements and the large and important expect transfe.

12. Our attention has been drawn to the custom of buying remonants for Her Majosty's Amy Army through the agency of dealers instead of directly from the breeders. A lotter Remonant on the subject which Ool St. Quintin, a member of the Commission, who has for several years been engaging in buying remounts in felland, has been good enough to write, will be a subject which the contract of the subject which is the subject when the first product in felland, has been good enough to write, will be a subject when the subject

be found in the Appendix.

13. For the purposes of our Inquiry Ireland may be roughly divided into—1, West; Westurs, North; and 3, South.

In the first of these divisions lies the area operated over by the Congosted Districts

Boxel. In parts of this District it appears to us that the breeding of horses for sale

was hardly be carried on with any grofit by the small holders of land, and that it would be a converge them to turn that extend in a chosen for the converge term to the converge contains a dress of the converge converge of Galway, Mayo, and Kerry, a hearly kneed of posites formerly existed in conditionals of Galway, Mayo, and Kerry, a hearly kneed of posites formerly existed in conditionals of Galway. have a spavin or eplint, or to be in any respect unsound in his wind."

Another witness describes the Belmaillet ponics as a breed "that you could get up 10172 on and ride them off the grass thirty miles across the mountains, they would never

tre, without a feed of oats, nor did not know what the taste of oats was."

This witness advocates a good small thoroughbred horse to cross with this race of 11 person, and no doubt, as he points out, that admixture has been highly effications in the production of polo posite, which are eagerly bought, at what may be considered

fairly remunerative prices to the breeder.

7953 15. We learn that large numbers of foals are driven from the Western districts of Ireland to various fairs in the country, many of them being sold as far to the east-

sires high-class hunters are frequently bred.

4228

4232 9447 5524 9740 \$506

6837 8163 ward as Kildare, Meath, Wicklow, Wexford, and other hunter-broading districts. 6891 8700 We attach considerable importance to the re-establishment and permanent improve-9451 mont of these breeds of ponies, and in our opinion the most suitable sires for that 7685 purpose are a well selected small thoroughbred with bone and action, or an Eastern or other pony of a good stamp.

COMMISSION ON HORSE BREEDING. 14. From these hardy little animals when crossed with thoroughbred and bulf-bred

In other parts of the Western Division, principally in Kerry and Cork, a larger type of mare prevails, and some of the best hunters and high-class carriage horses in

Iredand have been bred. For these localities a thoroughbred, or half-bred such as will be hereafter described, is, in our opinion, the most suitable sire, not only in order to satisfy the requirements of the people, but also because the produce of the district finds in way all over the country. Nonrusta 16. With record to the Second or Northern Division, which, for the purpose we have Devictor.

1956-7

in view, may be defined as the Counties lying North of the River Boyne, it cannot be said to be a horse-breeding country to anything like the same degree as other parts of Ireland. This is attributable in part to the natural conditions of the country, which 2053 do not lend themselves readily to this branch of industry. We have evidence that in many parts the farmers buy horses in the South of Ireland, take them home and food them in the same way as they would cattle, or as nearly so as circumstances

permit, and eventually sell them as harness homes to London and other dealers. It 1958 would appear that few are bought as hunters, and still fewer bred for that purpose in this division.

 In the neighbourhood of the large towns heavy eart horses of the Clydesdale and Shire breed are reared by the farmers to a limited extent, for use in drays and other such vehicles, these horses when young being worked on their owners' farm.

A certain number of Hackney and other harmess horses are bred by well-to-de tradesents and others in this district. The northern division appears to be fairly well supplied. with stallions helonging to large farmers, landowners, and others.

1850 18. It may be pointed out that whereas the farmers in this district brood or rest horses to a very limited extent, and that only as an inconsiderable adjunct to their main business, those of the Southern and some parts of the Western districts make horse-breeding their steple, and indeed in some cases, only profitable industry. Care should therefore be taken that in assisting the former by the introduction or encourage

ment of any breed, it should not be done in such a manner as to prejudice the latter, or the general prosperity of the country. The above remark is to an even greater extent applicable to any endeavour to assist 1524 the breeders in the Western portion of the island, masmuch as horses rarely come from the North to the South of Ireland, but the young stock bred in the Western Districts 1944-5 2009 must necessarily be introduced into the fairs of the more Eastern portion of the island, where the valuable hunter breeding industry pravails. 19. The Southern, or Third Division, that is the country South of the River Boyne, DIVINIOR.

and exclusive of the Western sea board, is the part of Ireland chiefly devoted to the breeding of horses, and it is more especially with reference to this district that we find s general consensus of opinion both in this country, in England, and abroad, that

Ireland is especially adapted for the breeding of horses, and has carned a well-deserved reputation as the chief mart in the world for high class horses for both riding and driving purposes. This opinion is borne ont by the fact that buyers from many foreign countries, as well as from England, look to Ireland to supply their wants, and also by the enhanced price an Irish bred horse commands in England and elsewhere.

That this reputation is well justified is, in our opinion, fully borne out by the fact that the Irish bred borse has been eminently successful in competition with English

and other horses on the turf, in the hunting-field, and in the show yard; while at the Printed trace digitised by the University of Southampton Library Digitisation Unit

Printed image digitised by the University of Southempton Library Digitisation Unit

MCA8

9759

same time high-class horses hred in Ireland, not suited for the purposes referred to, are sacerly bought by London and other dealers for carriage horses and as officers' chargers. and borses that do not come up to that standard are much cought after, at a price which may be considered as fairly remunerative, by the huyers of remounts for Her Majesty's army and for the armise of other countries.

These horses are almost entirely the produce of thoroughbred sires or of half-hred sizes of the hunter type.

20. The excellence of the Irish horse is attributable to the comparative purity of Excellence the blood, to the natural advantages in respect of climate and soil which the greater part of the country enjoys, to the habite of the people, their innate love of the horse, and the keen interest they take in his welfare.

An equable climate, limestone soil, and the character of the herbage, confer natural edvantages of which the people have from time immemorial availed themselves; but, though no chenge has taken place in these respects, the operation of various causes has, of late years, injuriously affected the industry of horse-breeding

S1. While the prices given for high-class horses, whether suitable for the race course. Prices the hunting field, or for harness, have fully maintained themselves, it has been clearly proved to us that the price of inferior horses has gone down very largely of late years. This decrease, estimated at from 25 to 40 per cent, is attributed to the large and increasing importation of horses from America and in part to the introduction of bieveles, tram-cars, and other means of locomotion. We think that the value of this

class of horse will not increase; on the centrary it seems to us that it has a tendency to decrease; and we regret to find that, from inattention to eareful breeding, from absence of means, from the cale of the host marcs, and from other causes, an immense number of inferior and practically unsaleable horses are exhibited at fairs throughout the country. This over production of a class of animal for which the demand is comparatively small and decreasing, necessarily produces an injurious effect upon the industry under our consideration. 22. Owing to the eagerness of Foreign buyers to purchase good mares and other

causes, such as the serious depression in Agriculture, the country has been partially drained of marce suitable to breed hunters, high-class harness horses, and cavalry remounts. Over large districts farmers cannot afford to pay a fee of more than a few shillings for the service of a stallion, and the number of private persons sufficiently well off to provide a valuable stallion at an unremunerative fee, for the public benefit, it exceedingly small. These causes, namely, the constant exportation of good mares, and the inferiority of the country stallions, must, unless checked, tend to a gradual deterioration in the produce

Some witnesses state that such deterioration has already taken place, to a certain MAA extent, in some parts of the country and that good horses have become somewhat searce; others say that Ireland still produces as many good horses as formerly, though owing to greater demand, they have become harder to find. Even if the latter opinion be correct. it is admitted that in view of the increased production of horses, superior horses have become relatively scores, and to that extent deterioration has taken place.

On one point all witnesses are agreed, namely, that the supply of hunters and high class carriage horses is inadequate to the demand, and could be very largely increased without lowering prices.

23. With regard to the supply of stallions. We are of opinion that whereas many Stalliess. counties and districts throughout Ireland are amply supplied, and that the farmers are fully alive to the advantage of using the good horses which are standing in their 9710 neighbourhood at fees within their means, in other parts of Ireland the supply is totally inadequate both in quality and numbers. We regret too, to find that the farmere in some districts do not appreciate the advantage of mating their mares with sound 5949

and suitable stallions, but in selecting a sire are governed by motives of mere economy, convenience, friendliness to the owner, and various reasons, entirely independent of the real object they should have in view In consequence many unsound, worthless stallions, are serving at low fees and are responsible for the many inferior, unsaleable animals which are exhibited in the fairs.

24. The remedy we succest is that suitable stallions, either the property of the State, or sold or leased by the State to responsible persons on easy terms, and under

Printed Impre digitized by the University of Southematon Library Digitization Unit

ensing.	25 Several witnesses advocated that stallions serving public marcs should be

foreign countries.

27. In France a general inspection is made of stallions privately owned, and only these passed as free from certain defects are allowed to cover mares other than those of the owner. These stallions are divided into two classes (1) "approved," (2) "authorized." The former class is materially subsidized by the Government, the latter does not part in Shows subventioned by the State.

receive premiums, but is granted an official status which enables the produce to take A somewhat similar system of licensing on very strict lines obtains in Prussia. the registration system of the Royal Dublin Society could be largely extended.

28. We are of opinion that it would be a very substantial benefit to the country if The owners of mares would, we hope, gradually realize the value of the guarantee of 6762 soundness and suitability that such registration would confer. Thorogon-29. While recognizing the value of other breeds for certain purposes and in certain bred districts, we are of opinion that the thoroughbred stallion is undoubtedly the sire Stallions. most calculated to improve the breed of horses throughout the country generally. The thoroughbred has been used largely in Ireland for many years, and from him,

when crossed with the native mares, the present excellence of the Irish horse is chiefly derived. 36. It has been urged by some witnesses that it is difficult to find thoroughbred sires suitable to mate with the light mares of certain districts, and that an infusion of half-bred blood is desirable. Many well-known half-bred sires have been instanced whose stock is undeniably good. Some of those mentioned are sires which are practically thoroughbred though on account of a remote stain, generally in the dam's pedigree, they are not entitled to be registered in the Stud-book. Others are of the hunter type, in

many cases have been themselves hunted, and are usually the produce of a thoroughbred horse mated to a hunter mare with several crosses of thoroughbred blood. 31. We consider that both these classes of half-bred sire are calculated to improve the breed of horse if mated judiciously. In the event of a register being formed it would be well that such sires should be examined, in like manner to the thoroughbred sires and should be separately registered under enitable regulations. The certificate of registration should specify that the horse it refers to is not thoroughbred. It has been suggested that half-bred sires of the latter description ought not to be

entitled to a certificate of registration until their young stock have proved their excel-lence. We consider any such limitation undescrable, on account of the time it would take before a horse could earn his certificate and the consequent discouragement to breeders to keep such horses as stallions. Printed image digitised by the University of Southampton Library Digitisation Unit

rried image digitised by the University of Southempton Library Digitisation Unit

32. We may point out that formerly considerable numbers of half-bred stallions kept for hunting purposes, served marco in the season, and many examples of the excellence of the stock got by such horses have been given us. Latterly it has become more usual to sell these horses as geldings either for the English market, or for use in Iroland as hunters.

33. We feel satisfied that thoroughbred and half-bred stallions with conformation, Parchase of 33. We see: succeed that to roughures and harness horses Stallion substance, and action, suitable for the purpose of getting hunters and harness horses 500 1000

could be bought by degrees for ressonable sums. 34. The introduction of Hackney stallions into the West of Ireland by the Congested Hackney.

Districts Board, both in respect of the effect likely to be produced immediately upon those districts and eventually upon the rest of Ireland, was brought very prominently before us.

35. We have received many letters from private persons, horse dealers, and others, as Appendix well as resolutions passed by the Kerry Grand Jury, various Horse Show Committees. Agricultural and other Societies, together with much vivo toos evidence, to the effect that the introduction of Hackneye will seriously prejudice the horse-breeding industry of Ireland on the following grounds. That whereas Ireland has hitherto been famous 5525 for riding horses and for barness horses of a particular stamp, Hackney stallions being only calculated to get harness horses of an entirely different description, will prejudicially affect the present breed of horses throughout the country, insamuch as the blood cannot be confined to any one district: that as dealers will not buy a horse which is suspected of having a strain of Hackney blood in him for a riding horse or for the class of harness horse for which Ireland is the chief market, they will, consequently, seek their requirements elsewhere, and much money which now comes

9959

the congested districts our only produce an indifferent harness horse, the price for which 993 has decreased, and is decreasing: that failing to produce harness horses of the stamp required, the "misfits" will be quite unsaleable, alike unsuited for riding borses or army remounts. On the other hand, it has been urged that the introduction of Hackney stallions will materially benefit the poorer farmers in the congested districts by enabling them to obtain an enhanced price for their young stock: that there is no danger of the blood percolating through the country: that even if the Hackney blood did disseminate through that portion of the country devoted to the production of hunters, it would not prejudice the future of the hunter, and by some few it is even argued that it will have the opposite effect by infusing more substance into the hunter brood marco, an attribute in which they are in many cases at present deficient: that action is the one quality

most cought after by dealers when buying harness horses, and that the Hackney is

the best stallion to impart it.

into the country will be diverted from it :- in support of this last contention, it has been shewn that dealers who formerly bought hunters and carriage horses in East 3063 12374 Yorkshire and Lincolnshire, have to buy elsewhere since the development of Hackney 5698 12415 breeding in those counties: that the Hackney when crossed with the inferior mares of 5701 12417

36. In considering the Hackney it should be borne in mind that the modern animal, bred almost exclusively for harness work and for show purposes, bears very little resemblance to the Hackney, sometimes called roadster, of former days which was used for the most part as a riding horse. 37. Some portions of the western sea-board are, so has already been stated, so naturally unsuited to breed anything except the class of animal used for such purely

local purposes as carrying turf or sea-weed, that any attempt to improve the broad must, we fear, be unprofitable. In other districts, where valuable ponies have been and can be produced, the Hackney is not in our opinion a desirable sire.

It is urged by some that the Hackney transmits action and substance, and is, therefore, especially indicated to mate with the light nondescript mares so prevalent in the congested districts and districts bordering upon them. We are unable to chare that epinion. Judging by personal observation the produce of the Hackney sire shows little, if any, superiority to that of the ordinary stallions serving in those parts of the country. The quality of these stallions is described by Mr. Carden in evidence, and

5966

experience of Hackney breeding of horses the most suitable class of stallion would be a strong thoroughbred and a Shire horse if possible." 38. The modern Hackney is, when bred in his highest perfection, undoubtedly n very veluable harness horse for certain purposes, but its conformation and action are, in our opinion, quite unsuited for breeding anything but a harness horse. However, valuable in other countries and when mated to suitable marcs, a stallion of this breed cannot, we consider, produce snything but an inferior harness horse when moted to the light more of the Western Districts

12

39. It has been pointed out that the pure-bred Hackney commands a large price but considering the almost total absence of mores of the brood in Iruland, certainly in the commuted districts, it is quite impossible for farmers there to hope to broad the spinal required. 12371 40. We full to see how, without nn enormous expenditure of money, it is resultle 12419 for Ireland to compete with England in the production of Hackneys adapted to supply

COMMISSION ON HORSE BREEDING.

anitable thoroughbred or half-bred sire would confer more benefit to the localities undeconsideration than the Hackney. In this view we are somewhat strongthened by local opinion. Many of the farmers who offered their mares and young stock for oninspection, complained that dealers gave better prices for the smaller produce of the private "country horse" than for the larger produce of the Government Hackney and a deportation of the ratepayers of Dingle stated in a petition they "considered the processor of the Hackney stallion until to realize a profitable price," and "from their

the demand for high priced horses of that description. The most that can be exceeded is the production of an inferior harness home, an article with which the market is already elutted by English production and foreign importation. 41. We would here call attention to the large and increasing importation from America into the United Kingdom of general utility and middle class harness horses, and the

great reduction in freight which will obviously tend to produce a further increase. In 1893, 13,707 American horses were imported, since then importation has steadily increased until in the first nine months of the past year it amounted to 34,643; the total for the year would probably be not less than 40,000. this description at a profit, 116

A dealer informed us that whereas seven years ago he paid £12 a horse for carriage from New York to Liverpool, he paid last year only £3 10s. "and in a letter In view of such competition, independently of other considerations, we fail to see how it is possible for the smaller farmers of the West of Iroland to rear and cell horses of 42. We find that since their establishment, in August, 1891, starting in the Spring of 1892 with seventeen stallions, of which twelve were Hackneys, the Board has purchased, hred and hired, thirty-six Hackney sires. The majority of stallions served the marcs of the farmers in the district at a fee of 5s. Those purchased cost the Board an average of between £190 and £200 and. The total cost of the Board's expanditure on horse-breeding during the four years ending March 31st, 1896, is £31,235 13s. 11d., being divided into-Capital expenditure, £16, 38 10s. 5d.; Maintenance, £14,597 3s. 6d. The receipts from fees amount to about £2,700, which reduces the actual cost to

(in round numbers) £28,535, or £7,133 per annum. These expenses include those attaching to two thoroughbred horses. "St. Aidan" and "Unole Sum." and several Araba. Barbs, and donkeys, the property of the Board. Taking the average number of mares served by each stallion, in each year during the time he has been in the possession of the Board, it would appear that a total of 1,431 marce were served in the congested districts during the season 1896, by the Board's stallions. Supposing 80 per cent, of those mares produced a foal, the number of foals would he 1 145

Even assuming each foal to be worth £3 more than the foals got by the ordinary stallion of the district, as stated in the evidence of the Secretary of the Congosted Districts Board, the total benefit conferred would be £2 425 : whereas the cost of the 5452 maintenance of the establishment nlone was £4,185, which sum does not include any

nllowance for interest or depreciation on the capital expenditure of #16 388. Printed image digitised by the University of Southennion Library Digitisation Unit

570.0

10328

Those latter items cannot, considering the nature of the undertaking, be computed at less than £1,000 a year. The formes taken as regards the number of feals, their increased value and the interest on capital, and deprociation are, in our opinion, more than favourable to the

scheme of the Board.

Looking at the home-breeding operations of the Board in the interest of the neover formers in the west, it appears very doubtful whether the actual benefit conferred on the people is at all proportionate to the layer expenditure of public funds. We fear that the horse breeding scheme of the Board cannot meet with the same measure of success that has attended their efforts in other directions.

43. But the introduction of Hackney stallions in the convested districts must also he considered with reference to their effect upon the country generally; on this point the witnesses, more especially the dealers who at present buy horses in Ireland, are almost assumetably of opinion that if Hackney blood finds its way into the hunter breeding districts it will be highly injurious, or as a most experienced witness expressed it "the ruin of the country." The commercial value of Irish borees is, to a large extent, due to a well founded belief in their comparative freedom from any admixture of so called "soft blood"; and whatever individual opinions may be held on the merits of Hackney blood, we cannot doubt from the evidence before us, that as infusion of that strain throughout Ireland would depreciate the value of the Irish horse.

44. We have considered how far this danger can be guarded against. Registration. if partial or optional, could not have the desired effect. Universal and compulsory registration of all sires, dams, and their produce would doubtless be more effectual; but such a system would accessitate logislation of an arbitrary and stringent character. would involve great difficulty of administration and a very considerable yearly expenditure. For those reasons it is, in our opinion, impracticable.

We fall to see how the Hackney blood largely introduced by the State into the congressed districts can by any means, be confined to those localities. It must we believe, spread throughout the country, and produce results, described in evidence as dissatzona

45. Before leaving this branch of our Inquiry we may call attention to the experience Hackneys derived from the use of Hackneys when crossed with the native mares in India. in Iulia. Voteriuary Lieut. Druge, for some time connected with the Horse-breeding Department in that country, who also acryod with the 5th Lancors, and is therefore

competent to give an opinion on the merits of the different broods when in active military service, says :-- "I don't think the produce was nearly so good as the produce of the thoroughbred. Each district has its own Show—and the thoroughbred always came out, taking the prize." He also states—" as the produce grow up they 10395 were certainly bottor for military purposes, that is, the thoroughbrod ones than the Hackneys-it was easy to distinguish thom. Fewer came to the sick lines, fewer were lame, you got fewer bone diseases, such as splints, side bone, ring bone, and spavins," 10016 General Sir John Watson says :- " I was neable to give the preference to either the one or the other. The produce of the Harkney appeared to me to be quite as

good so the produce of the thoroughbrod, but I had complaints from many cavalry officers that the logs and hone of the Hackney-got remount was not as lasting, although it was larger than the bone and leg of the thoroughbred produce; but still the evidence was not very docisive, and I omms home with the conviction that there was no credit to be given to the one above the other. While expressing the opinion that the introduction of the Hackney etallion has been "attended with great advantage" he 10819 thinks that " the crose of European blood with the Indian mare does not create any

permanent improvement. 10894 Veterinary Col. Halles while expressing approval of the Hackney cross with the native mares, recommende the produce of the thoroughbrid "is a perfect military horse and as better than the Hackney," but adds enitable thoroughbrids for the purpose of breeding "are not to bo had." 11057

46. From this evidence, it seems that the introduction of the Hackney into India 10322 has been a somewhat doubtful experiment, and that the supply of the breed is probably

cannot but feel that the introduction of Hackneys is an experiment on which, in the face of so much weighty evidence and adverse opinion, it is undesirable to speud public money, whatever steps in that direction private enterprise may take.

14

48. Some few witnesses have advocated the establishment by Government of cart-Chart-lissence horse stallions in certain localities; but as the main industry in Ireland consists in the breeding of a lighter class of borne, and the larger portion of the land is not adapted to the heavy draught borse, we consider the supply of such stallions may also be left to private enterprise. 49. Although some good mares are kept for breeding purposes in nearly all parts of the BroodMares

COMMISSION ON HORSE BREEDING. 47. As regards the introduction of Hackney blood, both in respect of the effect upon the congested districts and the country generally, we would strongly urge, that if it he considered desirable to further test the merits of the Hackney sire, the operation should be on a limited scale, confined to the northern portion of the congested districts, that a suitable thoroughbred should be stationed with the Hackney at the same fee, and that the results should be carefully watched and noted; but, having carefully weighed the various arguments and opinious expressed on every aspect of the case, and having considered the results of personal observation in the districts which we visited, as well as the views and wishes expressed by many of the inhabitants of those districts, we

965 1428 country, we have had abundant evidence to the effect that very large unsubers have been 1814 bought by foreigners and exported to other countries. It has been pointed out that these buyers spare no expense to obtain the best blood and the most serviceable animals, 5392 moreover, they will not buy any unsound mares. Irish farmers, owing to bad times, 3233 6130 and tempted by the high prices offered, have in too many cases parted with their 1978 4837 best mares, and have kept inferior and frequently unsound animals to broad from.

As has already been stated, sufficient consideration, in many cases, is not given by the breeder to the suitability of the stallion he purposes mating with his mare-50. From these causes we consider that though Irish borses have not as yet deteriorated in quality, there is great reason to fear that they may do so, and it becomes necessary to take pressutions to guard against such a contingency by encouraging the farmers to

breed from their best mares. 51. One of the suggestions with this object in view is that the State should provide broad mares. It has been proposed that army mares should be distributed either free

of cost or at a nominal charge to breeders. We cannot adopt this suggestion, as we consider that mares not fit for military purposes would be unsuited to breed from, and if still suited for military nurposes they would be obtained at too great a cost to the country; moreover, in either case their previous training and condition of living would

in all probability render them unfertile, at any rate for the first season. 8863-5 52. It has also been suggested that banter mores which had met with accidents, or become in other wave unsuitable for the hunting field should be bought and distributed under certain conditions for breeding purposes, and it has been stated that animals of this description could be bought at small cost in England and elsewhere. This scheme does

not recommend itself to us as being workable, except at an expense which the results would hardly justify. 5649 53. The method for effecting the purpose we have in view, which most commends itself to us, is the giving of prizes to mares in feel or with feel at feet, more especially to

young mares, of such value as to form a substantial inducement to the farmers to keep and breed from his best animal, instead of selling her.

54. An enlarged scheme of nominations to Government, or registered stallions, somewhat on the present system of the Royal Dublin Society, is also well calculated to

effect the desired result.

55. The machinery necessary for distributing prizes is in our opinion loss costly than any other system that has come under our notice. The Royal Dublin Society has already instituted prizes of this nature, but the sums

at their command for the purpose are quite inadequate. We may point out that in France nearly £25,000 was last year expended by the State on premiums to brood

mares. Printed image digitised by the University of Southampton Library Digitisation Unit

ighted by the University of Southempton Library Digitisation Unit

56. The very great benefit which is derived from the feeding of feals well during their Fals. first winter cannot be too astrongly brought before the notion of the breach. It seems the unanimous opinion of those who are well versed in the subject, that this is the most important time will report to the horse's unbecomes recovering the contract of the contract o

It because the manifest time with regard to the horse's subsequent growth and development. An animal neglected at this ago never attains to the same size and strength he otherwise would, whereast is a dual in properly eared for during the first you, he attains a constitution and development which is well worth the breader's while to consider, and which amply repays the small amount of extra cost which it entangles.

For the purpose of practically demonstrating this theory to the poorer farmers we consider that prizes might well be given in the spring for yearlings.

37. The establishment of Government steal forms in different districts, smoothed on government for foreign system, in order to bread manage to be districted for foreign greynor, in order to bread manage the power forms, and to keep stallines for their beseits, has been recommended. Been a sentence would be beneficial to the country, but it would savide a very less in a single or "midthe" would said considerably to the repress, and a middle of "midthe" would said considerably to the repress, and an extend of the contract part is would said considerably to the repress, and a middle with the contraction of the contract part of the

58. Several witcoses have advocated the imposition of a tax on foreign horses Importation imported into this country.

The Commission cannot adopt this recommendation.

50. It has been suggested that some system of branking should be enforced at the ports Branking of disembarkation in order to prevent foreign horses being massed off as Irish.

This suggestion meets with our approval if the branding is carried out in such a manner as not to interfere with the intrinsic value of the animal.

60. To sum up our views of the question submitted to us—Teleand is an agricultural country. Horse-broading is a livanch of agriculture capable of large and profublic

extension. Owing to concenic causes its development cannot be effected by private client; and sublishman State meintance in greatly respected. As the country is by well, climate, and the character of the native bread, eminently adapted to produce benters, high class carriage lorges, and remounts, it is in our opinion desirable that State said should be mainly devoted to the encouragement of horses of that description. It is in that direction that the industry has naturally developed, and it is in that

direction that State aid will be most effective.

The yearly sid given by Government to horse-breeding in France in 1896 was Govern-

426,152, not including a great made to Algiers; in Cernary, according to the sent table for 1877-8, it is \$152,374; in Austria, £170,293; in Hungary, £23,333. Assistance in Ireland (independently) of the sens expended by the Congested Districts Reard), the Grant amounts to only \$2,350 a year. This sum, as Mr. Hous point out in his orbitation, "7933 "amounts to 135 peany for each of the 630,600 horses in the century," allete over "money to 135 peany for each of the 630,600 horses in the century, allete over

1]d. each. Or regarding the matter in another way, it amounts to just 12.5d. on every £100 of horse-field in the country, taking the official estimate of £3 per head as the value of the horses; that is to say, the amount devoted to improving the article is about one-fourtesuth per cent. of its value.

We are of opinion that this sum is totally inadequate, considering the vast importance of the industry to Ireland, and the powerty of many of the breeders. We must aircoacly emphasize the value of the Irish horse supply for military pur-

We must strongly emphasise the value of the Irish horse supply for mintary purposes, and the serious danger that would arise should that supply fail, or the heed of horses cease to maintain the high standard which at present prevails.

We desire to express our opinion that the expenditure of comparatively large annual grants for a few years would in the ead he financially more economical than smaller struss granted annually for an indefinite period.

A generous grant judiciously expended would, we consider, be calculated to speedily

Renerous grant judiciously expended would, we consider, or calculated to specify femely any deterioration which may have taken place. A superior type of horse would be very shortly established, when the industry would be able to maintain itself with

to very shortly established, when the industry would be able to maintain itself with comparatively little assistance in the form of annual subsidies. While convinced of the necessity of increased State assistance we are by no magnitude.

While convinced of the nonessity of increased State assistance we are by no means mustaked of the exertious made by the Royal Dublin Society, and other Amociations, to assist the breeders of horses; efforts which have, in our opinion, done incalculable good in snabling farmers not only to produce a better animal, but also to sell him to the best advantage through the instrumentality of shows.

Administration of Grants.

16

think right to grant for the encouragement of horse breeding, we cannot but think that Geveroment all money devoted to this purpose should be confided to one department; and should not be divided as at present between two bodies acting in part over the same area, and with, to some extent, different objects in view. 62. With regard to the selection of stallions, the direction in which money should be

applied for the encouragement of horse breeding in different districts, whether in the form of prizes to mares, premiums to or purchase of stallions, and other such details, we consider that, as the wants of localities vary considerably, it should be part of the duty of those to whom the administration of any fund is entrusted, to enquire locally of persons deemed qualified to express a reliable opinion, as to the wants of the immediate neighbourhood, and if possible to give effect to the recommendations made. Local desires should be ascertained and satisfied as far as is compatible with the general public good.

63. To fulfil these duties we recommend the creation of a small permanent Commission on somewhat similar lines to that at present existing in England.

64. Failing the appointment of a permanent Commission, we would suggest that the Royal Dublin Society is a Body eminently qualified to discharge such functions and to carry out all necessary details, their executive being at present through their local committees, in touch with the whole of Ireland on this question.

Recom-

65. The recommendations of the Commission may be summarized shortly :-1. That it is desirable for the welfare of the country that greater aid should be given by the State to the industry of horse breeding.

2. That a system of registration of stallions, similar to that now in operation under the Royal Dublin Society's scheme, should be established in a more extended

3. That money should be spent in distributing stallions where wanted throughout the country, and giving premiums to private owners of suitable sires

4. That substantial premiums should be given to broad mares, especially those between the ages of three and six. 5. That additional prises should be given in the early spring to vearlings.

6. That the encouragement of Hackney stallions should not be continued at the public expense. 7. That all money devoted by the Government to the encouragement of horse breeding should be administered by one Department or Body, acting through

local bodies, and satisfying local requirements as far as is consistent with the welfare and improvement of the industry as a whole. 66. We wish to place on record our very high appreciation of the zeal and ability with which our Secretary, Mr. Hugh Neville, has discharged his duties and the great

assistance he has been to us throughout the enquiry. We have the honour to be,

Your Excellency's most obedient servants,

DUNRAVEN, Chairman, JAMES L. CAREW. HENRY W. FITZWILLIAM.

PERCY LA TOUCHE. LONDONDERRY. RATHDONNELL T. A. ST. QUINTIN.

HUGH NEVILLE, Secretary, 19th July, 1897.

REPORT OF THE EARL OF ENNISHILLEN AND OTHERS.

MAY IT PLEASE YOUR EXCELLENCY,

We, the undersigned Commissioners, in considering the question of the horse-breeding industry of any country, are of opinion that it is specially necessary to ascertain two points:

- What are the various classes of horses that exist in the country; and
- 2. What are the conditions of the people that own and produce them.

In the stallion return which has been put in, and is to be found in the Appendix, we have a carefully propared enumeration of all the stallions standing in Ireland in the year 1896. This return, which was made under the instruction of the Inspector-General of the Royal Irish Constabulary, divides the country into police districts, and is based upon a full and individual description of each stallion located in every police district. The return is curtified to as correct by the District Inspector in charge of each particular district, and will bear the strictest investigation. It shows that out of a total number of 2,387 stallions in the hands of private owners, 466 were thoroughhred, 264 returned as thoroughbred, hus not to he discovered in Weatherby's Stud Book, 651 half-bred, 816 pure-bred and half-bred draught horses, 72 pure-bred and half-bred Hackneys, 11 nondescript, 9 Arab or Eastern horses, and 98 so-called ponics. Of the total number of stallions of all breeds 498 were stationed in Ulster, 831 in Leinster, 202 in Connaught, and 766 in Munster, while in such essentially hunter-breading counties as Meath, Westmeath, and Cork, in addition to n considerable number of half-breds, more than one-third of the entire number of stallions in each county are returned as draught horses, so that practically the heavy draught horse is not confined to any particular part of the country.

When we come to investigate what are the conditions of the classes that produce horses we have no such reliable dats to go upon. We may therefore take the evidence of Mr. Ussher Roberts, who from his great experience of the country, would divide it into three districts:

The Southern, Eastern, and Midland districts;

1108,

The Northern districts;

The Western districts, comprising part of Kerry, Mayo, Galway, Sligo, and Donegal.

He stated that with few exceptions all the high-class horses were bred in the first district (1109). That the second produced "horses for harness purposes and general and

That the second produced "horses for harness purposes and general and agricultural and useful purposes"; and the third ha termed the "pony district" (1111) (1112).

In dirtict to Misch he termed the "great horn-breeding district of Indirtict No. In There is no the Control of the Control of

U

Class 2.-" Then there is the class of the well-to-do farmer, class 2, who has, as a general rule, a good class of mare" (1133); and these he afterwards described (1134) as holding farms with "a valuation of from £100 to £200"; and then Class 3, which Mr. Roberts states "would be composed of the larger farmers and gentlemen who breed horses in the country (1139) and adds "it is for the horses they breed that Ireland enjoys such a high character for her

Mr. Roherts was put forward by the Royal Dublin Society and the Irish Horse-breeders' Association, and other witnesses agreed with him on these points, Captain Fetherstonhaugh saying (1487)—"I agree entirely with Mr. Roberts' evidence in every point"; Mr. Daly (9705), "I would say that occasiounly good horses may be bred by small farmers, but as a rule the better horse is brod by the better class"; and Mr. Donovan (9536), "that he has bought very few horses from men who had under 30 acres, that the chief men who hroed horses have up to 200 acres, and that the average farmers in the South have from 100 to 200 acres" (9537). It must not be taken that those are altogether our opinions, but it is well, without adopting them as accurate, to consider what relation Mr. Roberts' divisions bear to the agricultural holdings of Ireland. On turning to the Census returns for 1891 we find the following particulars :-

Tanta, showing the Number of Holdings in each of Four Classes of Batcable Valuation in 1891 (from Census Return for your 1891), excluding Landowners and Country Gentlesons.

		Classification of Holdings and Number in each Class.				
Providen.		Color 220.	Over Strend moler state.	Over fire and take the	Over £500.	Trial Number of Endings.
Uneren,		134,506	33,736	2,041	692	172,975
Luxuus,		63,978	37,173	4,236	2,338	97,7:33
Muserus,	-	70,228	30,413	8,163	1,189	105,033
Consaudity, .	-	100,854	8,729	1,014	183	111,134
Indiano,		369,661 or 75-9);	102,091 or 20-9%	10,454 or 2:14%	4,756 or 97%	486,855

From these returns it is apparent how relatively few in number, even in Leinster, are the farmers who form the class stated by Mr. Roberts to breed good horses, and what an overwhelming preponderance there is of small holdings in the country; and as it is manifest from the evidence given to us that a large number of these small farmers in every part of freland, are and must continue to remain horse-breeders in conjunction with their other agricultural operations, their interests deserve to be no less carefully considered than the interests of those who are able to produce animals of a higher class

With regard to the mares it is more difficult to form an opinion, but it is stated over and over again that for a number of years all the hest mares have been taken out of the country, largely by foreigners; that too often only the mares that could not be sold bave been kept to breed from; "that the mares in the hands of small farmers are small and weedy" (4215), (6268), (6286); "have neither bone nor substance" (5838); "are extremely bad" (5962); "wellbred mares, most of them broken-down hunting or racing mares" (6736); "many mares are too weedy to be put to a thoroughbred " (6848); " the very worst ewe necked, low-shouldered, long-backed marcs" (7785); "until you regularly go down and look at them it does not dawn on you how had a mare can be (7811): "small, weedy mares, the wonder is how it could pay to breed from them " (8215); and statements of a like nature.

It is without thursteen that the good mures are clarify in the hands of the page insures and broeders referred to by Mr. Roberts as profited by the house, A few instances were given of Consumans posite being claimer than some grant disms of great handers, led it was refrequently stated by hander carrying handers and such high-class carraine houses as are proctaced by the handers of the control positions and such they class carraine houses as are proctaced by the handers and no cent less supported that a small very man would be salected to bread from for such purposes. All Medically stated "what he had been also also the best from for such purposes. All Medically stated "what he had been also also been also

further divided as follows:—Hunters and cavalry or riding horses, carriage horses for jobmasters, harness and general utility horses, agricultural horses,

and so-called posics.

Hauters.—The pre-emissione of Irchand in producing the best hunters in the world we not disputed, and although it was frequently stated that some of the best hunters were the produce of half-tred horses, it was generally satisfied that a strong thereoglebred horse was the best size to get hunters with a strong three oglebred horse was the best size to get hunters with a strong three oglebred horse was the best size to get hunters with a strong the strong three parts of the strong t

the year or what proportion they bear to some 40,000 horses sold for expect in 1896, hut Iveland is clearly at the head of the market in celling hunters. These are chiefly bred in the midland and southern districts, and although they are the most valuable horses sold, form only a portion of the Irish horse trade, the big prices given for the few attracting attention, whereas nothing is heard of the numbers and numbers sold at small prices. One witness, who had experience of the entire country, stating (7971) that "a great part of Ireland, in fact the greater part, was not fit to produce hunters." Several. witnesses contcuded that hunters and high-class harness horses were the most profitable to breed, and many went so far as to say that theroughbred and balf-bred stallions with a large admixture of thoroughbred blood, would fulfil all the requirements of the country (1481), and "should only be recristered" (362), (147), (1563), (657), (8517), (9575), and "that every man ought to aim at breeding a high-class lunter, or falling that, a good harness horeo (6039); "I think every man eaght to aim at breeding a hunter of some sory. (8102 and 8108); " would advocate nothing but thoroughbred sires" /9459 and 9507): "I would send them a thorongished home in all cases" (9820): "no other horse but a thoroughbred suitable " (9935).

Crucipy Horse.—It was she stated that agent from the demand of our on Government which is very muall, and confined to less than 1,000 horses a year, there is considerable demand for tocopen from moved foreign governments, and that the throughbred is the best berse to produce these, though it is not alleged that the breeding of tocopens as tempers would be a paying out of the property of the contract of the product of the contract of the contr

thought of often only as a last resort, one witness giving the prices of troopers in his district as from £16 to £23 (3117).

Johnston House, —These homes which were very frequently referred to, a variated to be high-less, fixed lecking strength beams, steading bount statem are raised as the policy should be form the strength of the strength of the best in the conth, and in many cases are bought by methem forders at these years only with beam for filled multi likely see fourly, who im a pleasanters which the second to the same integretement as to the section of their track, and there second to be some integretement as to the section of their track, Montre East, white the same integretement as to the section of their track, more East, seating (1979) that "he should saw that Mossey East bought and there is no second to the second of the second of the first, and eighty or ninety, respectively. Mr. Winshah further save that the now beyen is negligible to the second of the second of the second that the would much prefer if the could only law just homes in England or but that he would much prefer if he could only law just homes in England or the strength of the second only the second of the second on the second of the second of the second on the second of the second on the second of the second on the second of the second of the second only law just homes in England or the second of the second only law just homes in England or the second of the second only law just homes in England or the second of the second

Harness and General Utility Horses .- While in the south the farmers seem to turn their attention largely to breeding hunters, in the hope that a horse that is not suitable for a hunter will sell as a harness horse or trooper, in the north, or, as one witness put it, " North of the Boyne," where horse breeding is carried on almost as extensively as in more favoured parts of the country, the chief idea seems to be to try and breed a harness horse, (2134), (2850 & 2851). (3201), (3295), (3501), (3716), (3950), (8523), (9547), (9555). Mr. Todd Huston, Armagh, stating at (2148) "that it pays best to produce a good harness horse. which is worth £100 and over when it is four years old, and that amount is easily got for it." Mr. Thomas McMahon (3663): "I think, for the farmer, it is easier for him to breed harness horses than it is to breed hunters. In the first place, if you want to breed a hunter to go across country you must have good land that they are hred and reared upon, and you must keep thom well and train them well. If a farmer has a harness herse only half trained he can sell him, but there is no geutleman or dealer that wants to buy a hunter if he is not thoroughly broken to ride with manners"; and Sir Douglas Brooke unquestionably pay them best to breed harness horses." These horses are often worked on the breeders' farms at an early age, and where they are not good enough for harness, sell as general utility horses, and it was stated by witnesses who had a considerable knowledge of the trade that horses bred in the north did not, as a rule, go to other parts of Ireland, but were bought up by English, Scotch, and foreign buyers, and taken out of the country

With this special class of borse no quality is so valuable as action, but to this we shall refer further on.

Some witnesses appeared to think that a misfit hunter was good enough for a harness horse, but as others said (\$194) "No missit pays," and (10628) "You make a loss on your missits in all breeds." Though on this question the Rev. C. Legard says (12232): "No; except that a misfit of a Hackney would be really more serviceable for light earts and other things, whereas a thoroughbred misft would be worthless."

Several witnesses who had a knowledge of the trade in high-class harness horses in England thought that from its exceptional advantages in producing every kind of horse Iroland should chiefly supply this trade, which is now so much in the hands of the fereigner, Mr. Burdett-Coutte saying (10754): " Five years ago a veterinary surgeou of the greatest experience in London told me that of the horses over 15.3 in London dealers' stables, eighty per cent. came from abroad. He had great experience and great knowledge of foreign horses, and of the English trade with foreign countries, and I should be inclined to believe that was the case."

The demand for the class of harness horses which people drive themselves, and which draw light carriages, the trade is which is said by the coachhuilders to have increased nearly 100 per cent. (11605) is stated to be "oertain and universal" (10595), and "the most valuable portion by far of the harness trade" (10761), and "that which is now largely supplied from abroad," and in a statement Mr. Burdett-Coutts handed in he further said that (p. 14) "that there is a large and constantly incressing demand for all sorts of harness horses in England" (p. 7); " and that there are no counties in England in his experience where horse breeding has been anything like the profit to the breeder that it has been to the Hackney breeders of Yorkshire and the eastern counties" (10809).

Agricultural Horses.—The pure-bred Clydesdale or Shire horse, so general in England, is very little bred in Ireland, except in the neighbourhood of a few of the big towns, and it is to its absence and use of bighter horses on the small farms of the country that the better breeding of Irish horses may in a great degree be attributed.

At the same time it is evident from the stallion returns and from the avidance before us, that cart horses and half-hred cart-horses are largely bred from, which is natural considering that these low class stallions usually stand at very low fees and are consequently much more patronized than horses at higher fees, and that their foals looking large and strong are easily sold to small dealers in country fairs.

According to the Registrar-General's neturns a very large, number of houses in Irshad appear to be used for agricultural purposes, in Ultar's 8 per oset, being returned under that boad, in Leinster 74, in Muniter 85, and in Connaught 89 (639 and 643); and there is undoubtedly a considerable trade among the people themselves for general utility horses to work on their little forms.

Clauses are given at the Dublia Beliat, Cork, and few other shows for generatural bowes. That they have been introduced for a considerable time generatural bowes. That they have been introduced for a considerable time for having a 170° the Boyel Dublia Scienty passy prophene does not be about inpret. "As strong ables tears for the plough and other country work," and pass a special price of £10 to Lerd Shannon for having at the 250 by a permission of £50° to the program when the second passes of £50° to the precess when the half lapset the best bit of hours of the Sudalt Penals haved to consist of one efficient and two arrangs," and it is stated that at the nor is 1315 to howeve very sugratural draught of the state of the theory bowers, but more and state of the state of the state of the theory bowers, but masses and statellane, the forester tower their hours and it is an undoubted fast that this exame blood is spend over the country and exists in clause twey part of it.

A Derry witness stated "that Clydesdale blood had been a long time in the country" (3211). A Cork witness speaking of Clydesdale stallions (4387) said "As long as I remember there was an odd one here and there;" and another Cork witness said "he thought the mares had cart-horse blood in them here and there" (4434). A Tipperary witness refers to thoroughbred blood being crossed with Clydesdales, Suffolk Panches, and Shire horses (5751), and a Kildare witness agrees that cart-horses and half-bred horses form more than one-third of the entire stallions in Ireland (6661). Mr. Carew described how Clydesdales came into the district of Kiuuegad, County Westmeath (7763). A Mayo witness refers to the introduction of both the Clydesdale and the Suffolk Punch (9206), and a Kilkenny witness on being asked how long there had been Clydesdales in his part of the country says, "Certainly for twenty years there have been, and more; they have been gradually coming in in larger numbers" (6128). Mr. Meleady (10175): "The mixture of ponios with Scotch homes that not into the County Galway and County Mayo runned that country, and they are neither ponies nor horses; and there is a great many through every county as well, for they sell them as feals. The Scotch horses came

here when I was a very young boy?

The introduction of Clydesiale and Suffolk Punch blood is attributed the deterioration of the Connersar pory (5287), and Clydesiale blood is etrougly objected to both in barnoss bores and hunters (2174), (616), (6284), (5603), (6410), (6794), (6796), (7876), (7876), (6310), (6010), (6798), (7986), (7876), (7876), (5010), (6010), (6018), (6988).

Penies — off proper points but the sais in Vedeal. There is a bread of bardy points at Cahandall, in the County Astrim, and Ortogo Consensaand West Mayo may still be found reminates of what were known as Consensan points, but these are greatually developing into the little horse suitable to the work of the districts, where in some cases plought have been only introduced within the last two revers. It is not contained even by Mr. Miller that it is possible to bread a region of the contained of the last the contained of the con

Thoroughbred Stallions.—Although thoroughbred sires of the right stamp are to be preferred show all others where mores are statole, it is evident from the class of mare is one localities and the conditions of the people and their surroundings, that the question of encouraging other descriptions of sires must be recognized.

An Antrim witness said that he found his stock deteriorating from hreeding constantly with a thoroughlerd (1788). Another witness from the same county observed that, putting fees saids, the farmers seem to have a feeling that it is rather risky breeding from a thoroughberd horse (1896). Mr. Morton, of Bullymens, sated that he offered the everice of a good thoroughberd horse

free to farmers about him on various orcusious, and they declined it, while he could get as many mares as he wanted for his Hackney stallion at a five guinea fee (1993). An Armagh witness remarked : "You must introduce something to put bone and action into these weedy marcs. If I put a thoroughbred horse on these light weedy mares, as the farmers at present are doing, the stock is worse than the marc itself" (2154). A Tyrone witness. referring to sires subsidized by the Royal Dublin Society, said : " I have seen nothing but weeds bred out of them" (3710); and another Tyrone witness stated that "There have been thoyoughbred sires in the country for the last twenty years," &c., "but on an average the mares were not fit to breed from thoroughbreds" (3929). A Kildare witness on being asked what class of stallion the farmers used about him, states—"They used the thoroughbred till they got sick of him" (5132). A Kilkeony witness says-"There are certain classes of marcs that do not suit thoroughbred horses" (6132). A Carlow witness-"Thelieve the difficulty myself is that the thoroughbred we have had in the country has ruloed the broad of horses" (6279). A Mayo witness, referring to the scheme of the Royal Duhlin Society, said-" Well, it bas done no good; all the hunters that are got by these sires are weedy" (6550). A Tipperary witness (Mr. Trench) said: "I believe it is necessary to have some cross; if you go on using nothing but the thoroughbred you will end in weeds" (5758). Mr. R. G. Cardon (5847), in his evidence stated : " I consider the cross of the Hackney on the weedy marcs of the country would he better than the cross of the thoroughbred at present available": and (5865), "unsoundness is very often the result of the cross of the thoroughbred horse'; and, again (5936); "The progeny of the thoroughbred horse is practically unsaleable before he reaches the age of three years" A Kildure witcoms, who had been to the West of Ireland said "he would not be in favour of sending a thoroughbred there" (6882); and another Kildars witness states: "For the average of the colts that are bred the draught horse is paying far more at present than the thoroughbred horse. There is no doubt about it "(7229), and (7246)—"bred horses are not fit for soull farmer." A Mouth witness declared that "he bad found it necessary to introduce cart blood to cet horses that looked up to weight " (7760). Another Meath witness said : "I do not see in breading bunters how you are to keep breeding from thoroughband horses" (7933) A Donesal witness: "The farmers are prejudiced against breeding from a thoroughbred horse in our district" (8462); and (8486)-" The Royal Dublin Society's schemes have been a failure altogether." A Mayo witnessa ovidence was that—" those that bred from them found by experience that when they cootinued to sand the fillies got by thoroughbreds back to a thoroughbred that in two or three generations they got weeds" (2338). Sir Owen Slacks thinks "there is nothing worse than a useless weedy thoroughbred " (9606); and Mr. Burdett-Coutts-"The thoroughbred is not the horse to get harness stock, because in ninety-nine cases out of a hundred his produce is deficient in action, which now raises the price of the haroess horse all over the world" (10518). From these and other statements it will be necessary for us to consider very core fully what has been said of half-bred sires.

Individual Hence on Thomas Series—Serval definitions of what a half-web in studied has here may given to use plifficant variances. Some some that the filter of the studies has been some some that a half-tree should only be used if he had overall consecution of the studies of

a Board of four or five really practical competent men. I think it would be Printed image distribut by the University of Southernoon Labour Distribution first

Prented image distributed by the University of Southernston Library Disdisation Unit

very likely to have a most ruinous effect if you lot a horse of that kind elip in without the greatest supervision "; and (877)—"You would have to breed that class of horse; I don't see where they are to be got now."

Captain Fetherstonbaugh (1418)—"I also think that a class of stallion is

required in the country other than a thoroughbred horse for the use of small farmers whose mares are of a weedly description. I think a half-bred horse—that is to say, a home with a good admixture of thoroughbred blood, and hred from what is called a country mare—an old Irish country mare—would be the

best stamp for use in the country."

Captain Tuthill says he would require "certainly not less than three thoroughhred crosses on the dam's side in a half-bred horse " (1702). Mr. Morton -"I would be far more particular about what they got than whether they had so many or so few crosses of blood." An Armagh witness-"A half-bred horse is a horse got out of a useful more by a thoroughbred horse" (2139): and (2179),—"I prefer a half-bred stallion got by a thoroughbred out of a Hackney mare"; (2589)-"I would not object to any stallion in the Hunters' Improvement Society's Stud-book." Referring to a famous half-bred horse oalfed "Harkaway"--"If there had been a stud-book for that Harkaway breed, so that they could be sold in America and other places. I could have sold some myself in America if they were registered in any stud-book " (3118); (3373)—"I would not breed from a half-beed stallion at all; you don't know what you may get." Sir William Conyugham was in favour of a sire whose pedigree you could not absolutely trace in the sind-book, "but that spoke for himself as a thoroughbred" (3413). Another witness said (3772)-" As soon as you throw in mongrel hreeding, you are very liable to throw up the hereditary diseases that exist in hersen"; and (3818)—"If you hreed from a purebred horse and a half-bred mare, as a rule you will have the produce thrown to the horse, hecause the strong blood is upon the horse's side-on whichever side has the purer blood you will find the foal thrown that way; but if you breed from a half-bred horse and the mongrel mares through the country, you don't know what you are going to get. Colonel Spaight (4004)—"I don't believe in them (half-breds) at all "; (4271)—"I would not go further than the first cross of the thoroughbred borse on to a good well-shaped old Irish mare." Mr. Barry states that he would not register a half-bred sire under any circumstauces (4359). A Queen's County witness:-"I think the curse of Ireland is some of those half-bred sires" (4633). Mr. Wo. Dunne:—"I would only subsidize thoroughhred sires; I would draw the line hard and fast" (4741) and (4747). " As a farmer I have very strong ideas that it is almost impossible to breed from a half-bred of any sort, and that breeding half-bred with half-bred, ten to one the produce would be unsound" (4770). A Mayo wituess:- "I don't believe in half-bred sires" (5342). Mr. Peter Fitzgerald would make the production of good stook a necessity in registering half-breds (5451). Mr. O'Malley (6409):—"I do not approve at all of the half-bred stallion, I would like them pure of any bread." Mr. Winter (5576):—"I don't believe in the half-bred stallion." Mr. W. Trench (5676):—"Yes, I think the half-breds would be a decided improvement if we had good half-breds." Mr. R. G. Carden (5840).—"I consider that the correct type of half-bred sire that should be used in the country does not exist at present except in a very few cases, and consequently they would have to be hred." Mr. Reynolds, who keeps five stallions, thinks :-- "The halfbrid is the most useful to the farmer '(7824); and Mr. Carew states: "But the half-brid horses I think are the most profitable." Mr. Bonford thinks the produce of 'half-breed is very uncertain' (7898). Mr. Thomas Donard would not give one penny of Government funds towards subsidizing halfbreds " (9442). Mr. Daly (9718) .- " If you breed from a thoroughbredwire with a very moderate mare, the produce very often is a good horse. If you cross her with a half-bred horse my opinion is that it is a very doubtful case. Lord Coventry objected very much "to half-bred sires with a certain number of strains of thoroughbred blood in them" (12015), and (12017) said " I would never use them at all noless for thoroughbred mares. My contention is that you must have the pure-bred on one side to be snecessful

From the above opinione it will be een with what care any public recognition of half-bred stallions should be attempted, and bow necessary it would be to establish a stud-book or optaem of registration for such horses in which all reliable details as to their breeding outle the easily succertained. We suggest, in order to obtain such horses, societies should consider the advisability of divining substantial prizes for two and three year-old entire olds. While on this subject, it may be well to notice soon of the contract of the contraction of the contraction of the contraction of the contraction of borres or the establishment of a Hunter's Skid-Book.

Licenson and Registration.—On the question of licensing stellions there seems to be a very general opinion that it would be destrible for stellion owners to be compelled to take out a license via unbiastial fee, to be obviously a notified sum in the control of the control of

favour, there was no such meaningly as to the exist nathod in which it should be carried cut. Some attentions suggested in there also allow a beabout the carried cut. Some attentions suggested in the three also allow a similar to that shearly in existence in England. It was, however, constantly similar to that shearly in existence in England. It was, however, constantly would rehance its value and do much to estimate the sharper of the interduction into humano far which of the angle for estimation of the plant of the plant of the single existence of the single of the interduction into humano far will be of the single of the interduction into humano far will be of the single of the interduction into humano far will be of the single of the inter-

To the breeder of good animals the advantages of registration are unsaffest, as it scaleds the buyer to go direct to the breeder without the intervention of the middlenam, and it is no doubt in part due to the formation of the Sbire, Clystealle, Hackney, and other breed noteless that such large sums have found their way into the pockets of those who have taken up and developed these breeds. There is no reason why Urish butter breeders should not also

share in like advantages.

Mr. George Harris (5556) said. " As to the registering of sires. I would not only register them with the Dublic Society, but I would morister all sires and mares used for breeding purposes," "All sime and mares could be registered with the Petty Sessions Clerk, just the anne as you register dogs, and the register could be kept open to the public," and (5557), "I would keep a stud hook in every district, and then the Clerk of Petty Sessions could issue a certificate that the mare was served by such and such a horse and a certificate of the produce;" and (5371), "Then in atter generations you could go back, and if there was a Clydesdale or Hackney eyes you could go back and trace Major Councilan (at 6143) makes several definite suggestions on the subject, which he says "would enhance the value for sale, would do away with fictitious pedigree making, and would be more easily carried out than would at first appear." Mr. Winter (at 5668) suggests that "if practicable, every stallion and every brood mare of every brood in Ireland should be registered," and states (at 5744) that be has known several instances of horses being entered in the Dublin Show Catalogue with pedigrees and bought subsequently to suit the podigree. Mr. Wm. Trench also agrees and says (5765) "I think it would put down hogus pedigrees to a great extent, which is very desirable." He also advocates a Hunters' Stud-hook (5778), and states (5777) "In conclusion I think we ought to try and breed our hunters pure," and says that he thinks "registration would produce a stud-book "(5816). Mr. R. G. Carden (5948 and 5949) "would go as far as establishing a studbook of every breed in Ireland that had not already a stud-book." Captain Smithwick.—"I think a hunter stud-book would be of great use in time to come" (6049). Mr. E. Kennedy (6614) thinks a "Hunter Stud-book would be of great service to foreign buyers," and (6727) "Is sure the registration certificate would be extremely advantageous in selling Irish hunters." Colonel de Robeck thinks "an Irish Hunters' Improvement Society would do a lot of good" (6761). Mr. Ruttledge, speaking for the Hollymount Society, says 9222), "We are anxious to have these hunters in the stud-book . . . and (9232), "We are anxious to have toose numers in we are in a few years as an if we can breed pure-bred Irisb hunters to stamp them in a few years as an Irish breed." Mr. Melendy 10180)—"Begor, my opinion is that I would register the mares and horses." The Rev. Oedl Legard thinks that "horsebreeding in Ireland is a sufficiently important industry to warrant a system of state revistration being started " (12228 and 12229).

Hackneys.-We now some to the vexed question of Hackneys and although it is the action of the Congusted Districts Board in introducing some twenty of these sires into the West of Ireland that has chiefly called attention to the subject, it is well to bear in mind that according to the stallion returns for 1896 saventy-two pure-bred and half-bred Hackney stallious were standing in Ireland in the hands of private owners, forty-three of these being in the province of Ulster. In putting the case against Hackneys we cannot do better than take the following statements by Mr. Ussher Roberts (at query 1954). He says,
"No, I am sure the produce will find its way into the Midland Counties and other horse-broading districts, and will be hought perhaps by the small farmers there, and when turned out on good land and grow to size and well fed will find its way and be used as brood marcs for breeding hunters or carriage horses, and that will tell on the breed of these animals. That to my mind is the great danger of introducing the Haskney blood, for you cannot by any means prevent it from permeating to those districts in Ireland where horses of the well-bred class are bred. Of course if it were possible to huild a wall around them in a certain district, and leave the Hackney there, then they will do no harm"; and again (at 1276) "I don't think it is a wise policy to benefit one particular district at the expense of the Government when it would probably have the effect of injuring snother district where Government aid is not sought in developing that industry." It has also been objected to Hackneys that they are a soft non-staying breed, and have a useless class of action, and are quite a different snings from the old Roadsters from which they are descended, but looking savefully through the evidence we do not find these charges substantiated by witnesses who had any considerable personal experience of the breed. Such allegations appear to have been made more on heaves and by witnesses who are hunting men or the owners of thoroughbred stallions, or dealers in hunters, who naturally prefer the thoroughbood to any other type of borse. borse. Those witnesses over and over again speaking strongly against Hacknovs, and making the most extreme statements, and then in the end, in almost every instance, admitting they had no personal experience of them. We had several instances brought before us where Hackneys were the sires of excellent hunters that were able to stay well, and which sold for high prices, but, as in the case of Consessara penies sometimes producing good hunters, we must look upon these as exceptional cases which will not afford any safe basis on which to base conclusions, and the Hackney can only be regarded as a harness home.

A letter written by Meseys, Rast, the well-known jobmusters, was frequently noted, but when it came to the examination of their manager (Mr. Newman) their trade in Ireland appears to be limited to less than 200 horses a year. He stated "that he should prefer the Hackney to the eart-horse or Clydesdale cross" (11208), and Mr. Withers, though not professing experience, said "that the fact of a horse having Hackney blood would not make him heaitate on buving it if it was otherwise suitable" (19863), "and that for his trade he should profer

Hackney to cart-horse blood (12939)

Printed image delited by the Limerally of Southernston Library Diviligation Lind

The following may be taken as a fair sample of the objections to Hackneys by witnesses who had no actual experience of them. Major Studdert, whose experience was confined to riding and driving two animals many years ago helonging to his wife's uncloin Suffolk that he could not say were true bred Hacknevs. on being asked what would be the effect of the introduction of Hackney or Cleveland blood in producing high-class harness horses or hunters, says (745) "I have no hesitation in saying that in my opinion it would be ruinous to that class of horse, and a great means of ruining the Irish farmer." Mr. Peter Fitzgerald, as Chairman of the Limerick Horse-breeding Committee, put in a resolution passed by that Committee objecting to "The State sided introduction of Hackney Stallions into any portion of the country, and suggesting in substitution thoroughbred horses with bone and substance, or sires as nearly thoroughbred as possible" (5522). Major Connellan (5188), "I think generally we ought to panse before we do anything to introduce any particular wreed which is likely to oust the thoroughbred horse."

Mr. Winter (5686):-- "If you breed from Hackneys you get horses with no middle piece, mean quarters, good front action and so hind action, with ugly heads and ewe necks as a rule. I allude to the half-bred Hackney. I believe if you breed Hackneys you should breed them as pure-bred.

Mr. Kennedy on being asked if it would be possible to isolate the Hackney breed in the Congested Districts (6651) replied-" Certainly not; they would be purchased with others to be imported into Leinster which are the hunter

producing grounds in Ireland, to be sold there." Sir Owen Slacke (9583) :- "Mon from all parts have come to buy horses in

Ireland because they believe that the Irish blood is very pure, especially as regards hunters; that is what is called good jumping blood. Well, if Hackneys are introduced largely into this country, of course it would be a great 'crab' on that industry, and I think it would be a very great pity that would give the name that Ireland is deteriorating in horseflesh. Those are my principal reasons against Hackneys."

Mr. James Daly states with reference to the introduction of Hackney blood (9724):-"I think if it was the object of the Government to ruin the horsebreeding industry in Ireland, they could not go about it in a more effectual

On the other side there is a great volume of evidence in favour of the Hackney by men who have tried them, not only as to the value of the cross on little weedy mares that will not breed a good animal from a thoroughbred, but also as to their hardiness, endurance and soundness as compared with other breeds, while the Hackney is acknowledged to be the best sire for producing the light harness horse of a smaller and more fashionable type

than the johnnaster's home. In favour of the Hackney, it was stated by such authorities as Mr. Clement Stephenson and Professor Pritchard that they were a particularly sound breed, while Mr. Sproule and Sir Douglas Brooke both gave their personal experience as to hardiness, Mr. Sproule saying (3732):- "The Hackney horse is a hardy horse which I know from experience, by having the foal of the Hackney, of the thoroughbred, and of the Clydecdalo, and seeing them running together. The Hackney horse meets the purposes of the poor farmer," and (3805), "but the Hackney horse is the only horse for the North of Ireland; that is my opinion," and Sir Douglas Brooke—"I had them all running in the doer park together, and where the thoroughbred produce was not thriving the produce of the two Hackneys were as fat as they could stand " (8365)

Several witnesses also said that Hackneys would get a horse that could do light farming work at an early age, and be sold at a fair price afterwards (1739).

(1876), (1881), (1911).

Mr. N. Morton, speaking from experience, said :- "I think some Hackneys are as good and game animals as are living, and can stay as long as blood ones." Mr. Archdale thinks that a Hackney is more calculated to produce a saleable horse than a thoroughbred with the weedy mares of the country

(2485, 2486 and 2467). "I think the Hackney etallion is the favourite class of stellion in the country at the present time. Mr. Ingram, Doneon (2675) 4 I do haliove the Hackneye are very suitable

for our horses which are light little maree, and clean limbed," and (2844) " our mares are too light to match with the thoroughbred horse. Mr. Thomas M'Mahon (3568) :- "You must have a Hackney with good neck and shoulders, good knees, legs, and feet, a short back, and a tail on the ton

of his back, with action; if you put that upon a half-bred mare in my country

I will guarantee you will breed a good celling horse. A County Clare witness referring to the stock of the Hackney cays (4049):-"They are useful for the farmers for their own work, and they can cell them

earlier than they would the produce of the thoroughbred animal; they develop earlier, and become more neefel." Mr. James Butler (Kerry), speaking of the sires belonging to the Con-

gested Districts Board, stated (4963):-" They have done considerable good in the district. They have given the small farmer of the district an animal that will be useful to him for his own work, that is a small strong stout horce, quiet and easily trained, and he is enitable for the farmers' own work in that district." A Mayo witness who had seen between fifty and sixty of the produce of the Hackney stallions (5277), would not recommend any other class of stallions for the seaboard district at present (5328). Mr. Carden (5870):-"I consider the Hackney the same of perfection as a

Mr. Chrush (early)— I Commend on Annually as a sum of perfection of a carriage horse," and no being asked what stallion he would recommend for the Congested Districts which he had visited on more than one occasion in order to investigate the horse-breeding operations of the Board, replied (5969). "Unopertionably the Hackney." Mr. Kennedy (6677) would rather prefer, from what he saw, the Hackney

to the small breed of Welsh pony in the West Captain Townshend (6976) :—" I think a great deal of the agitation against the Hackney is that they know nothing about him. They got up a memorial

in the County Club at Cork, and half those who signed it knew nothing at all about Hackneys," Mr. T. M. Cavew would prefer the Hackney to the half-bred for the very

small mares (7745). Mr. Burdett-Coutts (10788):-- "My conclusion with regard to the Hackney stallion as a getter of saleable harness stock from half-bred mares in

that, given good pedigree, good quality, good size, the Hackney is infinitely more valuable for that nurpose than the thoroughbred stallion Sir John Watson, whose experience extended all over Iudia for a period

of some thirty-eight years, said (10822):- My opinion is that the introduction of the Hackney stallion upon the Indian mare has been attended with great advantage"; and (10905) "I said that the best remounts I saw were bred by Hackney stallions out of mares sired by Arabs. It is true that Mr. Drage, who had three years' experience of borse-

breeding in the Punjab, and was altogether six years in India, stated that he did not consider the produce of the Hackney as good as the produce of the thoroughbred; but Lieut. Col. Hallen, who was for eighteen years Inspector-General of Horse-breeding for India, states that, whereas at the commencement he was opposed to the Hackney, he subsequently came to the emclasion "that the best horses in the Stud Department were those that had a dash of Hackney blood" (No. 11026), and further (No. 11027) he considers "that the Hackney sire is preferable to the thoroughbred sire for the purpose of getting remounts, provided that he was of the proper stamp."

The Rev. Coul Legard (12110)—" But if there are districts where they do

not profess to breed hunters, where there are email, little, mean mares, I would

not say ponies, but pretty well-bred little things, there I should say that they would do much better to have Hackney stallions in that district than thoroughbred horses, emply with the idea of broading saleable animals for harness," and, being asked if he had seen the Hackney stude in the East Riding of Yorkshire he replied (12165)—" Yes, I am a native of the County, I have been among them all my life. Lord Ebrington, former Master of the Devon and Somerset Star Hounds.

was specially called to give evidence as to Exmoor ponies, and referring to Haelmeyn as crossed with these ponies in the hands of the small farmers, ponies which in their type and surroundings in some degree resemble the small horses in the Concested Districts, says (13421) :- "The Hackneve give them style and action and are ant to improve their shoulders, and get some very neeful nonice," and later on he stated that the stock from these mares with a Hackney stallion he kept were the first to be sold in the market, and that he thought a Hackney cross was a good one for grading up such mares.

And Captain Fife on being asked (13840)—Would you object as a chance cross more to cart-horse blood in hunters, or to Hackney blood in hunters that had a considerable proportion of thoroughbred crosses ?-replies. "I would rather have the Hackney with the considerable proportion of crosses to the cart-horse." (Nearly all the sires imported by the Congested Districts Board go back to thoroughbred crosses).

Mr. Hetherington'e evidence, however, on this point is specially worth consideration, both from hie wide experience in dealing in all classes of horses and his intimate acquaintance with the foreign trade and the French

Government stads. He states that he has now purebased stellions for the French Government for the last twenty-three years, buying during that period an average of twenty and cometimes up to thirty Hackney stallions each year (13606). That these stallions are used to produce artillery horses, for which they prefer the Hackney, because he does not want to canter, and " to improve the courage of the native mares." "That they are very popular with the breeders" (13615), are "used in preference to the thoroughbred" (13619), "improve their horses more than anything" (13632), and have not been the subject of any complaint as to softness or want of staying powers, of which Mr. Hetherington would have been certain to hear. Mr. Hetherington has also purchased hunters in Ireland since 1866, and

strongly advises the South of Ireland breaders" not to waver in their alleriance to the thoroughbred and the hunter"; but he states that after a long experience he considers that "for harness horses the Irish horses are too much given to canter," and that, "take him all round, the Hackney is the best harness home in the world "(13597), and that he is a great believer "in the Hackney put to any sort of mare " (13720).

On the subject of detecting the Hackney cross in other animals the

following replies were given—
Mr. James Daly (9726) "There is no difficulty in detecting the strain of
the Hackney to any man who knows anything about a horse. I don't see any
difficulty about it at all." Mr. Thomas Melessly gave it as his opinion (10795) that a judge would be able to detect the Hackney strain in two or three

Lord Computer (19080) ... I think it would be much engine to detect Hackney blood than cart blood in the hunter"; and Mr. Hames, on heing asked if he would be able to find out any blood to which he objected, said (13050) "I should if there was a Hackney," and "I think they are very marked."

Clauses to be assisted.-We must now consider what has been said as to the classes in Ireland who are in need of assistance from public funds. The poorest districts in Ireland are already under the charge of the Congested Districts Board. It was stated, as before mentioned, that the horses for which Iroland enjoys unch a high character, were chiefly head by the eventry and farmers of over £200 valuation, and in the distribution of the grant of £5,000,

the Royal Dublin Society only recognize farmers under that valuation A Westmeath witness, referring to the big farmers, says (1526) "Intt I consider that class of men don't require to be legislated for." An Antrim witness on being questioned as to who derived most benefit from the Scheme of the Duhlin Society, says (1736) "It is the poorer farmers who do, that is farmers from twenty to thirty agree, who breed most. I would say that 50 per cent. of the farmers who breed are the holders of holdings from twenty to thirty acres; they are the class who breed most," and (1810) "I certainly think that the oninion of those men should be taken as to their own requirements; as a rule, they are an intelligent, hard-headed, shrewd people, quite capable of knowing what it is they require," and another Antrim witness (1874) "You may send thoroughbreds into a county like mine, and the farmers wont patronize them; they are wide awake enough to know what suits them." Mr. Morton (1976) "I think if you take two or three descriptions of stallions, and put the hest examples of their own breede within reach of the people that you might fairly trust them to find out what were the best to breed from, and what were the most paying ones to breed from." A Donegal witness (2345) "I think the people know what suits them remarkably well." Mr. Archdale, on being asked whether he thought the people themselves ought to be consulted in carrying out any scheme with public money, says (2542) "Well, I think they ought to be consulted to a certain extent. I think they know perfectly well themselves what they get cale for. There is no use making them breed what they cannot A Londonderry witness, on being asked if the emaller class of farmers do much in horse-breeding, says (\$225) "They do; a great many of them always breed a horse."

Tyrone witness (3785) "I consider a man with a valuation of over £150 in my district wants no help whatever." A Clare witness (4112) "I think the larger class of farmers are able to help themselves, but the smaller class require help."

Mr. Carden, speaking of Tipperary (3839—"The people who chiefly brillent the horzes, irrespective of the monial classes, are the small agricultural tenants and working farmers who generally teop one or two brood surse with which they do their form work, and from which they broud a find as a rule edge, and the state of the state

Mr. Dawson Milward (7498) "The multitude of horses are in the hands of small men, and that is what I want to improve; if I could do that I would be satisfied to allow the few to go as they are."

Lord Coventry thinks that the poor farmers would have an equal claim with the big farmers to be improved "(12055)

with the big farmers to be improved "(12055).

From all that has been said, and the evidence that has been reviewed up

to this, it is clear that very different conditions prevail in different parts of the country, and among the different cleases of brockers. In the sentiture and "midlined districts number brooking tables the lead ; in the north the brooking of themes howers pays hear, and is most generally followed, and is the vost the brooking of handy useful anienas, which, if kept, will do the wort that is required of them, and if the will realize higher primes than they do at present, when action is no essential; while all over the country agricultural horses of some hind approphers.

It has been upped that everything should give way to hunter breeding, for which Iraland has acquired such a well-described reputation, though probably only a very small propertion of home breeders in the country are prefused pengaged in that understable, and in connection with this it must always be horne in mind, that during the last twenty years precisely by the shows has been in the direction of communing the burnet; all the country shows has been in the direction of communing the burnet; all the country

No systematic attempt has been made to develop the breeding of harness horses, where a valuable trade, now too much in the hands of the foreigner,

should be opened up to the Irish breeder.

Year after year at the Dablin Show the harness prizes have been taken by horse not breed in Ireland, which is admitted to be the best breeding ground in the world for creay kind or horse, and while the best breeding ground in the world for creay kind or horse, and while the best horse is better than the world for creay kind or horse, and while the best horse is better turned into morror.

We are of caption that asso, branch of the industry and case, began and

in it describe showing and it is the control of the

It as mus to us as illogical to subsidise only the thoroughbred home, as for the Shortborn breeders to object to Aberdeen Angus or Galloway eattle, or the Roscommon sheep farmers to Shropshire or Southdown sheen.

There are one or two general propositions about which there is no oursery such as that a theroughhead home or well-brod ball-freed horse is in all cases the best hander sir; that there is a loss to the sountry from the sole that the second of the sountry from the sole that is is desirable to mark fameties however the second of the sole of the sountry from the sole that is it is desirable to mark fameties however when the being imported in very large numbers, and that ireland from its soil and elimate excels all others as a new-breading country, or as Mr. Newstant asys (11129). The country is before

Action.—On the question of the value of action in selling a harness horse there was an unanimity of opinion, one writness stating (2430) "The poorest man in the country will look to action; it is one of the things that pays best." Another (3502 It is the one thing that does sell a horse in a fair."

Another (3002 It is the one thing that does sell a borse in a fair." Mr. Thomas M'Mahon (357) "A col to reapything you take to macket to sell, if it has not action, he is just like a bell without a clapper, it is very little use." "It is corrything in the harness hores (581) and I am sure the Hockpay sire will produce better action if he gats a suitable mare" (3822); and, referring to harness horses, Captain Donnellan said (4604). " I am quite sure price is guided to a very large extent by action." (6288) "It is the chief point with the harness lorse"; and Mr. Carden considers "action the most saleable commodity in harness horses" (5926). Captain Townshend "My experience is that you can cell anything with action, no matter if it is not " (6926).

Another witness, alluding to the Moy Fair (8562) "You will have twenty

men pulling you on one side if you have a good stepping horse." Mr. William Bainbridge states (11428, &c.) "That horses with action fetch the readiest market of all horses that pass through his hands, and are more saleable in the English market, and that action is contained in a greater proportion in Hackneys than in any other class of horse," and at (11503) "That Irish horses are deficient in that kind of action which really sells well for barness borses."

Mr. Withers (12942, &c.)-" If you get a horse with action he sells for a good deal more money," and "As a matter of £ s. d. action is most desirable."

Heredity.-Every horse will only produce stock like his breed, and if he possesses some attribute which is not characteristic of his breed, he cannot be relied on to reproduce it. A little thoroughhred horse may beget big stock, and a hig thoroughbred small stock, but he is pretty certain to infuse speed, courage, and quality, and that low galloping action for which he has been hred for generations. While a Hackney, with almost equal certainty, will impart hardiness, soundness, tractability, and vigour, and that trotting action which it is not seriously contested he has the power of perpetuating more than any other horse. As Mr. O'Reilly states (555), "His characteristic is action, and that he transmits it to his get, almost without exception, is my

experience."
Mr. Burdett-Coutts (10598) "It is an hereditary property; there is no question about that. If you turn a Hackney mare and foal out of their hox the first time von will find that the feel will trot and steps high alongside its dam, while a thoroughbred foal will canter."

While Captain Fife admits that a thoroughbred horse will cortainly not perpetuate action in the same degree as a Heckney.

Congested Districts Board,-We have been asked to review the horsebreeding operations of this Board. We do not propose to go into floures, or to describe the methods adopted by the Board, as these matters are public property and have already been given in detail in published reports and in every section of the Press. We can only remark that to a large extent the work of the Board must up to the present be looked noon as experimental. that it is too soon yet to judge of the results, the oldest of the animale bred under their scheme being now only four years old; that the initial expense of all such schemee is heavy, and that to take the expenditure during the first few

years of its working as any guide to ultimate results would be altogether unfair.

The following letter, which was addressed to the Commission, by the Congested Districts Board in January last, given the Board's case so clearly that we think it well to give it in full-

Copy. "To The Secretary.

"Commission on Horse Breeding. " Dublin Cestle

"Congested Districts Board for Ireland, " 23. Rutland Sonare, Doblin. "5th January, 1897.

"Stn,-The Congested Districts Board for Ireland have observed that the inquiry that is being had by the Commission on Hersel-breeding, must attend as to solve the use on requiry rate in owing had by the Commission on Hersel-breeding, must attend to a hear directed to the interclustion of Hackney stallions has the congreted estimate by the Board. On his account the Congreted Datrictic Board request that they may be affected an opportunity of predicting witnesses from various parts of the congreted estimates when well be competent to gene from setual experience of the Hackney breed, and of the result as for of the interchemic of Hackney stallions into the norththe Hackelley over, and south-west of Ireland. The Board think it essential that such witnesses should be offered to the Commission in order that the action of the Board and its results may be placed before the Commission in the Irec high, karring regard to the facts and bearing in mind the statements of many who speak from pre-concerned ideas, without any personal experience of Hackneys

"It is due to the Commission, the Board consider, that the motives and considerations that infranced them as the time of their furnation in 1891, and 1892, should be placed clearly on

record for the information of the Commission.

"The first step taken by the Bosed before unking may effort for the improvement of any hearth of industry or sprimiters, or for the improvement of two stock, was to visit the district extrasted to their charge, and no appoint Improvement with an intrinsic knowledge of the general conditions of the leathlites, to inquire and report to them as to the means that ought to be adopted nador various benefits for the nursewaters of the several oxogetted districts.

"An expand hereo-breedling, the Dourd first ascertained that slong almost the easter son, boast of the Worst of trivinal, agreate marbor of even the smalless complete of land keys masses for the corriege of that, was reveal, and for solar paraposes. Assung sard families whose gross each receipts were convey controlled by the property of the controlled by the controlled

"Before coming to a decision as to what steps should be taken for the improvement of the breed of birest, the Beard make thumsives acquainted as far as possible with two securitis matters for consideration, manisty—(1) tak kind of horses then existing in each iscality, and (2) the description of fixed and treatment available for larges in each noth locality.

"Spanising generally, the more were underded, undersined, ill shaped, weak is limite, and deletion in substances, which in many districts recent of the mixtures of restricts below for refregeredly to be not with. This besid shallmen in the remote congruince districts, were, with one or two compilers, the next of the contract of the case of the contract of the case of

This is a continuous that great betractionally that the property of the continuous that the continuous that great the life of the extense sectors forigon of the next of brished. All below of unions there have been consider simulations are reported to quasiry of floot, all an expended as a regarded to quasiry and the collection of the continuous terms of the continuous terms of the continuous terms of the collection of the continuous visit is benefit to the continuous visit in the continuous visit is the continuous visit in the continuous visit in the continuous visit is the continuous visit in the continuous visit in the continuous visit in the continuous visit is the continuous visit in the continuous visit in the continuous visit is the continuous visit in the conti

"The danger of the removalism of blood that may be considered unsatisfals from the congrued districts into the limits brevinging stitlents of friends we restly, therefore, not a matter for actions approximates in the optimis of the Boors, when it is beneze in mind this wavey incoder of the brevial manner of the state of the stat

"What the Board had therefore to decide in 1891 and 1892 was :--

- ¹⁰ I. What besed of animal would be best calculated to thrive or to endure the hardships of the conditions of life in the congested districts.
- *2. How a hetter class of marcs could be hellt up to take the place of the existing inferior animals, and
 - 4.3. How to produce feels that would sell and would execurage buyers to come back again to buy, and thus create a market for animals of general utility, that could be precised under existing unfavorable circumstances.

In the computed districts the people themselves with practical transicity and at the time they wanted a knees of a thick size of chip by my thing on since and always, and thirdy by problem hardy stock of as large as size as possible having suped to the elementaries of the country. The recognition of the country is the contract of the country of the

"Particulars as to the horses that have been purchased have already been given to the Commission, and as to the results the Board will only say that so far the appearance of the produce scene to justify the experience that was made. "Whether the continued introduction of Hackney blood will be desirable after a general improvement has been effected in the breed of horses in the congested districts appears to the Board to be a further question, and one which they will from time to time carefully consider baving regard to horse-breeting in Ireland generally, as well as to the interest of she congested duturests whole must always be their first concern.

> " I am. Sir. your obedient servant, "(Signed), Wst. L. Mress. " Socratary "

Some of us have since had the opportunity of visiting the congested districts and seeing the results of the Board's efforts, results with which, bearing in mind the difficulties of the problem to be freed, the Board have every reason to be satisfied.

The vonce stock are generally admitted to be far superior to anything the people have had before, and actually sell at higher prices.

It is true that at Dingle a deputation waited on us asking for a thoroughbred harm and chiesting to the Hackney, but we have reason to believe that this deputation was not the spoutaneous outcome of the people's wishes, and it was admitted by one of its members that a Hackney was suitable to the poorer farmers, a statement which is fully supported by the svidence given to this Commission by Mr. Collier, of Dingle, and Mr. James Butler, of Waterville, than whom no better anthorities are to be found as to the requirements

of that district. It was also stated to ne by the District Impector that all the nominations to the Hackney stallion sent by the Board were taken up within a few days

of its arrival at Dingle, and that there were unmerous applications for its use which could not be actisfied.

We do not recommend the Board to try and turn the western farmers into polo pony breeders, and we consider that the introduction of Arabs or Restern horses would be useless from a commercial point of view : from the conditions we saw under which the people live and their animals must be reared, except in one or two favoured spots, we think the introduction of the thoroughbred would be equally useless—a much hardier animal is required—and we are of opinion that the sires which will produce the best results are Hackneys, short-legged thick-set hunter gives, when such are to be found sufficiently well

bred; and well-bred Welsh cots or pony stallions. We commend such a half-bred sire as we saw stationed by the Board at

Belmullet, though we do not think that any half-bred or hunter sire is likely to give action to his produce in at all the same degree as the Hackney. It is argued that the Board occupies a different position to any private individual as the distributor of public funds, and therefore should take no action which could by any possibility be injurious to any section of the community, but if this is pushed to a logical conclusion all improvement of live

stock will be stopped, as people interested in any particular breed of poultry, pigs, sheep, or oattle could object to any special based being taken up by the

Board as giving an undue advantage to that breed. We submit that the real remedy is that money should be found for all hreeds, and registration so established that only the careless breeder, who does not take advantage of the remedies placed within his reach, could suffer.

The Old Irish Mare.-Much was said of the old Irish mare, but it has been impossible to trace her history, in spite of the interesting treatise on Irish horses furnished to us by Dr. Cox, and the map which accompanies it, which shows that from the year 1740 both race horses and draught horses alike were constantly imported and eastered over the country. The Old Irish mare, within a comparatively recent period, in our opinion, happened to be an occasional good one, not traceable to any particular breed, but the happy accidental product of a hardy dam and a lucky horse, bred without system and moulded by the exceptional conditions of her surroundings. Our forefathers appreciated and were fond of blood, but they absolutely would not take itwithout strength.

Whether an established type of Irish horse can have been said to exist, except in the remote post, remains a matter of speculation. If it did, it must have been long since obliterated by the continued introduction of different strains of blood.

It is more probable that, as in the case of other countries, different types of horses were produced to suit the particular needs of each district and period, as the opportunities of introducing suitable alien blood from time to time occurred, while there are undoubtedly certain characteristics which Ireland strengly impresse upon all horses herd there.

Incidence—That the oridance was delicies in some few points was natural, and we regret that zone of the clearly who purches he nears and general utility brows in the North some fewered to maint us, as their oridance would cause the property of the proper

That, in any scheme for the improvement of agriculture in Ireland, Segmenton
the posuliar adaptability of the country to produce every kind of horse,
and the importance of the horse-breeding industry, would warrant the
making of a separate and substantial grant for its advancement.

That, in the application of this grant, the needs of each class of breeder should be recognised. By giving, say, to the hunter breeder, a thoroughbred, or approved Hunter size, to the earl-horse breeder a suitable agricultural stablion, or to the breeder of harmass horses a Hacknay.

 That, in the selection of the particular bread of stallion or stallions for each locality, the wishes of the breeders of horses in the locality should be conculted.

4. That the grant should be applied in purchasing or subsidizing stallions of different breeds to be approved of by a Central Committee; and to the giving of prices at country thows for brood marss and young clock the produce of such stallions.

5. That a list of stallions, perchased or subsidized by Government or registered under the Scheen of the Royal Deblin Scotaty, be submitted such year by the Cantral Committee to the County Committees for publication, all such stallions to be certified as free from harefulary diseases by a Certifia authority, and no marce to receive nominations until based as suitable for freeding.

6. That registration should be established on the lines of the Englishhreed sociation with carefully devised rules, under which approved half-bred mares and approved half-bred sires, not at present eligible for any studbook, could be registered as foundation stock, so as to protect every breeder against any strain of blood to which he might object.

 That all horses coming into the United Kingdom from America should be branded, in such a place as not to diefigure the borne, but to be easily distinguishable.

We believe if these measures were passed, considerable benefit would accrue to the borne-braeding industry of Ireland, and that those breeders who are anxious to guard against the introduction of any particular strain of blood in their horses would, under the scheme of registration, be able to do so, and we observe with pleasure that the recently formed Irish Horse Breeders Association have taken steps in this direction.

We much regret that we were anable to concur in the report submitted to us by Lord Durarven, as we consider that the position there taken up cannot be supported from the evidence. We have much pleasure in testifying to the ability with which Mr. Hush

Neville discharged the duties of Secretary to the Commission.

We have the honour to be your Excellency's most obedient servants,

ENNISKILLEN.

COMMISSION ON HORSE BREEDING.

MINITES OF EVIDENCE

FIRST DAY .- TUESDAY, OCTOBER 2071. 1886. Present :- THE EARL OF DUNDAVEN, M.P., in the Chair ; LORD RATHDONNELL, LORD AMETUWA,

SIR WALTER GILBEY, SIR TROMAR ESHONDE, M.P., HON. HENRY W. FITEWILLIAM, MESSEL J. L. CAREW, M.P., F. S. WHENCH, and PERCY LA TOUCHE. Mr. HUGH NEVILLE, Secretary, was in attendance.

1. You are the Secretary of the Consected Districts

Board, Mr. Micka ?-Yes, my bord 2. How long have you occupied that position!-Som the Board was established on the 5th of August, 1891, 3. What are the metters which come under the

escrition of the Board-was it instituted amergat other things to improve the breed of breezel-Yes. them, to take each steps on they might think proper for the breeding of live stock, do. in convented districts.

4. That is the authority you act varior 1—Yes.
b. You have that authority over store the Board was instituted I .- That was the Act which formed the Board, and which gave that authority amought others to the Board.

6. Can you point cot the geographical positions of the congested districts!—They are shown on this map, my lord (pointing to man.) They entend over this area. They frings on the north-west, west, and south-west coasts. The area is one-seventh to one-

7. Mr. Fryswitten,-Theo perties mucked blue in convented San You. Contents.—What is the proportion to the

area of the whole of Ireland !- The congusted districts tomerim 3,608,000 acres, the area of the winds of Ireland being \$0.830,000 name, that would be one sixth or espearenth of the whole of Iroland population of the congrated districts is 649,000, and the population of the whole of Ireland, seconling to the census of 1891, is 4,704,000—that would be oureighth to one-sinth of the normation of the whole

9. Tell as how a district is created a congested distries !- The test, rengally speaking, was that a distried was considered to be converted whenever in certain equation the voluntion was thirty shillings or hen per head of the population. It is determined automatically by the ratio between the population and the relaction.

10. I suppose it changes from time to time !-- It was taken as it then stood 11. Were any districts afterwards added 1-Power

was given to the Search to include other unmeasure they thought this and also to strike out any districts they thought fit. That power, however, was only given for a limited period—can year—and after that we change outly be made without legislation.

Mr. WILLIAM LAWSON MICHS was called and examined by the Chalaman. 19. Were now districts taken out or additional distriets added !-Quite a few; one or two were struck out, the town of Listowel for instance. A few districts were orded, about fifteen, but not more.

Ge. 20, 1804

13. Practically then we may look upon this map as correct !--Oi, the map shows the congested districts as they now stand and is absolutely correct. 16. Can you give the Goconfisten any statistics on the schiest of bone breeding in the congested districts 5-The number of homes in consented districts

15. What do you mean by "harses "!-- I classify 16. Well! The total number of horses in the

congented districts is 45,809. 17. When were those statistics made out f-The

present year. They don't very materially, but they do to a small extent. There are 45,800 horse altogether at present in the congested districts. Of those, maker as present in the engagement contracts. Or those, analog use year there are 6,677; between one year old and maker two these are 6,948; of the larges two years old there are in the first place keep for arrivalture 33,024, for traffic and manufacture 18. You are scenking now of three-year-olds !-- I

am speaking of two nest over; as seen as they reach a serviceable age. For agriculture there are \$3,024, for two-fin and manufacture 080, and for envenouend and recreation 500.

19. There are the figures for the congested districts ? 19. These are the figures for the congested districts? —Yes, but if you wish it I can give you the figures for the whole of Ireland. 20. Are those all the figures for the congestol dis-tricts!—I can give them in any detail you like. 21. I want to know what you propose to do-say

you going to give us the same for the whole of Ireland—Yes, to show a comparison. As against 46,809 in the congested districts the total in all Ireland is 619,000. 23. From what date are these figures taken!-Somewhere in the spring of the year-I fancy before

Saling,

23. No particular date —Before fealing; before
May, early in the spring of this year, I should say.

24. Well 1—In the whole of Ireland there are

26. Mr. J. L. CARRW.-In that inclusive of the congested districts !-- Yee. The congested districts would be one-fifteenth of thus number. The harveunder one year in all Ireland number 73,440, one year

Printed more dientised by the University of Southwarden Library Dientisation Unit Printed image distinged by the Limparaty of Southernston Library Distingtion Lind

Que to uses and under two 91,284. Of the basses two years old and over 388,487 are used for agricultural purposes, for traffic and manufacture 45,563, and for assusement and recreation 30,535. For agricultural purposes there are \$3,000 in the congested districts, \$35,000 in other parts of Ireland; that is about one-twelfth of such horses of Iroland in congested districts, and, taking it according to area (there are 3,608,000 acres in the congested districts; hulf of which is waste and unprefitable land), and having regard to this waste end unpreditable land there are proportionately as trues bornes in congressed districts as in other parts of Ireland, if not morn

26. CHAPRIAN .- What is the respection as regards the various uses to which beeses are put !- I do not quite understand.

27. If you compare borses used for agriculture in the converted districts with those similarly employed in other ports of Irehad what is the proportion !-

 And how would it be as regards those used for recreation !—That would be elect one-sixtists. 29. And for manufacture and traffic !-- Ahout one-

30. Where do these returns for all Ireland come from 1-They are collected for the Agricultural Statistics of Ireland by the Constabulary officers for the Registerr-General 31. Have you any other fraces i-No other

etacisties, my lord 33. I suspens you are not in a position to give us any information as to the character and neture of the horses in the congreted districts !-Only from my own observation-I know nothing personally of horses. I know the size of the animals and the general ap-

pearance of them 23. Well, perhaps, you would give us what you one in that direction !- They very a good deal. In the extreme north district-

hairy-legged bornes from Clydesdale sizes are often neet with ; then lower down-Gleaties and Denfanughy districts—they are more of the pony class, thin, loss, light, and the same applies to the rost of West look, (ight), this use more appares to the control of the Donegal. In West Mayo, on the sus-coast, many are very small, poor, thin, little penies; and also in Eeris and Belmullet (indicating on map.) Then in Actiff the ponies are of a better class, better shaped and stronger ponies. Then in this inhad district (indicating) there are not so many horses; the people there use denkeys more than horses. I can give you the exact numbers. 35. Mr. Frezwittenes.-What do you call that district t-East Mayo about Swinford; it takes in a little bit of Restoumen and Castleres; this is the Leitrim district. In this part of Mayo-South Mayo (indicating)—Lordshorgh, there are rather good penies, and there you have the Connensen ponies here; then down here in Cork (indicating) the horses

are distinctly better than in Mayo and Denegal, larger, steonizer and better, still they are leave 36. The CHARMAN.—Most of them con small i... Small as compared with the ordinary home. 37. Mr. Fivewitzzan.—And not of an agricultural

brood like the northern ones !- No, but I fancy they are good enough for agriculture.

38. Sir Tanaman Resource.—These heavy horses in the north, are they used in the locality !- They are. 20. Lord RATERIONNELL -- Is not the solidown here

in Cork very much the same as up there (indicating)? -The climate is militer. 40. In the soil different !-- It looks better; the ex-40. Is the non-morrows — I much better had than any other congested part of West Doneyal 41. Lord Asstrows.—Is it better!—I am sure they

get for more crops out of it.

42. Sir Tuonsa Ranovasi.—In these fames is the and districts our they too these heavy horses - You, and they sell them to East Doneyd which is a very good agricultural part of the country, in grand is as good as Tyrone. 43. Then their market would be in other parts of the North of Ireland !- Deery fair.

44. Do they export may of these ?—I manust my.

45. The CHARMAN.—They use dealings; do they

48. Would they be included in horses !- No, het I one give you the numbers; there are very few trains 47. Mr. J. L. Canew .- Can you distinguish the nature of the soil in different distracts !-- In Descript

West there is granite, in the southern part there it is usion slate : in the northern part of Mayo some of it is granite, and very little lunestone ; they have to Import limestone

Where is the limestone in the congrated its tricts !-- There is very little in any large teact. 49. The CHAIRMAN. - Are you well acqueinted with the geological formation !- No. I test know it in a

50. Lord Bathdonnent..... Is there my limestone in the south !-- Very little at all in the occurred 51. The CHARRAN.-What impriries were note by the Board before storting operations !-- The Board issued a number of queries. It came into annums on the 5th of August, 1891. In the same mouth different residents in the congested districts were

and bulls and other matters relating to the district 52. Have you a list of the questions?-I have the The CRAIRMAN.—You can put them in.
Witness (reading).—Mr. W. Hammond, a.r., Los Conyngham's Agent, Wost Danegal, writing generally of Gleuties Union, in reply to this query :-

34. Mr. CLERW .-- Of Donepal !-- Yes; in the "What class of stallion would you consider most northern part, Lucishowsa, heavy house-heavy, suitable for impreving the local hreed of house?" Said:-"I am myself in favour of a Hackney stallion."

And in raply to the query-" By what class of stallion are the marts usually served?" "Generally by a bad managuel, consequently the pomies of this locality-some time since orielested for their good qualities-are very much degenerated.

Mr. James Mungrove, n.z., the Lodge, Cerrick, Ca. onegal, is in favour of "good Hackney pours or Mr. Wybrants Olphort, as remeds the unit of Denfanaghy, is in favour of "a strong high stepping roadster 15 to 15 high: a Cleveland bay if possible."

Mr. George Hawson, J.P., Newtown Mann, Slips, as regards the union of Manochamilton, sors :-" Hackney borses are very morror in Ireland, and I think that a Norfolk traiter crossed with country bred maros would get saleable foals."

The Earl of Leitrim, as reports the union of 161-ford, is in favour of "the Hackney Suffilk Punch" mil if get large exough, with plenty of home, the Welsh puny." Mrs W. Sipolair. n.s., Drumbeg, Inver, Oc.

Donogal, as regards the union of Donogal, segment "good helf-bred St for general work." Mr. James F. Murphy, Dunfanaghy, as reparks part of the unions of Dunfanaghy and Letterhanay. s in favour of "Suffolk Panch and Norfolk treater for the better districts, and Welsh stallism posies for mountain parts." Mr. J. O. Lawler, z.r., Lawderdale, Ballingson, as regards the unious of Mohill and Rawnboy, favours

seed large hand, either thorough or three-cusater heed animals, the former professed." James M'Cullagh, J.P., Glaudough, Co. Moraghan. as regards the unions of Castichlayney and Decemas reported one wateres or Contents yeary end Disciple, is in favour of "a stallian that would get good weight gaving hunters and harness horses."

33. The CHARRAN, ... He doesn't mention the breed ? Firmer.—No (continuing to read). Mr. William Earlies, Castictown, Beechaven, as regards the gains of Berchaven, without mentioning the beech,

*A well heed small class is required."

Mr. William Norwood, z.r., Ballybalwick, Done norway, as regrets the unions of Dammway, Stibberoon, Schull, Bantry, and Castletown Bore, favores " small Clydesdales Mr. John Brechan, Loughine, Skibberees, a Mr. John Brechan, Lougenze, natoterren, an reards the union of Skill-breen, suggests "good

soung thereugh-bred horse with good action." Mr. S. F. Primes, Ballycone, Mayo, as weards the union of Ballycroy, morth and south, favours "half hed stallion or Suffall: Punch."

Mr. John B. Barrett, Carviganam, Cark, as regards the union of Bantey, writes—" Small Suffick Pensh." Mr. J. Townsend Trench, Kenmare, as regards the Kenmare union, favours " a strong mountain eah."

Mr. George O. Malley, Ar., q.c., Straidhill, county Mare, as regards the unions of Swinford and Castlebur. writes - " Good half bred burse, 16 hands at the least, for smell farmers, but there are several of the larger farmers who crowth woud a threemshipped Mr. Evgh M Ternan, Castleren, county Roscommer

ss regards Cavilorea union, says—"The land is too poor and the mares too had to cross with a thoroughand size; a kirge three-quarter byed hoose would be

Mr. John Golding, J.P., Derry Ormonde, Eyes Com se regards Tenns unders, favours "pure Clydochde and pure thoroughbrod." Mr. George Howson, p.t., Ennismore, Listowel,

county Kerry, as regards Listowel nation, favours "a good Shire boyes, lively and not too heavy. There are In elittian to those queries that I have mentione as meand to people in the locality, the Board also sent

letters to gentlemen in England and chowhere who have a resolution shout the breedless of horses. Major Borcowes, Newbridge, county Kildare, writes te Mr. Weerel, an fellows to

"I enclose Lord Treelogar's reply, which haskily gives his Show to come on this week. I have no 400l4 his premised exercise will enlished us as to the medium to further the project and attain the end. My 'marked' paragraph agrees with what I told you My 'narked' pangrapa agrees with what a took you 'Mide one-bornes,' and 'there are stallions of that bread,' on receiving No. 2 you shall hear. I gather you with to have '15 hands the standard, or to 14.2." The 'Hacktony Stallien' if that bright, weald sain

Minimally, but most are above that standard," This is the enclosure from Lord Trederar :--"Tredegar Park, Newport, Montosuthshire,

"Nov. 21st, 1891. *Dran Major Bouneway,—Our underground herein are regular little cart-horses under 15 hands, and there are shallings of that hreed. The Weish pony stallion that is led about the country is a had nor of hrute, whose only morit is that he is a very fact tretter. There are some that run wild on the hills in tretter. There are some that run wild on the min in Bruconshire, but those are weedy hearts. My idea of an azimal to improve the breed of position is the Burfolk or Yorkshire 'Hackney,' Yorkshire for choice, as they have better shoulders. My 'Show' is on this our to less. as they have better snouncer. May construct you we'll, and I will make empiries of the smissal you Me W. L. "Yours very traly, "(Signed) Terrorcan."

Lord Leitrim writes :--

"Molecy, Milford, Oo. Donegal,

"Srn.-I think the replies in the accommunity Query form pretty well cover the questions in your Query mens pressy sees of the Chylindales in maces-sion, thoroughbred size Young Artiblery and an Arab Stallien that was General Stephenson's charger at the hattle of Godern have all filled up or perhaps Tabould my the Auth merrly so. I charged people who were not my tenants 43 3s. for Young Artillery, and used to get a good meny, and always charged shout a

double fee to people who are not my tenants. My fest Christinio was a special favourite. Hackney and Peny Stallion would be made great use of in these years. " (Signed), Larwis."

I shink a

Mr. Thomas McMalon writes from Brue House. Cartleblaruny, 19th December, 1891 .-Norfolk or Cambridgethire is the best place to get Hackney stallions. You can get them there from 13 Hackney stallions. You can got them there from 13 hands to 15.3 hands, or you can get them at York or Bavely or at Busified, but I profit Norfalk for the best goes, but they must be bought with less ness, and good shoublers and good quarters, and ther are the best cross for Coansessers ponics. If you like I will hay one for you and charge you nothing but my expenses, as I can hay it chapper then you can, as I expenses, as I can may it charger than you can, as I know the country so well. I can get you may height or any colour you choose. I can go any day ofter Frular,

Mr. Bardett-Coutts, writing from 1, Stratton-street, London, on the 20th December, 1821, says :-which I have received on my return from America. I will very gladly be of any service in my power to the Congrated Districts Beard, in comying out the Scheme which you have described. I send you have with a cour of the look which I have recently published on the subject of what I call the 'new develorment in home loveding, and I think that you will find, if you have time to person it, that the proposed ex-periment in Ireland falls directly within its scoon. "It is a little difficult for me to advise you definitely,

without heing acquainted with the court type of poules form which it is desired to bread, and without however what close of animals will find the best market in the special districts "Assuming, however, on these two points- (L)

That the metrix will countet of nodercired stock, abort of both quality and action, and in addition, weedy and Night of bone; and (2) that it is derived so to raise the standard of excellence that while the steek produced will be more serviceable for the common purposes which are at present to be served, breeders will also have an opportunity of actting bure and there a horse. with fine action and shapon, which would fetch good priess from the harness dealer end so gradually draw haster class of dealers into the districts. I have so heritation in strengly advising the use of the Hackney

"I do not believe in the Arals, nor do I think the result just mentioned would be in any way advanced by the use of a small this conclured. The thorough lived is not the horse to get harnous stock because in 99 once out of 100 his produce is delicient in action, which now raises the price of the harness horse all over the world, and further, brosum his tomicarcy is

to get there high on the leg and light of bene. The Mr. VF L

Heckney corrects the latter deficiences, gives width, strength, weight-corrying, and draught-power, and in addition, gives setion. "It goes without saying that you must get the

right sort of Hackney, because there are a great many of the wrong sort.

"Now, as to the question of price, which I had better deal with at once. "I do not think that it would be wise for you to attennt the experiment with the Hackney, naless you can induce the Board to give £30 more per horse than the stated price Even then, £100 at the pro-

sent time would not bey my stillion worth his keep if it were not for the limit of height that the conditions of the existing slock which you mention enable you to score. If your Board will equabler how quickly the extra £50 is distributed in value over a number of feats in a year, they will, I think, hardly imperil the success of the experiment on this

"There are very many important considerations in choosing a Hackney such as black-blood, reliability for audientee, &c., which must be added to those you mention of action and shapes.

"I am, as you know, much interested in the indus-trial progress of Iroland, and I should be extremely glad to see the experiment made successful. I con sider it eminently a move in the right direction, and I would spare no trouble to contributing to have it started upon what, in my opinion, would be the most promising basis. "I am greatly occurred at present, but if you ought

angress any means whereby, in the limited space of time which would be et my discond for each a purpose, I could have a personal inspection of the average type of horses or popula which it is desired to improve. I would endeavour to rea over to two or three of the districts for that purpose. If you will kindly look through the book that I am forwarding berewith, I may expect, perhaps, to hear from you again on the

54. Mr. FURWILLIAM .- What is the price!--He says £300 would be little enough.

56. The CRASCHAN.—Have you got the letter that was in reply to !- I have not. 56. Have you got the questions asked-he seems to be giving his own opinions very much !-- The questions were there-

"(1) What class of stallien would you consider most suitable for improving the local broad of houses? "(2) By what class of stallion are the mores smally served?"

Witness (consinuing to read).-The Right Hon-Henry Camplin, writes as follows from Board of Agriculture, S.W., on the lat January, 1892 : -

"It depends entirely on what the produce is wanted for. With my present information I should say Yorkshire Hackneys, not Norfelk. The former have more courage and are a stoctor sort. Sir G. Wombwell Newburgh, Easingwold, is a first-rate judge of Hackneys, and an authority well worth consulting. In Ireland I imagine Lord Waterford is one of the best anthogities all round on mattern connected with bornes, but there are many others when Mr. Wrench will know quite as well or better than I do. You may send him this."

57. Mr. J. L. Carrie.-That is the late Lord Water. ford J.—Yen. (Continuing to read). See George Worshwell, writing from Newborgh Priory, Eastgo-wold, Yorkshire, on the 11th Jamesry, 1852, mys:— "In reply to your, I would nost certainly advise our using our Yorkuhire Hoskney Stallions in pre-ternos to an Arab Stallion. What you want to get ference to an Arab Stallion. ference to an Arab Stallion. What you want to get is settion, and you will get this if you put a well-boad pony mure 14-3 bands high or 15 hands high to a good Yorkshire Hackney Staffire-at least this is no experioues."

Sir Walter Gilbey, writing from Electron Hall Resex, on the 2nd Juneary, 1852, anys ;-"I do not anticipate any great difficulty in citale.

ing Sponish (Andahosian) Stallions. "It is possible you are correct in your belief the people themerives would prefer a small good stepues Hackney, and I was some the cross sail produce and

which soill pay for breeding. "I did not answer your question as to cost. Soul Hackney stellious con he obtained at about fitte ... #200. If you care to know, I have no don't a diries can be arranged for invocation, &c. General Trans. hill has been purchasing for the Government for India, and could sasist you I have every years to

58. Sir Warren Granze.-- I would like to know the date these questions were sent out !- In the soil

59. The price is very different now from what it was then. - The next letter is from Mr. Charles T. Tup. nard. Writing from Rochford, Bodford, January 4th, 1892, he says :---

"I sen in receipt of your letter concerning Stallers for your empasted districts. As you will know I was strongly opposed to the introduction of Hackness blood into Ireland, but the majority of the Bond Dablin Society thought otherwise, and have allowed the English Ecadeter to set foot on Irish soil. As fer as possies are concerned, there is only one home to improve there, and that is the Hackney, and I shall much prefer these Stallions which are lived to a or-tain district of Yorkshire, as they are of much fear quality than the Norfolk bornes. Arabs are farly in every respect, except the way in which their tolls are est on. Small Theoryghirol Stallions are week thrusalves, and, therefore, would most likely get noting hut worthless weeds. If you should decide on large has worthing words. If you should decide on laring Hackney Stallions I shall be most happy to do mything for you in the way of procuring them, as I know

every breeder in the country, and might, possibly, eave you some bundreds in their parchase Mr. Townard is on English gentleman who has judget the hunter classes at the Dublin Horse Shrey on

several occasions. The next letter is from Mr. W. Tower Townshead. Writing from Myrau Wed. Tower Townshord. Writing from Myros West, Leap, Co. Cork, 3rd March, 1892, he says:-" I see in the Pormer's Gaussia of the 27th witing that Engkney etallions have been purchased by the

above, and I hasten to request that you will inform me on what towns they will be somelied. "There is not aport of Ireland, to my knowledge, that quires a stallion of good broad more than the does-The breed is yearly getting worse, and lately all the principal dealers have laft off attenting our one annual horse fair of any note (Ballyhpor), as they say nothing

worth purchasing is to be got there.
"To remedy this lementable state of things, I put ebssed the thoroughbred stellion 'Controversy' in the sutumn of 1810, and, though I could not affect to let his services under two guiness to working farmers got so many for him last season as I liked to give him One well-bred horse, however, is niturly inadequate to most the crew demand for imagovernout there is in the home-breeding lime here, and, could I afferd it, I would keep six or seven stallions, as I cannot imagine anything that would do the country more good Geing about emenger the farmers, on I do, I find the

greatest tasts for good horses, but no power to acpet "I have long felt that the "Hackney" is just the oless of stallion for this district, and with this view I went over to London last March, to the great Harktay Show, and got an introduction to Mr. Burdell Courts, who very kindly showed us his perfect study Hackneys, but I was mable to afford his prices as be "To key a hadly heed stallion would be to do the country more haven then good, so I had to return without cost." 60. The CHAPEMAN,—Is he residing in a concented

statisti-Yes, nor lord, Shibbecorn, (Continuing to read). Mr. Richard Barter, St., Ann's Hill, Co. Cock, wrote on the 8th December,

1007-"I was in Norfolk in October and had a look at mese of the Hackney Stads there. I feel sure they poples. I think it would be both useful and instrucness to watch the breeding of pure Hackneys in this country, and would I think still more attendate their

nea if the factors on w some good marcs and their gets. I would be glad to co-operate with your Board in this Arrection. I have now three pure-book Hackney pares, two of them winners of several first reises in Hackney stalling in the Macroom scheduled district that could be used with them, I would then be glod to arrange to show the mores at some of the most

important fairs, or may other place suggested.
"Would you kindly bring this motter under the
consideration of your Bound?"

 Mr. Percy La Touque,—That is Mr. Burier of Blurney, Co. Cork !—You. (Continuing to read). The Clerk of Donegol Union, writing on the 28th Februsry, 1893, says-

"There is a very great desire in this neighbornhood to severe the services of a stallion-sider Hockney or Suffelk Pench-if you think there would be not ees in our spolying for one, would you bindly have the necessary forms sont to me."

The Earl of Zetland, writing on 3rd Jennery, 1894, from Asks, Richmond, Yorkshire, says.— "I must thank you very much for your most interesting letter, by which I am glod to see that your

is getting into slape. I think you are working on quite the right lines, and shall be glad to bear in course of time the decisions arrived at by the Comtrittee of the Rayal Dublin Society. I am also very chal to hear that the Hackneys ere doing well. tope that you quite understand that my former recorder about these were not intended to dispury the Harkany stellions, but only to express my bleakreed, I have always thought that they would prove

most valuable animals in the convested districts, when they replace stallions of a very inferior quality. "I am very glad there is so good a demand for their services in the computed districts, and feel con-ficut that they will make their mark before long, if

62. The Creaman,-What are the former remarks that he alludes to !- A. former letter, I presume, written to Mr. Wrench. 63. Not the letter you have read 1-No.

64. Mr. Pener La. Tourenz.—What is the date of that latter i—fed Jamesry, 1894. 65. The Charanax.—Who is that letter from i— Lord Zetland, 56. Sir Wanten Graney.-What is the date of the

other, from Mr. Biohard Barter 1-December, 1892. The CHAIRMAN,-There were letters received from the Congrated Districts Board before they decided what to do. I do not think we want letters received

Witness.—The letters up to Lord Zetland's were in the earlier stage—the other letters are later 67. The CHATEWAY .- Before you leave the letter is there any information in any of the letters received

would be useful to us-first of all what were the questions sent out? Fitners.-First.-" What class of Stallion would you consider most suitable for improving the local breed of horses in congested districts 1"

69. Was any information received in the letters se to the character of the local breed of horses land

60. Mr. Wittings .- Was not there a second question as to the character of the etalbours in the district !-Yes, this was the query-" By what class of stailors are the mores usually served I The CHARMAN,—All you have told us was as to the character of the stallion reconsumeded!—Yes.

71. I understand from Mr. Wrench there was a second quary as to the character of the existing tallions i-Yes, I are coming to that afterwards. If you do not wish to bear any further lotters from "

ISO4 I will go to the second question.

The CHARKEAN.—I don't think we need have any more of the letters, Witness.-Well, the second query was-" By what class of stallion are the mores negally served ! And

in reply to thit Mr. Wm. Hammond, Denegal, "Generally by a had mangrel; consequently the ies of this locality, sometime more celebrated for

Mr. James Mungrave, Donegal, writes :-

"Counct ascertain breed, but they cannot be of good quality."

Mr. W. Olphest, Donogal, writes:-"The very worst sort,"

Mr. George Hewson, Sligo, writes :-"Ordinary country stalliens." The East of Lettein writes :--

"Common bailty level stallions, except those served by Lord Leitrin's pure bred Civicodale and Arab stallions, but of course they are expable of serving only a small proportion. A thoroughlind stallion of Lord Leitrim's served seasons 1867, 1888, and

Mr. W. Sinclair, D.L. Donegal, writes :---" Indifferent half-bred." Mr. James F. Murphy, s.r., Doorgal, writes :--

"Clean of stallious are impreving of late; mores are grassally served by Clydesisis thoroughbrod. 72. The CHARMAN .- Where is that from ! Fitness.-North-west Donegal (Continuing to

Mr. J. O. Lawder, Leitzim, writes:-" Bad third-rate ruell stellions,"

Mr. James M'Collegh, z.v., Monaghan, writes :-"Under-bred horses, which extend fairs and Mr. Wm. Hawker, Cartletown, Berekeren, writer-

"Small common class." Mr. Wm. Norwood, J.P., Demmanway, writes :-

" Broken-down weedy thoroughbrods." Mr. John Brechan, Skilbberess, writes :- "Common. hred hrutes, not fit for anything."

Mr. S. P. Prince, Mayo, writes: - "Ordinary stallions of the same class as the mares referred to (a fair class of more, somewhat larger than a Connemara or Achill youy.]" 73. Lord Assrows.-What part is that from !--

Ballyceny, Mayo. (Continuing to read.)-Mr. John E. Barrett, Carrignass, Cork, writes :- "No special claus."

Oct. 90, 1816. Mr. Townsend Trensk, Kenmers, writes :-"Mountainy brutes."

Mr. George O Malley, Mayo, writes :-- "A course, small, but cluss, when crossed with Achill or Connemers penies, giving a weedy, bed stock." Mr. Hugh M'Ternan, Resonance, writes:-

" Half-bred Olysleedale." Mr. John Golding, Derry Ormenda, Errecourt, writes:--"Half-hred Clydesdale and thoroughbred." Mr. Genre Hewson, p.l., Kerry, writes :-

"Light thoroughbred stallings and ill-bred breeds." Witness (continuing) said-In addition to these

the Board sent out Inspectors of their own to make inquiries in different parts, not merely about homes but different metters. 74. The CHARMAN, -Agricultural matters !- You,

but the question of borses insladed. 75. How many Inspectors !- Six or se-75. And they reported separately !- Yes. Redmond Rocks, as pegavis Brasms, County Kerry,

reports :--"The breed of horses has deteriorated from the usof weedy thoroughbred stallions. The introduction of good Hackney stallions would be very beneficial."

And as regards Coom, County Kerty :-

"A better class of stallions, Hackney for choice, are very necessary in the district." Mr. P. G. Townsond Gahan, as regards Fanad,

County Decembl, reports :--"There are a large number of horses in the district. many of them large course animals, but not at all for the fresores who own them, believe Lord Leitrim bas a Clydendale stallion at

Mulror ; but it is not a breed at all suitable for the possentry, even when erossed with their small maces. A stallion Hickney or Suffilk Funch, located at Romakill (a central point but not a "Cragestot" Electoral Division), would be of immense service to the people."

Major Ruttledge-Pair, as regards Caras, county Galway, reports :-

"There are a good trany mores in this district, and I think the village of Kifkievan would be a good centre to pince a Hackrey sire next assam. seventeen miles from Cashel, whore a Burh stallion stood this senson."

And as regards Childen, county Galway :--" A small Hackney sine, about 145 hands, with good bone and action, should next year he sent to Ballyconnecty. There are a large number of mores, quite

800, in that part of the district, and if smether good Black sire could be purchased, he, too, might be east there," And as regards Louisburgh, county Mays:-

"There are a large number of mares, and one or two Hackory stallions, about 144 hands, with good bone, would seen effect an immense improvement And as regards Partry, sountles Galway and Mayo:-

"There are a large number of mores in this district. Tournakendy, where there is a pelice station, and which is very central, would be a very good place for a Hackmay stallion. With the exception of Loursburgh

and Ballyonnosly, I do not know a district where a good stellied is so reach required," He reports in a few mouths later, after the horses wurn aust down :--

"It is also at universally admitted that the intraduction of small Hurkmay sires has been generally great many Coh marce in this district. They have

argumentabed by the people, and the arrangements have "The only district where, as far as I am aware.

be scheme has not worked well is at Clouber, in Co. Galway. The Hackney-"Fathion Sel-pland. there has not, it is thought by some, enfiring quality for the class of mates generally found in that district. It must be recombered that Clembur in rather better circumstanced than most of the congreted

districts, and that it is only seven usiles from Ballys. robe, one of the best districts in the West of Ireland. where the services of really good theroughbred sizes have always been available "Compleinte have also been made as to restriction. imposed in the Lesterfrack district. It appears that the services of the etallien shotel there were available

for only a short paried each day. The stable where the horse was legated being more than three miles from the police bermek was, I presente, the reaco. why this rule was made. Next year stablear micha be accuracy aither in the village or close to Letterfresk

where the polion barruck is estuata. "The Arab stallions did not take so well, being considered too weedy and light by the country people. The Bark, "Awfally Jolly," did very well at Carle!

" Two of the very hest horse-breeding districts were this year left without stallious viz. Louisbure, Co. Mayo, and Ballyonneely, Co. Gulway. In helt these districts horse-breeding is one of the shift resources of the people. I would recommend that Hackney stallions be sent to both these stations next Perhaps a Early nire might be sent to Bally-

connecty, in the Cliffien Union, an there are over there hundred mases in that district Mr. J. E. Batler, as regards Killorglin, cornty Kerry, reports :--

"Horses are small and poorly heed; a Harkmy stellion would do much good if stationed in Glanbaby." And sa regards Caberolveen, county Kerry :-

"The horses are small, badly bred, and truck deteriorated. The introduction of a few good Hadener and farm sures would be adventageous.

And so recents Waterville, county Kerry :-"The breed of breses is poor and deteriorated from breeding from generations of bad sires. There being ne stallien in this district, a Heckney stallier in Loughenrone Electoral Division, and another st Wasterre in Calandanial Electoral Division would produce a much required improvement in the horse of this and surrounding districts."

Mr. Heary Dawa reports as regards Swinked, county Mora -" A good stallion is never offered for service to the enall farmers' mores here. The service for which

they would give would not repay anyone for the keep of a good horse. The marce are small and ill-shaped and of no fored theracter. They are not eleant enough to ceass with theroughired stallions unless such as passess exceptionally strong bosse. To prepare the way for a useful class of burses in this district. I think the most writshie to use would be the best description of what are commonly called 'halfheed, since—animals possessing good hous, good section, and an much brooking as can be get. For many of the marse a Cob or Hackmay stallies would

The same gentleman reports as regards the district of Ardsones, counties of Sligo and Mayo:-"Prevent the service of the many ill-shaped and unsound sizes now in the district and substitute good Coh or Hackney stellions with good quarters good shoulders and action, and good tone. There are

Printed image digitised by the University of Southampton Library Digitisation Unit Printed image digitized by the University of Southempton Library Digitization Unit

- bad quarters and straight shoulders, and are bad merors."
- And as regards the district of Ballaginderross, commiss of Shgo, Mayo, and Roscomman:— "The mares are of a mixed class, and few of these
- good. The light weak once would loge tracell attock if ground with small Suffolk Purch stallings. Others if crossed with a Oh or Hashney stalling would produce good recoters. The best of the mares should be crossed with thoroughired houses of good home
- to crossed with thoroughlyed borses of good bone and action."

 Major D. P. Gaskell, as regards the district of Desertegray, county Donegal, reports :--
- "These are a real, until, attraction, wanting and an interaction attraction and account of the properties a reliable best, America fator are more well milled for a factor of the properties of
- other of the two users for min, and the owner, may, he has reduced \$Ke tells. Whitelet the used means, poor pactures, \$10\$-frecol melecures, and reaging applicance at the disposal of the small ferenser will enable them to reser and manage the high spirited propays of the Hakeney stallines in a quantum which the future same determine. Some of the other have already shown recentrable families procedures and parents. The average price of the yearing hitherto may here be already as \$1.00 min. The average price of the yearing hitherto may here be already as \$1.00 min. \$1
 - 77. The CHAIRMAN.—Are these all the reports I Wilmer.—You.
 - 78. Do you know how these gratieness were also de —Appointed by the Board; two or three of these gratieness are still in the employment of the Board.
- 79. I went to know if they would be available as witnesses !-Mr. Redmend Rosho is dead, but I think all the others would be available. 30. Would you be able to give us their addresses?
- Tex.

 31. Is that all you have to my on the subject of
 the inspirite you have made i—Tout is all.

 52. The GRAINSLES.—Perhaps, before I sak any
 nore questions, it may be convenient for the Members
 of the Commission to put any question they have to
- sak on this print.

 S3. Sir TROMAS ERSONDE.—I would like to know if you have any means of giving the prices charged for the stullions, the native stallines, before the insteduction of the Computed Districts Econd's stalling into those districts 1—I am afred not.
- 34. In one of those letters, I think some reference was made to the price charged for the stallions !— Yes, there was one latter from Lord Letterin, saying what he charged. 55. And some other gentlemen !—The other gentlerann was from the county of Coyle. He said he
- can was from the county of Cork. He said he charged two generat, that he could not afford to charge less than two generat. I believe the usual fee was 10c, 15c, or £1, payable a year after, if the more faciled.
- Its., 15*e, or £1, payable a year after, if the more fields!

 36. Can you tell us from your own experience has the price of a stallom maything to say to his popularity. —I don't think the local people know the prices of our
- stalliers.

 57. No, but the local stalliers t—No, I exct say.

 58. The CRAIMMAN.—Perhaps, better answers can be got from some other witnesses on that point.

- 89. Mr. Li. Totunk.—When you were showing the different coagested districts, and discussing there in reference to home-breeding sebemes, do home-breeding, schemes exist in every part of the congested districts in "No. This (map) shows roughly when the house are stationed.

 30. Do not the dots practically cover the whole of \$0. Do not the dots practically cover the whole of the process of the congested of the co
 - 30. Do not the data practically cover the whole of the congested districts I—Ridges of mountains and other barriers come to halves, and exclude some boundies from others that look mean.
 21. Mr. Graver —Wink is their thintee man Po-
 - 91. Mr. GARNW...-What is that district near Porturnus I...-That is Woodford.
 93. Mr. La Tootze...-These statistics you have given us of the number of the bornes and the different
 - given us of the musher of the horses and the different most key are put to, were selected from the Register-General's statistics, I take it I—Not from any published statistics yet.
 - (3). They are statistic-collected by the Countainiary for the Registers Ground i—They are. 26. Do you indoo, or can yes tell me, how horses, two-pear-olds and over, are defined as agricultural borres —No. I can't say.
 - (6) Because there are many bornes used for agricultural purposes up to three years old, and then used for recreation and answessate followards, and it does not seen to use that there is any means by which the Constituting can decide which homes are purply agricultural, and which bornes are intended for recreation?
 - tural, and which become are intended for recognition t — I don't think people in congested distracts keep become for ammounted. They only keep them for agricultural purposes.

 46. But a man may breed horses for ammounted to.

 No. I don't which so.
- No. I don't think so.

 97. Well he may sell them for ammagness only 1—
 He would sell them for profit only.
 98. You read for us a number of regime to queries
- sent cut by the Congrescal Districts Board to gentlamen who reside in the congrescal districts as to the test next of stallion for those districts. Can yes bell us how many are in favore of the Hackney stallies l--Abest one helf, results resulting. I did not sun-
- 98. Then you read us a number of letters from different gendlemen and it would appear they were not in reply to any circular, but in reply to better written to them directly—By Mr. Wrensh, most
- 100. Are these letters in existence t—Yes, they can be got. 101. The CHARRASH.—It may be well to hand in
- 101, 120 ORANGAR-1-1 may be well to harm in may letter to which the latters you have already read 4 of are narwors 1—Yes, my bord. 102. Mr. La Tuccum.—Than Mr. Burdett-Courts may apparently recommended £200 as the lowest price at
- bers which a suitable Hankenry stallion could be purchased.

 to Can you tell us the prices that you paid for three
 unbergrandly S—Yes, I am coming to that.

 105. The Heckney stallions were under 15 hands
- now 10f. The Heekany stallines were under 18 hands got high 1—Of course that appears from the records. 104. Well then, I see a number of these gratieness who made statements and wrote letters referred to the former stallines in the districts 1—X as.
- 106. It see in several of the replies they speak of the theoroghied stilliers that were in those districts as briefer down weedy theoroghieds, and it does not appear from any of those regities that it responsible above the region of the reg
- was 105. Mr. Carry.—No, that is another horsetare Lord Leitrim had one also, "Young Artillety" be wan
- indid.

 107. Mr. Townsend said he had a thoroughbred by a Controversy, and that his enherciption was quite full—Fee, and snother grathman said that there were enough of thoroughbreds in the shirties.

 108. Mr. La Torcum,—Best it seems to have been an a general consensus of spinion amongst those gentlemen that the thoroughbred stallin that actised in.
- Printed image digitized by the University of Southampton Library Digitization Unit

the districts was a broken down weeky animal !--- Yes, it appeared that the local stallions were all had sail 109. You mentioned several of the inspectors who were sent round to these different districts. Can you give us any idea of the instructions given to these different inspectors!-Yes, they came before the Beard, and they had conferences with the Board and with members of the Board separately, and then letters of

izatruction were given to them. 110. The CHARMAN,-Con you firmful us with these letters of instruction !- I don't know. The

letter was marely a covering letter with a string of quaries, but I can formish the queries quite sails 111. I suppose they were all the some 5-All the

same, my lord; it was a circular letter 112. Mr. La Toronn.-It struck me as rather strongs certainly that although not more than half the rerilies to the exerces to the residents in the districts advocated Harkway stallions that reference is directly made to Harkney stallions in the resest of everyone of the Laspotters, and I wish to know whether the Immedian were sent round arevious to the purchase of the Harkney stellions by the Board !- Yes. 113. In every one !- Except in the one of Major Garkell, and in the report of Major Gaskell he speaks

114. Now, these gestlemen, Mr. Rocke, Major Bustledge Fain, Mr. Henry Dovan, Mr. Butler, Major Gaskell, and the others, did they report on matters equipoded with agriculture as well as herse brooking -Oh! Yos, and other matters besides agriculture

115. Do you know had they say practical kno lodge of horse breeding !- Some of them had. Mr. Redmond Roche had, Mr. James Butler has, Mejer Ruttledge Feir, I believe, has, and Mr. Henry Dorne has, I connot speak for Major Goskell's quedifi-cations resecondly. Mr. Gohan I know as a name who keeps herses, lest I don't know more than that.

116. Now, as to sending out these queries, you read replice from ten gentlessen living in the congented districts !-- Yes; more than that. I think from nine-

117. Were all these all the replica received by the Board to the tables of queries !- I don't know. I abould my not.

118. The Chammax.—Can you find out for us!—

Yes, I can easily. 119. Mr. La Torcen.—Then you read betters from some other gentlemen, from Lord Zetland, Mr. Burdets-Coutes, Ser Walter Gilbey, and others. Do you know how many pentlemen with penetical know-ledge in connection with home breeding were committed in England, and how many in Iroland for I noticed that all the lotters you road over from England !-No, there were letters from Mojor Disrover, Lord Leiteim, and others.

120. Didn't Major Burrowes my he was marrily the webicle to convey the views of Lord Tradegur !-" Hackney stallions, 14.2 to 15 hands high," Major Bureowe says, "would suit admirably, and must of them are above that standard." And there were also them are above that standard." And there were also letters from Lerd Leitrice, Mr. Thomas M'Mahre, Costlebbayney; Mr. Townsond, Mr. Richard Barter, the Clark of the Denegal Union, and Lord Liances. 131, Mr. Richard Birtor has blusself a sind of thoroughbred Hockneys 1—He has

ISS. The CHARMAN.—Possibly we can get the definition of a borse for an agricultural home and a orse for pleasure better from the Registery General's Office than from you !-- You can.

125. When these gentlemen were sent out to report to the Board do you know had the Board come to any conclusion so to the best class of stallion to send to the congested districts 1—No; this was prior to it as for as I know. I think the conclusion was verse to about Arabo, at that time the Queen made a present of an Arab to the Bould.

194. Do you know whether those gentlemen wereselected mainly for their knowledge of agriculture to general or for their knowledge of horses in particular !-The Board's Inspectors.

195 Yes L. No. I think they were selected and with any medal view to borner, but because of an all round knewledge of the country and its conditions. 136. You recutioned just now that some of them were well acquainted with horses 1—Yes.

157. Do you combine yourself espain of mying whather they were or not -My only mean of knowing was their until reputation, and they have the reputation of knowing about houses. 128. Do you know why Lord Trodegur was occ-

sulted !-I clou't. 120. Was it with regard to the capabilities of Wolsh posise being something shrolar to posise in

the consented districts !-- I think it was as to Welsh 130. Do you know whether any steps were taken to accession what close of stallion had been put to the Exmoor and New Forest youy?-No; I have not local anything as to Expose or New Forest posits, 131. Then, the Board laving made those inquiries. cause I respond to seem conclusion as to what steps to

alco !- They started with about seventeen house. The first year they had seventeen beenes; in the test 132. That is in 1899 !- You; in 1893 they storted with seventeen houses, one Gleveland Bay; one Burb;

134. How many in all 1-Seventeen the first year, 155. How many have you now i-I have got now a list of lifty, including penies. Some of the fifty are no longer in the Boool's hands. Some were old, and were not rid of, more were sold, and a few died. vete got thi at, mane vero stat, first is low man.
Altegation the Board tought thirty-six Hashroys.
They are at follows: Rokely, North Billing, Bail
Gentleman, Callie Frenzoy, Bean, Frahim III, Loui
Go Dang, Zeos, Laul Deworns, Frenzoy II., King Firenessy, Lord Tempson, Highgate Performer, Ross-lm II., Gay Lad III., Earl of Nikhelale, Flying Firenessy, Ireknel's Dalte of York, Chantilly I., Matchies Francey, Brass Verbruser, Esp Malton, Lord Lepington, Proof Deep, Lord Soco, Lord Sherishn, Murry Lord, Lord Deswille, Osmaron, Convoy. These were all the Huckneys that have

been benefit. How many !- Thirty-rix.

136. Mr. Wassen,-Iso't it a fact that two of the anisasis, Grimston Performer and Floodsferry Cuist, were hirst by the Bossel, and Chantilly L stal Lord Donville and two or three more were bred !- Yes 137. Mr. La Torone.-You appaired thirty-six Hackneys altogether i-Yes; they are on our list 138. CHARGAIN.-And there are fifty altogether 133. Chaimaish.—And thore are fifty allogeday, including what you borgid, beel, and hird ba-Yes. Thate are lefty mirrath allogabler. The remaining are —Clemeland Bay, Rey Brackelst, in North Kerry; a Barth, avrially Jolly; Arola, All Baba, Dancet Born and Trassac; Widel colos—Electricity, Scaleson, Express IV, and Prince Libertellys; Welsh posies.

Welsh Tommy and Movement; and two thoroughlyons, St. Aidan and Uncle Sam. 139. Can you tell us where the house were placed? Roboby was in Ballinamore in 1802 and 1803, in Oughtenard in 1895, and in Caradonaga in 1895.

North Riding started in Schull in 1892, was in Den-pol in 1893, and Ballinamore in 1894; he was sold. Real Geatleman was started in Dunfangley in tical Gastisman was started in Duminazily in 1892, and was in Duminaghy also in 1893 and in 1895, and Lecistroph in 1895. Callair Freewey was at Achill Island in 1892 and 1893, and in Be-mullet in 1894. Beau started in Nowport in 1894, was in Newport also in 1893, and in Dengion in 1894, 1893, and 1895. Fachina III. was in Conter in 1899. In Kenmare in 1893 and 1894, and in Dingle in 1955 and 1898. Lord Go Bang was in Letterfrack in 1850, in Christatt in 1893 and 1894; and in Caher-dress in 1895 and 1898. Zous was in Dungles in 1850 and 1893, and in Cashel in 1894. Lord Derwest was in Belmullet in 1882, and at Achill Seand in 1863. Fireway II. was in Swinfierl in 1892, 1865, end 1894, and in Kenmare in 1895. King Freatway was in Oughterard in 1895, and in Calcerivers in 1863 and 1894. Lord Tennyson was in Carpleongh in 1873, in Ardem in 1893, 1804, and 1886, and in Letterfrank in 1896. Highgute Porfrom was in Dingle in 1893 and 1894, and in Carrigart in 1895. Roundes II. was in Scholl in 1893 and 1894, at Achill Sound in 1895, and in Carletownbern in 1896. Gay Lad III. was in Bustry in 1893 and 1894, and in Swinford in 1895 Bootey in 1893 and 1894, and in Swinness in 1896 and 1895. Earl of Nithdelie was in Carmionagh in 1893 and 1894. Flying Frentway was in Dun-faragby in 1894, 1895, and 1896. Ireland's Dulys of York was at Belvaillet in 1895 and 1896. Chan-

fiffy I. was in Letterfrack in 1895, and in Cashel in 1986. Matchloss Fireaway was in Donegal in 1894. Series Performer was in Grange in 1895, and in Loundargh in 1896. Boy Malton was in Stranorler in 1995 and 1896. Lord Loppington was in Newport is 1834, in Donegal in 1895, and in Corndonagh in 1896. Proud Done was in Cashel and Letterfrack in 1896. Lord Saxon was in Newport in 1895, and in Civiles in 1896. Lord Sheridan was in Letterfrank in 1890, and in Newport in 1896. Merry Lad was in Newport in 1896. Carnaryon was in Bullinamore in 1895 and 1896. Derwent was in Schull in 1895, and 1895 and 1896. Derwent was in seeme in 1995, and at Achill Sound in 1896. Entherps Dake was in Bantry in 1895, and in Kenmure in 1896. Grinston Bantry in 1895, and in Kenmure in 1895. Prooffers Bantry in 1889, and in Accounter in 1890. Proofferry Performer was in Louisburgh in 1895. Flooiferry Cabat was in Cashel in 1895. Leed Middleton was in Carndonagh in 1895, and in Carrigant in 1895. St. Tatton: was in Churchill in 1895, and in Ballydebob is 1836; and Convoy was in Arders in 1896. are all the Horkmers. As to the others, the Cleveland Bay, Bay Benechet, was in Kilmorra in 1892 and 1863, and then he was sold. The Barb, Awfully July, was in Carlel in 1802 and 1893, in Carraros in 1894, and at Ashill Sound in 1895 and 1895. All Bule was stationed in Belmnilet in 1802; he was only kined for the season. Desert Born was stationed in Ashill in 1892, and was in Ashill egain in 1894, and in Belsrullet in 1895 and 1896. Timesan was in Gientes in 1892, in Belendlet in 1893, and in Fin

town in 1894. Electricity was in Louisburgh in 1893 and 1894, and in Carrareo in 1895 and 1895. Sentenn was stationed in Letterfrack in 1893, and was 1896. Express IV. was in Ballyconnecly in 1893 and 1894, and in Keel, Achill Island, in 1895 and 1896. Prince Liewellyn was in Oughtersed in 1893, in Area Island in 1894 and 1895, and in Carndonagh in 1895. Welsh Tommy was at Achill Sound in 1893, in Swin. feed in 1894 and in Kiltimarh in 1895 and 1895 ; and Movement was in Carvarce in 1893, in Initihoffia. in 1894, and in Clare Island in 1895 and 1896. The thoroughbood St. Aiden is at the Stud Farm, where he served some marco; and Uncle Sam was stationed in Bustry in 1816 140. Do you know how the selections are made as to particular horses being stationed in particular places !- It is discussed by the Land Committee or the

Here Committee of the Board. They draw up a list of places, and then they consider and discuss excupit themselves where to put each horse, and then the list is drawn, up, and posters printed.

141. Upon the subject of selecting the breed of the

home, do they decide upon that thrusslves !- That is all discussed at the Committee meeting. 142. That is without any reference to the wishes of the people of the locality !-- Oh yen; the wishes of the people of the locality largely comes into it ; people

write letters.

one statem in the noise locality !- Yes, we have a Hackney and an Arab stationed in the same place 144. Would you have a Hackney and a threenghbred !- At Bintry, no. The Hickory was there the

145. Mr. La Toutum.-But have you a Hackney and a thoroughbred standing in the same place!- No:

the only place where a theroughbred is is at Bantry.

146. The CHARKAN.—Then the Board has had no direct opportunity of seeing whether a Hackney or a thoroughbeed would be preferred by having them both in the same place at the same time i—The only place where a thoroughbred is yet stationed in the

country is at Bantry.

167. Mr. Warson.—Do you know has there been any sequest from the people of Bantry with regard to the thoroughterd I—I don't remember. 148. Mr. Caner. Do you know why Bintry was fixed on 1-I reelly forget. I am only there in an official aspecity; I dout know anything about horses, and I don't take note of such openiduations very

149. The CHAIRNAY.-Do you know the number of services given by the stallions !- Rokeby served

150. Lord Astrony .- In the four years 1-Yes. That is no average of forty-three per season. 151, Lord Raympowers, -World is be needled to give from the year 1892 downwards the services by each breed, by the Hackneys, the Arabe, and the other chares t-4 can give the total names for each cor; they have not always stood in the same place I can give the total number of Hackney corvices for the whole of 1892, 1893, and so on, but I have not the return made out in the way referred to. It is quite easy to propase it. I have been the total number of services for each horse since he was acquired by the Board, and then I have the average number

152. Could you not take the Heckneys for 1892 and say how meany services there were of Hackneys in 1892, how many of Araba, how many of thorough-bress, and so on 1—That is one way to get at its, and I can easily knve is for you. 153. You see we want the number of services of

each thus of luran for each year, thus is, Arabs, Clevelands, Barbs, Hackneys —Yes, I can easily prepare that.

154. The Guarana...-You could let us have that information !-- Yes.

155. Lord Assrows. - Where Arabs and Hackness were studing together, which were preferred !- My recollection is that they both filled. I am protey sure they both filled.

156. Mr. Carsw.—One you give us the prices paid for the thereoghbreds !- No.
167. The CHARMAN.-There is no objection to give us the figures as you have got these, Mr. Micke !

158, Mr. Wanners.-You have not the individual services for any year there !- No, I have the total number over all the years and the average for each 159. What Lord Ashtown would like is a return

where two horses stood torether, a Hackney and na Arah, a return of the services given by each horse !-Very well.

for services !-- I can give the total number of the services. The number of services at 5s. was 5,191, at 10s., 197, and at £1 the number was 288, making a total of 5,676.

161. What makes the variation in the prices !- It the poverty of the small farmer. 162. You charge 5z, to some and £1 to others for the same horse !- Yes. The 5s. fee amounts to 914 per cent, of the whole.

165 Loop Assertory ... To it regulated by valuation ! The 10s, fees are 31 per cent, of the whole and the £1 feet and over given are 5 per cent. In addition there are 122 free services as prizes for mares at local shows. The total number of services would be 6,042, A further number of 1,544 have been served this year up to the present, and that with the 5,676 up to the and of 1895, the 1,244 during the present year, and 192 free services, reaker 5,042 as a total, and of these

4 995 services were Hackney services. 164. Mr. Cangw .-- Up to the end of hat your the services were 5.798 taking the free services !- Yes, and of these 4 205 were by Hackneys.

165. The CHARMAN,—As I understand the same fee is charged to the some class of payeon whether for the services of a Hackney or pony or Bark or thousandsbroth. That is so. This year the Board in some cases tried a higher fee-a 10s, fee in some placesspecially where they were sending a very good horse, but I think as far as I can judge the Board are not inclined to continue the higher for

165. There is no definite rule on any support.

In The rule is that a poster is sent out with each is. home, and full particulars are given in the posters. 167. There is no definite rule of the Board as to the fees charged and it may be varied !-- It is fixed for each horse and it is practically 5s. for every hove. with two or three exercises hardly worth taking into 168. Have you anything further to tell us on this

point !- I think not. 169. This system has been practically in operation since 1892 i-The Board started in 1891. The Board becau in the sutemn of 1894, and they had 17 horses

out in the season of 1692. 170. Are you in a position to give the Commission any information on to the general results of the working of your Based in your existent. The Board issued a neries of queries to 34 people in the congreted districts and a runmary has been made of their evidence, a short commary. (Booling.) "The first query is :— At what eges do small farmers in the district usually dispose of the foals or house which they breed 5. The rardies to this equation indicate that in the western or Commanght district, it is usual to sell as feals of from six to eight months of age. On rare commions sale is defended until our year or our year and a half, but this habit pertains to large occupiers or to those who are in better circumstances than the ordinary small holder. Mention is made in the report from Belinsilles of some botter class farmers who retain their venno stock till two or three ways of are In the north-west or Donegal district six out of eight reports point to the usual age for sale as being at least one year. Bales, as feals of six months old. are, however, not unfrequent, while well-to-do formers are etated occusionally to defer sale till two or three years of age have been attained. No explanation is years or age have been attained. No explanation is given to show why one locality differs from another in the age of sale, but it may be inferred that there is in the age of sase, not it may be interved man there is considerable difference in the ability to keep pos-sessed by the occupiors of land in the nurth-west. Not only may this difference reveal itself in more ample mount but in the extent of level assurand by farmers, either in the holdings proper or the area of commences. In the north-west subst seculiv take place from one or two years of san. Earlier and later sales are received, but these may be attributed either to exceptional poverty in the ann case or prosperity in the other. Sommarising the evidence, as received in the other. Summaring the collection, it is quite from the whole area of congested districts, it is quite superent that the peneral role is to sell sicher as Sook often warning or as vession. These who tain till yearling or over three years old, although they may occupy land in congested districts, can hardly be

pestion, but not of it, and their system of farming and

general mode of life differs materially from this while attaches to the small and very poor farmers, for whose handle the scheme was originally instituted. 171. The CHAIRMAN.-Ware these queries aunt out this year !- Yes.

172. Are they sent out each year !- No; this year was the first season. The next query and the replin was an first season. The next query in the replin was an first season. Heading Query II. (A.) What wind What prices as follows: - (teering) Query D. (A.) wast print have been obtained by small farmers who have used the of those stallions? (B.) How do those prices reserve of those stallson . Low, show no cause prives company with the prices obtained during the same periods by similar classes of farmers for house not head by the Board's stallions? Five reports state that the fash by the Board's stallions sell either po better or were little better than those got by ordinary commen absence of increased value appears to be esseight marked, but it must be observed that the recerts to marked, but it must be opened to the produce of the parts of Donegal the cross by the Chylesdale or half-heat Chylesdale is said to be an country and valuable so that by the Board's size, the reason assigned being that the Clydesdele cross is the score it in From every other district the use of the Hackney, Bach or Arah has revulted in an incressed value of produce. In five reports, the increased value is not stated in ferrors, but described in modified terms much as "a shight print" "a gain," "prices higher With these exceptions a substantial increase is print The price of foals from six to sight months old has increased from 10s, to as much as Zi, irrespective of the saving on service fee amounting to. say, 10s. For one and a-half year olds, an increase varying from £2 to £6 is recorded. A fair average would be £3 10s, to which must again be added 10 saved on service fee, making a total increase of £5. Two year olds by the Board's sire, where such have hear sold have realised force #4 to effective the returner breed, exclusive of the saving in service fee, and this increase in value continues to sugment with age, for with reference to three year olds, from £8 to £16 is neationed as having been gained in the selling price. The evidence on youst of inprocessed value is se diver gent in character, that it does not afford material for say precise occupation or statement. The results of a few (in some reports very few) individual sales, sur hardly he taken as sufficient to form a key to the whole position. But there appears to be no means of doubt that in seventy-two or seventy-five per cont. of the districts where the Beard has introduced sires, the value of young horses, whether sold as finit, yearlings, two year clus or three year olds, has been

behind him. It is important to cheave that tie willinghese on the part of perchesers, to pay nove for the new type of bernes, is as well defined for two and three year olds as for feals and yearings-173. The Charman.—As regards the price of foals from six to eighton enths!—The price hastocreased from 10s, to as much as £5, irrespective of the saving on service fro amounting to, say, 10s, that would be from £1 to £5 10s. 174. In £6 a common price to give1-I believe

yeary considerably increased to those who kave made

use of the new stallions. In Connensus there seem

to have been among the dealers a combined and so

for successful attended to undervalue or ignore the her mocessful attempt to undervalue or against an improving effects of the new Meed, whilel, in excep-tional cases, such as at Achill Bound and Keel, the Board's stallion would appear to have left had steel

there were alme exceptional prices for some of the produce of the Bach " Awfully Jully." 175. Are the Commissioners to take it that if prices increased generally to that extent -10s, to £5 described as in themselves constituting, as individuals, a portion of a conrected population. They are in conts a very large jump!—It is.

176. Leed Raymonways.—Very say a better price. was got from the Each !- Yes. I think there was so.

Earlish commission for some tools. It is a celebrated 127 The Coursess .- Do you mean to say that the former price was 10s and the present price was £51 _No. The feels used to rue from about £3 or £4 No. The feels used to run from about £3 or £4 to £5. The paragraph is..." The price of feels from my to eight months old has increased from 10s," it And to hy 10s, "to se much as 45, irrespective of should to my 10s, " to as much as £0, irrespective of the saving on service fee amounting to, may 10s." 178. It does not seem very clear. The increase was

set from 10s, to the present price or £5. That is not what you toran I-No. 179. How many queries were there !-Five. That was in the answer to the second. The third query is :-(Bes/fing)-"Quitey III.- Is the demend for the Reard's stallians increasing or otherwise? Of 30 seplies to Query III., 22 are in the affirmative; 4 are is the negative: 3 are in the infolinite; one says decayed is stationary.' The replies apparently refer to the whole period which has elayed since the com-mesoument of the scheme, and when considering them, it is well to recollect that once the limit of mares is muched there can be no further increase. This has taken place in many districts, and the fact may have given rise to missupprehension as regards increase or that the alteration of service fees recently made has hat the Board costomers, while, in a few instances, the grass, failed to please, and accordingly lost casts and erest. The lowners of fee in frequently quoted as an insectant factor in bringing mures to the Board's stallen. Query IV .- Are local farmers dispeased to retain mares tood by the Beard's stallies for breeding purposes! The replies indicate a distinct desire on the men of those who can reflect it, or who have sufficient ized and other necessities for young horses, to retria wares by the Board's stellions. Many me compelled, against their will and by reason of poverty, to sell what they would otherwise keep. At the same time who have no doubt sold when they might and could have retained. Query V.....What reduction (if say) in the number of inferior stallious has followed this action of the Board! From the evidence, it would screar that the presence of the Board's stalliens has appear that the presence of the Board's excitors and arted most sensibly on the number of ordinary and inferior sires in the congreted districts. Some reports fourths the aid based of house as import out? countre the out trevel of horse as 'wood out.' In their bouldings have been contracted. Elsewhere step have been seld or left the country. In some suchots they no longer exhibit. They got few mores and see made to do farm work. Their fees are greatly reduced in order to compute with the Board's horses. Patts thereing the woulder of stallings for the resur-Facts showing the number of stallions for the years

1891-96 could probably be obtained from some reliable scarce, and such avidence would be experior to the wide answers given to quory V." 190. These are all the questions!—These are all the After the edjournment. 181. The CHAIRMAN,-I think you mentioned some stallions as being sold!—I did, my lord, some of them were sold 182. What were they !-" Rokeby," Harkney,

132. What were they i..." Rokeby, manney, "Forth Ridding," Hackney, "Zeus," Hackney, "King Pleaway," Hickney, "Highgate Performer," I am not sure that he was not a hered horse, but he ceased. to belong to the Board 183. Do you know why they were sold !-- A couple were sold because they were not considered satisfactory, and as regards two of them I think the Roard sold to advantage, getting a good price for them.

184. Do you know to whom they were sold, what became of them !- The Indian Gover 185. They went out of the country 1—Yes, to India.
186. They all went out of the country 1—Two went to India.

188. Did they remain in the country half don't think any of them remained in the country. Just before the adjournment I gave a general summary of the evidence as regards the prices that were obtained for the young bornes preduced by the Board's stellions. I can give the names of the people whose evidence is summarised, and I can give the prices that they constien as having been got for the young beenes if you wish. Mr. Fallon, District Inspector, Arden, County Dozemi, says that the years ones sold at about six months old from the Board's logue fetch from £4 to £8, except about Glencolumbkill, a parish in his district, where the prices have not been good on account of the smallness of the suircula-23 10s, was the highest price over got before by the and how were the interest price over got before by the eminery feels of the country. At Carnicongle, Mr. Hewitt, District Inspector, synorts that the largest sold at one and a balf years fetch from £9 to £12, the produce of half-bred Chydesdales used to realize short the same. At Confourt, Mr. Hardy states

that the young oces from the Beard's horses go from £7 to £10 10s in 1893. 189. Lord Austrown.-What age !-About one and a half years old, and that these are higher prices; he does not say how much higher than the preduce of the country stallions. Mr. Ingram, Dunfscagley, says that for yearings the Board's go from £5 10s. to £7, those vising two years old £8 10s. to £12, of exceptional many two years can go lue, to gliz, or exceptional merit up to £14, for two and a half year olds £14 to £17, and special case as high as £20. For ordinary bord forls of similar ages prices are shout 20 per cent.
under those obtained from Hackney sires, except some half-bred Circlesiales that sell well, as they are yearly for work early. The produce of Harkways are about 43 on an average higher than those of country stalliess. Mr. Borle, Dangles, states that the house there are generally sold under a year, and for year alde and under, the prices for the Bosre's young ones is about 45 to 48, and for the collinery stock fines. Co to £4. Major Portor, Glenties.—Foals sold as six months fists from £6 to £10, the produce of the Board's burnes : the fools from other stallions fetch from 45; he does not my to what height they go. Mr. Marssing, Milford, county Dungal,...Animals sold at a year or a year and a half old, for yearlings from 46 to 48 during the last three years; for one and a half yours old £10 to £13; ordinary hard country hoven, yearlings, £5 to £7, and one und to half years old, £8 to £11. Achill Sound.—Mr. John Carr new there is very little difference in the price of all fools; in a faw instances the prices for produce of Board's stallions have exceeded the usual price for other breeds. Bellitamore—hir, J. Willard says. Very little difference in price. Mr. Nokas, Belousliet. Very little difference in price. Mr. Noise, Belousilet.

—Hackney Arab feels and feels by Board's stellions
and at about six manths old fetshed from #5 10s. to 28 10s. Purior the name period follows inferior, £5 to stallages fetched £2 15v, to £3 10s, £4 being an out-

stallaces feeched £2 15x, to £3 10x, £4 being an out-side price. Currene, county Maye.—Mr. Tweedy ways focale by the Wesin che "Movement" averaged £3 10x, from local stallinas £3, feals by the Bork "A wefully Jelly" averaged £3 5x, but from local stallices for that app, six months old, £2 10x. Mr. J. Hughes, Carbelly area Remailstone. Cashel, near Roundstone, county Galway, says in 1803 the Board's young breeze fetched from £4 to £7 10z. for feals, and feals by country bred stallions £3 to £5, in later years £3 to £5 for foals and ordinary ecuntry stallions produce about the same price. There is a note to this witness's report "Owing to the greater number being sold as Compenses pomes the greater number being soon as Communa pennes ine prises of fools has varied little. In latter years tha Board's becses were Hackmays and sales as fools have selden occurred.* Mr. Lowndes, Cliffers, £2 15s. to £4 the average prise for feels, and from local horses the feels feels £2 15s. to £4. Mr. O'Hans, Kittimagh, feels six months old from Board horses £4 to

£4 10s., at one year to one and a half £5 to £7, fools from "Welsh Tommy" fetohed £3 10s. He does not give any particulars about the local horses. Mr. Hore. Newrork county Mayo, says the local licenes sell at about £1 a hand under the Hackney fools Mr. Sallivan, Bantry, for one and a half years old prices ranging up to £12 10s. for Board's horses, average petre for one and a half year olds not by Bearifa house. 27. Mr. J. Bailer, Waterville, for fools fifteen mention old . Sh to Sil freely ant. from the Beard's stalliers, from local stalliers 40s, to 50s, lower than the product of the Beard's stalliers. Mr. Gillinan, Dingle, average price for one and a helf year olds from Board's stalltons, £10. £3 to £3 less by other stellions. Mr. Watson, Ballymovengh, wellhowd saits £30 and upwards at three years old, three year old colts of no certain puligree £12 or £14. Mr White, n.z., Kennage, proc of finis wary from £6 to £12 as one and a half years old down to six months, prices for yearings not beed by floard's morning, peters has yearings has seen up mounts at allian dightly lower; he does not mercian the supremet. Schull, Mr. Dade, a. a., a. six resorts fall he "Recorder IL" not for £5 10s., one one and a laif year od by "Boundes IL" not for £9 10s. in. half your old by "Romaire 11." and not 20 100. in percent sales, the name of the buyer and seller in given, I can hand in that.

150. The Cramman. I don't think you told us

No: that will be the next head of my evidence, my 191. I should like you to take it as you have got it, as for an war own. The returns of the bornes in conpasted districts for the year 1896 show a decided incross over the powher of barren in moonling years in those districts. There are eight congested district counties, and in seven of those an increase in the number of horses has taken place-are those counties entirely in the coupust d districts 1-No; there is one county very little in the converted district-Co. Corkand there there is a falling off; it is the only district that is portially congested where there has been a fall-In the reseaseder of Iroland-in twenty-from counties—in eight there has been an increase and in eixteen there has been a decrease,

192. Level Asstrown.-That table refers to the whole county, not the companied mart 1-Yes. not got them reperately, but in the equation which are partly congested all, except one, have increased in the resulter of herses ; and in the counties which are not commuted there has been a decrease at the rate of two to one....two leave decreased for one that has forevered. 193. The CHAIRMAN.-That you get from the Registrar Control 1 — The agricultural statistics —a validated volume. I are now about to give, my lord, some particulars about the expenditure that the Board has incurred on home-breading schemes from 5th Aprost, 1801, to 31st March in this year. The expenditure is divided into two classes—capital expenditure and summal maintenance, Capital expenditure is en follows .- For the purchase of forty two stallions. £8,015 1s. 9d

191. Have you got the average !- No. my lord. this is not a return exactly, it is a form of account. For the processe of cight marss, £1,215. This return also instales on exempliares for many and size for donkeys: I can take off the amount spent on mares and donkeys later on. 195. Lord RATEDONNELL,-The number of mores ?

-Right Hockney marea. - Eight Hecaney mates.

190. Level Acarrows. - That is Spanish donkeys ! Twenty-six deakeys. 6930 7s. 2d. Then there are a couple of items in the account which don't exactle refer to the hurse breeding, a farm horse and a muli refer to the Sume orecass, a stallion your purchased in the island of Arren—in order to get rid of it—a form borse for the Stud Farm use, £24, and then ten foals were hearth; in the country, half-brade for obers. vation purposes, they were the produce of the Beard's

beens, and some feals were bought in order that the Beard might see bow they turned one What were paid for them In 273 to.

103 Levi RATHEONERLL - What you was that !-198. Lord RATHHOUSELL.—We may year was man be.
They were bought in different years.
199. What is the oblets one t.—Three, I think,
200. No. T. Evenous — Where are they knot need

-At Shankill, county Dablin, on the Daily and 20). Then the eight mures purchased, are they there also b—They are also at the Stud Pore, the

Board boarden hired a couple of stallment. Hire of stallions, £110 Se. Rd. 103. Mr. La Torche.—In one season!—No. the total hiring, clothing, and equipment of stalling, £350 19a Sol. Then the cost of the lettlelings, son of

£369 18s. Sol. Then the cost of the lettlifings, not of Soud Faym and brildings. £4,520, furniteso, £65 15s. incoments. 2176: introduction of water made £153; fencing 79; fitting up stables in the country £675. Total capital expenditure, £16,535 of Now the annual expensions is divided into fee-columns, 1892-95, 1803-94, 1894-93, 1885-96, I am give them separately or the total of the four. Treps port expresses, for bringing the stellions to sail from the Sted Firm to the country, 1892-03, £211 e41; 1892-94, £239; 1894-95, £235; 1895-96, £70 1892-83, £211 o41total, 2076. what was the price given for the Backney stallings !-203. The Courtman -I suppose the suppose technol keeps about the same !-- I can give the amount no head reparately, I have expurete retrans for their shoring, veteriosry fees, medicine, &c., £45, £851, £172, £147, total £649. Wages of marcon and grooms, £641, £1,174, £1,163, £1,350, total, £4,560. In the common when the stallions are in the country certain dation are performed by the Rayal Iron. officers and nergenate, and remaneration is pold to tions as follows: __£246, £385, £105, £105, and £1,485 odd. For the Stud Fave, that is the few Arriva com. Per ver color PATE, that is the Service the horses are kept, in 1809-200, ETS 56, 64, that was the first year. Rent and taxes, 1893-56, L206; 1803-96, £104; 1803-96, £218, bate 2018, bat 1894-95, £88; 1895-90, £83 odd, total £234 odd. Oced, oil. des. &4 16s., £16, £17, £26, sets! £61. For inspection of mares for services, adventising tenders, insurance of horses, &c., £324. £342. £315.

£353, total £1,186 \$s. Td. 204. What do you mean by inspection of marent—Before a more is served I believe she has to he expressed to see whather also is enough. 205. By a vetecimry surgeon 1-Centrally I be

liere a District Inspector of Police, and secretures a veterinary surgeon Francisco ... Then if the more is not 20% Sir T. Encount -Then if the mate is no sound I -She is not allowed to be several I respectively. 107. That is the invariable practice 1—I believe to. 208. The CRAIMERA, —Inthe Improve of Police pold.

a fee for exercining the mare !- I don't think ho is: 30 is just paid his car hire to the place; he gets a small comp sum for his services, in each year that would be 209. Mr. PresummanThen the manu that are

served he these particular stallions have all to be sound, they are all examined 1-They are always 210. Lord Asserows.—As to soundness or as to shape or suitability !-- I am afraid that question had

bester be selved of someone also, lent they are 211. Sir T. Ermonne,—Can you say are the Board's stallions examined every year 1—Do you mean by a voterinary suggest? White we have a highly qualified mean constantly there, one of the voterinary congress of Dehlin, Mn Daby, who is at the Stud Farm very often. 212. Are the stallings passed sound every season -I cannot say, but I know they are continually being looked after by Mr. Daly. Then the total serval maintenance expenditure, 1802-03 was £3,545; 1203-94, £4,225; 1804-05, 3,635; for 1803-06, £1.185; total expenditure on maintenance, £14,597 64.180) term experiments on hoth capital and maintenance, 231,335 to 11d. That consumminched a sam of £5,936 7a, 3d in respect of marcs and such sport from stallions, to that it would bring the stulion expenditure in round numbers down to £24,000. These taures are kept for bareding stallions so he used subsequently by the Board, and abouty some of their produce are serving in congested diswists, and the consequence of that is that the qualital expenditure of the Board on stallieus is new begin-

2)3. The CHARDINAN.—Do you know anything conneil as to what hind the more mp1. They are Hackney mores, in the Huckney Starl Book 214. Lord RAMMONNELL.—You said £34,000, in goned mumbers, in the expenditure on stallious during

what period !- From ith August, 1891, to the 31st Murch of this year, the said of our financial year. 213. The Charman.—Can you give us out of these figures the average paice that was given for the Hack-ner stallians, and their individual cost per year!---! can give their cost per year; I can give the average 216. Well, you world do it much quicke than I exist - It is about £130 a piece is the average, a

abade under £300. 217. Could you farmsh us with the actual price that was given for each one 1—You. 218. We would like to have that. You can give us now their yearly rost1-The average cost of a stallton is £100 a year; this made up as follows:

orse for eight months of the year is at the Stud Farm. 219. Does that include all the stallions, posics !-Penies, Huskings, and thoroughbreds and all. They are all at the Shnakhill Stud Farm for eight mouths of the year, and they are in the country for four courts roughly. The fungs in the country costs £10 18s. We can be it for a griman a week, and at the Stud Farm it costs for the eight months £23 4s. Groom's wages in the country costs £22 for the four months, and at the Stad Parm come £10 for the right munths; the peasen of that is that one grosse at the

Sted Form looks after four, and, of course, there has to be a green for each horse in the country. The Constabulery expenses come to £15 10s. 210. Sir T. Ecoxoxon. - For stallion !- You; they are isolated. Transport repenses come to about £5 brokwards and forwards; elething comes to £3, shoring, &a, comes to about £3, chair dars of rent,

course to about £5, and the propertion of wear and tear and deprecuption of brillians come to about £4 10c, and that makes it £108.

331. Lord Asserows.—Practically what you have pet here under annual maintenance you divide smang of the stallens; you give then their slare of rent and keeping up the Sted Farm!—Yes, and dependation

232. The ORATEMAN.-Do you know if the Board have ever made any calculation as to the relative expresent of keeping all the stallions in one central farm during the eight mouths, or having ceveral smaller establishments !-- You; this return really gives it You have to keep them, of course, four months in the country under both systems. You keep then twelve somthers after the one system and four under the other in

the country. The present system coats £108; keeping them all the year round in the country we estimate 223. That is keeping each individual stellion in its own district !--Quite so. Foruge about £54 12s.
at [creson prices ; grooms, £70 4s. at preson prices ;
Constabulary remneration, £15 10s. We think that would be necessary to resumerate for inspection during

reterioury surgeon, \$9; that would be heavier in the corratey than the town, because a veterinary surgroup would have to come from a distance; rent of country atables and repairs would come to £15, about; total,

224. In making that comparison, how do you calculture the expiral outbay on the form I-A percentage on the different classes, it is made out, I think, acon

ately; £1 10s is what we estimate for the west and toor per stallion. 220. I menu is that comparison based on the comparative sutural expense of the two systems, or has on made allowance for the crartal outlay on the Sued it is a percentage on the expenditure for the buildings.

including depreciation. In the country we just change runt, we don't acquire buildings there, we charge rent 250. Lord Assrows. - And in the other way you charge interest on capital ! - And their proportion of

the yest is heavier in the country. 217. The CHARMAN.—What I meen is charging interest on the capital outlay, it is still in the opinion of the Beard chesper by the amount you have said to have one central establishment to send all your stallion to for the right months than keeping them in their own localities?—Unquestionably damper,

218. Have you may other return that you wish to put in !- No, my lord, except the ones which I am to prepare for you 220. Sir T. Eccontra.-Mr. Micks, you have given

as I think, the prices charged for the cervices by the Converted Districts Board, our you tell me what they are toughly !- Nigets-one per cent, of the services are 230. And I think you have also stated that the lowness of the fee is an important faster in levinging moves to the stallions f—It is, in a few districts on

increase was attempted this year and it lead to a great deal of remonstrance. 231. So it is your experience that the cheaper the stallion the more work to in likely to do I-That is quite true.

232, I suppose you have no cases of alsolutely free oversions 1-No. expent for prize maces, at a sort of 233. Mr. La Toronz. - Referring to your evidence

before the adjournment, Mr. Micks, it appears that you sent out queries to minetosu gentlemen who remidel in congested districts 1—Thirty-four.

234. Well, you got replies from nired-end—I think
we got replies from thirty-four—oh, that is the very

set gos spore tens throught you meant the second.
235. No, I mean in the first instance and it appears
that half of those gentlemen advocated Hackmay stallines being used in these districts, still in 1802, which was the first year that the Board undertook to law borner they bought neventors homes of which one was a Cleveland Bay, one was a Barb, three were Arabs and there were taulys Haskneys, consequently the Board disregarded spacetartly the opinion of half the continuous who sent back routins and acted in accordtince with the opinion of the other half, how do you account for that !- I think twelve out of oventeen

is more than helf.

238. Mr. Watssett.—Would you mind giving the advice that the remaining seven gave, whether they definitely recommended may special hind or what they recommended 1 237. The Chargeran.-Who decided this question

at the Board !- The full Board. 238. What is the full Board !-- The full Board is the Chief Secretary for the time being Mr. Wernch is specially appointed to represent agriculture and the breeding of live stock, and at that time the late Mr. Take, the late Mr. Cairnes, Mr. Charles Kennedy.

139, Sir T. Escoute.—The Bishop of Bushos biif a home was there all the year cound, an exten £10 Yes, he was on a little after, the second year.

Gul. 29, 1604. Ma. W. I., Milita. 14

W. I all thy the Board did anything or can you celly
tell us what they did to Well, I heard most of the
discussions.

24.1 Mr. Lt Toucase.—I was going to ask you the
number of mares served by each horse, but I believe
the subscription you say were practically full i—Most

number of mares served by each horse, but I believe the subscriptions you say were pestically full—Most of them were, they run from about 43 the lowest I see to accepting over 80 or 70, yes, 71's the highest. 242. Lord Assrows.—What constitutes being full!

240. The CHAIRMAN,-Are you in a position to say

242 Loca American.—With consistent using single to them according to age and other consistent surgeod to them according to age and other consistent with the number of servician as for a 1 take it up to 1864 was either 5,196 or 0,042, I forgat within. Do you know anything about the number of feebs!—Nothing-244. Have you say return from the Distanle Lappeters of Constitutings as to the fruitfolians of

these heres, the rember of fouls beet by them i—L here not get any effold reports elect these things at all, I think the matter has been fingured into but I have not any record. 24.5 You said that a thoroughtred horse steed as

Bankry, it was the only place the Boood cost a thereughbred heres to I think that there are Hackery sizes standing in the same district i—Not at the same time.

346. Could you tell me where was the reaccest—I

suppose Cashletown or Schall would be the search place where they had a Hashray i—Yes. 247. How far is it from Beatry to Schall i—I don't know. 248. Mr. Wasseer,—Did it or all some before you

that there was an application from the people of Sentry to send hade a Hackesy based of the theory jib bed in Xe, that did not come before me.

249. Mr. La Tuuum.—Dr. yeu know wint price
"Uneic Sans" stood at 3—No, or 28. Aidan," but I

"Unsize case," stood at 1—no, or "at. Anisa," not 1 could secretain it at one.

250. Lord Assrows.—Did you not say that all the stallions atood, to all states and purpose, or the stone price 1—Ob, the fee in the same; I throught it was the price Mr. La Trustle was asking.

251. The CHARMAN.—You said they all stood at the same price, and the price was fixed according to the valuation of the man t.—Yes. Ninety-one per centare 5s, free.

252. Loud Amerows.—A man can have a choice of a sire at that fee bringing in Ma. maret.—Yes, but in

is providedly lighted to the six that is next to him.

203. The Characan, —The fees charged for the
thoroughlored stallion as Bantery would be the same to
the different classes as the fees charged for the
the different classes as the fees charged for Bantony
stallions to similar promote in their districts —Vex.

205. Lord Auxtown.—Varying occording to value.

555. Mr. Lu Tourne,—Xou are sure of that.1—1 as a near of it, if it was not to I would have been I is as near of it, if it was not to I would make no difference to the near wholether be sent his more to the through-level at Bastry or to the Rockings at Schull 1—If I have as half way mus he might do tubes, but I think it would depend on the police district he was in. For convenience the horms are inspected according to

267. Lord Asserows.—Do you mean the police would practically reconsumed a sire!—Ob, no; but it is the same as if a man was in one parish he would

then get the service of the particle bern.

28. Would be be allowed to go to any other wire
estation that districts 1—He might. I never based that
genetics related, but they invariable per to the districts,

300. The CRAINARA—The Coronisides went to
how whether are individual flowers has a from chaine,
whether has would send this same to a pony or a thoroughbed 1—A. for a go prices are conserved, but as for a
deal of the contract of the contract of the contract

separating of sending it to the horse next him.

280. Lord REPROSCENTE—The district to which

the herea are earls—how are the lowest soled to be such in the partial efficients—if "They were already to be such in the partial efficients—if They were already to be already to the committee of the Board who does not such that the matter, they discussed with the forestern of the such and to see of the such and the send and early discussed. We send the such and the such as the such

motion system.

76.2. Here your any idea which becomes of these 576.2. Here you any idea which becomes 40 days for the property of the control of the contro

thing, they had to pay the following year.

205. And you have got no evaluates as to the value
of the tires displaced by the Companied Districts 1—08,
yes, I read a string of seasowers about them sires, that
they were worthless.

200. A description of thous, but not anything touching the prices gold for them 1—No. 201, Well, you say of the stalliers that were stell, none remain in Irakud. Then you read as some reports as to this improved price of brens, and sail that many of these reterms stalled this price were level (Cybesidese. What year did these returns of with 1—They chall with all the years, they were with 1—They chall with all the years, they were

invived to deal with every year from the start.

166. They were sent in this year 1—They were
to be the from the from the profiled that the
prices had been gradually increasing or that they start
from the measurest that the Composed Distriction Board
has been generally increasing or that they start
from the measurest that the Composed Distriction Board
has been generally increasing or that they start
from the measurest that the prices of flow as
to coin because evaluated t—Thysy because at some

colonical in street distriction.

270. A generalizary value from Bustary and sept that the servings prior of the symming, think-yer that the servings prior of the symming, think-yer that the serving prior of the symming think of the serving the serving terms of the serving the serv

272. How old are they I.—I think the older isome three.
273. Have none of them been sold i...None of them

and as far as I know.

274. Do you know have say of them been offered
for asle 1-1 don't think any have been offered for asle.

I think some have been trained.

375. Are they whered in the sensets of the Computed.

10. 1 ctime steen have seen learned.

17. Ac exp walved in the most of the Congested
to Divisite Board 1—Oh, they are, of eccurs 1 Lovie
1 prior put down until hery man tending said.

27. Lord Recursorant.—De yea knew the own
prior 1 Lord New 1 Lord 1 Lo

ore Mr La Tonoue There is an item that you have read in the amunal expenditure, the inspectage of marce, do. ; you said that the District Inspector inmarted there mares pravious to their being served !--Before they got the service order.

279. Are you sure that you are correct in saying that f-Well, that is my belief. 980. Do they impost the mares do you know to ndes of the fitness of the animal to be served, or to

usige of the qualification that the owner of the mure 281. You put the average cost of the stallies, at £106 per strum : what sound charge do you not for

proportion of capital on each horse !-On the amount ment on the horse ! 382. No, but the annual depreciation in value of the learne I.-. I leave the cost price there the horse

may either increase in value, or depreciate in value : there is no certainty of knowing that. 283. Don't you write off something for depreciation each year I—We could not write it of, we might have to add comething for its additional value.

284. My experience of horam is they don't show greek increase in value!—Some of our house have distinctly ingressed in value. If his precises becomes well thought of he will increase in value at a

185. Well, you don't, in fact, take anything off for 185 Lord Amprouss.—£4 10s. depreciation on

cepital, is that depreciation on horses or on buildings I -No; it is buildings. Practically our capital expenditure has ceased now for hower; so far or Loknows are concerned we have a stack of these our-

selves coming on, we have some actually serving and 287. Mr. La Toucue.-Surely you charge into on the napital invented in the lorses, £100 !-- We

have no such carried account under sudit regula-258. At any sate you don't think it is necessary to charge each home with any percentage of depreciation. In that borne out by the result of the sale of the

twelve burses that you have sold since the Board has been in existence !-- On a couple of homes we got a wibstantial ingresse; on a counte we lost, 289. You sold twelve b. Did I say treduct I think five were sold.

290. It present to me that if was invested £16.638. that you ought to charge yourself somewhere or understand in what way. Do you mean for book-

herring purposes ? Lord Asstroyou....No: the sinking of the capital .- If we were preducing an account such as you say we would have to do so 892. Mr. La Topogra.-The total expenditure in

fact since the Board has been formed on capital and maintenance of the horse breeding establishment has hern £32,000 t-£51,935 293. And the result has been that 5,798 mares have been served!-Or, insluding the present year, over

6,000. And you claim that by the action of the Conmeted Districts Board's horse breeding scheme you proof Diffiction formers are receiving to the first save improved the value of young horses—name people say 20 or 20 per cent, and other people say up to £2 or £3 a head. Is not that the glat of the report—Ne; that is what it comes to.

255. Taking it at £2 a head and assuming that 6,000 services profitted 5,000 feels you have increased the horseflest in these congested districts to the extent of £16,000 t-Yes, that it sawrining they are all sold as feals. The amount would be greater the older the young one is when sold. 296. I take it that the enormous majority of houses see sold as feels !- Yes, the large majority, but no-

thing like the whole.

207. However you appear to have expended £31,235 in doing £10,000 worth of benefit ... That would be hardly it, became that £31,000 is divided into two kinds of expenditure, capital and main-

237. However

208. You have invested £16,000 capital and you have exceeded £14,000 in maintenance 1... Ven 259. And the benefit that has sorroll by this expenditure appears to amount to about £10,000 1-3

should not my that, I should my that would be a very low estimate indeed. ry low essentiate indoors. 300. Do you think then that the house in these districts have improved to a larger extent than £1 a head 1—I should say your much larger taking the whole thing, taking the coles at all the different ages

501 Of course if this had been in a country where horses are maintained for the use or ammement or recreation of the recole who live in it was would be no

made a permanent improvement, but these constated districts appear to be places in which bornes are not kept - Pillies are kept for broading in a year lares number of easy.

302. Your report tended to prove that it had not tended to keen the mares in the country L. T. (bisk-

the evidence is that a very large number of the filling are knot for benedicu 303. I took a note when you were reading out the evidence that the yoult of the lawness of fees and the improved value of the horse had not texted to ludge

the farmers to keep their moves !- That is not my impression of the evidence. 204. Lord Austows.--As for as I remember he said that in a large number of cases people had sold who ought to have kept !-- Yes.

505. Mr. La Tourea.—As a matter of fact the great majority of houses that are tred these leave the dountry when they see a year or two old i.—Yea, the event majority do : each of these may sue rule keens men for doing their work

306. Lord Assrows.—What you want to get at it whether they sell the more and keep the filly !—There is a tendency in that direction, and everything the Beard cam do to bring it in that direction they are dung giving prices for fillies kept in the country, 307. Mr. La Turcum.—I conclude this item for

cost of imposition institutes primes for mores and feals and the inducements the Board offers i—No, there is a further sum of £630 for local above, primes at local shore, and not merely prizes, but expenses in searchtion with local above. 356. Is that included in the £14,5979......It is not

to was agriffed. I did not abserve in wat'd now, it is it was ceriffed. I did not observe it them now, is m an extra item of £633. 102. Mr. Frezwitzian.—Mr. Micke, you mon-

tionel, or rather in your report there is an item of resomeration to the police of £1,332 for four rears !--310. A large item, can you give us any details of

that is the point of the in carry as a second of the station in the country, he makes all the arrangements for the forey, he has constant inspection of the horey, he imposts the mares who are brought to the horey, except where there is a reterinary surgeon amployed, there where there is a vesselinity surgeon ampleyed, there is a great deal of writing up and keeping corries books and matters of that sort. They are deep by the servesn't or the officer's sleek, and that over those districis those are a large number of Pisteint Inspectors, we want on there are horses in fact, and these officers and men get some slight remonstration. That is what is comes to, it comes to about £350 a year

311. They send you in a return of these horses and a return of the mares that go to them 5-- Yes, and keep the envice book, and give the orders to the people who come and ingreet the mares. 312. And practicelly select the mares who are yes, they practically select them, I suppose,

16

Oct. 90, 1899 Nr. W. L.

313. Mr. La Topone.-I suppose to have these cost a great deal more money !- It would, I think, it is chesp for the work they do, they have a great amount of correspondence and business to do. 314. The CHAIRMAN.—But the value of the service the police render you does not appear in your accounts.

there is a certain sum, but that does not represent the value of the work they do for you !- That represents what they get for it.

315. But not the full amount of the value they

give you !- No, but we make an acknowledgement to them in our report every year.

316. And if you had not the service of the police yen worki have to pay a great deal more for the same services !-- I think we would.

317. I think you said that the bulk of the preduce your stallions was said under one year old !- Fen 318. And that the majority of them were not kept

in the district !-- Yes 319. I think you said you did not know where they went to 1-I have heard of buyers having them in

different other parts of Ireland. 320. Do you know at all who buys them !- Dealers I believe, I den't know positively.

321. Then, appreciate to you, the bulk of the produes of these Hackney stalliers is distributed all over

Ireland !- I carnot follow the distribution. 322. At any rate it does not remain in the districts? -Not touch of %. 323. At the same time the number of horses in the

congested districts is increasing very mobily!—It is, \$24. And at the same time all the product of your stallions are sold under a year old I-Yea

account for the increase I—it is possible that these young filles being kept may account to a large extent for it. 205. Sir W. Genery.-You have no actual figures of the number sold have you !- No, we have not

317. Lord RATEDOWNELL-Con you tell the incream 1—Yes 318. The CHAIRMAN.—There has been a large increase according to what we have in evidence in the counties which contain concested districts !- Yes 319. And a decrease in the counties in Ireland which do not centain concested districts, is not that so ?-That is so. In 8 counties they have increased,

counties in which there are conqueted districts, they have increased in Kerry by 512, in Galway by 175 services efficiently carried out by any other body would in Leitrim by 123, in Mayo by 448, in Resconsing by 251, in Stigo by 209, and in Donagal by 780, a total increase of 2,463.

310. Mr. Wexven.—Might not the explanation of that he that home breeding in the congested districts was paying better and that it was wome in other

parts of the country !- That occurs to one as a possible explanation of it, I have not followed it up, I musty take the figures and give them to the Commission, 331. The CHARM IN -I SUPPOSE YOU DEVEY STREET

into any calculation as to what fees you would have to charge if this was a private besiness I-No.

332. Would you be able to give us any idea, the fear would be your only asset, your only property and an occasional sale !-- I bave not an idea really.

313. You have given us the capital excenditure and the annual expenses, one you give us what the annual receipts amount to !-- I can in a very few minutes, there are 5,191 at 5s, 197 at 10s, and 288 at £1 and over, about £2,700. 334. I think you said there was a tendency on the

part of the occupiers to sen uses. The constraining Board were trying to devise mount of counteracting art of the occupiers to sell their mures, and that the that !- The Board are encouraging them to keep the tillies to breed out of 325. How do they encourage them 5-They glvs ciase for tillies kept in the exentry, they bread the lillies as price winners at the Sbow, and if that filly

is produced in the subsequent year they give a production prize for it. 336. Have their effects been successful !- I think there are being higher payments under it.

337 Mr. La Toucus.—I bave seen a great many of these makes, but I never saw a filly bunded, see wen sure they so on branding filter !- Mr. Wough could answer that.

338. Speaking roughly, you say the receipts from fees amounted to £3,700, while the expenditure on maintenance was £14,507, so as a trading concern the Congested Districts Board somes to have sustained a dress loss of £11,897 on the capital of £16,635 1-18 you put even your sum of £10,000 on to that that would suffice us, Mr. La Topcset.—Yes, so a philanthropic concert,

but not as a trading concern.

JOSEPH B. O'BRILLY, D.L., examined. 339. The CHAIRMAN.—You are a member of the Council of the Irish Harman Horns Society!—You. direction, that a valuable industry might order uples

arms society was formed to encourage Irish havelen. All the prime at the Royal Dublin Society were being my lord. 340. And of the Royal Dublin Society !-- Yes corried off by English exhibitors and English braciers, 341. How long have you been a member of the Harness Horse Society 1—Since its foundation. and our society was formed to assist the Royal Deblin Society and other saccistions in furthering the interests of Irish breeders of barness borses.

342. When was its foundation !-- It was founded in the spring of 1895.

343. And with what object i-Well, the objects were to encourage the breeding of between borne in districts where it did not interfere with buster breeding. Its objects were to encourage generally the breeding In olders have a securing general) as aroung of harness horses and to assist in tilling chance of the Royal Dublin Scotety, the autries had fallen off very much in 1894 in the harness chases, 40 per cent. of a falling off, and there was a disappointment felt by some members at the action of the Flores Show Committee of the Dublin Society in throwing out the Hackney classes for stallions from the prize list of 1891 particelarly as that class had been very wall suggested and well spoken of hy the Judges that had come over In their report to the Society they bud congratulated he Society on introducing that breed of burnes into the Society on introducing that breed of burnes into the country. Then again there was a feeling amongst we interested in harness home breeding that the Royal Dublin Society and other agricultural associations gave little encouragement to Irish breeders in the harness

as would not interfere with hunter breeding?—Yes. 346. Who were the uriginal promoters of the society !-Mr. Thomas Talbet Power, Mr. Fowler, Mr. Dames Leogworth, Lord Bellew, Lord Ashtown, Colonel Lindsay Gore, and Sir Dourlas Brooks, Mr. Wrench, and myself I think were the first prosectors 347. Were there any societies in existence at the time of your foundation dealing with the subject!-Not specially for harness pursceen, the only extent that other societies recognized it as such is that the Royal Dablin Society used to give open classes for harmen barnes, but they did not give special classes, the failed to recognise the importance of establishing special classes for stallions, thoroughbred or otherwise with action best seited for harness purposes and for

petting barnous horses, nor did they give us chuses for mares with action specially egited for harmes purposes

344. Your object was to entourage generally the breeding of homees borsen in Iroland 1—Xes.
345. But as I understand merely in such districts

345. Have you got a prospectus of the society?-Yes (produced). Firmer (renders) .- "Objects of the society to usestress (rearrags.—" Objects of the acciety to pec-acts and encourage the heaviling of horness horses, with action, in Ireland. To publish for the information of breedens, a list of any stallions in Iveland appendity smitchie for that purpose. To publish for the infranction of knyers a list of breedens of such the information of trayers a man or oversions of some harmen horses. Gradually to form a register of mason specially suitable for broading barness borses. generally to promote the exhibition of harness burses at agricultural shows and showhere. To struct subject attention to this important subject, and to puter meeting to this important subject, and to spread knowledge of the principles upon which better harmen horses may be tend. The society has been formed to forter and stimulate a trule which it is believed will prove production in Ireland. There is a constant demand in England and Scotland for harness tunes with action, and these are now largely sup-ified by foreign breaders. Many of them are band piled by foreign native mares by stallions imported from firighted. There is no reason why Ireland should not produce such animals before them that our beproduced in any other country, without in any way interfering with the breeding of brantersenergially as many of the march are too light and mandy to be cented with a thoroughbord borne "The Trick Harness Herre Society agrees that conimprovement of Heaters, in the production of which the country stands unrivalled, and for which the has sensions her remetation as a Heres-broading country At the same time it is submitted that the interests of the farating classes ought to be taken into consideration, and every opportunity affected them of making Here-leading more profitches. There is bitte doubt that a large class exists who would find a ready

sale for a shapely Harmen Horne with notice, that eads he worked at an early age on the land. There is plenty of room in Ireland for the production of both Harness Horses and Musters, and there is no reason why it should not exce! in both departments. lrut Harness Horse Society further submits that in ters, and the improbability of there being any upportest and early recovery in prices of ordinary agescultural produce, a favorable opportunity now office for placing before the farming clusters of Ireland, mean and facilities by which they may be execurrent and enabled to effect a decided improvement in a larench of their business, hitherto either comparatively neglected or imperfectively carried out. It is not suced or impersectively carried out. It is not sug-Hackney Sire, the Hackney being purely a Road and Harness harse, but this should not precisit or prevent the breeding of lacres specially adapted to harness or confater purposes by manna similar to and so-existent with these which have been moreasfully employed

for the incorprement of Hunters by the Royal Dablin lociety under their Horse-breeding scheme. In the Harness cineses at the Horse Show of the Royal Dubha Society, the prizes are too often carried off by English exhibitors, or with hornes bred in England. The ought not to be, and without in any way interbeing with the Hunter and the Thoroughbred, or confixing the breeding of Harness Horses to Hackney Shea, it is submitted that more encouragement should be given to the breeding of high clean Hernera Moroce in Ireland, and more facilities afforded to persons favourably situated for the evaluation of such animals in this country."

350. What action has the Society taken to car set its objects !-- Well, up to the present, the Society

has confined itself chiefly to promoting exhibitions of tarness horses beed in Ireland at the Royal Dublin Society and other agricultural shows, and also to the expension meets of coaches and fushionable equipment

tion to the importance of this industry. In exceptation, new classes at the August Show of 1805 and 1896, and for each class we appriced the roles money. In Class A for harmon horses shown in lawness, not accoming sax years old, head in Ireland, and exhibited by your dents in Ireland, we gave £21. And for Class E, young howen suitable for harness, not exceeding four years old, shown in hand, and bred in Ireland, and exhibited by a resident in Ireland, we gave £18 and the Somety's silver model to the first prine winners in both there classes. And also with the concern care of the Royal Dublin Society, we organized a meet of coaches at the August Show, and in the absence of a prim list, we gave handsome allver-mounted white to the driver of each of those conches, and the p formed a leading feature of the Show. To the Northsormer a reasing nature of the Show. To the North-East Agricultural Show at Balket we gave a cop, value 10 guiness, and a silver medal for young beens saltable for harcess, not exceeding four years. old, bred in Ireland, and exhibited by residents in [relead. At the Ruthdown Assistance] Secretary Show, we gave a cop, value £5, for the best young barso bred in Ireland, suitable for horness, under four-years old, open to all classes in the Show. At the Galway Show we gave a silver cop, value £5, for young home, three to four years old, and under fifteen hands high, with style and netion, smitchle for hances. At the Hollymount Show to be shown in harness. we gave a sup valued £5, so if preferred, a silver model and £5 for the last Hackney or harness house brod in Ireland. For the Bellinssice Agri-cultural Society we gave a silver cup for the less remer house not exceeding four years old, with style and action, suitable for humon, byed in Iroland. And to the Fermanogh Agricultural Show we care a silver medal. I think that was about all we were able. to vanue with the funds at our discord 251. Have your offsets been well someonded throughout the country-have you received good support !-

Yes ; we have received from these interested in breeslthe barrens bornes departions of \$100 towards the objects of our society, and also the closes that we gave prime to in the country shows were all well supported, and the securitaries write up strong latters to ear searcity racking us no continue car support and to pon minister linear. The entiries also at the Rayel Dublin Society's Show—which had fullan, as I said, alout 40 par cent, —they rose in 1895 62 per cent, over 1894, and in 1896—this level year's show—they rose 78 ner cent, over 1814. 252. Do you candder the breeding of karness horses.

an important industry in the country !-- Yes; I think it is a very important important. Design come over it is a very important inquiriey. Detital come over here form the other ride to look for human horses, and they my they can move go them. I know that there is a great demand for hereas with action. I think there is a greater feeling now for getting lucres with style and action; is is moved bothed for now than some rears ago. I know an Isiah dealer myself who has got an order for eighty harness horses at £100 each. and finds it very hand to get these.

353. Where are they mostly produced !- I think all over frehad. I thou! know that there is any special part, except the north of Ireland has got a greater magos for harmess breeding them any other I know of The fair of Mor, in Twome, is a great fair for dealers to go to looking for harness beeses more than snything "

554. You don't think any particular part of the country's more suitable for breeding this class of horses than any other !- No: I could not say so, except I think that where hunters are not bred harness horses

might be very well developed and bred. 355. Where are the districts where busters are not bred !- Chiefly in the north, there is very little hantmer in the north. They encourses the harness chan more in the North East Agricultural Society's in the Park, and at the Show, to attract public attenJumph R. Pletty, c.

Show in Beldast. They have neet go for harness three than is any other part of the country. 256. And you while the industry is capable of bring lungily increased |-1 thinks as. I think there is a great domain fee good bareous horiza, and I door soo why it should not be increased in those districts where there is coppe for those, and when people have a tends is it! I think they coppe to be encouraged as

water bare in it I think they ought to be embouraged as well as other breeds. 337. How are they head, these harman horses in the morth 1—Mostly from thosoughbred horses, some from Hockleys.

the morth 1—Reducty with interconjunction income, season from Hashington and the supply of stablions is sufficient and attable 1—No, I think the stablions could be improved very much. We want more action in the thoroughbred house, we want more bone and action for hormons, in whatever bored of home you are

action fee hairman, in whatever leved of stoom you are we require select. A settin it is ensuited in horses, 1357. Your toology has not down onlying heavingtering the selection of the We fairly intend to corry east, if we have finish except, a system of registration of stillings, throughpress, or any other pure breed with action and been and selectifiely the greatly pursues horses, and astering two-deep by such a registration of stilling astering twotys such a registration of the selection of the best of the selection of

Repel Di-blake Section had instituted for hundres in them districts.

100. To have more registered—whi a registration of mores, but to love show of surrae smilled for harmons in these districts where horsons however were held without intering with huntre beauting in the least, and if the more were smitchle, if we had morey at our dispose, or if there was a five had morey at our dispose, or if there was a the way of the section of the second of the second that were solidable for human school get movimalions to stalling on the egistre, having the breader had

own choice of what stallion be might go to 351. Giving him, a presention free h-Not meconmently free last sta value for so much, leaving him free to chosts his own sire 552. Then you don't, I understand, recommend any variables breed of stallion over apriors's—Ka, we

particular breed of stallion own another!—No, we have an open policy as agards the breed of stallions. What we do recommend is that they should have notice, which is convoluted for harmons, and also that they should be pure hered of their own class—that is pedigree herd and sound.

503. Any other information you wish to by lefter the Commission 1—4 doa's (class in, mg level. Except I thrus that on the hered principle, without interfering with the instead teaching with the instead teaching with the instead teaching with the instead teaching the same of the contract of the contract teaching and the state of the contract teaching the many more near want a good harman keeps for twelve succession. So we have the contract teaching the many more near want a good harman keeps for twelve succession of the year to the one that want as hunter for the state of the support of the succession of the property of the contract than the want of the majority should have equal if not greater classion to accordance than the want.

of the minerity.

304. Sir T. Ersonna.—Have you any idea which is the larger trade in Ireland: the breading of the lumbing home or of the harman horset—Ob, the lumbing home or of the harman horset—Ob, the

it the larger trace in Detaud the breading of the lumbing heres or of the harman Loves |--Ob, the lumbing horse, there is no doubt about it. 366. You could not give any figures |--I could not give any figures, but I should any the exportation of

borres is so great that it is abidly for hancers they me expected on used, nearly all the hants in Regland are housed by hunters from this country.

367. The CHARKSLY—Here year any figures you could give the Commission as to be manufer of houses were hard to give that, they party party to you for this country before they are become for harses, and tang be turned to hunting or harses purposes after

they leave the country. The expertation of house host increased immensely, it reaches \$4,000 a year, or TOD a week

363. How do you obtain furnit 1—Donation from those interested in breading, and also unberighteen from the members, amount authority than the members amount and the state of first to work what our original programme intended; we should look for some green more architecture to do all we should wish.

369. Mr. Petratricatae. What are the manufage.

500. Mr. FYERFILLAIR.—Whith are the varies that you look on an harmon breeding states I —Marce with section ossentially.

370. Yes, but have are they hred I —Well, they may be heed by the coughtway in the sen, if they show self-tient Mood and quality with actions fee hymnes they may be match according to the opinions of this persists.

if le thinks they will make hetter with a thoroughheel heres he will go to the three gibbed horse it his manie ward quality.

371. I am not talking of the horse now, what are the marks breadings i—They are mouly from theregohered, the size throughfred on one of the

the material area in the control of the control of

373. Not in the North of Iveland 5-Not that I am aware of, there is some eart blood mixed, no dook, what we call cart blood. 374. Auricalizatils—Was, arricultural house.

iii 374. Agricollared I—Tes, agricultural heras. 375. Sir T. Eurocotz.—Con you say why it is that you think that there are more hunters sold that a horasm horase, do you know any resease why the tends should be higger I—I think there are more trade should be higger I—I.

or fireign dealers coming over looking for linters, as, as, the excuse time there are a great many looking for a humans broom, but the majority are looking for an linter are a great many looking for a linter and looking looking the lands of the looking l

378. I think as 5—Decidelly, but nothing speid for harmen keens.
379. But still it is open to harmen horses ——indirectly,
379. But still it is open to harmen horses ——indirectly,
350. Directly I think t—Well, keeders of harmen horses look upon souton as the oscutial naturable of the harmen keen and of the nive task is colorated to

pot them, and we don't look for that in the larger,
we don't look for harmon action when we want to
d breed a innuter.

381. Well, to breed a harmon hereo or a hanter
you must hered for nestons—For a businer certific
you must hered for nestons—For a businer certific

ns you must beed for sevices1—For a hunter certain action, but it is not the same action as you want is a harness horse.

355. Do you mean you prefer up and down action!

6—Not necessarily, but you want them to use their

shoulders well and step up with style, and carry their head and tail errest. 383. You yourself I fancy have bred a great many houses 1—I have bred a great many houses, both

horses —I have bred a great many horses, both thoroughbreds and others. 384. What sires have you used as a rule ! ... I have

to the control of the

breefing in Leland, as well as breefing the hunter? tot Now do you think that the increase of Heckney mores will do any horm in Ireland if they arread from the districts where they are at present to districts like Meath and the best horse breeding dis-tricts of Ireland 1-I dea't think there is my danger of that. I think that is a sentimental grievance. I

are serving that there is the elightest dispose of the also of meres that are going to these Harkmeys being mksn up by breeders of handre. They have not got the points of the hander, and I think they will be merely retained for harness broading.

387. You think they will remain in the districts where they happen to be bred !-- I do ; they wen't no

think any breeder of a hunter woold like to have any of the Hackney blood in his mares. \$88. Have you appy board it said that the young herees, that is the six and sight months fools and the sandings force any the consented districts counties

am gold at that are !- Yes : I have cortainly heard that they were sold \$89. Did was ever find out what way they went? ... No : I have no means of telling you that, 350. I force they must travel east—sunst they not? -f early not tell you . I have no idea

59). If there begyon to be fillers amongst these that are sold—they cannot only keep the filies in those districts, some of the females must go from therewhat becomes of them !- But I take it that the mares that would be sived by these Hackney sives in the connected districts would be a class of years that would be a long way off the dam of a good hunter, and it would be a long time before the breedry of a

houser would take her into his stud to hered a hunter 399. Then you think everybody that have verne stock of that sort is not likely to mot the more to a horse if it is not n well shared one !... No. I don't think they would not it to a house to breed a bratter.

they might to a harmon home.

30 X You don't think a small farmer would if he had such a mare !-- I den't think so, 394. Mr. CARRY,-You agree that the bronding of

huaters is by far the most important branch of the horse broading industry in Treband 1-I think so 395. And you would not care to interfere with it ! -No. for from it.

396. How would you arrange the operations of teer modely as as not to interfere with the brooking of harden I.—I should have a special registration of homes suitable for breeding larness bornes with action, and I think if there were shows hold in those districts where the barness industry should be encoraged, and shows of mares held there. I think if a committee were to relact the marve that were suit. able for harness, and they had funds at their disposal to give these mares nominations, that is entereptions to see with harcess sires, then they could be put to my breed of sire that is on the registry of the Herness

397. Do wen think there would be danger of infect ing heating breeding !- I do not think so. I don't think the blood of the Hackney is at all inferior. should not core for it in a hunter in any way ; but I each think there is any inferior comparison with Irish earl-borns blood or Shire or Clydesiale or any of this eart blood, and busting mares have run the same risk

is this country of being infected with that blood as they would with the Hackney. 198. What do you mean by the Irish carthorne !-Yory often they term the agricultural horses that are used by small fermers on their farms curthorson. 393. You have no idea how they are beed i-No. There is a great dual of thoroughbred blood in them;

they are smart bornes.

society would do a great deal of good in certain dis-401. And in the prospectus of your society you say there is no reason why Ireland should not readons animals that are better than could be produced in earother country without in any way interfering with the breeding of hunters, are we to infer that if you think

the oper-tions of your society were carried on m a county where hunters were bred it sught possibly interfere with the breeding of hunters but Account thick se

492. Why did you particularly specify to the Chairman those districts in the north of Ireland ?--I my those are the districts where the breaking of hanness horses is sares extensively carried on; the others are in conjunction with hunter breeding. In the north they beed very much for homess represent and no other; in the couth and in the midland recenties they breed altogether nearly for hanters

403. Then, in the first passgraph of the objects of the society, "especially as many of the stares are too light and weedy to be mated with a thoroughbead borse." Is not that rather wholesale condomnation of a move that is weedy you cannot put a thoroughhod on to her squin, or the result will be a lack of hone and

telance. 404. If the theroughteed heres you put on her ku meet bone and substance than any other burse you would not be likely to get a weedler evisual than from ony other horse !-- If he had more been and substance than any other house you would not but some of the thoroughteels in the country have not as much bene

405. Some of them 1-A great many of them 496. Then this ought to yead "especially or many of the meres are so light and weedy to be mated with a light and weedy thoroughless borse "1---We want both home and substance and action, for barrows, as

much thereughbord blood as you can get, but set the Supposing you have the ection and the bone and substance in the thoroughbred house would ye prefer him to any other based of herm !-- I would

408, I surpose you admit that you have seen thoroughbred borons with an rough boon and action as reserved Level have seen there but there are very scarce.

to get, but it appears from some information that I to get, seil it appears from total incommittee that I Royal Dublin Society, that the principal declars in England get their best carriage houses in Ireland, at least so they say at any rate. And those dealers registries that the because they have found receimaintain that the because they have forms recen-suitable for their purpose were got by thoroughbred berses and were bred in the auth of Ireland, not the north of Ireland. And I also take it that you morth of Areson. And A also make it that you martivelarly meeting that you thought the breading of good harness horses should be succuraged, and you my that even in the north good harmon horses are chiefly heed by thoronguloveds and some by Hackners. have you may practical experience of which are the most valuable, they are sold as colts I suppose !—If make no difference whether they are by a thoroughbred or a Hackney sire.

410. You think not !- No, I have seen Hackney sires' produce in borness fetch more at the Dubin shows. I can give you an justance, at the last show a Hackney borse who got the first price and champion cup was sold for £100 to a Peris tenter.

411. Mr. CARRY -- That is exceptional !- Well.

your before the borse that got free prize was sold for £100, by the same sire out of the same mare, he also 400. Mr. La Toucass.---You said you thought your was by a Hackney size out of a mare bought in Dublin. Got. 14, 1441 Jeseph E

O'Brig. Da

90

112. How was the mass bred !-You could not say, is is very hard to tence the pulligree of any mare in Ireland 413. Mr. La Toucar. -- Do you think the ordinary mare in the country is calculated to preduce a good carriage horse!-Yee, if the her action she is, but without action she is not. 414. Do you think setion is one of the qualities of

the ordinary more !- I think the present style of the day in for action in homeos. 415. Do you think action is one of the attributes of

the ordinary more of the country !- No, not harness 416. Then I may take it you would hold that the ophnory mare of the country is not at present adapted

to haced good harmon horses?-Not the general run of there, no, not unless the sire has exceptionally good notion, you may get it then. 417. I suppose while the price of a very tip-top harness here in likely always to keep up, the price of an

inferior harons horse is very likely to fall !- Yes, I should my so. 418 By the introduction of bisycles and motor carriages. Do you really think the majority of those

bornes than are sold in Ireland are bunters !- Yes, decidenty.
419. Would you say two-thirth!—I should say more—that are exported, I mean. 420. You mid there are 33,000 horses expected

from Ireland every year, do you mean to say there are 20,000 hunters sunt out of Ireland every year!—I would not be surprised. 421. I think you would probably find that the Mesure Wedger, of Waterford, are the largest exporters of horses from Ireland, and I should think a very small proportion of the horses skey send are hunters, or intended for hunters i-I think they are

very large buyers of horses of all sorts. It is very hard to trace a loose when he leaves there shoreswhat he is to be used for-hat I know all the best hunters in England are Irish-bred

422. I carnot imagine that 10,000 hunters a year are sold out of Ireland!-That may be a little over the mark

413. You said you heed the first prize winner in the Harness class at the Dahlin Show hat year --424. And it was by a Hackney !- Yes

425. How old was it !- Four years old 426. Had you had the dam any time !- Yes, I have had the dam for a long time, six or seven years.
427. How was she bred! - I benght her in Ireland;

I don't know her pedigree, never could trace it; she got fort prize berself in the Harness class in the ablic Show 433. As a brood mure !—An a harmens more,
433. Do you think she was an Irisia more, or an
English mure, or a Hackney mure !—I could not say,

430. Had she bred anything for you before !--This was her first fool, this one that got the first 451. Of course you just her to home since then !-452. Did you use the sum sire? No, I have not

used it the last two years; I put her to my own sire. I keep an American tretting-torse, a standard Ameri-can trotting-horse, and I have put her to him for the lust two years. 133. Does your Harness Horse Society propose to introduce stallions into Ireland at all for the purpose of breeding 1-Our Society would like to see bessee

introduced into Ireland with action calculated to put harmess horses, no doubt, but we have no funde at our 434. Are you disposed to look favourshly on this American beens of yours; have you seen his stock to... Yes; they promise very well indeed, but they are too

young yet to form any opinion.

435, Mr. WEINCH.-You have never male are calculations, Mr. O'Reilly, to use exactly visat the probable requirements of all the different hants of the United Kingdom would be so as to test what male the heating trade would be, have you !- Well, I was doing that last night. I got the return in last week, Field. It gave the different hunts in England, for-bounds, staghounds, and harrises, and I satted then all up, and made them 300 hunts. 485. And how many bornes per hant did you slive

for replacing horses sold 1-Well, I did not go in very closely to the whole thing, but I was doing it is a 437. I only wanted to arrive at some point in

reference to Mr. La Touche's question as to your evidence that there are 20,000 immers sold from los-438. And in that way you arrive at the 20,000 to

Yes. 439. I think you had a good deal to say to the Royal Dablin Society !- Yes.

460. And have been present at all their shorest-

441. Have you any particulars at all as to how fur horses were head that have goeccally wen the price for learness in the Dublin Show !-Yes; ther were nearly all bred, so far as I could see, the majority of any rate, by Hankney sires. As I said regarding the Irish Harness Horse Society, I mentioned that all the prices were going to England, and the horse that came over from England were invariably lend by Huckney sires. I don't think you can point to are one by a Queen's premium sire that came over here

in the harmers classes. 442. With regard to thoroughbrein I think you. mentioned that you were against erossing through-brain with weeky mares, have you any information as to the thoroughbrals in the country, whether the are cound or the reverse !-- I know the Dublia Society are doing the utmost to extinguish the m sound sire by the registration eyetom, and I think they are gaining ground every day in that direction I think the registration scheme of the Dublin Society is a very fine otherse. It is better than any studbook, because the utud book don't require soundness, but the Doblin Society requires soundness before they re-

gister the sire. 443. Would you be inclined to increase that registration and make it include mores or not!-Na,I would not go so far an that, I don't know on wist formulation you could start a registration of some in

444. Then you think all the restriction that on be attempted is at present the registration the Rayd Dublin Society carry out toul think it can be further developed in the registration of stallions carried on to a larger extent and supplemented by the importation of stallions or by assisting private enterprise in the purchase of stallions of the right stamp.

445. In your evidence I think you said you didles the bulf-beed size !-- I do immensely, I should not have snything to my to him either for human or hunter breeding. the other, and you can never rely on his get, he may throw back to the bad sain instead of the good ride. 447. Then you would not approve of any engention to register half-tered sires t-No, I would be desi-

half-level exactly!-When I may half-book I move what they call hunter-bred in this country, that is by thorough bred stalling and a deep notin the stud book.

against registering half-heed sires.

449. Still a well hred one 1—Yes, 450. Lord Assrows,—In fact a horse three quarter blood 1-Yes. 451. Sir W. Grant,-I believe von are interested in the improvement of the breed of bornes generally

is irrana. You are on the Council of the Royal Dahlin Society, and you also support this Harness Society i... Yes. I think you said you were in favour of a pure board, and you keep a stallion yourself American bred !-

You are on the Council of the Royal

ALL With regard to the breed of mares that are shown in the Dublin Show, which I take an interest in, and have for many years been a visitor at, I notice the "beeding unknown" in so many cases, even when there are grant given for brood mares. How do you account for that! They know the brooder, but they Acres in the sire or the dam !-As a rule an

inferior borne in the country has no pedigree, but a horse that has distinguished hisself has generally got a very fice pedigree. I think really the answer to the question is that horses are sold when they are young and change hands so very frequently, and if a menwants to sail his horse he always nicks out the size that has the best name in his district, and he gives it to his purchase straight off, and entere it in his books even to show the huyer that it is by so and so. but there is no reliable way of coming at it

454. But there would not be much difficulty in etting that information 1-I think there is invasense differ 455. If the exhibitor is known and the breeder

why should they not know the name of the nice and the dum't-Yes, but they keep the mame of the breeder very dark, and dealers don't want to have it known. There are apottors all over the country for good horses, and they koso it dark where they eve those good berses. 450. You know what an injurious effect that has

on many Irish hered borses from the fact that the English desires, I am speaking of stables in London which I know, if they have a good hores, he as an Itish horm, but you never get any particulars whether he is really friel or not, and if he turns out a beal and home it goes against him, it is against Ireland? —It is a hamising, but I don't see how it can be

altered, it is a difficult question, it certainly does tell agricat the Irish borse 457. Mr Canew.-You say you are totally opposed to half-breds?-Yes, for getting brasters or harmen

becaus, I think they ought to be pedigreed according to their own breed 458. Are not the best hunters got from half-bred.

mares with thoroughleed alone 1-Yes 450. Then how do you propose to melestele, if you are totally opposed to half breds, how do yet propose to maintain the half-bred mores, they must die out in

time, become too fine !- Not by obsenging your strain of blood, and moting them with another strain, you get it back very much in bene 402. How do you mean by changing the strain, from Hackney to thoroughbred or from thorough-

bred to Hackney !-Not necessarily, but I den't know if you were breading a harness been it would

461. But I am talking of hunters, you simit that the best hunters are from half-bred marca with thoroughbed sives, if you ore totally opposed to half-breds how would you keep up the strain of half-bred mares, you would aredicate them in time by constant mating with thoroughbreak, they would become too fine and lose bone and substance !—It is soon on for generations in the suce-horse, and the race-horse has not degenerated, it has rather improved

442. They have not deterioused for racing pur-poses 1-No, but they have been got from thorough breds on both sides there.

463. You want something besides racing in a lumber i... Yes, you do. But I don't think there would be any fear if you go from one thoroughbod struct to another, you can very often get back more bone if you keep your sires up to the mark, the tires must have bone. Keep the biggest and best mares

ing with a throughbook house you will get bone. 464. Eat if you go on breeding from a thorough-heed sire won't the produce of the many become a racer in the end, and nothing more, you destroy the hunter breed !-- I camou see that it would come to that, we don't find in moing that we have lost size or substance in the receberse, in fact I think the 465. Levi Assrows.—Suppose you had a halfbred mure and put her to a thoroughhed house you would get a light filly, would you cross that filly with a half-bred hours !—I would not like to emablish that,

it may be done successfully, but I would not him to establish that theory. I think it is some very often successfully, her as I said before it may be the reverse. it may throw back to the wrong side. 456. Would you object to beend a bunter from a

more that was a light tilly with three or four crosses of blood put to a half-bred horse f-I would not object if the result was astisfactory, but I should not like to 467. Mr. WERSCH.-I see from your evidence here

that you refer to the different parts of Dublin for different systems of breeding, do you think that could be carried out that in one district you could breed a leavy horse, in another hunters, and in another how, ness horses !- That refers to the conoty Doblin, there is a great deal of earthorse breeding in the north aide of Duidin, and on the supth side it is not suited for veding kunters and they breed light harness bores. 448. What I mean is do you think these different systems of hereding can be carried on without inter fering with each other !- I think so, decidedly, I don't

see any dancer in the least. 469. Do you think that rosts with the broaders that they are able to take care of themselves if they like to do so !- I think so, the lorgeder ought to be the best judge of what he is guing to do, if he has to mould a horse to satisfy the buyer he has to use his brains, be in the man that would form the best opinion of how that is to be brought about, not the buyer. I don't think the huyer's opinion is worth anything, it is the hereder's opinion that is worth a lot, be less to mack! the aximal and ought to know the best means to

attein Ms sloest 470. As a rule you think the redirect of borses that are entered at the Dablin Show and also shown in the estalogue are hardly to be trusted !- I think so decidedly, I think you can never treat them unless you know the breeder.

47). You cannot suggest any remedy? Would you prevent a man from outering his horse and giving it a nedigree where he did not know the brooker i-I think you would socil your show or at least you would groll your entries, it would not look well in your show

to see them all unpedigreed 472. You think it is bottor to have a lot of plausible sedigrees than no pedigrees at all 1—I think it would affect your entries immensely if you were obliged to verify all the treeding of the horses entered, I think

it would he very hard to carry it out.

473. Lord Assiroves ... What would you say to not outing the pedigree in the entelogue if the breeder was not known !- I think it would look very bad. 474. If they could not certify to the breader why put the pedigree down at all !-- You could have that

no doubt, but I think a great many would continue to fairly pedigrees unless you obliged them to verify them and that would be a very lurd thing to do. 475. Sir W. Genner.-Is there any suggestion on to how it could be got over or obvinted or improved by the Dublin Society, supposing there was a duplicate class, one in which a man used give no information as

to breeding and another class that he could only enter where he could authenticate the breeding of the animal, has it ever been suggested or discussed. I know the show for many years, I come over and look at the prize about, I am only a type of 99 out of 100, you

22

Out 10.1106. see the breeder without the pedigree or the pedigree James Without on the World it not be promote to out to I don't think it would further the internal to out to I don't think it would further the internal

476. Mr. WEINGH .- Are you aware whether many

American bornes are being imported into Ireland at present !- There are a good many American horava unfortenately, I think, being imported. I now one shiplead when I was in Belfast. I saw a shipleot landed the day I arrived there. I also saw some sold

477, Mr. Prrrwmanan -- What class of horses!--A very poor diese of horses.

478. Harness horses! -- They were broken to harness;

flat-sided animals, very poor; sold for very small meany, and certainly were no adventupe coming into

this country, rather the reverse.

479. Led Barmonness. — Many more smoon them !— A good many amongst the lot I saw in Bellius.

480. Mr. Wenner — Were ther sold in Bellius !— Yes, I waited for the saction; they breught from A? up to £13 or £14; the best more in the whole lot

482. You don't know whether these were any American houses shown in the Dublin Show L.-There

were some in the Fast Tretting class. 483. You don't know whether there were any in the Hunters' class !- No: I don't think so. 483. The CHAIRMAN.-About your own society, I

gather from you that your general occasion, the organon. of your society, is that the breeding of brinters is and will remain the principal part of the horse-breeding industry of Ireland, taking it as a whole !- Cortainly. 484. But certain districts, especially in the North,

are more suited for breeding harness becaust - Yes, where there is no heating and no markets for hunters. 485. As you say the fishing being for action, I

abould like to know, in your opinion, whether the action is not better obtained by Hackney near the

action is not better outsided by macking went than any other means?--Certainly; I think the charatenistic of the Hackney is action, no doubt about a 456. Although you have no prejudice one way or the other, would the breeding of harness beau be more likely to be improved by the introduction of Hackney sires then in any other way !- I think a would be improved very much by the introduction of

Hackney sires, with a fulficious mixture of blood in the mores. I think the Hockney sire would improve the larrane house very much from instance I have men myself. I leave soon an knatence of a leckner corners how in Dublin. I saw a mare by a Herkam sire sold by this corners at three years old for 250; it was an exceptionally fine goor, and £150 was referred 487. But you skep't think it would be an equal

improvement, or any improvement at all, in producing hunters !-Oh, no ; I would not like to see it is the hunter at all, in any shape or form-the Hockney is a harness barre 468. But you do think the Hackness could be introduced in the North without ner danger of the

the location men know how to neptect themselves. 489. You think a man could detect a strain of Hanksey blood after a generation or two !-- I think if he cannot detect it there is not more here in it than carthined in the hunter that he cannot detect at

493. There is no danger of the progeny threving back 1-No. 401. You think the Hankney blood would be depercible in the mure !- Yes.

409. And it would be the breeder's own fault if he could not discover it !- Yes. The Coumbains allicarued.

Present:-THE EARL OF DUNBAVES, E.P., in the Chair; Lond RATHDONNELL, LOND ASSETSES, SIR WALTER GILBEY, SIR THOMAS G. ESMONDE, M.P., HOX. HEXRY W. PITEWIALIAN,

Jeerph E.

Oct. 23, 1804.

MISSISS J. L. CAREW, M.P., F. S. WRENCH, PERCY LA TODORE, and COL St. QUINTIS. MR. HUGH NEVILLE, Secretary, was in attendance.

JOSEPH B. O'BRILLY, further examined.

SECOND DAY .- WEDNESDAY, OCTOBER 21st, 1896.

would like to give the Commission—as represent-ing that society i—No, my lord, I think I gave all I had yesterday.

494. Sir Troocas Econorps. — On the general sention of horse brending, have you may experience whether there is much breeding in Ireland, from unmound mures or stallings?—From my experience as a member of the County Dublin Horse Breeding

Committee, I must say there were a great many un-sound mares that came before us for nonlinations at the county shows; and before the registration of stallices the society found it very hard to get mutable stallices seemd for the use of the country, this led to the alteration of the original scheme which was the same as that in England-subsidising stallions giving them £900, and asking them to serve so many farmers' maren. 495. But mares?-It was found that the mares that went to those stallions were inferior, se a rule.

and stallion owners were not pleased. There were

493. The Chairman.-As a member of the Irish.

several reasons for giving it up; that was one of Harnes Society, have you may more information you them 496. What system do you think the best f.-I have no doubt that the best system, and the best principle, is registering sound etallions, and giving nominations to farmers to bring sultable meres to these sound stallions. A farmer's mare ought to be impected also; srandness is just as necessary in the more at its the sire, and I don't think there can be a better principle then to have soundness on both sides, fam and sire. The Royal Dublin Society in 1894 sanctioned a schema requiring the stallions to be registered as

perfectly sound, and the mares to he inspected at the county shows and passed sound by a veterinity 497. Did you find that scheme popular !- It worked well in some counties, but it required time, and I do not think the society gave it sufficient time to work in the country. The registration of stallous at that time was not complete, and had not arrived at the asua standard as at present; also, so man mares more or less unsound were cast when they

ound before these county committees, that farmers beam to besitate. But soundness must be established by darroos, and it is my strong epinion that this principle will because the book. 418. How long is that system in eperation !- First in 1892, carried on with elight alterations till 1894;

in 1895 a new scheme was adopted, and 1896 was the вате на 1895

489. Mr. La Toucer. - With reference to the evidonce you gave yesterday I understood you to say you descripting the residing from any pure bred stallings, but you objected to any scheme of registration of failf-thed stallings—what do you mean by a pure bred stalling to the proposition of the stalling to t the Hackney Stud Book, and American that are in

500. Why would you call a horse entered in the Ruckner Stod Book a pure brod heren instead of what is usually known on a half-bred !-- You can only trace them on thee ne side; in the Hackney Stad Book they are traced on both sides for many years. I believe that altogether there are twelve volumes of the Hackney Somety's Register embracing, I think,

the produce of 16,000 stallions and mares. 501. I take it the Hackney Stud Book was first mullished in 1882 or 1883; that extends over a period of thirteen years. Do you think that is long enough to constitute a pure breed 1—The breed was in the country for years before; it is traced beek to 1755; I believe by Hackney breeders; it was an old breed kept to itself very much in the Eastern counties of Eurland and Yorkshire; it was kept very much to them-selves in the same way that we in Ireland keep a particular bood of hunting marca. 502 I take it that you perfer a stallion from the

fact of its being entered in a Stud Book in existence for thirteen years to a stallion got by a thoroughbred, out of a dum that had been crossed by a thoroughbeed horse and whose dame and grand done have for years been got by thoroughbreds 1—Xoz can trace it better with the Stud Book; you can go book on both sides for a longer puiced; it is easier truced. You have no Hanters Stud Book to go hack to, you can only go to Wentherly's for the theconglibeeds

503. Mr. La Topome.-Thirteen years is not a long period to constitute a pure breed \$ 504. Mr. Wamson.—Is it not a fact that although the Hackney Stud Book was only published in 1883

it reproduces the records kept in many families in Yorkshire and Norfelk for the last 100 years !- That 505. Yesterday, I think, you said with regard to

American horses that you had seen some in Belfart, and that you believed a great many American horses were imported, and that you thought they were of a worthless class 1—Yes, from what I saw, but it is right to state that I only any two ship loads 506. Do you think that it would be prejudicial to Ireland to have these becaus second over the country?

-I do, most certainly.

507. Have you at all counideced, or de you suggest that there should be any way of marking these American horses I - Some do come marked; the Southern American horses are mostly brandedfortunately for this country-but some come from other ports of America without a brand. It is our however, to recognize them by their flat sides and

lanky appearance.

508, With their tails out off, do you think it possible to recognize these 1—Well, if they were in condition

is might be difficult to recognize them.

500. Do you suggest there should be a marking of Seeign horses !- I certainly think it would be a great 510. I think you said you would like to see the registration of horses greatly extended 1-You.

512. Take for instance a county where the Dublin Society's scheme is not in operation, how wently you ascertain what class of horses you would have registered !-- I should certainly say that each county should have its own representation -the Horse-breeding Committee in that county should be the best to know the class of horses that would exit best for the county, and the eins that would best sait the mares of th county, the selection should rest very much with

513. Have you thought how you would form a County House breeding Commisses I-Breeders should be represented on the committee; that would be a matter for the counties themselves, the best greters to

514. Would you leave it to the county to select the particular class of horse they required 1-Yes, f

515. Sir Warren Grinsv.-In England all the thoroughbred horses that receive premiums are as emised as the Spring Show by specially appointed voictinary surprosts. May I sak what evalue is pursued in Dablin !- The horses are all examined by voterinary surgeous; in 1893 they were sent down

all over the country at considerable expense to exsmine the horses that were put on their revister, and they were not put on unless passed by them as sound, and passed by the County Committees as bring-saltable sizes to produce hunters or useful horses.

516. Do you think that a preferable system to the

one in practice in England 1-Yee, I think it for

517. Any veterinary surgeon can examina t-The Royal Dublin Society sund specially in some cases, and in some cases they are satisfied with the opinion of the veterinary surgeons of the district, but in many comes they send direct, particularly in cases where there might be any surpleton.

518. You have said it was the practice in the Dublin Society to have an examination of mares. You are aware that system is not carried out in England ; soundness on the sire's side we think sufficient; it has been going on for years; there is a committee appointed in the district where these stallions ore, but there is no inspecting of mores; it is left to the discretion of the owners !-- I don't think that is sufficient; I think soundness should be on both sides, 519. The Chamman.—You are a member of the Royal Dublin Society 1—Yes.

520. And on the Council 1-I am on the Council, the agricultural section of the Council.

\$21. And you have taken a very active part in the affairs of the Society !-- I have taken a great interest in all the doings of the Society. 519. When did the Society turn its attention to

the question of borse breeding !-- In 1887 they turned their attention to working the Government grant; they wen granted £5,000 for the improvement of the stock of this country, and they devoted £3,200 to the improvement of the breed of horses for the smaller farmers in the country; the other portion want towards bull praniums.

133. And on what system did they apply this great — First, in 1887, on lines similar to those at present in use in England, subsidising stallions; that was changed in 1892 to registering sound stallions and issuing nominations to the value of £2 to farmers marcs, only available to horses on the Society register and those nominations were ouly given to sound

524. And did you find that worked well !-- Wa found it worked extremely well; that the money went into the farmers' pocket first, and then want right to the stallion owner-first into the farmers' pocket in the shape of nominations, and then it went to the stalling owner, so that both sides were benefited, the owner of the mars and the owner of the stallion. 511. That applies to become of all pure breeds !-Of 525. In that eyetem of the Society in operation. throughout the whole of Ireland 1-It was in operation

throughout the whole of Iwland up to 1804, then it was aftered, and I may tell you, as chairman of the County Dublin Horan Breeding Committee, that my committee unanimously reported this year askins the Royal Dublin Society to revert to the system of 1894 528. To revert to it in what way !- The system of eiging preciousions : the County of Doblin Councities

were unanimous in expressing approval of the system of 1894, and have saked the Royal Dublin Society to revert to it. 897 What is the revered scratery LaOf civing prime to mare and foals in the autumn : the other

system was giving nominations in the spring before the service season; the possent system gives prizes to with foul at foot, and then prices for fuels got by moristaned stollions

538. That is the system since 18941-Yes. 539. And the system up to 1804 was what you have already described !- Yes.

530. And your nonety wish to revert to the avetem on to 1894 1-My county committee want to revert to the 1804 system as being the heat smited to our saumiry. It is more astisfactory to stalling owners, and we think the money goes much further, and besides that more parties are benefited under it. In the present system the prize winners alone are benefited and they are smaller as compared with the nominations. In our county we get £100, and we issued fifty nominations. Under the present evoters we had only thirty prizes, so that at the most not we had only tharty prizes, so that at the most not more than thirty sould be kenedted, and there were not that number because the fools were given prizes an well as the mares, and of the mares that got prigor their fouls also got prizes, so that the number of farmers benefited was much less. I should say the preportion would be twenty to fifty.

Why was the old system ever altered!--! think it was because a number of mores that came up in some of the shows were considered not of the quality they ought to be, and the nominations were not all laured by the county committees. I don't think there was a general wish to alter it; it was the wish of some countries, no doubt.

532. Did say other menty recently, save the county of Dollin, excess any coince as to the present system !- I can only speck for two other counties-Cook and Wexford, that I know, have expressed it, hot the reports will be coming in now; we are expecting them every day

533. And how will they be swided as to their decision !-- I could not answer that questi 534. Do you think yourself that the former system was hoster than the weapont 1... Most deviledly 585. And do you think that the efforts of the

Dablis Society have had any marked effect upon the improving of the breed of horses in Ireland !--! think from what I have seen at the last show the mores which are brought before the county committees are better, and they are scurice mares 525. You attach great importance to the seemdness

of marce !- Very great importance indeed. very often do, but there are a great many other good mares in the country.

538. In there not a great tendency to sell the good mares and breed from inferior mares !-- I do not think a farmer will sell a good mare if the produce is bringing him in a good return. I think the market mwell regulates that.

539. You are very much interested in the breeding of harmon become !—I take an interest in the breeding of harness horses.

540. You have bred all classes of horses t-Yes, hut I breed throughbreds now more than any other class. 541. As regards the preditablenous of breeding harthat the value of horses for all purposes may diminish. owing to the introduction of motor cars !-- I do not anticipate that. I hope we will not see motor one over here for a very long time, at may min. 542. In leveling hunters, the revelues of white might not be good enough for that purpose, would might has or good shough for general utility purposes and harmen houses !—Very often. 543 Would what I might call the inferior produce

of Hardway stallions be of equal marketable value !-I think so for larmess perposes—more so, in fact, from

54.1 Total Assessment.—You object to half-lead size

being taken on the rogester of the Royal Duble-545. For what reason t-Because I think you as an amanfa eroood You may be successful, but it is

on making ground fell visy to successful, sig it wisks to no outside theroughlyred registered smake. 545a. Would you be averse to a register of more being formed, so as to try and get half had size with a cuspanted redirest-I think it would be had a establish a register of mores. I don't know what foundations you would make. Would it be the more

that you thought would leved a hunter to had ived a hanter? Poligres does not make a hunter or other 546. Don't you think that some size is necessary under the achange besides the thoroughteed !- You very for hunters ; I don't think so. I do think that

on many places you want a thoroughbred horse with more bone for petting hunters. 547. What would you do with the light filly!-bi found a filly would not breed a profitable snimal from the thoroughteol I would get rid of her, or said her to a Hackory, and try my lock there.

5.68. Sir Tuoras Espoype......Do you know any thing of the practice of foreign countries 1-1 have not

549. Do you know if there are many Irish mares hought by fareign breeders I—You. 550. Not so many now, I bolives, as formerly!— Not so many so yours ago. I centil not, breever, answer that question as well as others which

551. Can you say what qualifications were necessary in maxes to suttate them to premiums of the Bays's Dablin Society !-- They mean be sound and soitable sy go. 552. Lovd BARREONWELL.—With reference to your sensories about the change of system in the Earth Dublin Society, under the old system was it not a fact

that owners of mares were obliged to send their mare to certain berses in the district-that they had to choice; they were obliged to soral them !- Xes, The 1802 system was the registration and nontration. Provious to that the areton was that of submissing etallions-giving them £210, and obliging them t serve fifty mares, or some moth qualification. In 1835 they were sunt to coptain not horses. They had to select their house at the shows, only in their own

553. Under the present eyetem to the choice free! -They can so to any sire in Ireland on the Register 554. There is a remark that you made about halftored horses I would like to sak you a question on. Suppose a half-hard horse of the stamp of the "Lawyer" or "Revenge," would you prefer to send to them or to a Hackney stallion and try your look -If hreeding for a hunter, I would certainly send ber to the "Lawyer"; if for a harness home, I would

go to the Hackney 555. You would go to the Hackney for sotion even were the action of the "Lawrer" or "Revenge" good !-- I would, in preference ; you would be certain of it; his characteristic is action, and that he treatmits it to his get, almost without exception, is my ness beeses in the future, has it ever occurred to you 556. Mr. J. L. Canzw.—You said you were going in now for the breeding of thoroughbred stock !—Yes

NY Von have bred from Hackney sires !-- I 558. Have you given them up!-No, but railly my axions of breeding is breeding thoroughbrein for see You said in reply to Lord Ashtown that you

would send the light filly to a Hackney stallion for worst seem the right buy to a randinary stall preference 1—Yes, to produce a harmon horse. 540. Not a hunter i—No. 541. Colonel Sv. QUINTON.—What class of harmon

have would yee propose to get by that mose-an arricaltural or light true hove 1-You would get a light harness horse from a weedy mare exceed with the Hackney, the result would be a great deal more boos than was in the mare transmitted by the Hackney . rou would get boue and action. A needy agricultural home or light tran home I

horse be a powerful animal or of a smaller stamp 563. Would you he also to brood what they call a tight was home !- I have seen there have from maren that you gight call a class of bunting mares; I don't my they were very light; about the same substance as would breed a hunter. I now very fine van mares beed in that way in this country.

164. Mr. La Tourse.-Why do you think the

light, weady filly is more likely to breed a certiage have than a heater !-- With the Hackney you will est home and action which you will not with the thoroughbrod with a very light tilly. thereughbred with a very light filly.

162. Why should you get more bone from the
Haskney than the thoroughbred if the thoroughbred
had more bone!—The result is generally more bone. from the Hackney than it is with the thorough-

555. A narticular class of theroughlized 1-Probably that would have a great deal to may to it; it is hard to set a theresofthand with a considerable argeons of 565a, I have not had very much experience of besting at Harkmeye, but I should not think I had below the longs !... I think there are more of there

that would. 166s. I suppose an occasional thoroughbroi would tes I. Certainly. 107. To it not leid down by anatomiets that the lone of a thoroughbred is of a harder and denser misce than any other !-- It is of the very best, I should say. send any.

thoroughbord are of equal measurement of home, the wealy filly is just as likely to produce a bony horse by a thoroughtned as by a Hanknoy !-- I den't go so for an that. I don't think you will get bear back so think with a thorough bred as with a Hackney. 569. Of course the thoroughlired with bone of this description is much more expression and much mare valuable and not within the reach of Irish formers ?

Yes, that is no. 570. If such harnes were rest in the reach of Isish formers the value of beenes would be more increased than by bringing in a new strain t—Decidedly.

I'l. You would not account the records of an Irish 571. You would not accept the records at an arrested farmer through in his finally for 100 years, as records of the breeding of half-bred mares !- I won'l toke it s gross, as the caying is."

572. You would not openider bim a pure bred ers although he used not consider tom a pare area. would not hish farmer who could produce records for 100 years !

174. Or 50 1-No.

575. Or 201-I suppose there are some farmers that could go back a good many years—the larger 576. Are you aware that in portions of England Hackney mares were looked upon as being to valuable

that they were actually left by breeders in their wills 577. Is it not a matter of fact that the canon home of a Haskney is aborter than that of a thoroughbred as a rule !—I would not go so far as that. 578. You have not studied that question to I would

not my it was.

573. With regard to the breeding of harmon horses and hunters do you think the harness horse occurs emicker to a selectle age than the lumiter!-The Hackney comes very quick. You can put these in harness at three years ald.

480. Therefore they are an early marketable heres t -Yes ; you should not hant a three-year-old, though it is done in some parts of Iroland. 581. Do you think it a great improvement that under the Scheme of 1874 the examination is not

only for soundness but also for suitability !- Yes, \$82. Before that it was only for soundness !- In 1892 they were inspected for soundness and mitchility. 585. The marcs 1 - The marcs.
584. Nat. stallions 1 - The stallions real on the

Begister were certainly inspected but not inspected so very carefully as at reseent. 583. Had we may official reports as to the suitability of any stalling laders he was red on the Burister !-- Under the 1892 scheme we sent down to 586. It was not done as carefully then 1-Not

nearly, that is why I say the registration has advanced so much dering the last few years that it is 567. And the registration has been very much more nerfact for the last two years1-Decidedly, very much

588. Riv W. Galany,-You said yesterday you had experience in breading suscenarial Hackneys, and wen primes at the Dublic Slow this year; what is your experience of hreading from breader mars, have you and the same more with thoroughbred stallions and Haskney stallions, I have only get largest macer,

mer have I seen is slane vegred urn 587. The marm that bread these prize winners are harmon marent-Yea, my experience is limited to the county of Dublin as regards Harkways.

590. The done of these years winners, were those Irish lavd mores —I could not follow their pedigrebecause they were bought at auctions, and really you could not trust to what you would be told; my experionce of Hookneys is limited to two stude of the Hackney breed mor me.

501. The Charayan...The Hockney Stud Book is in

existence for thirteen years 1-Yes. 572. And it was compiled then from records in the hands of owners 1-Yes, for generations.

192. You do not seem to think a Henters Steel Dook to Testand could be conviiled in the same way lackt would be too big a matter entirely. I calculo to there me 109 000 kered mares to Tesland alone and thou you

ought not trust the pedigross sent in. but not in Ireland !-- I don't know that it could be dame in England either.

593. You have no knowledge recreek personally.

595. You have no knowledge yearself, personally, of the congested district where these Hackmeys are !— No, only hearney.
594. Lord Barnnouvell, —There is one question. with regard to the alternites of the Spring Strowswhich I think you said you were in favour of to the Autumn Shows, the reasons for which I believe were that those who inspected should be able to see the produce and their dams !- That was one of the muous

that was suggested as an improvement to be able to see the results, but that muld be equally well achieved. if feads were sufficient to continue the nomination system at Spring Shows, and in conjunction with it to give prizes to yearlings got by the registered stallions horept B.

out to year. In that way you would see the results of the scheme, and also encourage the farmer to parture his young horses, because success really depends to a great extent on the way the colts are fed. It would be of wast impotonce if farmers were toxined to feed their h uses the first year. If properly fiel the first year there in a chance of their turning out well, if not there is so shance. 597. You said also there was rather a difficulty of

tracing peligrees in Iroland, and you were not aver it would not be difficult in England also !-- Yes, but specially difficult in Ireland because horses changed hands so often; it is almost impossible, yes one carry on the name of the size but you cannot trace the data

side at all. 508 Do you see say difficulty in showing yearlings at all 1-No. 1 don't see any difficulty in showing yearlings at the Spring Show in conjunction with a

show of mares for nomination. shance of the produce 1-No, not without the knowleder of the county committees; it would be quite

inspossible.

500. The CRAIRMAN.—The Royal Dublin Society's scheme is not in operation in all countint-To the best of my equippen it is in every county. 601. Mr. Wagnest.—It is in cocrution, but not much used in some and more in others; is not that the case !- Yes, it is better supported in some case ties; it is more applied for. Some courties are stronger than others in marro. According to a stronger than others in timers. According to a return it varied in 1896 from £140 in some counties, and the county of Cork get £200. 602. Is not there constantly a garrier over the

the fact of the full grants not having been male and \$05 And it is generally expended in probable stallices !- Yes, which the toriety seed to any ciasolet which they think wants a stalling; if any breeder writes to the Royal Dublin Society and sales then to send a stallion, they generally buy one and sell blue to the applicant on the just description 604. And that enables a man, who would not be

able otherwise, to nequire a good stallies t-That is as: I think they boucht ten horses on that enterto the best of my seemery
600. The CHAIRMAN.—What is that return you

total from now !- The Society's Horse Becoker Schame for 1896.

606. That is the latest ?-Yes. 607. Mr. La Touenz.-All these horses purchased or the Royal Dublin Society were thoroughkend)-

antino you think uneful 1-Contrasting 1813 and 1896, our membership has altered an follows :-- Life

B. HUNDER PRIVACE convoiced.

Yes, without exception.

Mr. R. Henb Pringle. 608. The Orangean.-You are the secretary of the place to know the change that has taken place in our Irish Harness Horse Sectory 1—I am 631. Yes, I should like you to give us any take

602. For how long !- Since the 10th of May this 610. When was the society storted \$--All I know on that subject is derived from the information on the minutes. I know it was founded in the spring of

fill. Can you give us any information as to the afficies of the seciety when you teek office !-- Yes, sir. On any passarion to the secretureship, the hooks of the and the affairs generally were in an ears. believe that this was entirely due to the fact that the secretary for the preceding year had left Ireland, and the post had been vacant or practically so. On the 16th of May no steps had been taken to collect the county in agriculture for the year or to secure any new

olders. took office !- For 1805 there were sleven life members and forty-six anomal members, total 6fty-reven.

613. That was in 1899 1—Yes, that represented the attempth of the society at the time I become

secretary.

614. You published an annual report!—We did, siz.

615. Would you put it in !—Then is put in, siz.

I gave Mr. Neville some twenty copies for 1893. 616. Shall you neblish a report for this year lo-

es, ris. 617. When is it published 1—The report for 1895 617. When is in paramora i—And reporter for a was prepared by myself, consequently it was very late in the year, it was in May, but if I am instructed by the council to do so I see no difficulty in preparing by the council to do to I see no stiffently in perparing an annual report for 1894 in December. 618. Well, if your council approve of that we about like to have it 1—Very well, sir; let them give me the celor, and I will seen do it; I have put the

whole of the imential determinent here before me. and I can give you say information that you would like would afterwards appear in the report. 619. I don't think it would be of value to us What we want rather to know is what practical elega

worr society takes to further its objects in improving your soriety names to increase an objects in improving the breed of laxinous bosses —The practical steps that we have taken last, our are described in the annual report so far as last year is concerned. I can tell you what has been done this year 620 Yes, tell us !- Would you like in the feet

members remain as before, slower : the second meahere have increased from forty-six in 1896 to sevenie in 1895, an increase of fifty-six per cent. One appeal they amounted to £81 Or. Sci. Screenbody next on three perces by mistake, and I kept it. In that £14 there was a donation of £3 which a gratismus she seet me... I think by mistake... and I kept it. I got him a receipt for it in the shape of a receipt for a docation, which he estimate quite pleased with. This as to what we have done. This year we gave prim as the Ecyal Dublin Sociatr's Slow in Ament for Close A and Class B, the some as the year before, and precisely the same associate-£48 in all, and two silver models, which cost £2. We gave £35 fir haraces beree shown in harness, over 14.2, at exceeding six years cell, tred in Ireland, red exhibited by a venificat in Ireland. We gave £31 to Class B for young houses autable for benees, 10 Class B ver young acress suitation are measured.
14.2 and newards not exceeding fear years old.
We also, as in 1895, organised and defrayed the expense of a parade of couches, bendess presenting the driver of each couch with a tissue winy. The such parede of 1596 cost currentisty in all 625 lds 5d That makes a total of £68 16s, 6sl, that we gave to the Royal Dublin Society's Show. We also realized assistance to the breeding and improvement of barrens beeses in Ireland by giving prizes and grant at previncial shows in the following manner and order :- To the North Eastern Agricultural Association, which held its show at Belfast, for Class 15 "For the best young borne or mare, 14.2 or over, "For the best young borne or mare, 14,3 or over, not exceeding four years, beed in Ireland as to hibited by a resident in Ireland, to be shown in hand," we gave £10 and a niver medal. The £10 was divided into three prises of £5, £3, az £3. To the Hollymonot Society, Class 26, "For the best

Rackney or barness horse bred in Ireland, golding of

man, they years old or upwards;" we gave a cry value £5, ce, if preferred, a silver medal and £5. The cup was token. We also gave £10 towards the

completion of the driving track in Hollymount show

grounds

632. Where is the Hollymount Agricultural Show ground?—In County Maye, in Connaught. We gene to the £10, because we thought it was a good and heliting elject for us to support. To the Eathin Irohand, under four years old and over 14.2 high,"

25. As a matter of fact we offered £10 at that show, but I think the judges did not think the keesen wore no to the mult. To the County Fermanagh Agrimiltonal Society we suggested a class for luraress locate, and we gave £6 for that class. The class was For the hest burness hove, paking or mare, not accoding four years old, 14.3 or over, heed in british. To be shown in hand." To the Ballinusion Arricaltusel Society, Class 30 .- " For young horses, not exceeding four years old, with rivie and action ultable for harness, bred in Ireland and exhibited by a resident in Ireland, to be shown in band," we

a retreated in Periods, to the store in this, we gave a cop value £3, or if preferred a silver suchil and £3. To the Cleans, Co. Cavan, Agricultural Society "The Irish Harners Home Society gave £5, to commy and the first number of the give Eq. to be divided between Chance B and E, as a mean of mecunoging the breeding of house suitable for harness purpose." Class B was—"Driving. For the best purposel. Calls B was—"Diving. For the cost single harmen turn out. However not make 15 hands." Claim E. "Driving. For the best single harmes turn out. Posits not exceeding 14 hards 3 inches." The remmary of our expenditure in aid of harness horses and their breading and improvement in the over 1896 shows a total excenditure of £117 to Col. ss against £102 12c. hist year, an increase of £14 12c. 6d. in prime money awarded. In 1805 we gave to the Royal Dublin Society £70 14c. 6d. this year we only gave £68 14s. 6d, or a decrease of 26 per cent. That harmoned to be because there were fewer coaches turned up. Indeed we had vother a reduction in that, because the concises that we pold the hire upon let us down easier this year. In 1895, on the piber hand, we gave to local sociation £31 17s. 6d. This year we increased our nanabane to local societies to £48 10s, being an increase of #16 18s. 6-7. or 53-1 per cent. \$23. The main difference is that you have given larger support to the local societies !-- Yes, sir, we

have increased our membership, we have got trose money in, and we have given more money out, and we have altogether done without what we call damations. I got that accidental donation of £2, but we did not sak it, and we sought no densitions to do our 484. And, I suppose, if you had a larger amount of money styour disposition you would be able to do seeve !-- Yes, sir, we would be delighted to do so 625. Did you consider the number of entries you obtained at the local shows satisfactory?—I issued, by the instructions of the council, letters to the moreteries of all the societies we supported, and their re-plies I have been. They pointed to the fast that the scoreturies considered the entries fairly satisfactory. We think—I am speaking on behalf of the council that they might be greatly improved both in quality and number. In Beliest we had a good show in con liferer. In Leastier, being two more than for Class B at Ballsbridge. In Enstelvillen we led 15,

tember of entries; there seemed to be some confusion on the part of the stewards, and the houses did not turn up at the time they should have. 626. Then in your opinion, and in the opinion of your society, the entries are not quite satisfactory either in point of numbers or in point of quality !—I hardly would like to express an opinion on behalf of the society. I am not sure that the question was over relacd in council, but I octainly, if I dere speak as secretary, think there is certainly yours for considerable improvement, both in numbers and quality.

627. I think you said you got answers from the secretaries of the local chassa 5—You, sir. 628. Perhaps you would let use look at one and see if they would be uneful to us. Do they speak of the quanty as well as of the quantity !- I immed a elecular with three question 618a. Just rend one !- This is from the Semeter

Mr. R. J. Gill, of the Bullinesise Agricultural Society. The quantions were :—"I. State the number of vi-linius for the class or dissen for which the Society hat your awarded a cup or prize!—Answer, 18." This refers to 1805. "2. Were the exhibits, genually speaking, of a good quality, or did you, on the ally spearing, of a good quarry, or uniyou, or concording, or uniyou, or contenty, otherwood mandod meed for improvement. If to, kindly state in what direction !-- Answer. Of fair quality considering the district and the novelty of the class. A marked need for improvement is very necessary. Horses should be more of a hunnes clear, and quality and knon-action should be attended to 3. Are you of opinion that the exhibition of harness horses is deserving of support, and with a view to popularising and improving the breeding of animals of this description, are you prepared to recommend our tinned action on the part of this Society on bines similar to those bitherto puresed !—Answey. Yes; and no doubt difficulties will to a great extent dis-appear when breaders find houses house are classed shows, and a distinct market time affected. Hitherto in Ireland the only home relegated to her-ness was a horse until for a hunter by materireeding

or otherwise," 610. And the other letters are more or less similar to that !-- Yes sir; I think so. I think there is one af these hordly deals with the point, but it happens to be in my list, and I will put it in with the others, 630. These are all for 1895 t—All for 1895. 631. Have you sent out strollar questions this

ear !- No, sir; I was not instructed to do so. The time is hardly come, but I shall certainly do so soon. 652. At present you cannot be in a position to say whether the quality is improved or not !-- I will answer that question, siz. to the best of my ability. 633. On what grounds can you answer it, if you have not the roules I-I attended some of those shows, and spoke to a good many new myself, and if have had various letters, not in seawer to any form d circular. Although one sens at every thow some animals of merit as hisrares between there is, in the opinion of those qualified to express out, great comfor improvement, especially in the matter of action At Clones there was not one single beaut with first class notion. Only two out of accentren had any protension to action. At Hollymannt unly the price winners were worth looking at an movers in harmens; countie theme it appeared to me to be a very poor class. What struck was much was

that the good movers invariably belonged to gentlemen of means—large farmors or proprietors, wherein the exhibits of the farming classes was shuffing sloreon and only half broken so for as merthing goes. I lived in the Hellymount district for eleves years—from 1873 to 1894—and consequently I do know something about that district. Contrasting this year with the period 1873 to 1884, I should say the burness horses to Hollymannt district had dis-tinctly deteriorated. This near, however, he due to the fact that formerly every country-bount wasoccupied, and there were plenty of good turn outs. So far as Ballination 6, Hellymoura 15, Clones 17 in all clarens -10 and 7. At lines I naver scold country tell the the farmers are concerned, I believe the type of harness home is worse than it was.

634. You mean there is more densand !-- I think the best youngsters are sold, and the rubbish kept to a renter extent than was the care before agriculture second a had husiness. I think that is one of the asses that is operating

536. In that all you wish to say on that point !—
Yes, sir; that is all I have on that point.
636. What puri of the country does your society
principally comine is operations to !—All over Ireland.

Ont 21, 1801. Fr. R. Heater Fringle.

637. Do you consider any particular parts of Ireland more materially adapted to breeding this close of horses than others!—I am not too sure that it is a case of adaptation. I think it is more tasts. Certainly in the North of Ireland they are far more disposed towards however because they in a Leisantee.

the North of Testand they are first index-composed towards.

thing ulders on here.

30. We will see that the period of the control of the cont

culated as being broad marco-that is, one in every

soven houses in Ulater is a brood more

4 MPT. Ven dur't some hope actions only for break reg.—Well, of some on the manufacture freq.—Well, of some on the manufacture freq.—Well, of some on the manufacture freq.—Well, of some one world at possible videous say shouldes freq. as more as well as possible videous in the some of the some

are believed to be brood maces—that is one to five. Is Munster the horses over one and under two exceed those under one by 6,091, or 28 per cent. Measure, accordingly, is unable to supply her own wante in the one year old and under two years old department, but ranks higher then Leinster, though not so high as Ulster as a purely breeding and rear-ing province. In Munster there are 161,104 houses of all ages, of which 28,338, or almost one in six, are computed to be broad masse. In Connaught the homes between one and two years exceed those under one by 805, or 6 per cent. Consaught may therefore be treated as self-supporting, or at any rate, selling only to a small extent under one year old. Of the Tailds became of all ages in Commanght, 21,919, or one in three, are brood mores. This is doubtless due to the smallness of the holdings, and to the feet that most of the small farmers keep a working mare from

fainater 207,751 horses of all ages, of which 38,327

658. Your general deduction from that would be that, taking them as squarete entities, Connaught is about self-supporting; Leinster and Munster obliged to import, and that Ulster supplies them!—That is amoult my summer. But it is right to say that I believe these figures are correct: they are all checked, but in unking a summary there is a surplus of 11,935 arimals, the origin of which is utterly unexplained by

statistics-that is 13 per cent 659. But of course the relative amount of exports. tion from the different provinces would upset all those conclusions !-- Of course it would naturally ; that is what comes in, but I have not set it at my disposal

\$60. Perhaps you don't think it can be done!-I would not like to so so far as that : I know it does not appear on the agricultural returns 661. Those are very interesting statistics. Have

yes got any farther statistical matters i-I think I am 462. Can you give us any figures so to the annual production !-Of course I have the foures of the yearolis-the numbers of year-olds in each county-and I should think that would form some reliable basis of

arriving at the angual production. Mr. WHENCH .- Have you got that in the provizces !- Yes; and counties. 684. The CRAIRMAN,—Can you give us under the year old?—Yea. That is all in the agricultural statis-

tim. In 1895 the horses under one year old in Ulater were \$3,094; in Leinstor, 22,999; in Munster, 21,304; and in Couracyte, 13,152 565. Then the yearly productions in Uniter and Leisster appear to be very much the same !—They are reactically the same, but then the extraordinary

606. The total amount in Ulster is much larger then in Leinster !-- It is, sir. . Mr. Canzw.-Of all ages !- Ulster is larger this Leinster in two-year-olds, but not in all ages.

668. Sir Thomas Emonon.—According to your statistim Leinster would do the biggest trade in horses?

669. The CHAIRMAN .-- Can you give any explanation; because it seems on the face of it contous that the production appears to be very much the same in on promotion appears to be very mink we were to the two year-cids in Uniter and in Limitor, and the number of the two year-cids in Uniter is larger, while the total amount of Limitor is larger than that of Uniter 5—1 cm offer an englanation. Although they are breeders in Ulvice to

as large an extent on they are in Leinster, still they sell at an early age there, and Leinster beyn. I should say Leinstor was more of a housey society for ene-year-olds 670. Mr. Canzw.-You say in Ulater 161,000 are two-year-olds and over 1-161,559 671. And of all ages 193,000 2-That is right.

674. I want to point out this—that of two year olds and over in Ulster there are 161,509, and of all ns 193,661. If you deduct she two year olds from all ages you get \$2,000 under two year olds in Ulster Now, in Leaseter you get 140,000 of two year olds and ower, and 207,000 of all ages, which would give to Leinster 67,000 of under two year olds !-- Yes. 675. Does not that seem to contradict year state-ment that Ulster would be the breeding province !--

I think not, siz. It simply implies that Ulster men sell as yearlings, and that Leinster men buy. 676. You have no experience !- No : I am simply all more yearling into Leinster than Leinster into Ulter — Yes; corriolly.

678. The CHAIRMAN — Can you attend another sky!

I will be only too glad, became I only took up this
matter last night, and I just checked the figures, and totted them up

679. Mr. Causw.—My experience is that Ulster buys from Leinster, brings them out, and breaks them in? (Fitness)—Under what age ? 690. Under two years old, and then your figures world be right, I think !- Ulster sells over 6.010 as

yearings, and Leinster bays from somewhere or other, 681. I think your figures clearly show that Leinster is the great breeding province, and that Uniter is not.
662. The Chanman.—In the meanting if you could get us my information about the reports !-- I darenay I onn.

683. Did you hear the evidence of Mr. O'Railly !-I beard part of it, sir.

18 Generally, do you agree with what he said, or do you wish to make any remark about it i ... I shi not agree with what he said about the presonderance

of the hunter interest over the harness interest. 685. I think Mr. C'Brilly spoke about the objects of his society being to improve the human house of his society nearly to improve the backers when without interfering in any way with the produc-tion of hemiters !-- We are all at one there. I don't think there is any difference of crimion accompat the members of the Harmon Horse Society shout that We do not wish in the slightest way to interfere with the breeding of hunters—for from it. But I do not think Mr. O'Reilly was quite right in the contracent

he made that the hunting interest for expertation simply predominated to an extremely large degree over the horness. I believe there are far more horses exported for harness proposes than there are for hanting purposes.
636. From what partet—From Ireland as a whole. I cannot say I am very sure upon the point, because we have no absolute statistics to gride us. I don't

think that there is such an engenous number of Irish bunders in England se what is made out. There are a very considerable number, but I do not think at is so ensurement an people try to make out. I know the South of Southerd way well: it is may native country, and I am quite stre—taking the Duko of Bucelength and the Jel Sorest humis—I am quite ware that there are not ten in every hundred that are Little-bred

banters.
687. You think the proportion of horses experted for harness horses is much larger than is generally supposed!—I am sure of it, and I am sure that there is a far greater demand for them.

558. Mr. Frzymanaw.—You would inrelly take
the South of Scotland as a criterion t—No, sir; but it

is better to talk of a district you really know about, 680. Lord Raymonners. I would like to sole Mr. Pringle if he has ever had much experience in the broading of horses !-- I did breed horses and kept house to a considerable extent: they were charty arricultural house. I did keep hunting korwa, 672. That would give 32,000 under two years old t -Yes, and the other figures seem to come to \$8,000. but I do not offer evidence as an expert on the Oct. 21, 1816 Mr. R. Hanter Pringle.

subject as all; on the contrary, I have never pushed, award forward as a cutherity on horse.

200. I take it then that you don't with on an forward any recommendation to improve the bread of horses 1-26, sir; I am here as a secret-ser, leading the contraction of the contract of the horse investing industry 1-16 did.

201. You don't think on 1-1 think that is order.

pan the section which go led that is not to the single control of the consideration who had been assumed that the first consideration who had that the first that Irriband is a constry of sany and warrant single control. I helicite it is no enconstraintable fact that among the upper ten, the upper crust, the hunting infinitely is unabsolibly the preductionation and the best paying one, that I contently question any macrition that would make our that around the sand

farmers under fifty seres the hunting interest situatexisted at all.

1933. But don't you think it is in the interest of the small farmers to keed hunters—a serviceable horse to do his farming work in the beginning h—I think it is in the interests of the 65 per cent, who follow agel:

colure to bread heeses best suitable for agricultural poresits.

604. Can you not combine the two in the earlier stores I—It must be a proper combination, and I see not set all proposed to any in my opinion that the theorepithed bleed is notable for agricultural news.

posses.

(20). But has not that combination done very well up to the person t—I don't think it has done well at all. The correctly is eventured full of week.

(20). What do you think would improve 21.—I am not pring to make recommendations, six.

(20). The CHARMAN.—If you have got any private spinders on the matter we shall be very wheseed to

spiniture. Speak as yourself and not at the secestary!—I came on accreatry. If you want to see not again on the subject I will be delighted to try and come in another expensity. 619. Mr. Carew.—You my ma your opinion that I tish hences are not so much med in the United

Fixed access are not to tous of most in the United Kinghote I—in may opinion. I know they are traded upon; if it a great recommendation to a limited to a property in its I fish-bred. I know that there are many horses reward off in Fish that never accessed the Cherickethan and the C

Then is my equinous.

To Decume whom you allude to farmers holding

To nerse and under you allude to those farmers who
haved horses. Of occurse the question Mr. Carse

pas to you dealt with the framer's interest in horsetessing who partned it 1—Yes; I know vary well

than farmer under 50 sores are very large dreaders.

that formers under 50 nores are very large breaders. I could tell you the number in every county, 701. You say the agricultural borne interest in Ireland represents something like 83 per cont. 1—I said the agreements constitute formers.

Main dynamica momentum are up to control to the agricultural protect inferent.

703. I think the statistics yet gave us as require herees showed this something like 83 per cent, of all becase in Ireland was used for agricultural—Yes, agricultural purents.

703. But many of the farmers bedding fifty acres or under who are heree breaders coursely breed for

or limit was are noted by the state of the s

would not require more than two houses—No, he would not.

705. If one of these happened to be a brood mare, in six yours he night have naturally six horses—Yes.

706. Consequently he must breed for sale—Tes, for work and sale. The utilizate red of the saints—If the work and sale. The utilizate red of the saints is

mle doubtiers.

707. Then it is the interest of the farmer, bened the more valuable horse. Then, is in the interest of all farmers to bread unballed horse. 70%, Nie unstand of all farmers to bread unballed horse. 70%, Nie unballed his less bright and the bright in the branches of the second to be seen to be seen

to the country. You want the agricultural have and the riding here as well as the light trap here and the limit person well as the light trap here and the brazing brees —You, the number of house feves as under exploritions promotic include a very forgs number of somes which although small of the person of the person of the person of the detail, waver riding between and personal principal herein; but the fact of their being used for agricultural purposes herings them under the bestling.

but the fact of their being used for agricultural purposes brings them under that bending.

716. Mr. Warnen.—You differ from Mr. O'Reilly very widely as to your figures about bunders 48 compared with other horses I.—Well, six, the figures I have absorbed to the contract of the contract

, estatistics.

715. You don't think thus by any chance the segretar-General notal have included footbrailed; as an agricultural prevoit 1—18 would require as an agricultural prevoit 1—18 would require as considerable studied imagination to do that.

716. See Warms Gillary.—Have you any figure at the support of brees 1—11 have the figures of import to

Great Britain.
717. Importation to England—export to Ireland?
Yes, I have heck.
718. I wanted to know the last of the returns of
the exportation of horses to England—The return is
that of the Beard of Agriculture in London, and thesefore the breas are imports in this return.
718. The Charleston London I Industry.

Van

Major O. W

con. Mr. La Toucara. - They are also ified !- Only 73). Mr. La Taucain.—Tray are distanced:—Only as moves and geldings and stallises. They go back to the year 1875. I have got the last, and the average of the last three weres 121. The CHARREST.—We will take them both.

Witness .- Do you want me to include stellions, or last maces and politices ?

712 Everything Witness.-185 stallions were imported into Great

British from Iveland I but your; of marcs, 13,370 were imported; and of goldings, 18,003; making a total of narcs and goldings of 31,472, or a total of stallions, 721. Mr. Wagolds. -Apparently that would not

isolade any houses tient were taken to other complaint from Ireland !- No, sie; there are no portionlars in the agricultural statistics of Iroland, neither are there in the acricultural actures from Great Britain, on the

724 Sir Warren Grener. - In many of these denotes where krish borses are sold, as there are no firmes to guide one, what was your experience of the class of home that was rold! Take York, Louden, the eastern counties; they are a mixed class for brane, kenters de, !-Yes, they are just that seet of indefinite and are in the large are just then not a learning and the stay difficult to be described unimal which we have throughout very large pertions of Ireland. They will do for a variety of purposes. If they happen to be hig enough I suppose they may go to trams or busses. I should say that a very great many of then find their way to hansom and cabe. The ordinary anisad that I have seen in the fair in the west of Ireland, and the ordinary anisal—putters avide highestses hundres—that I have seen sold as Irish borses in England—it is very difficult to define what they are. They are suitable for various purposes.

export of horses from Ireland to foreign comprises so

After the ellourument,

Major C. W. Sympathy evanished

725. CHARRION.-Major Studders, I understand ou are a resident in County Clurct-I am, my

726. What part of the county !-- Within six miles of Ennis, a place called Graguester, near Corolin. 127. You are a breaster of horses yourself!—I am.

727. You are a breaker of horses yourself!—I am.
728. What class of bouses!—I am now breeding
throughbeds. I bred a great most half-bred 753. You have acted as judge, I think, at a memb of shows in the country se well so in Eugland !-!

730. I take it that you have had a considerable experience in breeding horses yourself, and a large experience of horses generally !---Xos, I have over

farty years' experience. 31. You have also attended markets and fairs in this country 1-Yes, I have, my lord, all those 782. And in Great Britain 1-I bave, yes; in Great

Britain, some; not, of corres, or many or in this country. But I have attended fairs and markets on the other cide. 733. Taking the larger area first, the whole country of Ireland, from your experience, have you formed any pointers as to what class of house it is troop

731. What do won think t.... Hunters and bich clear horners horses

735. What do you mean by high-class horness borses!—A lot of houses are bred in my own county and the next county to me that Winhush buys. He rers from £70 to £120 spices for three-year old exis. He buys them as harness herees, and a great many of them would make very perfect looking bunters, too.

736. The same chars of boxes, in fact, as the

heater !- Very much. 737. How would they be bred !- I think, without exerction, by theremobbend becars, 758. Out of what class of mares !- Well, out of rather well-bred marce-some of thom small mares.

some of them weedy mares. In some parts of my very good sized houses by thoroughbred sires some of them by what we would call old frish mures. 730. We have heard that expression used several Want, and I darmay it in thoroughly understood by most tomaters of the Communion. Personally, I should be pled if you could give me some explanation of what is must by in old Irish mare 1.—My idea of what is must by in old Irish mare is a long, low more, about 15-2, with good neck, kend, and sinchlers. She might have some hair on her legs, too. She is a mare

that our en eight brish miles todas a day for what we call a cavel of toof and come back and be none the worse of it. She trots with the empty could five or any miles as hose, and brings back the full creek and thus does not do hor any huro. That goes on for musths. deer not do hor any harin. That goes on for munchs. 710. How are they produced i—They are produced from old Irish blood, with some crosses of the ough-bred blood. They have a tint, nice head on them.

bred blool. They have a tight, nice head on them, mostly all of them.
74). Have they Hashney, or Cleveland, or my sock blood in them !—I don't thick they would do thintwee miles a law if they had Cleveland or any

other or Markeney blood either in them form my own

experience.

713. Have you any experience of Clovaland or Hustiney burner?—Xe, I have experience. I have rulein and driven Hustineys in England.

744. You nove teed from them 1—No. I volo and denote in Suffick both Verkelies and Northile

745. In your opinion what would be the effect of the introduction of Harlmey or Cleveland blood in producing the class you describe-high sloss learness houses and hunters !-- I have no hesitation in saving that in my opinion it would be reiners to that class of horse, and a gross means of ruining the Itiak

Tiff. It would deteriorate the rescisco!---I am sure it would and I are turn it would be not an on the surre level as the English farmer, and any uses of mactical experience I thick will say that you can po to England capte space a titled with my take you can go to highling as ten and hery ten four year tolds on good bodding as ten Leish four year-telds, and if I was to being thrus home and be dishomated amongh to give them feetiles a pedigreen I could got from 40 to 50 per coats more for them here on I firsh favores than I could buy them for then here as I rule hower than I could say then we on the other able. If you bring the same class of bleed into I when! that these becses are bred from in Bagland I think the Englishman is not fool enough to come over and give us 40 or 50 per cent. Item

for our bornes them he is willing to eight the English farmer for theirs.
247. Then you would consider that the 40 or 50 per cont. superiority that they represent contist is superiority in the brooking !—I do, my lord. 748. And consists in the use of thoroughbred

sires 1 .- Thoroughtend sires beyond any other sires to get harmen horsen or hunters to pay. I have ridden Irush huntom and Euglish hunters a great deal, act. I think it is almost impossible to from an opinion of their relative ments if you don't ride them. 749. Is any partof county Clare under the Congested Districts Board 1—I think not. It is quier the Bord

Dullin Society rules. Printed image digitised by the University of Southmanton Library Digitisation Unit Printed impre distinged by the University of Southernston Library Distingtion Linit

750. Then you think if Hackney blood was largely introduced into this country it would have a recindicial effect upon the barers 1-I am core it would 751. We have hed the opinion stated in swideness that the Hackney strain would be so easily detectable that these would be no danger of its having any effect apon the breed of hunters produced in this country unless the owners of marres shore to make use of itwhat do wen think about that !-- I don't think that. A man who has been brought up to besses and in a good judge would perhaps be able to detect the mosty hig nocks and straight shoulders and knee action

without one aboutler action, but the yest majority of there who key beenes are not what I call judges of horses, and I den't see how they could detect it. 752. What I want to ascertain is whether in your opinion, assuming that in certain districts the intro-duction of Hadiney blood might be useful in show districts, there would be any probability that that blood would sweed throughout the country generally, and not projudicially in other districts more suitable for the breeding of hunters i-I think it quits possible

and enite weekship that it would exceed 733. And that it could not be detected by the average former !- No, certainly not. 754. Are many remounts of the Government bought

in your part of the country !- The English Governcut! Tab. Yan!--One own Government buy on the average I think about 60 or 70 horses a year from the

formere about 755. And are they bought by other countries?-Yes, tost monbors for the Datch, Italians, French, and Danes

157. How are they benght!-They are benght by dealers, Messex. Widger and Mr. Melendy. The Widgers are the largest buyers, but there are others 166 What class of house am they t. They are nice

well lord class of borses, particularly these that are loughs for foreigners. They are usually these year olds. There are sense beautiful once. Some beautiful colts and filles go away with them. 759. World you consider that the introduction of 759. World you consider that the introduction of Hickney blood, for instance, would have a postulicial effect uses those bornes also t—Cartainly. I think is would have a wonderful effect upon the fereign beyors. I have moken to several of them and thay told me as 760. Have you any idea what objection they would have to the Hackney strain !- They all look upon them

as what you would call a born door breed. salted that you can drive him in one day what would satisfact that you can enve use in to on any what would take him there to get beek. I near they have no staying powers. They are all very well for them paraposes, thiving up and thou, or for driving up and down a street, but I thirk my man of experience must even to the conclusion that they are a very oneless ox/mal. 761. What class of mares have you in county Dioret-We have a nice class of well bred mayer

They have marvellorally improved since the Royal Dublin Society started. As Mr. O'Reilly explained to you, though we had a fewer number of marss at the show this year, they were an uncommon let of nies mares

762. Do you think the Royal Dublin Society has had a good effect?—I think it had a very good effect. but I agree with Mr. O'Reilly in thinking, however, but I agree with Mr. O'Reilly in thinking, however, that the previous system had a better effect then the present system. I think if it was worked perhaps on a little different lines it would have a very marked effect on the class of herres Ireland would produce in

effect on the came a very few years. 763. Have you formed any opinion as to the relative value con mercially of the breeding of bunters or harness busses—the expect value I mean!—Well, in harness bosses—the expert value I mean 1—Well, in my own county I think they are about equal. In my own eccuty, with very few exceptions, the high price horses are three year olds. I think they are about

countly bought-other high class harness bornes and equally bought—other high class harmen horses and other high oless huntern. This harmen horses go for quite as meeh morey as the colds hough! for hunters. 761. What kind of stallious are there in year county !-A!! those hereos I tell you of were get by

765. What thoroughbred stallions are there in the vos. What inconstituted easisons are there in the country !....I know a good many of them. I could rea over a good many of them. 756. Are they well adapted to the class of marss wen have in the country b-Well, I don't think then

are now local. I think there quebt to be a few regood barren there. od byrses secre. 767. What is the matter with them!—I think a good many of them too weedy, too leggy, and they are not thick enquir. I think the home we would wee

in my country is a thick short-logged horse, with good kness and books. I think that is more imprinat than perhaps size, even in producing good sind

768. By thoroughbred Lorsen 1-I mean thorough-£3 to £4. £4 is the highest. That here even

SISTY DATE. 770. Do you think the price has very much effect upon the farmer in determining the stallion to wish be sends his manu!—Yes. There can be no question about that. If the fururer could get a thereughlood heres for the succe roice as any other class. I should think I am quite safe in saying that over \$5 per cut.

would go to the thoroughbred herse. 771. Have you any believed stallions in the senter?—Yes. I think I am underestimating when I say 95 per cent. of the firmers would go to the thoroughbrol. It is the noney that prevents then

scoring to the thoroughland.

772. They would like a good large, but they cannot afford to my for him!—Yes; they like a thoroughland 773. It would not pay a man as a commercial laminess to have a good theroughbred layer 1—That is

just it, and that is the reason the first system of the Royal Dublin Society was the better one. I think the first system, with a little modification, is what tie country would require 774. What age are they sold at-three year old! -Vox. and late of vearlines and tora was obtained told tos. Nearly all buy three year olds. The farmen that are confortable the large formers of ever filly

acres, ponerally keep their barres if they are prouising mutil they are three year class. Of course they some 770. How do they treat their young stock-do they treat their well i-They do not feed them as well as they ought to them as well as they ought. I on always presching to them, as I are getting them into it a hit, and they are feeling them better the first year new. You cannot get a mens networ the first year new. You cannot get a poor faunce to fred his home as the neght. If they would only feed then well the first year they could wary good, and some of the barses grow well, though yary good, and some of the barses grow well, though

not put into a house in winter. Some may get a let That is all they get. TTG. Are they becomed in winter t... They are not wand at all. It is a mild manning

727. Do you think the ference controlly aggregist be necessity of breeding from their best mares!-- I do, my lord. But it is really very seldom a good mare is kept unless she meets with an accident. Nearly all the most mores are sold for hunters, or if they have plenty of size they are nonetiment brught to make hunters of them, or go as removate to other countries. Some lovely mores go away freegt-Connequently I think if young mares could be an couraged it would have a wonderful effect. I have been always saying that. 178. How would you propose to do that !- My idea

would be to have a show every year for mares, to give

no prizes for aged mares but to subsidies their fees to no prizes nor aged mares nut to exceeding their fees to a stallico. But I would give a prize to these year a marca and four year old marcs, or good two year old marca and four year old marcs, or good two year old marca stinted to registered borses. I think that would have a wonderful effect. But there is one thing that strikes me-perhaps I am wrong - that the farmer requires education as to the horse he puts his

mare to. Not only that, but suppose you subsidize a lot of mares and there are half a dezen registered atallions in the county, one man may be very much is oven the farmers will send him the mares though to open the softness with seals of the target though that horse might not be suited to these particular mass, and I think if there were two people who mares, and I come in course over two peoples was really know their business that went around and I Analy think is would cost much, and not these stallions in the county, because it is monument to speak as I hand someholy do of the farmers being able to send their mures to other horses, they won't send them out of the county, but if there were two man who know they legaliness to see the stallions and see the mares and to may that that more should be subsidized hat the must go to such a stallion and another more to go to snother stallion that in their judgment suited the

name I think that would have a morvellous effect 779, The fermer's choice is largely determined by If they only get a subshiply for a particular borne they will go to that particular home.

780. Mr. Prewilliam .- Are there in your district a lerre number of stallions of all kinds 1-Well, three 781. In the district !- In Ireland we take the

county as a district.

78F. I don't sale the precise number—but are there agreed many weedy, inferior stallings in your country? -Yes, I should think they are in the majority-

the weedy, inferior ones. 755. The average value I suppose is very small indeed 1-Yes, very small. Some are not \$5 to serve at all I should say. 784. Do you advocate the use of half-lived stallions
-when I may half-lived I mean stallions with a good number of crosses of the thoroughbred in them, only number of crosses of the thoroughbred in them, only not purely thoroughbred i—I know what you mean, Well, I think they might be serviceable if you could draw the line. There is where the great difficulty crease in. Of course I hourd stallious mentioned here today as half-beed, but any one of those stallions I beed mentioned is just as likely to produce a Liver-

and he lost his recliarse. Then there is "May Boy." whose producers man second the other day for the George-He is not a theroughbord, but he is only technically out of the Stud Book Tell. With good guarantees should you object to stallions with H.B. to their names !--- If you had a

proper Board-we will say a small Board, because I have not much faith in very large Boards... if you had a small Board that regularly went into that and knew what they were going into, I would not have an

786. And would you prefer a horse bred in that theroughbred. Of course I would prefer them to any of these nonfescript breach you were taiking of. 187. I think you said in your avidence that about forty per cent, more was birdly to be given for an Irish horse than for an English horse of the same

quality and appearance !- Appearance, certainly.

758. And do you make that usertion on the ground of the present prestigs which the blood that has been hitherto used in Ireland has given to the Irish hereo? —I do, sir. I go further. I know it to be a fact that I can buy a been fifty per cent, chapper in England than I can hay that same been in Ireland—I mean a horse of the same conformation and same notion. 789. It is the preetige of blood and etamina that

gives the Irish horse the extra value !-- Yes. Euglishwhen know well that they earry three better than the anne looking lorse, as English beel lores. 799. Lord Assrows.—You say you have beel inntees!—Yes.

791. I suppose you always took for granted that the thoroughked size was the best for hunters !--

19ays.
792. You always had a mitable home!—You. 793. Don't you think there are a great many mares of mitable for breeding hunters! - Certainly. 724. What would you suggest the farmer should do with those 1—I should suggest that if he was well enough off outting their throats. Still you can't get

over the fact that some of these valueless weeds looking mares do breed extradolinery fine looking 790. Have not sell and climate a good deal to do with it !- Yes, and chance. No man can tell the mary that is going to produce you a good animal. The

docteins of chance occurs in there. Some of the mares that produced even valuable men harms were not read. looking mares. Still you must go on the system of isoking mares. meni you must go on one ayesem or siving a good-looking mare to the hoves as more likely produce good offspring than a bad-looking mere. TSG. Europially if the land suits and the climate !-Yes, the land has a great deal to do with it.

797. Don't you think the difference between the English and the Irish harm comes in the bringing up. The Englishmen puts his horse in the winter in th We run our harnes all the winter. have a milder climate and a moon natural heirging up 5-I think that has a great deal to do with it up 1-I think that has a great deal to so wan n.
Saill I think all strongth in the English hunter
somes from the cost blood, and though they might have freedem of action I never upst one of those that tired with me that came equin that day, and when they fall with you they are not at all quick to g 4 up

798. Allowing that the Euclidemen does use eart hlord, is he not civiged to use cart bleed in order to get that ambitance on account of the difference be-tween the soil and climate. We are exceptionally favoured in the soil!—That I don't know at all, because I are wery doubtful of the hone of the cast heres beyond the thoroughbord horse. If you place of all the hair from the cort house you can get identy of thoroughbred that will measure as unch as any our borne. They won't have as hig feet but their home will really be as high

use will really we as any.

795. Fereigners hay a lot of colte and fillies in the unit for rescounts. What price do they pay ! pool winner as if it had a clear pedigues. I think "Lawrer" was one. "The dam was level with a think county for rescounts. What price do they pay !or £21. They hay them at from about £16 to £27

800. Mostly by therenglibred heretal-Yea, then bave no objection if they are three year olds at the

801. You said that the best sire would be a thoroughbeed, provided he had short legs and plenty of bears, which it is extremely hard to get !—Xev, is is hard to get. Pailing to get them with hig bern I weekl rat them with well formed legs. If you mate him with a proper more he may produce plenty
of home in his offspring.

802. Would you chiest to farmers in districts in

which the manter are not authorite ble ... stronger than not their mures to a thoroughbred and found the filly was light—would you object to them putting that filly to a half-ired hours! What would you get, if you take of hours that is passed by competent men as having sufficient blood in him, I think it might be very

803. Don't you think it would be advisable in conjunction with a thoroughbred horse in a good many districts !—Yes, I think that might be very

804. Sir Tromas Emerena.-Do you think there are as many houses bought by foreigners in your districts as there used to be !--- I think there are quite

OR DESCRIPTION 805. Is there any improvement or deterioration in the soundness of the mares about you !- No. I don't think there is very much. 805. One way or the other !- I don't think there is any deterioration very much in the baseling of horses I think Teeland penduces as many mod

hern-e. 807. But in soundness !- There are certainly more houses rejected now than forty years soo, but I don't think there are so very much more unsound ones, but think the vaterinary surceous find out things now that they did not know anything about before

808. Breeders set more value now on breeding from 809. You spoke of stallions in your district, and you approve of thoroughlend stallions for high-class oursign horses, and for hunteral-Yes

\$10. Do you think the stellions could be increased ! ... I think they sould. 811. A better class bed think some of them are very good; but, as a rule, they could be very much

\$12. There is room for a better class of stallion !-\$13. Do you think the price of the stallies has very much to do in decemning the ferners to which to

S14. You think that is the most important thing !-Yes, it is the most important thing.

815. Lond Rayhdonnas. —I think you stated you have several times ridden and driven Hackneys !-- I premium for two year olds and a high premium to the

S16. Were many of those that you rule or drove first-class snimsle, either prise wisters or shown in show yards i-I cannot tell you about their heing prize winners; they cost a good deal of money. If was in Suffelk, with my wife's uncle, with whom I was in special a rood deal of time. He gave a good 817. What was your experience then - what would ron say as regards their shape and action, frut as you say at reports their samps and accord, but as regards riding and then as regards driving; say first as to riding b... Bather too much action. I think for pleasant riving. They went up and down a lot, almost all of them I saw; thay shock you about a good deal. My bles of a riding loves is a horse I could got un

and sling along at eight or nine miles an hour, without giving them a good walk, and I was then a younger man than now. I had only saven miles to go from this old gentleman's place to my irrother-in-law's place, stall they certainly had not much beans in them conjug back after that four-tons miles 815. That was under the suchlish... Yes, ket it was lost the same with the hurners. It was a heavy sandy road, I swant you, in Suffolk. They went get

of the yard in great courage always.

819. Mr. Carsw.—Is it not your experience of Hackneys that they less their setion after a contain time on the road !- Yes, efter they cours to eatch hold

of their bit and throw the whip on them 330. In not the superiority of the Irish to the English horse due to the superior Irish blood !-- In rangina novas une ve

83L. I think you said that you bred from two year old merce !- Yes.

oil meres — a cm.

822. What is your experience of breeding from
thous at that early age 1—I think they are just an
likely to produce a good animal without injury to the mare herself—I am talking of half-bred horses not rare horses, as say other mare.

823. Would you give them a rest after the second feel I-No, I shink if you want to keep them on for breeding you need not give them any rest at all. 824. If you did not want to keep them on for breading, but wanted to turn these into lagrees beenes co hanters !-- I would not breed from her as a three year

old. I would let her run on all that winter and breed her in the spring. 815. It would tend to weaken her !- You

856 Vos said that the Boysl Dublin Society bas worked well and that with a little medification the old stem if reverted to would be a great improvement.

I think it would 827. What is the modification !-- I would report to the old system of subsidising mores. I am arms payed that the committee in my own county on of

that orinion, and I believe they wrote to the Recal Dahlm Society to that effect, because as Mr. O'Belly so clearly put it, you get very nearly 50 per oral. more mare, at least you get 50 mares instead of 30... 338 Col. Sv. Quirrer.-Talking of mares and

the desire to keep gred manes in the country you say you would give prizes to two year old reares stated as three year olds !- You. 829. Would it not he better if you could increase the are and give a roise which would make it work a

man's while to keep his more for a feer year old with a fool at foot !- Yes, cretainly 830. If it could be carried out would not that he better than giving a price for two year oldst-Yea. but my idea is to encourage them to not two year old mares to the house. If they had a good feel from her they might be incepted to give her another chases. They stight drift on to scoping a good well tred it.

It would be all the better if the money was there. 831. If it could be arranged to give a moderate

four year olds it would carry the inducement still further !- Yes, and have a better effect. 832. Theo, with regard to stallious, you spoke of a half-bred stallies, which we take to mean a bone with a stain in it-could you suggest any rule by which a house of that show must condife before he is admitted as a stallion !-- Oh, yes; I should admit no horse it

prostical competent men. I think it would be very likely to have a most subscut effect if you let a horse of that kind slip in without the greatest empervision 833. Unless you setually knew his breeding!-Unless you knew all about him, and that he has so

bad, dirty strain, like cars or Hankney blood. E34. With regard to the saidily house for the farmer never now one of them that I could ride three miles if he wanted to use him houself and sho to set rid of him at a removementive price, there have been discensions as to the class; and, putting the thoroughbord class saids, there are two or three classes which have been introduced into the country which are known. speaking stere or less personally, because I buy strong dewards haven and I comest obtain them in Ireland-d you wanted what I would call a really high-clear, active, agricultural horse, would it pay the farmer best to bread from the Hackney, the Clydenials, or the Shire!—I should think from position of the three.

885. But of the three 1-None of the three. I 833. But of the three-mone of the three a should brend from a house out of a strongish mars,— with a certain amount of hereding in him. There are some of them in Ireland—what you call half-levi bosses-strong, half-bred houses, out of an origany Irish cart mare—got by a thoroughteed horse with great size and bone, some of these, The CHAIRMAN. -- You didn't sorwer Major 8

Opinton's opention on to which of the three you would

from any of them. th say or users. 836. And weight!—And weight, as you say. 837. The CHAIRMAN, - Which of the three would you prefer, if you are confined to the three !- I should say the Cleveland, then, would be the better eros of the three, if you have to choose the least evil I must

Printed mases discussed by the University of Southennoton Library Distinguise Unit Printed image distract by the Linearaby of Southampton Library Distraction Line

my the class of horse you talk of is a class of horse I perer set my mind on breeding. one Col. Sr. Quintill,-It is not lead to You. had l-No

\$30. I don't think you can breed him in Ireland !-No. 840. A great discussion has been apparently going on in reference to the Hackney borse—do you think

and action, is likely to breed a horse that you can poswide wide or utilize as a harkney home !-- I don't 841. Or as a heavy draught horse 1-No. He has

estile or depth for an agricultural horse, nor is he satisfied for riding. The class of horse you talk of is not bred in Ireland. All Irialmen breed with a view of getting a hustor, or a harness horse, or, perhaps, a chaser. That is the ambition of every little farmer in Yeshard if they can get money to send their mares to a thoroughlared house. 842. Mr. La Toppur.-You describe the old Irish

mare as a long, low, good looking snimal, with good neck and shoulders, and good legs and feet. I suppose is is only from a some of patriotism that you shim the title of an old Irish more, it means nothing !- I think the type are still to be found in great numbers in Karry, Cork, and Limerick, particularly where those these counties ioin. You see them soine shoet with the old two of head neck and shoulders. They are use of type of feet, now, and associates. They are not generally so nicely made belief, but they have all the charecteristics. I think there are a great many of them left yet. They are level in families from generation to generation. Somebody said that the My ax

Irukusan does not keen up the breed to-doy. eriesce goes egainst that. I know source of farmers persone goes egainst that. I know source of farmers that have the same broad in their families for generafloor, keeping on a mare always from the old stock. 843. Usually crossed with a thuroughteel horse! ·Tes. 844. In measure to Mr. Fitzwilliam, you said you could buy a horse in England and that you could sell the same borse in Lieland for 40 per cent, more then

yes could in England owing to the prestige of the er do you not mean the experier excellence ! -- I went owing to the experior excellence of the Irish animal, because the Englishman has found it out.

840. It is really owing to excellence more than presign — Yes.

846. The excellence procures for it prestige !-

847. You say you think it would be edvantageous to subsidize young marca with the view of inducing farmers to keep them to breed from, and that the favried to that nurpose; but are you aware that the whole sum available by the Boyal Dublin Society in only £3,500 a year, or £100 a year to each county in freign. Giving a price of £10 to each young mare that could only subsidize ten young more in each county!—I said if the Society had the money. I am net at all throwing a reflection on the Society for what they have done. That is the way for them to go I say 27 the money is there. If the money is not

bure. I think it would be better to rehaid on the marre retion that the present system of giving prizes to more and foals. 843. When you any ambedding you mean give them sominations I ... Give them receivations as you did at

first. I think the old systom of giving nominations tended more to do good than the present.

849. You think it would be better to give £100 to folly farmers than to give £100 to twenty farmers !-

850. Mr. Wanson,-You are only breeding thoroughbreds I-Yes.

851. Do you find that hereding thereughheeds pays better than breeding half-breds 1—Indeed. I do not 852. You do it as an amusement 1-Yes.

853. It has not paid nearly as well 1-Up to the resent it has not paid at all. I won't say that, for I have got £1,000 for a three-year old. 854. How long have you been breading thoroughbreds !- It is only four years. -I hope I will.

855. You have hardly had time to map the results ! on I was. Your land is some of the best in Ireland for 85t. Your lang to e horses !—I think it is

857. Perhaps the besti-It is certainly the foot that every thoroughbred I breed has extraordinary 858. That you attribute a great deal to the land ?---

A great deal to the land.

869. Is the experience you have had of Hackneys the personal experience confined to the Hankneys you rade belonging to your relative in Suffolic !- Exerc-

what I have seen in shows. My use of them were confined to these beener 810. Do you know how they were head b-T don't

861. You don't know whether they were Norfolk or Yorkshire !-- I think they were both 862. Were they redigree horses half think they

863. Do you know by what stallion !- I don't. I know he gave £280 a piece for seem of them 864. It is possible they were not pure bred Hacktype of Hackneys, quite as good looking as I have sour

as town anows, 305. You have no particulars as to their politree? —No. I should not place much value on it if I had 366. You would not place much related on a Hushaya having two or three grouns of the thorough-hed i—The cross would be too extreme, and I deat?

think it could ever his. 867. I mean a Hatkney horse having two or three ceases of thoroughbred blood, you would not place

any value on that !- I would much prefer him to one 805. Are you name that a great many bornes ask!

an Hastmays in Yorkshire have a large admixture of thoroughtred idead I—Yes. 869. You profer that to not having say !- Yes. den't shink the Hackney blood over-

saters the thoroughbred blood i-No 871. You would modify your opinion of the Hackness or i. and woman arrangy core opinishs of the SHAGORIY if he had a good dead of theroughbred blood 1—16 would make him better then if he had not. I am not narrownized about thefolorys. If a man likes to make a fool of himself as I do hreefing theroughbreds, or if a man likes to make a fool of himself as I do hreefing theoryphiced, or if a man like to armse himself bringing over Hackneys, well and good. But I do think that where money has been given by the State, it is a great abuse to answere the breeding of beenes of that class. They may be very nice and very minition. We have they have fitched great prices, though my imannow any nave littless green proces, monigh my im-pression in that the proce is antirely going down, and that is will go down entirely. They are vary mice to drive about, but they only tood to do indus-

to the leveling of high class hunters and hurrows access.

872. You are speaking only from personal ex-periouse i→What can we speak from except personal experience !

875. It is rather a greening condemnation to talk of them as barndoor snirals of no staying powers when you have only had experience in Suffelk !-- I form my emission from the type of animal I see at shows, that they are thoroughly unstited to in any wan improve the breed of hunters or high-class houses. you sale Mr. Wimbush or Mr. - where he gets his

highest priced carriage homes he will tell you be gets them all from Ireland, and there is no Hackney blood 874. At the same time you don't prefess knowledge as to the broad of the Hackpers in Yorkshire !- Major C. W.

875. You said you would register a certain class of horses with only a stain in their pedigree if they passed a competent Board 1-Yes. 376. Do you think that those horses that have so much of the thoroughbred in them have any advan-tage over the pure thoroughbred horse 1—No, if you could get a Stad Book home with that strength.

877. Could wee

877. Could you buy that horse cheoper !-- You would have to breed that class of horse, I don't see where they are to be got now ; a horse of type Lord Ashtown asked me about.

578. You don't know many of that classof horse!-

Years ago there were a great many in the South of Ireland when men hunted them. Califrate Fair you would have forty or fifty hunter stallions there that covered in the season and were

houted all the winter. 879. These are few of those left 1-Very few. 880. You would not reguter any house with only a small stain, say one or two thoroughleed ecouses and no motter how good his stock "I would not 881. You deaw the line at horses with only a stain in

their sedigree !- I say the great difficulty is to draw 882. Would you follow the lines laid down by the Hunters Improvement Society in England !- Yes, I

think I would. I know their dams must have won races or something

884. Or the dame' ancestors 1-I remember when readily the auxidication at the time that I considered they were well thought over. 885. Mr. Warren.-Do you think it would be

poligrees are very more myself. I have had over forty years experience baving and selling horses in large numbers and I have got a false pedigree but twice in

886. You are peetly well known!--I am pretty well known. If you get a false pedigree somebody is sure to come and tell you; they did tell me and I took proceedings in both instances.

337. If the Royal Dahlin Scriety had the funds at their disposal would it be worth their while to ter and find out the records of those mores so that they could have the best knowledge b. To form a Hanters' Stud Pook !

888. I would not go so for as that, but where any reouris could be found that they should be registered and bept-would it not put up the value of the breed !- It would be a hard thing to do and an expensive thing to do, and I don't know that it would repay for

the trouble and expense. 689. Would not foreigners give more for animals if they know their pudgeted—I don't thick they

890. Sir Walter Grange.- With regard to the hreeoling of muces that won prints at the last Dublin show—I am sorry I have not the calalogue—there wrere larger prices offered for brood mores than for any other class of animal, and yet that class was very any observance or human, and you not have no manufactured its the breeding of the animals. They would be what you term a heavy Irish mare, a strong Irish mare. The owners do not seem to know how the animals are bred-would it not be of great use to the country and to those who visit the show to know !-I cannot speak from experience, because I was jodg-ing another class. I have never been judging the rearres, but I am always judging at the abow. I think you have got pedigross with some of the marse. I thought must of them did get their pedigross in the

591. Even in the three and four year old class

where there are 200 so tries there are many of the

mares whose pedigrees are unknown—is not that add:
—It is, I should have thought you would have had the poligrees of most of them. 592. Is it not rather strange that the Royal Dukin Society should give large prizes without the name of the breeder bring insected upon !- I think it ought to If you get the sire and the cam you caple certainly tell where you got the more.

893. It is a general topic of conversation with

these who visit the Dubbn show, this wast of pedigree with regard to the breeding of Irah house -I think it would be better to have a more entered without a pedigree than to give a pedigree without the name of the breeder. Of course if you gast the pedigree without giving the zone of the breeds; you cannot prove anything

594. You have risiden hunters that you class as not equal to the Irish horses. You seem to throw a deple as to whother they are not bred from other blood, different from the way I ish hunters are bedhave you any knowledge at all as to the way those animals were bred !- I have only the knowledge that they were English bred ones. 895, I don't know of half a doesn breeden in

England that breed except from hunter mores by thoroughtered hosts f.—Then the question arises how were the hunting marce keed. I cannot tell you about that.

898. What is the extent of your experience shoul those inferior homes in England !- It was when hast ing in Cheshire. I rools many of them, I should think sixteen or twenty years ago. 897. Was that the time you speak of as having

been in Suffolk !-- I have been in Suffolk a good deal 898. You are not sure those animals you describe on Hookneys were not bull-hard Suffalk horset-Quite certain. He had three diminst breeds. He had Hackneys, Yorkshire mares, and Cleveland Bays.

He had 120 breed rastes on the form. 819. Was it possible they were not in condition whom you rode thom, they were so soft that they took three hours to come brack!—They were in fair on

ditton enough. 900. I think you will admit that at a public inquiry, and in the case of a great sottority like you making such statements. I should consider armel

rearies unless I put these operations to you. It is a a weaping charge to bring against any particular breed of animal that it is not, not useful for the purpose you speak of, not oseful for a driving home in etu-parison with the first house!—What I call a driving home is a home you can drive for two or three house a country with an home that the second that the second that at eight Irish miles an hour, that in ten English miles, and that he can keep on and come in and not

mind it. I never saw any of them that could do say thing like that. 901. That is the snimal f select to drive. I drive a good many of them thirty miles to London, and I do not find that state of things. Some of them are Irish bred and some English hred. I never come across any of these soft animals. There was one reark you toule, you said if two gentlemen were appointed to select the size to put the marse to—don't it strike you that there would be seems danger of putting too much responsibility into the hands of those two gentlement—How clee can you have it. You cound

send a board of five or six all over Ireland, and as to appointing a different lot there is no responsibility of all, and I don't think you will get men capable of detag it if you say two men in one county and two men in another. I think the men you do get ought to be perfectly independent of the country.

901. The accrety would be to blame if those two continuen gave advice not remunerative to the breader. It is always risky to say how a particular animal will breed. Don't you think they would be taking too serious a task even supposing they could find two gentlemen !-- You know it is not compulsory warm any uses to send bis more if he does not like, and although breeding is uncertain, still if you mate If a mare is but in one or two points I take it is a bad thing to give her a stallion having the same had points. The only way you can do that is to have two good men. Great care should be taken in the person see only way you can so settlif to have two good men. Great care should be taken in the men selected. They should know their husiness the men that do it. That in the most certain way. I

think it would be a very good plan if it could be done. 903. CHAIRCAN. - You have had a very long and a large experience, speaking generally, but confuling council to the hunters and high class horsess horses wen have spoken of, would you think there has been any deterioration in the quality during, say, the last twenty wears !- Well I don't think there is, my lord, but it is the general opinion that there is, but I think there is not. People my it is impossible to flad there is not. People say it is impossible to find homes new. I think what leads people to say that is that there are twenty people looking for borses now

for one looking for them thirty years ago. There were cartain looking for them thirty years ago. There There is burdly a district in Ireland now

904. The demand has very much increased !- Yes, 505. Increased usuch more lurgely than the species

\$05. And the quality has not deteriorated !- There are as many good hornes letel in Ireland so ever, 107. There are more horses bred !- There are more

908. If the quality is maintained there ought to be very money more good horses !-- Yes, there are more houses and coopers. Every county has two or three gentlemen who, more or loss, deal in horses.

was not so twenty or thirty years ago 909. What kind of horses are used for purely agrienitoral purposes in your sart of the country !- Light. active horses. Heavy horses would not do. The firmers have such distinces to draw their hay, and go

to market, and draw their touf that heavy horses would not do. These titule horses bring their ton-anda-quarter or their ton-nod-a-half along the road and think nothing of it. 910. Do you think the produce of the Hackney stallions of the Congested Districts Board have found

their way into the county Clara !- A lot of feels come in last November, a drawe of feels that come from Connemaca. They said they were by them (the Congusted istricts Boards' stallions), but I could not tell you. They sold for three and four pounds agines. I know they were from Commentes. That is all I can tell They said they were by the stallions. 911. What become of them !- They were bought

up by the little fermore at three and four pounds \$12. Yearlings !- Oh no, fouls. It has been a trade for a great many years. They drive them in droves of therey or forty over the ocurtry selling

them as they go along. 913. Have you any personal knowledge of the extinue of the West under the Congested Districts Board !- Well, I know the Connemam pony-whatused to be the Commenters pany. I have been through Commenters three or four times. It is a very beautiful country all through it, through the mountains, and I new the numais there.

914. You never bought snyt-Oh! I have had several Connemns posies. I bought them for my children. I had them when my children were young They were nice little animals. They had beautiful blood heads on them, rather plain behind, what we call oct-barmand, but good animals. I don't think you could breed snything but a pony in Consensure, you know. In fact I don'ts if it would not pay the farmer botter to have something else-mules, or some thing of that sort 915. Mr. WRESCH,—Have the fairs at Spannishill

deteriorated very much during the last fifteen years? No, there were a good many colts there this year. 917. There has been a full in account class horses? -Certainly, or in third clean become 918. While good borner are desare than ever, third

class horses are very much cheaper ?- Yes 219. Do you know if there is a Shire stallion standing in Essis 1-I den't know him.

Mr. WRENCH.-It is there 820. Mr. La Topenz.—The farmers who bought the feels at three and four pounds spices have been in

the habit of buying from 1-Yes, they come every your, droves of them. They come to the market place in Ennis and stand there two or three Saturdays. \$21. What do they do with them 1-They are bought by the small little jobbees living up in the

bills, and they are hought by the shopkespers in the town of Ennis who drive traps with them. 922. Do they use the fillies to breed from !- No. they are teo assall.

223. Lord Asstrows.—Do you notice an increase in the light weedy unimals at the fairs you go to i do not know that there is so much of an increase in

924. Do you know what I mean-a light cherr class 1—Yes, I really would not like to my because I do not look much at them. I look out for a different

925. Are there pleaty of them about 1-There are plenty of them about

925. And also the other class, the nondescript hairy legged raiseal !- Yes. 927. Suppose a farmer has a more that won't bread to a thoroughbred would you not sooner he bred with

a half-hred horse !- You are putting use into a corner, saking me to decide between what I call evil \$28. It is rather hard to say that the farmer if he has a more that will not breed a hunter should cut

har throat?-You know that if he counce breed to get a hunter or a good harness horse-if he slow not breed that animal the animal he breeds won't pay. 929. I would like to see some size that would give the farmer a shapes L. I sive him avery chease. If you give the former a thoroughlood horse at the same rice as you give the other bress very few of them

will go away from the thoroughbred horse.

930. Mr. Wannen.—Do you know Mr. Martin
Moylan; don't you know his Shire horse?—He told. me he had no thoroughland home, he saed to have two or three

931. Do you know this Shire harts to be there !-\$21. Don't you know he refused a hig price for

93). The Craranas.—Is there mything you would like to tell the Commission !- No, my lord. your disposal. I will answer you snything I think I can with pleasure.

934. Lord RATHDONNELL -I think you said if there was a small Beard formed you would not object to it admitting certain helf-bred horses as registered sizes of passed by the Beard LaIf the Beard was a con-935. I think that would rather answer Lord

Ashtown's remark about the half-book horses!--Yes. 956. The CHAIRMAN .- On that point you don't object in itself against certain half-bred bornes or sires, hub on think it necessary to draw the line somewhere. If the half-bred could be exagnized and passed by some competent authority you would not object to u

horse so ressed !- That is so 937. Have you say idea of what the general value of a thoroughbred stallion in your district would be "the cost price! I is what they are worth!

138. What was given for them or what they are
worth! I should think there was not much given for

939. Mr. La Topome,-You would get a good one for £2001-Yes, if you went judiciously about it. They are a chance animal to buy. I would not like morning, but I refused. to take a contract to get two good thoroughbred 941. The CHAIRDAN .- You have not done that you stallions for £3,000. 940. Cel. St. Quinven.-Don't you think the often !- I was acting for the Royal Dublin Society.
I am soury since I did. The poor bosse was killed theroughbred home to get hunders is a home unders on its way back. I was very near telegraphing to for reging which is a left too slow, and he is probably the Society to know what I would do. a big baped, short legged useful animal. He is the

one. I think something like £100 spices. There are

some of them you would not like to give so usuch

ARTHUR BLESSERBUSSET, D.L., examined. 942. The CHARREST .- You are resident in the seen some of the young ones sold. I saw some last county Kerry !- Yes, sir. August sold at Killouglin fair; the object, I think, 943. And a Deputy Lieutenant for the county !-was two years old, and they fetaled wretched prime.

944. What part of the county do you live in !-There miles from Tesles, 945. I arppose that part of the county is not in the converted districts !- No ; it is not in the congreted

districts. 940. Are there many horses heed in that part of the county !-Yes, there are a good number 947. Who are they bred by !-Beed by the farmers

38

Oct. 21, 1966.

Major C W.

about. 948. Small farmers !-- Yes, large and small.

949. What would be the usual size of the holdings and the condition of the people!-Well, the holdings are not very large about there. 950. Do you breed become yourself!-Yes; I have

for nearly the last twenty years.

901. What class of bornes!—Well, latterly I have been breeding from thoroughbond horsen altogether. 952. And what formerly !-- I had formerly an American home, an American trotter, and got rid of him ; he was not at all suitable, 953. Mr. LaTouche - Why !- Because his produce

were no use at all; very bad 954. The Charmas.—You are breeding from thoroughly els !—Thoroughly el sires altogether. 955. And half-hard mures!—Half-heel mares. \$56. You had an American house of your own!—
I had, he was a very fine loose, but the product were
very bad, indeed; they were not saleable, and the farmers about that loved from him did not at all like

the produce-they could not sell them for any ories 107. What were they deficient in 1.—They had big heads and were slack in the loins, and bed leoking horses altogether.

958. The sire was a good looking horse!-The sire was a very good looking home, and a count horse; but a great number of them came unsound, sithough the mares were sound in sport cases. \$59. In what way unsomnit-They had curbs and spayion particularly

950. Do you know how the home was hred?-1 bought him in America; he was in the American Treeting Stud Book, I believe. 961. Then you returned to the thoroughbred!—To the thoroughbred. 962. Have you a thoroughhred horse of your own?

963. What are the general kind of sires in your part of the country !—There are some thoroughbyed orsen; there are some east beens and half-bred horses; very inferior half-bred sires.

964. What do you menn by cart borses!--Well,

there are some Shire become and Clyderdalan

965. Any Harkneys 1—I believe there is a Hack-ney at Dingla and at Cabirriveen. Bif. Well, Dingle and Cabirciven would be some way from you !—Yes, it is a good distance. 967. Have yon any personal knowledge of what they have produced, the Hackneys!—Well, I have

968. Fetched had prices I—Very bad prices. 969. What kind of prices !—I saw the second price yearling sold from Cabirelyon for £5 15s, and I saked the price of a two-year old reputif; the man saked me £7 10s, I am sure he would have taken los. 910. I suppose you don't know at all what kind of maree they were 1-No; I don't know what they were

is enstrated and turned into a hunter !- Yes, tore other. If you get that seet of borne and it is stated he is around, the foreigner stops in no matter how alow he in. I bought a horse at Newmarket and a

foreigner offered me £300 profit on him the nest

971. Were there many of them at Killorglin fair!

—Well, I saw four or five myself. I was not looking 972. And what is your experience, to come nearer bone, of the produce of the Clydesiales !- Two come into Traine, and stand in Traine on every week for one day a week, and then the other days they sand

at their owners' places. 973. What kind of mares are put to them !-All descriptions of mores. 974. And, as far as you can judge, with what results b... Well I think, with had results: the ferness prefer the thoroughbred borns, but they don't like paying the fee. 970. What are the fees charged for thoroughlood bornes !- Three pounds, I think, in the fee for all thoroughbred horses about there. What do they charge for those Claveland

bornes !- I did not mention Claveland, my lord, but Clydenials, from 10s. up to 30s. for all the others, the half-hered ones and the cart horses, for to \$1. 977. Which do you find the farmers yesfer, the half-bred or the cart borne, I think you said they charge the same feel-About the same fee; I think they go mostly to the half-lored once, they seem to think that the thoroughbred our house is too heavy. 978. What do they want for agricultural purposes? They want a light horse. 979. I think you said there were two out home

sires !-- Two come into Traine, but there ere more 980. How long have that been in the country !-Well, these particular ones have been two or three years. I think, but there were other eart borses before 981. Then there must have been a certain amount

of demand for them !- But I think they would always go to the thoroughbred horse if they could get him at the some figure. 262. Do you suppose that would apply equally to the Hackney !- How do you mean, my lord! 983. I mean if they could get the thoroughtred at the same for as the Hackney, you think they would

prefer the thoroughhred !- Oh, certainly 984. Then you think the fee is a very important ousideration !—I think it is ; very, down there. 165. What kind of mores have you in your district generally t-Well, I generally notice they sail their best mares; they only some to keep the ones they caunot sell, 986. Who do they cell them to t-Dealers come down to all the fairs; Castleialand is a large fair, yet are dealers from all parts of Iroland there, and foreigness buy horses there, too.

987. Do the foreigners buy through dealers, or by memselves !-- I have seen them buy themselves there 988. In your opinion, has the breed of hunters and homes of that close deteriorated in your district, or are there as many good homes produced as formerly!-

No; I don't think there are no many good horses produced in Kerry as there used to be, and I think the reason is there is not so many thereughland some as there med to be, and there are a great number of very had worthless sires-common hard animals-that

you really could not say what breed they were, a lot of these ourt horses. 349. You have said just now that the farmers are very much inclined to cell their best mores, would not that have a very had effect!-Ob, yes, I think that certainly has; if they could be induced to keep their

good mares it would be a very great thing. 990. What would you suggest to improve the bread of horses Land there is none industries held out to the farmers to keep the good mazes, and to have good thoroughbred stallions there, I think that would greatly improve the brood.

991. It would be impossible, would it not, for princip enterprine to cupply what you call a thoroughly saturactory thoroughbowl stalkon at competing paless with the cart horse and others !- It would not now across to have a good thereoglibred stallies down there, because they would always go to the chess house in preference.

392. Are the class of occupiers who breed unuklo to pay the money 1—Some of them, I think, are unable, hat there is a great number who could very well afford

993. They are tempted by the absorption of the interior horse I—That is it, I think. 994. Can you suggest any way of indusing them to keep their nazes?—Well, I think if good prizes were given for young moves in foal, it might be some inencoment—in Seal to registered sires, and, I think, the subsect of the Royal Dublin Society of 1894—I think that was the your when mason were nominated -I think that was much better than we had for the last couple of years, that was when the mores were

20%. Do you know whether any recommendation to that effect has been made by any society in Kerry !-No, I avenuet may; I am not un the committee my-

sell 936. I suppose there is a society of that kind, is there not 1-Oh, yes. 997. Lord Assrows.-You say you have been

loveding homes about twenty years yourself!-996. So that you ought to have a pretty good idea

by this time what is the most paying heere to breed ! 999. And what class of more would breed that

harso t-Yes.
1000. Do you think the unoron in your district are

really camble of breading houses that would pay the farmer if he put them to any sire !—I do; there are good, large mares about Trains. Of course, in · Cableciseen and Dingle way, there are much smaller mayes, but about Trales it is very good land, limestons 1001. Is there much tillage !- There is a fair

assessed of tillage. 1002. And, I suppose, they want a light quality same to work the land?—Yes, lightish. 1003. But you say the Royal Duhlin Society's scheme, the first scheme, for nominations was the heat, what is the reason that you think it was better to nominate the marce instead of giving prime !--Well, because I think more marce used to go to these regis-

tered aires then. 1004. When they get nominations don't you think it helped the size owner to keep a better sire, he got

thoroughbred horse so much now at all, they go to the chesner sire. 1005. In fast you think the old nominations chesponed the thoroughbred sizes for the farmers !--You, it made them go to the good airm more than they

1006. Sir T. Econorpo.—Horse-breeding is a large industry in your district !-- Yes, there is a good deal

1007. But you say you have not a sufficient number of solitable staffiguret-No, I don't think there are

encogh suitable horses in the county 2016. Are there many of the old bored of mores there still !- There are some

1000. They are discinishing !-They are, certainly. 1010. Have they been bought !- No. I think they are more dying out now.

1011. What class of horse do you mostly pro-duce!-Hunting horses and harrens horses. 1012. Which are the principal fales with you !--

horse fairs in the year these, and Killinglin fair on the 11th August, that is I suppose the largest horse fair.

1013. What class of locuses are sold at these fairs now, do you notice whether they are better than they used to be or worse!-Well, I don't think they are so good as they were fifteen years ago, but I think they are getting a little better again, the last few years they have been getting better.

1014. In that ewing to more care being taken in

hreeling houses !-- I think this acheme of the Royal Dublin Society has helped the breeding down there a

1015. And you said that a good many herses are bought by foreigners at these fairs !- Yes, I have soon formerers buying there. 1016. What kind of horses did they hay !-Well, the

trooper class mostly. I think, and some better class. 1017. Are there many horses enitable for troopers preduced down there 1-Oh, yes, there are a good number, a good number of treopers benght in the 1018. Lord RAYEDGRYSEL.—You midjust now that on meleowed the Rayal Dublin Society's scheme of

1896, in which they neminated mores to stallions, to the present scheme 1-Yes. 1019. What reason do you give for that !- Well, seponing the borns was esseding at £3, the sire-owner was cold \$3 by the Royal Dublin Society and the

farmer had only to pay £1 for the certice of the thoroughbeed home, now be has to pay £3 for the service of the theroughbred, so he goes to the chasp borne and there is not so much breeding from thoroughfred bress as there was then.

1020. Then you have sare shows, don't you by 1021. You give prizes there to means t—We do.

1021. They are situated to a registered stellion t—

1025. Did you have many muces at the last show !- No, we have not had many for the last couple of wart.

1024. Not since this system come in 1-No, we have had very few mores sent in for prizes, I don't think all the money was given away in prices at all, there were not mines enough to give it to.
1015, Under the old system you mentioned £3 as he price of the etallion !- That is the price the ctal-

lions were in Kerry. 1016. And £2 went to the owner of the stallien?-Free the Royal Duhlin Society. 1027. And the owner of the mare had to pay #1;

did you ever know that the stallion owner paid my of the £2 to the farmer, thus serving the more for less money !--I have heard of it, but I have no proof of it in any way.

1028. Col. Sr. Quastra.—You had a very colohrated breed of posies in Kerry for many years !-

OH. St. 1686

ATT) TY Mensonal Property of the last of the last

1019. In certain parts of Kerry !- Near Killor-1030. Are they still in existence to the same extext as they were !- No, they are dying out sitegether, you hardly over see a posty there now. What he replaced them. Has my home replaced them 1-Well, there is a very mixed breed

1022. But it need to be a very increative tends for the factores who originally head these pomies, was it not; they used to sell their porter well ?-You. 1933. What is their chief industry now. Debered other classes in their place?-I think they there posies, they are small houses that are very little value now.

160). Would that country that used to produce three praise produce saything better!-Well, where three posies come from I don't think it would. I think the pomies are the racet suitable thing for that port. It was from up in the mountains beyond Killorgilla that these penier used to come. It would not year a borne.

1015 Mr. La Topone.-The part of Keery you live in it not under the commission of the Counteled Districts Beard I-No. 1016. How far are you from a congested part ? -Well, Dingle, I think, is the nearest to me 1037. All to the west of you beyond Tralec !-That is the congested district.

1058. Are you acquainted with these parts of your county !-Well, no, I have not been much there. 1033. Have you been to Cahirriveen !- No not 1040. Do you know the part down south of you about Koussers, Waterville, and Smoon 1-No. I

1041. You have been engaged in home breeding in the county Kerry for twenty years you say !- Yes. 1042. Are there many readent gentlemen in the ecusty Krery who carry on bone breeding !- No. No. I sloat, but farmers broad there. Lord Castle-

don't know that part.

resir breeds borons now at Killsoney for the last six 1014. May I take it that you are probably the mort western resident gentleman in Kerry who is engaged in home breading !--Yes, I should think I was,

1045. In fact there is no gentleman, no harded proprietor, who lives west of you!...Oh, there are, but they don't breed horses. 1046, Mr. Hurley, of Feedt, I suppose !- Yes, and

Lord Ventry ; he is at Dingle. 1017, He is routh of you 1-South-west. 1048. You say there are Hankney stallions, the property of the Congested Districts Board, at Dingle seed Cabirerroon!-I believe there were last season.

1049. Do you know by whose recommendation 1050. Were you yourself amenited as to the most mitable horse to send down there !- No. I moved heard saything about it.

1051. Are you aware who was responsible for the reconstruction of the Haukney boso down in your county !- No, I am not. 1052. You said in unawer to Cel. St. Quinton that the breed of ponies that came down from the moun-tains near Killerglin had deteriorated i... They have

gone out altogother, you hardly ever see a pony there 1053. I take it that that is owing to the use of

increoper stallions !-- I think so. 1034. Is it your improviou that the use of Hackney stallians is likely to restore the breed to its former

condition !- No, certainly not.

1055. Do you think that a small short-legged foroughlived home put down into those parts of Kerry samiling at 5s. a more would be more expensed to improve the breed !- I certainly think it would 1056. Do you think its stock would be able to exist !- I think the stock got by a thoroughbrod home would exist as well there as stock got by a Hacknes; I think they would be just as hardy as if you by a Hanksey. 1057. As a matter of fact the animals lend there in the western part of Karry don't have to spend the

winter there: they are generally sold as fools !-. The greater part of them are; forls and yourlings. 1058. You yourself are not aware of any gentleman engaged in buest-henoling in Korry who was countried as to the best sort of stallions to be sent down three to improve the breed of borner !- No, I was not. 1059. Mr. Wassen.—That is rather a rash susption of yours, that you think the produce of the thoroughtroi would be equally well also to stead the climate and conditions of Korry as the Hackney; you dan't speak from experience, I suppose !-Well, I

have never had Hockneys sevectf. 1000. You don't speak from personal experience !-No, certainly not. 1961. You have been breeding borrer for the last twenty years; have you found it pay !- Yes; I did not find the American tretter pay

1062. But since you have taken to theroughlowle we have found it nay !- I have found it may fairly 1053. Did you happen to be at the Agricultural Show at Trains on the 14th !-- I was. 1064. You were not judging, were yout-No, I

1665. Did you see a dove of polits mader two years old for which Colonel Crosbio gave a special cup !-- I really did not; I was engaged at the jumping most of the time; I had not time to go; I had to go round with one of the judges who was not judging home, and I really had not time to go through the house

properly at all; I lead very short time. 1056. You did not see that close 1—Yes, I did see it, but I do! not take much notice of it. 1007. Do you know how many entries there were in it!-No, I don't

1008. You don't know whether there were twelve or thirteen entries?-No. 1069. Do you know what won the first price, sad what you the reserve !- In the class for Got Crosler's oup I think the winner was by " Waterloo 1070. And what was the reserve I-I dea't know. 1071. You don't know that the reserve was by the

Hackney stallion at Calaroveen !- No ; I don't 1072. You are speaking, I suppose, of the district of Trakes 1-Xes 1073. I think you said that the factors there would

use a thoroughboad horse only that the lowest fees were #31-Yes 1074. Do you allude to the one borso that was registered under the Dublin Society's scherce !-- No; there are three horses I think there registered.

1075. Do rou know that for two of these theh fees for farmers' half-bred maren go down to £15-1 am not aware of it 1016. You don't know that it is on their postert?

No, I don't; they are not supposed to take less

than £3. 1077. I suppose if they put it on their posters that is pretty good evidence that they do! - I have not seen the posters. 1078. The CHARLEMAN. - When you say that you think the produce of the thoroughbred is an well expable of standing the climate as the produce of the Hackmay, of course you are speaking generally from what you know and have heard of the relative merits of the thoroughlood and the Hackney i-Yot, my lord.

1070. You think, in your opinion generally, the thoroughlend is as hardy and has an much marries,

Printed image digitised by the University of Southampton Library Digitisation Unit Printed image digitized by the University of Southernation Library Digitization Unit

or more stamine, then the Hackney !- A great deal 1080. You are not comparing any existing produce of theresyltreds or Hackways, because you have not had an opportunity of deing soi—No. 1081. Mr. La Trecus.—Have you found the pro-

does of the thoroughbred show any imbility to stund the climate of Kerry !- No. 1 have not, personally, 1662, The Constant .- Do you know how long the Harkneys have been standing in Kury!-I

believe the oblest specines is two years old. 1083. As a matter of fact, the climete, especially on the seabourd, is remarkably mild! - It is, 1084. Lord Asurrows.-At the lost thow of the Boyal Dublin Society, I suppose you may take it for granted that the best farmers' marts from your dis-

trict were at the above, at the above major the scheme? -No, I don't think so; the reason so few were at the last show was it was not advortised, and I did not know myself that there was going to be a abow mutil

the meening of the show 1065. Poor entries 1—Yes. 1085. Were the mares good or had 2—They were

not good moves, and they did not send there in from 1057. Were meet of the marcs you saw there suitable for breeding a valuable borns under the astrone?

1058. They might produce a probable home i=Oh, Memberse yes, and some of their have 1989. The CHARGEST.-I would like to ark you about the Kerry posies that have disappeared, that is to say they have ceased to be pooried; in that owing,

ns, I don't think it was. I think there used to be a good donwal for these, but I think they got some of those had shouldown there, and Irial to breed them

bigger, and spoilt the breod. 1000. What did they want to be ed them bigger for if they had a good dreamd for them !-Well, I don't know; I suppose they thought they would feach more

money, but they made a sentake.

1001. They have not succeeded !- No. 1052. Mr. Fritwitteam - Was that the effect, do you think, of trying an out-cross which did not succeed i

1003. Trying a direct outeron which happened to tern out a failure !- They bred from much hoper horse-

and they were neither horse nor poules.

1094. Lord ANIEUWS.—Half carthone and half pony !- That was about it. The Countries of oursel

THIRD DAY-THURSDAY, OCTOBER 2280, 1896.

Present:-The Earl of Dunraven, K.P., in the Chair: The Hon, Henry W. Firzwilliam, Lord

ASSTOWN, SIR T. H. G. ESMONDE, M.P., LORD RATEDONNELL, Mr. J. L. CAREW, M.P., COLONIL St. QUINTON, MR. F. S. WRENCH, and SIR WALTER GILBEY. Mr. HUGH NEVILLE. Secretary, was in attendance.

Mr. SARURI USERER ROGERTS, C.R., exercised.

1685. The CHATEMAN,-Mr. Roberts, you are a member of the Home Breeding Americant -I am,

new lord. 1695. Are you also a member of the council of the Boysl Dublin Society 1-Yes, I am. 1607. And of the committee on Horse Ereedfar !-

Inn 1008, Have you acted as indre in home shows in Ireland 1—I have for some years acted as judge in a great many provincial above in Iroland. 1009. Hove you noted in England at all as judget

1100. Are you personally interested in the subject of horse broading-to you broad horses yourself!-1101. When was the Irish Horse Breeding

Association formed t-The Irish Horse Breeding Association was formed in the early part of August -that was the first time. Some gentlemen met together for the purpose of forming an association 1102. Can you explain to us the object of the association!-The object of the association, at my rate at present, was to obtain evidence on the subjets, generally, of horse breeding, and more partico-larly with regard to the effect which the introduction of Hackney sizes would have in Ireland, and also to obtain the views of gentlemen interested in home

breeding in different parts of the country with a view to its being laid before you in such form as would secure your being thoroughly well informed on 1103. Does the association propose to make a report—to ask this Commission to receive a report !-- We have not come to any determination on that We have collected a large amount of information which we will be glad to place at your disposal; as to what clay is to be done that will be a matter for econideration by and by.

1104. Are you in a pesition now to make us equivated with the information !--Our secretary less all the information we got; he is here, and has it in a convenient form for the Commission. 1105. He is coming before us presently !-- He will

be before you to-day. 1106. Have you round a general knowledge of Iroland—the whole of it as request horse breeding t— Yes, I have lived in Ireland -my life has been spent in Ireland, and in a great many different parts. I have taken a great interest in horse browling; I am foul of houses, and since the Royal Dublin Society

took steps with a view to the improvement of home beeding I have taken a very notice part in it.

1167. Would you be able to give us generally a
description of the different types of bosses beed in different parts of the country !-- I think I may state that Ireland, in regard to becombroeding, is divided into three principal districts—one occurris of the southern and western and midhad counties, the other embraces the northern counties, and the third the

western portious of the counties of Kerry, Galway, Mayo, and Sligs, and Donegal, perhaps. 108. And how about the cut I-I should have

said the southern, and eastern, and midhad districts; the northern districts and the western districts comprising part of Kerry, Galway, Mayo, Bligo, and s 29, 1838. g sel Uscher lebertg //a.

110.0. How do you dissinguish the different types clumous perhade in these districts—The first ulderist I have referred to, that is what I may not the millionit. I have referred to, that is what I may not the millionit, great exclusion growing the property of the state of the soil, and to great exclusion growing districts. Of Indianal is in to a great exclusion growing districts. Of Indianal is in the interpolate property of the state of the soil, and to the interpolate property of the state of the soil of the interpolate property of the state o

Ensestone and that is no instrumental in protecting good horses.

1111 As to the northern district I—In the northern district the tereshing of horses is confirm's northern district the tereshing of horses in confirm's northern what may privatuse be requirely terrated utility houses—that is horses for harmon purposes and general agricultural and useful purposes; as a rule of it not a religious proposes; as a rule of it not a

insure providing districts, not it in a district in which is like it is a first the state of the

erec lines.

11.11. What time 1—They were subject over 14.2. I never heave one of them to have a spaving or splint, or to be in any respect unsamed in his wind.

11.14. Analyse say there was Arah libred in them it—Three was a strong trace of Arah labod which I always understood moss from the introduction, into Countenare, of the Ember Arah by the Martin family.

concenning to the more than by the shartest many years ago; you could very easily trans it to the Conneasum portion at the time I speak of.

1110. That was preshally the aboriginal becomessed with Arab I—No, I have always understood that Coleand Martin, the owner of Bellinshineb, the teolated Araba and Berlin into the country with a view to improving the clause of profess and Economy.

view to improving the class of porties and keeping up the brend; it certainly had this effect.

1110. To what do you stribute the difference in the type in these three districts —In a great measure to the self-strib climate, and its some extent the hobbs self-strib climate, and its some extent the hobbs senderer, so of the people and to the first that in the senderer, so the people and to the distribe you wanted to the people and the break distribe you have summer on public of househ which induces features to breed handless of househ which induces features to breed handless.

breed hunders.

If It. Would yen my taking it generally that these districts produce the type of home which is best calculated to produce from the sell and almata t... I think

no.

1118. And how about the sires in those different districts; do you think they are but wided for the district which I have a but wided for the district which I have referred by congoing the seathers, extern, and middled constain, fundars a cory large number of good one. I confine up the control of the

1119. That is to say that the stree part on the register are naturally the best 1—We put no size as the register are naturally the less that a size is a good heres and calculated is improve the breed of horizes; he may not be as good as we would with, but it a sound heree, and we have got any information as to his stock being sound, we put him on the register.

1120. Do you know what prepartion, taking the south and midlands, the otion stallions bear to these on the register 1-1 could not say, m, leed, in the particular district. We have, I think, essenting over 100 thereugisted stallions in Trobud J. I on which that more not be convent; as in the arrivesture.

road may not be servent; as its the agricular returns many are returned that are not through lersits. This breeze on the Dallin Society Squain tends. This breeze on the Dallin Society Squain to Society. The servent of the Society Squain 1121, Squaking for yourself would you have any special not half-best insert—I do think there is a depletion to half-best insert—I do think there is a distributed former.—I quote of their particular datitle I referred to emperking the southers, causes and worknet owners, the servent is not the embryone with acree whetches, but so and the former.

theorogicized size, and I do think a half-feed as under certain restrictions neight will be admitted as a separate register and recommended for the use of farment theorogicout the district—surething on the lines of the Russian Emprovement Stockey, in England might be followed in the country. 1123. Union when restriction ?—I certain

think they should have a good steakt on the durit side of pure lalood, and be got by a therengiled horse.

1123. That would have to be determined by seas estilibrity 1—That, and many other matters, if I may to persitted to make a suggestion, would here to be determined by some committee or located of sea with amfiritient founds at their disposal to equipy estaff—a board in whose conjectory and knowledge the breedent throughout the country would have conference with the conference of the country would have conference on the contract of the conference of the contract of the contra

12. What is of the steps taken by the Roising was before a sulfilling in the the rection—First of all as many patch the controllent of tha htms; we require the an argument that of the whole as a magnetic that of the whole are present to the the statistic and the s

see reaction of the brees.

1123: There, on the whole, lating the evidence of the 1124 there are the whole, lating the evidence of the 1124 there are the see of the 1124 there are the 1124

lay of the great house fair, and I stood at the encance to the fair great in order to see the class of hance that word in, and I was statuthed to see the amount of weekly southern strains. This has their the statuthern and the second of the

denoges heren they can get without regard to his smillestions, and don't very much core what chas it saircal lay heed.

1157. Do you think they would continue to bread makes it paid there I—I don't think a warn with a

fars are a fland has any right to head hence.

1128. But probably it pays him !—I don't think it does.

1129. Then what would be bread for !—A man has a new, and thinks that he ought to kreed, but he

will find it be keeps an account that he has not analoss anything by the property.

1130. Do you not think that will, and I think it is arring itself now, but these variethed calmain will remain in the country for a considerable time.

1131. What do you attribute their worthlessness to 1—Breeding a last class of animal.
1132. Do you astribute it more to the hed mare, or

to fair before they are not rid of.

to the fact that the owner cannot afferd to pay for a good sire !—Ife weat go to n good sire, and he has a hal mare to begin with.

1133. To you mean he cannot afferd !—Well, he is

are siling to agend the accurry; we have had a goodhome at a very moderate service for and a bad hiseses at a very moderate service for and a bad hiseses at a very moderate service for a siling. Then these it but alone of the verb loads former, Clean II, then it but alone of the verb loads former, Clean II, there is the about of the verb loads former, Clean II, when second a time shows a good lasts of more cothibited, and have been surprised to find that formers which is the second to the second t

have been superfiest that they must their meres long distances for wast, a ryine; the middle class forces or a rule have a good class of nave—good, thick, best-ringged meres, and keesed a great sorty very good burses. Take Occomed, the centre of the largest bown breeding district of Jesland. At their monthly then I thick more brems are said than at any other this is Ireland, and a very good slaws of herees. 1136. What kind of aims building would they have!— —A holling with a whandlen of from £100 to

1136. Do they keep mare apacially for treathing t—May of them only they all work their mares they are men whom I think make it an object to hered a pool class of brane, and know that if they full to provious a good class for hunter or harmen purposes very filterly the midde with full in few some ordery purpose. The object cought to be to afm at breading a good lease, the contract of the same of the

ing a plann is pays remarkship well.

1136. Do these class of men in your opinion avail themselves of the services of the best stallion they can get 1—A great many of them do, but a great many of them do, but a great many of them go to a cheep been. As a rais, however, that class of farmer is ancient up at a great plant.

many of them go to a chesp hone. As a rais, howwee, that class of farmer in anxious to get a good stillies.

1137. At what age do they sell them 1—Two years up to four. Three years is the age at which they are booked for by the English cheeses.

16. Like any seems users property as some to the country below the five of and fully foll.

17. Well, then you come to another class?—

You have been a supposed to the country to the country to the country to the country, and they for some time to country, and they for the country to the country and the country to the c

The first of the third year again of settlement, and a sufficient of the settlement of the settlement

and about market of farmers' marses at a few of d.J.,
the state of the state of the state of the d.J.,
the state of the st

tion that he was to serve a certain number of mares at \$31.—They did not select the mares; that was left \$2, quite open to the incursor of the district.

I 1244. First come first served 1.—Well, of course the

stallion owner is maxious to try and getsa good mare as he can. In 1145. Do you know what fee was charged for that

acres 1—45.

114d. I don't quite understand, you made it a condition that he was to serve a certain number of more
scale year!—Yes, and beyond that he was not controlled as to price.

1147. What would be ordinarily stead at 1—He is

troited as to prese.

1147. What would be ordinarily stand at 3—He is
a horse that would ordinarily stand at £0, and for
thoroughbrods £15 or £20; he was quite that class of
horse.

1146. You made it a condition that he was not to bearing more than 48 notil the purchase-money not bearing more than 48 notil the purchase-money are started to the started transfer at the condition of the mild the purply of the owney, and repeat the three conditions to the condition of the owney, and the condition are forther conditions after that, 1146. Mr. ETZURIALAH.—When was the name of herest.—Bartistorn.

1160. The GRAIMAG.—In this district do you any other sizes.—Hashings or Givenhalls.—If there are a good not of the country of Linux and Linux

1151. I was not talking to seach in that sense, but as to whether there were say pure Hackney or cart stellions in this district i—No, I don't think so.

1162. Do you think that in this continent, eastern and unliked district the introduction of Oppissolists and Correlates would be a boundit—1 think it would run the house brooking in that district. 1163. On what do you found that opinion t—My objection to Hackneys is this, that I think they are

Q46. 95, 1800.

amenited to produce either hunters or high-dass harness horses; I think it ought to be the sim of every one to produce one or the other, and I think that a Hackney is wholly unsaited to produce one or the

1154. Do you form that opinion from experience i —I never owned a Hackney; my knowledge is obarvadian and information collected from virtural sources from time to time; I may say with regard to collecting information, that we have received several econvenientions on the subject, extends from which

will read if I may be permatted to do so. 1155. Would that come better from the secretary! -Very well, my lord. 1136. As you have just mentioned high-class harners horses, I think we had it stated in ovidence the other day by Mr. O'Reilly, that there was no special class for stallious calculated to get horness horses given at the Reval Dublin Society's Shows, and I see, on

looking at the eatslogue, that Clean I is for "thouseghbrod stallions under tlärteen years old, to get weightcarrying hunters or high-class harness borner." That, I pressure, is correct !—We hold that a thoroughbred horse is suited in every respect to get high-class harness horses. As a matter of fact, a very large number of the harmens horses that go to Lendon are from thoreurhbreds with half-beed mores; we have the eridence of the London dealers that the best ourings horses they get, the three-year old solts they buy in

Ireland, are the produce of a thoroughbred home out of a half-bred more. 1157. Then I am correct, I think, in saying that this complaint that was made that there was no class

for stallions calculated to get horness horses was not quite payret !- No. it was pot. 1138. It would only be correct to my that there was no class exclusively for stallions likely to produce horness horses !-- Yes, the working of that eless was

put in other very curyful consideration by the com-1150. Speaking of the southern, midland, and eastern counties, and of the stock bred by the strong

farmers, and so on, I suppose the majority of them sell is huntern !-- No, I should say that probably quite as many of them are sold for barners borses to hunters -I should think quite as many

1160. Mr. Wagners.-In that Class 3 or \$2-Ob. Close 2; Class 1 comprises all the houses whose throats I said ought to be one, 1161. Class 2 or 8 I said!—Class 2 I am speaking

1162. The CHAPRIAN,-You think as many are sold for hunters as for horness f-I think so. I have seen at Cahirmon fair sollections of colts, three or four years old, quite as numerous as the hunters that went out of the fair, and magnificent horses they were— sheely brown horses, standing 16 heath high. 1183. Mr. Prezyntatam.—The registered stallings

chearn by the Royal Dublin Society, are they chosen in the main with a view so the breeding of general purpose snimsle or hunters \$ - General purpose animals, that is the chieck, 1164. Can you tell us how the manes are hard in these classes 2 and 31—No, I could not tell; I have got no information as to that, but as a general rule

they are well heed balf-heed marges.

1165. No mixture of cars blood of any kindl—
They are free se a rule from any appearance of cars

1106. Also those half-hred bornes you have named, they are bred almost in the same way as the marasmainly thoroughbrod !- That is the half-bred I re-

econnend.

1167. You say there are a good number in the country !— You, very well bred homes that have pro-

thoroughbred.

1168. Lord Amerows.-Do you include in that district any of the western ecunites 1-Part of Galway -the cost part. 1169. And I suppose Boscoromen !--Yes, a con-

tuin part of that, and a part of Sligo. 1170. Sir Tuomas Emeryon.—You mid you thought small focusers could not breed horses at a mote Would you fix any limit to the size of the farm on which farmers much bread with profit full year

week depends on the character of the land, but I think a farmer holding a farm valued maker £30 has no bosiness beeeding. 1171. But a rosa above that might !-- I think m. 1172. Do you think that good stallous at a sless pute would be a help to small farmous?-They would do better than they are doing, but I don't think you

can expect to get a good classe of animal head by that chas of man; herelohire there has been a market for what I might call the utility horse, hat I think that market is disappearing rapidly—the bicycle and the motor our will be away with it altogether, and ther will become a drug in the market.

1173. You think high class horses will only pay in future !- Every breeder ought to sim at breeling the

bust have he can; if he does not quite succeed the minfs will come in for some lower surrose. 1174. Spenking of broad mares do you approved the system of selection t-Oh, cortainly, if you have the means of doing it. I think wherever public money is given to provide a stallion for a district there

ought to be concurrently a means of selecting the 1175. That is the system of the Congested Distriots Board-they select the marcol-That is the

right system, no doubt. 1176. Have you come across say specimens of the old Irish more?-Yes, I have, numbers of then is

different parts of the country.

1177. Has any record of pedignes been kept!-I never board; I do tocollect the county of Waterfell being famous for that class of old little more—strong

more with plenty of substance, short legged, god action, plenty of etunina. 1178. Do you find there are fewer or more!-I could not say, but I think there are quite as many; there are a great many farmers who try to keep on the old blood, said do keep the same blood in their families

1179. A good deal of care is taken then of poli-that the conformation of the Hackney is an infrier conformation 1-I do for the hunter or high class

1161. De veu consider his action is a true selice

and a medal action !- I do not. 1783. Do you think the introduction of that our formation and notion would benefit the rising class !-I am sure it would ruin it. 1183. Do you think it would benefit the driving .

ant—the hackney our class !—I am one it would not 1184. Mr. Wanron .-- You said that under sereful conditions you would register some so-called halfbred sires, would you register any of these until their that in every other respect he was exiculated to get good stock. If he did not turn out all right I would

get rid of him. 1185. What would you call sufficiently near a thoroughbred-bow many crosses I.- I think there ought to be at least three crosses; it would be very exceptional case where you would be jurisled in admitting a horse with less than three orsers. bably three or four strains of pure bleed on the dam side, and got by a thoroughbred horse, some probably not as well bred, and many others pechaps very nearly 1186. You have stated that in your spinion Hatkneys cannot produce high class harness horses !-

That is my coinigh.

1187. You have been at the Royal Dublin Sccicty's Shows !- Yes. 1188. Do you know how the microsle ere level that win the chief number of prizes !- Yes. 1189. Con you give us that in formation !-- I cannot.

1190. You have got no statistics-were any got by Hackney sizes !-- You, some of them were, Mr. Power's horses for instance, one some English horses, I have no don't that for show purposes the Hackneyn do very well; they win prizes, hat in my openion

their utility up is thure.

1191. You have no personal experience of Hackdelate about the introduction of prizes for Hasirney we would have been able to admit them into our show and safeguard ourselves. I some to the een-

clusion that that was impossible and from that out I have endeavened to prevent prime being given for

1192. Do you condenn all Hocksays?—Some Eastneys no very good loves. 1193. And have staying blood in them ?- Yes.

1194. And their action is not penading artise but from the shoulder i-You 1195. In the class for stallions in the show, although it includes enimals that one produce weight-

sarrying hunters and learness borses, it is confined to thoroughfred sizes 1-Yes, 1196. There are no prises for alter except thoroughbonds !-That is so.

1197. With regard to class No. 1, you would ent the throats of all the mores that class includes. you think that a practical way of getting sid of them?

—Well, I did not mean that in its absolute sense, but I do think that the meh who broed them do no

good to themselves or to anybody else. 1198. Do you think there is any likelihood of our getting them to give up breeding !- They will very soon get tired of it, there has been up to lately a sale for almost any class of horse you could produce in Ireland, that is lessening by deeres, and I am outto sure that the sole for the class of lorses that those men breed will disanceur altorother, there will be no

mis for them at a price that will pay the cost of branding.
1199. You ere sure of that !—I could not be sure, 1200. Did you hear the statistics given that the breeding had apparently incremed in those counties !

-I can quite realise that breeding is increasing. 1201. Increasing in the western counties as opposed to the others!—I am not speaking of those.

1202. But there are small farmers in the west !-I am not speaking of the west, 1203. The ORATIONAN. — We are confining our observations to the first district he mountisped the

south and east 1204. Mr. Wassun.—Then you said you thought

that in the districts you were referring to end having repord to eleanon 2 and 3 that the introduction of Clydendale or Shire or any other coarse blood would really rain the breeding of those horses 1—That is my 1205. And if it should happen to be the case that

in those districts there is already a large introduction of Clydesdale and course draught blood, don't you think it shows that these people, who have good Irish mares, are elle to keep to the right etrain, and keep their animals good!—In my opinion it shows an

enormous amount of damage has been done already. 1205. I thought you said there were as many of the good old Irish merce now as ever !--Yes, int I don't think of erossing those mares with Hackneys ce Clydeadalus.

1907. I om not asking you that, I merely say if that blood has been introduced and done no harm, is it not evidence that these men are able to take ours of thunselves !-- I don't admit that it has done no harm .

but the class would be better if these mairnals were not us the district.

1208. You relatit that there are some animals of that kind in that district !- I don't know. I connect spook of them 1209. Sir W. GHORT - You mentioned thorough-

bred sizes serving half-bred mares, and producter pood bred mere?—A half-head more is a more got by a thoroughbord horse out of a half-head more, size is

still termed a half-beed animal, she may have more but there is no definition of a half-bred assee as to the

number of grosses of parelend blood 210. You cannot define how this half-lived natural is head that you describe as a suitable animal to prodace beeness beeses !-- No. 1211. In the Dublin Show I see Class 5 "Mare

calculated to produce weight-corrying hunters or high class harness horses," did you see that class have 1313. Although large prizes were offered, there were only 15 entries, and I am curious to observe here that out of the fifteen entries there are only about four

outmaks of which the poligree is given at all, and there are some of them "Breeders unknown" "Pedigree unknown." Is not that a misfertune?-Is is a facilt, and the Dublin Society has proposed to correct that in future; it will not give the breeding of any been unless the name of the breeder is given. 1314. I think the Dahlin Society has been doing

an imperse deal of good, don't you think if they work to encourage in some way the particulars of the broading of these animals that come to the show being gives, I think you will be able to get that information !-- I think it very important. 1215. You mention Inspectors appointed by the Dublin Society. What positions do these gentlemen

hold! Are they vetoginary surgeons 1-No. We have reteriously surgeous to exagine for soundness, but we have not veterinary surgrous to examine as to conformation. We send out men of experience and we got them to examine the sives as to conformation

1216. Did you mention Inspectors for occasia districist-No; we have only one Inspector, our extent of registration has been very small up to thin 1917. He lives in Dublin b-He lives near Dublin. 1918. I take it from the suswer to Mr. Wrench

thet you have no experience of the breeding mares of the description exhibited in this class-mares calenlated to produce harness haven-you have no experience of broading any other than by theroughbroad horses !-- No.

1919. The CHARMAN.-In the district you see speaking of what is the general character of the locuses used for purely agricultural purposes !- They are what are called, roughly speaking, light half-brod horses. In that district for agricultural purposes there are very few Shire horses mod. They are chiefly the Trish half-bred mares that are used for agricultural

1220. In your opinion are they the hest exited for agricultural purposes !- I think they are for agricul-

1921. They don't require very heavy homes in Irohad !-- No, I don't think the heavy bence is suited 1922. In this district do you think there is any

tendency on the part of the farmers to sell their mares injuriess. The foreign layers have been picking up a great deal of very good marse throughout this dis-

1323. Can you suggest any way in which that might be checked 5—Well, there is a way I propose to suggest later on. . 1224. Perhaps we will take it later on. It would come on the general question I-Yes.

1225. I den't onte understand what you said in reply to Mr. Wrench. Do you know whether any Hackney stallions have been used in this couthern, Saward Under midland, and eastern district !-- I don't know any. I know there are Hackney stallions in it. 1326. You know there are !- There are.

1226s. You don't know what they are l—No. 1227. Nor whose they are l—No. 1228. I think you said they had already produced

some harm !-I did. 1229. How did you detect that !-- I merely gave that as my opinion. I have no way of detecting it. 1230. Do you think have has been done became

you know the fact that these stallions that you dissonrove of are there, or have you say demonstration. it!-- I have no demonstration of it. 1231. You believe the Hackney is inturious, and,

as the Hackney is there, you are quite sare been must be done !- Yes ; it is the inference I draw, 1232. Now, turn to one of the other districts—the porthern or western !- The western district-that is

where the nonice are. This district is altorether soited for breeding ponies-district No. 3, the western district. It is a mountainy district, a poor soil, and a rather bad climate, and that, I think, is saited only

That, I understand, covers the whole of the west! -It is pretty nearly the whole of the west, taking it up from Kerry; it does not take in Chire, but it takes in the whole of the western part of Galway

and Mayo. That is the district I have the most information about. 1234. Now, this district is only adopted to raise penies !-Altopother adapted to relains conies, and no

other class of horse, I think.
1225. We had evidence the other day that in Kerry the class of ponies disappeared altogether !- Yes, I am

aware of it 1236. That is to my, the penies disappeared, and n larger animal was profuced, not nearly so valuable as

the pony-lea't that so !-J think so.

1357. Do you know what they were crossed with ! -I den't know. 1238. Your experience of the western part of the country extends over a great number of yours?-It

1239. For shoot bow long 1—I have known Galway and Mayo since the year 1850 very well. 1340. In there are marked change in the character of the penies produced there in the last thirty years !--Oh, yes. Up to the time I left Galway, in 1874 or 1875, the poster of that western district had deterio-

1941. Mr. Wursen.—From 1850 ?—From 1850. 1242. The Crastenas.—Up to what time !—Up to 1242. Tot the time when I left Galway.

1243. To what do you ettribute that I. This was attributeble to the went of good stallings. The stallions they used were bad, what is called a meagred stellion, and I attribute the deterioration is the

quality of the animals altogether to that, 1944. The stallions were inferior to those need formerly !- They were inferior. The Arch blood died out and they were breeding from stallions bred in the

district and without any care, 1245. Your prectical knowledge of that part of the country ceased in 1875 !- Yes. 1246. What class of stallion do you think hest smited for all that part of the country !- I think for

the greater portion I would fall back on what preduced the greater portion I would fall back on what preduced the good animals before, that is the Bark or the Arab. I think for certain parts of the district the Webb pony would be the hardler animal and more soltable but I think for the other portions of the district either the Arah or the Bark or a small thoroughbond

shortlegged horse would be best suited for the 1247. In your expe mee were many posies add out of this district !- Yee, very large quantities of them were sold out of the district in my time: could see droves of posites going through the midland counties.—a hundred or two hundred of them—bought countens—a superior or we america or likes—bought et this first of Oughtenerd, Cliffice, Westpoor, and other places, and taken up by hewkers and drives through Ireland and sold on best they could. 1246. They remained in Ireland 1—A great many of them went to England, and a great many of them went to the onal mines. 1249. For work underground !—Underground. 1250. Do you know whether the state quantities

of them are sold now !- I can't my, but if the same cureber are hard now they must be sold, because I don't think the country could support thou.

1251. Welk of course you have not any practical knowledge of that part of the country since the establishment of the Congented Districts Board t-No. I know nothing of it. 1252. And you cannot tell us from your practical knowledge what effect the Hackney has had there !-

1253. From your general knowledge do you think the Hackney would be suitable to cross with these youigs I—No, I don't think it is. The Hackney is not a suitable sire to orons with ponies.

1254. They don't produce as valuable produce 1... No, I am sure the produce which will find its way into the midland counties and other horse breeding districts, and will be bought, perhaps, by the small farmers there, and whom turned out on good lead and grow to size and well fed will make its way and be used as brood mares for breading hunters or carriage bores, and that will tell on the hred of these animals. That, to my mind, is the great danger of introducing the Hashney blood, for you count by any manus prevent it from parmeting to those districts in Iroland where horses of the well-bred class are bred. Of course if it was possible to build a well around them in a certain dis-

trict and leave the Hackney there, then they will do 1255. Mr. Wrancu.—Are you quite ture they would not jump the wall!—We have heard of their 1256. The CHALESTAN.—Do you think Haskney blood would improve ponies !—I don't think it is the right way to improve them. I am quite som the

Barb or the Arab will produce batter arrivals of ponies. I saw instances of it. I was judging at Hellyrecent Stow, and I saw a very beautiful pray man, jest such an azimal as I describe, good absolders, good hard legs, and good feet, and all the appearance of a bardy, why animal, with great stamfon, and showed a great deal of breeding. She had a two year old and a yearling got by a Hackney size. They were as bad a stamp of young bosses as ever I saw. They ware hairy-legged, and they had no redeeming feature

that I could see. 1257. When was this !- This year, 1258. You can give us the name of the man !- I cannot give the name of the man, but it is a bay filly by "Firmway," an animal owned by the Concusted Districts Bourd

1259. Sir TROMAN ESMONDE.—What sort of action had those two animals !- Nothing peculiar on to

1260. The setion was not good 1-No. 1261. The CHAIRMAN.-Although you said you had no recent experience of these western districts

you have all scene practice experience of the pro-duce of a Hackney stallice there 1—00, yee; I go very frequently through the country. I have not knowledge of it, and I have judged at the shows at Galway and Hollymount, 1992. Can you give us any more information span that subject, as I thought you were speaking purely theoretically, and that you had not seen the produce of Hackuny sires.—These we the only one that I can call to mind. These are the only cases I saw.

Printed image dayshed by the University of Southampton Library Digitisation Unit Printed image digitized by the University of Southempton Library Digitization Unit

district, I believe they go by the name of Connegara peries t—Yes. 1265. Can you describe them a little. Were they light, active riding comes t—Yes, they were sharreing azimals to ride, full of action and plenty of vigour,

just a charming covert back.

1164. And they were very well bond 1—Yes. All those in the district were well bend and aboved a great deal of grakity. I may any that I bonglist cambers of them for friends of mine, numbers of them for friends of mine, numbers of them passed through my hands. I subject there are the passed through my hands. I subject there are the passed through my hands. I subject there are the passed through my hands. I subject to constant to

thing both accounting party, and I had occasion to thing both a Connerman party, and I had occasion to drive thomazeds of miles every year while I was there. 1267. You believe they were mindly bade other by thooseghbred or Borb or Arsh thook1—They were teed by sires, the produce of sires originally got by Arsh or Earth blood.

area to stress, the produce of area criginary got by
Arsh or Earth blood.

1348. You spake about the introduction of Earb or
Arsh thead by Colonel Martin I—Yes.

1249. When was that I—Eres so many years area.

1999. Wash was that :-- aver so many years ago, thefice I went to the West. It must have been twenty years before I went to the West.

1270. Mr. WERNERS.—Washi in 1835!—Yes, that is their what I may Yes, exceld twen it distinctly in all

about what I may. You could trace it distinctly in all the better class of penies.

1271. Mr. FIFEWHELLER.—I think you said of late your the poor deteriorated b—Oh I you, very much

1172. What would you do by may of reconstring the breed and stitling it an april —I would incredent a similar stabilize. To that which produced a similar stabilize, to that which produced the good store I have been I speak of in the district, that is, a good Arab or Barb stabilize, and as the very remote exposed admirest the Weshi peay would be a herein rainteed. Perhaps in other districts where there is better feeding and probably better-to-do people like, I. think age and probably better-to-do people like, I. think age and probably better-to-do people like, I. think

this sative small bread of yony herses—a short-legged poor herse—wealt he the bast.

1273. Do you believe there are wasen in that country still that are worth teceding front—The tarses have greatly detained and it will be many tarses have greatly detained and, and it will be many

years before the effects in got up again.

1374. Are those many farmers who have kept
say old recense of their own particular besold for
parentines I—I don't think so.

1375. Lord Aurrowes.—Burness the Heckner brood.

than by other sizes would you prevent them using Hadinary sizes on this principle—what you have the Model weak on this principle—what you have the Model weak of through the east or No. 1 district f— I darm say the Hadinary stalling would preduce on the profit for the farmer, because the service of the Klashary stalling in given to the teached from closel, it may probbee more profit than be would have from a morrest stalling for which he would were Missier bare

absorption thinks are warmen are women vary. In your form, the proof of the proof o

1977. You think it would injure No. 1—No.

e Irvinal, have been estambled at 0 to a servaturary or starting Hackeny stallines in the West of Irelazol I— I am not awars. I recollect being saked my contribun at the turn, before saything was door, and I gave the amorphism that I have now expressed. 1363, Mr. Winsten,—With inference to Commoral—Wes.

the discusser of the country with influence of the discusser of the country with influence rought be produced, if it were possible, by the lensaling of minds than styridage date. Would'st it carry unless do would not a scale of the higher break pay better than the party-1.-I density it would, tot it is a strong thing. I don't think I ever now a minds in the western part of Friends.

very good mash !-- Yes.

1291. And you couldn't gat a horse !-- Yes.

1392. Mr. Warnen......... shink your chief experience was rather in Comments, or Galway; that was the district you know boot!-- Yes, said part of

was the district you know best—Yes, and pure of Mayo. 1253. You know that district thoroughly !—Yes. 1294. And that is the district that you think is best suited for breeding puniss !—Yes. Ord. 35, 1806.

1255. Were most of the animals in your time sold as feels !-- They were always as feels. Well, not as fasts, they were sold as yearlings and two year

1216. They were kept only up to two years old at that time !- Yes. at time 1— 148. 1297, That was prior to 1875 !—Yes. 1298. You know the pony foal is a small saissal?

-Ye-1299. You and I may not agree about Hackneys alterether, but I think you will agree with what we have chiefly stationed in the best districts of Coune Coolerl is one of the lest districts!-Yes.

 Challel is one of the nest diericts — xes.
 And we have stationed a Burb there!— Yes. 1301. And we have also shiefly stationed Welsh ponies in other districts !- I don't know, but I take t for grunted that what you say is quite surrect. I have not been in the district since you stationed

the sices there. 1305. Are you aware that when we sent a Harkney

and a Each to the same district the people thereadyes preferred to have the use of the Hackney ?-- I would like to snawer that question. I saw the Arabs that you longht, three of them, and I think two were the very worst class of Arabs. I new the three Arabs in Daly's stables—one of them had come from the Casen's stable—and two were grite variable—for breading parposes. There was one gray. I must say, was a good one. is a good one.

Bart I—The chestrat, that was a very good liart.

1904. What do you say as to the bay Arab t....I den't know, but I must say as to two of the Arabs I saw

Lint. One was the Onesn's 1... The Queen's parties

laste. I have seen the progray of the initial, and 1304. The CRAIGHAN. - Assuming the fact that it is correct that the farmers prefer Hockneys to the Borts or Arabs, you would not be resprised because you say you don't think the Arabs were good of their class 1.—On that point I say it is impossible to apply a distinct answer to a problematical question.

1307. I think I can astisty you with evidence on that point !—I may, my lord. We were nucleus in the Rayal Dublia Scelety, before the Congested Districts Ecourd proceeded to improve the brees of borses in this district, to seed suitable after into those western districts.-- I meen the Dublin Society -and we purchased one small thoroughteed called "Worth Spring," 14.2 hamb, and we sent him into one of the districts. We purchased him for a rentleman living in the district on certain conditions. We paid £150 for the horse, and we sold the horse for the same money to him, undertaking to may him.

\$140 a year for three years for the service of the horse for seventy farmers' mores in that district, on the understanding that he was to shows call 10s for farmers' mares, and £1 for gentleman's mares.

1308. The Chainnan.—Where was he sent to t. To Countemars, to Roundstone. The Cougasted Dis-

To Countersare, to recurrence. The Congresses Dis-triots Board placed their stallion very shortly afterwards in the same district, and their service for was only 5s., and the result was that the farmers were to borns, for they said " Here are two Government Boards sending down here the very best animals in the world, and we will go to the chespest," and they went to the chesps house and left our lorse to a great extent idle. There you have the result of two Government departments managing horse breed-

1509. Mr. WHENCH.—You don't suggest that the horse was sent specially to Cliffen on that several i

-No. I don't pay so. 1610. Are you aware that it was by arrangement that no house was sent to that district !- No. 1511. Do you know that the ordinary fee was 7s. 6d. for the cedinary country pony in Connomera 5

-Well, I don't know

7212. But you think that is the cedinary fee b-Yes, that is about it. 1312 for 1875, when you left, the class of stollies in use was very much deteriorated, and you know that

the farmers were breeding from their own stimuls and produced a very bad stars !-- Yes, and produces a very san state 1—xcs. 1514. You don't know what foreign blood brought in the larger animal?—No. 1315. You did not trace the exact origin of the Connument youry beyond the time that Col. Mortis.

introduced the Arsh blood 1 - No. 1316. Do you know that they were traced behind that !- No

1517, Sir Walten Gillert.-The history of the pony before the time to which you refer you know nothing about 1-Yes.

1316. The produce was there in the year 1850 t-1519. You know the district !-- Yes 1320. It is a mountainous district !-- Yes.

1321. I remone was know that it was exposure and the quality of the herboge that made the animals 1522. Because you must know that in the lan 1572. Recease you must know that in the last exitory there were a very great number of Arch stallions not only in Iroland, but in Bagiend 8—Yes, 1528. And provious to Colonel Martin loying drafted in that particular bread there, there was nown of the brood to the place tall have no doubt in

WAR 1394. You have mentioned the Welsh ponies. you know the breed of the Welsh ponies !- No ; I don't know anything about them, except that I have seen some very nice ponies belonging to the Consumal 1025. You are not aware that the Welsh breed of

ponies, going back fifty years, was very largely an in-take from the Norfolk Hackney !-- I durony is is. 1336. That is a very well known fact 1... Yes; and I suggested their use in many exposed districts where only a very hardy house could live out the winter 1827. Frequent reference has been made to Araband Borb blood. What definition do you give to

Bark !-- I cannot define it 1325. Are not both Zastern horses t Van : both are Eastern blood. The Barb has generally more substance than the Arab.

paterior than the Acst.

1329. Guly imaginary, I think 5—Yes.

1330. What they call Birbs 5—Yes.

1331. Mr. Warson.—Do you remauher the Welsh

col taking first price at the Galway Show !-- The

1332. The hay t-Ves. 1333. And that is the close of animal you would 1334. For Ballyconnecty and Carraron I-Yes.
1335. The CHAIRMAN.—What become of "Watch Bering" that the Dublin Society area down to thu district !-- Ho is there still. We have effected the object for which we boolined him there. I now some of his stock at the Hollymount Show, and they were

extremely good. One, I recelled, got first price.

1836. Have you reduced the fire I—No, we cannot poor receipts the fee clustered as the harm has been paid for and he belouge to the owner of the Bellyne. hinch property.

1337. Do you know what is charged new t-I

don't know what is charged now. don't know wast is congot now.

1338. Mr. Frizwitztani.—Do yon know the breed-ing of "Watch Spring" 1—Got by "Starling."

1339. Isn't is by "SpringEnd" 1—Yes, you see right, by "Springfield."

1340. The Onassman,—Turn now to the northern district 1—The northern district is the one per haps I know less of than any of the other districts, and what I know of it strictly is that it is generally confined to the breeding of carriage horses and what I would call the general stility horse. There are very New thoroughbred stallions on our register standing in the North of Ireland. I believe I am correct in say-ing that as a general rule the northern dealers and the worthern horse owners are in the liabit of buying in northern morse owners are in the milet of buying the southern district, at Cabirmes or Linearies Homital, the colts are brought up and trained in the North of Ireland, and then they are sold as hunten and high class carriage horses. A great number that are shown at the Dublin Show by breeden from that are shown at the Dublin Shoer by breeders frein the North of Ireland have been bought at Spanoll 1864, Hoopital and Caldirane, purchased as three year olds and then brought book to the those five years old and solds abunitors. They don't breed that class of horse as a rule in the North of Ireland.

1541. In your opinion what class of stullion do yo consiler most scritchle in the North of Ireland !-I should strongly recommend a thorough bred horse-specially selected an suitable for getting carriage become 1512. And the general utility horse 1-And the well utility harm, either a theroughbred home or a half bred horse, with the qualification I have referred

1343. Assuming that it would be possible to confine the blood to the North of Ireland would you have the same objection to Hackney blood to produce harness or generally nullity bornes !... I think the other is very

much better. 1344. Mr. Wannen.-The half-tend stallion !-1845, The CHARRIAN.—That is balf beed with the

dition I have mentioned 1516. Then as regards Hackneys I gather generally

selected under conditions you have montioned is botter than a Hackney to produce any kind of home that is produced in Ireland !- Yes, that is my opinion. 1347. Objecting generally you would not consider it so objecting generally you would not consider it so objectionable in the North of Irohand as in persions of the west, south, salilland, said east !—

1348. You also object, as I outher, to this strain of bleed being introduced into one district of the country on the ground that the strain would spread throughout the country !- Yes, that is the danger I suggestend.

1249. In that the principal danger you apprehead? -Yes, the oringinal damage 1250. You say as the strain is not readily descoted ron could not prevent the favorer uning it 1-I don't

see how it is possible to detect it no matter how accel a judge a man may be. 1351. Taking the whole country ownerally you have a long experieuce, and do you see any deterioration in

the cless of borne produced so far as harness burses are concerned I....No. There is no deterioration I am glad to say, and I am sure there is a marked increase ment in the class said quality of the horses bred in

1359. There are more bornes bred than there used to us ! ... There are more horses bred than there used to be, and there are more highly obssed borres sold by dealers end go to England.—I suppose two to one or three to one-more than there need to be-1853. I think I gather from you that you anticipate

that the demand for inferior chance of borses, for the properal utility horse, will be less in future !—I think it will die out to a large extent, that is the demand for backs or utility houses kept for ordinary use. It have sold their become and olds their birreles.

1554. More people keep bisyeles now !- Yes. the increase. Two men hand now for one who bunted

1355. But the general demand for hunters and turness horses will maintain itself1.--I think it is on

ten years ago, and consequently there is a larger femand for hunters, and I am gial to say as to high class horses from Ireland there is slweys a demand

as a whole, it is advisable that the ettention of the producers should be directed to producing these bigb. Scherts an class harness beenes and hunters —I think so. 1337. Have you any further information you can

give or any augrestion, taking the matters in the order which you took yourself at the beginning !-- You ever class of stallings are to be used in Ireland, these enght to be registered, and they great to be reengit to he regressed, and they ought to be re-gistored by a board, a competent body, in whom the public would have confidence; and that, next to getting rid by legislation of bad horses, that

is the only way by which you can minimize the danger of having bad staffices in the country. We have in or naving and saminous in the country. We have in the Dublin Society been trying to effect the registra-tion of stillions, with the result that already a very large number of had, notices have been sold and left the sountry. We found that the become were earmarked by not having a place on our register, and the owners got vid of them, and in their place got better case. I attack the greatest importance to, and I tlunk eny expense in mederation incurred in currying out, a complete and notificatory registration of stailing

a complete had intilizately regarration of standars would be well spent. I think the sebume of the Dublia Scooty of 1894 in requiring the country committees to select mares was a good one. I would be in favour of giving nominations to marea, and giving substantial prices to young mores put to stack. I think if you register the stallious that you will scouse a sufficient number of sound, good because in the country, and that if you could induce men to put young mares of a good class, two or three years old, to the stallion, and make it worth their while to do it by offering them substantial prizes, you will in that way secure a very marked improvement in the bevel of houses in Ireland. Of operas the difficulty in the

scheme, if it is to have our contible effect, is that is will cost manay: it oug't be done otherwise 1555. Are we to gather from you that you profer the system in operation in the Dublin Society up to the system in operation in one actions morning up to 1894 to the present !—Yes. I would like to see it and the 1896 scheme combined. I would like to see numicetions combined with prizes to young mura put to stud purposes.

1339. Have you anything more that you would like to put before the Commission!-No, I don't think so at present.
1360. Sir Tropas Escower, ... You think soundness

in the stallion is a matter of vital importance !... I do 1361. Here you any knowledge of the practice of feedge countries in this matter?—No. Nothing beyond what I have read, I have no personal know-

1162. Mr. Wagston.-With regard to the registration of stallions you would only register thoroughbrods and half-brods unch as you have described !—Xes.

1364. That is all you recommend !—Yes. 1364. That is that throughbreds and helf-breds should be the only registered stellious !- Yes.

abould be the only registered stellions 1— Yes.

1955. What would you do with stallions certains
that dear! Would you require a license of soundness,
or would you have matters as at present—Yes. would require legislation for that.

I would not approve of stallions being required to beve a licence for soundness, I would have nothing to do with them if they were unsound. I would rather et rid of them altogether, and limit the stallions to the class I have referred to 1367. You would himlt the public to thoroughbreds and half-breds under carefully considered conditions?

1368. Do you know snything about the introduction of the American horse into Ireland!—No. You mean the house imported into Ireland. I don't know much

s٥

Cut. 23, 1600. 1369. They have not come under your observation. Do you though it is a good thing for the country or a had I -I think it is a year had thing. I have some a Californian home at the Home Show, and it was very

1570. I referred to the American herest brought in here and offered for sale. Are they very had indead 2-Ven 1371. And you think they will do great harm !- I do 1973. Do you suggest in any way the branding of not horses 1- I think it would be very good.

1373. You think there should be hunnling of the American horses that are brought in here!-Yes,

sould do anything that would preserve our Irish blood, and modulars it in every way.

1374. See Waters Gater. — Were you not respictors that come of the named calculated at the had Dublin Show were imported from America !-

We were suspicious. 1576. And your remarks all point to the imcetauge of keeping the Irish hunter breed pure !think it is a great advantage.

1876. And to insure this parity ere you in favour of the registration of mores if it can be corried out !--If it can be corried out I would be very glad, but it

is a tremoudeen under taking.

1877. Mr. Wennen,...It would be too much for the committee of the Royal Dablin Society !-- It is a for mores meen tempting prices for reliable pedigross that could be survived out I-I am not quite prepared

tremendess undertaking.

1378. Sir Wannen Gelany.... Failing that it is not undertaken by the Royal Dublin Society, do you think if the Dublin Society could give in the class

1379. I suppose you notion in the catalogue the numerous cases in the classes for two or three year alds where you would imagine the pedigree should be known, that in mony, a very large number of case, the personality of the breeder is unknown and the poligross are in !-- I don't think there are any two year olds at our show.

150). Well, in the three and four year olds :--Yes, the recorn of that is that the owner of the bone was not quite certain of the breating. He may have orchosed the horse, and he may have been given the brealing as co-and-so, but not being quite certain of it, unless he had documentary proof, he dul not yet it in. Some people are very slow obest giving a pell-gree unless they are in a position to prove it. 1381. The broaders are unknown, but the poffgreeis known i-Yes. Very often a two year old heese it sold

in a flur, and quate correctly the denier is told that he's by "Victor," out of a dam by "Warnen Heatings," and the horse thou yeares through two or three hands. end it comes to the show at but, and the man who bought the horse last has lost all trace of the incoder, and he is, therefore, qualdo to give the header's usua though the pedigree is excefully handed down.

1382. If the system of insisting on the breeder's name being given is carried out in fature it will make reprohasery more careful f-I quite agree with you that it is desirable 1383. I am very glad you think so, because it his always appeared to me such an emission in reading

the ostalogues of your show!-I attach the greatest value myself to breeding, and I think anybody buying herse would wish to be perfectly estimated about Lord Asstrows,-Begistering the mares would de

to say whether that would be procticable or desirable or not, but it could be done of course.

Contain C. Ferwessprormation examined.

1384. The CHAMMAN,-You are a member of the 1985. And you take a poteral interest in the subject of brase-breedings.—You; I may say I take a very deep interest in home-breeding in Ireland

1384. Here you had any personal experience in home-treeding 1—Weil, I may say I have had a good deal of experience; I have been breeding horses over since I was tweety, and I have also keen an owner of a stallien for a considerable number of years; bad several stallious, and I have acted as judge at shows, and in various ways I have had a good deal to say to horse-breeding.

1387. In what districts of the country has your experience been gained? I one only speak for the artifiland constite; I live in Westmeath, and can only spenk for that part of Ireland. I have not had any varied experience in other parts of Ireland, except I have noted as judge at shows in other parts of Irelend, and seen the class of horses bred there

1318. Speaking for your own district, which you know best, do you think that the quality of the berses has deteriorated at all lo-Wall, no; I am certain the contrary has taken place. I think that undoubtedly there are a great number of inferior animals, perhaps a greater number than ever there were in the country hat I satribute that chiefly to the greater number of horses that have been lately bred in the country, and of course, the more horses that ere bred the more mistin must be bred. For the best few years horsebreeding has paid very well, up to the last two or three years it has paid fremendously well; but latterly it has not, and consequently the faire are now very full of horses of an unsalgable and unappeal description. for which there is no market.

of mure prossed with the ordinary stallion of the country, which is of a nondescript description. former's o'cject in my country when he breeds a long is to breed him for a bunner, for if he is not suitable for a hunter he goes as a trooper or to a lower grade 1391. Would the same remark apply to the whole country, so far as you know it; I mean that there has been no general deterioration !- I we confident there has not been ; that a greater number of good

hornes are heed in the country than ever there were and there is a greater dreamd for them, and horses are taken at an earlier ago than error they were before. 1303 There are more horses bred abagether! -You; I consider there are a great many more bosse-bred in the country, and more good ones. Yes; I think bred in the country, end more good once. Yes; I think there are cortainly more good horses herd; at the

some time, there are a great number of indifferent animals bred in the country. 1353. Well, can you tall she Commission on what facts you hase that original-I opposite there must be more houses head in the country, because I see the faire are full of an unnalestate class of horse; there are cormous numbers of them which they take from fair to fair, and especially this autumn horses would be sold for anything that would be offered for them. but they are of on indifferent description; the best class of herese mover comes into the four at al, at least great numbers of them are bought grivately.

do you mean they were formerly saleable !- Yes, ! consider that they were three or four yours ago; they were then cold and were shipped to England, but there is not a demand for those horses now. 1395. Do you account for that in any way !-- Yes,

a great many people have given up keeping horses end taken to birycles; the middle-class people keep 1369. You are speaking of breeding what class of borees —I am speaking of breeding from half-bred moves with thoroughbred horses, and the some class less horses than they used to-they keep bleyeles, and don't keep email horses for their own pleasure that

they used to keep.

is grasser. than ever it was, but the supply in not equal to the demand by any means. 1316 But the demand for the inferior animals in

test to La absolutely nil.

1319. Well, you think the supply is likely to accommodate itself to that, that is to say, that the

emphasion of the inferior around will naturally fall off -I think it is bound to, because the breeding of that clear of horses is not paying the farmer, and think he will gradually drop it, that is the small

1400. Did you hear Mr. Roberts' evidence !-I did. 1401. Do you generally agree with him as to the -I do ; I think many farmers breed from mores which are bound to be a loss to themselves and to the country at large, I don't think they are careble of breeding an animal that will ever pay for feeding; but I think they see beginning to realize this ... then are not breeding them in such numbers as they did.

1402. They can breed a class of autimals which was salesble seems years ago, but which is not salesble now !-- I think there are a great number of very good mares in the country, excellent mares, and I gather this resingular from marries that I are exhibited at shows about me : at the same time, there are a great number of a bad clear of mares that are principally in the possession of small farmers—the best clear of

mares are usually owned by the better class of farmers, who feed their stock better 1465. And so to the stallions 1.—There are a great unmber of very good thoroughbred stallions standing in the country, but they are standing at few which

of the country, and outside them there are an excernous number of what are called draught stallions, which have been extensively used by the farmers lately. 1404. What do you mose by that !-- Horse: with

a good admixture of ourthern blood. 1405. You see speaking of the midbad counties new! I am speaking of the midland counties prin-

1405. What do you meen by earthcese blood !--meen a come of Shire, or Cleveland, or Clylin-

1407. Have they become more common in your district than formerly !-- I think they have; I think there are a great number of them 1405. They belong, of course, to private owners?

-Oh, yes. 1409. Would they be introduced if there was not demand for them for the me of the more weeds des-

eristics of mayes. 1410. What kind of fees do they charge !-- I think from 10s. to \$1, and, I suppose, in some cases

1411. And what are the general free charged for becoughbred stallions in your district !- The average for would be £3, £3 3s., from that to 5 guiness 1412. Could you form any opinion as to whether the fermer prefers the earthorse stalling to the thoroughteed stallion on account of the lower fee, or because he thinks it makes a more valuable animal?

-I think the farmers in the country breed from the carthorne, chiefly because they get him obsequer, and also because he gets more aim in the progeny; but they are chiefy man who breed to sall the progress at one and a half years old, and for that purpose they

1415. What are they sold at do you know, I mean for what purpose?—They are bought by English dealers and shipped over, I have been told that they are bought chiefly for putting in tendesmen's carts in provincial towns in England ; they put them to harness at

Printed image distinged by the Linearaby of Southernston Library Distinguished List

e very early age, and if they turn out good they turn a peursy on them and replace them with another una. 1414. What kind of a horse do they use for arrireliant purposes about you !- They use a light description of horse, a heavy agricultural horse is not namied, we have very little tillage in the country, and a heavy horse is not seited at all, the light description of horse is able to bring a marvellous weight of hay and straw, enormous leads compared with the size of

1415 Then in your spinion is the produce of the Shire home generally sold out of the prounts or kent

m the country !-- I think they are chiefly sold as an any age.

1415. And generally do you think the class of
stallion in your country is the best it can he for the
purpose 1—I think this class of half-lord stallion

that I mentioned us a very less oluss of stallien, and I den't think it pays the formers to breed from them. hat the theroughlend stallions I consider any work word but there are not enough of them and the fets are too Ligh

1417. By the class of stallion you speak of do you mean the draught stallion !—I mean the draught stalliss, the prodestruct animal with a large admixture of carthleed

1418. Have you any opinion as to how an improveto me I-t annillate and he resused in abase of one tases opinion that it would hea great advantage to the country if more thorough beed stallous were put at the disposal of the farmers at a small fee. I also think that a class of stallion is required in the owntry other than a thoroughbred horse, for the use of small formers whose mares are of a weedy description, I think a half-hred home, that is to say a home with a good admixture of thoroughired blood and heed from what is called a country mare, an old Irish country mure, would be the best stown for use in the country.

1419. Have you any suggestion to make se to how that could be brought about I-Well, I think thut of course it can only be brought about by state aid; if a demand arose for this class of been they would be bred. 1420. You mean it would not pay a private person as a commercial speculation to introduce that kind of horse !- I don't think it would, because they would not be of a recognised breed, and they would not be

registered, which, I think, is a very necessary thing I thick all stallions sarring should be registered and cartifed sound, and of proper fermation. 1621. Have you had any proctical experieues of the working of the Boyal Dublin Society's scheme? Yes, I have ; I have acted as chairman of my county

1652. And what do you think of the scheme !-- I think it has done an intaknihible lot of good to the untry, especially in sense counties.

socially in the counties Mouth, Kildare, and Moyo. shows there I have acted as under at Hollymount for the part five years or more, and every year I see a merked improvement, and the younger horses better,

which shows they are stoughly improving. 1424. Can you explain why the ecisene has had a better effect in these counties than in others! -- In my own county I know the reason it has not been e success is that there are not a sufficient number of thoroughbred registered stalltons at the disposal of the farmers, and what there are are standing at too high a

1425. Well, there have been various schemes, have there not, of the Royal Dabila Society from time to time, here you any preference for one over the other?

—Yes, stallings were originally subsidised, and for the last two years the money has been given in preminus to mares in feel to those registered stallions.

1426. Which of these schemes do you prefer! -- I think if the two schemes were worked in conjugation

1497 That would be to ______ That would be to give the mores nomunations to registered stallions, so hat the moore of the room could relect his own stellion. Formerly there was only one registered stallion in the country, that is to say there were one subsidied etallies and be weennot sufficient for the even that had tiol hormon or recuience should be given to variet vouces from two to five years old and there would receive to be a substantial sum to encourage the

owner of the mare to keep her for the purpose of 1428. Do you think they do sell their manes largely shroud !-- I am quite certain they do. Any mare that is a saleable animal is sold, and manes, except

from socident or blamish, are rarely put saids to breed 1429. You think generally there is a tendency to sell the best moves and breed from inferior ones!-

Anything that is saleable is cashed, 1430. And you would suggest giving a prist of s sufficient amount to counterset the inclination to sell ! -Yes, that would encourage the farmer to keep his voung mare to haved from. 1431. I think, you mid, that the demand for hunters and high class extrings houses in increasing \$ -Von I containly consider it is, every hour of any

value at all in my part of the world is immediately bought up when effered for eals. reagan up warn correct ser east.

1452. Do you think the supply is increasing in proportion to the increased demand !—Well, I don't think it is, I think the demand always exceeds the

smale, and the consequence of that is the high price at which horses are selling in Iroland. 1433. Then to a certain extent you think there is a scarsity in Ireland for hunters !-- I think there is sudoubtedly, though a great number are bred majoratedry, though a great number are level.

1431. And besides what you have already said
on you suggest any means whereby the production
could or should be encouraged 1—I don't blink, except he beed shows and price being given to encourage formers to put aside their good mairs to breed from, I den't see what could be done in addition to the reststantian of stellions, which I had upon as your

1435. I think was said that the quality of homes at fries in not an good on it used to be !-- No. well I attribute that to many horses of the best class not getting into the fairs at all, they are bought up before ever they get in, and in addition to that the local shows have also taken the cuesto of the lower which used formerly to be sold in fairs, and now meet a

ready market at the shows. 1436. Then, in your epipies, the fairs cannot be token as a fair effection of the quality or the quantity? No. I don't think so. I have always almed at breeding a high class bunder

or stouclocham horse. I don't think myself that it pays to breed anything else 1438. And what kind of a size !- A thoroughbred

1639. I think you said that in your district th farmers had head bunters from Shire beenes L.Ob. I don't say that they breed benters, my lord. They have herd animals which they have sold to ge to Engined at an early age, at one and a half years of age, they go by the name of "clibe"in the country,

age, they go by the name of "cibe" in the country, they are sold at fairs.

1440. You den't know what becomes of these to-

14/2. Why do you think not !-- Because I think

I think they are shipped to England, I don't know for what, unless they eventually find their way as toon 1441. Then you have no experience yourself of hunters bred by a cross with Shire blood 1.—No, I have not, indeed, I don't consider that a hunter with eart blood in him would be any use in this countr

that it takes an exceptional home to carry a man to hounds in this country, I think that a here must have event stamma and power of endersons, and I have great stamma and power or encourance, and I don't think any soft blood in him would conduce to

1442 Woold that some remark apply to Englands -Well. I presume it would, quite so. 1444. As for as hunters are concerned I carbon

on world not approve of any strain of curbbons hlool!—No, I would be entirely against it.

1445. Or Hackney blood!—I should be entirely against any soft blood, and I consider Harkney blood suld some under that denomination. 1416. How about beenes bred for harness represent My experience of harmon horses in that houses that

are level for housest are orgally used burners have and there is an equal descend for them, and if they have a certain amount of action that there is just as ready a sale for them in fairs for harness purposes at for leanters, and I see them sold at local fairs, Mellinear, and other fairs with which I am accomplated and they make just as much menty for one surpose as for

another. 1447. Action, I suppose, is an important factor in a barness beene Action and colour influences then a print deal t-If they are good colour and have a bit of action they are nimost invarishly bought for harnon

1448. Don't you think the Hankney would be usful in giving action !- Wall, I don't think that act of Hookney action-I don't recaider it is true action. is is extravagant and may be very good for shee purposes or for towns, but I don't think it is for general responses. I think the action is extensioned

and is bound to tire 1442. Futting saids your own personal opinion on the matter and looking at the matter commercially, do you think the introduction of Hackney blood would produce a saleable horse !- I don't think it would. because if the haver got wind of its laving Hackner blood in % I think he would in all protobility fight sky. 1450. Have you enveryerience about army renounce -I have served in a cavalry regiment for ten years and I have always taken a great interest in remousts, and I have on vertices eccesions sold filling band by

mysolf for the purpose, 1451. They were by thoroughbred homes?—In-variably, I never bred from anything else. 1452. Do you hold the same origins as reports Heakney and eart-borne blood in reference to srun remounts!-- I do, most strongly; I am of opinion from est thoroughbred blood on one side would be of Hill

would not have sufficient endarance 1453. Have you any opinion at all as to the advisability or practibility of the remounts being benght direct from the broader instead of through a dealer "-It is of course a very good thing if it could be managed, but at the same time I think it is a very difficult thing to do and would require a much later organisation than is yut at the disposal of the Army Remount Department in Ireland. It is the province of the dealers and has been for many years, for incurser able years, to huy the horses for the upopose, and Ithink that there would be a great difficulty in any private individual or body having them outside of the dealers 1454. Some suggestions have been made to the Commission that is wight be a soul thing if the cost troopers were in some way distributed throughout the country, do you think that would be a good thing from your experience of the country and of the army! -I don't think it would; I think the cast trooper a

a rule is an old and hard fed animal that I think a rute is an old and hard fed animal thus I think would be milkely to breed well, of comes they have herd well in some instance, but I deet hink as a rule thay would hreed well. They have been fed many years on hard feeding without a mouthful of green, and it would be some years before they three as worked of our days.

an animal of any chas.

1455. They would not be cost, I suppose, while they had many years left !- No; and it would require two or three years before they would breed very likely.

ny lord.

1457 Do you generally agree with what he has
uid or have you any remarks to make?—I agree said, or have you any remains to make 1-1 agree eatherly with Mr. Reherts' evidence in overy print. 1438. Lord Assrows.—Dor't you think small furness in your district—I mean very small—soontimes breed a horse with a double object, to work the lead and to deal in !- I think as a rule that class of man owns a many which he keeps for that purpose and

shares likes to cash the resoluce 1450. At one and a half your old !- You

1400. And might not that he the reason why they use so much the draught aim?—I agree with you, I the so main the cowages are :- I agree with you, I instances, but at the same time I think if a good door of thoroughbred sire or half-bred sire registered as has been described here was at their disposal, I think they

a cold much prefer him to the course beese they breed on at present.

1051. Do you think they would do their work on

the land as well !- I do, and the changes are that the produce would be much sounder 1963. How would you be disposed to have a regardy of mirror steps an own as of arrest -- I tamk it would be a great advantage to the country if it could be worked, but I Oright it would be a year angular buttone and would estail an openment amount of

excesse verifying the poligross, said it would take a long time before it was thoroughly established; I think if it was once established it would then go shead 1063. And put money into the pockets of the breeders !-- It would, and would enhance the value of Irish hoveen in the eyes of forsigners.

1684. You admit that the Hackney is good for town week, do you !-- I think that he is a good arginal to slow off up and down.

1655. He gets money 1—There are always a cless of was who will give money for him.

1656. The question is which is the most valuable.

harmen bases—the town harmens or the country the thoroughbrod horse in far and away the heat

atinal provided he has action.
1687. What proportion would you get of those?... I think if thoseughbook stallions were perchased and put through the country and bought with action, I think many thoroughbrod stilliers in the country have not sufficient notion, but there is certainly a great went of sond thoroughbred stallings in the country with ties and action, and I am certain they could be bought in Forland.

1465. Another thing you say, you find the farmers foul's keep their young mores if they can get a good two for them, that means practically that if the filly to not worse than the mure they breed from they sell is 1.—Ther rarely keep the filly unless the more is worn

1469. Unless they thought the filly would sell for drephed or metund. 1470. Sir T. Easonne.—You think it would be a public advantage if there were more stallions through-

parties advantage if there were more stations through-out the country !—I think is would be of the greatest advantage, what is really wanted is to cost the mongrel

throughout the oruntry.
1470a. And of ourne you would think it advisable

the country which would eventually cost these unsound and hairy-houled hrutes that are now covering mores

arranance, what is really wanted is to out the mongret and had stallion that is going through the country now, sad I think the only way to do that is for State and to be applied to placing sound stallions through

that there stalliers should be sampled to the farmers at a low feet.—At the fees they are now giving for the mangrel stallions, that is the only way to get rid of the managed animals that are in the country now.

of hunters in Iroland do you mean that there are fewer good houses now heat than formerly or do you never good doeses now aren tann formerly or no you merely mean that the demand for them is greater !-merely mean that the demand is greater. 1472. Now in reference to your answers to Load Ashtown is not the demand for Olydesideles and Shires

in consequence of the my out among farmers for bone !- Undoubtedly, what they my is they want

1473. If a good half beed stellion of more or tens reliable old Irish blood were standing close by a refeater old Irain blood were summing come by a Clydesiale or Shine stallies and they were stamling at squal free, in your opinion to which stallies would the former send his mase to get bone!—I think the

care stallion would be left someony alone. 1474. Mr. Garry.—Yeo would have the coughbred and half-bred !-- I would have thoroughpred bleed

half to three parts in the stallson. 1475. That is thoroughbood for blood and half-bred for bone and substance !- Yes, and more conversally

for the me of the smaller farmers who would want to work their mares on fame. 1475. That is the contom in the beginning !- They work there as two and three year olds and sall them.

work them as two and three year olds and and treed in fairs, hardrowed and jingiped.

1477. Mr. Wassen,—You said you would have all the stellions registered, by that I suppose you must thescoughbed or approved half-freeds—That is the

ouly ease I would admit to register. 1476. In addition to the register would you think it wise that there should be a Reenet, that all stallion covers should be obliged to take out a Bornes that their stallions are sound ?-I think the regular would

be sufficient in the end. 1479. You think so many stellions would be registered under the scheme that three would not be a large balance remaining throughout the country breeding mesond submidt—I don't think there would

be, especially if there were sound stallings stationed throughout the country that would maker the description of the house we want to not in the unity. 1480. You think all the atera that would be

necessary with regard to stallions would be to supply thereognized and half-bred stallions — That is my view. 1481. And that they would fulfil all the resulted ments of the country !- I think so 1482. Then you said you occarder Hackmy blood 1462. This you may you occurred Hastiney 'toosi self, do you know that in any way fixen your own observation!—I cannot say that I have had any experience beyond what I have actually sent, I have, never owned a Hastiney stallien, but I was only orbiting the restingment of mine-tenths of the heveless and buyers throughout Frahand that I have come in

contact with, they one and all affirms that the intro-duction of Hardway bland would make with to the horseleveding industry, at any rate of our part of the 1453. Did you movely take that opinion from what we beard !- I merely took that opinion from what I

1484. But you think supposing there was any way discovered of breeding barness borns without introdiscovered or coming narrows needed as well as becoding hunters, I think you said that the houses heed for hurrows make just as much money in the fairs as hunters 1—They do, unfootbelly.

1485. You think there is an good a demand for havness horses with action !- Just as great a demand. 1486. That it would be as peying an industry!-

Not as paying. 1487. And do you think that horness houses our be sold at an earlier age than benters 1—No, I think the harness horse can be sold at three off, and the house is sold to make a hunter at the same age.

1488. Lord Assrows.—Untrained !—Untrained.

notting them both as long-talls.

×4

1489 Mr. Werners ... Von think you can sell a four-year old for a hunter to the same advantage as you can sell a harmen beeve at four years old !-- I see

1490. You said you thought it was of great import-ance that thoroughfred stallions stationed through the country should have good action !-I do think it is

very important. 1491. Do you think the thoroughleed horse has at all the same power of perpetuating action as the Harkney stallion has b- Well I cannot my that became

have never bed any experience in breeding from a 1492. Col. Sc. Quawron. -Do you consider that the Hackney action is a needs! setion! - No, distinctly not; and I also think it is a class of home that is entirely unamited to the requisements of this country.

1493. Sir W. Gilley.—The heat house heed in

Ireland do they come to the Dublin Show !- I think they do, without exception. 1494. You stated that a thoroughbred stallion and one of the old breed of Irish mares would be mitable to breed the half-bred size !-- I think that is

the way the animal that is required must be bred. 1425. But would you not need any qualification with that mare, because you have said the best maren here left the country; are then still mares good emough?—These are undoubtedly plenty of good mares still left, plenty of them; it is the young mages that go aren that go.
1404. Would you need no qualification for those

mares, that they should have either won races or -1 think that would have to be left to the discretion. of the body who were appointed to select these mares

for the purpose. 1497. You keep thoroughtred stallions !—I do. ta it knee-action you mean when you speak of action ?

-I mean a little knee-ortice, but principally shoulder notion. notion. 1499. What you would term a daisy-entise, or would be lift his fact!—No, he must have knee-artisn.

in confunction with shoulder action in connection was succioes series.

1500. Have you found great difficulty in getting borses of that description theroughbred!—Well, I think there is a certain amount of difficulty: but I think at the same time, there are vienty of them to be

had if they are looked for 1501. You have attended rales in London, I suppose, of thoroughbrol stock b-I have, at Newmarket

1502. And York and other places !- Newmarket, and Depeaster. I have on various eccavious. 150%. Have you over been able to see there the saimal you describe that would be good enough to breed from with a lone action that would descend to the progrey !-Oh. I have usen plenty of them. 1504. In the locality in which you reside there is

a demand only for thoroughbreds, you say 1-The best class of mares are sent to thoroughbred bosses antirely. 1505. Do you fird no difficulty in filling the secvice of thoroughbreds that you have thece, your evo. for instance !—I think that latterly the smaller for-mers have rather weamed off the thoroughbred burse, I think that they west an animal with more substance and hore than the thoroughheed. and come tons the increagement.

1006. But hes your horse, the one you keep, the
knee action you describe to He has not as rouch as I

could wish but he is a nice actioned hopes I don't know anything about the Hackney.

1508. You don't know that he came originally from the same rooms as the thoroughbard I... I understood tan anne source as the thoroughtres :-- unreceived a great many of them have two or three ordenes. 1109. One and all date back to the one hope just as the thoroughbred dates back to 2 or 5, you are not aware of that !-- No. I have no knowledge of Hackney kroeling.

1510. You have not used the Hackneys for driv. ing t-No.

extravagant action. thravagant access.

1512. Horses that one get away with that action go up to sixteen or eighteen miles an hour, do you call that show action :- I cannot may they do the diatance, at any rate they have trumendous action to a a short journey, but I think it is action that a home could not possibly stay at.

1513. But you have no experience of it !- No: Y cannot say I have,

1514. Mr. WEESCH.—Have you the same thorough. brod horse I have seen before !- I have him still

1515. Do you seriously think he has sufficient action to get harness horses?—I said in my evilence that he had not not as much knee action as I could 1516. Marely as a harness been sire !-- I look mon

him on a burster give. I would profee him if he had 1617. The CHATROLAN .-- I take it that what we bear about Hackneys is by repote, you have had no pracshout Hankneys is my reports, you have seen no prac-tical experience?—No, there are none in use in mr

1518. I suppose you have seen them at shows!-1519. And I gather from you that if it could be managed you think that the registration of manuwould be a good thing!—I think it would be a very good thing. I think it would enhance the value

1510. You think the registration of stallions would be sufficient and that the licensing of stalliers is not necessary !-- I think it would have to be done by Act of Parliament.

1531. There is great difference, regis voluntary and licensing is compulsory !... I think if safficient borses are yet at the disposal of the farmers of Iroland at a small for the illeritimate stallion weak ton balayors acce ad 1922. That is what I wanted to accertain from year because for the State to insist upon licensing stalkers

might be very wise, but it would be rether an arte trary not !- It is an innevetion, I would not like to command that at once, the other is rather the cantest way of deing it and would create less friction. 1523. And would produce the desirable result?-I. think it would in time.

1524. Mr. Werner,... Is it not a fact that the mares in Westmosth are about the heat mares in sor mares in Westmean are apout the new mares in my county in Ireland 5-I think without sering that they are the best, I think they are sa good so any in any

mert of the country. 1525. Of a very high standard 1—Of a very high etandard. 1595. And you have a lot of mon there who are intelligent enough to send their marre to the best stallions !-- Unsoubsedly, but I compler that class of men don't require to be lorislated for. 1527. It has not therefore been impressed upon you

ite as much os on other reards how had the mares in the country can be !-No; I think of course in every county there are a certain number of bad mare. don't think we have a prepositionance of bed mares in

1528. You have a preponderance of good mares!think we have, which would also couly to Meath and Kildere; the morer the district the neces the class of

1529. Bir W. Gtasar,-With regard to the half-bred sire, you would have him registered the same as the thoroughbred!-Undonbtedly : I would allow no borns to serve unless he was registered, if possible. 1530. And that would be some security as to his having been bred under a suitable mare such as you, describe — Undoubtedly, and mares would be given nominations to these registered stellions; that is the

system I would work on.

1531. Lord Assrows.-And it would be necessary to register most of the mores to have their progeny so represe acted on the time transfer or annual feet restauration. 1532. I may be quite wrong, but I think about two years ago I may your name down in the prize list at Mulinear for a colt by a thoroughbood out of a Cleveland!—You are quite right, but the borne's name was "Cleveland," he was a thoroughbrod horse named

Neveland.: 1533. Mr. Wernen,-There was a Cleveland Bay is Westmeath, was there not i-There was scene year ago, at Custlepollard, not recently; I have often heard that his stock were of a saleable description, at ary rate thay were good looking. I cannot say whether they had starting, I have never seen them, 1534. It was a long time ago 1-About thirty years

age.

1555. Mr. Canew.—You have a thoroughlood sire offed "Delight" i— We have, who has get more good stock than any other horse in the country.

1530. The CHAIRMAN .- Are you a member of the

Ecyal Dublin Society !—I am. 1537. Are you on the Ormali !—No, I am not; I on on the Horse haveding Committee, an additional member of it.

1518. Sir W. Grener.—I notice in the Dublin show, there was a three-year-old golding shows, a thoroughbred gelding-you give prime for thoroughbed yearlings, but no price for two-year-oble and three-year-oble—and I ascertakeed from the contlorer that this was a clean tood horse, a gelding, and I mid: "What a pity to have contrated that heree." Ho said; "There are no prizes given for two or three year olds caberries I would have been him . he save

s prize se a yearling "1--That is a fact, but if the have been gustrated, he would have been kept for a 1539. He was therearchized it struck me as a loss to the country he was sold at a large price to go 1549. CHAPRIAN,-You are, I believe, occuptory to

1552. Sole inspector !- I believe I am the only one And on their bahalf you would attend shows I -I do; I attend shows throughout Iround, and report

1554. Can you give the Commission any informa-

tion so to the chicots and so on of the Horse-breeding Amonation 1-Yot, my lord. It was formed on the

15th of Angust of this year, and was the entorme

of a deputation that waited on His Excellency on the 13th of May. That deputation was the entering of a

Society !-- I am not, my leed.

to the Dublin Society accordingly.

cut Ireland

of the petition >

abroad i-Nearly all thoroughbred houses are golded in this country; they are bred principally for the purpose of making steeplochase heree, and they are navely all out as yearlings.

1040. Mr. Carry.—Just to make him quiet for training?-There is a prejudice against stallions for steeplechazing 1541. Mr. Whench.—As a matter of fact there

are very few half-heed herses now keps as stallious? -Very few, very rarely. In fermer days people used 1542. If the present race of half-byod horses die out. there are really not young horses in the country to replace them !—Not half-bred horses; I only know of one half-bred stellion heater in Meath now.

and he is the preperty of the Moster of the Mentin 1543. CHARLEMAN,-How do you account for that change !- By feation a it has become unfashionable to

ride a stallion, 1544. Mr. Whencer. But if these horses were registered, and a register adopted for half-bred hopers. don't you think it might then become more fashion-able !- Unicohtedly. 1545. Lord Assrrows,-And also do good !--We

stated as a fact that a stallion ridden to bounds, or yound, if he is aver-research is nown moise so bired

a horse sgehnt-I have, and I believe it is an 1547. Has not that something to say to the contrating of some of these becam in the case of huntern't-I think it has; and also that a half-boad stallion is in the system of the second community and second in their stables, as a rain they are troublesome horses; and in any case they require an energicum assents of work and exercise to know them fit, more than their

legs will stard. ps will stand. 1548. Mr. Carriw.—They require to be isolated in buxes !- They require to be isolated as wall.

Captain J. F. Terman examined. 1555. To where did you send these letters saking for

the Irish Horse Breeding Association !- I am, my level. opinions I—To the judges that stiedy come over to the above in Dublis, and to the leading dealers 1550. Are you a member of the Reval Dublin. threnchest Ecoland. 1551. Do you do any work for them in any way !--150d. You may then to the leading dealers in Eng-Did you not send them to people in Ireland at I do ; I act for them as inspector under their horsebreeding science for the registration of sires throughall !-I did not ; personally this letter is not a letter of

my own; perhaps I should my it is a letter of Mr. A. J. M'Nella, of Kilcock, County Meath. 1157. But written on behalf of your Society !—It was prior to the formation of the Society; that letter was dated let of Mor. 1558, Thes formed the basis on which you

petitioned I-You, my lord. 1559. Perhaps you would read us the petition ? strongly of opinion that the introduction of Hackney stallious into Iroland will preve a serious injury to the breed of Irish horses, and that it will be impossible

petition against Hankunys being imported into this creatity by State skil. This is a copy of the letter that was itsned asking opinions upon it, and this is a copy therefore, humbly petition His Erdistricts : we, therefore, humbly petition His Ex-arment public funds being applied to encourage is writing. I have been requested to ask yen, among Hackney stellions." other good authorities, on the entject of the importation That was very largely signed, indeed, and laid before His Excellency on the 18th of May here at the Costle.

of Hackney stellings into Ireland. You will oblige us 1560. And that petition was the cause of the formation of this Society h.—Yes, my kerd. 1561. We shall be very glod to hear any infor-mation as to the objects of the Society, and what steps were taken to carry out the pocessy, and widt steps were taken to carry out these adjoind.—The Scotter having been formed on the 13th August, 1816, I beg to submit a copy of its members up to the present date (preduced); it contracts come 210 members.

very track if you will write a letter stating your ex-perience and opinion with regard to those animals, and what effect on the breeding of carriage horses their introduction into English counties has produced. Will you kindly allow me to make use of your letter when he deputation waits on His Excellency the Lord Lisotenant a formight bence?" This is a copy of the petition.

1562. In that material to our inquiry !- These names are drawn from every part of Ireland-representative people-thoroughly convenient upon the subjest of horse breeding. it of home reseming. 1563. What we chiefly want to know it, what the object of the Society is, and what means you take to carry out that object !- Perbaps I ought to read the

letter that was cont in answer to one we received from your Secretary upon the subject.

1664. Give us the information say way you like ; I only want to know what were the objects of the Horse-breeding Association 1-Then here is the letter, my lord :--

"11, South Frederick-street "Dablin, 26th Sept., 1896. requesting information as to the some and work of the Irish Howe-breeding Association, and an expression of its views on several madiers connected with that anticot. I am directed to store that nt precent the primary object of the Association is to collect such in-

permation and evidence in regard to horse-breeding in

"Sps .- In reply to your letter of the 11th inst.,

the different parts of the country as they deen it im-portant to submit for the consideration of the Com-The Association includes among its members. a list of which is annexed, a large number of conflorer who take a deep interest in maintaining and improving the high character of Irish heres, not only an ing the high couracter of 1886 heres, not only an that it was only through such an organization as they have formed that the information and evidence which they dress it desirable to subseit for the oscalderation of the Correlation could be removed in a satisfactory form, and they trust the action which they have taken may be useful to the Countries in segmention with the ardson consiry they have undertaken. The Association does not contemplate taking any steps for the registration of stallions. That most important duty, so far as it relates to thoroughbrod heeres, has description of the past two years by the Royal Dublin Scoorly in connection with their herm-breaking scheme, and has been attended with most suitifactory results, which will, no doubt, be fully explained to the Commission by the officers of that Society : it is how, ever, right here to observe that the Hiere-brooking Association attach the greatest importance to the recisionation of spend and relitable stallions, and are of opinion that that that y about the income of the Reyal ublin Society, and sufficient means placed at their disposal to carry it out in an efficient master, and that the register should include every class of stallion which it is considered by connectent and independent judges desirable to encourage in overy district of the country. The Association is in favour of giving prerelums to registered stallious under such conditions as will accure mitable sizes being available for the service of mares of factors of limited means at a medicular or nomical fee. If such no arrangement could be carried out in conjunction with the giving of enheten tial prizes in cools county for young meets used for stud perposes, and young stock got by registered studiesar, on the system now adopted by the Reval Dublin Society in the administration of the Government grant placed at their disposal for the improve ment grant placed at their disposal for the improve-ment of the breeding of borses, it would be attended with natiofactory results. The word 'half-bred' stallions requires qualification. Stallions pure-head on one side and on the other having several crosses of pure blood have been used with advantage; and the Association is of equinion that such half-beed stallions, if considered suitable, from their performance, their size, conformation, and action, should be ensouraged and included in the register, and that their stock should pertinitate in the same benefits as stock out he registered thoroughbred sires. There is another class of half-bred stallings, which may be termed 'menowle that have little (if any) breeding on either side, and which, notwithstanding, are largely used by farmers,

is, comparatively speaking, worthless. The Association is not in favour of the introduction of Charles blood into the eventry. The crossing of a Shire brood mare with a theroughked horse is not to be recommended, in the base of producing useful lumines of It is nessible that the mating of a parties agreed. It is possible that the making of a stallion may produce useful stock, but there is though out the country a desprected objection in the ining out the country a desprected objection in the inin-duction of Harkney blocd in any form; and it is rie nificent, in support of this view, that English and nificent, in support of the view, supply in Ireland, foreign dealers, who buy because largely in Ireland, foreign dealers, who buy because Internal in Ireland, and in Ireland, in Ireland solunit becawith the names of gentlemen who are usnaval to eive evidence on the several pricts ref. to in this letter, and trust the Commission will be good enough to hear and consider their statement."

That embraces chiefly the objects of the association which was formed with a view to gather evidence generally by letter and by query form, a copy of which I with to hand in, throughout the centry, the information that could be got regarding the different

as the service for it small; the product in such our

1505. To whom was that letter addressed !... That was sout into the Commission some three weeks ago 1566. Then you issued a series of questionst—We imped a series of executions which I have handed in subject of home-breeding gunerally, and obtained answers generally.

1507. You see we will be very glad to bear the

opinions of this society you represent through you or through anybody else that the association likes to soul, bat I don't see how we can take in evidence any thing in the nature of reports of your association which are based upon the answers to a series of core tions without calling before us the people wis answered those questions 1.—The bulk of these, my lord, will be prepared to come forward here and sup-nort their statements.

1568. But there are rosen there a breadend of them? -I have meased it and brought out their opinion, and if I may state it, as to the ratio in which it is may state that in bulk. 1562. Let me look at it. We shall be very harm

to have our facts, say statistics, say information of that kind that you can give us now, but I think we will have to consider if your society wishes to put is a report founded on the spinion of a great number of scale, we shall have to consider how to deal with it We obvierely connect only before as as mitosment May I get in copies of replies received from these different dealers and guatlemen on the subject!

1570. No. I think not.—May I read their original 1071. You have got the letter that you wrote to the Commission, I think you better give an ear statistics you have got, and afterwards I will consist the members of the Commission as to how they shall den) with the other restless. Have you any statis-

tical information to Containing 1572. Three were certain reports and things Mr Roberts mentioned that he said be thought would come latter from you I...Our association has been been entered by the second of the second of the first based entirely upon obtaining reliable swidence from the country apon the subject of bone-brooking generally.

1573. All I want you to understand it that we will be purfectly ready to bear that evidence, but it

must come from somebody whom we can examine and cross-examine !- We shall be very pleased to abmit to your lordship a great number of gentlemen. I have already handed in a list of names of parties wishing to be examined 1574. Yes, but in the meantime have you get any information was our sive we from vocatelf !- I am quite at your service to answer any questions.

1975. For instance, I think you said you were the imperior suployed by the Royal Dublin Society? 1576. I should think you could give the Comedosion very valenble evidence of your experience in hand, and I have som the different stallions.

1577. What are your duties as inspector !-- I have seen nearly all these thoroughbred stallions, 285, that have been mentioned already to the Commission. the Dublin Society have been very strict in having these gapacroised, not only as regards veterinary examination, but otherwise, as to their shopes and confier

1578. Do you inspect all the stallions that are reguered !- I have not men them all, for there were arms of them accepted before I was brought into office, so to speak, I have seen the bulk of them 1579. Also the meres that got numinations!-I have seen a number of those at the mare shows. I can give yen e voture of the sires throughout Ireland, as they are by counties, I can also give the ordinary agricultural returns as to the number of

hence in Iroland.
1980, I think we have got them 1-And the different breeds in the different counties, showing the proportion between the registered sires and all others

in the counties 1581. Mr. Wassen,-Are you soesking only of the sives now 1-Of the sires only now 1583. The CHAIRMAN.—We should like to have all that very much !- In the County Antrim seconting to the opticalized statistics, I am quoting from the year 1835, there are 65 stallions, of that 7 are only runs-

tered under the Royal Dublin Society. In Armogh there are 26, whereas only 4 of these are threegolitered registered sires. In Cartow there are 43 sires al-together, of which only 4 are registered. In Clare there are only 5 registered, whereas altogether there are 63 in it. In Cavan only 1 registered, whereas

there are 51 sizes altogether in it. In Cock there are 23 registeres, and between Cork Essi Roling and Cork West Riding there are 205. Dongsi, 2 registered; 59 altogother. Down, 7 registered; 85 altogother. Duckin, 16 registered; 75 altogother. Fermangle, 4 registered; 28 altogether. Galway,

stramment, 4 registeres; 20 amogether. Girwsy, 13 registeres; 136 altegether. Kovey, 3 registeres; 6f altegether. Kildare, 15 registered; 65 altegether. Kinga Greenty, 1 registered; 31 altegether. Kinga Greenty, 1 registered; 31 altegether. Langiter, 6 registered; 54 altegether. Densty, I registered; 71 aldegetters. Leaguere, registered; 54 altogather. Letterin, none registered; 59 altogather. Limiterin, 16 registered; 88 altogather. Londenderry, none registered; 18 altogather. Letth, 4 registered; 30 altogather. Mays; 1 registered; 54 altogather. Manth, 32 registered; 105 altogather. Manth, 32 registered; 105 altogather. Justice 105 altogather. Monegiam, 3 registered; 35 altogether. Queen's County, 5 registered; 52 altogether. Rescormon, 5 registered; 48 altogether. Sligo, 6 registered; 56

reguleree: 48 offorcase. omp., superson. attopotion. Toppoury, 14 regulered; North and South Riding; 154 altograher. Tyrone, 2 registered; 49 altogether. Waterford, 8 registered; 55 altogether. Westmenth, 8 registered; 62 altogether. Westord, 18 registered; 133 altogether. Wickley, 6 regis-tered; 54 altogether. Total stallions in Ireland. tered; 54 altogether. 2,332 , total registered, 234.

1583 Are the stallions belonging to the Congested Districts Board included in the total 1-I presume they are in the agricultural statistics

1584. Does it give the ages of the stallions!-Yes, it gives thoroughbred, half-bred, Harkney, Shire, Clysiesde, agricultural and all other breeds in each county. 1585. Can you give us them, you have given a total of \$,352, our you give us the proportion of the various breeds - Yes, total thoroughbred sires in Ireland, 202; total hilf-bred sires in Ireland, 552; total Hockney, 1R1; total Shire, 49; total Clydendale, 249; total agricultural, 470; all other breeds, 79. Total, \$,332 sizes in the year 1895. I would not place great

may have a strin, and it is very hard for the courserators to get a current report of them. I say that owing to the questions that were put to me myself in my own place by the enumerator when he came round. I saled him if he know what it means, and he seemed ruther in the dark about it himself. 1586. Those are the figures of the Apprenitural Returns 1-Those are the Agricultural Returns for 1895. 1587. Are the ages given !- Not on that table. but they are given in another table.

1588. I mean the ages of those 2,332 stallions !-No, it does not give the ages of those 1539. They are of every age 1-Every age from twenty-seven years old, which is the oldest stalling I

know serving in Ireland, down to two years at which I mot a Hackney standing the other day in Kerry got by a Congested Districts sire. 1590. But those 2,352 stallions are all serving 1-

I could not say so. 1591. What do the returns pretend to give if they include all etallious, of owner they would the throughbod yearlings and two year olds? 1592. Mr. FITZWHALAH.—They don't include mee-

bornes !- "Table 17, showing by countres and per vinces the member of sires serving mates in Ireland in the year 1893." 1505. Mr. Witterer.—It is possible the same horse may be counted twice over, if it serves in two contra

ties !- This return is taken at the man's place when the commenter goes to him. I do not think he could be counted twice. 1594. The CHAIRMAN.-That gives 2,332, of which only 234 have been registered, perhaps you wouldexhoss faregoutered i - Well, as far as my department goes, the sire in order to be registered, his mane mest he

submitted on an application form to the Society, they require a sound certificate in the first instance, and covery strictly into the motter in every way it in possible to go to see that he would conform to their rules, and if there is any doubt then at all I have been sent for the last two years through the country to proof sme 1515. Do you report so to their soundness !-- No, unloss there is comething I am specially saked to point out, it is as to their conformation and action generally

that I report 1736. Do you know how many applications were made to the Society !-- I think it says that in the front page, if you have the register there by you applications were received in the year 1896 for the

registration of 264 stallices.
1597. How many of them were accepted \$-284, and a great many more spalled for it the year before.

1590. Can you give us for 1995 the amount of
applications, what I want to get out is that if there are only 134 registered out of this large number, I want to know whether there were many more applications that were not accepted !- This year there appear only to be 264 speliestions, that does not some within my department, I can only quote from what I read in

the frontiscince. 1519. Then you have to go all over the country !-I do, I travel north, south, east, and west

1600. Can you form a general opinion as to the 2,000 stallicus in rough numbers that are not registered!—Well, I am somy to say they are conpound to a very large extent-I have seen a large 1601. Don't mention my particulars, I want your

general opinion?-They are to a large extent of the most nondescript character that it is possible to im-agins, chiefly standing at a very small fee, influenced very frequently by a glass of mult, as they call it in this country, the furner very often is influenced to that extent, though he may be advertised for £1 or £2, but really the money that is paid is nothing approachreliance on the total of throughbreds, for this reason, ing that, it is meany fig. in many cases. I som talking now of the very bad class, the nendestript class, that are warponsible for the refuse that it less been teld your locality appears in the fairs in the country. 1992. That I hope does not apply to the whole of the 2,000 t ... I am not speaking with reference to the

whole of the 2,000, of that there are nearly 500 thereoughbrode. I am eneaking claisfly of the half-brods and nondescript class

1503. Of course all you register are thoroughlised !

—They are all thoroughlised and sound. 1604. Can you give any general information as to the thoroughteels that are not registered !-- I think their chief recase for not being regutered must be tiest in the first place they are not sound, or else saces applications would appear in that frontispiece to be registered, they are not able, I presume to get for-

three are some people it is very hard to get to register, at the present day there is really no moust inducement beld out to any registered stalling like there was in the first scheme that come out of

16th The only advantage of registration is the certificate that the licens is seemd?—It is telling its tale from your to year to a marked extent, the farmers are anxious now to go to a stallion where they can see their way to give the fee, but unfortunately the fee is the stumbling block, that is what prevents the forevers point to these stellions in many cases, he over unformatairy to the chespest and also to the netrest

stallion. 1606. May I take it that your opinion is, in view 100. May I take it that year opinion is, in view of the signres which year lave given us, that the quantity of stallous is sufficient b—The quantity I abould say is ample if the quality and conferention and soundness were right, we have ample stallings in the country or regards number.

1637. Do you think as a general rule that the staffions are the less minpted for the different districts they serve in 1- No, I do not. 1600. Have you any suggestion to make as to how the quality of the stallions generally could be im-proved, and how they could be better selected as

soltable for the various districts 1-By registration. 1009. Registration conferring a certificate of sound-ness, and also of solitability 5—Yes. 1010. Well now as to mares, what is your cointon! ... The experience that I have gathered shiely has

the last three or four years, and from those Shows that are imaggrated by the Dahlin Society in councetion with their horse-breeding schemes. 1611. And what opinion have you formed !....In some counties, and they differ to a very marked extent

-in some counties the mores are particularly good. good size and good bone and of a good heady breed, whereas in other counties they are not. I won't give a sweeping statement, but I say, to a lurge extent, in some counties. they are not fit to bread from.

in some coventies, they are not 6s to beend from.

16:28. Not fit even for the local demand for agricultural purposes 1—There are a great number that
are unds for this purpose, both from the such unacoundness, fit some cases the furner breads in the
poorce districts, from that that be cannot sell,
unfortimately, from sections or unacoundness, beparts that to the observes howes in the hopes perts that to the enespeet flower in the hopes of making money, that is where the downfall has been, and the rubbish has appeared in the fairs as a resalt. 1613. You think the quality, as far as you could judge by faire, has deteriorated t-It has in some

percent county to south states out in about it the constinu they are very keen indeed about going to a 1614. I am talking now about the mares, it has been suggested that there is a very great tendency on the part of the farmers, especially small farmers, to

to a furnisser who will give a better price for a show. year old, and they sell them as remounts instead of retaining them. A great number of filling to be remaints. I have beard it stated up to 65 per cont 1015. Do you mean re-mounts for feerign countries;

For everywhere; it is thought at least 65 percent.

I think we provide research for the Italians now. and Datek and French, and other covernments 1616. fe year experience long enough to make you

to form an octation as to whether the mores are as road as they used to be, the general stars of these t My experience connect so over very more were been certainly in the last ten years I would not my in some counties they had deteriorated at all ; in fact I would say they had improved. I speak now more of the Counties Meath, Kilders, Topperary, and Weaford.

1617. Yau think they have improved there ! - I do. 1618. Well, as to other counties !- I think they have determented to some extent. 1619. Have you any idea of the cross !- The cause is from what I stated before, my lead, that I think they have gold the cond ones and they have been the to breed from that they could not sell from some

cases, that I have before mentioned, accident or un-1630. I forget whether in your letter to the Con-

minaton you made any auggestion as to the registration 1621. Or dealing with the question of meros in any av 1—Not to my knowledge or recollection. 1632. Have you any suggestion in that direction is make yourself5—I think that the old scheme that the

Dublin Security had to 1894 was a better solvens than toolsaugh that if the two could be worked together in conjunction, that is by giving possinations to the in conjunction, that is by giving non-matters to the mares and subsidising the stallions to some extent, it would work better. I think the money is exceed over a large number of mores, and you get more in touch with them. But the present system of giving works well in Timperary, at least about the Circums district it does ; they are keener about horsebreeding in some counties then they are in others, but that

may be owing to the fact that they have a better demand in those countles 1623. In the questions you sent about the country did you include questirus on these points !-- Then have from the Mary Shows that I have attended to asked constitue as to the class of many and as to what sire would be considered best suited to mate that mare with, and it was on that point that I wished to give you that table us to the replier received; I have not reduced one from the total amount of regites that has come in, and I find that 72 mer cent, were it.

The Chalanas ... We will me into that openion another time 1624. Lord Asstrown.-Don't you think one of the reasons for going back to the old scheme of the Royal Dablin Society was that the Society practically guaranteed the stallion owner part of the feet !-

I believe they due.

1025. Would not that encourage the owner to keep better airso, to guarantee his fees; it is very herd to guarantee fees now 1.—But by the altered scheme of 1894-95, the money was more spread over the district, and I think in that way it did better. 1626. Sir T. Easongs.—Can you say what step are taken to ensure soundness in the stalliers i... The committee appointed for that purpose by the Dellin

I believe they did.

Society, and there are none more competent men, they oblige a certificate to be forwarded with the surficetion, before they entertain it at all, of soundness from a qualified veterinary surgeon, and if they have any doubt at all upon the matter, they send their own special veterinary surgeon to give a certificate. 1637. Is that done every year t-No, not unless there are some points raised, and it is considered measure to no further into the mother. sell their best mares to go obroad and breed from inferior ones 1 ... I think that is so, they sell their filly

1623. Once a stallion is registered it in memorati he remains sound !-- If he has serviced at the age of see years old and he sound them I think that they take to total covarideration, that he is fit for registraters for 1679 Lard RATHEONNESS.-I think you intriponed

shat you came across a two year old Hackney shallone serving in freeland, where was that !- That was of serving an arction, where was than s-That was at Kenzare, I was there on behalf of this association this way to see the stock out by the Committed Divpicts Board area at Kanmare show, I saw him there be you two your old, be hell been driven in a car and

to covered ten makes this year. 1620. He did not belong to the Congested Dispricts Board 1-No. 1631. Lord Assrows.—He was a half-bred Haok-

cor 1-I could not now but I have not lest sicht of bice in any minut's eye yet. 1652. Lord RATHTHINKELL -- If you have any notes constraint for I should like to hear them 1-He was a two year old lay entire colt by "Fashioz III," he was trained, he did not go well at all behind, he had fair action in float, he covered ten mares this

1623 Any size chost him !-- He was 13.3. I not the stendard to him. 1624. Did be slow say hone !- Pair setion in

front, goes close, goes badly belief, yes, I throught, the been in the stock I saw there, and I saw a member of them, was by no means small to look at, not good bene to handle, to put your hand on and run it down, it was not small bene to look at.

1635. Mr. Carrow .-- You say, Ourtain Tothill, you are Immentar on habelf of the Monet Dublin Society I... 1620. What are your doties in that capacity !-- In

connection with the registry of thoroughtend sizes in Ireland. tions. 1637. In that surposity don't you see to the saved new of these registered sires !-- I am not a qualified

veterimory scopeon. 1628. If you saw any patent defect you would call the attention of the society to it?-I um supposed to

give a full report.

Ireland at more shown and fairs than most year, could you not give us some bles as to what the replace of the various growes are like, where there care been orosses spot as libbro beenes and Harkneys to in the rooth, whother they have metured into berses of any size or whother they have fidled to grow so they do in England !- To which haved especially de vers rafes !

1640. The various breeds you have referred to, the Ornesdale and Shire horse and Hadimer 1—In Longfird I have seen some big stock there, there is a good deal of the Clydesdale blood there.

M41. Do they grow into hig active hoves or not?
-No, they chinly grow to 15 3 hands high and go to take strong transpers and vanners and are sold to the prothern dealers shout two wars old they to too meethern swaters about two years etc. they irrandate that neetion of the country and take them up north ; and that accounts for the large marker of homes in the north; they are beed in large quantites

is the south and sold to the north, from thence to the south and sold to the north, from thence northern parts of England.

1642. But it is also the case not only with these homes but in an immunes muster of the riding homes of the mouth of liviand find their way un to the

small farmers in the north, they are taken up by the small duniers and sold to small farmers at one and a half or two year clus, they are kent and stabled during the winter and go back into the dealers' hands and then go across the water chiefly as foreign re-mounts t.—That is what I have seen. 1643. But now at these shows there is a variety of

treases there !... There are 1644. Have you ever seen any useful horses that

almost useless. At the late Balliumine show I now a lot of stock there that I don't know what purpose they were brid for, what sould be dune with them now adays when the general utility brene is not so harrely

16:0. Dut have you seen any useful deaft booses beel snywhere in the south 1-I have, I have soon in Waterford a lot of horses not quite so good as what on cell half-bred; they have been sold but sless have gone for better purposes, stronger remounts

1646. Mr. Wheren .- Do you see any way in which the registration of the Royal Dublin Society could be interoval, or do you look upon it now as a very perfect system; has anything struck you in your convying it out-did you see soything we might do that is not done now i-I don't see anything further that could come now |--| nor to see anything fraction that costs of be done; I think it means with the approval of the people throughout the country. I don't think there are none cough stallions in Irahast registered for the repairments, and it would be the greatest been to the country if we hold a number satisfied to cover the moves of the country at a reasonable fee.

1647. But do you think the people appreciate the gistration now more than they did last year!-Without coestion

1648. And it is becoming recognised as a cood thing to have their horses on the register)-Certainly 1619. So, procingly, most men who could get on

and have not get on have some good recess for not being there!—That goes without saying. 1600. You have not formed any opinion as to what becomes of the animals level in the worth b- Yes; I

think they mearly all go over the water, except those utilized in the country for agricultural purposes. 1651. Do you think most of the unituals bought in the northern fairs are bought by English and Soutch dealers !-- I think they are at Moy fair and others

taken over the water 1662. The CHARRIAN.—In what especity did you my this visit to Kennage!—I went to see the stock that were got round shout Kenmure, and at the Cougested Districts Board Show at Konmare

1053. That was the purpose, but I asked you in what supacity you went!—I west on behalf of the Irish Home Breeding Association.

1654. Do you know the compensed districts gene-rally yourself 1-1 do, I know Maye, and some of the west beyond Galway, I don't know may of the northern 1655. I mean ean you give on one information

besed on your own observations of the Harkney was dues anywhere also thun at Kenmare 1-1 have not them in several phone; I wanted to try and meet them in several phoen; I wanted to try and next them in an open class, and I found them at living show on the 5th August of this year in an open close there, and in the classes open for harness or hunting purpose for youtings, two-year olds and three-par olds, where the Hackney and the thoroughtend men in open competition, the stock get by theremethered in overvieue took all the prizes

1056. I was asking you rather could you give any 1995. I was asking you rained come you give any information of your own knowledge, similar to what you have teld us about Kamsare, in other ports of you have told us about Kenmare, in other pasts of the concented districts, did you visit any other row tions !-I did not go specially to any other district, but you will have angle evidence of that from other

1657. You mentioned this one particular horse at Kenmare; is there anything else you would like to say to the Commission !- I saw those at Hollsmorn! this year, and drove one going to tho show; it was not a very gaudy goer, it had to take time every now and again to get its wind, and I was very late for the abov on the second day on account of it. 1638, Mr. Wission.—How old was he?—Four

1659. It could not have been one of our horsest-No, but there is unother stallion in the district | I am. was also at the Cork abow this year, and observed the driving competition there. I am afraid the driving track was not onite small emough for a cost-le that went down there to get twises , they were very much distressed, the Hackneys were in a frightful lather, the blood hogges won one prices. One wongot by an American stood breesewer one prices. One wongon by an American stree beenight it into this country some years ago. 1660. The Chairman,—One what 1—One of the

borses that got the prize there; it was by an American 1641. Did you see many specimens of the produce of the Congested Districts Hackneys at Kenmare !--!

did. I suppose I saw quite firty; the feels by "Fireway" strock me as being in many cases shapely nice looking illies. 1602. Were they mostly feels !- I could give you the exact return. I think there were about therteen ventings, fifteen fools, all by "Firetway" - a very nice

well made lot; the yearlings were not sa good a lot. 1663. Two years olds 1... There were treaten entries : they were very that miled, bad shoulders 1664. Were any of them sold !-Oh, yes, but not at that show; they are sold in that district, and bought by men who take them up into the southern

parts of Limerick and part of Cork; I know the 1063. Are they bought as foals t-They are bought or feels and yearlings. 1666. You don't know what prices are given for them!—Yes; as fools and yearlings they go to about £4 or £5, and beyond that age £5; they soldon keep them on there, although in two or three cases I did meet men that were going to keep their mares; they hot taken prizes at previous shows and were brunded, and by that means they were to get a free service, and that was their inducement to go back to that brood.

Limerick and Cork !- Yes. 105%.—What are they bought for i.—They are hongs t by the small farmers for working purposes,

hough by the small farmers for working purpose, and I suppose eventually for breeding. (6) A. That is only a supposition, you don't know! -I have not seen them bond from. They are also

bought in the west in the Consumers districts and they are brought up to Edgeworthstown and Longlood and un to Strokestown, which are all hunter-bearing &

1670, Lord Amrows.—They buy these bores as feels down at Kommeré.—They buy them as feels and 1671. Mr. Wwiprest -What did you think of the

mares at Konmure !- With some few exceptions ther were not a good lot. 1671. A great many common and coarset-Yes. 1671. A great many ecomon and coarset—Yes, they were common, still I throught that if mated with

a horse with really good shoulders they might have produced useful animals. 1673. Did you notice that they were very read, in kneed the mares !-- Some of them, seem of them were

1674. Do you know that the two year olds but hees left out on the mountaint—Yes, some of them had come some distance. I don't know that they had owner off the mountain, but I don't think that would after

their fat-sidedness. 1675. It is a very poor district !- I would not say that altogether, there is some of it good band, I drawn some portions of that quite capable of feeding horses.

1076. On which side 1...On the north-western side 1677. Where were you going from !-- I went over the scation growing and turned to the right and week to a lot of farms up that road, and then turned and eamo back to the right, right round the valley

1678. It was all fairly near the town 1-I did not go too far out, I saw a number of stock on the land that enabled ma to judge, I saw stock by other horses too on the land outside.

1679. Sir W. Giller, ... At these fairs I suppose there were many feels!-This was a show, there were only fosls by the Board's stallions that steed there the year before

1650. The CHAIRMAN.—Were there any fools by any other stallion except Hackney stallings !-- I my some but not at the show, there would only be allowed at this show what were got by the Rouri's stallions.

1661. But the Board have other stallions. had only the one stallies there that year. The Commission adjugraed to November 17th.

FOURTH DAY .- TUESDAY, NOVEMBER 17th, 1896.

Present :- LORD RATHDONNELL in the Chair: Mr. Waxness Mr. Princy La Toucest. and COLONEL St. QUINTYN.

Mr. HUGH NEVILLE Secretary.

CAPTAIN TOTALL regressions. 1683. The CHARMAN.-Captain Tutbill, I shink you have some documents you wished to hand in to the Commission as part of your evidence —please state what "hop are I—You, my leed, in accordance with the consent given by you. I will put them in. They are copies of lastees received from different people in England on the nulreceived from different peoples in negative or on min-ject of Harkney breeling. They are from Lord Coventry, J. M. Richardson, Willeaghly De Broke, Owen C. Wallis, Gordon Canard, W. Forbes, Lorn Oven C. Wallis, Gordon Canaro, H. Land, Cheslaus, East and Co., Wimbook and Co., S. Hasses, A. J. Brewn, J. Schwie, F. J. Oranger, E. C. Brown, John Lett, Arther Tophon, Heavy Eccel, Goorge, Labor Heavenmoton, W. Gasterion, Richardson, John Hetherington, W. Gentterion, Alirud Wirlson, M. and W. Milton, John Darby, James Rinthinson, D. L. Bestly, John Johnson, John J. Thompson, George Nourse, J. O. Rossin, F. P. Raber, George A. Miller, A. Gemmell and Sons. These letters, my leed, and also another pumpiles I have received

breeding of house in Ireland, and any of these gentle dence on the question of the introduction of Hackneys; their orinions are retiraly against the Hacknet blood being introduced, and thay say the introduction of this strein in Yorkshire has ruined it on a houses and harness breeding county. I have made a calesbarness and hunting purposes beaght in Iteland by English buyers who have communicated with our Association on home-breeding and who are opposed to the introduction of Hackney blood into the country-They represent in figures £265,010—a very large i.em. I also beg to lay before your levelskip the original resolutions of the following Societies through-out Ireland, condemnatory of the importation of Hackney sizes into this country. These Societies and Shows are considered by all competent authorities the

1 1010. And you are of equision it wends the adventure to have been the projective of the projective project the total of the projective price to being registered. This would be a matter for a competent body to desire the freeze of the projective price of the projective price to being registered. This would be a matter for a competent body to desire the freeze of the projective price of the projective projective projective projective price of the projective price of the projective p

any of these horses you have mentioned as good streat—Well, I do not; I could not answer that question strengths of. I know one horse who gate acceptonably good stock, and I know one of them that both well last year.

1697. How many crosses has he !—I think he had

prims at some of the shows.

f 1699. Have you seen any of them 5—I have.

f 1700. You don't know what they have done in the
bentier field tu...No. I only trace it hat one up.

1701. But in printing horses on a separate register would you insist on there being any special number of eroses on the dam's side !— Without exception.

1702. How many !— Certainly not less than three on the dam's side.

1703. And in addition to that would you require

them to have been proved as being good steek getters1— Well, I would possessably, through Lines beam distanted these should be accepted welloot hering been proved. 1700. Goldon! Br. Questrae-flow enough year prices before you could prove their stock 1—15 would after this acceptant of these since for sace years, firey years. But there is no doubt that these focuses state under the original of the size for sace years, firey years. But there is no doubt that these focuses state under the original region by Instead state under the original region by Instead before a size of the large size of the size of the size of the size of the large size of the s

Mr. Tiwvid

for two unbroken four-year-olds by him the year before last, and I got second prize in Dublin for one of them. Zingane used to be ridden by Lord Waterford constantly, 1705. Mr. Warners.—Do you know how man proses he had of thoroughbred blood b—I do no He come from the south. He stood at Wickiew for the last two years. One of the best hunters we have in County Heath, now ridden by our Master, Mr. John Watson, a blook-brown house by "Belisbir." He takes his fences slow, but no lumi is too long

1706. At the last sitting you gave figures as to the number of thoroughbred sires in Ireland. You gave them from the Registrar-General's reverse, did you not !- Yes, I did, from the Agricultural returns of 1895.

1707. Have you may reason to believe they are servest !-- I have every reason to believe they are not correct as to thoroughbreds. 1708. Then as to the number 192 as the

number of thoroughbred stallions, you would not say that is correct !-- I would not like to set myself against the suppression, but I know what the councestor asked me in my own varil-

1709. But you did not give those figures in an My Davin Remera, Knockhor, Ballymens, Ca. Antries, examined.

1715. The CHARRIAN,---You see a farmer, and live in the County Antrim !- Yes, my lord. 1716. Have you any personal experience of the breeding of horses I-I have been breeding for about eighteen years.
1217. What dame have you prescrally used and

what rives !-- I have used theoreighbred sires, Yorkshire seaching horses, Norfolk Hackney, and half-bred horses, and the dams have been what we call the old 1718. As to the dams !--Well, they are half-breeds I have been using principally, that is to say the vessit of thoroughkeel house and an ordinary half-brod mare, which I can scarcely describe, but a chas of mare the produce of one eres, probably of a threeugh-

1719. You say you have used the half-bred dam. what has been your experience in using such animals and the half-bred sire? -Well, if put to a fairly steen more uppined of 15.3 to 16 hands, they got good marketohin stock 1750. Can you give un any information as to the

half-bred sire used-what crossing he had !- Well, he was bred from a thoroughbred borse, but it is very very hard to describe the dam, that is to say, she has been a cross probably from a thoroughbred and from a Yorkshire coaching mare, or what we call the old Irish mare that has been in our country for generations. 1721. Have you used a Hackney eiget - Just twice. 1722. What was the result !- Well, I sold the horse

as a four-year oblined he seemed to turn out fairly well. I have one two-year-old at present, and I have a mare carrying a feel to a Hackney. That is my only experience in Elackney breeding.

1723. Are many horses bred by the farmers in your district or neighbourhood?-A great many 1724. Can you give any description of the type of mace usually used in your part of the country for hreeding purposes 1—Well, they are usually from 15

to 15.2 hands in height with lots of musels, good fan bonts, very active, sharp, with plenty of go and mettle about them, and as a rule fairly clean larg and not much hair on them.

1725. Have you had any experience of breeding from two-year-old mares !- Yes, very considerable. 1728. Can you give us any opinion on that !—Well, I do no think it desirable from my experience to been from a two-year-old mare unless she is un-sized, and

correct?-I gave them as quoted from table 17, page 27 1710. Then you would not wish them to be assumed to be the actual number of animals standing in Irolassi ! we as that

1711. In your opinion is it convect!-- I did not perpare it sayself, and I would not swear to it. 1712. You have not made any inquiries to test it to see if it is correct !-- Well, I have. I have been terring to make up a voters of sires in every openty 1713. And how does it compare with the record to the bine-book ? -- I can't get the thoroughbreds to tally and I find there should be an increase in the half and I am there because the first instance, the cause-breds and all other broods. For instance, the cause-rations and this quantities—"In he registered I" What it would be a seal book. If they say he is registered they might rost down a Hackney into the thoroughbred return if he said he was revis-

tered in the Book. 1714. The CHARPMAN,-Is there any further statement you wish to make!-No. I have been to the different shows through Ireland, at Cork, Limerick, and Hollymount, and seen stock by different tires through Ireland, and I have been at Mulimear and Navar shows this year, and could tell if necessary about the stock I saw there.

then I would only besed from her at a very sarly are that is at a very early part of the season, I would not put her to the horse later than the month of Max. my reason for so saying is that otherwise she fosts late and on a rule they don't malk well unless they feel

well, and the foal won't winter well if it is a late foal; the mare has not been developed thoroughly at two years old. That is my experience. 1737. Have you keed from a three-year old mare!-Yes, I always follow, and I find three-year-old foals are stronger; the mether is better able to nowish them,

and they are better able to winter, and consecrently better colts, that in from a three-year-old mare, that has been served as three-year-old, fealing as form 1738. Have you found say difference in the amoun of milk a two-year-old mare can give se compared with a three-year-old mare !- Nothing farther than

waste a three-year-old mare s—recturing species cases the appearance of the fool. That is to say the fool always appears better nozer-shoot. It seems to be a fatter fool and more muscular, but as to a given quantity of wilk that is a thing I could not say. 1719 Do the farmers appreciate a good sire, and are they willing to pays fair prior down in your part of the corntry 1—They seem getting to do so more than formerly. Formerly they did not appreciate a good sire—they seemed to appreciate the money more.

That is to eay, they did not seem to care to pay to high a fee for a vire even if they got a good one 1730. Do you think now they would pay ! -I think more as, owing to the indecement held out by the Boyal Dublin Society, because they find it resources tive, and also that there is a better class of stock th

pays them bester to breed from ; the poor common class of homes are really a drug in the market. 1731. Have many Hackneys been bred in your neighbourhood!—A good many. One season about eix years ago there was a good many bred. There have not been many since then up to the last two or three years. There are more being bred now.

1732. You say it is on the increase!—I should not say so. That was a particularly good year—that is to say, from the owner of the Hackmay stallion point of star. 1733, Have you a sufficient number of saitable sires in your district !- Well, I should say so; that is

to my, suitable for the district, but I think they might be improved muon. 1736. What class of sires is generally used in the attrict there !-- Well, half-heed bures. 1735. You mentioned the Royal Dublin Society

just now; have you had any experience of the herafits derived from the Royal Dublin Society's scheme!-Yes. I am the owner of a size under the Royal Dubin Society's scheme, and I know one instance where a con got his more to my sire, and as a two-year-old it realized £100, and foals, not from mine alone, but Sees others—other registered sires under the Royal Dables Society's scheme-have been selling year well as wearling foals; besides, it has been a strong inducemust to the farmers to improve and retain their better

due of march 1736. Do you think the poorer ferrores derive any advantage from the solvene !-- Yes, doct-letily : it is the worse farmers who do-that is, formers from 20 to 30 agree, who breed most. I should say that 50 per are of the formers who brend are the holders of holdings of from 20 to 30 sores. They are the close who breed most. Of course the larger farmers are exempt, egier to the stareletion that the valenties must be

1737. New, what class of horses do you think your district can loved to the best advantage !-- Would you say, my leed, for the particular wants of the farmers or, from the Smancial point of view, to sell !

clear of home should a man breed !- I think from a large-sized thoroughbred house, an un-most thorough-

got a very useful home from a balf-tred or Hadrity for doing their own particular work—farming work. They are able to do that kind of work and the Hackney, for example, and do any driving or family burseeing they require, and it think they are very easily 1740. Have you any suggestions to make to increase

the horse-breeding in your district !-- I think there might be something done by offering move valuable trines to the corners of reares to retain their better class of mares in the country, and in connection with that I would suggest the age of five years should be the lim't allowed. The Royal Dublin Society, according to the present science, limit them to four-year-old mides mares, which should, I think, be ortanded to fire years old, and they would themby here a much fully developed that has proven larged by her shapes and appearance that she is really a good mare; at the some time I would be disposed to strike out the prime for foals under the scheme of the Royal Dablin

Somey.

174). Mr. La Touren. — The prime for foals, would you smit that !— Yes, and extend the limit as I say to fee years old. The foal is really like a boby, and it for pear old. The foal is really like a body, and it alters very much, and you can't bell much about it. 1142. I did not bear the first part of your evidence, so you will stop me if I ask anything that has been alted before. You keep marm yourself.—Yes, 1743. And was been a salities 1.—Yes.

1744. One 1 .- Two at present

1745. In one a thoroughbred !-- Yes.

1745. As one a thorough area i — 1 co.
1746. And the other?—A Yorkshire coaching have.
1747. You said the mares in the country were

useful, rather smallish mares 1-Yes. 1748. How are they beed as a rulet—From Goeonghbred horses and half-bred mares, and a three gibred horse again. There is one oross in them, probably on the dam side.

1749. As a rule the farmers have been in the habit

of using a thoroughbred horse !-- Yes. 1750. Do the farmers up there breed many horses for selling outside their own requirements f—I should my a considerable number

1751. Where do they sell them !--Well, the best market is in Dablin.

1782. Do they send them up from Ballymens to Dablint-Yes, we frequently take the prize down to

1758. And seh them to dealers !--Yes, or private contienes

pretty largely from Hookneys; that there has not been so much since, but that there has been a rerival I-rate so. 1755. To what do you attribute the giving up of the breeding of Harleneys six years son la-The follows of the sire, that is the failure of the recourse. It was so disampointing to the farmers who put mores to host that they would not use him for the second year

1756. They did not get such good prices for their arrow sawy out mit get must good proon for tager young stock in-Yes, and it think they anticipated more than they were likely to realiss. As regard quality, we had an exceptionally good better "Excelsion," but I think the percentage was very small of what we might call tip-top homes or even scoveri-rate horses as far as Hackney horses go

1757. He was, you think, an exceptionally good screet-Yea. 1758. A Hackner !- Yes, a Norfolk Hackner

1759. A statemer may thoroughbred Hackney marcs in that part of the oventry !- The only thoroughbred Hackney mare I think Mr. Martin is the owner of 1700. You said that the produce of one of your sires as a four-year-old sold for £100 l-A two-year-old us Belfast show.

1761. What was it got by 1—By " Mascarelle." 1762. A thoroughbord horse 1. Yes. 1763. That is an unusual price I should par t. No.

1703. That is an innumal rates I should may b.—No., I should not say so, I think larger prices were vealised by Mrs. Anderson at Ballymoney for two-year-olds.

1704. Was the dam of this two-year-old thereughhred 1-Well, just a stain, the more was not entered for the Stad Book, but she was almost eligible, the

ne was by " Master Kildson." 1765. You spoke of the price of salesble foals, do they sell their young stock to fools !-- Very few, the foals would realize from £5 to £9.

1765. Whatever they are got by 1—By a better class house they would realise more to be a good broader the foal will realise £1 or 30s 1757. To it your experience that the feel got by a

half-bred horse or Backney is a more likely looking animal to the eye as a foal than one got by a thoroughbred !-Yes; very much better looking. It pleases the farmer, "fills his ere," in other words it looks like a useful hoose. It is the custom to work them up to Occe or four years old and soil them as five years old. and, as a rule, the half-bred sells better than the oroughbred. 1768 Colonel Sr. Quistin.—Do the farmere up

in your district breed weighty draught horses !- Very little owing to the character of the district. They do The land is of not make it a specialty in breeding. light gravelly soil and compountively hills, and active light gravely sed and compountively may, and active

1760. The light class of horse-light van or hos 1769. The light class of horse-light was or but horses is what they breed!—Yes. 1770. And not heavy drought horses!—No, we have a Shire horse in the district and there are a

fav mare cut to him, but the mares are not sure ec. 1771. But for that class of home for their own

grooms-what we should call light van homes or lishs useful agricultural horses do yet profer the Cleveland, or Stire, or Hackney 1-I prefer the York-shire couching horse; as a jecof of that I have one, eners coccuring horse; as a perce of that I have one, I got him from that point of view, the financial point of view, to put to my own maces, because I was guiting them too light by following the thorough-1772. He is a stronger horse !-- Yes, a good deal

more bone, cood flat less, and good action, and up to

1773. You were speaking about breeding from two or three-year-olds, and Lord Bathdonnell saked you about the wilk from the mares and other coretics bave you noticed the difference in size and growth of Hr. David Hr. David

the foals between two and three-pun-olds I—Yea, those from two-specield moves are smaller until not so well nearthed, and we observe when we are swaining the fash that we can take less milk from the two-percedd than we get from the three-pun-old. 1774. They had the elophomoush disa large minute as those from the three-pun-olds I—No, orthirtly not, for the first two percs. It will take a year longer

for the first two years. It will take a year longer to develop.

1775. Mr. Wassen.—You said you have for your own purposes a theory-glidred horse and a Yorkshire

ecaching horse i-Quite on.
1776. How using mores do you allow the thoroughbred to serve t-Sixty.

bred to serve i—Sixty.

1777. That is rather above the average of people who keep horses —Yes.

1778. He is a good server i—Yes, a very good feel.

1719. What price do you get 1—For the exace, I get £5 3, and 6, ground fees, and .60 100, for the find, but there of course there are great many farmers come for the exaces, and if they have paid their manay.

1760, And if they like to wait on the chance of a feal they pay £0 100, 1—Yes, I should say more farmers per in for the system of the manon than for

the foal. I have a larger percentage of season menthan I have poing in for the foal. 1781. That applies to both horse?—Yes. 1782. How many to you let the Yorkshire horse

1782. How many do you let the Yorkshire bores earne i—Tvenny-dre.

1783. Not niced—He would serve more let he did not get more. He is expelle of serving any amount. 1784. They like the thoreughbred best f—Yes, he is accepted more. They duries more advantage under the lices beceding scheme. There is one three miles

off—viscoling at Hallymeras—under the locus-breeding school. 1185. Xour own mares; what class of mares do you hreed yourself 1—Good, strong ones—they vary in sus—a have non more I breed from 16.2, most are 16 instell, or 10.5, and three one to and three years.

oble not more than 15 bands.

1786. They are not mores of pedignes 1---No, I have
not a thereurhiese mare.

Have you recover any of their gets with a thereon, the three points of the points of t

and more boss.

1790. I think you said you bred twice from a Norfolk Hackney, was that Excelsion in both cases t—

Northic amounty, was that Exception in both cases 1ves.
1791. But you sold one as a four-year-old 1—Yes, 1792. What price did you get 1—255.
1792. That was subclear 1—No, trained to risks.

1794. Have you a two-year-old coming on brei in the arms way 1—Yea. 1795. Out of the same mare 1—No, out of a different

mare.

1796. And that practically is your only experience of leveling free a Hackney I—Yes.

1797. Have you seem many Haddneys I—Yes, X have seen a great many fools and horses.

1798. You consider "Skooling" a need house to.

Yes, of his class.

1799. Rather heavy head 1—He was not sweet.

1890. Not much quality 1—No, but a fine move.

1801. I think you talked about the marco of the

1801. I think you talked about the mares of the old Irich hered, onn you trace in any way this old Irich hered in your neighbourhoot i—Well, no. I could not trace it. I could not go back, but it is generally admitted that these mores have not been interorted most. They must have been crossed with

Xericalize or thorographred.

1802. I suppose they were practically kept small because the necessities of the situation did not require large course.—Yes, that is it.

1803. Any heavy course blood like Stire or Clydes dule is not required there i—They are not wanted in the district.

dale is not required there f.—They are not wascod in the district.

1804. You think they would do have f.—I should think the farmers would not accept of them, would not find them beneficial to work their farms.

1993. There are not many corrhorts tradition in your dastest now —No, not much in the Shire of Clydestale. 1806. But there are a great many so-called high here because 1—Quite no.

1805. In there say way of knowing if these halbreds are sound i—There is no way of knowing; indeed, there is a way of knowing that they are no sound. 1809. You say, I think, that farmers of twenty or thirty sores comprise fifty per each of the loss

breaders in your district V will, that is no. 1810. Do you this that the oppinion of these cas should be taken as to the slaws of sizes they would receptle if slews were to be provided by publish mosely—1—1 containly thinks the opinion of three near should be taken as to their own requirements; as a rath they are an intelligent, hard besided, stravel people, qualue expited on financing what is the they require.

1811. And you think there sught to be some way of using that grouping as to the best dates of house of using that grouping and to the best dates of house.

A. for them: 1—Yes, I think so.

1812. When you say that the best market is

1812. When you say that the best market is

1813. When you say that the class you yourself

1813. You generally bring them to the show and

all them in the show 1—Yes.

1814. That is your market F-Well, I have sold in Moy, at home, and in Dublin. 1815. What would you consider the best market for the small farmers—Ballyaneas, and a fair called

for the small farmers 1—Bullymens, and a fair colled Greebelley.

1915. What buyers are there there 1—Scotsk, English, and Selfast men.

1811. Ottober 2015.

1811. Ottober 2015.

1811. New of these upg earlings become that Meere.

1818. New of these upg earlings become that Meere.

1818. New of these upgested and the set of the set o

fown and feed them 1—There are a good many.

1821. Boughts in the spoth and then feel and add
at the May as four or fire years old 1—Yes.

1822. The Chamman—You used the expression
Yorkshire conshing been, it that any reception's
treed as distinct from Hookney 1—Yes, there is quite
a distinct tudhook.

t 1823. And the house you have, what is het—He is a pure Yorkshire coaching horse registered in the stand-book. 1894. In your opinion do more house of the four and divergencial class sold in your district so to Scotland and England or teared southwards—De-

Sociated and Eigland obiedy.

1835. Mr. Wassen.—Talking of these small breeders who have sventy or thirty acres, don't yet think that action is a very valeable attribute in this breeds—Twe, it think so.

to to come a res, I tank so.

I 1836. In not that what the dealer first looks for last

Yes.

1837. And won't a moderate home with good action

at all better than a better home with indifferent
action! — Yes, it is most necessary.

1833. Than societie is a valuable attribute!— Yes.

action gets a feel with better action than the thoroughheed i ... I have from my thoroughbred horse some fools which I would compare their action with the ordinary Hackgoos; as a ruin fonds have good action as fonds;

that drops away as they become yearlings and two-year olds, from the thoroughbord it drops away, which I don't think it will from the Hackney, because it is more or less natural 1842. You think the Hackney would be able to

registe stock that when it developed would have tetter action !- That is higher action.
1833. Haviness horses!-- Yes, I quite agree with you. 1834. Do you think if there were better sires in the locality the trade neight be developed of breeding

tarrans houses?-I think it is very desirable to get a better class of horses for getting up-sized and high priced harness burses 1835. You think it would pay!-I think there

would be a derivated for a good sured, up-tized harnous horse. I think the may let is glutted with poor sized herses, and owing to the general use of the bicycle and the probable use of the motor car these horses are more likely to be a glat in the market.

1835. Have you been in many fairs recently !- Not recently. 1837. In the last few months !- No.

ISSS. You don't know whether it is a fact that there are a great many homes unsaltable now !- There see a certain class, but I think the good class bornes

people are at staxious to buy as ever 1839. You think these people who do produce borses now, like small farmers, are deserving of help to produce a better article !-- Yes, store to them the larger farmers, who can afford to pay a good for, if they would only do it, for the use of a sire. 1849. Mr. La Touche.-You speak of breeding

fire upstanding carriage lorses—how would you proceed to breed one—by what means !—I would expect to breed them from a high class more to begin with, and a gross with a Yorkshire horse or a strong thereagained with high action.

1841. Mr. Wrench asked you about getting the opinion of the small farmers who broad these lorses.

-dec't you thoug the granion of men who live in the country like yourself is as valuable as that of these farners !- I don't know, that is an invidious question. 1842. Don't you think you know the requirements of the farmers who farm thirty sores quite as well as they do themselves !-- I don't know, I should not say

that, they are intelligent, shrowd men, who would make things agence for themselves botter than I could do for them

Mr. La Toronn.-You take a molect view of your own intelligence. 1843. CHARREAN.-Have you got any salesce in

your own mind as to obtaining the views of the country side as to what class of stallion is most looked for 1-No, the only scheme I would suggest is the offering of better prints for mares; once you do this they say "it is a profitable investment for me to keep

arty years. 1840. Whan stallions have you used and on what

vay good mare seeing that I will be able to recoup Son 12 1006. myself by getting a valuable point from some society. Mr Dy 1844. Your scheme would be on the lines of the Resell. resent scheme of the Royal Dublin Society !- Yes, I would make the pures more valuable. 1845. Colonel St. Quinvin. -- World you not make the more show herself with her foul, or in fast again?

examined is not the proper season for this reason, the farmer goes and gets his mare screed with a registered tire; he gets a certificate that she has been served; on the production of that his more is ellipside for a prin-though that more may not be in fixed. No doubt she has been served; that costs him £1 or £2, and he poskets £5. The owner of the registered sire is bound to give the certificate. I would suggest that the proper time

would be when the veteriousy suggeon or local intelligence would go to show that the mass was in feal-1816. Mr. Workscu.-- You think there are cares where between mores have got prices !- You, I am 1847. Or prices when they are not in feel to the

actual borne from which they got the certificure !-- I am afraid so : a horse may be let at \$1, they offer a 25 price for the best muse at the Show; that more may have been served at 21, and the ewner actually pockets £4 and keeps mother aran's more out which 1818. CHARGEAR.—Are you aware it is not a kard and fast rule with the Hoyal Dublin Society !-- I

undrestand once the certificates are given by the Local Committee they issue the money. I um aware the Local Committee are empowered to withhold the 1819. You are aware that moder the present scheme

money prizes can be given to fealed-I am quite aware of that. 1850. Have you read the rule !- Yes.

1851. You can give all the money to foals under that rule !- No, there is £100 given to our district, for example, the County of Antriss. 1852. To be distributed for what purposel- Fremores, mares with fool at foot, mores two, three, and four years old, and for fools of a thoroughlyce house in the Ergister of the Royal Dublin Society, 1895 or

1853. Chamman (residue).—Premiums shall be confined to mores with foat at foot, &c, is it not left com to the Local Committee to allocate this money even to feels !- Not altegether, I think, from the rending of the scheme, I may be wrong, I understood it was confined to two, three, and four years old, not to extend beyond four years. 1854. In order to get over the doubt of may mane home winted to a registered stalling was it not cree

under this scheme for fonds to get the prices to order to get over this very question !- I don't see that 1855. You said the time of year was not the proper

time !- That is for the feel that is there at her fost, but then she has to be served again, also must be served before she is eligible, and I think to got out of that trouble you would want to have your mare shown in

March or Polymary. 1856. Mr. Wateres.—When you can tell she is in fual 1-Yes.

Mr. Trionas Macaper examined

1857. CRAIRCAS.-You live in the Union of Ballysort of mares !-- I have bred from thoroughbreds, oney, County Antrim t—Yes. 1858. You are an Assistant Land Commissioner!— Clydesdales and Hackneys. 1861. Have you been successful in your horsebrooding !-- I have had a fair measure of success, I 1859. Have you say experience of horse-breeding to I have here breeding, off and on, nearly for the last have bred a few good ones 1862. What stallions did you say you used b-horoughlyreds, Clydosdales, and Haskneys.

1810. You coly not wen marie to a Mackary—1 generally hear pive hered mare.

1811. And those are the mares that you have been in the halod of seeding to thoroughbut sizes, you must than of Machary harms—1—No. I should have been a fact that the halod of the harm harms—1—No. I should have been a fact that the size of the harm harms of the harm harms of the harms of the

and I some here to a Reakony with very good returbs. I sold the mean afterwards, and that was the only reason I did not continue to hreed from Hackneys. If I had the same mars still I would centitive to send here to Hackness so long as I found

to mided her.

1832. What is the ordinary style of mare in that
country, a big mare 1...No, a medium class mare.

1835. Bigger than the mare your describe 1...Ch) ye,
stronger with more of the enouse of the Cycleside.

1836. The ordinary mare of the country is bigger
and stronger 1...Xo, taking them generally mare of
manifolds marges to the Machiner size "Escalest";

-Yes, that is the horse.

1995. What in your opinion constitute an unmitsible name for a Hackney sire 1—A big rough halflared Chylenkle man, she is not the sort of mare to send to a Hackney sire. 1867. Wattors of borse would you send her to 1—

send to a Mockney sire. 1887, What nort of horse would you send her to t— If she was a strong half-bred Clydesdale mare with good shapes and plenty of action, I would send her to a barengsbred horse or to a borse with two or three controls being it for order was a cool one.

a thereupytees some ore to a treet war two or turns about in this, if I could get a good can.

1818. You don't think an assired hat the think was about the think the sound of the think t

action is right.

350. You say there is a great dearth of thoroughbad stallines up in your country so that you send your more twenty-fire zalles h—You, and that dearth alongather arises for want of partonage.

almosther arises for want of patronage.

1800. There were thoroughized lorses at one time there I.—When I resemble to worty-free or thirty years ago we had no difficulty in getting two or three thereognitude homes in the district.

1831. What sort of horses were they 1—They were haves in the Stud book. 1892. I mean were they good horses 1—Falely good. 1893. What sort of fees did they cover as 1—

1893. What evet of fees did they cover as t— Generally from £9 to £2 10a, as that there. 1894. Have you any idea what the owners of these gives gave for them:—I have not any idea. 1895. In the fee of the ordinary stallion in the country now loss than that I—There are some, I suppose, that if you had, a half-coverein in even resides the

the property of the property o

by your marked heavet, visities the very pool through the treed become seen baselily within the reach of the small ferror, then is the factory with freen twenty-dee to former than the property of the second of the contract than the second of the second of the server than the second of a heave, but haven'ng the serveriges for the service of a heave, but having the qualitate of the said the factories seen to have deleng that it is a rather risky thing breading off a ferrorablesal former.

The second secon

cases to the second constituting that become,
1848. I conclude that the theroughbred boson they did breed from were wordy!—I did not my that it all.
1849. You spoke of wordy thoroughbred boson,

where any weedy berson of any other sortice and the say weedy berson of any other sortice and the say weedy berson of any other sortice and the say of the say of the sortic and the says beed of all is a weed that is from a beautiful think the fact of his being a thorough the say of the say

1900. I though think the fact of his being a thoroughbred was encounting in his favour and invention—by organization of salas that I have been watching of the salas and man that were very more throughbred have his and man that were very more throughted have his man of the salas and the salas and a sall a west of any other bred enough a thoroughbred, you can sala a faces that is not not to the mark if I be has strength, because you will get a man that will leave him to act or to plough.

100). You said just now that scena of these stabilizes and had been to do than they had ferenerity, do you mean to the farmers are not breeding flores as many.

1000. Then they are geding in or many.

1000. Then they are geding to J—Na, but the sendance when the size they are been just he will be the size they are resting to be work for his mant from the two years old.

1908. But I see that in speaking about theeorghbred borses you said there were a number of stallines of every set and breed, necloscript stallons and every description of stallion in the country, and you were glied to say a great many of them were not doing as much as they did f—1 heard that the thurbersy this year was to breed less, that that thus drives were

goes to say a green among or turn were not soming as much as they did !--! heard that the tendinary this year was to breed less, that that class of horse was not gooding so much support, usaif I think that is languly owing to the fact that horses have not been selling so well, especially young barses.

1004. You think they are not breeding so much !--

so well, especially young larnes.

1906. You shink they are not not needing so much 1—

1 forth think this year there have been so many meres

revered of the ordinary type, I think near who have

good mayes and good lorness end-needing so many so over

they old, and I think the small close of fermers with, a

power more going to these poer sires have got been

offent on the sire of the same who have the server

there also be gother from the same who have them, and

I have one or the voiletingar surgenies had no telpe.

three par a good many of this case of horse reasbreeding this year, within the last two or three ments, so it would be more or less a sign that they did not get the support they did formeely. 1960. Col. Sr. Querrin.—You heard I saked a question, and you noted it apparently, of Mr. Russell, putting the theoreughted thems on monatch, argumently

the small farmor breads with two objects, sithir to sell or to use 1—X cs.

1903. Hoppose that, as you say, be breads to sell, to may have an animal on hit hands that he consorted as and disorders he hives breading as a missail that may be useful to him if he connot get rid of it in the market 1—Certalisty, that is the one great object he

1907. Then putting the thereughbed house on one aids, what the small former words for his own use, as I gasher, with this light still, it not a very heavy weighty borse, but a horse that one word the soil and take him too the false, a smallfelt, fority strong, useful horse to "You I said at first in answer to a question, that my districted the country in largely heavy still. 1906. Then you like the high heavy house 1—You.

100. Then you must the fig neary notes — I then
you must be fig neary notes — I then
you must not all — Oh, you there is no some gate
one three Qubestian hereas, and they do more in you
it immediate neighbourhood of country than any house
that stead in the fine or mession. I know one horse,
that stead in the fine or mession. I know one horse,
as known that howes never up to dione on 200 mares in
the theorem.

a known that horse serve up to close on 200 mares in the season.

1310. And they get you a close of horse that is under throughout the division for the actual farming y work of the smaller farmers!—You is 1911. Do you think that the Hackney heree which is a lighter bores then bin, and is large with more

on solin, will get the same using som in more well mostle of the property of the same used in the solin will get the same used in the solin will get the same used in the same u

sigh.

1912. There is a great deal talked about the notice can of a burn, and everyhedy likes to so solon to a read certain extent, but is the Hankers exton a useful for a stem for extent for the states for small farmer's horse to do his work, will supposing be cannot sell him 5—Yes, but you must been in mind that there are very few farmores in the

No. 11, 1604. Mr. Thomas Macalon.

North of Ireland that have pure beed Hackery meres.

1913. Lyzow, but the cross 1–1 on coming to that. An ordinary from zone may have sades both set of the date of Hackery and the sade of the control o

but that is only to be obtained from a Hackney more which is twelt for such action.

1913. Then you would not get too much action from the ordinary narse of the country with a Hackney base. I—I show it think you would, and my expectation of selling howes in fairs is that a man who had a horse with trangled notice was generally the nam who

was called the property of the second second what he wanted for the 1915. There is straight action, and there is this extens diamy know acts for many the property of the constraint of the property of the constraint of exceeded, that is a different since of nation 1—1 don't dailed you have very searcy may worth many, either in the North of behave the travery leight show from 1.00 thright have been only to keep the following the real of third that one only to keep the following the real of

ce both sides, the sire and dem.

1917. There is very little cart work mecessary
there 1. There is all the work mecessary on a form.

1918. But I mean the driving class 1.—There is no
former with 25 acres and symwat shat does not like

to have a horness horse

1919. Quite on, we all like that, but do they drive unto there in light vehicles on the read 1-Cu tainly, they all have some sort of trap to drive to morbid to be chart. I don't know any frames of 20 none or none that has not his car or his trap of more densitytion to drive thread and his family about. 1929. He does not keep the home specially for that, he loops in for granted utility t—the tross to

thered a lareau that will farm and do that tea.

1921. Mr Watten—Then you hold that it is necessary to larea you lareau lareau you have probably ped antitionin themse to pet animals with reducible action out of the ordinary masses of the country—Cert mind | I do, I dank that is ongo of the first requisition that any man going to select a size from a nimalor of access well look to, one of the first

usings that is shown to him. 1922. And so pure think that if a thereuphhed happens to have a specificily good action that he has a specificily good action that he has a specificily good action that he has the self-should be sufficient to particularly good of the self-should be sufficient to the self-should be sufficient to the self-should be sufficient to the self-should be sufficient that will be has sufficient to the self-should be sufficient that will be has sufficient that will be has sufficient to the self-should have sufficient that will be has sufficient to the self-should have sufficient that will be has sufficient to the self-should have sufficient that will be has sufficient to the self-should have sufficient to the suffi

it. 1923. Is it not a fact that it is a drawback to the thoroughlared to have high setion or the power of priting it b—I would not like a thereoglibed home with Hestiney action. 1924. I not a thereoghbred home hard for most

as a tule 1—Yes

1933. You said you have beed a far good laceas,
can you give no year/tasks; of any havens you bred,
what they add for 1—No man in Iraduck, I sary say,
likes better to breed a good invaire than I do, natwich,
standing that I have bred Hankings that have been
1 have bred Hankings that have been
1 hot does a great deal in humbers and it present here has
1 ho does a great deal in humbers and in yourse here
1 hot does a great deal in humbers and in yourse here
1 have here.

colt at £75 that he sold twelve mouths afterwards to £300, and be introduced me to a grationan in the Shelbourne Hotel here that sold him three years after

wants for E500.

1921. Thus you do consistently breed good berees in the North of Ferband 1—Yes, we try to hered good serves. And a fattend of units told these loanes, now the fattend of units told to bourse, now to the fattend of units told to bourse, now to the fatten of the fattend of th

and Queen's Co, we would be just an anxious to head from theroughbreds and to bread hunters as gentleness living in those districts.

1937. And is becombreding a considerable industry in your part of the North of Iroland I—Yes,

dustry in your part of the North of Ireland 1—Yes, it is, 1928. And all over Ulster 1—All over Ulster. 1929. Do you agree with Mr. Russell that a very

large number of the houses are lived by men who half from 20 to 30 acres 1—Yes, well, I would give it a wider limit than Mr. Bassell, I would say from 20 to 50 acres.

1830 You think the larger reproperties of brees in

1930. You think the larger proportion of brees is bead by men holding under 50 seres !— Yes, a good proportion.

1931. Do use think that these men are outlified in

form an opinion for themselves as to what slay want?

—I have not the slightest doubt about that.

1932. And you finish they coght to be consided if or you think there ought to be accurated in you think there ought to be accurate any public grant in said of herse-breeding, any out think there ought to be accurate any of taking the opinion of these people !—I do.

This Hereps of the date of the water special water, the solid health of the little date is the water special water, as the solid health of the little date is the water date in the solid health of the solid

cation at any rate.

1835. I forget what qualification that was I—A
man that would carry a turf creal sight roller, and
trot back at the rate of five or six miles an hour, and
As is covered due for months.

i trol back at the rate of five or six miles in hour, and do is every clay for months: 1506. For think there are plenty of those mures to 1506. For think there are plenty of those mures to 1707. And do you think any of the people that have those mures have any record as to their breeding? — I don't think it, they don't per any stimulate to is 1708. And there are formers in your breed in the lattice for press to—There may be individual similar limities for press to—There may be individual similar trefs and use myself, and I sold a half-bred Hackney. se I told you that left the district, and I did not see Mr. Threas

that have a special breed that they take a pride m, and still retain a brood mane of that breed, I have, ve doubt, there are cases of that kind, but I don't know them. If one has a mass that has bred ver well, and they have succeeded well with the stock there is always a feeling or a tendency to keep one of the breed, in fact I have a mare at the persons moment that is suckling her eleventh foal, and I would not like to pure with the breed.

1109. Do you know how that mare is bred back !

It is a mare I hought from the South of Ireland. 1940. Do you think that a strong upstanding Harliney horse would produce stock strong enough to

1941. What becomes of the horses shiefly, where are those sold that are bred in your district !--Well, when a been comes to four or five years of age, and that he shows a his of quality and action, and is likely to make a fair increase horse, he is generally fed by the forcess and taken to the Moy Pair, which is the reest market for horses in our country, it is held once. a month. And then we have a very good fair at Ballyciare in the month of May, and we have a fairly good monthly fair in Ballymens. The better class of boose are sold in those fairs, and the ordinary borses that change bands from farmer to furniar are sold in

1943. Thus most of the horses that are head three are not sold until they are four-year-olds !- Well, they change hands among the formers 1945. They don't leave the locality !- They don't leave the locality wery much. I noticed in the evidence of a witness with regard to Ulster and what because of the houses, a recount that I as an Ubster man don't agree with, and that is, that a large pro-portion of sales take place under a year old in Ulster,

pertiss or man turn peace and that is that the large proportion of horses bred in Ulster are sold while 1944. You don't think that is so !-! don't think it. There are very few horses in my opinion sold in Ulster to go into any of the other provinces at all, the great tendency is to hav horses in the other provinces and bring them to Ulster.

1945. A good many horses are bought in the South and fed in Ulater 1—A great many.

1946. Are many lorses bred in Ulater, do you thirk, of the class that are purchased by Mesure. East and Windowsh, and those hig London dealers, carriage

horses of sixteen hands and over 1-I know two men in particular that Mr. East buys hernes from, and I think very few of them are bred in Ulster; I think they are nearly all hand outside of Ulster. 1947. You refer to two dealers now?-I refer to

1948. And you taink they buy them in the South of Ireland 1—They do. I met one of them in Belfust when I was coming here, well, before I was coming been about the beginning of last week I met him in Beifest, and naked him where he was going, and he said he was going to Mallinger Fair, and I know that that man does not sell horses to say man but

1919. Do you think it is because the soil and disaste in Ulater will not produce as hig borses so the South of Ireland's—Yes, it is, we have not the climate, and we have not the soil, and we have not the limestone. If we want to breed a good half-leed colt we have to give him extra feeding and extra kindness to make up for the deficiency in the soil

with regard to the limestone, and those other qualities that are calculated to grow rise and bone 1950. Have you may experience or did you see any effectnee in the hardness of animals heed from Hackneys and those bred from theoretichereds — No. It have not had much experience beyond my own, just I believe that they were soft in any way. half-bred Hackney at the present time that I intend to

any tendency to seftmon in either, but rather the reverse, he was a horse with rather much plack when we began to handle him, that is the one I sold.

1951. You think there used to be a good many thoraughteodhouan twenty or thirty yearsago hat they were given up. Do you know the resonant-The

owners dropped keeping then aimply because they did

1962. And I think you said you had been watching the sales of thoroughbred horses intely. Have there been any sales of thoroughbred horses in your district -I remarked a sale of thoroughbrid horses from my district at Mr. Balron's sale yard in Belfast some time ago, but I understood from the report that the prices they keought were very bad, very indifferent

1953. What do you call very indifferent ?-- I would not like to not ansmeon anyof the prices at the present moment. If I might give an opinion with repard to the distribution of the Royal Datlin Scorety's inverse at the exhibitions of marcs I would rather go egainst the present principle. Take the County Antrim for instance, I think it is hardly foir that the whole £100 for the county should be given to be distributed at one centre, because it a furner condition by sensing his mare to such sires as Mr. Rossoff's, he does not like to take the trouble of sending his mass, and fool 25 miles to exhibit for the prize, and I think that if the Royal Dublin Society would encourage the breeding of that class of feals by giving and show, to be given in prises either for mares, or for

feels, or for yearlings, it would be a great help to the

Agricultural Society, and would give the farmers in that perticular neighbourhood a chance of exhibiting 1954. That is where a local show exists !- Where a local show exists. Take for instance, C-leraine, we have a local show them that has been in existence for very many years, and if a little help was given by the Rayal Dublin Secrety to our horse classes for feals and mares served by a registered stalling, and for feels got by a registered site, and for yearlings got by a registered size, at would be a very great help to the show. I speak as a member of committee of the show that is would be a very great help to us, and it would encourage the formers in that locality to maport a registered sire. At the present time they have a show for mares and feels in Colousine, which is within five miles of me, but if I want to show my more and

foal I must put her on the roll and send her 25 miles to get to the County Antress show, whereas if a little money was taken from the £100 given to Antrim, and a little from the £100 given to Dervy, and given to the Coleraise Farming Secrety for that particular class of horses it would be a very great help to our society and lelp to encourage the breeding of marre and feels. The Boyal Dublin Society give us at the present time money in the same way for the contrapement of the berriing of aborthorns, we get a certain amount of money from them each year which is distributed over the shorthorn classes, and if they could see their way to help us in the same way for the breeding of houses it would aid us very /

1955. Do you think more interest is being taken in societies now and in shows !- Oh, ves. the ouly great difficulty we have to contend with is that it is very hard to get subscriptions to keep the society up, but if we had a little help it would make up for that, but if we had a little help it would make up for that, and if the halp was given to the particular cleas of horses it would encourage them very much. I may say that our houst show he been very largely added within the last few years by a few guattenen, who, through a public spirit, have given special prime for a occasin clean of horses, the Route Hunt for inchance did not see anything in them that would lead me to I have a gives us a cup every year, open to farmers over whose

land they bunt, and Mr. Taylor, of Coleraine, given two special prims for the best harmens horses in the show. If we could get those things supplemented, for the result of their giving these prizes has been to double or treble the number of horses of the particular cleaner shown. It is hardly fair lines to ask us to send from one end of the county to the other to compete for those Government prise at present, it is rather against the Ballymena gentlemen who are present to my thin, but I think it is only fair it should be

distributed a little more over the county. 1956. CHARKAN,-You used a carious expe regards certain farmers in Ulster, you said they fed borses, I presume you mean they buy them, and take them down there and then sell them again !-

The plan on which they work is, in some particular districts they go down to the fairs in the South or Midfand Counties, and they buy raw colts, and bring these up and feed them in the very more way as I would feed twenty or thirty hullocks.
1907. They do that with an eyn to selling perp where do they sell chiefly !- The great bulk of those

horses are sold to some particular Englishman who comes over. I mentioned the fact that two men that I know intimately sold all their homes to East. they would not sell a horse to you or any other conference until East had first taken his horses out of then, all that suited him; then there are other men who feed them, and sell the creat bulk of their homes

1918. Where do those horses go !- To England, and France, and Scotland.

1959. They don't travel south here! - Oh, I don't think it. 1950. Colonel St. QUINTOS.—I was going to soit

the same question. The bulk of those access, as far as I gather, are bought by the farmers and fed in that 1961. There are a great many bought by small dealers in Belfast and all round there, kept during the

winter, and those chiefly find their way into the Mov. or from the Belfoot dealers across the water from Belfast !- They do.

1953. And they go, the greater bulk of then, to the foreign governments as remounts 1.—Yes, it is a great practice. We have a lot of men who as a dealers, and go down to the fairs in the South and

Midland Counties, and bring up the horses as raw colts, and sell them in the local fairs to farmers who huy one, two, or three horses, and feed thom, and then they sell them as you describe in the May Pair or to Belfast dealers, and they all leave the country 1953. They never come down here again !-- I don't think one m a thousand horses sold in Ulater ever-comes hack to any other province. There was just one remark I wanted to make with regard to the exhibition of mores and finds, according to the

arrangement at present you have only one class, that is up to £150 veleption. 1914. CRAIRCENT.—Who have only one clear!... They can only exhibit up to £150 under the Royal Dublin Society for mores and foals. I think it would two, and make a class that would suit smaller farmon, and then a class without one limit that would writtle larger farmers, because, as it stands at protest, those men you have heard so much evidence about, holders of twenty or thirty or forty acres have to compete against large farmors who can afford to how a very much better mare and feed the produce better. I was present at the last show of mares and fosts at Ballymena, and I thought the small farmers there

were more or less shut out, though they had quote as good a right to win the money as the hig farmers.

19th Nr. Warmen.—What division would we make 1-Up to £60 or £75. I would give a small class up to a moderate sum that would give the small farmer a chance of competing and getting a share of the money, and then I would make an open

NATHAMEL NORTH exemined. 1966, CHAIRMAN.—You live at Brookville, Bully-

1972. Where do you prosure them skiefly !-- Well, I have got some of them in the North of Ireland, I have beed some of them myself, but I get a great many from the South and West of Ireland. I don't know whether I am right in saying West, I am not very clear in my geography, but from much places as Californee, Cork, Burtlemy, Ballinastoe, and Mullinges,

and all the fairs of note.

class of all the others.

1973. Now with regard to the mares in your district, are they a good class of mares, are they as good as formerly or are they going back !- In my epinion there is no such thing as a typical mare, I mean to say there is no type, they are of all seem and conditions, and they breed from every sort of thing there is, that is much to be regretted but it is so, the will breed from great leggy hrutes that should be shorehtered, and they will breed from little common opes, and they will breed from all corts, but armong

them they have a great many good mares. If a good bunting mare comes from the South of Ireland, or any part of Ireland, and any accident happens to her she passes into the hands of a small farmer, and he at cone proceeds to breed from her.

1974. Are the stallions you have sufficient in
rember, and are they of the right stanop for your part

of the country !- I think much good could be done for breeding if we had still more stallions spread over the country and put within the reach of small farmers at small free.

1975, I mean to say it would not pay private owners to procure good enough stallions and put them at the disposal of those people at fees that these people would give or could give !-- I think the Government could help them very much by coattering good stallions

over the country at low fees.

mone, County Antein 1-Yes. 1967. Will you describe the district in which you reside, the nature of the country, the soil I-Well, the

Mr. Nathani I

eoil for the most part in the neighbourhood is of a light nature, and the district all round about is peopled by small farmers, small in comparison with the farmers in other parts of Ireland and England, but they are a very hard-working and very intelligent set of people and they are nearly all wall-dring, and all in good

1968. Do you counider it adapted to the breeding of horses i-Well, whether it is naturally adapted or not I don't know whether I am qualified to say, but the fact remains that a great many are bred there, and even bred by some farmers who occupy very small holdings, and what they cannot do for their colts and young stock in grazing they supplement with other

1949. You have been a successful exhibitor at the Royal Dublin Society's Shown! ... I think I may them to have been fairly snooseful, I wen the jumping championship of the Show three times, I don't think anyone ever did that before. I also won the charapion Stone Wall Jumping event often and often, and in large chance with 60 or 70 beene competing

I have had the good fortune to get first and second on more then one conscon 1970. A great many horses pass through your mails annually !-- Yes, I am very fond of pening

blood hunter.

them on 1971. What class of horses do you refer to ! -- I like most of all, and above all, and beyond all, a good

Printed mace digitised by the University of Southampton Library Digitisation Unit Printed image digitised by the University of Southempton Library Digitisation Unit

What class of stallion, what breeds \$--I der/t brow. I think if you take two or three descriptions of stallions and put the best examples of their own breeds within reach of the people that you might fairly trust them to find out what were the best to breed from, and what were the most paying ones to brood from I would not mind if there was a Cleveland Bay, a Yorkshire coaching horse, a very good Hockney, and a very good blood one, all in my own neighbourhood; I think the people can find out for themselves the once us matter how a stallion is bred you can tell nothing about him until you see his stock. I have a gentleman at the beginning of this inquiry say he would advocate if I noderstood him aright, the withholding of the registration of stallions until the horse had proved himself. I think he was speaking of stallions with a stain, whose produce there might be some doubt about, but I would go further than that and soy that should apply to thoroughbreds, and I will tell you why. I have known meany thoroughlyeck faultleady bred, and fashomably bred, and yet as a matter

stallines with perhaps no great things to be expected from them thoroughleed, and yet everything the get axued a good thing.
1977. Your remarks, I suppose, refer to helf-bred. maris put to the stallions you are speaking of t-Well, you see so very few breed theroughbred that it my be taken as referring more to half-bred maren. Will you pardon me referring to this. Mr. Russell is his evidence to-day and he had, a couple or three years ago, I forget which, a very handsome thorough-bred stallion, I think he was a Government registered one or a Hoyal Dablin Society registored one. He was a particularly well-bred koree and he was very much fansied. Wall, he has gone now and I don't think Mr. Russell will blome me for saying so, everything he got was small. As a matter of fact it would have been a great harm to Mr. Russell if he had lesst him. Quite the contrary applies to the present here he has got new, yet if you had taken their pedigree and soundness you would have chosen one just as fast as the other, and that is why I my if it were possible to do so, I would defer the registration of the stallion until he had proved what stock he had got or was likely to get

of fact no matter what more was put to them they only produced a wretched wood. I have known other

1979. How in your opinion will the introduction of Harkneys affect the trade in Irish hunters !- Well, I don't think there is any cause for the slarm that is to generally expressed at all. I don't think there is the slightest. I have beard it mid that mares brud from Harkney berses in the congested districts will permeate the hunter-breeding districts and do a great deal of harm. I don't know why they should do so say more than the moves that were bred there before the introduction of Hackneys, and they were asknowledged not to be good ones

1978. Have you lad any experience with regard to the breeding of Backneys !- Yes.

1880. Have you say suggestions to make with a view of helping farmers to breed horses, any scheme !--I really cannot say that I have formulated any scheme or thought that mother out sufficiently. I took it that there were wiser bearin than miss engaged at that work, and that they would find out something very good and very useful as a result of their inquiries. I think, generally speaking, that it would be a good thing to try to establish more local shows and give prise for breeding, and try to secourage farmers who had rea'ly very good and approved mares to keep then long. Mr. Macafes suggested that if there were tome money given to the Coleraine Show it would be az advantage. I have no doubt it would. I think if there were some money offered for treatmen in Bullymens, a certain som would be found by the people in the diviries, and prohably a very more little show rould be so t up there, and I think that an increase of

shows throughout the country would eventuate in No. 17, 1800 greed to horse-breeding generally, it would bring people together and let them exchange uless and Mr. Nathed allow them to see the revalts, and where they had made a mistake they would have sense enough not to 1931. Are there as many horses bred in your

district as formerly !-- I think there are a very great number bred in my district. 1982. More or less than formerly !- I think there are quite as many now as ever there were. I think the people are trying to breed now from better horses because they find that moderate or low priced horses

1983. In the soil in your district adopted for rearing good stock !—I think we have some very good soil in the district, in parts of Ulster, in my own district there is some very good grazing, just as good as in other counties; there is more of that old posture for which Month and some other counties are famous, but there is very good grazing that can grow large stock. 1984. Any limestone !- There must be limestone

in the district, and down towards the coast there is a great deal of limestone; there is piraty of old grazing in the neighbourhood of Larne and Carneastle, which is 16 miles from Ballymann; it is really over lime quarries; lote of it.

1965. There was a quantion, which has been asked and answered, about half-bred sires, have you say experience in half-bred sires t—Yes. I continuance one

borne, he probably was located nearer Mr Manafee's residence than mine, but he was known in our neigh-bourhood as Ferguson's "Blood Royal," unfortunately that home was wrong in his wind, and, still more nefecturately, a sertain percentage of his stock were wrong in their wind, but I can say that the cost of his stock that were sound were in my opinion priceless; they were worth their weight in gold; better bunters never were lead in any corpor of the habitable globs, and, so a matter of fact, I wen one of the championships in the Dublin Show with a four-year sld got by hira, besting all ages and wisners there.

1950. What breeding was hell—He was by the
real "Blood Reyn," a horse by "The Mangula," a horse, if I remember him right, with rather a Rousen nose and not the best back, and he was out of a more by "Taziff," and as I understand he was not a clean my - annue, and as I unsurement as was not a clean bred here, has I know that it was quite a hye-word in one coveriny that anything got by "Tariff" had wellmitted endowance, the date of this "Blood Reyal" I speck of was get by that "Tariff."

You don't know what stains were in the dam !-I do not, I could not particularise the stains, darcony it would be possible to ascertain them. but the man who bred and owned him is dead, and whether it could be ascertained reliably or not I am afraid to say. Do you happen to know a lorse called "Victoricus?"

Captain Tuthill.—The Chairman is the owner.
Winser.—Then is there one "Victorious" ! Captain TuthUL-He is dead, he was not clean

Witten. I am aimid I refer to "Victorious," could you tell the owner !

Captain Fusbill,-I den't know, he was a Limerick Witness.-I had a colt by Victorious and I cold him to a dealer for a price that I rarely hear of for a four-year-old, £210, and I heard he gave the greatest satisfaction.

Mr. LaTerone.—There was a Victorious that a Witness-I am speaking of the Victorious by Victor, if I heard the owner's name I would remember it because I get into a correspondence with him about

nding two hunter mures of my own to him. 1958. The CRAIMEAN.—In former swidence given it was etaped that half-bred stallions under certain May 15 1616

restrictions would be desirable animals to have Mr. Nathard As a maker of fact I did not see particularly the former evidence given, because I have been from home. I have only just returned from England and was not siving the matter many attention, but I would be of coinion that if you were sure they got good once they ought to be accreted, but I would be far more partirelar about what they got than whether they had to many or so few crosses of blood. Fur instance, I dut't know how many crosses old "Blood Reyal" had best I would done to her error four-year old hy him that I could find that would not sound in its

> 1650. Mr. LaTopoux .- You say that you consider very sortil fees would have a great effect upon the

formers !- That is quite true. 1939. And it would not poy a man to key good thorographed horses and let them out to the farmers at the fees that a farmer would be prepared to now !-question very much if it would, it may in this way, if there was only one within a biggish radics that one might get sufficient at rememerative priors. but if there were sufficient for the district, and to knock out the had blood ones then the fees would

have to be so low that it would not you any private 1991. You would not expect to get a verful have seen thoroughboods sold at all sorts of prices. 1992. Do you keep a home yourself !- A stalkin I lave had more than one thoroughhed herse. I have a coaple of Hackney stalleds at present, I have a Shire etailson and) have a near stalling.

1993. Have you got any thoroughbred stallions at prower t-I have not, and I will tell you why. The east one I had was a Royal Dablin Society's registered one as a matter of fact, and it is a matter I can be over he not as mand stack. I think as any thoroughbeed in the North of Iroland, some of which I have this moment as yourse ones and home to show. I five to furnor round about me to see what he would breed and they declined.

1904. Was he a good fool getter !-- I am telling you I am prepared to show his stock against that of you I am payared to snow an more against an any thoroughteed house, his last year's fools, year olds, and two year olds. Well, my less Hackney been's for in five gainess, and I get as many mores as I want 1983. Then, as a matter of fact, it was no fault of

heree that the formers would not sawd their stock there !- I would like to show all his stock ? know of against the same number picked from any other barro's stock ner norse a soore. 1995. Do you think his stock are as valuable or more virtuable or less valuable than the stock of your Hackney stallions !-- I really could not say, you

cannot compare two opposites. I could hardly tell you i in their own way I like them as well as I could His surthing, and I kope to have bred some good Hechneys too.

1997. You can compare this way by showing
which will facile the biggest prices 1—I have certainly
been offered (though I have not cold) more for a

Hackney than I could realise for a branter, 1998. This thoroughbred horse that you say you could not induce the farmers to send their mares to had got as good stock as any other thoroughbred

home in the north of Ireland !-- I stick to that 1999. But you would not excited be stock were

as good as stock got by a Hackney borse t. They are better than a large majority of Hackney stock. It is only an exceptional Hackney borse that I am speaking of.

2000. You say that it is only the stock of an excep-tional Haskney that would be more valuable then the stock of this thoroughbred bares I—I mean by that a Hackney with very good legs and perhaps

extravenous action, that is perhaps worth a resolumental perion for a special purpose sont. What I want to get at is you said was could not induce a farmer to need his mare to this borned yours, while at the same time you say his stock aryour, waite is the same time for say its single are no good !—I will tell you what I think would per-haps explain it now that we come to discuss it. At the time I offered his services he was more a less an autried here and none of an knew. I say not know myself that his stock would be as youl as they turned out. I think that is the pennine evolution of the matter

on of the mouver.

2002. What did you do with him !-- I contrate! him and gave him away.

2003. You keep your Hockney stallions, you have

not given them away yet 1-No, I want £2,000 for 2004. Have you been breeding from there for any length of time !—I have been breeding a good many kind of houses for a great many years. 2005. No, but these Hackney stallious, have you been breeding from them for any length of time !-!

2008. Have you sold any of their produce !-- I don't think: I have ever offered any of them.

2007. You did not send any over to York !-- Ot no, never dreams of doing so, that is reparate and

distinct entirely. that is a question of hunters 20:8. In answer to Lord Bathdonaed you said that you did not think that the Hackney concern with the mares of the conqueted districts was likely to have any injurious effect upon the benter becomes have any injurious effect upon the trains account in the south of Ireland, dul you not say semething to that effect !—I did ; I would think it a very speer thing for a man who bred high-slaw buntres to give facto what is acknowledged a bad divition to chain mores and being mores from that to breed high class hunters out of. I cannot impring why they should do

ruch a thing. 2059. You don't think that in the North of Ireland it would have any effect because there is very hitle export from the North of Invited to the South of Ireland 1-Oh, there is no export from the North of Tecland to the South were whatever because the North of Ireland men can find a moriet for themselves and if the Month of Ireland man bought them ? cartainly agold not be for their oun use, they would

be looking for a market for themselves 2010. Do you think this Harkney strain is a good hardy strain to introduce !-- I think some Hackneys are as good and game unimals as are living and our

ttay as long as blood ones 2011. Speaking generally of the blood is it a good harness blood 1—I think there is a great deal of rubbish among the Hackneys and in the Hackney Stud Book, and I think the name percent audies to of, but there are Hackneys as good and as gone animals as ever tred, who will stay while they can Nvc, while breath is in them.

2019. Have you a home show at Ballymens !-We have a jumping competition every year. 2013. Driving 1—Yes.

2014. Have you get a teach there !- We have. 2015. Is it a new one !-- Exactly similar to Dubles.

2016. Same sine?—Same size, our sugmest earn to Dublin and got his mess arements and everything bee-2017. How long has it been made i-Well, it is just 2018. Did you take an active part in the prepare

tion of this home truck hard did. 2010. Did you express any opinion about its size! I never think it desirable to have a show yard and harmon tenck too long, too hig a one, and I with tell you why, if you are looking at horses and their movements and you want to see their action you don't want them to go to a distance and out of the rance of

2020. Don's you think you can see a horse's action better on a long straight piece than when he is always on the turn !— I think you can see a hope well enough on one the size of Duhlin and you can see one well on a track less than Dublin. I know when I went to lades at Newtownards where they had unlimited page at revision name where they and unaccool had to bring then into a smaller circle, at close not more that you must keep them going for a less time but they are more under the command of your eye,

2021. If they are unseer you a smaller number of Average would give you the same exportagity of seeing them as a larger number of circuits 1—That is so, 2022. Did you express an opinion on the laying out of this track that the circuit was so large that

haves got by Hackneys could not go round twice t— I did not, I know what you refer to, but it is a more perversion of what I said. SCGL. There was a witness here sometime ago told as be could hay four year olds in England at forty per cest, changer than he could over here, and if he was

a dishonest man he could buy horses in England and brine them over here and sell them at forty over cent. profit !-I on sars he was not dishonest, that gentle-man, he would do no such thing. 2024. No, of course, but do you agree with him !-I really don't know, I hardly ever saw a colt in Enghard worth buying, and I have had the back to have had several of them myself, and I always wished I

had cut their throats on the other side and left them 2025. Do you think the Irish horse own any of his prestige to the fact of his being almost invariably got by a thoroughfred horse and that his dam was got by a thoroughhred horse !- But I don't think its does is always got by a thoroughbred borse, and I don't-

know waere the proof is that it is, 2025. There is no wroof of course, but don't you think or do you think that an English dealer is prepared to give a better price for an Irish borne than he would for a home bred in his own county from the belief, at any rate, that the animal he is having in Ireland is got by a thoroughbred horse and is out of a more get by a thoroughbred horse and is out of a more get by a thoroughbred horse i.—I think the fact remains, and I am proud of it, thet Irish horses sell better than English horses and that English dealers will come and key then and be very glad to

2037. Do you think they would give the same price for high-class Irish hunters if they had reason to believe. that this Backney blood was disseminated among then at all i-That is a question I could not answer, I think the English dealers will buy what they like when they see it and they don't ask particularly bow it

2023. Do you go down to the South of Ireland to buy horses !- Very seldom. 2029. Cabirmee and Cock !-- I have been there, but that is all, I have no time to go to faire.

2020. You are aware that although these horses don't come out of the province of Uleter into the southern and eastern provinces of Ireland herees, do come out of the congressed districts in the West of Ireland and come eastward into Leinster and East Manster!—I don't know anything shoot what happens there, I don't know anything about them whatever, I

2031. You did give an opinion just now, you said you did not think that the growing of the congressed districts mares with Hackney horses would have any effect on the breeding of hunters !- I report I don't see why it is to be foured as much as some people seem to fear it. M03. But at the same time you have not much experience of these particular districts !-- I have no experience of the congreted districts, I don't pretend

bred in your district by the farmers, what class do ye Nuberial they chiefly try to breed 1—They breed to use and Mortes. eventually to sell them, they want to make them useful during the period of their maturing and to sell them afterwards 9034. And when they sell them is action a very

great consideration !-- It is an absolute necessity. 2935. It is amelesolate necessity that a home should

have action to realise any paying price!—Of course. 2036. Have you formed any opition as to whether a Hackney is best able to produce action or whether on can get equally good action from a thoroughbred with good action himself !- Well, I can only my that as a matter of opinion I think the Hackney would be more likely to produce action than a thoroughbrod. 2037. Do you find the suituals that are heed by your Hackney stallion now from half bred mares have more action than ordinary action !- Well, I hardly like to snewer that question because it seems touting

my horse, as a master of fact they have. 2035. And with regard to the mares you don't think that any such thing exists, at any rate in Uleter, as on old Irish breed !-- Woll, if it exists in Ireland at all it exists in Ulster, not that the mares have been indigenous plants but they have drifted there coming from the south as bunters and baving met with socidents have been turned into use.

2039. Then a great many marce that are kept to hreed from have some from the couth 2.... Underthis edly; Mr. Macafee tells you that the mare he heed his high-priced lumber from came from the south. 2040. If you were looking for a thoroughlyed sire

as a sire for hunters, would you consider it against a horse to have very high action or not !-- It depends entirely on the nature of the action; if it is nice. stesight serion from the shoulder in front and the ooks well fiested beland, and no dishing or turning in of the feet, no landing on the heels or anything of that kind, I think good action is to be preferred to that of an animal that goes along digging his toes in the ground and making you think that he is going to fall and hreak your nock coming home. 2041. Do you think Hackneys have good action

from the shooklers !- There are some of them have most charming and magnificent action, and others have the worst class of action, purpoing their less up and down in the same place and knocking their feet to pieces.

2042. And I think you said there were Hackneys

that had as good staying powers as any horse 1-Yes. 2043. Have you had any experience yourself of driving houses bred by Harkneys 1-Yes, both pure

2044. For long distances 1.—Very long distances. 2046. What do you call long distances 1.—I think a horse that goes 60 miles or over that in a day.—I mean during the time yee drive him—and does it in ood form without needing a touch of the whip or being spokes to, that he is a very good one 2046. Have you had Hockneys that did that i-Yes, decidedly.

2047. Do you think breeding harness horses is equally paying with breeding hunters !- Well, a biolocians harness horse is worth a deal of money, and is much sought after; but the crimary harness horse, I hardly see how an Irish farmer can breed him to supete with American opposition.

1048. Is the American opposition very strong t-The American opposition is very strong, and Ameri-can horses are being brought into Ireland in hig batches workly. 2049. Do you know at all what becomes of them! -I do; they go into carriages and they go into town become work, and percel van work, and all that nort

2030. And if they are distributed and decked and e) on, is it easy to distriguish them from Irish hyrnes I-A man of considerable experience can do so Apr. 17, 1986. Mr. Kathuntel

with wonderful certainty , but a great many of them it is impossible to tell. 5061 Would you suggest any marking or branding of foreign borses that come into this country as a protection ?-I don't know that it could be carried out; but I think it would be a very great matter if they were branded or marked, because I know that some of these mares are bred from and their stock will be sold as Irish bornes just the same as these

Hackney horses you speak of 2052 But the class of houses bought by the London dealers, high-class carriage kor-es, they me not bred much in Ulster!-No, they are not here much in Ulster, when they are beed it as more or less an

accident 2053. They have not the mures !- Those Lorses are bought in the fairs such as we have talked of-Ballinssice, Mullinger, and all those fairs; they are bought there as three-year old colts by North of freland farmers, who gest them through a process that they call feeding them, which, as Lord Rathdonnell kas and, as essenting difficult to understand; but it means feeling them for eale. These men her them as three-year olds and bring them to my neighbourhood. There is one man lives within four miles of my place, and he sails about two batches in the year to East; a batch will mean 16, 18, or 20 horses. He have those all in the fairs I have stated as three-year olds : he brings them beene and keeps them for pearly twelve months in a small loose box, and if you looked into it you would wonder how a loose could remain in it and he bealthy. He foods them with special analoss and food prepared under his suprimendence; and, let it be approxima feeding or otherwise, the fact is when you come to see those barves before East comes to buy them you are automitted torond measure at what what a man once said was true, that "the hest of a barse goes in by his mouth." If they have got a resomable good house to begin with in one year by this

keep they can grow a slasting spetanding horse worth the money Fast gives, sanging from £30 to £130 for these as four-year olds unbroken. 2054. And you think it really is the feeding they get during that last year that has more effect on their growth than their previous feeding !-- I know the

men that beed them in the south could not tell the houses again if they asw them. They grow to an extraordinary extent in that ver !- They do. 2:56. I don't suggest that the Hackney is at all

the horse to produce a hunter, has have you ever beard of an instance of hunters produced by Hackney stallions !—I have, show-yard winners and fearers burses over country.

2057 Have you heard of any that sold for large prices 1-I know Mr. Cooleron's "Flower Girl, won first veige at Yorkshire, and first at the Royal Show, was out of a Hackney mare by a thoroughbred borse. I further know that Mr. John Logan, of the Lake District, in England, heed a obsernet horse, which he sold for 300 guineau to Stoken, of Market

Harboro', the horse was ridden two sessons with the Quore, and made over 400 grizess at a public the Quora, and made over too gentees as a public sale in Leicester, and it is said thouged hands after at a higher price. That horse was get by "Sportsman," acknowledged not a very good Hackney. 2058. Do you know what mare 1-It was a good mare, as near thoroughbred as possible. And I also know that Mr. Churles Wilson, of Kendal, Master of the Oxenholme Song Hounds, that his famous house

"Ambross," known all over the north of England, was heed in the same way by a Hackney stallien. I know from a good judge that both horses were fast enough for "Bligh Leiconterships," and could stay with

the best. 2-60. I think you said that you considered the farmers in your district very intelligent, and you think that the small farmers, holding under 50 acres, who beved horses, are competent to give an epunion 2010. And you think that in any step to give then state old their opinions eight to be taken as to the form in which the aid should be given !--); you give them the sid in a way they don't like they won't accept it; they are not naturally impudent, but they are very independent, and if they don't like it thry work have it, they will tell you they are much obliged to you, but it is no use to them and they will no

trouble you. 2061. Have you over attended any roles at New market i-No I have never been to Newbyylos. I

have been present at some rales in Dongaster and the Bignitison sale at Middlepark

2003. You think you have seen as many ben and useless asimals among thoroughbreds for sires as true have a manua Hackneys !- I think there are a terrible lot of the aughbreds that should not be allowed to get stock of any king 2063. And you think it would be well if some people took to breeding thoroughbreds for sires instead at y breeding them for rusing !- I deresay that would be very useful, but I have all along held the

opinion that a sire's value is the stock he gats, and that you commot tell until you see it. 2064. Therefore, you would not register !- Therefore I would not breed with great contilence from any horse however well heed or good-looking unless I ked a sample of what he got; of course I would willingly

enough make the experiment. 2003. That would not the prices up wer 2003. That would not the priors up very much of those houses that did breed good stock 5-Well, it ought, they are the ones that should be bred trong-I am making some experiments reviel at sevent to try and got at the trust of the Harkney question and to find out whether it is going to do the harm which is feared. I have put my Hackney to a Rassian Orloff mare, to an American Standard treeting more, and to two hunter mores; these two many looked this year, and had very good-looking fords, but I a thoroughbred store. I have one at the moment coming two-year old, bred from him and a clean thoroughteen more, and I am going to see how three term out before I express a strong openion that Hackneys are going to destroy everything, as other people have done, who have not tried it.

2086. Do you know anything of a house that Lord Charlesson ind, called "Broad Arrow" !--I can't say at the moment that I actually saw him, but not that you have mentioned him, I bought a horse brid' by him called "Mentagon" at Dissymmon, a great horse and a typical weight-carrying hunter, and I sold him to a Leicestershire dealer for 200 goines. and he was sold, as I heard, to Ford, of Learnington, who won first prim with him at the Warwick Hoysl Show, and then sold him for a very tag parce a benght that hereo's own brother, that had been specially trained for harness until I bought him, six and had some milloyed in his life. We Show, and then sold him for a vary big parce. years' old, and had never galloped in his life. est him to gallop and jump, and tried a lot of soloning, and I showed him at the Dubhn Show, and I believe be world have won only he had side bones. But he was sald in Sewell's yard, this fact

being known, and was bought by a small dealer for £135 as a bunter. Those were by "Broad Arrow" out of a south of Ireland mare 2067. And "Broad Arrow" was a Hackney !-

2058. Did he do much to improve the horses in that district !-- I have always loard so, it is an accepted fact in the neighbourhood, and everybody in the naishbourhood would swear by him. 2069. Do you omsider the Hackneys a sound breed or the reverse !- I think in the main they are an exceedingly sound, hardy breed of horse, and I think the great thing is to get size among them and to keep

to riding types.

2010. Do you know at all how they are bred in Yorkshire, what really is the origin of the Hackney ... There is a and of teaching there among all the old herees you meet that they were the old roadster beese rand to do long sourneys on before the days of resilways, and the present Hackneys are more or less the precisthe back breeding of some of the best Hackrays.

2071. I think Mr. La Touche asked you if you

would explain your reasons as to why you thought hids here's so much better thus English houses, and I'm was not from the fact that they were got from a theroughbred horse and their dams by a thoroughbred horse. Is it not, perhaps, more that the size of the been much introduction of heavy cart blood !-- I don't know, I could not roully give an opinion on the soliest. I think the circumstances under which the horses are reased in Ireland and the way they are fed and treated is so still only different from the way they are done in Fredard. They food some of them on soft, rick, foggy pasture that only grows soft stuff, and if they have got one that they think is worth anything

they get him into a buncless and talk about him. In Induced they knock him about and don't care much whether he is blemished or not 2072. Then you think a good deal depends on the climate and the way the jorne in brought up !- Yea. and worthful treatment. 2073. And is it not possible that Hackneys bred in irelast under the same natural conditions may breed is one of the reasons I want to make a trial. We bare beaten there in beneding other horses and I do

not see why we should not best them in breeding 2074. With regard to the stallions in the North of Ireland, are there not a great number of nondescript stallions three at present !- Yes 2075. Would you be surprised to hear that onethird of the critice stallions in Iroland are either earl loose or half-beed horses?—I was not aware of the fact; it is automishing.

Hockneys also,

2076. As a moster of fact, do most of the foreign buyers require action 3-As a matter of fact, they seem to me to agreeciate it very much and to make it

2017. CHARRIAN-I would like to ask you a question. Is it not a fact that most of the sound young mores are taken from the becoders by the dealers and the unsound left hebind to. Well. I think

it is very much to be regretted that a great many of the good mares leave the country when we would like them to stay in it. 2078. You mean the dealer tempts the men with money and only takes the normal and leaves the unsours in the country !- Quite tree, and I think it is an unfortunate fact that a great many mares are level from simply because they are unsound and unit for

anything clas.

2079 What effect must this have on the borse on the borse run i -- It depends, of course, on whether the special unsoundness that the mare suffere from is beneditary or otherwise; if hereditary it is greatly to be deplored that the mare should be bred from, and I think it would be a great matter if there was any Covernment arrangement for giving prizes to men, or rewards or prescrums, or whetever you like to call it, for keeping their masses on until shey were four or five years old. Personally I am a believer in beeding from a two-

year-old mane; but many people are not.

2050. I was going to ask you a question on that
very point about broading from two-year-old mares? I think you got jost as good a fool from a two-

Printed image digitised by the University of Southampton Library Digitisation Unit

year-old as any years.

2081 Mr. La Touters-You would not it to a horse at two years old l-Yes. I am speaking now of a well-grown two-year old. I should not solvie become from a hackward, delicate from year-old, and I should not put her to a two-year-old or throu-peakold or a young home. I should get her to an aged, matered home of sound constitution; and if your two-year-old filly is well-reared and a screy filly das ill give you se good a fool as a more t-n years old. 2082. Mr. Wannest.—She requires to be rather extra well done i-I don't know; I think as a matter of fact s'e bas a shade less milk, but I think it to of

\$163 You don't think it barts the filly .- I do not ; I know die theoretical reasons are against breeding

2086. Have you given stem the hoese again at three years old !- Yen.

2035. And gree on !- Yes : without any evil result. the mase continued growing and developing 2086. And grows into as good a mare -I think so

there may be exceptional cases.

5087. Charman.—Do you think in the case of a filly that has not developed properly when sie is put to the sted that it would make her grow 1—That a rather a curious point, and I don't know that I have tried it in horses, but I tried it in door 2088, Mr. Wagsco. With what result!-- I was

once very keen on Irish water spaniels, used to show them over the kingdom with great success, and I hred a litter once I was very proud of and for lof. and in this litter was one special bitch that had all the points I had been breeding for. I was to delighted with her that I wrote to the editor of the Fish -- I can specking of twenty-five years ago, it was "Stonelinege" then—asking whether I should breed from her when she first came in two. She came in use when eight months old. He wrote to me giving all the scientific reasons against is, that the saimal had the firms to support as well as herself, and that it shocked developsent, and that it was a great mistake to breed from

her until she was two years old. I did not kneed free her until she was two years old. I did everything I know how to grow her big and good, but, as a mutter of fact, I den't think abe ever grew a beir's breadth from she first came in uso. Another bitch pup of the same lot I gave to a friend, and he not it to the dag at eight months aid, and it grew one of the biggest and best I ever new. When my bitch was put to the dog at two years old she had a weak and misemble litter of pups, and spread herself over them and killed them; she did not seem to know what to do with them, and she did the same every time afterwards. 2003. CHARMAN.—You have no experience though as regards the different produce of two-yourold and three-year-old fillies, that is if you put a two-

year-old filly to a horse and a three-year-old filly which is likely to produce the best find ! - I have at secure a man, and I have a three wear-old cost from her, that is three at May coming, and I have one two the two-year-old's produce is quite as good as that of the three year-old, and in a case where I bred from the mare at two years old and bred again when she was tire; rears old her produce as four years old in even better than the first one; in fact it is an animal I showed at the Belfast Show in the yearing class, and it got first in a pretty large class; that was from a mare just to the house as a three-year-old, she having had a feel as a two-year-old.

2010 Mr WEENER.—Have you ever done this,

put a mure to the horse when she is two years old, breeding from her again at three, and then giving her a year's rest!—This one of mine has taken a year's rest, and she is in fool again now, so if we live long spough I will be able to answer the question; the miss d a year.

Nov. 17, 1995. Mr. Nathaniel

mare to a linese at two year sold and there years old that then they take a year's rest themselves l-I have no experience except this one example, and it is an yard as being a correct test of the lumber I-Wall T don's quite know what form you want the answer to

man is very deuse if he cannot tell whether he likes a home or not with the assortanity he gots to see a home been especially if he sees him in the jurging

2091. Have you over found that when you give a

2093. But without the lumning competition I-My common is that all the horses that prizes are given to should be tried for the purpose for which they are avowedly offered 2004. Now, there was a were that you mentioned that was got by a certain Hackney stallion that got

first veto. I think you said at the Boyal Show in 2015. Did that animal over cross a country !-- That I cannot tell of my own knowledge, but I can ascertain, I got the information from a very reliable friend in a letter which is in my pocket at this own words 2006. Mr. Warren Vox one hand the letter in afterwards !--With pleasure, the letter was an

collinger private letter with no thought of being produced here whatever. I may tell you before either reading or producing this letter it comes from a man of acknowledged position in England, a great hunting uses, a man who has a big sted of hunters always, and he has four doughtern, the figest horneymen I ever now in ony country, so be knowe what he is talking about. I salved him the curation could be rive me any particulars of any hunters that had Hackney blood in them, and had any murit left. So, he save ... "I don't think I can give you any special portionises about Hackney bred heaters that are not already well-known. Cortainly several of our best and must renounful show horses are so level, notably Mr. Cookson's Flower Girl, who was first, both at the Great Yorkshire and the Royal, she was out of a Hackney more. John Logan's obestout horse that he sold to Stokes for £300, and was afterwards sold by saction at Leicenter for over four hundred, after solut with the Outen for two secons, and arrive chanced bands at, I believe, a still higher price, he was go: by Sportsman, a not very good Hackney, and out of a blood mare. This I know of my own knowledge, as ha was bred near me. Again Charles Wilson's celebrated Ambrese is the same way bred, and both of those were fast enough for High Leicestershire, and could stay with the very best, indeed the chestout here was not only the fastest, beldest, and most hrillant hunter I ever saw, but the highest chan looking one. I don't any but these two are exceptions. but it is nonzerose to say that a bit of good Harkney blood most needs damn a hunter; if a horse callers in good hursting form, and gives you a good feel, of which each wan mest be his own judge, and can stay, and I have known, and you have known, Hankneys that are as good and game, and as good as any blood one. I

think La is more the worse, but rather the hotter of a

dash of the hig Hackney, as he will hring you home after a long day without digging his toes into the ground. Of coopie we all like them as new clean-hand

greated. Of course we an anomate as weight, but I would as possible if they can carry the weight, but I would hunch rather have a bit of a cross of good game Hackney than a great lumbering Yorkshire coas-horse or Clereland Bay or soil cart kore, though I

hirms or Christian Bay or soft mark horm, though, I have near pool and whatshab humbers heed from a quarter-level, clean, active, Clydroshile mare, indied, the third cross as bred, if the more is wholly advent, offers results in a good weight carries. We in England have some of what you call hig old faith marse with no cross of any other blood, meither do I think yee

have, and if all the Dublin winners and other metahave, and it as: the Dutter waters and over easily howevers sent from Ireland sould only tell their real parentage, it would open the eyes of the stickless for pure brooking. If they would select their Hockson, hir ones with good shoulders, and quality and action they would do good to the hunter breeders in Ireland 2007. CHANNAN, - Who is that from t. M. Barton of Warton Grange, Carnforth, Justice of the

2008. It is usually acknowledged that the Irish.

oved horse is stouter than the English-head horse to I think so 2199. Why should that be ?- I don't know are

reason, except from that style of soft pumpered feed-ing they give thom in England; the very good they have, the pasters in Yorkishire, is that thirk, soft, fregy staff, that they can always be filled with, and it does not seem to good bone or put mettle into them 2100. You said you wished you had not the threat of certain borses you met in England !-- I moves that

war- of no value and were unjustituble. 2101. Do you seppose if they had gone through a course of feeding in the North of Ireland thus would be picked up by Mr. Wimbush or Mr. East 1-Thry were not of the type he buys, but I I are no deals that he gets some soft ones in Trolond; but I reust begyou to would consider it a swicidal thing to do with a hunter; I would consider it the worst treatment possible with a hunter; it is only done with time 2102. Would you do it with Hackmays 1-I would

not. I think. You would grow them into year cause boking bundles, that would abow very little quality thoroughbroi blood 2104. Why in that, is it because the shapes are better 1-I don't know that I could give an intelligent

reason for it; I know it to be so, but I could hardly 2105. Mr. WRENCH.-Nothing stands feeding in what way, how do you mean !- You carrot burt o what way, now no you mean 1— you cannot never blood weeve with planty of condition; he locks off the better the more you have on him; if you have a common bred horse and load him up with condition

you get a ballack 2105. CHAIRWAY .- Do you mean that would have en in the case of Hackneys !- Well, I don't think it ille and proper then with feeding; I den't know why it about he so

2107. In answering Mr. LaTouche von sold year were commaring the value of the weedoon of a thoroughbred staition and the produce of a Hackner. are research and the prostee of a Hackery, was the stock you named as the preduce of your Hoth-roys and being so valuable, was that stock from pure bred Hackery surres or from a Hackery staller orosaed with half-bred mares 1—The most valuable i

have had have been pure bred core. 2108. In answering Mr. La Touche you mentioned that, and I wanted to know whether it was the pass heed hackney stallion and the pure bred Harkney mure you referred to 1-I really don't know how it works out. I moretioned the case of those two sorres level by the Dungamon horse, they were by a Hackberr

herse out of an Irish mare, one I sold for \$300, and the other went at Sewell's for £130, when he was blemished and unsound; that shows they were fairly valoable. 2109. Bred from a half-bred mass t-Thay were from a south of Iroland hunting mure, and Lori.

Charlemont's Broad Arrew.

2110. Now as to the pure breed f—I think I have some pure bred Hackmays that I value more highly than any halbred once; I am referring to two in priirellar that I think have compliant action about them, but there are others I think that are not

tizes, mil tiper problem of the control of the cont

of your Harkney stallion may for £2 or seem reasonable for world you get a great many morresplications from feweres than if you get a good theorogalized loose at the same price 1— I think as the tests goes at present initial neighbourhood, without vanturing to any whether the people are right or out, they would certainly go for

cia Hadrany.

2113. You can get enough services taken up at £5
227 — As many on I wash.

2114. And you could not do that with a thoroughred home I—thus gratternes sent to Newmarket and
hought four most beautiful marse, thoroughbref, and

of the highest pedigree, and sent the whole let to my Hashney borns with the idea of trying to breed highclass currisps houses.

2115. Of cooms you have got no results yet 5—Na, 114th it was the year they care first.

2116. Mr. La Tocuta.—You said in answer to Mr. Wrent that you thought the formers sught to be consulted and their opinions taken as to what would be been means of improving the breed of horses, 20

whether I put it in those words or not, but I tild my whether I put it in those words or not, but I tild my that if whatever benefit you offered them did not stelle them as a benefit they would not accept it. 2117. Then that eather tends to prove these would not keep usy much object in consulting them, they would not have been a supported by the consulting them, they

out you want tony need in too east 1—100 y would felt you what thay wanted if you cared to earry is on. 2116. But they would not engage that they would follow the advice you give them index your advisefitted in with their presencement alone, they would not take your advice t—I think my experience of North

Sized in with their preconcered sizes, they would not also your advised—It think any experience of North of Ireland farceurs is that you assumed personale them agreed that you assumed personale them will point by you and when an integer that you cannot will point by you and when an integer that you cannot will point by your probably and adopt it, and shiply it stackfully.

511 D. At the present time the prejudies of the small Nayth of Ireland fatures is in flavore of the

small North of Leshand factures is in factors of the Hadriney stilling as opposed to the thoroughleed house !—I westi not may an instell as that, some of them will have from a thoroughleed and potent is and some will have from a thoroughleed and potent is and some will have from a boroughleed and potent is and some will have from a Hadkingy, a good ideal will depend on the nature of the name. There was other thoroughleed stallouss that are gotting a fair assessed throughleed stallouss that are gotting a fair assessed

2150. Then you don't exacted that the features are perjuiced in favour of the Hackney staffice 1—1 foots of a portional to they are very found of action, they want satisfaces, they don't wrat sarysing except, they want as aximal that they one used during the youth out of the feature of the things of the transfer in youth out of the foot your city, and if it misses the years of the property of th

from,
2121. Have yoo get any thoroughbred Hackney
marcel — Yes,
2122. That you bought in England, I suppose 1—
I have several I beed. I have teed a good march
2133. Have you sold any Hackneys of your own

breeding — I don't know that I have, I don't think I have ever offered any.

3136. Is there not a Mr. Kirk in your neighbourhood who breeds Hachneys — Yee, all his mares were with my howse this your, four of them, but I would not cell them high ethes Hackney marre, I think these

with my house this year, four of them, but I would not only them high when Hacktory marry, I think them, were only, perhaps, too pars bred, if that many, one was hashing mare he has been breeding from, and another was a two-year old thate, he had bred from a Lindenry more and a losse of the Prince of Walos. 2150. Do you know if he seen a Hecking marca to

Brighted to be held—I have be seen once this year and was offered very had prices for them. 2126. Have you sold any of your Hackneys in Expland! —I ship.

2118. Have you sold say of your Hackmeys in England 7. It's).
2117. Did you get good prices be-Very had.
2118. To what do you attribute that I--I thinks they were used good come to begin with and they got to attention whatever at the ralls, they were disniv-

sent over to an associate yeard to be reall without morers, and noticely wears with term, for I did not come as row of piese what because of them, but I think with all respect that that does not prove ampthing, for I was present active a also intity wierse I may dischinguish for theoregisted more sold for five gitness and limited theorygisted more sold for five gitness and limited the sold of the sold of the property of the \$1.20, Mr. Wieseren.—Where we that I—AI Beh, Green's Mr Ookingson's sink, and was add for fivbrah, Green's Mr Ookingson's sink, and was add for fiv-

find, determin M'Chimonis' sule, one was said for five grimon, and Liceotron, a black most that he gives 200 gaineas for, and for which he paid swenty swreeging for the service of a loves, was sattleand before my eyes for £7 10s. 2110. Were there many other thereughbireds seld? —You, all sold at equally straightering prices. I was

— Yes, all and at expanily stronghoring prices. I was present at York when I are some very facilitation to the cought of the control of the control of the cought of more in feel teld for some grainess and prices scot as that, to what heres makes at an automatable article exceptional discussmentances, I hold, proven nothing.

The Commission adjacent until next marching

....

FIFTH DAY .- WEDNESDAY, NOVEMBER 1878, 1896

Present.—Lord Ratedosnels, in the Chair; Mr. F. S. Wrence, Mr. Percy La Touche, Mr. J. L. Clerw, and Colonel St. Quintus.

Mr. HUGH NEVILLE, Secretary.

Mr. E-bert Mr. Re

100 2132. CHARMAN—You are a volcrinary rangeon, resident in Armyl 1—1 are, resident in Armyl 1—1 are, resident in Armyl 1—1 are the control of the contro

harness burse. From the better clear of mores they breed a good coaching house, or a double harness here, if you enderstand.

2135. From what our of mases?—Prom very good.

here, it you rediretand.
2135. From what sort of mases 1—From very good,
short-legged marss—good going mases with a constit
amount of quality about them, and these horses are

go, ny a statronguerron source.

2115, Mr. Warscu...—The marses!—The harmen
homes I spoke of are got out of these mares by a
theroughbred home.

2137. CHALMEAN...—Then the sires that are used
in the district are charfy theroughbreds!—No;
altiful hall bend. The curses I new rooks of a na.

shirify half bred. The marcs I now speck of are a very wall proportion of the marcs that are herd from: 2136. What is the other proportion i—They are a worse class of marcs—light-brood, with less mation; and the farmors prefer to put these to indiffered house. 2130. What do you mean he a build-bred large I—

3130. What do you mean by a half-bred lorest— A half-bred horse is a horse got out of a marful mare by a thereogethred horse.
2140. How is the half-bred size bred 1—He is generally out to a theoretistical horse—alread investigation.

year of a teneropial control to the second of this congraph by a historical being and out of this control to the second of the second of the second that the second of the second of the second of \$2.14. Do you'very a buildered stalling parentle' LI. I do; he is got by "Baisla" and has been a very successful lence, and tot of a good, well-buil man. He was the property of the list J. A. M. Oppe, of Drunning! I don't know have all was age, build use was a very strong and well-bred annual. He longist the entinal is Lectors, and Sectled it literatif, and it

the estimal is Jesulon, and Schied It littles! said how was a very livery rear, Effects or sistent stone is weight. He hought her for riding purposes.

21:12. Would you fancy the mise was got by a three-gableed horse 1—1 would not fancy that mare was by a three-gableed news. I could not say. Six was a very good-gaing mane, and reight possibly have had Hockeyop blood in her.

 was a very good gring many, and might possibly have had Hohitory blood in her.
 3143. Have you had any experience in the breeding of Hohitory 1—From Hackneys 1 2144. Yes 1—1 have.

214. No. --- association of the state of the

that has one of those mages would not pare with them for money.

2148. Mr. Werner, —What do you may about the produce i—They are horses that are long since left the country: there are dead. But the marra out by those

Mr. Robert Tono Hustes examined.

here a ne our best brood mare, and get the best stock that is in our contrety when screed by a thoroughteed horse, particularly when served by a thoroughteed heres that write three. The infortunate part of it is that the heres that have cose to our neighbourhood have not been large calculated to get harmen became—they have been about horse; if an

harmens because—they have been short houses; I am speaking of the theroughbrods there under the Royal Dablin Seciety's science. 2147. Ozanzaza,—You say in onewer to que-

tion 18 in the queries sent one that you know many

there is an in the queries seen they have, you want to the perlement of the period o

odi, and that answerd is easily got far it.
2.14. With regard to the narwer yet give to quetion 33, have you seve seen a stallies the reside of the
cross yet recommend by a thready lived of a filledcross yet recommend by a thready lived of a filledlived (large much "Bread Arrow" and the Earl of
Calcidoris" ellementer "--main lave being out
about that veay. And there is another stelline as
more by Earl Calcidoris" ("Breaderis", and is in or
more by Earl Calcidoris" ("Breaderis", and is in ore

our best hell-bird sizes at present.

2150. Mr. Wassen, —What is he out of t—He is out of a threesphired more, "Nancy Quin"; he is need to be a second to be

an old here now.

2161. You don't know that Lord Chalemon's
hore was a pure Euchasy I.—No; I unfeested that
there was Hackney Mood in both Lord Charlemon's
and Lord Childra's horses, and for all I know one or
other might have been throughlind Hackneys.

migro new over intercognized Raddings,
a 2152 Cannux, "What nort of mane is be
a maded to, and with what results 1—To the second clean
of marea—mere not united to a thoroughlored house,
ames of lighter bone, with nor sufferent sories or
quality to go to a thoroughbred house,
2163. You say the built of the stock is more life
to annufate than the size, and therefore recognized

1153. You say the bulk of the stock it saces like the granishier than the sire, and therefore recommend to the thoroughbred as granishrs 1—Yes; to the half- bred home most decidedly.

2 1154. Would not the desired result be more likely to be attained if both sire and granishrs were

likely to be attained if both rise and granders were theoregized "Newl", us; in evirous, year new, over require to serve by a half-level borne; you most infrienders swamping to put for an extended to the control of t

is possible to put a sound borso on overy mass in the district—a borne of such a class that the stock will be besset that the such such in the besset that the such such is the besset that the such such is the besset that the such is the such is the besset that the such is the s

21/25. You also recommend the establishment of floreruneat stude. How would they benefit any but shown in class preceiving to them 1—1 would traved the hower Trey would require to be travelled over a district large except to make them sell-oupperting. The stallines should be self-supporting, and would

The skilleds storan or strangeoring, and wears be not flory were travelled over a district large county; there would be no difficulty in that. 2155. What would you do as regards the local connitions? Of whom would they constalt—Three could as the a better committee in our district than the present one; its members are most who thereogily unfersized the brooking of facesses. They are the next ap-

stand the froeding of horses. They are, the term appeared under the Eryal Dublish Society's scheme. I have seted as their west-invitant sizes the scheme wan tagen, and we are it is perfectly long-ine the datas of names. When twenty maves come my only four or the standard of the scheme of the scheme was 2156s. Herey my considered that stated farm such as you suggest, if the free charged for stabilizar were small, would pay its way as you recommend 1—tid, 1, would

1350s. River you receivilented that asked has used as recognized, if the first house of an end of the recognized is a state of the recognized of the recogni

for a drink.

1107. GRAEBRUS.—Have you ever heard the
result of the Congested Districts Bosse's returns from
the paying points of view 1—1 as win the paper that it
out them 5107 I think for a horse. I saw that in

cost them 5:07 I think for a horse. I saw that in the evidence given before this Commission, that is the saly thing I saw about I; 2158. But from a paying point of view, I mean I— I beand that it count them L(UT; I take it, it cost them

I bean that it cost them £107; I take it, it cost them £109 per house per year to keep them. I dea't know whether that is a fact or not. 2140. You don't know further than than 1—No; I am quite satisfied if the rights sort of horses are sent to are distruct the farmers could affect to pay facily good fees. Of course, I can say mething of the con-

meeted districts. 2163. Do you consider that the farmers would take the trouble to soul their mores any distance to the stud form that you recommend !-- I would travel the horses to the market towns. That is where the service is done shought the small farmers. The house attend the markets and the mures are served on the market day. It would certainly be also necessary in our district to have a draught size in order to serve all the masses. I think the committee should be in a position when the mann were brought before them to make a selection as to which many was to be sent to a certain class of borse, and that in order to serve all the marce profitally they would require a draught sire-for there are a number of half-bred mangrel Clydesciale mares being brought there and they could only be bred profeshly from by acryine there, say, with a heavy English Shire some, for they are too nearly looking to expect to breed

brought there and they ocald only be bred perfectly from by serving these, say, with a heavy English Shire isome, for they are too carry booking to expect to breed good harman horner from.

3161. What sort of sail is there in your district th-One ride of Armagh is entirely clay and liferations; on the other side, it is a nort of gravally soil not so good for the breeding of biareas. I speak of bottom Armagh

and Menaphan.

3862. Would move of the land be worked by moderately light active quick horses, or do the farmers

The Lift. In Coolella-Yea any that the County of the Person in the County of the County of the Person in the County of the Person in the County of the Person in the County of the County of the Person in the County of the Person in the County of the Count

2164. Mr. Western.—The explanation of that in I. think that there are a great many stalling in Monaghan and the adjoining counties that the form own you are compty to associate, and they might account for pages in other scenarios, so that the winness is perfectly right account in any or that the tellitons might account not Armach. Witness.—Six or seven of their travel from Monaghan street. Bondow might, and show in Armach.

gian every Monday night, and stand in Armagh on Tursday. 2165. Mr. Carnz.—They would be registered for Armagh and Monaghan I—These under-fired lorses are not registered at 3th that I am aware of. 1165. Mr. WENNEL.—That is a return of every

stallion in Ireland, and is for the year 1833. They would be registered in Monaghan? Witness—And then, of course, stallions come on from Tyrone, from Aughnacley and Bullygaviery, and

from Tyrone, from Aughtracity and Ballygawley, and all strong. 3167. Mr. La Touttu.—You say you bred some very good harmers issues in Armson 1—A few.

very good barness losses in Armagh 1—A few. 2165. And see they as a rais got by thereoglithred becomes 1—They are the best. 2162. How do you think the mares are beet that they are out of 1—They are half-bred mares; they, or most of them, are probably beed in the south and

trought up to us.

3170. Who breeds this best class 7—The big farirrors—the farmers who are not eligible under the
Royal Dublin Society's actions, as they are above
a £150 valuation, and the better farmers below £150
valuation.

171. You said the coefficiery were had not suffering a capity to go to a therrophysical I—Tory have not. see 3172. Do you chick their produce would get more produced by the control of th

or tome saleskie; the others are preciselly unsatesists.

\$113. With respect to them half-teed Clydesislats
to make, you said they were only setted to bread drought herest 3-Ves.

\$114. Den't you think if they were crossed with a throughted loose, the filly of that cross night be

As explaint Viscoling, a good loan have by a choosely, bell twost - 1 croys that, as 1 dark the the loan of the lo

boree to serve those mases they would not be in this to position.

2176. Do you think it would be a good think associates that breed of animal at all 1. Do you think it would be to the advantage of the Irish farmer t— I do: containly.

it out 1—I don't think it is possible to eross it out.

You have the animals there and you must deal with for anywhite animals there are yet min loss who there. By crossing these marse with three or four strains of Hackney or thoroughbred blood, however, you would a seatually, if you crossed them with three or four strains, probably get mares that would go to a thoroughteed. That is my idea, to orose the manes in such a year that exentually we will have moved to get to a thoroughbred horse, and I say it is unnecessary to give prices to the farmers to keen their soul eary to give prize to the farmers so along using good manes, because they will know their good mares if they have them. I would work them all up to go to the thoroughbed heres, except the our berses, for I don't think you would hardly ever work them up to beed good harness horses from the half-bred Civilesiale

2177. Don't you think it would be better to even

2178. Then the mares should be covered so that their stock could go to thoroughbred herses eventeally? -Eventually : that is my idea. And to get a large

—Eventually; that is my idea. And to get a longe unjointy of the mores, at present budge served, to breed stock to go to a theorogalized better, it will be accessary to introduce Hankiney blood. 2170. You think the Hackney blood is preferable to what you oull the half-week stallest 1—1 profes a half-heed stalline got by a three-galated out of a Hankiney must. Then I have the grandsheed out of a stock out of a thoroughtwed lurse.

2150. Would you recter that to a stallion got by a thoroughbroi home out of a half-leed more i—Not if the half-bod more pioned me. 2181. Out of a brinting mare 1-Out of a good bunting more if she had action or hone. I would

prefer her to a Harkney mars, but they are very land to ges.
2162. Colonel Sr. Quavrax.—Have you as equal objection to the Cleveland and the Shire as you have to the Clydesdale 1—I don't like the Clydesdale at all, because there are so many discours follow the Civila-

2183. You object particularly to him, but you also object to the introduction of others. There are different classes of marre and different classes of horses, and you want to get hose and substance and power. Putting the thoroughbred and the Hackney

on one side do you object to the Cloreland or the Shire boose, or the Yorkshire contains borns 1....I don't Blirks becan set the Yorkshire consisting herest 1—1 GGN like the Citeralbund at all. 1918. Or the Yorkshire consisting horse that we 9184. Or the Yorkshire consisting horse that we bested of yestersky 1—1 object to the Chevinani—any of when I have small I ellipsi to. I don't Blir them as consisting locuse on all, they would not cross with our traces. There is guarantly a word of massbe about their thight and fenerate within the Hodgary bas. taru uniges and screames weish the Hackings bas.
As a rule they are not as good goess as the Hackings,
I speak of those two berses, Loei Charlement's "Bread
Arrow" and Loed Caledon's "Character," Those house I know. They have bred mares that are still in our country, and are our best mares. From reastical experience I can speaking.

2185. Mr. Ganna.—You say the baif-bred sire you

would prefer would be one by a therenerbleed out of a Hackney mare 1-Yes. a Hattney more: -- 1co.

2180. For harnest purposes 5--- Altogriber. We have no good meres in our district calculated to get

2187. So that you would not like that for the bunter hered b-No. 2188. You are speaking entirely from the barness point of view i—Yes. If we have a hunter in our district it has to be sold in the Royal Dublin Society's

Show or at the Ballingslee fair. 2180 Between the Hackney days ar Jthe halthred dam, if the latter had bone and substance you would prefer the half-heed dam to the Hackney 1—I would. 2190. Mr. Wagners.—What becomes of the horses 2190. Mr. WHENCH.—What becomes of the norms that are chiefly sold in your district; where are they bought, and by whom to-The best claim of coaching horses are bought from the farness by dealers the live in our country, and Mr. Wimbent, London, Deliard and East, Withers, and those mon attend at these dealers' places and buy them in loss of 2191. Are those the class produced by the people you call here "Class I."—that is over £150 valuation t

9109 Those animals are bred by that show of breeder I... Yes, and when that rises of breeder but a very good mare he puts her to a half-fred here. be gets a heree that goes off with that lot; but they are principally got by thoroughbred house cut of the coost payers, and those are the class we could to try to encourage, and get every farmer if possible a more that will breed that class of horse, for that will pay then. 9103. Then was take your close exceller too. In-

this you say the maces are not good enough to go to the thoroughbrod horse !- No; and the half-brod horse suits these best \$194. Then class three!-A very poor lot of mares. there to emble them to produce good sarres to bred from in future !...Yes. Class two would require to he served about once by a half-bred horse in order to

get produce fit to go to a thoroughbred horse. Char three works require to be served perhaps two or those times before the unabout would be fit to on to a thoroughbred horse, but we should always move

2196. You say the best move and the moves that go to a thoroughbred are the moves gut by the two go to a thoroughtred are the mases get by the but horses you numed i—They are. 2167. You cannot say of your own knowledge whether they were both Hashneva i—They call then whether they were both Hackingers—They call then Hackingers in the district, that is all I know. And it know perfectly well if you could being "Broad Arrow" back to day to our district and served sure with him there is not a farmer in the district would

with him there is not a farmer in the district worst sell a mare by him they have such an opinion of him. 2104. Had most of the animals brief by "Breed Arrow" action 1—Magnificent sorton. That is there green poles. He started to serve at ten shillings a mare, and before he was done five premise was the charge, and the farmers sating one another for his

2105. You comider action reculate to enable a farmer to get a good price for a horse !-- Yes, for a Ancuesa korso. 2500. You think that breeding barness boyses in Ireland would pay farecers better than trying to breed hunters!---You must change all their mares before they can breed brusers, and I don't use how you cross their mares you will never make them

into hunders. 3201. Are they sold to other parts of Ireland or ont of the conservi-None so to other parts of Brokand. We being a lot of horses from the seath is our district, and sell then then to dealers. As a rule all our farmers keep their horses on until they have four-year-old months or three and a half. They sell them with a mouth representing four-and-a-balf.
2302. With regard to the Clydendale blood, do you think it would be much more injurious in the animals

you want to breed from them a cross of Hackmay. When you want to produce a harpess horse you don't like Clydesdels bood!—No, I don't, Clydesdale

2003. Are there many Clydeodale stallices in the north b-Yes, and deing a great deal of barn. 2004. Would you be in favour of requiring people to take out a licence for stallices b-flow would it 2505. To pay so much for a hience to show that their stallions must be sound. Are there not many unaccount is present is—The bulk of the stallions are 2206. In some countries they are obliged to take out a Econos to show that their stallions are sound

Would you approve of that !- Curtainly.

Printed image digitised by the University of Southauguton Library Digitisation Unit Printed impre digitized by the Linksmith of Southernton Library Digitization Link

unacond.

2507. You think it would be a good system !-- Yes 2108. Do you think people would object to it !-Any man with an unsound stallies would object. 2100. But the public generally would appreciate such a regulation !—I believe they would.

2110. If the farmers know there was a guarantee that a stallion was sound would they appreciate that I Ther would to a certain extent. But the creat point

it this—the farmers go to the cleap sire, and we must gre them a good sire at the same prire they are getting the had sires for if we are to do good. 2111. What sim farms have the men you call class three!-Ten to twenty-five acces. 2012. Are there a great many horse breeders

among them !- There are. 2213. You think it would be quite impossible to stop that class of former from breeding houses !-- I don't see how that could be done 2214. You would not agree with some of the avidence that those farmers ought not to be allowed to

breed horses !- I would not indeed. If a man can do at profitably, and if he as given a borse to suit his mare, it could be done profitably. 2115 You think be could make a good peofit from breeding if he had the proper class of sire placed

within his reach 1-Yes In my establishment this year there were ever 300 mores served by year inferior half-bred homen of all shapes and kinds; and if those farmers had got good half-bred horses at the some price as they got these misecules brutes it would certainly improve the broad of horses.

2516. Do you think a Shire home would be too heavy for the mares or the work required in your district !- I don't think so. 2517. You think he would suit with the carty mares? -Yes; there is a grout inclination at the present time to wet a heavy house on more of the manes than

there was some years ago, owing, I suppose, to the depreciation in the price of horses. The year before hat at the end of the senson I contented nine half-breds that were serving in the Jistrict. This year I contrated two, showing a distinct falling off in the number of half-hord horses

2318. Can you give any definite neggestion as to how you would take the opinion of those people as to the class of horses that should be seen to their district i-I think the local committee would be an ecceedingly good judge.
2119. How would you select your local committee !

—The Royal Dublin Society could suggest a very

good committee. I could suggest no better commisse than we have. 2710. Would you leave that selection to the Royal

2553. And on your local committee who represent these small farmers !-- We have men who know their mata, and men who during the working of the Royal Dublia Society scheme have seen those in sees aureally and seen their stock, and who know exactly what the

2012. Would you recommend that the Boysl Dublin Society should register other house buildss thoroughlevis!—Half-heeds, yes. should be bound to be got by a thoroughbred horse.

2334. But how many crosses would you require on the dam's side !- I would not require any oroses if the keese was what was required 2025. Would you register the home bred so before

it was known what stock be would get !- No; I don's think co. 2236. You would wait to see whether he was a good stock getter or not !—Yes, I think it would be a good

plan to produce the stock got by the horse before he Was recrutered. 2227. Do you know anything about these American

have seen a great many of thern. 3316. In your own district !-- No , about Belfast. 2218a. Are they calculated to do good or harm!-They will reduce the price of Irish horses, and are

ing so, 2259. Will three animals be of any see to the

2250. You don't accrove of the class t-No : they are leggy rasges; there is a want of number about them-soout their legs. 2281. Would you suggest that they should be

bransled in any way 1-Yes, I would, most decidedly, 2232. You think that would be an improvement t —It would.

2238. You think that people would be slow to key

hranded horses !- They would. 2134. Charman. - With regard to Clydeolaics and Stirm and Chrolands and cart horses generally.... with regard to their lone, although bigger to look as, is it not much softer and more perons !-- A great deal.

2236. Do you know from experience that the difficulty with which breeders of heavy horses have to contend is their feet, and the bones connected with their feet !- You 2237. In that the chief thing !- You with Clydesdales ; but I don't think it is so much the case with

the Buglish Slave horse-he is a runch sounder hoese of and registered by some competent board, was standing in the same locality as a Clydendale, Cleveland, Hackney, or cart home, serving mass at the same fee, to which stallion would the farmers in your district and their mares "-The bulk of them would send them to the half-fired home. I say it would take two half-breds to do as much work at one thoroughbred or one draught home. If you had those two, a half-lired and a Hackney, or two half-breds, to

do the work of one of the others.

2210. You include the Hackery, then, in the same chass as the half-bredt-I do. If I had two half-heads not in the right way, I would prefer them to the Hackney.

2240. In your district are the sound fillies sold much, or do the farmers retain them for breeding purposes, and sell the unround over if they can !-- As a rule they part with their sound fillies; as the fillies come on as a role they are purted with.

\$241. What will that lead to in the long run !-- If they were astisfied that these fillies would breed well,

Dublin Society -I would not have the slightest I am quite sure the farmers would keep more of them They change their horses very frequently with re, and they change their moves too. A few of them breed from two or three-year-old mures, and they take two or three foels from one, and they sell that mare 2212. Where do they go to replace the more they sell !-- You mean the mare that would probably re-place the two-year-old filly that was going away ! 2245. Where would they get that mare !- They

> 2944. If it turns out sound 1-They would breed a fifly or two and sell it again. 1245. At what ago !- They would sell it at about the same age-three-year-old off or four-year-old.

2346. Have you had say experience in breeding from two-year-olds and three-year-olds !-- I have seen a good deal of it. I think that it injuge the more it a groon uses of 15. I times that it knythes the more it she is lared from as a two-per-she. She does not grow as well or as tall, and it takes her a couple of years to yield up tegain. The farmers generally have to keep that mare one year lenger than they otherwise would to have her ready for the market. Breeding from a three-year-ald, I think, does no harm 2247. Mr. Canew.—What do you say as to the stock from a two year-old !—They are not as hig or as strong, but numbers of them do well.

2247s. CHAIRMAN.-In the dam as well able to ford a foal at two years old as at three years old, or the reverse !- I think she would feed it ouits as well. 2248. Mr. La Toucser,-You don't recommend it? ... Not two-year-olds

2310. Mr. WERRER .- What do you think of breeding at two years old and then giving the more one ven's rest!-The farmers have to do that to get

the unimals ready for the market. 2210. Yes, but as broad maris. Is it not the fact that a great many teeth are shed during the foorth year? If the more is feeling at four years old, she has not only to feed her feel, but to supply a good deal of nutriment for her teeth?—She sheek as equal number of teeth from three years old on whether she is forling at three or whether she is fealing at four. 2201. But is it not a fact that in the fourth year o horse shorts a good many teath?-He does; he sleds

more than as a two year-old. 2252. A horse last not as much to do in resduci bene for teeth at three years old as at four years old I -There is the name at times, but not at two.

2003. From two to three not as much regarding its teeth as from three to four !- Not quite ; I don't say it would influence the more very much.

2254. Mr. La Tottore.—A three-year-old sheds as many teeth as does a four year old : you say that I

\$255. Crastman......Do you consider a filly is as strong as three so she is at four !- No; that is why I don't recommend her to be keed from at two became you see size is foaling at three; in the other case she is fooling at four. I thenk she gives as much milk at three as at four, but I don't think she is as strong or as fit or bears as good a feel. *156. Mr. Canav. - You say it stints her growth to

beerd from her at two !-- I do 2157. Does she recover that growth by a rest!---She nover grows as tall.

2250. Then if you want to prevent her gesting leggy you level from her at two !-- Yes. 2300. Do you recommend that !- I do, I am consulted by farmers on that, and I recommend them that

constantly.

2261. You said you approved of the home got by a you ever seen the ownerse tried?-I have: that have I spoke od, a horse got by Lord Caledon's "Character" out of "Nuncy Qras," was bred that way.

2012. That is the only instance you have seen of that i-Yeu; but my reason for recommending that is that the stock take more after their grandure than thry do after their granddam: that is my experience. 263. That is the grandeire on the sire's side!-Yes; for instance, my borns got by Ballol out of a dark hay more is a dark hay horse himself, and the majority of his finds are obestunts with white face and whole feet; they have as much quality as if they were 2264. To what do you attribute that 1-To Ballol. He was a chestupt horse with white forc and white

feet, and they are infinitely superior horses when they are that colour, and much better than those that take after their dam's side and are buy or brown bornes. 2256. Then you think that the colour follows the characteristics of the animal from which the colour comes !- It does.

2256. You have nover arrived at any conclusion as to whether the size or the ham is most inclined to give

action !- By the thoroughbred horse undoubtedly a great deal of the setion is get from the dress, but with a bad going thereoghbred horse there are many god harners heries bred when the dam has good action. 2167. Then you think that in very many men the setion in the dam has a great deal to my to it 1-14

has, undoubtedly. 2208. You said that the best leaves heres in your country were bred from mores that were as a rule imported from the south!—I would fancy most

2109. Do you know how they are bred at all t-I do not 2170. You imagine they are got by a thorough-

bred home i-I would family so, coming from the south. The hig farmers go couth to buy them them selves, and bring up an exceedingly good mare 2371. Mr. Whinson Is that class No It-Yes. 2372. Mr. La Youcur-And you think those

mares as a rule are got by a thoroughbood home !-would fancy so. 2373. You think they ove their excellence as

brood mores very much to the fact that slavy are out by a thoroughbred borse !- I would not doubt it at but then they are out of the right class of more evidently. That mare is of the right class; if get by a thoroughbred she must be of a good class; not a class of more that we have as a rule. 2214. Do you know anything about the class of mares in the congested districts, south and west,

served by these Hackpres !- I do not know any thing 2275. Do you think the spread of the Hackney strain through the south and west is likely to have any effect on the class of horses farmers buy !- I have

nn idea of what class of mares are in the south. I am speaking for my own district only. 2174. You caunst give an opinion!—If they are the same class as ours, I don't think it would do the

stock any harm. I suppose it would beneft them in a slight way. 2377. Do you think your big furness would be able to get as good mares in the south if they cut-tinued some of the Hackney blood as at present 1-4

hold that a dash of Hackney blood does some good. 2278. That is your enimion on that subject !- Yes. 227). Mr. Carry-Can you name any of the fairs in the south most popular with perthera farmers !-They attend man'y all the southern fairs. Our large farmers as well as being breeders are feeders. They go south and fatch eight, ten, and twelve horm annually. They are all off at the fairs now. They buy them, being them up, and feed them during the

winter, and have them ready for March, April, or May. They attend all the fairs in the south. 2381. What do you mean by the south 1-South of Dublin 2381. You would not call the county of Meath south !-No; they don't buy many there.

2252 Skryne, in Mosth, would you call that south !-- A good many go there. It is a good fair; but they prefer further south--- Cabirnae and French

2283. French Furze, County Kildare !- Yes ; that is a popular fair. 2254. What are the fairs in which the conqueted

districts horses go ! Mr. Warren—He doscu't know. 2285. CHAIRMAN.—Have you anything else you

with to tell the Commission I Pitness-I don't think so. 2556. CHARKEN.—You are a land agent, I believe !—Yes. 2557. How large is the area nasher your control !— The new that I manage is about 60,000 axea.

The state that I missage is alread 50,000 acres. 25%. With size the dated chromateutin of the sell in that deteried 1—A green part of the locality in monatain, and the first that it is not that the size of the locality in monatain is and the first that is all that locality in the size as a size of the part of the locality in the size of the locality is and in the local locality in the size of the locality in the local locality is size of the local the local the local local

there is a little more clay; then they can use notice on the land for assisting in the work. 2359. At a three any brecos band down in your donted—Oh yen; I can speaking now particularly regarding the western assistant of Denegal and of all that first which is called congested. 2350. You have had some conditionable experience.

2210. You have had some considerable experience in birective-ding 1—You, for a considerable time in a small way. 2200. What stallions have you used, and with what radia i—In the west of the county of Doneyd the

results in-III the wees of the desiry of knowings was audions were of an inferice domingtion; there were stallions that out of the stallions that out from a division, and the breeding of these actinates was very bead-endeded a Find of wought race. I never saw a pool stallion sensing the stallion stallion to the stallion stall

22H. Have you say that of the breeding of the salitast—I think there was a good deal of Clyderdals thool in some of the neary, scandowlys, mly kind of beasts; some of them may have had a little lood in them, but the graveling of there were unsimile to the scall marses in the locality. Torrer are stalling I could approve of—that is provious to

the but five or six years.

1592. Do you remainler a different state of things?

—I have known the locality for thirty years, and the treed of herea—or position rather—has been revisedly degenerating. In days gone by I heard of a good days of render called the Remay review attractive days.

degenerating. In slays gone by I heard of a good slaw of pecies called the Resses penden, extremely enduring, plenty of life and plenty of go in them; they have that one; I dee's think there is a remnant of their examining.

2307. What was the name 1—"Tenamin," the one
out
presented by the Queen.
42 2306. A Barb has zover been sent there 1—No, and

area. A list't has norey teem sent torc't we'ld, and the Arab was not appreciated at all by the people in I. I. comparison with the Maximay.

2500. Was the Arab altogether a well-shaped y; azimal 1—01, yes; a see little crimel, but too light to fee the class of marce in that country. I dark any if we'll yet to a large-stard marc the precises may have been will yet to a large-stard march the process.

a the good, but there are no mores of thet class in that one country.

2310. You imported "Little Wealock!"....Yes, sted! with two friends.

2311. You imperso: "Little Weinsen: "—I se, and i with two friends.

2311. What steam years be!—A small thoroughbred.

2312. Who selected him i—Major Gollin.

2313. And you thought him a good stemp!—He could be seen be seen to consider the self-of-manil short him. I don't think his modules have.

by made about him. I don't think his prostore have terroid or with the professor of the Arish turn out 1.

11. Each of the professor of the Arish turn out 1.

12. The contract of the Arish turn out 1.

13. The contract of the Arish turn out 1.

14. Each I remember seeing one especially, and it was reterroly high in the bone; it would just on remember you have been about the begin the would just on remember about 1.

13. The three any other stallies in the neighborhood beginnish—I deak know of asouther excellent professor in the religious professor in the

bourhood besides 1—1 stork know or another in the neighbourhood.

M 9 Mr. W. Hamzood.

2016. What would you regent as a means of improving the muscus there—Iw void regget the cotinuation of the Hockery stallions, and endoavouring to make the populo-amail fastern—keep their filiase for breeding. Utill they do that no persuanni improvement an take place. With these old and worly more you breed the same thing over any comparison of the property of the contract of the property of the property place is to drawback, and if some indescents we held out to the people to keep when fillies we would have a better

class of horses.

2817. Yen say the farms in your district are worked by made and hand!—Altogether.

2818. What then do they use the horses for!—

2513. What then do they use the bowes for beach-coding, some have easily bedelecting, carrying test and seweed, and bettiging been commedities from the market. Many of them, of essens, below no earst, and use credit on the harm's book.

2515. You down require a legge animal for that leading the sewer of the beach of the sewer of

the most particular raise of their acress in this recently, and if you give there a large highly beef borne they cannot seed those.

2190. Do you consider the Hackney strong 1—Yes, a most endurable animal. I had one myself, a mare, that I used for eighteen years, and a form rainted orall not exist. His had action, spherill constitution.

omil in the circs — one may cover, power and a spirit up to anything. I hand to drive that more and a spirit up to anything. I hand to drive that more fresh to she went out. 2211, Hare you may experience of Weish prime? — I had case at one time, small, 18.2, but a fine hite animal with apprind occion, and I hard from hit. 2022. Has in he become mod substance—Powly; it was a more I limed freely as sual closure. Powly; it was a more I limed freely and closure hald-bred.

A 22.3. I meant the stillions when was the hald-bred shifted the stillion of the was the hald-bred shifted the stillion of the stillion of the stillion For Munice, by a country mans, it was the most smalled it could get set the time to put this pury to, and sho bred twice. 2124. The size was of the puny class 1—Yes. 2125. And they grew well under 141—15.3 spreading would be the height of though they were both

I to story where the different in apparatum and action, the same size but different in apparatum and action and the same size the dark, which was a high boost of the same size of the same size of the same size of the same size of the same probably the same calculating of the two.

2016. Do you think a stabilism of the Welsh stamp, the only would be a good crow with the Rossen court the object of the same probably the same control of the same control of the same source.

— If he were large enough, has maything under 15 hands would be small to put to the march in the closelity to fixpowe their heights and their bolies altogether.

2317. What is the usual height of the Rosses pony!

—142.

the county of Donegal i—25 or 50 years in the West. 3330. And in that time do yes think the class of pourse has improved 5—On the contrary, I think it has degenerated very much.

has degenerated very mode.

331. You spoke of a pony with white eyes and
white legs, a good hardy yony — Yes.

332. That has disappeared t— Yes, it has. I
think one of the last I had myrelf, and that was
functed by a hady to when I sold it

253.4. What art of sits used the populate are who you first went to the district 1—these numbers provided that used to travel the country.
233.5. Those white-synd closs 1—No. 2.1 have no amount of finding out where they same from.
231.6. As any rate the points of 20 or 30 years ago were better 1—United below, for these works of the course when the Congested Districts Board sent days over when the Congested Districts Board sent days

their entire everyone went to him, and "Little Wenlock " had nebling to do. He was given to a gentleman in Sexusories, where there are larger more and which in a better district, and hat season he herds one of his legs and was shot. 2138, I suppose when the Congusted District Beauti stallings came they not all the work!—

Board stalling cause they got all the work!— Altogether.

338. Was the fee that the Congested Districts Board sharped much lower!—Oh, yes.

graft, was the ne that an occupies a Bitterist Board sharped much lower—Ob, yes. 2340. Considerably lower—Yes, considerably lower. 2341. I suppose these mendescript senior dish's there more than five shillingst—They fill on-

change more than five shillings 1—They did not. 2343. But the Congreted Districts Board's fee is five shillings 1—Yes; hot the people would prefer to get a good horse at 5a than a bad one. 2343. Then it is not on account of the lowers of

the fee, but on account of the excellence of the houst
— Yas; they would take the Hackinsy in preference
to the zondisoried at the amen figure.
2244. What you mean to say is that the Congressel
Districts Board's hore; has got the custom from its
superiority, and not through its composative lowers
of fee 1—80, the people appreciate the Hackinst, and

of ten 1—No; the people appreciate the Hackman, and would relabe have him at a higher free. 2345. Do you think the people understand the representation of larest brough [—1 think the people know what enits themselves remarkship well. 2346. But they have allowed their bones to deteriouse for twenty or thirty years—But they have had no good staffices that would have been you she

breel.

2347. You think they had facilities twenty or
thirty years ago that they have not had sizes!—
There was a better class of pony.

2348. How do you account for the good alsos dis-

appearing i—It was not the fault of the people. No person in that part of the country could added to uring an extre. The people were too poor, and the leastfords or others were not inclined to do anything in the way.

2519. Do you think they could afford it better

twenty or thirty years sgel.—I don't see very tronh change for the worse, so fir as the circumstances of the people are concerned.

2500, What I, want to got at is how you access for the people allowing their because to detections to the people allowing their because to detections to the state of the people allowing their because the fault. If they had had not entries contript of the country they wead have taken advantage of them. 2501, But beyorkes to this they must have had

1 times good sirm.1—Very much bether.
2 % 2. And they must have been brought in by the people 1—I have been unable to find where they came

2513. These very people who allowed its breed to detained its treating of their years as now highly appreciative of the Hashney horse 1—Cortainly, and 2516. You thought it would be advisable to as n. a. 18th think to I don't know the size of an average With only, but anything less than 15 hands would be not as now 2516. Do you think it would be not related to breed at large and the size of the size

2308. Can they rear that 1-Yes, owing to the hardy bread the Hostney is. I consider him hardier

than the thoroughbred, and more easily reared. He

market something more than the 14.2.

H-moord.

has a kindly disposition, and is easily broken in in comparison to the thecoughbred. The people there proceedly break in their own horses, and if they have a stubbers one they can do nothing with it—they specil 2357. Your experience is that the Hackney is major reared than the half-bred thoroughlined !--

2358. You have had experience of both I-I have had a little experience, but not as much of the Hack-ney as I would wish. This grey more that I spoke about was a Hackney. I took the trouble to send her to Armagh to try to leved from her.

2359. Was she a thoroughbred Hackney!—Yes

to Armagic to try to seven more seven.

2359. Was site a thorroughbred Hackmoy!—Yes.
2350. Did you kuy her in England !—I bought her
from a dasta: in Breland, and I sent her to a
tiscoughbred Hackmoy from Norfolk belonging to the
Ery. Mr. 25mastar, of Biehhill—" Becombare" he was

called. She was unfortenably, too old, and woold 2361 Was also in the studbook L. She was not 2362. Are you quite certain she was a thorough-hred?—I believe she was, from what I know myself,

and from what others said, and from her oppear-2303. You only went by personal appearance b-Tos, personal appearance. I had no record of what

2364. There is a great deal of posting week in the county of Denegal |- Yes, a good deal at Burismport,

Danglor, and Gweedore. 2365. There is a great deal of cart work !-- A great dral of peeting. 2201. What are the animals that are used?-Animals which are generally purchased in fairs outside

the district. For posting purposes and for heavy earling purposes, they generally go to Strabune, Rophes, or Milford to buy suitable horses.

2907. Am there may reared in the Romes !- They are all too small and suspitable for work of that description.

2505. And you think with a cross of a Hosbury stallion you can breed the best become ... Yes, if you

fair post brees.

2109. As a master of fact have yes any idea have
the present horses are level 1—I could not say.

2570. But tiry have no appearance of being highly
keel 1—I consider they are bred from the country
mores, larger and heavier than in the Roses, and
probably off half-bred stelling.

2371. And you think that for general hardibood and unefalues that the Hackney stalling is superior 2372. What advantage do you think the Hackney has ever the horse that is not by the thoroughtred burse 922 of mares (hannelyes got by thoroughliged horses

-I think he is a more compact animal. I think he is stronger in the home, with any amount of spirit, a shown here, and a more enduring home. I think there are qualities that you could not leat in the half-

2373. Showwares of spirit is not an essential quality for carrying creals up a mountain 1—It is an essential with those receils who want to cell them. 2574. You think he would be more saleable !—Yes

t think so ; if they have get a horse they can get good money for, they won't put a creel on his back.

2375. They sell these as fonls!—Yes, but letterly they are anxious to hold on a little longer in order

that they may get a better price.

2376. How do they keep them in the winter t—
They because them at might, and allow them to run out

2077. This would be the higger farmers !- And the smaller ceas, too, give them a little bay and mash during the night. It takes a hardy horse to live and succeed under those discumstances, especially with the

ernall farmers.

by a Harkney stallion are more capalle of bearing these risks and topobles than horses got by a thoroughbred out of a half-bred mare !- No, because our experience is recent 2379. Are there say other thoroughbred keeps in that district !- None, except the one I mentioned.

2380. Where did he stand !—Dungles and Glenties. 2381. Did you find his stock were hable to die in winter 1... No. I didn't hear that any of them did. 2382. They were able to subsist during the winter !

-You; they would not keep up the same condition in the winter as the produce of the Hackney; they are thinner in the skin and thinner in the halv.

2353. Do you think that the Hackney has not more 1884. And why do you think so ! If the Hackney

measures eight inches below the knee, and the thoroughbred measures eight inches, why do you say that the Haskney has more bose !—I am not accusinted with those large thoroughbreds : I never measured them. but from avocarance it is obvious that the Hackney in

the strongest; I think that is generally countried.

2386. I have not seen many Hackneys myself, but
it im's my experience of the once I have seen. You think that the Hackney would impact more home !--

2566. Than any threcoglibred you know !- Yes. 258Y. Mr. Canww .- You have no experience except the one you own porrooff for eightons years, which you didn't know was a Hackney I.—That is so. 2388. The Hackneys in your district have yet to

prove themselves !-Yes. 2319. Mr. Warren-Do you know snything of the Welsh onb....Do you know the most of them of the best quality are largely crossed with Hackney blood?

No, I am not aware.

2310. You don't know snything about the breeding of Welsh cols 1-No, I do not.

of Welsh cole :-- rea, I use non.

2001. Anil you think if any horse is supplied in these districts to satisfy the people and meet the remirements which exist, that there is nothing more suitable than the Hashney !-- I would : I know the people of the district are well satisfied with the Hackney as an entire.

1302. Do you know if they have sold the produce

at higher priors than they sold the produce at higher priors than they sold the produce of the meagrels!—Yes, at right or nine mouths oh! up to 2313. Is that the produce of the Hackney !- Yes. 2334. Is that much higher than before !-- I never

knew them to get more than \$5 heretefore, and sometimes they sold for bull that reice. I remember some being sold for £1. 2305. And in spite of that horses have been selling badly for the lost few years !-- Very badly.

2305. Don't they also require heress they can use at an early age 1—Yes. 2307. Two years old 1—Yes, they put them into work when they are two years old. 2398. And work then from that on !-- Yes. 2300. In horse-breeding a considerable industry

amongst the people in that district 1-It is, because during the time the more is reasing the foal they work her and work her un to the year day she 2400. And she is a considerable source of income?

2401. You would not agree to any recommendation that these people should not be allowed to breed !- I thick it would be a great hardship, but I would do

everything to advise them to improve their breeding meren, that is a thing the Congested Districts Board will very som have to look into and to try and find some remody why the people should keep the fillies and get rid of the old mares. 2402. Have you may suggestion to offer !- I was thinking if the Board changed a higher figure for service to the cld mars, and gave the young ones a Nov. 26, 2424. service free; it is a small thing that will induce these people to do what will turn to their advantage in the Mr. W inscrept. end: it is a thing that might be considered 3403. You would make a difference in the service fee between the young and old mores !- The old worn

one more I would not give her any service at all, and the young filly bred from a Hackney I would give ber service free 2404. Do you think the land is good enough to encountry people to breed from their fillies at two years old .- I think it stints the prowth of the saimal

and I don't see how she can feed the foal as well at three years old as four 9405. Von think it hetter they should not b

encouraged to breed until three years old !-- I think 2406. I think you said that the sire most be on the large side !-- Yes 2407. On the larger side as compared with their

mares !- Yes 2408. Have you a clear recollection of ear of the provinces in the district before the Congested Districts Board sent their stellions !-- I have a

2409. Can you describe there-a coarse blooded small curty !- Our was a half-bred; he was kept by a present of the same of Philips; he used to ride and drive him; he was a black horse with lanky legs and slight body

2110. What kind of stock did he produce I-Very inferior. I resember another, a black home, that they sharged half-crown for the service of; he was an unfortunate bouts hardly able to draw a cart : he was

2411. Then penetically the stallions were of the worst description?—The worst description, and that has of the country 2412. And I think before the Board took any

steps they saked you and a good many people down there for information 1—They sent a list of quaries to people who had the interest of the district at heart, and who are well accusanted with the lambity 2413. You know the whole of their district t-The whole of the congested district and a large part

of the county as well. 2414. Grannax-Was it not in order to get size that the big sizes were used in vour locality, with the result that the share little porter disappeared L-

2415. It was in order to get size that they used this large size of nondescript breed I-Well, they had no others; they could not afferd to go long distances, and took the advantage of those that come through the

country to fairs and markets 2416. But was it in order to get size 5-It was in 2417. Would it be possible to broad pole penies in your district?—I believe it would. I believe that

now the old race of animals is gone, and that they breed from the Hackneys, I believe they could be breed 2418. You say you want e good size 1.—Certainly, 2419. In order to breed polo perces you want to breed an animal not above 14.2 1.—Yes, 2420.—It would be of more advantage to the

furners to breed polo pomies !-- It would, if they 2421. Don't you consider a Barb or Arab or small thoroughbrod, would be more likely to get the sharp

polo pony !-- You must improve the mare before you do anything; the Hackney stallion is the only animal that I am aware of that will improve the breed; when it is improved you saight ose other entires to

advantage 2422. Are you not affect that you will get your maren too large with the Hackneys !--You might for pole posses certainly, but the largest sized mures now would not be higher than 16.2, and they are down to

2423. Mr. Wannon-In it not a fact that a large number of farmers there cell their feels as feels in-

3427. Are not the foals got by Arabs and Burbs and some ticeourhireds much smaller than there got by Hackneys? They would sell at a smaller price f-Yes. 2428. And is it not a fact that most of the pole

possies that produce good prices only produce these prices when trained I-Yes. 2429. And they don't bring the profit so much to the breeder !- No. It might trun out a frut-class. pole peny or not; but they would never test it. 2410. In those fairs where these recolesell their stock is not action a great advantage i.—The posmot

man in the country will look to action; it is one of the things that pays best. 2431. CHARRAN-In focuser days are you aware what price they got for their ponies—the good ponies that you spouk of as the Rosses breed !-- I

2432. I suppose they were sold as fools!-Yesthe same system existed then as at the present time. They then sold them or feals. Some by necessity; longer; some kept them on and kept them a little longer; some kept them on and kept from them. 2413. Mr. La Tourne.—Do you know what be-

came of these ponics that were bred in the Bosses and sold in the tairs of Dangtoe and Glenties I-Strongers came from Donegal, Strobune, Stranorlar, and other places, and purchased them and took them

2434. Used one man hav a bank of them I-A. man would buy two or three of them at a time; but mostly they were picked up individuall 3435. One man would huy the one foal 1-Yes, and take it away and either keep it or soll is. 3436. Is it in your knowledge that they graw

bigger when they get down into a good country than if kept up there i... I should say so. \$437. That the foal that would probably attain a size of 14:1 or 14:2 in the Rosses would grow to 15 hands in enother place—the county of Covan, for instance, or somewhere else !- It might; but I have had no experience, and cannot give any examples. 2418. Colonel St. Querra.—There is just one

question I should like to ask you-whether or not there has been any industry up there in the way of mule-breeding !-- No.
2439. They don't breed mules !-- No.

2440. They never try !- No. 2441. Are there many males in that country !-- I only knew one.

2442. I suppose there are pleaty of denkers 1-05. yes. There was a Spanish are there one season; the Commeted Districts Board sent him down.

2443. What class are the donkeys; hig or small?
-Very small; rather diminutive, but extremely useful. 2444. Don't you think they might grow mules

there !- Yes, I think so. At the time the Congested Districts Board sent the Spanish ass I was onxious they should try him for mules, and he was let to no DATE 2445. By mules I mean jennets as well 1-Yes, they are both useful, and, no doubt, would serve a

our country like that. They are easily kept, and, if good, they are of great value.

2446. Mr. Wanson—Have you any exp to whether they sell as well as the produce of the

Hacking I.—No, certainly not. They samed be as profitable; but for the use of the poor man they are test as welcable; but certainly not for selling. Therefore, I think the people would not take to reeding them as much as ponies. 2447. CHAIRMAN.—What is the highest price you have heard said for a mule!—My experience is very limited; I think the mule I refer to, the man much

have got her for £5 or £6.

eggs. Would it surprise you to hear that as much as £40 has been given for a good nuclet-Some of these runles are 16 hands high, and I have no doubt a sails of that description would be worth £40. 2449. Colosel Sr. Quivres .- Dun't you think that good nules were tred that they would fatch a resourcetive price!—Yes,but I have had no experience. \$150. Mr. La Toucus.—The Congreted Districts Board's stallions have been standing for three years and four years —Yes, four years; the oldest of the

fools are three years old past. 2451. And the ordinary price of feels has inmediately increased !- Yes, cortainly,

\$152. And has that increase been maintained !-- I

the produce a little longer than heretofore. 2453. In it became they are more anxious to keep or that they find a difficulty in selling 1-- They find no difficulty in selling but fluid a prospect of making more narrow if they keep them to three or four years old. 2454. Three taxest he some hundreds told as foals every year?—I should say so. 2455. And those hundreds still fotch a comishrable physical print ... They pertainly As-

2456. Three years are the oldest?—Yes. 2457. You have not had much opportunity of testing their qualities as yet?-No, we have not as yet. The Commission adjourned to next morning

Present:-THE EARL OF DUNDAVEN, M.P., in the Chair; LORD RATHROWNELL LORD ASSTORE. Mr. F. S. WRENCH; Mr. J. L. CAREW; SER T. H. G. PARONDE, M.P.; and COLONER. St. OUDSTOL

Mr. HUGH NEVILLE Secretary.

Mr. E. M. ABURDALE, D.L., Bellinsmallard, Co. Formanoph, examined. 2458. CHARMAS. - Mr. Archdele, you are, I think,

SIXTH DAY,-THURSDAY, NOVEMBER 1976, 1896.

Deputy Lieutement of the Co. Formanigh!-Yes, my 2459. And you are engaged in familing in that county !- Yes, I am, I suppose one of the largest farmers in Ulster, I fancy,

2460. In the district you live in a large house-breeding district 1-They breed a great many houses; meanly 2461. For their own use !—For sale entirely. 2462. What are the characteristics of your district,

do you consider it suitable for horse breeding !-Oaly part of it is 2403. What kind of soil is 187-About half of the

county is limestone and the rest of it is mixed with a hoppy, moory sort of land and stiffah clay, but it is red appointone a good deal of it. 2164. You breed beenes yourself!-I do a good

2405. Largely !-Yes; ton or eleven foals every year 2406. Have you a stallion of your own !- Yes

2467. How many?—At present I have one Hackney 2466. And have you been breeding herses for a length of time 1—I had a thoroughbred stallion for shout fifteen years, and I have been breeding for the last aixtom or seventeau years.

2469. How long have you had the Hackney and the Clydesdale?—I have always had the Clydesdale; I E00 the Hackney about five or six years and 2470. You led the Olydesdale the same time as the thoroughbred I-Yes.

2471. What kind of mares did you put your both let to make money, and they were both let to the country. With regards to my own marce I only put the Christials to the farm mares to breed farm borees, but the country people having a light more would put

the Clydesdale to her to increase the size. 2472. What did you charge for the thoroughbred ! -Three guineas for half-beed borses; that was the usual charge , sometimes I would put it at four guiness,

but three guiness was the pural for 2473. And for the Civilesdale !-- One prund. 2474. Could you say which are most generally preferred!—I think the Clydendale as a rule get the taset custom. I had one thoroughleed horse, "Forlora Hope," for about ten years, and he used to get a good many mores. But so many more thorough hed

custom a good deal.

2475. And the farmers who used the Chydradale, did
they bread for their own purposes or for sale 1.—For
sale, a number of them leved for sale; they use them themselves when they are two your olds and they sell then when they are four year chis. 2476. Where do they sell the produce, at the fairs ! -They sold nearly all at the fairs.

2477. Where did they go to 1-If a well bred more It went as a hunter, most likely they used to sell her at the May Luir, and pall the hair off the legs.

2478. Did most of them go out of the country or
go to other parts of Ireland 1... I think the majority on cost of the country. I dare say the majority so for

tran berses and for troopers. 2479. You had a Hackney stalken for a year, you and 1. Plus ware. 2450. Have you keed from that stallion yourself !-

2481. Out of what kind of marcet-Perc bred Hashneys; podigree Hackney.

2192. What is your opinion of them!—I think they are most spitable.... I think they are a very good style of home for the country 2483. For driving 1-Yes, driving. I am going

breed from a thoroughwest mare to try the effect of the cross. I am using a Hackser mare on the furn also and it is one of the best farm berses I have. The young houses from the Hanknoy by the country very salcable I find. 2194 What do wen charm for the Hackney !--£2 10a 0d. 2486. Well, in your opinion is the Hackney calcu-

hited to produce a more saleable horse than the thoroughleed I—Yes, much more I think. 248d. I mean a thoroughlyed with good hone and substance !- I think with the mares in our country much more. They are a weedy class of mare as a rule, light in the bone.

2467. You think them more likely to sequire bone

and substance from the Hackney sire than from the codinary thereughbred sire t-I think so as for as TOT ATTOUTIANCE ATTER 2488, Are many horses in your district sold as

hunters t-1 have sold a creat reserv sorself but I am No. 10, 1995. sure some other ones were also soid. I don't knew the future of may others except my own. I sold to a Auchdele no Captain Beatty, at Tarporty, Ragby, for many yours,

and a great meny of mine have gone to Cheshire. a won one Emission must cap ave times out of eight starts by horses bred by accelf which were seld 2450. How were they beed 1-By a thoroughbrid

horse out of a well-heed mare. Would you call your district a hunter producting district i-No, not a lumber producing district.

There is no sale for heaters there. They have to come to this country for heaters. The dealers get the hunters down here and they make the principal

2401. Have you any opinion yourself as to what effect the introducing of Harkney blood would be likely to have now the trade in Irish hunters controlly throughout the country I-I think it would to it good. I think it would give home and sound-ness, and do near with a lot of the act orecast they ere getting from the Clydesiales at present.

2192. I think you sold, in answer to a question, 2372. I think you improved in your district !--Yes: I think they are improving. I think the Royal Dublin Scheme is improving them. The proper are terrotype them to keep on the mores, instead of selling

2493. Do you attribute the improvement entirely to that cause or to any other causes !- Entirely to to that cause, and to the people telving a little more in-that cause, and to the people telving a little more in-teress in breeding and in soundarss principally. As a rule, the more that in fit for nething else is rule

to be all clears in our country-sensored or no matter when all her 2494. I think you said that you have bred out of a

thereoughbood mare and your own Hackney shallion 1-You, I have, but the produce is only two years old at 3493 And from half-book reases for L.-Yes : and

free hilf-hand mores and free putteres Hackney 2408. That in for sale !- Yes; they are four year clils, the oldest of mine. I am driving four year olds, but I have not tried to sell any yet. They do not sail well until they are five year oble down in our part. 2197. Not must five t—That is the time to get the best price, if you can keep them until then. 24162. Can you commone at all the prices you got for the stock of the Hackney stallies and the stock of

the thoroughbred stollion 1.... I have not sold any vetbut two formers, who sold a free-year-old mare and burse, got better prices they told me. They told me they were well satisfied. They see £52 10s. at they were well satisfied. Thay goe £52 10s. at May foir, in May last, and a dealer called Hothersali gave \$5 profit in half-sn-hour; snother man got \$70 for a three-year-old off my horse-on man called Solt. That was much more than they could have got before.

2492. Are there many high-class barrows horses bood in your district !- There have been a great many

think a good many good horses. 2451. At what ago would they be said to the dealers 1.—They would be said at four by the biggest

farrours. The small farmers sell than coming two.

452 What price would they fetch !-£60 and £70. 2453. Do you think that the dealers would prefer barness horses got by a Hackney to harness horses got by a thoroughbred t—If they could get a harness hence by a thoroughbred with fair notice. I dare say

sold several over there.

they would peefer it they would peeter to.

2434. In your district is the horness heres a pro-finable kind to breed 1—Yes, I think so. I think is in the most useful for the district. I have sold har-ness heress by a throughbred to Glasgow desiles. I and I got about £00 or £70 for four-puryolds. 2407. Are you in a position to give any opinion, prison being equal, what kind of stallion they would select !—I think, now, they would go to the Harkney stallion if they got him. I think the Harkney stallion in the favourite class of stallism in the oventy at

to their own horse for nothing at all 2468. Was there any Hackney in your county before yours !-- Mine was the first. 2169. You have had experience of the locality for

Sign. 101 have had experience or the scalary of the last five pears—do you think they would prefer a Hackney size to a sound thoroughired size, the fees being equal !—Yes; I think so, undershedly. 2470. Colonel Sy. Quintin .- A great many of the

borses sold to the big carrisgs borse dealers average you say, from £10 to £70 and £80 1 ... £10 to £70, I said. 2371. How were those bosses you speak of got !-

was got by my own thoroughbred herse out of a Chydesisic mare, and I have known the professe got by that borse go for £60 or £70 to these

2455. You said, in answer to a question sent to you. that the number of persons who benefited by the Royal Dablin Society's Schome was small became they are obliged to use only registered stallions !- Yes ; I see on obliged to use only regatered statileous I— xer; I am or the County Committee of the Royal Dublin Sectory's Schools. We have never been able to get never enough for the prices. During the which thus the Dublin Schools has been in operation in Fernance, we have never been able to use the whole of the

We never got mares enough 2454. How do you account for that !- They don't cure to go to the stallion in order to got prime They menire a different class to the Dublin borns, and they would profer to go to another horse, pay more and less the prim than on to the Duble home 2457. You think they ought to be allowed to choose their own stallion —That is my own opinion.

I think all suitable stallions, of whotever bread as long as they are gure-bred, should be preistored, and men allowed to en to them to relect their own stalling 2458. Do you think that stellions other than thoroughteed coght to be registered !- I think as, 3459. Half-bred stalliens !- No ; I den't approve

2440. You meen vare-bred t-Stalliens belonging to some recognized stad-back. 2461. But not say half-bruds t-No. I am oversed

to hulf-levels, and the majority of the stallions in the County Fermanach are half-bred now-those that are 2442. Have you ony idea of the wember of stallings

in the county 1-I have no idea. I saw Captain Tut-hill gave evidence about it; I do not know the 9.453. Are there many thoroughbowl stellions shout

your own place !-There are. A man called Mitchell has get three, Sir Douglas Brooks one. I think there are about four or five in the county now. 0.164. In the former were much influenced by the

sention of wrice in selecting a stallion !... Very week. Price and proximity are the two principal things, I think—that is, with the small slope of furners. who are the principal breeders.

2465. And the larger class of farmer—the man who om afford to pay!—If he sees a suitable stallion he will send to it. 2400. But in the case of the small farmer the veine is a count object to him !- Very count very.

the present time. I am getting mores from men who own thoroughbred and half-boad stallings. They are

Some by thoroughlend and the majority by half-bred Clydendales. I have known them sell a stallion that

dealers at the Moy.

S472. What class of carriage home was that!— Sixtoen hands high. 2478. Showing quality 1—Showing a wonderful lot of quality considering his size. The mare ment have been a light well-bred mare. It showed a wonderful lot of quality. I saw one horse I resember quite well.

1274. You also told us that there had been centleper a lou mee soin us true toure had been gentle-sen who award thoroughbred and builf-bred stailions who had been synding to your Hackney stal-

lion - that was only a short time ago !- This year. 2475. That, I should imagine, was an experiment?

—Yes, they are good cots by the Hackney stallion year there in sound condition and better than what

they could bened themselves. I apparent that 2476. It is not from any proved intrinsic value !-

No. 2477. You also said that the people in the district object to go to the Royal Dublin Society's stallion? \$478. Why is that 5-I den't know. We see very hard put to it to got enough of mores this year. After a lot of bother we got the Duckin Seciety to give consent to our giving a £10 prize, which is more than the rules allow. We gave that in order to try

and induse more mares to come. \$479. What was the objection to these stallions !-I denow they think the fools do not recor so profitable to them.

2480. Lord BATEDONNELL -- You say the mares in our district have improved. Are they beed or hought 5-A good many have been bought. Some mare have been bought in the south since the Solety began to give price. Our farmers got mares in the south, feel them until they become four and five-year-olds, and then sell them to the London

2051. I am referring chiefly to mores 5-They keep some of the mares when they got good prices. they keen some of them in order to try and get a prise, they then sell their afterwards

2452. Do you find that the sound fools are picked ap by the dealers, and the unscound ones left in the county as a rule !— Yery much so; it is doing the greatest damage to our horses I think. 2893. Have you any nebron is your mind as to how that equil be stopped, as to how the sound marse sould be kept !—I have offers thought on that, but I have no cure for it except only of ourse the prises. They do to a certain extent make

a difference, as the mares reast be sound in order to obtain a prize.

Chelwood, and Garland was there, but he has gone

this year.

24:50. How far apart are they, are they "gat-stable" to the ordinary factors—Well, they are away free him as a mile. Hillselous and Combris are near Exastintines. Mitchell, the owner, travels his borses, and there is " Scotch Monk" close to Enniskillen.

There see a great many close to Euriskillen, but none in the other parts of the county. 2436. You continued about the half-bred sires in your district. What do you mean by half-bred sires I —I mean a sire got how I could not tall; it is not a Clydendale, a Shire, nor a thoroughbred; it is nearly

always get by a thoroughbred from a heavy east more which they think gives bone.

S457. Where do those heavy east mores come from, not hought from dealers !- No, they were in the

scenty as a rule.
Sidd. Howeve they crossed t—They are beed by a Christals sire on a county mare. 2489. What do you mean by a county mare!—A light mare 15-1 or 15-2, no bone and bad shoulders. 2450. Is it your epinion that they have gone to the

2490. Is it your cpinion that they have gone to the Chylendelic to get bone!— Yes, that is what they do terariably. They have a good mare, and they come to me to know which house they would put her to. They always neglect the thoroughbeat. They status the mass is too light, and that they want a produce with hore. with bone : they want a little mann ri 2491. Is it your opinion as regards bone, that the

Civdesdales, Shires and Clevelands, although bigger Clydesdates, Shirps and Grevenands, although ougger don to look at, the bone is much more porous and more inchined to fix t-Yes. I do not agree with the theory Archele, a.z. at all that the Clysicadals and Shire will give home. I think they spoil the bone. 2492. You don't like the Clydesdale coses t-1

don't like any eart cross in a more except for farm 2483. I think you knew a horse called "Fortors

Hope "1—I owned bim for many years.

2494. Was be a thoroughbred !—He was bought as thoroughbred, he was bought from Blonkiron, but Weatherby would not put him in the book; he was

supposed to be by Citadal out of I Dure by Untle Ned. 2496. You knew a horse called "Revenue " 1-Yes.

well. 2497. Was be a thoroughbrod to He was in the same sort of way I believe really a thoroughbrod, but 9468. He was a half-head f .- I should not call those

horses half-bred. horses half-tree.

2409. He had a strin !—Yes.

2500. Would you object yourself to horses which
have stains of that kind !—I should be very glad to

get them to use.

2501. You think a half-bred stallion of breeding hone and substance would be accountable to the recole in more district L. A half-bend stalling like "Revenue. would be acceptable. No one would look upon him

2502. If he is not in the Stud Book he must be a half-hred !-- I mean to say the people would not look upon him on half-bred 2503. If a half-bred of that downintion, approved

of by some competent Beard, registered in fact, was to stand in the same locality as a Chyleniale, or a Hackney, or a Cleveland, or a cart horse, and serve torres at the same fee, to which stailing would the farmers in your district send their mares !-- At the present time they would go to the Hackney. I think it would be a class run between the Hackney and a would be a class run between the Massing one a stallies like that if they get to know his stock. I had a thoroughbred stallies "Dethroned;" he was the winner of a good many races. The furners at first sight did not ours about him, he being rather high in the lear. But his produce turned out so well that he

2504. Do Messra, East and Wimbuch, and large dealers like them buy many horses in your district b-They do not come near us. All the good horses go

to May fake. to May fair.

2505. They spend a great deal of money in this country 1... Yes, a great deal.

2506. If Meatra. East and Wimbush were to state

that they delike the cross of the Hackney would you sell be belined to use the Hackney !-- Yes because ! don't shirly they have the least notice what the horses

are got by that they get.
2507. But if they knew that the Hackney stallion cross had been used do you think there would be any eross had been used do you think there would be any danger of their leaving their money away from you's— I think not a hit; if they got a suitable borse they would bey it no metter what it was got by ; even if get by a Chydeedale to their knowledge, if it looked mod comes they would buy it

goos enough they would tray it.

2506. Mr. CARRW-Y-You said you sold seems borner
yourself in Glasgow for £00 or £70. Was that
recently!—About feer yooss spo.

2505. They were not by Haskneys!—No, by a

thoroughbood, by " Fortorn Hope 2510. What age 1-Four-year-olds. 2511. Do you think you can improve on the price by the produce out of the Hackney i-I hepe to, with some I have got now, two-year-olds coming three— three-way-olds in fact they are.

2512. You said that as between the Hackney and

Now, 16, 1800 the thoroughbred if the thoroughbred had high action you would prefer it !-- I would prefer it, but when I much of the henefit of the Hackney even I do not Mr. E. H. Avelegate, or Au

speak of my own marce so much; my own are good sound marce with plenty of breeding. 2513. With that qualification you would prefer the thorough) red 1-Yes.

2514. If the mores in the country were like yo 2014. If the maries in the belonity were not yours you would profit the theoroghized 1—1. Unite the Hotekney would bring plenty of good stock, but that the thoroughlared would living still better. I have been driving throughbreds and Hackeny for about six years. They talk about the daying powers of the Harkmeyn I drive one thirty miles are her with the whip, that is the pedigree Hackney more that I have been breeding on at the same thus.

2015. You said you think the introduction of Hackney blood throughout the country would improve the breeding and substance !- I would like to qualify that. I would not like to introduce the Hackney into Mosth or Kildare, or our hunting district at all. would keep it in parts like our county where they

have small, light mores unfit to produce big mares 2516. Col. Sr. Ocustin .- Your countr, is not that thes of county that you could broad males !- No, we 2517. Mr. Wessecu.—I think in addition to being on the Gennty Committee of the Royal Dublin Society

you are also on the Home-breeding Committee of the Duldin Society !- Yes, I am. 2518. I think you are also the practical manager of the Escabellen Forming Society, that you have managed the County Society for many years !- You

I have been secretary for fifteen years 251R. And you were mester of the Fermaners Harriers I-Yes, I was about five years master 2520. So that you have exceptional opportunities of knowing the famour and the home-breeding in the clustrick!—I don't think any one knows the famous in

Ferranagh botter than I do. 3521. You have mentioned you had a base called "Furlern Hope" I—Yes. 3733. Was he not a horse with exceptional hope below the knee !-- Yes, very good bone.

2523. Did he not measure nearly 9 inches!-Yes within one-eighth of an inch of 9 inches. He measured

2524. Delow the knon !- Yes. 2525. A big upstanding home!—Yes, above 16 1. 2526. Therefore you had experience of baceding from the type of thoroughbred you recommend !- Yes, my father bought him specially for that purpose from

25:37. Do you think a thoroughlied home is calculated to produce notice with the same certainty as a Hackney stellion !-- i sm afront not. I have never found that he could,

3528. You think the Hackney produce has better action thus any thoroughkeed ... Yes, undoubtedly. 2729. Have you ked any experience of the West of I leaved—Donegal or any of those remote districts i— I know the west of Donegal very well—Arrises, Killyloge, and all that pere from Bundown to North

Leitrius.

2520. You have been around the west coast, and know the west coast of Donogal i-1 know it very 2031. Do you know the class of mares that they have in that district I. Small, light, well-beed mares,

about 144 or 15 at the most, down to 14.
2533. What home do you think best calculated to cross with these merce !- I think no other home but

the Hackney would get a good stock out of them.

2533, Do you think that the people them want their meres to develop into a stronger and more suit-able class of more !— Undoubtedly. —I think to a great many parts of Fermanagh. The mores in Fernanagh want bone. I don't like their practice of increasing the bone with the Clyderida, which they went to do. I think the Hackney will put the Chydesdele cross out of it, 2635. You don't consider that there is anything in

this allegation that Hackmay are north-My experience is that they are quite the reverse. They are wonder fol stayers, sa far as I have found. 2536. Do you know how they are bred, if there is

may thing in their breeding that can give any sorce to that statement !-- I think the origin of the Hackney. a thoroughhood cross on an old mag borse-eaght to make them bard, and they are very particular in all the stud books to keep the ours cross cut of it 2537. You think that there is a considerable coming of the cost bears in Ircland now on the mores of the country?—There is a tremendous crowing in Fer. managh of the gart horse with the mores. Many more use served by our borses than by any other sect. Ton times as many are served by out horses than by

any other particular horses. 2518. We have keard the old Irish mare spoken of. Are you of opinion that there is any particular type of Inish mares still existing?—They are not in our country. I now the man o described, but I power now one in my life.

2539. Was not your father a large brooder before you b. Yes, a large breeder, and he used to judge at shows in Dublin and in England and chowlers, been

2510. If there were any mores of that sort, he would be likely to have had them !-! faper so 2541. His mores were especially good !- They wen very good toaces.

2543. When you are corrying out any schools with soldto money to inserove the breed of horses in a district, do you think that the people themselves ought to be consulted !- Well, I think they ought to be committed to a cecuin extent. I think they know perfectly well themselves what they would get adu for. There is no good in driving them against even

mon sense. There is no use in making them breed what they cannot soil, 2548. Do you think they would know the type of home sing would want?—Most containly. 2544. Would you agree with the opinion that the

small farmers, say of £30 valuation, should not be allowed to breed horses 1—No, I should not, because that would put half the lisener in Ireland out of the 2545. In not the breeding of horses a source of our siderable profit to a great usany men of that descrip-

tion i-Yes, they do not have side mares; they work them out watif near fooling, and it does them as harm 2346. Would you register may se-called half-bred houses !-No, I would not 2547. In addition to the horses that you mentioned

so luving horn bred in Fermanagh, have many high class men korsen been bred in Permanagh !- Yes, the best horses in England at the present sime have been bred in Fermanagh, Red Heart, Tiptagel, La Fiances, Glegyynnon, ace all bred in Fermanach.

2548. Therefore it is a county that can breed good bornes !-- It can breed good bornes 2549. And your evinion of the breeding of bunters is that heaters always ought to be got by a thorough

bred home !- Yes, I should certainly think so. 2550. Supposing that Hackney blood did spread, we will say from the West of Iroland into other parts of Ireland to the miner of the mares of the country,

do you think that any possible dissovantage that there might be with regard to assism could be excel by being crossed by a thoroughbrut i-I think they would make typical brood mares for crossing with a thorough-2551. You don't think there would be any direct vantage in galloping or staying or in any other way! -I extract see any dissivantage. I do not believe the action would be too high for fast going.

keeping better mares.

2552. Did you hear that it had been stated by a witness here that farmers could be relied on as a rule women nere tran memore could no retent on an a rule to give a true pedigres of their besses!—If you know then they would, not otherwise. 2553. If you know them they will tell you the truth shout the borrof—Yes, I think if you know them to the country.

gy was. 2554. Did you hear that the classes which were

grand to have bred the horses which have given Irehad a name for good I rish horses were the gentry and had a name for good trust admits were the gentry and the fermers over £100 valuation !-- I saw that in print; I think it was Mr. Roberts mid it. print; I think it was Mr. Peterts must it.

2555. Then if these people got a statement from the
farmers how their moves were keed, do you think there would be the least danger, when they wanted to buy a

was got by a Hackney stallion, if they did not would out - Thry would know if they bought the mare near them what she was got hy. near them what she was got by.

2556. It was a danger they could guard against 1—
They could guard against it. If they went to a distant
fair to hay from a stranger they would not get a tree.

mulicres : they would simply see the horse and buy it 2557. You were saleed if Messre Eastand Wimbush

dealers, who buy these high clear harness bosses did a large trade in your district t-They buy a great many at May tair. 2008. There is a percelar or wardest from which to how that class of bosse 1.—A great many small dealers bay.

A man called Magnire, of Fermanacis, burn 300 or 400

every year and align them to England.

2539. And are those other dealers in the North!--

Yes, from Dorry and places come down to Earthfiller. and Clones 2560, If Mesers, East and Wimbush, found a good leeking horse that went well they would not be

particular about the pedigree!-- I don't think then mrw much about polipree; they deal in every stock. 2561. Do you know as a matter of fact that Meson. East and Windowsh have benght a good many American house b... From my own knowledge I control my.

1869. Do you know anything about the impertation of American horses into Ireland?—I saw two Canadian borses, the highest class of Canadian horses; they belonged to a brother in law of Lord Landowns, and belonged to a treather-in-irw of Lord Landowns, and were bought by a friend of his I think our own are very much preferable to them. They have very fine shoulders and creet but very bad

hind quarters and the rump fell owny altegother, and I reppose they were the pick of Causdian horses; I nerec any Canadian horses before 2563. Do you think it would be to the advantage of traders in Irohood if the American horson or foreign borses were hearded in any way so as to distinguish

then !-- Very much, I think. 2564. You would be in favour of branding !-- Yes. if they could be distinguished without being dislayed 2545. De you think that would put up the price of

Irish horses !- I think they would do them good. It would prevent the Irish character being taken away from them unfairly. I like all foreign goods marked, Extet ennecially. 2556. Charaman.—One or two questions so as to

be quite sure that we have got your meaning correctly.
You said in answer to Lord Rathdonnell that you secounted for the improvement in your district partly to the sace that a hetter class of mure had been imported from other parts of the country? - Partly to that In order to obtain the Royal Dublin Society's

prises, the people were at more pains to keep good mores. It was the Dublin Society's Scheme and their prises for mares that kept good mares in the country instead of their being sold. 2567. You mean that the improvement is due to keeping better mares belonging to mach district and also to the importantion of a better class of mares; not to the introduction of a new stewn of blood or anything of that kind !- Not to the introduction of a

and also a four-year-old golding out of her which I are driving also, by "Detail Grant," a coletented Hackney. I am driving both of them now. am driving note of uson now. 2003. Do you think there is snything like what rights be called a new industry capable of being consted in your country by producing borses by pure bred Harkney circs and pure bred Eachary marest—

think there could be a very great market about Belfast. not in my part of the country. I don't think three could be a market for those in this part of the country, not for the pudigree marce 2570. Do you attribute the staying qualities of this

new atmin of blood at all I think. It is solely due to like so, 1806.

2565. Well then, I think you mentioned in com Archica no. nection with the staying powers of the Hackney horse that you got your own out of a pedigree mare 1—14 is the mare I referred to, she is a pedigree Hackney mare.

saims! you named to its being pure bred on both sides !—I don't know what to attribute it to, I thought it was the natural Hackney blood. They are from old 2571. Von think the Hardensy blood in likely

prograffy speaking, to transmit staying qualities to the produce !- I can only speak from my own experiones, I have three Hickney mares now and they

nii, I find, are very hard.

2572. You would not favour the introduction of
Hackney blood into Mooth, Kildere, and other places of that kind !- No, on tolely not. 2573, And you mid that Measure, Rest and Wimbesh.

and others..... I did not enite understand whether it was that they did not care, or could not distinguish the Hackney blood -I do not think they could distinguish, and even if they could they would not care; if they saw a suitable horse they would not once what it was

2574. Do you think the broaders in those occution you mention would be able to distinguish whether the mares have a strein of the Hankney blood in those or not.—I am sure they could not, I have seen Hackury mores that one could burdly tell from a thereughbred mare.

desirable in those counties how would it be kept out !-I think it would be better than more of the surger they get in. I should perfer a hunter out of a thorough-heed horse to a hunter by a Haskersy, but I think the Hackney sire would produce a better class of sures to Hackney size would produce a bester time of mirrer to hreed from to get a good houser.

2016. Are there any persise in this part of Donogal that you are acquainted with la-The mirrer mently all wint you call pony mirror. We key a great many pole ponies there, all the English dealers come to

peto ponies there, at the argum behave come to my county to buy pelo penies.

are lithe, well-hred stallions as a rule. All the mares have been starved, this was what kept down their size Woold you call these popies a distinctive

breed by No. I think not. Lord Ennishillen, a membrief l- No, I think not. Lord Emission, a mem-ber of the Countiaton, kept a Forester pony for some time, and he got spleedid posite. 2579. Do you think the Hackney sire would in-

prove the breeding of these pole pones t-No, I don't think it would; I think it would be a bad eross for a 9500 What would you recommend f..... I think the pelo peny treeding is all on chance. I am breeding

myself at present a polo peny. I have got Arch foals, and I am putting them to a thoroughbred horse, "Second Monk." The dame originally, or the grand dame, were pelo pensis, well-bred mores I could not get their pedigree; it could not be found.

2581. As far as pole penies are constrained, you would not eccess these West Designal penies with this there are so many in West Designal sa there are about Permanagh. I don't think they would loved anything

Printed impres digitized by the University of Southwardon Library Digitization Unit Printed image distract by the Linearaby of Southampton Library Distraction Line

in West Donogol suitable to kny; they are all very had shouldered and very light in tone. M. E. W 2582. You must have maunderstood me-you don't Archite, p. 1. ean to my that the produce of these panies of West Donngal are sold as pole posites 1—I gave a wrong answer if I sold that. I don't think their produce are sold as note puning at all. I have tried to buy pole panion up there very often, and I never get one you. 2563. What class of mores did year father keep!-Hunters, brood narres with two or three crosses of the thoroughbred in them. I have known him sell some

Circlesdale grouses for high-class hunters; I would not like to buy them myself.

2584. You certainly prefer, I gather from you, the
Hockney to the Clydendale or any other cart kind?— Very much, and very much also to the Cleveland. here is a Caveland in one end of our own county; I den't like it at all; I den't like the ercones by it. 2585. It is specially for giving bone substance and

action !—Bone and soundness is the principal thing. 2586. Would you peake the Haskney to the theroughbred; I mean a suitable theroughbred horse with sufficient bone !—If a thoroughbred could be found to give the same of amendments, I would prefer the thoroughbred. I have never yet seen the theroughbred that would. 2587. And you think in the case of small farmers

under £20 valuation, that the breeding of boson is profitable to them!—Yes, ortisinly; very much. 2588. Do you think they can afford to pay a suit-shle fee, one large enough to obtain the services of a great horse t-1 mm afraid they could not pay a high fee-or they would not, rather. But with the Dublin Society prison they can do well enough.

2389. And as regards the registration of half-freed.

homes, I understand you to say that you do not ap-prove of it as regards what you call half-beein, but you would not object to some horses which are not in the Stud Book being registered after careful selection ? -I would not object to any stallion in the Hunters' Improvement Society's Stud Book; six mouses, I think, they register.

2590. And you think the foreign horses should be branded in order to be distinguished!-I think is would be very desirable in the interests of the Irish

2591. Why if these huyers like Messra, East and Wimbush and others do not care to know how the bornes are bred, what difference would it make if the horses came from America !-- I don't think it would make much difference, but it would prevent the character of the Irish home bring taken away. These other houses, I think, are not well-bred

2592 Colonel St. QUISTIE. Talking of these farmes under £20 valuation, what price at the various ages do you think would pay the figure: what is the lowest age at which they are usually sold !- One and

16/46% sign at water toop are amonity sold—these was three questions, coming eve.
2000. What price solo hopel, and what price would 2000. What price solo hopel, and what price would 50/4. Would that pay his expenses 1—Veg. 1 thick, would. I think if his got 21% coming two, it would be would. I think if his got 21% coming two, it would be sold to the price of the price of the price of the area of the price of the price of the mare ago to a few down of facility and they were the days of faciling, and they work her again shortly afterwants. There is no waste; there is just the keep of the colt up to a year 2595. Suppose the farmer leeps then until they

years !- I always consider you could not do it under £10 a year at the lowest. £40 for four year olds would he the lowest that could make any profit, that is without any feeding at all.
2500. Well, then, there is a great deal of talk about
Hackney action, do you think that excessive action is

desirable for a farmer !- No, I do not, 2597. Does not excessive action ne power !-- I think it is power wasted; I would not my want of power.

2598. Waste of power, I heg parsion !-- Watte of

2099. That must incommarily stop power of so durance and give here power !—Xes, I should think as 2000. You have been a hunting man all your its You understand what riding a borne is, and you may won don't think that Hackney setion interfere with horse in galleping or in gotting over the ground test.

—I would not hunt a pedigree Hackney, but I thin
the mare got by a Hackney stallion out of the ordinary country mare would get a good mare to breed from with a thoroughbrod. I am speaking of the hunter

class. I mean a hunter !- I would not like a hunter to have Hackney sotion 2601. You don't think the Hackney out gullopt-2002. You said you did not think the action into fered with the galloping power !-- I mean the action of the cross of a thoroughlized stallies with a labbled

Hackney more, in that case the action, would not be potent enough to interfere. 2603. Have you over seen a Hackney gallop!—Yes,

2014. Do you think the general formation of the ordinary Hackney is calculated to get safely over the country 1-There are Hackneys and Hackneys. My thing; they are rather too much of the Norfolk

2605. Do you think he would go quickly and safely over a Meath double 1—He would go safely over a Meath double, but he would not go too quickly. But I think if a thoroughked stallion were crossed with him the produce would go both quinkly and estely over

2000, With regard to the conformation of the shoulders of the orditory Hackney do you think it is a conformation that is either comfortable to the rider as a riding shoulder, or that is likely to gallen and get

quickly and safely over the country !-- All the Mackreys I have seen have splendid shoulders, I ride my own Hackneys very comfortably. 2007. Do you like Hackneys with broad withers!-

do not care about broad withers. 2008. How many have you seen with riding houlders !-- A great majority of them, I think the

Norfolk Hackney has not riding shoulders, and I would not have them brought into the country, but the Yorkshire is assob more, of the thoroughbres. 2606. Do you think that that even is likely to give a good conformation for a riding horset...No, I would not encourage the Hackmay if I could get a good

thoroughbred. I think the Hackney is far better than the Chydendule or the Shire creat which people are using to get a hig brood mure.

2610, Lord RATHDONNILL.—What breed was your

mare 1-A Norfolk mare, our jourly enough. 261). I thought you said you did not care for them?
—No, and if I had memory enough I would buy a York

shire mare and sell her. 2612. You said you have seen Hackneys that you could not distinguish from thoroughbrois!—Yes. 2613. And I think you also stated that you would not like to see any of this bread introduced into Kildare and Masth !—No, I would not like to see the Hackney stallion in Meath or Kildare. I would

like to get the mares there crossed with a thoroughbred. 2614. Suppose the fouls produced by the Congerted are three or four, what would you put it at for those Districts Beard's stalliness were to get into Meath and Riblare, is there any changer of them doing some hern 1—I don't think so. I don't think they would do any harm

2615. You are rather fond of trying experiments, I think 1-I am afreid so. 2616. Your father was a very successful exhibitor and breeder 1-Yery successful 2617. Have you any of his stock left, his bosses?

---Yes, I have. I have only one now, that is a descendant, of course. She is a broad mare.

2418. He also had a lot of shorthorns !---Yes 2019. What have you now t-Polled Augus. They are the same, what there are of them. I sold then all last year.

201. You have changed everything t—I intend to return to the sheep as soon as the land is classed.

202. You have got rid of all the successful articles?

_I was much more successful in shoop than my father. 2623. And then you have got rid of them 1-I have got rid of them to let the hand rest for a year or I had too many sheep, and I could not get a good shepherd 2024. Still you like experiments !-- I think it is no

arperiment resting the land from shoep. Society's Scheme has improved the stock I-Yes. 1026. It is due largely to importations from the south of Ireland 1-Not alterether. It makes recolu keen a good mare. If a man goes down south and

gets a good mare he keeps her.

2627, These are half-ired mares I—Altogether. 2028. You play pole in Fermanagh !-- You; we have a very successful pole team. ers a very successful poto team.

who sell their produce on fools it would pay them to preduce an extract of a class suitable for pole senior -B would pay no man to produce a pole pony. The —as wenn ply no man to produce a pole pony. The profuser gets no price; it is the man who trains the puny who gets all the benefit. 2530. From the small farmers' point of view the

profitable at sil. I this tirely a motter of chance. 1631. Mr. Wenner, -- You were asked about the ressaive action of the Hackney, do you think that the her lift her less and gives her etrainly notion.

producing of polo ponies is not profitable !-- Not profitable st ell. I think polo pony breeding is en-Hackney, if he has excessive notion, must always profuse that excessive notion when crossed with an

FULL II & flores man goe to the ground with commerce are us, more marron, excessive action is not a drawback in that Us, E.M. respect be He requires good action to counterset the as bad action of most of the country mones in our peaks. 2018. Most country marcs have bud solion now !-Very bad 2534. You think that the existing breed of hazness horses in your district can be improved with ordinary

es I-x ca. 2020. You think action is one of the shief requisites of a harness home 1-One of the chief receiettes in order to enable it to sell well 2636. I think you have seen the Hackney stallices of the Consessed Districts Beard 1—I renormher them 2617. Do you think them a suitable type to intro

due into Ireland i-They are a splendid type; I don't like the Wolsh o's. 2638. I was referring to the Hadrneys! -I think the Hackneys are a very good type. 2635. A class of home calculated to immore the

Irish small farmers' mares !—I think so. I don't like the small Hackgoys the Congrated Districts Board have got as well as the large ones. I don't like the 6 bares. 2010. You prefer the large ones 1—Yes. 264) As their shookless well works to Some of the shoulders are most excellent; you could not wish

2642. You stated to me before that you think these hig breedow have it quite within their power not to buy mares that have any blood to which they object t They can buy from you near them, and be sure of

the pedigree. 2643. It is only at the fair for off that they are not ours of the breeding !-You. ordinary country mays i...No. I think not : he wakes

2014. CHAIRMAN,-Have you anything more you would like to say to the Commission !- No, my leed; I don't recollect anything.

Mr. Richtann Thumpson, Brookborough, County Fremaniagh, exemined.

\$645. CHARMAN-You live at Brookborough !-10.46. Are you cognered in farming ?—I am, sir,

buntors and first-class harness burses. 2449. Here you get may seem of your own!...No.
2500. What kind of manu do you breed those hanters from!...The mare is very nearly clean heel, such a mare as a person would choose to rich to bounds 2651. And what homes do you put them to !-Thoroughhred borres.

3633. How long have you been breeding houses !-and off and on within the last forty years. I feed from three to six young horses every year.

1633. You have invariably used thoroughbord

tion !-- Xon, I bread from thosesuphtend sizes. 3654. You had no experience in breeding from any other kind ! - I have in my experience bred from others not quite theroughlized. They assistives chance to have a fair horse, but very often they do not. we a tair horse, agt very come they come. 2605. Why have you never tried, pechaps you see

not final of trying experiments —No.

2656. Why t—I cannot affect to try experiments 2657. Is your part of the country soffciently sup-plied with emtable thoroughbred stallions - There are a let of them, but there is not a good coe in the whele let according to my notion. I would not oil any of them good ones. They are old used up more bornes and this burses. They could not step over a merble, some of them. 1656. Are there any Hackneys or Clevelands in our part of the county !- There is no Hackney borne on my side of the county.

2450. In that one reason why you have always used a thoroughlend sire, or did you prefer it -- I preferred it. 2010. Do you think that the Hackney or any of

2647. And so you breed horses i-I do, sir. 2648. What class of horses I-I go in for breeding these cart home sires are suitable to the marce in your district !-- They might do for some, but if a man has a murn suitable for a hunter I poster giving her a thoroughbred home. throughbred home.

2041. Have you fermed any epinion as to the
selling prins of high-class sarriage homes the produce
of throughbreds, compared with the produce of
Hadenoyal—I have no experience of their yea; in
one case I knew a neighbour of rains to sell twee horse together at £110. One of them was the

ofuse of a Hackney-a Hackney of Mr. Architals's. think he wee. 2469. Do you consider your district matchle to bred hunter I-I do. press statuses 1-1 do.

2013. Do you think the introduction of the Hackney
blood world be salvinable 1....That is a question or
which I could not give a decided opinion. My

experience has not been so great that it would enable me to promounce a decided opinion. eight or nine miles of where I live.

2565. In the Royal Dealin Society's Echeme at work in your district 1—It is 2606. What do you think of it 1. I think it is an improvement on the old system. 2617. You think it has done good !—I think it has

If we could get a better class of stud borns I think it would be an admirable system. 2000. Are you in the habit of attending Clones fair 1... Yes, occasionally. I sell all my houses there at the Moy.

ers, 18, 1996. Mr. Blohard 94

2669. Have you come across the produce of the Congreted Districts Ecard's horses 1-1 could not say I have ever seen one of them. 2670. Have you any opinion as to the edvisability

of breeding from two-year-olds !-- I would not do it, 2671. Nor a three-year-old 1-No.

2672. Do you think the beed of horses generally is improving or not in your district !- Well now I tink it is ruther at a stand still. I have had so good horses forty years ago as I could get yet.

5673. Are the farmers inclined to sell their best means and bered from the worst !- I are sorry to say they are too much inclined to it. The system I salopt is that I do not breed from young mares. I hay a hanter that is past bunting properly, they make a good fares mare and breed a better house than young fillies. Another objection I have in that it deteriorates the breeding of horses, breeding from very young once. If a mace is breed from a three-year-old she will not make as good a class of mare so if heed from a five-

It is killing the goose for the golden venr-old. 400 2674. Do you think anything could be done to scale the farmers breed from better mares !- I do not see bow it could be done, except that those who do breed from good mares, when they see the results, it might be an object leason to them, otherwise it is no

use in talking to there.
2675. Lord Ravensowers. -- What is the neture of the soil in your district !- There are different varieties. About the lake side it is a heavy clay loom ; further out, where I live, there is a gravelly, limitone land. There is limestone, sandstone, and pest on my

farm, still it is suitable for breeding, and there are active sound horses on it. 2670. When did you key the horses you feed? -Any places I happened to get them, et Clones, and I have gone south to Bellimation, and even as far as

Cahirmes. I would spend £10 leoking for good colts before I would buy one that did not fit me 2077. In the general run of mures good in your district, and satisfale to make with thoroughkeds !-There are a good many that could be got suitable to

beved from, hut unfortunately a lot of mares see hereding to houses they are not sufficiely for. I funcy a half-bred home or a Hackney would be better to put one of these underbred mares to 2678. Is it because of luck of boue or size1--A little of both accordings.

2679. You made use of the expression just now "half-hred beens"-What would you describe as a half-hred 5-Any horse abort of a thoroughbred. 2680. Do you think if a horse of that description were standing down in your neighbourhood, and serving, and a long side of him a Clydesdale, a Hackney, to divide the control of the east house type, to which of the horses would the farmers and their mores I.-. I think they would send them to the half-bred haces that would be nearly thoroughlyed. As for their opinion of Hackneys I would not take in hand to express it, as I might not be doing them justice. I do not know all their minds upon it. I myself have bought colts from flamees who have bred from halfbred horses or horses nearly thoroughleed, and they produced magnificent horses. There was a horse in my neighbourhood called "Young Simoon" from Lord

at five years, and we did not know his value until his services were over 2681. How was he bred!-From one of those old

celebrated Irish trotting mases, he had splendid action, very nearly like a Hackney, 1682. Have you any experience of the ce the country mare and the Circlesials !- I believe a

dale houses, but our country is not the best to self 2033. Have you found that in a mure with a Civileschile gross the bone is softer and more and to

by 1.—I think the people in our country are somewhat decired shout bone. The Chydeniale has a let of he'r om his logs and hig feet. When people on this they say "there is a great horse, he has a lot of home," but when you take the hair off you will often find a thin shank below the knot-it is a very small hore. I have celts myself pure-heed, you would think their shark was small, and when you cotch it under the knee you would be surprised at the thickness of it.
2664. Mr. Canew.—You say that in your discist

they brood fram huntrosses that are past their week! -Yes, or carriage marca. 2685. You mate them with thoroughbrok !-- Yes. and we get a good hunter and a good harness one as and we get a good numer and a good become on as well, a great busse to sell. There was one more of that kind I hard from, and the first time I put her to

e theroughbred horse, "Rattlin the Roofes," I get a colt that I got £100 for before he was four years old. and the dealer get £30 mers for him before he raid 2686. You think you could breed a hunter or a harness horse from that as well as from a Hacksoy! -I would rather chance it. 2637. What was this horse by-Young Simon i

How was the dam bood !- That is about thirty yours ego, but as far as I can find out she was an Irish mura coleborted for her fast solion in harmes. 2656. A size of that description you would approve of 5-It would do good in any country; it never get

an unstend horse. 2689. Had good hone and splatanged - Yes, bountifel quarters, fine back, and all that. 2690. You would not broad from a two or throo-year-

old !-No. Not before a four-veur-old?-Yes, and then they are worth too much to bread from if they me the right

sort, that is, for a farmer like me, we are not million-2691. If a mure is good for a four-year-old she will not be kept for breeding !- No, that is what is injuring \

2692. The good ones are sold out !--Yes, and that could be remedied if you buy on agod mars of a good could be remedied if you key on aged mans of a good type, and they will breed better than the four pouncied. 2003. In the produce of a two-year-old weak!—I never saw a good one; it is not very much done to our side, and I never are a good one.

2694. Sir Triouan Essecutiv.-Are there may of the old Irish muzes known in your district!-I do not think there is a true heed one, but there might be descendants of some, their shape may eatch people's eye. 2005. They have practically disappeared!—They are so much mixed up with other breefs it is difficult

to find them. 2695. Do you find a difficulty in getting good brook marcet - I can always get them when I want them. 2607. What size did you say you prefer for hreeding! -- A thoroughbred home. 2608. For both hunten and carriage homes! -- I

like a wide thorough beed home, wide about the bear, with tip-top action. These weeds of mos horses that are trained at two years old, sent to the country after racing, I do not think they are serviceable to the ocuntry, I would like one of the half-broin I speak of Calrelon's Old Simons—unfortunately he was castrated. in preference.

2619. The present style of thoroughbred sire than is not suitable!-We have some good ones; Battlin. the Reefer, for instance ; hat some of them are shallow 2700. The same size that would breed a good hunter

would breed a good carriage horse i...I think so.
2701. Mr. Wanness......Do you think is would be easy to find the thoroughbred horse you describe i.... good pure bred Ciydeadale would pay the farmer to breed from if a person had a mare nearly thoroughbred, but importunately we have not many masses of the I have nover done any business in buying thurough . kind. I know there is a demand for tip-top Circlesbred horses, but it is the kind I would like

9703. Have von seen many !- Yes, Royal Mosth, Rattlin the Reefer, and a few more 2703. That class of horses would cost a good deal of money |- They would, hat I think it would pay, charge a little more. 2704. Do you think the people would pay an extenserrion fee!-I think that if the Society gave a little

assistance a good many people would use them. 2705. You attend May fair, Mr. Thompson!-Yes, I sell most of my horsen there.
2706. Have you hought many horsen there!---I

hought a home there at £30 a comple of years ago, and sald him nine mouths after for £130. 2707. Do you remember snything of the produce of Broad Arrow that used to stand there !- I saw a great

many of these about that country 2708. What kind were they !- High steeping bornes but very had about the quarters and thighe; waskly thighs, if not for their action they were not

worth a \$10 note in my opinion. 2709. Did they sell well i-They did 2710. You think action does a great deal in the sale of a horset. Very worth.
2711. Do you think it pays better to breed bunters

or harmens horses t—Henters of course, but ours is not a district for getting value for hunters, I have had to sall hunters for the ratics of harness horses. that bry hunters do not come to our district for them.
2712. But the dealers that key harness borses do !--

They do.

2715. Would you register any sires but thorough-leed houses I.—I would not advise upon the subject. There would be a lot of bad bornes registered, and I have no doubt there are some good houses that are not

registered.
W14. I suppose you have seen instances of thoroughleed houses producing very had stock t-I have seen ien produce horses very faird to be sold

2715. Would you be in favour of not registering any except these who had been proved as to their stock !-- I would. 2716. Have you seen say American horses?-

Very little; they do not come into my neighbourhood, I my them at Moy. 2717. Where do you think most of the horses ; duced in Ulster are sold !--Some of them are sold in

Dollin at the Horse Show, 3718 There would be bunters !- Well, they hav carriage houses there, too, 2712. Yes, but entered in the hunter class !--Design go to Ballsbridge for hurness horses, though

they are classed as huntere in the Show. My opinion is that the horse that would make a good hunter would make a good harmens herse if it has action, 2790. Do you think many house are sent to other

parts of Irohnd from Uniter?—Not so many as used tornerly be sent to Ballinaske and Mullinger.

2721. Most of them are sold in the north to Engin our Soutch dealers !- Yes.

1 to 1 long process.

5723. May fair is precitically the hest mouthly fair in Ireland 1.—I think it is.

Van attend fairs all over the S724 CHARMAN.—You atlend fairs all over the country?—I used, but I do not travel so meen now as I used; I am getting too old.

2715. When did you last actend in the south!-

I have not been in the south these ten years.
2726. Provious to that you had considerable ex-

perionse of the fairs all over the country 1-Yes.
2197. Colonel Sr. Quarter.-Yes, told us that besider what you hard you had occusionally fed some trade borms !- You.

2728 Did these homes shirfly come from the south 1 .- Some of them; but some I got about my own neighbourhood; some at home.
2729. With regard to these horses, what time of the year generally did you buy them !- Whenever

I have a loose hox empty I look out for semething to put in its place. 2750. Eut thorn are a great many horses bought in the early autumn in the south and taken up to your country and sold in the spring !-- That is so. 2731. Can you tell me what cost these horses entail during that time!—Well, it would be about fifteen shillings a week and £5 for tesizing and £5 for fair expenses.

2752. You always tesin them !- You; always tesin

2753. Mr. WHENCH .- What do you feed them on t Good rye gress bay, a little cets, and a little mash. 9734. A little mangeld?—No.

2755. Any boiled turiey i—No.
2756. No boiled wheat i—No. Some boiled Swede turning; a small quantity to keep their bowels open.
2757. They are fed on soft, sloppy food!—I weald
not do it. I have a herse I give four feeds of only to

2718. They are kept in a dark house, I believe?-Some people who do not know their trasiness do that ; but I do not see anything to be gained by it. 2739. Colonel Sz. Quartis. - They are very well turned out when they got to Moy fair.

Dibess-We tern then out as well as we can We like to retain our oustomers when we have them. have been solding to the same overconers for the last thirty or forty years. 2760. CHARMAN.—Is there anything you would like to say as to how the bread of homes could be improved generally !- I think the theroughbred home

is the hest loved to get surrings horses and breaters from, and the others might be got from the half-heed or the Hackney. 2741. Col. St. Quarter.-Would you tell us who the dealer is that generally buys from you i-There are seven or eight of these; Mr. Hoddersall, from Preston;

Vandelon, who lives at Malshide, a Frenchman I sell also to Tom MacMahon, and to Mr. McAllen, of 2743. Do they go for hunters !-They key them as harness horses or limiters.

2743. Could you give us my information about house sold to foreign dealers and experted, not to England 1—There is one dealer named Magnire, near Lienseksa ; he would sell merly a hundred Lorses in a month to foreign dealers. 2744. You do not know to what countries they 1.—To France, Switzerland, and Belgium; some to

Itely, and I believe to Germany too. A dealer would come and buy nearly fifty horses from him at a time; easther dealer might come when he had a more more. Mr. Robinson, at Ballybay, sells I, think, even more houses to the same class of experter.

2745. Lord Raumowerks.—Do the foreign dealers

ter to bey a mare as a rule !- I believe they are fonder 2746. Col. Sv. Quinrux,-Some are hought by

daslers and some by Government decless at a fixed price. Do you know the price the Government dealers pay 5-I think there are two of them, Moses. Diock and Matthews, give as high at £34 and £35 for the chase of horses they very, treopers. Sometimes they find a tends horse, and they would give from £50 to £50 for a good one, that is, if they happened to get them from

2747. Levd Astrows.—The troopers they buy at three !-- You. 2748. Col. Sr. Quyrun.-Do you know about the

Datch dealers !-No. 2740. Mr. Winnyon -About theelsseafhorses sold by

Mr. Megnire and Mr. Robinson, are they sold as treepers and at trooper price 1—The greater part of them are. 2700. They are thank £361—Yes; but those dealers have a trude for a better clear of horses too; some of them buy three-year-old oults, of course they give them to other parties when they go to their own country to train and fitteh out and perhaps buy them back again.

Mr. T A. Isonaw, Figurt House, Dunfanaghy, County Donagal, examined. 9781 Charmen - Van New in the County Denses It Yes, in the north-west of the county. 2752. You carry on the occupation of a farmer!-

2753. You are a land agent also t-Yes, I have 2754. Yun are well segmented with the northwestern poetion of the econty t... Yes, I know nearly

a whole become. I know the district from Gweedern to Letterkenny, that is about forty miles. 2755. Yau breed horses vorreelf 1-1 do. 2756. Do you consider your district a mitable one

for horse-breeding !—We are in a thoroughly congested affaction.

2757. That is not quite an answer to the question whether it is suitable for horse-broading 1—Some parts. of it are. Away west towards Gwordors it is not sainable for horse-breeding, the land and grass are poor. 2/52. What is the general nature of the soil in your district I— Where I live myself it is a strong day

soil with grave! through it, and so I live near the sea abore it is very unity.

OTEQ. What is the class of horse in the country!--They are nearly all ponies, light ponies. There are ness few exceptions. The botter class of formers have heavier and stronger horses.

2760. What class of horse do you breed yourself!— My horses are all between 15 and 16 hards high. I koon for horsen I always keep uns brood sures, and I am obliged to send to Letterkeuny, Devry, Strebane, ur Raphoe to a horse. My rateable qualification charges me too high a fee for the Congrated Districts

Board's horses. I so elsewhere, 2761. You breed them for sale !- Some for sale and some for my own use on the farm

2762. The greater number of the formers in your district have small holdings I ... Yes, and avail themselves greatly of the Congested Districts Board's house 2763. What class of horse do they require for their farm work !- They are almost all from about 13 or 14 hands high, the horse of the locality

2764. In your opinion would a heavier horse be now spitable I—The Convented Districts Board's horse has been very much availed of, and I think there is an knelination for a heavier horse 2735. What class of hours in recet soltable for the use of the formers in your district !-- I do believe the Hackness are very spitable for new house, which are light little mayes, and clean limbed.

2766. You have not availed yourself of the Cougosted Districts Board's stallious !-- No. I knyo rest. 2767. Why !-The fee you pay depends on the

2767. Why -- I he see you pay depends on the marshle qualification. 2763. What fee would you have to pay !-- £2, feal or no feal; consequently I du not pay that. I went 2769. You have sent your mares some distance!-

Not loss than twenty miles. This year we have snother home in the district, and I have not sent so far. 2170. Have you any ubjection to my what fee you said! You sent there is a thuroughbred home!--paid! You sent them to a terroughtern name bed Suffolk Puzzh from England, and I send to that horse, Suitsik Punks nrom ranguns, sen i send te tran norm, a good many others went as well. 3771. You send all your mores to a thoroughbod hares 1—Not of late years. I was not very successful

when I did, and I did not send again. I have very ar to send, and a good deal of expense.

2772. Du you needer this Saffelk Pench to the 2712. De you preser mis cancer runes to tee Haskney, or du you send to the Soffolk Funch because the fas as less? Supposing the fee to be equal, which would you prefer !—If I had a Hackney size enough,

I would send to a Hackney se fast as any horse. The first home we got was a small home and did not bread large. The second was a large horse, and had a white face. He stamps some of the foals with this, and I think there is an objection to him un that account. hut he breeds good horses. I had experience of the Saffolk Punch on the Leitzim Estate. He did well. and we are trying it again. 2773. Are there suitable etallions in the district -Quita the reverse; nothing but words, except the Concested Districts Board horses.

2774. Do you know whether the horses of the Congested Districts Board stallium got higger prises than others!—Yes, larger than what was puld before ther

one.
2175. In answer to one of the questions we sent out to you, you said the mares were active, clean, and hardy, the want of size being the principal draw-back?

9778 Von think larger house wight he recent? I think so

2777. How long has there been a Congreted Districts Board stallion in the printhwarhood \$-1592 was

the feet year,
2778. What was there before then !- Just the general with the Clydenfale 217). And if you had your choice what breed would wan select on the most writable for your district !-Something atronger and higger than the Hackney for

2750. For the district generally!--I think the Hackuays soit our mares fairly well in north-was: 378). Do you know what becomes of the vouse stock when sold 5—The majority of them are taken out of the owneries. Some of there are sent as for a Milford, twenty-four miles away, and sold.

2752. I take it that as you send your own more to

the Suffalk Punch you con other his preduce satisfactory ! —Yes, from the experience I have noticed of the same kind of horse before. They are strong, and are cleaner limbed than the Chrisodales. They have good sotice sametimes too. 2753. In answer to question 25, you recommed breeding from pure bred horses; what do you mean

by a pure head horse!—I maintain the Sufficit Punch is pure head horse!—I maintain the Sufficit Punch is pure head. We are fortenate in our effects to hered from the Clyderdains with our marce. We get a fair from the Cityseedana with our reares. We get a fer from from them. At six quarters old they get a fer price in the faire. price in the sairs.

2784. By pure bred horse you mean a pure bred
horse of any breed i—Yes.

2785. Have you any experience in your district of the produce of a sound thorough he d horse !-- We have very little experience of the produce of a thorough-bred house where I live. In Raphoe and Steahans I have seen them, that is in the district which is the better part of Donegal.

2786. Have you sufficient experience to be ship to

compare the produce of a sound thoroughbred horse with the produce of a Hackney stallion |- No ; because the thoroughbreds are so saiders used there, 2787. Is it the custom of the farmers to sell their heat filles !-- I am sorry to say it is. The heat filles

go nut of the place. 2783. Can you suggest any way in which that might be prevented i... Except by giving them premiums for good mares, that is all I can surgest, 2789. Do you buy marce yourself in other parts of

the country !-- No ; I get one or two breed mares ; I have une from Clones, County Monaghan, at present. 2790. What do you sell your borses at 1-I have get £35 for some of my horses. 2791. Do you sell them as carriage horses !--Generally farming and driving horses.

2792. I think you said there was an admixture of Clydesdale blood i...A good deal in the locality in which Three. 2793. Where is the Clydesdale stallium !- The la Lord Leitrim owned him; he was sold before the Suffelk Pench came.

2794. Do you approve of that brood to They have been said existence; they farm very well, and are sometimes thirly good driving berset. 2770. The work generally on the farms in your district is I believe of a light character t.—Very light

9730. The work generally on the farms in yeardistinct is I believe of a light character t—Very lightindeed.
2790. Would it be any advantage to the farmers for their own work to broad heavier homes than thous now in the country t—Well, I can hardly tell; they

now in (the nontrive) — West, I can startly set; they agent quite suttified with the Hacktonys since they came to the country, but the hatter close of fursaces do go not to Letterbourny to got higgs: horses. 2797. For the advantage of kereding bigger horses for sale or againsthural purposes 4—It would be for

use they would breed them.

3780. Lord Ravennesseals.—Do you know the distrist called the Rossest—Yes.

1790. It that your district!—I largest to be agent for Lloyd's, it is near the sea shore, and my duty often brings use there after a sliperreck. \$500. It is man you —between thirty and force

niles away.

2601. The notice of the soil where you live is quite affected from the nature of the soil in the Rosses! —
It is a good deal better, there is very poor soil at the

Rosses.

2003. We had it at inted yesterday that all the ferming work is done by land in the Rosses t—Kes, digging.

Very few harms done yikhngescognidriving in the Rosses.

2003. That is not the case in your district t—No.

2804. What is the usual size of the brood mares in year district — Trean thirteen and a half to far-veen sail a half hands; some few go to fifteen. 2803. Are they yeates or colo or small cert horses t

2505. Are they posite or order or small cart horses to result or the posite or order or small cart horses the result call them cohe more than anything else; there are posite to well; they are good out horses the majority of them.

250. That is the class of animal you work on your

magning we me...
2010. That is the class of animal you were re2010. That is the class of animal you were referenced by the control of the control of the class of the clas

20% LOS US DON ware trees to see the control of The finences who kneed for side would prefer them to increase in the to gain a better price. 2810. Are they share, quick, posies i—They are share, hardy horses, and there is great endurance in the They are an active hardy little heres.

2811. Live you ever thought of using a Bark or an

Amb — I understand there was an Amb went to the Bessel sate was more got on. 2311. Do you think its would be a mishale even 1— No: the late Earl of Letting got an Amb there and his stock was a remarkable failure. 2311. What shows the probine of that stalling a lide solody areed from that!—I never knew arrons to treed from it. Tays were sold out of he places in

were not a screen by any norms.

2814. Mr. Cantre,—What seet of a sire would you recommend to make with your mares!—I think if we had a strong Hashney it would do well except with our mares.

2815. Have you any experience of the Hackney !—

Only what I now of the Congested Districts Board's the first year. 2916. How long is that 1—Since 1892. 2917. Here you seen any of the produce sold!— Number of the price do they bring 1—The yearlings form £5 to £8, the six prompter old will see from £9

Number of them.

2018. What price do they bring 1—The yearlings
from 25 to 28, the six quarters of will ge from 20
hom 25 to 28, the six quarters of will ge from 20

higher; the drip's a very good one was high as 270.

211, Ser Thoras Ensurers.—What price do to
farnots of your district pay for the service of a hereo!

- About 21, or 21 12, Edy price where.

to go to him.

2821. How far 1— Letter-tenny would be the nearest
plus jit is twenty-two English miles from where I live.
2323. So that in your immediate arighbourhood
ers there in a west of houses 1—Thus are some week

area, so case in your intrication any quistormout there is a west of houses—Three are sure week houses in the bouldity that get ten shiftings; some poor men will go to three because they are now and deson, 2923. You think these howes got so much work because they are so cheep!—I do; I know it is 2924. Mr. Wansers.—I believe there is a very large yearly the property of the contract of the financial

number of because heed by the people in the district yea hire in, and at Gweedire 1—There are a great many.

1815. They use the horses chiefly for caveying pandees, manure, and turk and carrying themselves to clamb 1—Ves, they bring all their turk in paradice,

cinnels to—Ves, they bring all their tarf in paramiers, and being note to medical on the hones's hack. 2016. That is very sower on honesat—Yes, it is very sevene on the hone, but still they do it. 2527. There is a great deal of work for a house

2857. There is a great deal of work for a house there I—Yea. 2853. Horse-breeding is an industry there I— Yes, largely, in my district. 2859. And the sale of the feel is a considerable itera.

in the receipts of every faraure is—Initeed it is.

5510. You do not think it possible to get these proofs to give up horse-breeding t—No.

5511. Can you suggest any horse more suitable-than a Hashnay for improving those mores t—I think if you had a horse of a lower size is Hashnaya receipt to the horse year size.

hi yai ibia a rome on a source on. Industries we see a former, im they would like in larger borne. Si33. Went't the produce of a Saffall Prach not be too large to wook on the small farms in the cargested district.—No; I would say it would be on such pring; west to Gweelere, fat and in the other direction, to Letterbrany and Millord.

2913. Year enjeriesce of houses got by the Con-

ger accounts, to Letterstemy and antibots.

2913. Your experience of house got by the Conggested Districts Heard, I suppose, is with reference to Conggest and Dendanglys—Ven, and as far at yr. Conglussesly direction; the services of the horse west that far an experience of the horse than the congress of the congress

home verifies that distinct—Xes.

100 2831. Do you remember cay of the country stations in the winter section — I do j I remember helt have fee twanty-five years.

101 2550. Were they not very common, underleed, misterials booking horses, generally half Glydeidsia, with the neative mare of the coverty —Xes.

miserable booking forces, generally half Glydendals,
with the nettive mane of the country 1—Yes.

1957, The reason they used there sives was slargly
to get higger fools 1—Yes; and that younge to make
eachier. A straquerier Cyclesiable they would plough
ad with in the spring, and than try to sell. They
executed worth their beyons that they have decommunity worth their beyons that they have deeachier. A straquerier beyons that they be sell.

earlier. A six-quarter Unyessants they went groups by with in the spring, and then try to sell. They generally work their horses that they hered at the property of the sell of the sell of the sell of 2 100 M in the sell of that district, to have herely horses to exact a greek sell of that district, and the sell arreptite that. The pasture is not very good, except in a require that. The pasture is not very good, except in earlier than the sell of the sell of the sell of the sell of the require that. The pasture is not very good, except in earlier than the sell of t

two among paccess. Large fore consuming strategy strates we have in that district in \$250. I suppose in a great part of that district if the hence are housed, they are housed with the after people in the hense !—Yes; and cottle too survettons, with the power people, and sorry to some \$260. I think you midd Lord Leistrick experiment [14].

With the Arab ware not a smoone !—Yes, that is my

options.

y 2014. And if you sent an Arsh stallion the people
would not use him t—I do not think they would. He
might be better than what Lord Leitzins a people had,
but there was no nonzess breeding from him.

2042. Lord RATHDONINES.—Was he accounted a

be good string t-He had a tendency to besel very of small fash.

2843. Charman.—I do not know that we have

CONMISSION ON HORSE BREEDING thoroughtred stallies and a Hackney stalling, have quite get what your own opinion is as to the beerd

as there is no thoroughbred home !- There is no 2815. You think that would be the general opinion thoroughload home noncer than to cuty sollen. 2844. Supposing the Board provided a sound of the farmers of the district !- Yes. JAMES DUNIOR, V.S., Downpatrick, examined Mr. Janet

2846. CHARMAN.-You see, I believe, a veterinary arreess, living at Downpotrick !-- I am. 2847. How long have you lived there, or in that locality i-Bots orn thirty and fasty years. 2848 Are there many harnes heed in that district ! -Yes; a great member. 2819. Do you breed horses yourself !- No, I don't farm, but I keep five stallings.—English level ones 2820. What is the close of horse that is bred in your

of stalling best untable for your district !

have told us you cannot compare the produce of the

Hockney with the thecoughlifed in your own district,

1. T. A.

leg run.

district 1-They are mostly harness homen; but they been blood horses, and half-breck, and Glydeschles 2851. What class of bosse do you think your district is voost uninde to produce! -- Harness horses. 2852. Is that the clear that is usually bred !- Yes; they usually from out harness horses, sittlengh there arm a few hamters load by the better clear of favorers. 2853. I see you ray, in answer to a question, that is would pay bottor to produce your Hashneys !--Yes; I would appeare of their breeding more pure.

animals, if I could get the Irish breeders to breed them pare and more certain-the old Irish bread of learner, to grade up.
2834. What are the kind of haldings consecute in your district, are they small holdings or large holdings to -A great many would holdings, and a great sumber of large heldings, too; up to 200 some and down to 25.35. Do you think it would pay the firmers gros-

ruly to hered pure Hockneys !- It would pay as well as any other kind. 2050. Have you lied any experience of breeding over Hockneys presselft—I leed two meres that I have entered, and I don't know of any other pere som leed in the county. 2357. Are there many of them bred in your neighbearboad! - They potronie my home very well; "Romes" had 116 mares one year he has averaged shout 100 means since I got him during the last seven

or eight year. 2006. Yes have five stallisms b-Yes. 2009. What are they l-One bleed, three Hackneys, 2800. Which do you find the most decrend for ! "Receed" is an extra good hirrs, up is sixteen hands, a pure Harkmy, and he has been largely petrorised, and they are patronising the Yorkmire coaching horse very well; but the breeding is gring down with an tremendously, year few mares served 2651. Do you mean there is loss demond !- The

low prices, the prices are lower this auturn than ever: they are buying foals by thoroughbred burses 2852. How do you secount for that!-The American competition; American borses coming in in such num-2893. Where do those bornes bred in your district

to to, what is their distinction !- They movely go to 364. As cerriage beeses !- Harness burses. 2805. Are there any hanters bred in your district t -Yes, the botter class of farmers keep some good marea, and send them to thoroughbrod horses with the oligon of breeding hunters—they don't all tern out unters though. 2016. What is the general character of the soil in your district !-- It is rather a thin soil, very steey; the

stones keep it open. It is love, and rests on a slater

rock; it forms a kind of losse porous clay spil; saws of it in Locale is very light. 2807. What class of horse do you think is best for the farm work of the district !- Half-level become the Hackneys would sait exceedingly well, good stee

you may strong opinion which they would prefig !-

I believe they would have the Hackney stallion. Our

maxes are too light to match with the thereegibed

2008. Are there my theroughbred stellious in your district?-There are plenty of thoroughbood stations in the County Down. 2809. And, in your opinion, good ones !- Generally they have very good ozon; there are plenty of good succi. 2070. And do you consider that the produce of a good theorogibbred would predice stock as salarity, or toos enhable thus the produce of a good Hacktory I—Well, the produce of a cheeogic best bases would listely predice some highes print one some highest print one storal highest print one is the research and and the produce of a cheeogy. very liable to come too light, and then they was's buy these light ones at all, they are thrown, back as

the breeder; then he goes with that light mare to a Clydeschie, or heavy bell-beed horse, to get up strongth 2871. Comparing the Clydoschild or other home of that stones with the Hackney, which would you profer for your district!-The Hackney would not get so many low-priced ones, nor perhaps so many highpriced cose as the thoroughbred horse. 2872. I am not talking of the thoroughbord boss, but the Glydenfelet -I would prefer the Hanney, because the Clydeolale is a very violent cross with those light mores, and the produce is very uncertain; it is not such a big oross with the Hockney.

2873. And, as between the Haskney and the

theroughland, what is your opinion!-- Very good

horness berson, better than by the blood horses; they earry their beach magnificently, and when they are erossed they don't step too high, but just mice harvest 2574. Do voe consider your district more stitule to produce harness bosses than besitere!-Yes, I do; but it is quite enpublic of producing busters if they had the right class of mases.

2676. What is the matter with the mares!—Ther sell the best, the smaller farmers, and then they keep the three-consered ones and the very light once. 2876. And to produce the saleshie hunter what stallion world you recommond, what breed !- I prefer a good streag blood hereo for pritting a branter.

2877. I see in answer to the question "Are
thoroughbred, bull-bred, or Hackney stallines most
ased; if half-bred, how are those stallines uned, and at

what aga do they begin to serve,"-you say, "Mostly balf-bred, and beed in every conceivable way; they bugin to zerve at three years old." You said just now that your district is sufficiently supplied with good thoroughbred horses!-Sometimes I have seen thirty stallions in Downparrick on a fair day at one time, and there might be half a desen of these through-2878. The most of them are half-brod t-Most of them are half-bred. 2879. And as you say bred in every conseivable way! —Yes, but they are very good looking horses; we have a let of very good looking half-fred horses, the mares are not equal to the horses at all.

2880. Well, generally speaking, would you say that the mares are inferior in your district 1. Yes.

\$331. I use in if you were to consider how the breed could be best improved, weakly you turn your intention rubber to the preservation or introduction of better mores or better stalliers. I—Better name, I would by to improve the maces; there is no want of good stallions with us. 2832. You may the prices of horses are very low!—

2002. Letting the process accurate to very diver-2833. Since when 7—They have been fulfing for the hat first years, and they are lower now then over. 3834. Hen the price get so low that it has cossed to be predictable to locad I—I believe it is urprofubble

so be prediable to local — I believe at it unproduble now, unless with a particularly good mare 2833. You resen that the very high class herness house or hunters can still be real profubily, but an eckinary ground utility him cannot have; it carnet

be bred profitably new, 1886. And you refer that, I understand, a good deal to the importation of foreign bornes?—Yes.

2887. Have you seen many of these foreign lornes?

—Yes, I have seen a few as that beker's in Beidest,
Inglis, they have six Canalian house.

2884. Where are they haded guarantly!—I trink

they are handed in Liverpool and brought coross to Delian.

2300. What is your opinion of them b-I was asking the drivers, they are not going to have any more, they are very note as compared with the Irish horses, by

cannot send these long journeys, they go off their foot.

2300. Are they cold as Canadian beaus I—They are
sold as Canadian bourse.

2391. Do the bayers know their origin I—They do.
2591. Bo there is no theoretica I—No decopies.

2593. Then the interconduct in the value of horses

2893. Thus the datavisoration in the value of homes that you speak of would not be affected in any way by those foreign homes, whether breaded or distinguished in any way 1—1 deet; think it would, but it might prevent people from breaking from these, and if those perced into other hands they snight be sold again for trial berung; it would insulate the heamouse.

of the firsh terms better if they were branched.

1391. You think the first buyer who recognized

1391. You think the first buyer who recognized

that it is a Gamelian or American heree might pass it

of affectuards on an Irich buyer. He might.

1391. In what way sho you think they saw infarior
to the native bard oness—They don't stand the jermen

word, I ous speaking meer from sprox, though I.

so well, I can speaking meet from seport, though I have experience of one myosif; I put it off the road in a very short time, they do not stand the road as well as the firsh.

2596. The borner you have seen are newly limited, they have not toccure accolination of — There might be

smothing in that.

2807 Speaking in your professional especity have you say Seak to find with them 1—They look very well, some of those horses, remarkably well.

wen, some of those become, remarkably well. 2898. Can you suggest any way in which this competition could be legitimately stopped I—No, that is just what I cannot. 2899. Has the breed generally improved in your district of lots years I—No, they have not improved,

there are more bad house in the fairs now than I saw inventy-fre years ago.

2900 How do you account for that?—Farmers selling off their good marres.

2507. Where do they sail them to, do they go abroad or where 1—They mostly go to England and Scotland, the dealers bey them and take them across there, and somatimes they take good ones theresaives across to the English fairs.

5002. I gather that you stirthuis the daterioration

5202. I guiber that you attribute the destrioustion in the breed a good deal to the nares, have you carriang you can suggest to induce ferment to long that you can suggest to induce ferment to long their boll sames in the country. anyout outcomes—the Cythenhold before, sheen 10 among a me pool deed of the Cythenhold before, sheen 10 among a pool deed of the Cythenhold before sheeding and the special sheet of the Cythenhold before the before the Cythenhold before a median sheet the light; they have not seen and, and the furners here them for brecching; and they will send then kight mores to a leavier here if they want to breed again, precluye a Clythold borner; and there light acture cover they read to the threespithers here just mates these are will as they can. They know a home knyw.

then as well as they can. They know a home very well these farmers. 2006. Lord RATHOCKTEL.—How many stallings have you kept mustly down in your pince?—I have

save you keep unkny cown as year paces — 1 save five stallines just now. \$306. What are kiept — I have three Hackneys, one thoroughburd, and one strong Yorkshire onching house just those less three years I have kirral nome of them into England on account of the discression in

og breeding.

y 2107. Have you bred many horses yearself!—Noon justs few Hackneys.

2909. You see n Scotchman, I think 5—Yea, sir.
2109. What district of Scotland 5—Ayeshire.
2110. Have you pur experience of breeding there?

2010. Have you may experience of breeding there!

—Yes.

2011. What class of horses!—They were nearly all
Clydeolales in the district I come from.

See Section 2 to the section of the

I restore prefer the Neckshire to the Monfalk; they have more breeling in their foundation.

2016. But you have no experience at all of the south it of Ireland or the class of same hered there I—No.

2016. I suppose you have come across some south for of Ireland praces that have been brought necessaries.

by hayars 1—Remarkably Sov. 2910. Have year each any of the produce of it year Harleny shillion 1—No; they are young one. Oil 2917. Have year ever tried to sell any 1—Well, it tried to sell one filly when the was two years all it.

ed, but I did not get a sufficient offer for her.
by 2016. That is all you have tried?—Yes.
2019. You mentioned, I think, that there are halftree brod stallings standing in and about Descriptive?—

Yes,
2500. What stamp of home is that 5—They are
generally about 16 hands or 16.1, and, as a rule, they
are very good-looking hersis. There is a strain of
home onlied the Harkesway, and it is revealable how
they have maintained their characteristics. I have

young known them for the list thirty years.

an I 2391. Do you know anything about the breeding of these, how they are keel, what crossing known these are put to half-keel marce.

1921. How was Harksway heelt—They are not

2023. How was Harksway heed!—They are not y go what you would call a violent exces; for years they and have been heed very much of the some type.

2012. What remain []— If you go to the foundation is the theoroghized and Clydenkie; but for the best of our bross they have not made a visited cross. The best of them half-hard become are not predicted by a visited remaining to the best of them half-hard become are not predicted by a visited remaining to the half-hard ways cross 1—204. Then that is not the Hardaways cross 1—204. Then the hardaways have been got to half-hard

2940. Are they at all liable to side beneal-All heavy horses are liable to side bones. 2941. Then there is more difficulty in keeping a

heavy horse on his foot than a lighter snimal !-Yea. 3943. You have heard outsin half-bred horses mentioned or som in the evidence given that certain

belf-beed horses would be acceptable in districts as sices !- Yes, they petrunies there year well. 29+3. That is with clean legs, good bone, nice action, and so on i ... Yes Out If a horse of that description, without any

2944. It a norm or that description, without any heavy earthorse blood in him was steading in the neighbourhood of Downpatrick, for instance, do veu animose the fermers of that district would potenties that horse in preference to the heavy cartheres L. Ta would descend on what kind of a more than bad if they had a very light more, and wanted parlups, a heavy worker on the farm, they would patronice a Clydesdale horse; another time if they wanted to breed a harness horse they would go to the half-bred 2945. Still you yourself would prefer the lighter

Printed image dictional by the University of Southernation Library Dictionation Unit

and sharper horse with good sound bone and action to the Clydesdale !- Yes. is Clydrians :-- a es. 2946. Are there many horses sold out of vego dis. trict 1-Yes, a great number.

1017—Yes, a green names.
3947. At what age are they rold?—They are add principally as four-year-olds to the dealers 2948. Where do they come from are they heat in the country or brought into it ?-Meetly had then they bosed a most number there.

2949. Have you may experience of what they call in the North feeding boyes !- Yes. 2950. Then the horses you refer to are not what you call fed horses !-- A good many of the better class of farmers keen their horses until they are four years old that they have beed themselves, and there are alkefarmers buy horses at three-your-old, feed there during

the winter, and sall them at four years. 2951. Where are they sold !- They are sold to dealers to go to England. 2502. From the form or the fairs 1-The better class

of horses are sold on the form, the declars or their agents come round and buy the better class, and the remainder go to the fair.

2953. Where do they chiefly go to, where are they chiefly leaven't far !-Most of them go to Regland.

2354. Do my come South !- Very few, namely all to England. 2905. I suppose the dealers buy the sugnisat coimals, and leave the resound case behind then t-

2950. That happens in the case of rances 2-3t days. unfortunately. 2937. Whore do they find their same then for

keeping up the hreed, do they breed from the unseesed sound — Yes, they keed from all kinds of norms.

2918. Sir T. Euronna—Are there any home bought by foreign daslers in your past of the country l -They come to the fairs sometimes and kny troopers in Saintfield fair 2952. What price would they give !-A little over

2260. Do they hav many too open there !-- Sometimes they hay a good many, other times you dea't see thou for awhile again. 5961 .- I suppose you have no means of knowing

what country they key for 1-Eometican I hear of the Freuch being there and squetimes the German 2302. You spoke of American horses, what is your experience of American houses t-My experience as far as it goes is that they are softer than Irish horses,

they have not the staying power of Ivish horses 2063. What are they read for 1... The heavier class of them for vans, the lighter chan for gigs. 2204. Have you ever seen any of them used so earriage horses I-No. 2955. They would not suit carriages !-- Yes, so

American treating home would guit a carriego very 2006. But was don't set many American trotting

horses I fancy !- No, they are common bred. 2957. You think them decidedly inferior to ours !-All the animals I have met are inferior. 2068. Are they es sound as our horses !- Yes, they

are fairly sound, I suppose it would not pay them to 2009. Legs good 1—Protty good legs to look at them, don't wear so well as they look. 2970. But you think that the importation of these

borsen has incuriously affected the borse trade ! -- Oh, 2971. Have you any idea what the number of American horses imported would be annually 1-I have seen returns but I forget, they are solling an energes number in London just now, about a month ago they sold as many as 300 Canadian house in one day neer the Islington market.

by the English Government 1—I am not aware of it.

Printed image digested by the University of Southernation Library Digitalition Unit

corn Mr. Wassen,---I think you said you have been over 30 years in Downpatrick 1-I have. 2974. Do you remember a house belonging to Lord Charlement, "Broad Arrow" 1—He never enter our I never new hire.

2975. Have you seen much of his produce 1-Ke. 2976. But you have had experience of Hackneys, 2016. But you have had experience of Hastineys, you say, when you were in Norfolk 2—You. 2017. In it your expensions that they are soft house or not 1—I think the Norfolk house are notice than

2978. Do you think the Yorksbire horses are at all deficient in staying power?—I do not 2019. Would you be inclined to register my other home except the throughteed home that are regis-

2980. What would you register !- I would register a home with 4 or 5 blood means, if he were a real lumber in share, I would register him as a hunter \$981. Would you register a horse like that without

his heteg proved to be a good stock-getter or not !be a difficult thing to do 5981. Would you also register pure beed Hackueye and Clubrahles and coach houses — Yes, and I would

sive poises to Trish bred ones that were graded on artil they were sufficiently pure to stamp their own characteristics on their progeny.

2983. And you believe that a house beed in Iroland. of whatever treed, can be heed succh better than they

not in England, that you can produce better burses t-I have seen better houses in Yeckshire than I have ever seen in Iceland. 2864. To what do you attribute that 1- They breed them purer, when you go to a Yorkshire factor be habita Hackney mare, and puts her to a Hackney horse

and he feeds them better. 2007. The Yeckshire furner to a good deal risher than the Irish farmer as a rule 1... That partly accounts 2036. What is the size of the forms or valentious of the fareces who laved horses chiefly in your

district I Some of them that have not more than filters serve would breed house, and then those that have two or three hundred some would been three or 2987. Do you think that it would be possible to store those smaller people from loveding horses !- No.

they have a great tante for breeding horses. 1988. Then you think if my public concuracement is given show me as deserving of it on the larger people !- Certainly.

2910. And you think the people who compy the what herses mit their recolouments !- They are fairly good judgen of homen. 2010. Have you thought at all how you would take the opinion of three people with regard to any public

grant made for the improvement of house, how would you secretain from them what kind of horse they would like !—You see what they do paternise and I can form an opinion of what they would like, they shorts their horses according to the kind of mare

2001. They do that now, they more their mores well in Yes, fairly well as a rule, but the mores are not good enough. 2982. And of your stallions at present which do you find reest in demand !- Well the " Romee "borse, the 16 heads Yeekshire Harkney by Leed Derby has

been very lauraly materials.

1993. Are his stock good i-Yes, very good, very 2994. And you think that a Hackney is more liable to produce on even class of stock from the marts in your district them a thoroughbard horse !-- Yes. 2395. I think you soid that you had seen some feels

them selling at smaller prices of hote than ever I naw since I came to Ireland.

2008. Were they by any particular horses or all kinds of fealst— All kinds of feals are selling low just now, especially light once. . 2007. Is it a fact that the light mares by thorough-

bred houses that are kept by flavours to breed from are very often kept harmon they have been unmilestick. Ves 2108. Do you think that the thoroughlord home is

at all as likely to produce action with certainty as a shall as likely to progress action with convening as a Harkeny i—No. 2909. What is your opinion as to the soundness or unsuadness of horses in your district, do you thank wascomfanes is increasing or the revenit—I. don't think it is increasing, the stallness are fairly

2000. You think the stallions are fairly sound loss They are fairly sound and they constored the tendency to unsecundance in the marys. 2001. Weakl you he in favour of requiring a stallion owner to take out a license of soundness !-

es, it would be a very good thing.
1002. You think that would be greatly in favour of the public le-Yes, but m cor country they scon ivige whether a stallion is beeeding them sound or not, they go to the fairs and it is all discussed and if a staffion is brooding them uncound they soon quit

3002. Is there precitedly a show of stallious in the fairs 1—Yes, in the early smaces they being them cot to show them 3004. And the farmers discress whether the stalling is sound or not !- They discuss more whether the postnes is semd

3005. You takek at any mte that the mores in your district if they went on breeding from the thoroughbred house would be sed the stock too light b--3006. CRAIRILAE.—Those formers you speak of who sell learns from three to four your old, where do those horses come from t... They are meetly bred in the eventy, and secretions they go up to Mullioger and those fairs and bring them down and

2007. They don't come from the south, any of there !- Some of them might come from the south, then 1—Some of them magni ones now use has they are meetly bred in the county Down. 3008. About these freeign heres, I am not quite clear that I understand exactly what your opinion is, do you think that the price of burses has been knowled down to wore district by the present from trode in

beens, that is to say, by the importation of feerign berses into Ireland 1...Ob, orchinaly. 3009. Not specially by the importation of ferrign. harses fato your district !- No.

2010. Do you know whether foreign maxes are bought in your district to breed from i - No, they are not. 5011. Then it is movely the general effect upon the market that you complain of !- Yes.

5012. And was don't think a sound thoroughbred gire spitable for your district !-- Oh, yes, they are very emistle; they would get some very good ones, but they will see a lot of light ones too. When they come strong exough they will sell perhaps better than any, but they are very ancertain; they always throw a

warmber of light ones that are not saleable. 5018. Lord RATHDOWNELL.—You say that the Yeskubire Harkney is better than the Norfolk !....Yes; there are a great many of the Korfolk Hackneye brave of their head, short of their neck, and heavy of their

3016. But they don't go on their heads. Their legs and conformation generally t-The limbs of the Yorkshire is harder; there is more blood in the foundation of him 3015. You have lived in Norfolk, you may !-I have lived sometime in Norfolk.

3016. Have you ever lived in Yorkshire !-- No; Nov. 18, 1864. Mr. June but I have ment cometimes a fermight at a temp soring the shows.

3017. But you have no practical experience of the Yorkshize Haskney except what you bought yourself ! -I have seen hundreds of there in Yorkshire. 2018. Made it your business to invest these !-

Just go round looking at them 3319. When you talk of the Yorkshire beed heere, to what class do you refet, hunters or karness, putting Hackneys out of the question !—They breed all kinds

Clevelands, and Shires. 2020. Now, as regards the hunter class of horses that you have had experience of m Yoskatire, laws you ever heard it and that the Yorkelder house de-teriorated in latter years !-- No. I want over several

years to see the Great Yorkshire Show, and I charred in overy yearen improvement in the Yorkshine Harking here, they are getting more quality.

30:11. Harkury !- Yes, on improvement in the

3022. I mem as regards hunters !-- I have no experience except at the shown and they certainly showed very good breating horses at the shows, 3023. But you never beard that the leanting close had deteriorated there !- I saw it in the newspapers

yesterday, that is all I know of it 2024. Have the produce of your Hackneys fetched high prices ?- They have brought very even prices; not so high us some of the thoroughtreds and not so low as some of the thoroughbords, more even; not so many light ones.

2023. What ago are they sold at 1-They are sold at four year old. 3036. The produce of your present stallices 5-Yes. 3037. What prices now did they fatch 5-The gred ones of them brought £50 and fairly good marcs about £32, but the prices have been falling ever since the

produce of my Hackney boyees expe into the country of depreciation in prices commenced as my young ones were coming into market, so it was unfortunate. 2018. You have not realized as much as we expeated !- The prices are not nearly as good as when I househt those horses first; if the prices had been main

tained these burses would have been more successful. 3029. You say a great many horses for feeling purposes are brought from Mullingar and other febs, you consider that south, don't you !-- Yes.

3030 Colonel St. Quintin.-- Could you, do you think, with any cross, breed a weighty demonth horse in your

country - Yes, if you take the harviset of the mores and put them to a Shire or Cipieconic on the better class of farms they could been a weighty home.

3031. Would it be can of these brower's dray lymes

or a light van horse !- None of our mores would breed heavy enough for the between but they would breed 2012. And light was house t-They might breed a

3013. And bus became !—Yes. 3034. You would not get much beyond that, would

yea 1-No. 3035. You say there has been a great falling off in the demand for burses on account of these Asserton. horses in the price, and therefore that practically means the demand-do you think that this utility

borne is being interfered with by the sycling !- Yes, 2036. Then you think that very possibly the decease for these medium draft horses will get less instead of

more !- That will depend on how the automotors are

3007. But there is undoubtedly a falling off in the price and demand for the lighter drought houses 1... Ob, a very serious falling off in price, that has been going on for the hat two years or more—the last four years \$038. Mr. Canzw. -- Do you know any of the prices

Printed image digitized by the University of Southempton Library Digitization Unit

which thus American houses fetched at the sale at Islington which you attended 1-Oh, you; about £30. 3039. What ages were they !- About four or fire year old 3040. Was there any other country exhibited house

for sale !- Bassian penies. 3041. What were they has !- Miscroble lackies

anisosle.
3042. What did they fetch !- Very less prices 3043. Mr. Wannen,-Do you thrak that a Hackney

stallies aroused with the light moves in your country would tend to produce a stronger and intre useful mare frees which valuable unimals could be bred after. words 1-Yes, I do.

2018. Do you think other etallions are more color-lated than a Hackney to produce that result 1—From a pure-bend Clevchand you would get a beavier arised with more quality, but you would lack the heartiful

action of the Hackney. \$0.15. In the Cleveland at all as well rithed up as the Huckney !-- Not as a rule, but they are leveller and more museclar in their quarter

3016. More blood quarton !- They are leveller than blood hersen with longer quarters 2047. You have been among the Yorkshire farmers and seen their stods !-- I knyt.

3048. And found them we intelligent people !-- A very homey neople. 3049. Do you know why they have begun to give

up breeding the coaching horse and to breed Hackneys to a greater extent!—It is because of the showy action of the Hockneys; there is more demand for the 2016. They have given up the coaching hous, a type of home that Mosers. East used to buy, because

is toore demand for them 3001. You said the price of your horses had fallon

for the last four years, I expose that applies to all 3052. And other houses have fallen in a corres-

pending or greater degree !—Yes.

3015. And the house below that class very often
are almost unsaleable at present !—Yes, almost unmientie. 3024. CHARRAM.—You know Yorkshire pretty well !-- I have been through a great deal of it

2055. I guther from what you said, that sithough ros have seen it in the newspapers stated that the Yorkshire hunter breed hus detertreated that that is not your opinion from your personal observation! -Not at the shows...they show year, good hunters. 3056. Assuming that these motor ours and such inventions are encounful, and that the demand con-

timum to decrease for these general utility borres, what breed of horses do you think would take that place in your district I-I don't suite compenhent your 2007. Well, you said that the decreased is falling of

for the general utility here, but I suppose you would shall that the documel for very high does inner and carriage borses gueenly is not falling off, is it b-No I belove that they will have to breed from their very best maces to supply a good sheet. 3058. In your district if the deceased degresses it

sill cease to pay to breed the general utility herse !-It has censed to pay to breed a low class of horse 3059. What heree could be beed with advantage !-The very highest class of horse, a brister or carriage

3060, Would your district he suitable to produce that kind of horse !--Yes. 3051. And would you recommend the Hackney home us the best aire for the production of that dust? —For the production of the humans home I would but for hunters I would prefer the thoroughbred 2062. Lord Astrown.-Have you got the mores in your district at present to produce this high class

Printed image digitised by the University of Southampton I ibrary Digitisation Unit

of hapter and harness house !- We have a few mares. 5063. But the general run of the mores!--They would not be good exough. SiGi. CHIRKAN.—You said in roply to Mr. Wronch that, fahen in Yorkshire, they have to breed

the Hackneys because it pays better, that is to say there is races domaid I suppose for a house with showy sotion !- Yes. show action := 100.

2056. In your opinion is the Hackney principally
valuable on account of the showy action, or is it
valuable also on account of other qualities != Yes, he

is very good both for quality and endorance and the Yorkshire Hackney is the best I think. 1016. Lord Republikes.-With regard to high days harmon horses, have Messys. East and Messys.

Wimberh stated that they did not like the cross of the Hackney, and preferred the thoroughland cross in their high class harvess hovers, would you take their seimos or not ?- I would not.

3085. Although they spend several thousands of pounds in the country, you would not be afreed of loving those thousands t-No, I would not. 2068. This is the letter from Messra, East and Co. ... " Replying to your letter of the 1st inst, we do not think we eno do hetter than repeat the letter we wrote last year about this time in answer to a similar in-

ouiry, which wer as follows:-- In our opinion the steadaction of Hankury stallings into Ireland for disenteers in its effects to the husiness in young lorses one done by that country. We believe it would result to a greatly inferior stamp of horses being produced unauitable for curriage house such as we require. And our experience with regard to Yorkshire horses confirms this, as we find since the Hackney stallions were introduced there that we can obtain but a very enail member of our horses from that country. We held that it is most essential the sire should be thereughbred, but with good oution rather than appet." Now, Mozas. Whahash and

Son my-"We beg to acknowledge the receipt of your letter. The floe handsome, well-bred bay carringe horse for which Yeekshire was so famous in our recollection, is very rately to be not with now, while formerly nearly all our best London entrings herest owns from Yorkshire and were boot there. We attibute this decline to the introduction of Hackney stallions, not we should be somy to see them introduced into Ireland, an that country still produces a comber of first-class carriage borses, and if

crops on farms, and I was always looking about me to see what I could and learn what I could.

valuable carriage borses will be the result." speed a great deal of money in Ireland in buying. Do you think is there may fear of our losing that memory we use the Hackney stallion !- No, I think not The Hon. Somerest Ward drives a pair of Hackneys got by " Romeo," helf-level once, and they are by far the prettiest that come into Downpatrick. There is o style about them that you will not see in those got o style more men as , by a thoroughbred size.

2019. Then you would place your epinion against that of Moure. East and Wimbanh 1—I helione they are wrong in their estimate of the

3070. Although they buy the orticle !- Yes. 3071. Mr. WRESCH.-But is it oos a fact that the Yorkshire men have given up breeding coach homes because they did not find it pay !- I heard so, that there was more demand for the Hackmays when I was

3073 Do you know as a motter of fact that there used to be a large treds with America in Yorkshire couch house, eliefy through Steribur Brothers, and that that has been given up !--You, and they were very beautiful horses. The pretitest homen I have over seen in my life were the Yorkshire conching horses. 2073. Do you think Hockneys are at all likely to take the place of thoroughbred sires, or will they be only used with mares that they carbbred would out suit!-I think they would be used with mores suit-

able to them 3074. And the maren with which Hardways would be used would not be seitable for theroughteni sires -They would send keavier mores to thoroughteed

homes generally. 3075. Therefore you do not think the fear that Hackneys will take the place of thoroughbreds will be realised t-I think not.

3076. And is not the trade of Meson. East and Wimbush and men who buy 16 hands hower in your county comparatively small compared with the trade carried on by other men, such as Mr. Hothersall and other dhalors !-- Yes, the parties you speak of don't buy yasay in our county ; you don't hear their names

5077. Mr. Hothersall knys loredy t-Yes. 3076. The CHARMAN.—These letters refer of operas to the whole of Ireland, and I gather from you that you attribute the falling off, of which they complein in Yorkshire, in the class of certiage become which they require to the fact that, there being a greater demand for the Harkney, the attention of the people has been directed to heredlog Haskneys rather than to other clauses of houses !— Xes. Heekney stallings take the place of the theroughbred sire, we have on doubt but that a similar decline of

> theroughleed horse I ose a Harkaway mare, a long lengthy mare with good home, wide of hor ribs, good,

WILLIAM PARKELL, exemined.

3086. Are you pretty well sequented with horse-broeding through Ireland 1—Not all through Ireland but the North. I have been at Ballinasion. 3079. CHARMAN.-You live in the County Down. I think!-Yes, siv. 2080. In what part of the county 1-I live in East

2087. Do voo kupw the South 1-I do, I have been 2021. Have you now experience yourself in hoeseup here two or three times, and Ballinashoo twice, and breading I-I have been breeding horses or taking a at the May once a year enyway. deep interest to hower for some than 90 years.

at the May once a year enyway.

3188. Do you from yourself—I farm.

\$000. Do you breed for your owe use on your farm
or to sell i—I mostly have two or three mayes having 3082 Do you breed horses yourself !-- I do 3085. What class of horses do you breed i-I breed from theroughlyreds and half-breds with a slight stain in them, centry thereughteed, and lately from a 2010. I think you said you breed from a therrugh-hred t-I do, a half-bred and a Clydesdele; I mostly

Clydesdale, 3054. Do you judge at Harne Shows sometimes !-take one from each, or sometimes two from the half-bred and one from the thoroughbred, sometimes 2005. In England as well as in Ireland !-- No; I have one each horse. only judged at Barbridge and Downpatrick; Barbridge 3091. And what class of mares do you use !- Well, is a very large show, but Dowopatrick is a local one, for a Clydenials horse I use a coerse, rough, strong mare and I have been through all Lecale judging green that I think would not sait a thorough used, and for a

Mr William

Fundl

104

section a recot looking mars. Then if I have a blood mare I put her to a half-bred house to bring bone, to what we call half-bred house that have either two strains of the thoroughbred on the dam or the sire's

What do you do with the produce of the Chylesfole I... I work him on the form or sametimen sell him for a cart. We have a seet of a mare, a good, short-legged, strong more, we call an Irish our more, and we can breed a very good cort home from that sort of mare, and there is a very good demond for them for heavy work in Belfrai, not just the very

beaviest but midlling, up to two tous. 3003. At what age do you sell the produce !- Fouryears old, sometimes five.
3094. What price do you got !---We used to get a

still get the better price. I have got £75, and £40 or £35 would be about the lowest.

3003. What do you do with the produce of the thoroughbred sizes !-- I try to sell it either as a human horse or a hunter, if not good enough for a leaneer it

3016. And the same I suppose with the blood mere and the thuroughbred horse 1-Yes, my local 5007. And which your you best 1 ... lioth pay equal! as dear as ever, if we could get them. I was in the well, I don't breed just exactly thoroughleeds. I had when we creat the throughteed bress -

3008. I don't mean the thoroughbred; has which wave year least of the others !- If you excel a read a good breating herse is would pay the best 5059. In it a good district for home-broading, in your opinion, that you live in !-- It is very good. 5100. And a good quality of soil ; what is the soil ! -Heavy clay, and some of it light, and some of it touches bimestone a little, and our farms are prefty

well cultivated. We go in a good deal for green crops, and we beer musure, and I think it helps the bone of the animal besides when it comes to gross on it. S101. What kind of mares have the framera!-Good, meefal, short-legged mares, with plenty of bone,

\$102. Do you buy yourself any massa in any part of the country i-Noue, unless if I got a good hunter of the country in rouse, there is a good grown for expensive mares ; we would like to do it. SIGN. In it the custom to breed from two-year-olds?

-Well, we do in our district. 3104. What is your origion about that I... Wall, we have beed some very good snimula from two-year-olds and three-year-olds. I would not like to be logge starting to keed then three-year-old, and then you can take a couple of feels; and sometimes you are can take a couple of room; and scontinues you are inclined to sell the mare, and you have a couple of good feals left. Sometimes they breed from them at four-year-old, and you have a feel at five. Breeding from a two-year-old is very severe on the more : is teles her a year to come up again, but on the three-

year-old it is not so severe. 5105. How is your district off for stallions |-- We are well supplied. 5100. With mitable stallions!--Well, they see pretty good all over, generally speaking; there are

3107. What are they !-- We have some half-treds not just the thing, and some Civiesdales not the thing. but still they haved none of them neetly well. When, ever they don't breed the people have to part with ever they don't breed the people have to part with them, for they don't get anything to do. Our farming secole out there are pretty sut to know very soon what

sort a horse saits for, and they don't very often follow a widdling bross. 3108 Are there any Hackney stallions in your district !-- We had a few, but they were not very mg central in my immediate neighbourhood, and 1 think they hardly paid their way.

patrick; we used to have then within about a wile of no, but they have ceased to keep them; they would not take the place of the Harkaway horses. 3110. Are there any quithorn size la-We besome very good eart horses in the neighbourhood; we have three Clydeschiles or four; we have one Clydes-dah out in the famous Crydeschile house, "The Prince

of Wales "; we have another, a very good ees, and they are all breeding pretty well.

3111. You think their produce is moreoutal...? do : where kind is hilly and hard to lubour it takes

you to have strong berses on the farm or you could not work it. 3112. You think, on the whole, from your expepience, that the mares in the district are improving t

-Deteriorating 3113. How do you account for that f-Well, now, they have to be turned into money; the people cannot affeed to keep these, that is just all there is about it. and the necole have cessed to hveed lately; they are

not breeding so much as they did. 5114. Why is that !—In the first place, I suppose, 514. Why at tent - in the new piles, a sequent, the merce net being so good they did not get just as good on naimal; and the middling-priced horse has gone down, while I think the high-priced horse is year

last Moy fair, and if you had the right good home you would get as much thoney as ever.

3115. But the medium horse have gone down in price t ... They have.

3116. Can you account for that !-- I think the marrie are not so cood. 5117. When I said that the prices had gone down all?. When I said that the prices has gone down. I meant the prices had gone down, the quality of the animal venezining the name I—Well, you know you can't always broad a good one, and fire a minfit you cases acrops around a good one, and are a many year used to get a middling good price, and now if you have a minfit you cannot get any price at all. Troopers last year in our neighbourhood were brought at £46 to

£93 or £35; the men that got that won't breed my more. If the Government would come and give us \$30 or \$35 we would breed more. 3118. How do you define a half-bred horsewhat do you consider a helf-bred i... The Harkaway horse you heard mentioned there by Mr. Duelen I ecold give you the outline of, with your permission. That is our half-bred in Ulster; that is the borns that has kept the people in their places in the County Down...-be has paid the rent all the time. "The King of Trumps," a thoroughbred horse, came to Ireland shout sixty years ago; he was shipwreeked on the way, and came here blind. He was crossed with a sort of Irish maro. I know the descriptant of the men that had the mure that the horse was crossed with, and form the same come a sheatout loves and that in what they call a Harksows: and that house has been crossed with a good sort of mare, and then they some-times turn bank to the thorough head some, and that is how we keep up the character of the half-head horse

book got up for him. If there had been a stud book for that Harksway breed so that they could be seld in America and other places—I could have sold some myself in America if they were registered in any stud Silly In the Royal Dubbin Societe's scheme in operation in your district!--Eut little, not much.

3120. Has it had any effect!---It had an effect where they give prices to mares more than to the sires, because we have enough of private suterprise to

but the great mintains was that there was no steel

get plenty of sires; greatlemen in the neighbourhood bring the sires and speculate in them, looking to them to pay them without any prices. has had a good effect !-- It has where it was given to the marcs and of course to the sires as well. 5122. Have you had any experience as to the effect of the importation of foreign horses t—It has burt the 5109. Are there any there now !- None in our immediate neighbourhood, none nearer than Downprice of low-priced bursos.

\$153. In your opinion has it burt the price of high-class hunters and harness herees !- Not so much, war show as hunters and anni them over to Buckerd,

is huris the price of them then and that has been 3124. Do you sell horses in England !-- I sold one but year; a young horse, I went over to the Hunton'

Improvement Show with a young horse, a Harkaway 3125. You sold him there !- I sold him, it is not matered enough yet, the classes are not properly defined; I exhibited him in the sire class as a reo-year-old, and I was exhibiting him against older loose that were contrated, and I had not just the suchs chance; be was in the wrong class, but I think

is will come right in the east. 3136. You yourself have had no experience of the heeding from Hackneys !-- None, I don't touch them. A Ettle, not much; I have seen some of them crossed

with a good thoroughbred more, or a nearly thoroughbed, with good enough results.

3125. What is your opinion of the produce!—I

think the first cross with a very good mace would do will enough, but I would not approve of a seconeron; I have an example not very far off me, and I Aw't think in the second cross the foals will be as

3129. Do you think it pays to breed in your district as well as it used to !-- I think, my lord, if we could beend a good horse, as I said before, it would pay as well as even we would get at much if we could get the good saissal, and there are some very good snimals in our district at the present time, young horses. 3130. Have you any auggrations to make as to how 3 could be made to pay better !- Well, there is one suggestion I would make, even in the haying of troopers -of the Government came nearer to the breeder in some way or other to give him a better price, people would be inclined to breed, and in breeding tecopers they might got a good one out among the rest, because you easer bread them all good; but unless the Covernment come measer the people they will get very few teropers in the district I am in, or in the County

You think the Government should buy direct \$ -I do, because I think the desier semetimes gets as unch profit as the farmer for keeping him four years A friend of mine sold a trooper for £52, five off, prefectly sound, never had a online on his used; that presery some, never man a count on me new, into man has a very good mare but would not think of potting her to a horse again—he is disgrated. 5182. Lord Exemposynt.—Mr. Dunley, I think,

stated that he thought Clydesiale and threengthred was the foundation of the Harkaway blood, do you eccader that is the correct theory 1-I think Mr. Dunlop made a mistake, because he did not know, he

is not that long in the country; that statement is wrong \$155. But he did not mean to make it \$--No, sir. The first Harkaway was from a thoroughbred horse,

and what we call an old Irish more 5134. You don't know the breeding of the mare ? -I do not; it is I suppose over fifty years ago; but a strong old-fashioned mare, a short-legged mare, I believe _I got a description of the mare-a good sort of trare; I was not old enough to know the gentleman that owned the home, but I knew the family. He used to ride this thoroughbred and drive him, and was to blind as a bat ; and he would drive him twenty unles, and throw his head up in the frost and leave hun there, and then drive back spain from Belfust, twenty miles, and not hust him—he was blind as a bes. "King of Trumpe" was the first foundation of the Harkaware \$135. Out of an old Irish stamp of more !-- Yes.

you with reference to the troopers, you say that there

Printed image digitised by the University of Southampton Library Digitisation Unit

3157. And every man who breeds, byce view of getting the best animal he can !- Yea.

3138. Then you have what you sail a mindt that does not run up to that stendard, on azimal that may bots periodly sound, but not of a good appearance to commend a high price. For that mints what price do you expect to get?—He might get £70 or £80, or you might get £100, and then if he is not a good looking animal he turns in for a trooper if he is sound; they wen't take anything that is not sound. \$132. You say the traopers have been celling from £16 to £25 to Government !-- Yes, or the man who

bought them for the Government. \$140. Do you know what Government they were sold to !- I believe to the English. 3141. To the English Government dealer or the English remount agent 1-Whatever dealer buys them c the English Government.

3142. Where were they sold !—He comes round to

people's houses; he picks up what we colled a renner guines hunter, who charges him £1 le, for taking him to a hoese; he comes to Downpatrick and goes round for tweaty or thirty miles of the country. and buye the homes at cheap as he can from the

3143. They are like the rest of the people, buy as cheap as they can !-- If the Government wants to encourage us they must give more than that. 3144. Do you know that the English Government hardly ever buys a trooper north of the Boyne! —I ii 1001. 3145. What class of horses are you speaking of, were

they riding horses, or draught horses, or calculated for both work !- Principally riding, they would do both work; but there were good backs to them, good strong less, and fair action. 31 to. They were riding horses !- Yes, but not good

enough to make a hunter, not enough smaller about

3147. Then you think nearly saything you breed is good enough to be a trooper f— If it is round. 3148. What pelco would you propose should be given for these troopers I—I think if they would give the breeder from £30 to £35 hs would try and breed

\$149. Would anybody try and breed a trooper1thirk they would on the chanco of having a good eve. 3150. And then they would not give it to the Government !-- Oh, zo. 3151. It is very like trying to breed a pale peny :

no man would try to breed a trooper unless he was under a lien to Government, and if it was a good one he would sell it for a higher price elsewhere; but if he is a maids, he is good exough to go as a trooper to Government !--- If it is sound.

3159. Mr. Carry, What you mean is, if you broad a hunter you are not going to give it to the Govern-ment, you don't want to set up the army on hunters' -No

3153. Colonel Sc. Octores .-- You would give them year rubbish, but you sak them to come forward and support you and put the money in your pocket for drive of - It is not rabbish, and unless they give us some encouragement, we won't give them snything

\$154. Mr. Canry.-You mean if the Government gave you £70 or £30 for your hauter you would sell to them 1—Yes, or even £50. \$150. But you would like to get £35 for horses

menful as troopers !- Yes. 5156. Have you say of the Harkaway blood in your district !-- Yes, we have three or four sires left; I don't say that they are as good as the first, but we 5136. Colonel Sv. Quisvey .- I should like just to sak to keen them as spod as we out.

Now by build. Nr. William Famal

with a good the concluded with size and substance. do you think it would rependance those qualities !-That is also way we got the best hunters from a thoroughbred mure and a Horkaway horse, or a thoroughbred boxes and a Horkaway mare; but we profer the Harkaway mare, because they give strongth. 3158. You would approve of regustering a sire, like the Harkaway, half-hard t-Certainly; I think

they deserve it as much as the thoroughtreed.

S150, You say that Hackneys have been leed in your district, and lately they are not popular; they are being discouraged !- They are being discouraged, we may be wrong, every man has his own estimon;

we consider their rather soft, and we consider the Cleveland a soft horas. 3160. Sir T. Eshonds.-World you say there were any of the old Irith breed of mare left in your

country !- Very little, we still have a little remnantwe have some very good mores, no doubt about it; name men are inclined to keep as good mares as ever they did, and you would wonder at the produce of some of these middling mores

3161. Would you approve of a system of registering this old broad of Iruh mates 1—I would; something like the way the Hunter Improvement Society are 3162. On the question of army remounts, see there

ear troopers bought by foreigners in your district?-Any of the foreigness that buy them in our district the boad dealer mostly gots them first; there is is worth breeding one for-ho gives up to £100; the foreigners take most of our good mares away. 3163. Mr. Warscut.—You say you would be in

Sign. M. Walker. — I on my you would be in favour of establishing a Stad Book like that of the Hunter Improvement Society?—Like that, 3164. World you hay down any definite number of comes that you think necessary t—I would like two or three groups of blood on the slous's side on the sire's

side, take two of bleed. 3165. On the short's wide or size's side was would not neind which !- Either 3165. And you think if such a Stud Book or 3166. And you think if such a Stun noon or register was established it would put up the price of

half-heed horses !-- All I know is I could have sold some horses I had in America, an American friend wrote to me, and could have said there well for me. but they were not resistered in any Stud Back and

they would not have them in America. 3167. Therefore if they had been registered you could have sold them !-- Yes, for two or three times us much as I could get at home.

3165. Talking of America, I think you said the were some Austrican horses in the Dublin Show!--am certain there were, it would not be right for me to DATES STOT PERSON 5169. I should not ask you !-- I know there were

American horses and in Dublin Show on Ivida huntary und had Irish pedigrees. 3170. And their table set, off 1-A friend of mine bought one in Belfast, gave a very low price for it, he took it to England and sold it as an Irish larger for £50 of profit in a few months, and in every English fair labely there have been a few Americans sold as Irish

horses : I look that applie the character of these horses. beaute in the bunting field they have not the same staming as our bosses at all With reference to the Hackners in your distrist, where were they stationed b-Mr. Dunloph in the nearest now; the Derryhoy stad puddocks have

tried them once or twice, they don't keep than now, that is Mr. Lindsay, of Derryboy, near Crossey. 3172. They are not there now 1-N

3173. Itsy are not uses gow 1-100.

3173. But you don't know whither they were pure Hackmeys 1-1 could give the pedigree of one shown as pure in Belfast, "Sir William," bred by Also Morton, and in the rewiller class at that same flow I think and in the rewiller class at that same flow I think we had two Harkness. 3174. The CHAIRMAN,-Are you speaking of stallions standing at those places !-- Yes, this was one of them; I think be went inst year to Gingow, 5175. Mr. Warscer.—This was one of the home whose produce they did not care short!- They did whose province they was not the manner-inty on not, and he was the best shouldered one I ever say, Lot he did not some to take with the people.

S176. Did he win my prime in Belfast 1—He get a 3176. Did no win may prime in nothing 1-fts get a third. If he had been it success in the way of gening

mates I don't think be would be away, hecute there mixture I men't territor are women in many, seconds taking are none of an very age to part with anything that pass. 3177. That was the only Hackney home then t. He had a little Yorksbure trother there, " The Squire," sometime age, a very nice looking hove he was 5178 Lord BATHROWERL-In answering Mr Wrench with regard to registration, don't you mean that you would register the stallion and not all the produce of the stallion !- I den't think it would be

necessary to register the produce of the stalling reless some of the produce wanted to be kept as a size; if you wonted to keep the produce as a size you would have to register at to keep at for a half-bred home. 3179. Do you mean to say you would register my, thing that had not proved himself to be a good guimal b... Indeed I don't think I would.

3150. Therefore you would not register all the produce !-- I worki not 3181. But you would register a stallion although

half-bred if he proved Limself to be a good feelentier! -Yes : but I don't think I would register any stalling with too much of the Clydendale in him. \$182. The matter of registration would have I suppose, to be left to some competent Beard, you

would not object to that 1-Ois, no 3183. If a competent Board was formed and ther came to the conclusion that the feals and product of a cortain half-bred stallion were good and decided to

register him, that is what you would like to see done ! -Yes, my lord. - xes, my sors. 3184. But you don't mean indiscriminate registra-

tion of produce ! - No. \$185. Lood Autrown,-Eren if you were selling this rendree, how would you be able to prove that i was the produce out of a registered size and registered dam in America, for instance 1- That would be a trouble again, I suppose, the body could decide that better than I can tell you now.

3184, Lord Raymonuga,-Under the scheme of registration that I saked you about there would not be such a thing as a registered dam !-No, there would be nothing of the nort.

5157. There would be no registered dam, all you

weald register would be the horse that proved himself to be a good fool retter, is that what you mean!--That is all I mean 5183. Lord Autrawa Would you be in favour of egistering mores!--I think if the mass was from a

thereughteed home or from something good, you may go a little hack, but not too far. I don't know exactly how stud hooks are got up, if I did I would have one got up lang our 3169. Sir T. Essoypp.-If it could be discovered there were any of these old Irish mayer left, would

you be in favour of having some kind of registration of them !-- I would if you could get them. 5190. Mr. Wansen .- De ron think you could get them !-- It would be a contains. I think it would be

hard to get 3191 Lord Raymorwer .- Don't was think it

would be very costly !- It would. 2192 Sin T. Engage ... With reference to the Antrican borres and their being sold as Irish borses in the English market, do you think it would be a good thing to brand them !-- I think they should be good owing or brains them 1-4. Editor they should be what they are, if they are American house in them he sold as such. When they came here first it was who should got them. Now they have to be seld under cover. You heard Mr. Ingile quotied; I know a number of secule who had American house, and they would not have them at all now,

\$194 Is these saything ron would like to surem so the Commission as to how breeding can be improved to the Commission at to now arresting our se improved to Ireland occupally i... Well, if you could give a little more to the people who keep good more, begin to give prizes at three year old, because when a more somes to three your old the people think of selling her; if you gave a premie a for good masse, and mode a max keep a mare in the country, that would be the selveten I could think of at the pursent time. or you could give us any encouragement to keen the

3155. Mr. WRINCH,....Do you keep more than one heres |-I keep just one.

3196. Lord Barrincount.—The infreence drawn from what you have just now and is, that the good

having money offered him by d nigest—You.

3197. And away goes the good sound maret— After they come to three year old they are in denses : if there is a price offered at three year old you have a abonce to keep them a few years. 3193. Any solution that could been the sound mores in the country would most your approval ! - If you could help us in that way it would. The Commission adjourned to next morning.

MR. HUGH NEVILLE Secretary.

SEVENTH DAY .-- FRIDAY, NOVEMBER 2016, 1896 Present :- THE EARL OF DUNRAVEN, R.P. in the Chair : LORD ASSTOWN, Mr. F. S. WREEGE

Str. T. H. G. ESHONDE, M.P., Mr. J. L. CARRY, H.P., and Mr. PEROT LA TOUGHT.

B. H. LAYS examined.

\$199. Cauranax.-You reside in the country London forry !- North Davry. 5200. Do you consider the district you live is a horse-breeding district !- For certain classes of horses 3301. What classes of horses 1-Cart horses and

harmon heeses 5202. They breed a good many of them, so they b -They do. 3203. Do you breed borson yourself !-- I do

3204. For some time 1-Yes, for a good many years off and onatt not on.

3203. What class of homes do you leved your-selft—Principally east house. The largest ear leanes we can broad for dray purposes, and for harness

purposes we use the Hackners. 3303. Have you get a stallion of your own !-- Nee "Excessor," who was a very opported goes.

5218. Before the introduction of these Hackneys
how were the harness horses bred 1...Well, they were tent at recent. 5207. And are those the greeral classes of horses that ere bred in that part of the country !- Well, bred from a sort of half-bred horse, some of them. largely, not altegether.

3205. Where are they cold, this class of borns!—

JULE. Where are they seen and to Scotch dealers, for cart becase are principally cold to Scotch dealers, the harness bresse are bought by the principal Eng-lish dealers, local dealers buy there and send them to England. 2009. Thus, I take it, that very little attention is termed to the lesseling of hunters!—Practically zone. 3910. What class of stallion have you kept your-self !—Well, I have had a share in keeping. I mover Generally kept a keese entirely on my own account.

why a notice enturely on my own necessari. Commently a flow of us together in the neighbourhood get the very best house we can of his class, and we join together to keep a really good horse. In that way I have owned a horse, had a share in him. We keep the last Olydendole blood we can get, and also \$211. How love have you had Clydesdale blood in

the country !- A long time. 3312. Have you had any stallions of any other breed except the Hackneys and Clydosiels - Yes, I had a share in a thoroughbord stallion at one time,

but he did not take 5915. And the Clydesdale you use for the cart horse end the Hackney for the Harness borse !- Yes, the neighbouring county, had a Hackney a good many years ago, " Beand Arrow," He left a iot of good 3215. Do you know anything of "Broad Arrow's" stock !—I have seen a good many of them. 3216. Do you like them !—Yes, any that I have seen were good.
3217. What Hackney sires have you got now in 3217. Wath Receiver series have you got now in your meighbourhood 1—Thore is "Yorkshire Fort," belonging to Mr. Murtau. We had up to recomby, when we solf him, a horse salled "Tremside," a Yorkshire head Haddany, and we had at one time "Excelsion," who was a very celebrated gore

5214. How lone have there how Harkween in the

country !- Well, in the immediate neighbourhood, shoul eight years. Of course Lord Charlemant, in

whather pure hred or not I would not undertake to our. They were stated to be Clerriand Bays, they were that class of horse, big, clean logged horses of no distinct type
2019. In your orinion is the Hackney experier !-think so for the class of mores we have in our scale. What kind of mares have you !- They are rather plain; in fact there is no distinct type of mare

The great want in my opinion is the mann. I think that there should be more encourage. ment given to try to keep the good mares in the country than there is, because it is the want of good mares that in a great measure is interfering with the mases that in a great measure is moreover, and ac-livering of good house.

3131. Do you think the mare are getting weest—I don't think they are as good as they

3123. Can you attribute that to say known cause? -I think there has been a great feeding densed for good marse; any really good marse are picked up by 3323. What step could you suggest to induce the farmers to keep their good mares to keep from t-It

No. 14, 1884

Nos. 20, 1816. Mr B. H.

the money that was epost in subsidizing the stallions was spent in some way in giving prices to make locally, and make it more general. By that I mean to say that the same man should not year after year gut the seency for the same mare. I think that preyeats the small farmors from competing with their cures. I should think that some regulation that would prevout the same mare getting the price meney frequently, or say more than once, would be very

3224. What sized farms are there, generally speak-ing, about you !-- Where I live the farms are very large, from 600 acres down to 100 or 120 acres. In a little distance away the farms get smaller, and

average 50 or 60 acres. 3225. Do the smaller class of fercars do much in horse-breading !- They do ; a great usuay of those

always based a base. 3226. What class of houses do they use for their own farm work !-- A seet of half-heed mure or borse They use the Clydredale very largely; there is a good 3257. How about prices, have the prices goes up

or down of late years !- A good home is always worth money, but at the present time a midding hoves is 3258. Is the good home worth as much as ever be was ! — I think he is, but the middling home is very

bard to sell. 3229. How do you account for that !- I think that there to not the demand, and I think the freeign borne that are brought into the country have out down what you might call the second or third class beese, say the third class here, greatly became they

3230. And do you think the introduction of the Hockney sire will increase the value of the produce !--I should think so as a horness horse distinctly. 3231. Give them better setion f-Better action. Of course there are Hacksoys and Hacksoys, as there are houses of all description; some Hackneys I would not breed from at all, but I think a Harkney of a necessidescription, a big home with quality and go about him,

that he is a really good stamp of horse to breed a learness horse from. 3232. Have you a share in more than one Hackney stallica at present!-No.

3233. Where did you get your horse from!-The last horse that we got that we sold the other day we got him in Yorkshire.

3234. Have you any preference !- I am inclined to think the Vorkshire blood is better than the Norfolk. has more quality.
3335. In the Royal Dublin Society's scheme in operation about you i-Not at all. There is a regintered stallion under it in the county Deny. I believe.

according to the returns, I was looking them up, in Ulster, in the counties Down, Autrins, Decry, Tyrons and Donegal there are 236 stallions and of them only II are registered. 3236. How do you account for that !-- I think that

if it were in the hands of some local society like the North-East Society in Belfast it would be more gone 3257. Do you think they would be more likely to

register horses if it was all conducted by a local so siety !- I think there would be more incorest taken in lived stallings at all, in fact just at thappearnt moment I don't know that I know of a thoroughbred stalling standing except perhaps one or so in Derr

3238. On the whole in your opinion in the class of stallion you have in Derry well mixed to the district — I would not say that at all, because I think if you speak generally there are a good seany unuound stallions in use, horses that should not be allowed to serve of all. I have an opinion or view that there should be a licence duty put pron stal-

lions and every men who lineps stallions for him should passed a board of vetorinary surgeous it should be reduced to 10s.; if he cheeses to keep on unsend stallion lot bin pay for it, there are any quantity of unsound stallings in uso 3239. You think a peaulty of that kind would be

sufficient to wipe out the unseeml stallions!-I think

it would go a long way towards it.

3210. Sir T. Emanne.—On the print of unround stallions, you have strong views that they ore extremely undesirable !- Most undesirable. 3341. And do you think from your experience of the country it is necessary to take steps to deal with that question !— I do indeed, I think it would be a very

essential thing if it could be carried out, to enter sound stallicon being used. I may say that when we begon to go into house-breeding we invariably group. tood the horse, every stalling that we used, to be seen, and had a certificate from two or three veteriors surgeons of his soundness and advertised him to be sonal. And that I observe, whether truthfully or not. has been followed in several instances where I see stallious being advertised, at the hottom of their own it says they have been examined by a veterinary

not every senson nuless we suspected there was something arous.

3243. Do you think there is much breeding from precord mores with you !- Lodeed I think there is, they are very careless about the more they use and seem to think anyone is good enough to breed from 3244. Do you think it is equally impertant to have a sound mare as it is to have a sound stalling !-

3245. You would be in favour of some system to remedy that 1-I don't see how you can prevent it; if a man chooses to serve his mare, whether she is sound or not, you cannot prevent him; but, with regard to giving premiums, I would insist on sound

3946. You say not aware I suppore of the practice of foreign countries in respect of this question of sound or uncound houses I—No ; I have beard that in France there is a duty on stallions, and only sound stallions are licensed. 3317. Mr. La Topour.-You say you think the mares have deteriorated a good deal in your country ! -I think they are not as good as they were.

\$248. And that there are harrily now thoroughbeed stalliers that you are awars of in the county !-- I really den't know that I could name a thoroughly-d endlion in Davy just at present; there may be our 3249. Do you think the mores have deteriorated from the absence of thoroughbred blood t-Well, so I don't know that it is attributable to that; the good

marcs are sold became they hring the most most 3250. I suppose that was always the custom, was it not !-- I suppose perhaps it was, but I think the mares are not as good as they were for some reason or 3251. But you think there need to be more thoroughhred stallions in the country before the introduction of those Clydesdales !- Well, in my recollection I

don't think there were; there was generally one or two theeroghbred stallions. S352. What was the ordinary size in the country when the marcs were in a botter state than they are

at present !-- A half-bred meadescript sort of horse, \$253. What is your definition of a half-bred !--My definition of a half-bred would be from a thoroughly-of home in that line, or from any threoughbred, a halfheed, I would consider, must be pure on our side. but the half-heeds that are in the country are not that at all, they are a seri of populescript, which, perhaps, would be a better description to give them.

3254. You cannot form any idea how they were heed, the nondescripts you speak of I-I have not any ties at all; I should say they were beed in every way. 3255. What sort of home do you expect to breed by a Hackney stallion out of the ordinary mane of the country I-Of occurse your aim is to try and hered the both you may breed a first-class large-

here, you may been him, if you don't you will breed a how that is fit for a van, which is a fairty selling house and if he misses that, of course, he is ash a terrecon \$250. Do you really expect to breed them hig

2010. Do you really expect to breed them his gaugi for was 1—Cortainty, if you breed with the right nort of stalline. I would never think of breed-ing him under 10.3 or 18 houds. 3257. Do you get Hackney stallions up there 16 hands 1—Cortainty, the last hones we had was 16.

3258. In the more of the country hig enough to values that not of natural to-Oh, was my american a that very often a small mare produces the biggest

2056 Mr. WERNON.—Practically you would divide the recess in your district into reares that are it to he prosect with a Clydesdale or east horse, and marce in to be crossed with a Hackney to produce hargess horses !-Yes.

3200. De you think, with regard to the latter class, if the present maxes that exist in the country were crossed with a good Hackney stallion they would in time median a much better much in the country if the produce were kept 1-I think it would.

\$20). When "Excelsion" was ground with a mi

sitel water "Excesses" was excessed with a nat-tiful mere, did he get good selling stock!—Heddid, "Excelsior" was a Novfelle bred Harkney, and my opinion about the Novfelk Harkneys is that he requires a better quality of mere than a Yorkshire Hickney. I may say that I bred by "Escalder" out of a mare that was nearly thoroughboad also just had a stain in her. I bred a horse that is m Canada, was the Live Stock Journal repetter reporting on his treating said he had action equalled by no home in any country. I sold him to Grobum of Ontario, and his lum was nearly thoroughbord, a small more not 15 hands, and he is over 16 heads according to the report

in the paper now. I sold him at two-year-old.

3042. Do you remember, I think it was the year
inforce last, a horse or many second in the heavy weight chan in the Dubhu Show got by "Exceleter" !-- Yee, I knew that muse very well, that mare was on the firm next tomy place. 3263. How was that more beed i-That mage was

herd out of a well-bred more which I believe come from the West of Ireland, and "Receiving" And I will tell you an extensionly thing shout that, that the year before that the light weight champion burnter in the show in Dublin was out of that more by a thoroughland home, and the next year a mure out of the same may be the Heelman borns was in the beaver weight olars, she was either first or second. I forget

3314. Then you think that if the mornic benefit the produce of the Hackmey stellions they are reitable to work on the smaller class of farms !- Curtainly, none 3345. You said you had a thoroughbred borne there at one time!—Yes, but he was not patronised sepah. 3916, But a good clear of thoroughbred!--We

5307. Mr. La Toucrez.—What was hel.—A horse selled "Circl," by "Citrelite," he had been steeple-

chard and steeplechard well.

3938. Mr. Warsen.—He was a powerful kerse!— A small bosse in size but very strong 3210. Plenty of bone 1—Plenty of bone.

3270. I think from some of your answers you would recommend that other stalling besides thoroughly win should be registered by the Dublin Society in the county Deery !-- I would say so, certainly.

2771. Would am recommend that more cart bears stallions or Harkmey stallions should be registered be-3372. Would you recommend that half-lared stallions should be registered i—I don't think so, I would not

but you may got. 3273. And I thouk that in the queries which you

answeed to the Commission you givesome recommenda-ation about buying troopers !— Yes, I think if there could be some scheme devised by which farmers sould register their reases in some way that it could be recen nuadistely beought maler the eye of the Government Board it oscialaly would be a great thing, became at present I should say no farmer, or very few, sell their horses for troopers direct to the Government, they nearly all pass through the hands of dealers.

3274. And you think it would be possible to arrenge some system by which they could be bought direct from the brenders b... I think so. I think that if they were registered, and then when the Board or whoever was buying for the Government came down they could know where to go, or they could sive notice that they would be at a certain place on n certain day to those men who thought they had become mitable for troppers. and get an expertunity of seeing them gathered

to rether. 2275. Are many treepers hought in the North of Iroland!-I could not say very much about that naymif, but I believe there are a good many benght in

3976. Is Derry a good horse fair!—Oh, no.
3977. When you keept different chasses of stalliges
do you think the farmers were fairly intelligent so to
making the right muse with the right horse!—I think so. 3178. You think the formers in their districts would be able to give a very good opinion as to their own requirements 1- Certainly they would, un-

3279. And would you rather-in offering premiums or in carrying out any scheme for the improvement of bones-would you rather that it should be done through the local shows than through the Resul Dablin Society or a body far uway 1-Yes I think that a body like the North-east Society in Belfust, or about what the neighbourhood really requires, and the class of horses that will take in the dictrict, and are more interested in it. 5380. Then you think that if uny Government aid

was given in the direction of improving the tered of homes that it crucks to be worked through a local society in preference to the central society !- I should 100). Course av Do you know at what ago tisces

because for recognitioner generally sold to the dealers ! ment, the dealer does not keep them long in hand as 20182. I would like to understand a little better what your opinion is about the deterioration of the

mares, because you have told us that prior to the introduction of the name head Hackneys and eart horse introduction of the pare area interactly shot one often the country generally was served by those non-descript since which were inforier to the pure level cose, yet at the same time you say that the produce, on for an the maren remaining in the country are concerned, has not been improved, but rather the reverse L-Yes know to begin with the use of Hackneys has only been introduced within the last seven or eight years, so that really there is no time to petre what the result of their bending would be, and all you can see of them in the house that have been head and sold, you are not in a position to judge from practical experience what the result is improved to begin treat breed may be, but certainly they are more raiseled house. It is my aspecience that if you put a theroughbred home upon a set more you will get an animal with perhaps thoroughbood forequerters and E- 25 1108 east bindecapters or oice evens, the most recircs sort of animal for any purpose; there is uniformity of type Nr D. M. about the Hackney Leen

3283. Is there anything you would like to say to the Commission, any suggestions as to the way in which the industry could be improved in your part of the country !- I don't know that there is anything I Colonel Sir William Lerenz Correspond examined.

sould suggest except some schuse for exceptor the use of social statilizes in the comstry could be enceived, and a scheme that would give an inducement for the keeping of a better class of mores. 3284. I take it that you think the latter is about of the same importance as the former !- Certainly, a good mare is quite as essectial as a good horse.

\$285. ORATIMAN.-You live in the County Derry ! \$356. In what puri of the county !- The south end. 3037. Are you interested in horse-breeding !-

don't breed any horses at present, but formerly I did breed a good many at one time, and I take a great interest in the matter of home breeding in the neigh-3288. When did you coose breeding borses yearself !-About eight years ago. 3189. Do you consider that your district is well stited, generally speaking, for horse-breeding !- Von

\$290. What kind of soil !- It varies considerable. it is allowed and skey, a learny soil 3291. What is the kind of borse that is produced !--Harness horses principally, and consionally hunters, you get occasional benters, I have known some very

good bunters produced in the country some years \$292. What do the farmers proscully sim at producing \$--Oh, horness hornes, a house that will sell up the Moy fair is the best way to describe it. 3203. Then you consider the production of harness berses to be the most profitable form of home breed-

ing !-Yes, the farmers certainly do. 3294. Are there issue forms in your dustrict !-Tolerably so, from 50 to 100 acres, and below that

egsin. ate. 3295. And do the farmers generally term their attention to leveling harness bornes!-- Oh, herrous horses almost entirely. 3196. They look upon hows-breeding as a profitable

business I.-A great many of them do 3297. What used to breed from thoroughberth. Unfortunately at an itself to breed from thoroughberth. Unfortunately at an itself I rifed from a sen of Benal Arroy and I got unlocky as to have; the more was a more got by a heres called Ninrol and her dam was by Stroods, and the promision looked a very well head more but I could never find out how she was bred, 5200. Von have herd cottirely from thereoughbord

sires - I heed from a horse of Lord Charlescont's called Dr. O'Tools, I caunot may much for his produce.

I bred from Faraham, and I hred from a house called Occander by Crowler

3199. What class of maces !- I had two maces at one time, one was a great hig, said to be a well-bred mere, did not look it, but she heed very badly. The other was a small more and bred very well. 3300. Are there any thoroughbred stallions in your

part of the country !- There are two or three bornes: there are two horses standing in Manhemals and to be thoroughbreds, one home I am estisfied in he is a home called King of the Village by Firsto Chief.

S301. Are there any half-beed houses serving in the district !- You, there is one standing there got by

Strathardle out of a mare said to be by a horse called Prime Warden that stood mear Durry, a very goodlooking horse, and his stock are very good-looking.

\$302. Do you approve of breeding from half-heads? -I would not do it myself, I don't like them, I would rather have ours hred ones. 3993. Are there may east horses or Hackney sines

proposed to be a Shire horse

2304. Have you any experience of heading free

5305. Have you seen any of their produce ! ... I have

seen some of these in viv prichlamphond, and stree I was written to to coor how I have asked a great many of the farmers about my neighbourhood whether

they approve of these and they invertably conleys they approve of them and they invariably coolean there, and say "Don't send as Hackness whatever You do Si06. It is merely second hand exidence, but have you only also what induced their to form that consider Two of there exectably are man who deal in house

and how them in the acirhbourhood, and they won't here there at any price, 3307. You kennd the evidence that has just here ven to us by Mr. Lone !- You, I bound it 3508. Then you would not, I take it, agree with his

opinions as to the insurevenent likely to arks from the introduction of Hooksey blood i-I don't agree 3309. Do you think the furners appreciate a good

stallien 1-They do thoroughly 3310. And one was satisfied with the class of stallings in your part of the country !-- I am not indeed, there are two horses that have been brought over lately from Yorkshire said to be Glovekeel Bays, I have only seen one of them, he is a very good looking hurse and I think will improve the broad very much, fee, strong,

5311. What oher of stallion would you like to see lotroduced into the country !-- A large, strong therengi-5312. Do you think the farmen would pay for his

services !- They would, I think, if it was not trehigh. S318. You think that is the kind of horse they weedd profer !-- I am sare they would 3314. How is it that if there is a deesend for such a horse, no stallion of that kind has been brought into a norse, he station of that kind had been heregin must the county !-- Score of the Dohlin Society's horses have been sent down. There is a house called "This Waif" there. Four or five years ago they would not have that breze at any price. He stood us Maghera-felt for a season: I don't think he get four mures; 1

don't wender at it, for he was not at all reited to tise 5015 To the Horel Dublic Society's solvens in operation in voor part of the country !- Not now; it

3316. And how did it answer f...The result was "The Walf" was sent down there, and it did no

3317. Have you any soggestion as to any better means that could be taken then those that are taken by the Dublin Society !-- I think if the neighbourhood was reconstited in the choice of the horses it world be better; for the selection of the bores is made by people who den't know the wants of the neighbourhood at all, and consequently we would be better without these light horses like "The Walf." It would be

far better not to send a horse down at all; it only brings the thoroughbred into contounts. 3318. How are those hunters bred that are occ stonally hred in your district !- There was a very good. home got by a horse called "Stream" that stood in our district; he was a "Elair Athol" horse. I am speaking of a good many years ago. A horse called "Fare hom." got some very nice borner.

Color of Str

2310. Are you pretty well accominted with Ireland peterally us to horse-breeding !-- I know the North of beland-Dovy and the neighbourhood-very well, and I know the neighbourhood of Cleaned pretty sed a more the negationarmoon or commit protty well, but that is the only place I can say. 3590. Have you formed my coinfon of the probable effect of the introduction of Hadmay blood in the country be liven prisonal experience. I connot say

country - even personal expansions I could say anything about it, but individually I don't like Hack-ney action; I think they go off their stiffer, and in bending up their leaves they don't use their abcolders.

3321. How about the mares in year district— They are very indifferent. I cannot describe it better than to tell you what is said about the searce, when a

more in perfectly useless for anything else, "Oh, she will do quantially to take a feel from."

3503. Are they getting werse or better 1—I think shoy are pritting worse.
3223. How do you account for that !-- Where the

mare is a tolerably good one the people turn her into (54065 3324. Was not that shways the case 5-I don't think

t was so many years ago; I think they kept better marea. There was a great rue, essecially upon brown horse-it is a great many years ago now though-by the Austrian Government, and that descriped us of \$525. Do you mean that the furners don't under-

stood that a good mare is important to breed from !-They certainly understand that they have a botter chance of good produce from a good maze, but at the same time, if they can get a long price for a mare, they will from it into money and not wait for the spednes 3326. And that, in your coinion, is harmful to the industry !-- Ob. no anestion whatever about it.

3337. Can you reggest any way of oheeking that !-I would suggest that if possible the Government should send down through the country to the farmers conditionally-on what conditions I are bardly prepared to say-cast mores from the artillery. The reason I say from the artillery is that they would be of use to farmers becarse they could work, not absolutely, if I ruy say so, oast mures, but nurses that have worked for a certain time, and that there is some good left in thrm-mares that we will say have served soven or eight years in the artillery. If they were given among the farmers, and to be bred from conditionally that the Government should have the refusal of their produce, or something of that sort, I think that would be

3528. You mean that they should be distributed gratis or sold cheaply !-- Gratis would be the most attractive way no doubt, but I would sell them alreaply, it would perhaps come to the same thing. I was told the other day that the French are instituting a plan. They are taking their mures after three years' service with the cavelry, giving them to the farmers and priting them to the stallions that ero kept in the French Asros, with the arrangement with the farme that the profuce is to go to the Government : that I think has been always the case whom they breed from the borses in the force, that the Government have the claim on the preduce; such I was told at the Feunch Armer may Avranches, that I saw serse years ago. 3020. Suppose this could be dear don't you think there would be a great deal of dissatisfaction if a man

that heed an animal worth £50, should be obliged to sell it to the Government for helf the money !... I don't see why they should ; when he gots the mare for very little and makes a condition at the same time, don't see why he should; if he is ensured £35 or £40 for a three-year-old, I think be would be very foolish 3330. They would have to be sound I suppose !-

\$331. Yes, I mean to say sound in some respects !

—A veterinary surgern would herely you them sound after six or seven years in the Artiflery.

3532 Mr. Cantw.-Sound in wind !- Yes, sound Nov. 90, 1600 in wind of course-not rearers. 3338. CHAIRNAY.—Can you suggest any meson Willow Level by which suitable staffions could be brought to your Conjugace.
district !—I think the Royal Dublin Society's plan is as good as eay if they could get us the right horses.

3334. I take to from you that any encouragement or and given by the Government or by a society cught to be consisted by a local committee 1—I think so, under the superintendence of the Royal Dublin Society.

I would not have it earle blenche to the local society. 1315. Lord Asserows, ... The mares in your district, our you give us may information about the size and substones, what they are like !- They very ; some of the

his case are very carty 3316. Have the small mares got any bone 5—Yes. 5337. Does the land grow lone 5—Some of it does,

not all of it. 3338. Do you think the majority of the mores are fit to breed a hunter !- Certainly not the majority,

3319. Then the thoroughbred horses that ; would want would want to have immones home !- He would want to have pleuty of bone. 3340. And short leaven'd thick !- Sheet leave.

3341. Fulling that horse, which is a very hard horse to got, what would you support 1.—Then I would retire upon the Glevelands to try and get o

3342. Sir Tuonae Emerga.-On the question of stallors you say there is n want of suitable stallions in your district !- Yes, there is. 3343. And for the purpose of striving at a good

stallion for that or any other district would you b favour of some system of selection by localities of the kind of stellion they would want !- I would under cortain appearation. 3244. Then on the question of seice, what would

be an average price for the service of a stallion ! What do was think the furnors would now for the service of n stallion !--Well, I kept a stallion for a season toyedf, and I had great difficulty in getting £3, and thus they tried to make a burgain that there should he a feel; that it a very common practice that you don't pay unless there is a fool. In my instance the finis did not appear, but they were sold afterwards for considerable sums of money.

2345. Then you think that £3 is the cutside price that a man would be disposed to pay 1—Yaz. 2346. Would be pay £3 1—Yes, the ones that would be likely to bread good house would pay #3. 3547. Are there any troopers beight in your dis-trict !—There are some in Moy fair, principally by

3548. What price do they give as an everage !-From five and twenty to thirty pounds is the French 5249. What would be the average price of the

troopers bought by the Home Government 1-£30 to £35 and £40. The feedgrees will give more money for an infe-for home than we will for a trooper. 5300. Do you find that they buy inferior locus as teopers 1—To Fuglish troopers, ob, decidedly. There was a horse, I doe't know whether he is alive or not yel, called "Katorfelto," that stood in my district,

yet, edited "Asteriotics would buy as once for two persons up to two persons burne they thought was got by him. They but a great cylindra of him. He was a thoroughtwo borne get by "Armagnar" by "Faugha-ballagh," a get by "Armognate by Tangara-manage," plain heavy horas, bot a very powerful good gover. He came to the country by accident. He laid net with an injury, and I can savry to say he has left it.

355). Mr. Carra, —I think you said, Sar William, that you had some of "Breed Arrows" stock: 1—I that you had some of "Breed Arrows" stock: 1—I bred from n son of his.

3552. He is a Hackney !-- He was a Hackney. 3163. And the preduce was very disappointing !-Very disappointing. I knew two got by "Beost Nov. 29 1186. Colored Für

Arrow " One of them is a very old mare. She was a perfect beauty, and most brautiful goor, but I am teld that after five or six rolles you must reces buy, \$354. That is about the length of her tether, she would require prensing after that time !- I cannot say that from versional knowledge; I only heard it; and the other mean was a brown mare, a very handsome mare that didn't like a long day either. \$315. Do not the dealers in your district entirely

disarrogo ve of the Hackney 1 - Yes. 3306. And these dealers are largely interested in the trade 1.—They are ; they sell a good many in May

\$357. Do you know how much they spend in the country in the purchase of horses, those dealers !--No. I connect any : they generally have from 6 to 7, d 10 horses at a time; one of them especially. \$358. Then you are in favour of a large strong boned therrughbred borns 1—Yes. \$350. For getting harmens houses †-Yes; there was a house called "Ninreel."

3310. Mr. La Toucue.-A brother to Bacchus ? Fitness.—Cu, deer, no, a much older horse; he was H. O'H. O'Hars, of Craigvilla, brought him over to this country : he belonged to Sir Waskin Wyane,

who had ridden him seven years with hecods, riding 17 stone; that here stood in the country for a such while and left his mark : but it is a long time area it most be 40 years.

2312. Mr. Ollerw.—How many years age was that would you say 1.—Forty years. 2365. Was he a thoroughled 1.—Yes; got by "Quishilver," afterwards "The Execuble," "Quickall ver " was by " Memore," and " Nuncod's" dam was a mare called " Charm." I think she was not in the stud book, but she was said to be a thoroughbred. He

was a tremsudously powerful horse. I never saw so strong a thoroughbred. strong a tiseoughteed.

524. You speke of a half-bred by "Strathardle."
who left good stock !—Yes.

330. Would you not be in favour of a half-bred

for those mores !- I think this horse I spoke of has bootly a stain in him. 3366. He is not in the stud book !-- No. his dam.

3367. Mr. La Toyone .- Do they sell many foals. the farmers in your country, or keep them for three er four years 1-They sell a good many of them as frain 3368. Sell them to one another 1.—They are sold in

the fair at Moneymore, a great many of them.
3569. Does one man buy a lot of them 1-No, They buy one each !-One et a time is sold

generally; sometimes the English dealers buy them 3271. Boy the feals 1. Very that is not often a but aswetimes they do come over 3372. Furmers do use Harkney stallions a good

deal in your district t-One Hackney stallion visits from the sown of Magherafelt during the season; He comes from Limswaly, Mr. Lene's people; they like the Heckneys was a man who had kept a Hackney stallion himself, a Yorkshire Hackney. 3373. D44 these people give any ressun 1-Thry den't like their action; they say it is a fighting

sction; and that they go off their stifes, and that it is a great effort with them to po. \$374. Does the produce fetch a good price !-- No any I have seen do not fetch as good price !- No. But I sught to any perhaps that this other bearen

other horses. But I ought to any perhaps that this stallion which I have seen as a Hackney I don't think sewers would care much about him-po matter how much in love he might be with Horkneys; he was a holds-horse headed style of brute with had foreless. I don't wanter they do not breed from him.

3375. Mr. Wrancet.-The Harkney you socially alleding to was a see of "Broad Array " t_ don't specially allose to him except breeding from him myself and having a very but home from him. 3376. But you said he was a son of " Bound Arrow ";

\$377. Do you know what mare he was out of t-Said to be a Yorkshire curt mare 3378. He was not a perc Hackney !-No, he was

\$379, And this other Harkney which wer think as know, he was a blood horse, he came from Limanade 3380. You don't know whether he is a pers Hackney !- He was mid to be. 3381. He is the burse that has been sold !-- I don't

know.

3382. Yen say that the trade in your district is practically entirely larness tends !—Yes, a burness

5383. Then the demand for other homes is small !--It is, except locally for farm borses, \$384. That is remeral ntillity horses 1-Yes.

\$385. But the harmon harm is the heat alon then try to perduce 1-Yes, that is what they want. \$386, I suppose you think notice is a very great consideration in a harness horse !- No doubt. \$387. How have you formed your coinfor is to Haskney notion being bad, as you generally con loun

Hackney setting 1—I don't like it myself, I don't like that sixts of action. 3185. Where have you seen it !- At a show in Cambridge where there were said to be very good Hackneys; I don't like their style of action.

3889. Where else !—And this horse "Excelsion"

in Litterary,
3390. Then your experience is confined!—My
experience is limited of course, but I don't like the accion

3391. It is practically confined to what you say at Combridge and this Linearedy horses.—You become 3392, I think you also bred from a horse called

3393, Did you find his atock good !- Thereogily 3394. He was a threcoghbred !—Yes. 3395. Your aim was to breed busters !—Yes. 3395. Did you find it pay !—out of that one more

cannot complain of her not paying ma. 3397. She was a specially good more!-Yes, except these three of " Broad Arrow's " soes did not pay me

well, but a horse by "Crusoder," and one by "Kater felto," and one by "Crusoder," and one by "Kater felto," and one by "Normanby" paid me well. 3398. You think the mares are bad in your district 1... No doubt about it

3399. And you though that an affect should be made to improve them so that they would be \$4 to cross with a theromeblend borne t-Ven 3402. How would you propose to improve the countries in With Clarabacia.

5401. You alluded to two Clevelands in your es-5402. Have you seen them 1-Only one of them. 3403. You only speak of the other by bearsay !-

By hearpay; this herse I have soon last season was his second and the other one was his first. 3404. Have ron seen any Chrolands in other faces I... At shows and one or two in the county of Darry a long time ago.

2405. What shows t....Belfort occuriously. 3406. Pure Clevelands I-Said to be. 3407. Then your experience of Clevelands is co-

fixed to what you have seen in shows in Ireland!-3408. And to the one horse in your own district !--5409. I think also in your report you recommend that the learner that should be used should be strong

thorough boods or Clevelands !- Yes.

Printed makes discussed by the Limiterative of Southwardon Library Distinguise Host Printed image distract by the Linearaby of Southampton Library Distraction Line

read ! -Yes,

3410. So that your recommendation regarding Clevelands is only based on what you have seen yourwith Ven; I have seen Clevelands showhere: a and carriage homes in my neighbourhood.

3411 You don't know if they were redicreed t-

auto. Wented was be inclined to vertices what you call a itslifteed sire !- A half-leed sire with barely a easi in him, but I would not register on extreme were such as a thoroughbred with a Heckney or

Clodendale. 3413. But what class of half-breds would you weighter 1-One that you could not absolutely tence his radiaree in the stud book, but that spoke for him-3414. Then you would register on approximes !--

Not extirely on approximate, because yes one trace 2415. How many evenes would you think necessary to a half-bred horse to be registered !-- I would do it where the dam and after did not [appear in the stud

3416 You would not require any definite particulars of thereoglyberd cross !—I would not 3417. I think you said you speke to two dealers \$116. I was just pointr to sak you to put the names

of those two dealers in privately to the Chairman !--\$419. Were they large dealers !-- Yes; they deal is a rood many cond horses in May fair. \$400. You don't know what experience they have had of Hackneys except that our kept what was called a Hackney stallion at our time i-No, that man

was not a dealer, he was a veterinary surgeon. 3421. You don't know if these men have had any some of the produce, and didn't like them. 5422. Charman,—I take it. Sir William, that what you would prefer to improve the breed of horses

is a strong, nound, thoroughtent staffion !- You 3493, And that yes think it would improve the meres to come them with a Clereland Bay t—Yes. 3424. Would you prefer a Cleveluni Boy to a Hekney !-- I would on account of the next cone with a thorough) red; I think a Chreshol is more like a thereughbred them a Hankney; if you go in for breed-ing harness barnes, I think you will be much more likely to have lunters from Clovelands than——

\$425. How do you think the mures could be best improved-by a cross with what, as regards barness herest... For harmon horses I think the Clavelands are more likely to produce a big, upstanding our isge been than the Hackney. 3494. And your epinion of the Clevelands and your spinion of the Haskney is arrived at from what you

ad 1 - Yes.

S427. Lord Astrows.—You penfor a Claveland for William Lease. harness rearrosses, for cross purposes, to the Hockney ! -Yes: I think he is mees of a theregridged looking 3438. Do you prefer his action I... I think his action would take you over the ground faster than the

3129. You mentioned a horse called "Excelsion." Do you like his action built do not 3430. Do you think, syrposing you could breed a horse with his action, you could not get a high price for him!-I should my you could cell them well enough, but I would not like to buy him.

3431. Would you not got a better price for a burse like "Excelsion," a human horse, than for a Clevelend !- I do not. I don't think he would be so log

or so active.

3433 Still you would get a good price for a harness
herse like "Excelsior"!—I days my a horse like "Fixedsice" would pay right well 3433. So that, aithough you don't recommably like of so, no text, settings, yet one't 'recomment's like
throu, still you say it would pay the farmer to breed
thron !—It would pay them to hreed a house like
"Excelsite"; it would pay very well indeed,
3434. And with that settion !—It would say that. So

far as I am concerned I would not be bethered with him. 34%. CHAIRMAN.—In there anything class you would like to say to the Commission, Sir William I.—I don't think there is sarthing I have got to say except the boroughtest home because the country; it is a very important matter, more important perhaps than the borou; you have a fair chance of getting the threoughtest home because there are so many of them the best marcs.

STM. Lord Assrows. ... In fact before you see near the thoroughbred you would went to improve the meres to get them fit for it!—Yes; but even with the marce that we have I think you have a better chance with a theremethered than with conthing clea-3437. In the hunter line 1—Yes.
3438. Mr. La Torons.—You agree with the London dealers that the host upstroding earriegs house are got by thoroughtends—I do. 3439. And you think that the hig upstanding car-

riege home is more likely to be preduced by the thereoghlared then any other 1-I think so. I was thereoghted then any other l-I think so. I was told coming up in the train the other day by a man who knows a rood deal about the metter, that East. the dealer, may that if Harkman are introduced in Iroland it will spail the overteen horse, of which he have \$10,000 worth each year. 3440. Chairman,....This is pathey remote. We oan get it more directly !....I know that East's horses are very good looking ones wherever he gets them.

The Ray, A. N. Harne, Frances, z.e., exemined,

3441. CHARGER.-You live in the county of whatever stallion they can get easiest, and at the Monahent - I do 3443. In what part of the county !- The porthern nd of it : near to the town of Giones, boolering on Fermanuch.

Printed image distinged by the Linearaby of Southernston Library Distingtion Line

3443. Can you give the Commission an idea of the therefor of your district, soil, and so on !- It is generally was heavy clay. 3444. What kind of shed holdings !-- Very small, from twenty acres down, some as low as five or six

are too small; they have no outrue for them.

3445. Are many horses bred by the farmers of the district !- Not many ; they say always that their farms 3446. What kind of horses do they brood and from what clean of merce !- A very low, small mongrel sort of mare that it would be difficult to describe and from

west rate. 3447. Do they breed for their own purposes or for sale to For sale if they can not the price 3448 What kind of stallious are there in the district !- For the most part stallious brought about to fairs; some call thora half-bred; there are some thoroughbreds in the county, but the small fermous would not pay the service fee as a rule; there are several registered by the Royal Dublin Society but very few avail themselves of them \$449 The fee is too high !- Too high, and also then do not like the sterm of the spiness; those that see good the fee is too high, and the others they don't like.

3410. Are there any large farmers in your district who broad - So far as I can say the larger farmer

Mr A. N.

That is all.

Jim. 20, 1804.

3451. Are you interested in the subject of horse-breeding yearselft...-Yee, I have been acting for the Reyal Dublin Society since it started in the county. 3463. Were you at the Clones show hat autumn !— I was 3453. What kind of show was it-I mean the stock exhimsed !—A very fair young stock, they only have them up to three-year-old—a naive and fook yearling, two-year-old and three-year-old, if in the lumbs of

\$454. How were they bred generally !-- By the roughbreels, many by the registered stellions of the Royal

Dublin Society.

\$455. Have you been encaped in breeding of keepen ouncil at all i-Every year a little, for some twenty years with whetever mayor I used on my farm, had one, two or three foals each year 3436. What house do you conceally put these to \$-

The thoroughered I can most easily supposed. 2457 Is there any ambale thecoughtred exceept to you !- I have had two or three of the Royal Duld'in Socrety's not for from me-kept by Colonel Thompson at Rockcorry; letterly these cars, and kelowe that, "Folora Hope," in the county Fernanagh, lept by the Archibles, I found the most mecountil

3458. What do you think influences the small furner most-the for or proximity t-Proximity and low tate of service, but what I find them lay more no pay no feel; they don't like paying any fee also don't like paying any fee

3459. I surpose they are able to judge what clean of homes would be best for thesa—supposing they can afford the fee i—They would like the home they could

sell best.

3460. You said I think you zever bad a quite sound lesser!—I said that with a rude cross and a farm horse I never had a sound one. 3461. Lord Annows. - Never a sound one !-Between a cast mare and a thoroughbrod-when the cross was a very distinct one, in that one I never had a round one produced from the mure more that had

always heed sound ones with a bons of her own class. Si61. Chamman. — Are there may Clydestale stallions in your county I—I don't knew that in this county, Monoghan, there is a Clysleodale; in the adjoining counties there are. 3463. Or Clevelands or anything of that kind t-Latterly there has been a Cleveland, within the last

three years I should think 3:64. Have you formed may opinion as to the advantages and disadvantages of occoring mores with a Cleveland for producing busiers ... Not the least. 3465. No experience t-From anything I do know

I should not like to try the experimen 3466. How about the Hackney !- Not wish a view of producing a kunter, I would not run the risk; all house-breeding on the best lines is very risky; taking every precaution that one can you will be often dis-

3467. Mr. Cannw .- It is a speculation !- You 3468. Citamoun. - And you don't think that the risks would be lessened by the introduction of Oleveland blood !- Not for hunters 3469. And how about the introduction of Hackney blood !- I know very little about it; anything I do

know so far as say experience goes in kneeding is against them. Having heed from the name many by a thoroughbred home and also by them, but only four or five feals—I had a little mare, practically a thoroughbrof, that got weight-carrying hanters from "Foriorn Hope," and absolutely worthless feels from a Hackney-a little mare, her produce went for £150 in England as a weight-coveying hunter. I tried to sell a four-year old-a borse by a Harkney-and I could not get £50 for him.

5470. What Hookney size !-" Prince George;" he was standing in Fermanagh. 3471. Mr. WRENUE.— He was a small hoese l—He

3473. Speaking generally, what do you consider the best class of stallion !- Unbesteringly the thoroughbred of the right type, get a thoroughled 3474. You have described the mass as being very mongrel's-Yes; and as a rule if the farmer filly feal he carnot sell he keeps her to breed from He only keese kee to breed because he cannot got the

3175 Can you suggest what, in your opinion, would be the best way to superove the mares !— I am in boos that the plan which is in work now with the Rees Dublin Society will do it-giving prizes to men to keep the narros. I was always in forcur of that, but

I have been disappointed that they won't pay the service money. The class of mon who have these poor marcs won't go in for the version of the thorough-beed, because they have to pay too much. If they could combine somewhat of the two systems it edgic have a good effect—rewarding the factor for keeping a good mare, and belying ham to get the service of the In my locality that in what I have observed

\$476. To improve the breed of the neares (to make there more suitable, and thereby produce more valuable carriage homes and hunters), do you think it would be advisable to introduce may other cross!-Not so far as I know, if you could get a thoroughted with good enough hone, 3477. And the Reyal Dublin Society's scheme has

not, in your equalse, been very uncomed in your equalse. He may be compy he not in my tramediate neighbourhood; in the end of the county nearer Dublin—Carriel seares. and Castlobleynoy-there is a larger class of facours with botter mares, and they are making good use of it. They are crossing now with marcs got by the sizes that they were holped with the service of in years

gone by, and getting price for those mares.

3478. We have had it in evolute soveral time that the demand for the orneral utility have has declined and the price declined, although the prices for good hunters and good ourriage barnes keeps up -- do you think the small famours, under any ologoustances, would be able to breed valuable bornes!-Sometimes with these unaccountable mares an oud cross hits well, and they get a home which pays them fairly

3179. If it be true that the demand for the general utility have is declining, in assisting small formers to broad, would it be sessified him in endoweering to encourage him in what was bound to be an unprofitable business !- That is a very difficult question; if the price continues to fall of the middling or worst then middling borse, it is a question if it would pay

3480. Do you know if the foreign connetition has any effect on the middling or worse than madding horse !- I know the dealers say they can get a foreign bosse much cheaper. There are several ourses to pull

36SL. What are they !- The foreign competition, and a number of people have given up horses that made use of them formerly, Augustics with the fact that a class of people who kept burses as a luxury are being deprived of the means of keeping them.

3482. A good many people who kept horses manush now affind tol.—Yee, that is one cause; they are taking to bicycles and other means of ecureyanos, and the foreign competition; I think these three things have

pulled down the prices of horses. 3483. Are many horses sold for remounts in yes ourt of the country ?- Yes, in the fair of Clones; think a couple of hundred in every fair. S484. Did you bear a suggestion made by a favore witness that it would be a good thing if Artillery mares could be distributed among the formers 1-Yes, I beard it, but I am not competent to say. But these

oran come from everywhere, the horses sold in Clones fair come from every part. Dealers bring then in droves from Mullinger and other parts of parts shal dealers erene from everywhere to it. \$485. Sir Tuowan Fanceron .- In there say breeding of contents your district !-Well, very little: there is

re such thing as a pony stallies in the county that I 3486. In the county adapted to the breeding of posiest—I should think it would, but the question is

if they would be able to command a seize. I don't think they would got for them anything that would recognizate them. \$427. You have had no experience of the breeding

\$488. How did you find they paid! - I used a great more myself and in that way found it paid. I seld

me and get £30 or £30 for them. 2483. What were those by to Most I bred from was a Popester, a pony of Lord Eurishillen's.

3190. What was be, a pony !—Yes, a Powester, they

3451. Have you any experience of the Barb or 3492. They have never been tried up with you?-They have ; when that Forceter pony died Leed Emris-

call that a pony.

killen get an Arab, but I don't know much shout the 3463. Have you ever seen any of his produce !-- I have seen some but I don't know that I can from say opinion; they were very young when I now them. I this. Mr. Warnens.—I think you said your only en-

serience of Heckmeys was with "Boyal Gonge" !-3410. You would not call him a good specimen of a borns of any kind !-- He was more of a pony : he was not 15 hands 3416. And the rears you head this good house from

before you ercoved with Royal Groups, and when she proinced a favourable result you creased her with a trush better theroughbeed !-- It was slways from a thoroughbed that I keed before. 3497. I mean the thoroughboud you bred from before was a good deal higger than "Royal George"?

- Yes, he was 16 hands at least \$498. And with a big theroughlund you produced a good result !-- Yes. 3499. And with a small Hackney she produced a

had result !-- That is all I can nav. \$500. In your recommendation on to what slaw of kerns would be best-most required-what slope, you say, "I like a small corresct thoroughbred with bess and rather under 16 hands, saything over 15.2 "!

-With fair action. 3501. Would it not be better for these formers to breed harmens howen than to attempt to breed hunters ?

-I think it would 1012. A horse with good action does sell well prorrally !-It is the one thing that does sell a bosse

\$500. Clones is one of the chief mouthly fairs in the North of Ireland !- Next to Moy fair, it is the best monthly fair in Ireland. I don't know my town where there are twelve fairs such as Clones and Moy. There are greater fairs, of course you understand me, but as a monthly fair I think the only one to exceed

it is May. 2004. Is not there close to Clones, in the county Fernangh, a considerable district where homes are

troit—Fermanagh is a great bosse breeding county, 2000. Especially that round the town of Clones !--

\$506. There are a good many horses tred in your Sitrict, although not actually in the county !- There are. Permanagh is decidedly a house-breeding county. 3507. And your experience or breeding is that a too

thout exception, has been unnoundress.

2508. Therefore in trying to improve the stock of Hair-Forest small farmers' muzes, the stallions should not be too 3509. Do you think a thoroughbend home could be found sustable to all the mores in your district i-Well, I suppose net ; seem, I think, had better have their throns out then been from, for the good of the com-

without exception, has been uncoundness.

3510. If a man ment keep a mare and looking upon broading as a source of profit, are there several manus that ought not to be ground with a thoroughtend borso, mares that are too weedy and light !-- I don't think they ought to be crossed with coyching

3011. You would stop there altogether from breeding f-I would 3513. So far as improving the breeding of horses in errors and, do you think that is practicable 5-No, of

3518. You said a better class of home was coming from the Castleldsyney and Carrickmacross districtfrom that end of the county !-Yes.

3514. You don't attribute that to the size of the farmed - Longe farmers are able to get a better class of horse by having large flavor. \$515. Where do you o'ftoke to!-Just about Carrick-

Carrickmarross, that district where there are large 3516. But is it not a fact that the forms about

Closes are much larger, as a rule, than about Costo-Unymay and Corrichmences, except just about that district!—That is the only district from which the men erms in to make my of the Royal Dablia besisty's grant; that is the only means I have of knowing.

3317. Do you think any grant made through the
Royal Dublin Society or other society could be expended through the local reciety such as Clones!

—But they do it by a local committee. I don't see

what else is wented; the Royal Dablin Seciety work by local committee 8518. Don't the Royal Dublic Society name their own committee !--Weil, I can only tell you in my own case; they saled me would I set as chairman, and

to special my own consultace 3510. You think that is a better way than solving the people to appoint a committee b-That I don't know.
3593. You said you shought the people were competent to form an opinion as to what they wanted for

3521. At revenue they have no voice in the selection of the openition !- No. 3522. CHAIRMAN.—Is there anything you would like to pay to the Commission I-I have born

a question saled of the witnesse about registering half-heed horses; if there he a horse not a thorough such a herse as that might be registered, but not unless he had proved hiseast, because if he be not a clear bred horse a priors you cannot tell what sort of stock he will produce; I think there is an ideal horse which

might not be a thoroughbrod that might be registered case he has proved himself. 3523 That is approved of by some competent authority !- By the feels he has got; by his produce

524. But semobody must judge of that 1—The only proof to rely on in his produce; if he he not a clean bred one, and if it was precited to combine the two systems of the Royal Dukhin Society I know of no better thing for the country—nuncly, encouraging the fermers to keep a good mare, and helping them also in the service of a good horse. First they tried merely paying for the survice of the horse; they abandoned that and gave all the money in prizes to the manes. If it were practicable to combine something of both, so far as I can observe, I think it would

he the best method.

horse that had proved himself a valuable size of a 2540. And if you wanted a charge from the

COMMISSION ON HORSE BREEDING. 116 nothing but a pure book and an exceptional case of

your county are fit to breed from at all with a saisable Mr. A. N. thoroughbred horse -I do Unite-Fonder 3520. Do you think that the ones that are not fit to be jest to a thoroughbred are not fit to be put to a boom of say nort or kind !- I do. I think it is not

Sec. 20, 1404

M Mahon.

worth the risk 8527. Mr. WRENCH .- Then you think you would go on crossing their produce with a thoroughbrod beens !- I should think so,

3525. Mr. La Topone -Do you think mores in

3328. And you don't think the result in time would he a let of weeds !--Well, but we have assumed 3529. But you say that all of the mares that ought to he leed from are lit to be created with a thorough-

beed horse !- But then up to crossing again I really know nothing. S530. You don't protend to my you would go on creating with thoroughbord herses?-I muself have

continued with a thoroughland, that is one got by a theroughbred; then I have sent that again to a I found that always friely satisfactheecoghbred.

2031. You found you gut good prices for these animals 1-Yes. 2032. Then, of counc, your mores are perhaps exceptionally good, better than the formers have in the district !- Ob, they are, of course they are

better. 3533. You think you could go on breeding from thereaghted beros wiskest bringing in any stronger strain i-I would perfer it. I would rather do it

3534. And you think the produce would be as mitable to work on the farms, and do the work of the needle when they are required !- Ch, if you want farming I would go to the Clyskeshile.

3535. No, but it is not necessary on the small farms

that you would of always to have a horse of the same strength as the Civiendale, in it !- No, they want the horse to go to the market and for general nur-

3536. Or for Hglit earts !- Yes. 3137. But you think a horse with two or three crosses of thoroughbrod blood in bisa would be a suitshie heres for that purpose?—I have seen them do very well with these. Si38. Mr. Cansw.-If you desired a change you would go to the half-bred horse that you would register !—I would have no objection to one that had 3539. The threeogbbred and the registered balf

-ne, I never had any Chydesdales or Arabs.

have got three sires at present at bette in my place.

Printed image digitised by the University of Southempton Library Digitisation Unit

thoroughbred with these good mores you have you would prefer to send there to a half-head that was registered, when he ked shown by his produce he was a good one !- You, I should place him then in the estrony of a thoughteed for usa. 2541 Mr. Wennich.-Would you register say have of a pure breed except a thoroughtendiknew nothing about any other. 3542. In answer to the query " What breed of

stallion do you counider most suitable to mate with the marce in your district," Mr. Forester says, " Any small connect stallion with bone and action out of some pure brood, thoroughbred, Civiewisis, Circulard or Hackney" !-- Any pure hered I would register Hackney " --- any pove arees I would regular.

3543 You register any of those three horses that
you have named three if they were seizable t--

would 2544. Onaraway - Then is quite different to what I understood you to say before. I should like to know what your column is, because I asked you sease time ago a question whether to make the murain your district more suitable to be crossed with a thorough bred sire you thought the introduction of Circleshie or Hastmey blood would be of service. I understood you to any you did not think so. Now I guther from this you approve of the Clydesdule and Hackney, provided they were pure head !-- Clydesdale I always

reserved of for farm purposes, and often bred four 3546. The distinction is you do not approve of them for hunters and corriage horses, but you do approve of them for farms 1-Or even for femmes to get a price. The small farmer when he breeds waste to have something to nell in the first instance, and they do not sell so well

5546. Mr. Waxnen - What do not sell so well!-The produce of the Chydrofinia.

2547. CHARKAR.—May I put it this way that as nagarels breeding heaters or high class corriags horses you would consider that the introduction of Cirdendule or Harkney tôced, even from a pure irrel

Clyclosinis or Haskney stallion, would be of no si-vantage !—That is my opinion. 3548. But as regards houses for farming perpents and a certain class of earriege horse that you think the introduction of that blood, provided the mre west pure bred, would be an advantage !—It might be, but pure bred, would be an arrantage - as reger I have no experience of the Heckney beyond what I have stated, and of the Clydendals, except for farm bred you would so to !- I sm in favour of registering work, for which I think it is very valuation

Mr. Tromas M'Mauon, examined. 3549. Charman. — You live in the county Monoglan, I think t—You, siz. 3550. What part of the county?—Cardebhyper. 3561. What are they !- Thuroughbred. 3502. All thoroughbord ! Yes. I had a Hackney

short twenty years ago and he died with use, I had 3551. Are you occupied in farming !-A little bit, I have seven forms of isod round Conticharmer. him three years. 3513. Have you ever had a Hackney since !- Yet. 3552. You breed house L.-A listly.

I went to the London show and I bought a Hacksey there, a three-year-old, I gave £450 for him, I took 3553. Do rou deal in houses 1-Yes. 3554. And you know the whole county pretty wall him home to keep him for my own purposes; he was a nice Hackney 15.5 hands, made like a kunier, god as regards horse-breeding !--Oh, yes, I know several countries-I know Ireland, England, and America. neck and chonlete, could carry you with hounds I

3555. Do you keep a stallion yourself to Yes, sir. think if he could gallon enough 3564. What became of him !-- I sold him the day I landed home from London to an American with £50 pt. 3157. Oh, you have got several t-Yes, had acreeal. 3568. How many have you got now or how many have you had altogether i—I could not tell you I had of profit, I thought a ready minspence was better than 3569. Of all kinds of breeds 1—All kinds of breeds

waiting for a shiffing, and so I took it, and I was very sorry for it after, I bought him purposely to keep An a size 3165. What is the size of the forces in your neigh 3500. How many have you got now 1-I have some racing now that I am going to keep as sires, but I bourhood, small or larget-There are some of them small and some not very large, I think I have the largest form I know of savaelf for a poor mea-

Printed mane dantised by the University of Southampton Library Digitisation Unit

next What sheet of horses are brol- surface bornes, hunters, or what!-I think there are more property homes hered about there except a few I breed royself sself. 3567. What kind of house does the firmer go in or producing I-Really, I could not answer the comtion for I think all the former wants is a contry for a halfpergry, or semething chests, and to got a glass

of whakes when they are bringing the sears into the place, they don't study their interests at all only to ove conething thesp. As a rule the femore round where I live would just give at much for a codibile or they would for a saluge. \$548. What kind of searce do they breed from !--

I could not tell you the redirects of them \$558a. No. I don't approse you could, but you might

are presty fully; and if they got a good even they would are presty his ; and it keep got a good cross they wents breed a very merful horse; if they were crossed with a good thereunished stallow, in the fast place, with short legs, and plenty of bone, and west straight in his action, and stepped a little high, not a very hig and action, and steeped a fittle righ, not a very all or leggy thereseptived station, only a horse obesi 15.3, with plenty of tens, good shoulders, and tail on the ten of his land. Then there is the Heckery, if you want to haved from a Hackney with this class of more, you must have a Hadrony with good nede and

shrubies, good know, legs and feet, a short back, and the soil on the top of his back, with action; if you put that upon a half-bred more in my country. I will concented you will loved a cond self-ser hopes. I had a form more of mine I next her to a Hackney at Newtownlimanady, and I get a three-year-old, and it is an nector a thing as ever I now, out of one of my farm moves \$550. Have you sold my produce of your mores by

the Hackney size 5-Ob, yes, I did, when I had it, but it is 10 or 20 years ago, I could not tell yer so Great Gon : I kept him three years, and I bought some of his produce.

2070. Have you any knewledge or any experience of the produce of the Congested Districts Bossel's etallions !-Well, it is a thing I den't take much interest in, I support tell you about that; I don't so round about the formers to see what they have

po1 5371. You key and sell hower, don't you !---Yes : consistally, when I am at home; but my son has pensimed me off; be deer not think I mu fit to buy may hover now; I am only a servant.

3572. What is your opinion of the half-bred stolliens I., I cannot opener the constitue ! I never

2573. Yen have no colulor as to whother a halfbed gire is better or worse than a theroughfied one !-- I cannot anywer the counties, bookse I never had one; and when I had not I could not answer

by looreny. 3574. You have no epinion about anything unless you have had personal experience of it !- Yes, and

to see the look of it; to see the sire or mase that is half-beel. I often beed some very cool hunters out of half-beed mures that were got by thoroughbred out of half-been mares that were got by the degraters steen; and I got three or fear very good ones that were got by a Hackensy stallien, Great Gun, 17 or 18 years ago, and I sold them at large prices, but the trade was better in England at that time than it is now; because, in my opinion, a colt or any-thing you take to market to sell, if it has not

sation he is just like a bell without e slaquer; it is very little use.

1973. Have you got a horse named Mershall!—

1 had him; he is dead, which I am very sorry for-1576. Was he in the Sink Book!—He was get

by General Peel : I bought him of Marshall Brook, Tarporley, Cheshire 5577. What breed of stallion do you consider the best calculated to province high-class harness barren

3578. What about a horness bosso i-1 sold 26 have beere: I sent them to England but Monday , I sold there test Thursday week; I sold the 26 to one man at \$10 a perce, and there was fire out of the lot got by Hankneys. I gave the continuant the 3579. What um I to dednoe from that as your

selving t-I am only telling you what it is; my son told the contleman what they were got by, he asked the breeding of averyone. 3580. I am asking you which you prefer, if you

have not got any opinion you have only to say so. I was saking you whether you would prefer a Hackney or a thorospherd or say other size to produce high-cless carriage horses !—If you have a right strong more and her well bred, the will get the best carriage home with a thoroughbred home, but if you have a good mare with good shoulders and the eire 18.3 of a Hockney, he will set as good a one on the thoroughbrod, and, in some instances, a better one, for they

will have better action, and they are not so hig, and then selection in Landon that used to her him beenes they all prefer to get these new from 18.3 to . 5561. Action has a large effect upon the price, has

is the hanter 3582. I on talking of the harmon home; do you think netion is more likely to be obtained from a Hademy sire than any other !- I am sure the Haskney sire will precise better setten if he gon a suitable mare and the Hackney sire to be a groce-aired one with good shealders and heat and nork, and picuty of bone, and

shore everything to go well off his hind legs.

1013. What show of a horse do you think it pays best to breed in your locality !-- I just sold a yearing for £400 last week a thoroughind; and if you want to ask use, I prefer nothing but a thousughbend. 3584. You, that may rain yourself1-That roits

welf, but when you saked me what was my opinion I have given it to you. \$585. But you don't mean the Commission to understoral that was thank the best thing the formers as your

No, the farmers caused afford it; they have not the land to losen them on mor the stability to year these 5585. I think you said you had some experience in America !- Yes, a little ; I was there seven times, took horses out these and took others hask.

3587. Have you sold many lorges to America !--1388. And imported betwee from America's—Yes.
I was given £2,000 for a Hankney four-year-old, called "The Star of Napal," that I took out to

America L. Yes, sir.

SAGO. What do they use them for !- For breeding purposes, if they are stallious

5591. And you have imported bosses from America! -Oil, yes. 5505. What kind of horses t-I bought them from #50 to #110 a vices. 5593. And what became of them 1—Some of them

died on the sea coming home, and some of them died at bure, and some of them I soid at a very good price. I soid one the other day at Rughy that I gave 545 for in America, and it made 515; and I sold one there I gave 250 for, and it made 5130; so I am pust telling

you a little bit about my trada. America !-Liverpool; I braght them in Chicago. want to tell you where I bought them; and them I took them from Chicago to New York and shipped there by the Widte Star Conneger. Acr 30, 1859 Mr. Thomas Mrklahon.

yes, sur ; I am copable, if I see one worth the money, 8595. It has been mentioned in evidence by a good many witnesses that they think the importation of American logses has knocked down rotors a good deal ;

is that your oninion !- That is my opinion exactly, and I often my 700 horses of a day in Chicago for sals, and I would not pick five out of the 700 to pay the expenses of taking them heree.

district is improving or getting worse year after reur! -Well, I think there is a difference in them; they were a great deal better twenty-five or thirty your are then they are now. I am sure. 35fts. How do you account for their falling off !-If a farmer in my country has a more three years old

that would make from £20 to £30 be will sell her, if he has a mare that he cannot sell he will put her to get and broad from her house he coment sell her. 3599 Did they not always do that I No years see they did not become the farmers were pretty well eef; they weald keep a good brood mare and breed

from her, but now they events saford is, the small farmers, I am not talking of large farmers. 3400. Do you think snything on he done to stop that I-Oh, wes. I think a great deal can be done to

ston that and encourage the formers in this country \$601. In what way do you think they could be helped!-In the first place to tax every horse that names out of America to be inseled in Europe, the same as every horse that comes from ya and everything else that course from here to America we have to poy-daty on; I had to yoy so much as farty per cost, for taking larger there. That is the first way you would encourage the fare rm to make mapor heard other gentlemen suggested to get them branded, that would not do a largereth for the nort of Americane are an sout for their work, retaining an abless. Severa years ago I paid £12 a leaves for these coming from New York to Liverpool, and this year I paid £31 bit in a better ship, and I will tell you what we had, we had \$31 bernes, \$90 fat buffelon alive. 2,100 sheep and 19,000 tons of dood ment in the "Gorgie."
3107. Then you would reasoneed that these house

should have a duty put upon them 1-Yes, a duty on them and on saids. Seven years ago the charge was £4 12s 6d, for a live inflect, and this time it was Mr. If we take carriage horses or invoters to America we have to pay forty per cent on them when they go there, and there is no way at all to encourage farmers in England or Ireland only to make the American horses pay dety as we have to way there are everything except andmals for benefities pay there on everytheir it go froe if we can show three

3603. Supposing that cappet he done can we suggest any other way in which the breed of homes can be improved 1-There is no way the breed of house can be much better improved then to give house can be much better improved than to give every farmer the price of a motol mare and buy bey and give her to him and make him pay to much a year until she is pad for; selling her to him without

year until she is paid for ; selling her to min without the money for five years and to pay so much a year until she was paid for.

5004. On the instalment aystem!—Yes, the Jew

eyeterr 2505. Where would the meres some from 1-You can hur pleuty of them in England after the hunting mases, broken down mares, in England or Ireland too, mares with good short legs, 15.3, good bons, suppositing

they are broken down in their tendons or get lause he lard work this is the right class of mare for a farmer 2605. Do you suggest any way by which the furniers can be induced to keep their less meres in the country f... There are plenty of mores, I say, artillery manus. and mares I know in plenty of regiments there are slenty of them would do a farmer will for hard work on the farm and to breed a very cool

2007. But asppraing they did breed a good feel you say the tarmers are much more inclined now then they used to be to sell their best mures and kron the worst ones, how would you prevent that in The farmers are pressed so much, they are putting such a such thing as that, they have their idle to meet and they must sell what will got them the money, that is what I have them tolking. I often remain them to becow money and pay interest on the money and keep their good mores, that they never could make

money out of home-leveling unless they had good DIST DEP Side. Do yen think mything can be done by offering proget - That would be very road, and I think it han done a great deal of good, but still the poor says.

what prim he gets connect induce him to keep what he can sell for from £25 to £50 and he has the menor to per. 3409. Sir T. Esneenz.—You mentioned about the cheappean of the nates from America, yea mentioned that you can bring a house over for £3 i—That is what

3610. Have you any idea how the American votes commune with the Irish rollway rates 1-Oh, yes, every way, you can get five tons of staff from New York to Liverpool for five skillings a but and you will pay fourness skillings a ten from Liverpool to Dundalk. 3611. Then you amaider that the Irish rullney vates are excessive !-- I am telking of the steambout now, I beought thirty horses searly 1,100 miles in one curvious for 250 dellars. £50, and I suppose they

would charge about five times that much in England. 3612. Then as to the quality of American houses yers say you have had a cond deal of experience in American horses, you have heaght them and sold them over been built have get some of them yet and I could ard you a couple or three very good ones toe.

3613. Do you find taking them generally they see as good as the Irish house I-I don't any se, they see

not, but for some purposes they are very good, but they are not an good as the Iriah horses at all. 3614. For what purposes are they good-For

herzens and going quick.

3415. That is the American positor 1...I deal will them the Asseriesz teetter at all less the American

3616. Then you distinguish between the human home and the trotter 1.—They are two different classes. 3617. And you have no experience of the America trotter! - I have, and I have one of them now, if you come down I will lay a wager with you and trot you for some money if you like, but he has as good notion as any harrons horse in Dablis, but if you loose his head and let him so he will touch the ground, and as bearing set tons go se will total the groups, and if you get hold of him by the bend and drive him shang he will step out. If you want a horse to step you must get held of him by the head and not let him go

slithering slong.

3618. For harmon purposes you think the Ameri enn horses are as good as the Irish !- I may not, they are not worth as much money, not but I tel 1,630 dollars for a barross beere got by a Hackney stalling, and he was bought by a milliopaire in Chicago, he

went for 1,650 dellars, that was £350 3619. And I think you also said that you would not approve of branching American houses, you thought that would do no good to the home purchaser! —I think not, I don't think anything you could do with him, beend him or not, it would not rise him or fall him because they are only for a certain class. Out of 700 horses that you will see in Chicago in a day perhaps you would not lany ten; perhaps, one day you might tright hay ten and you might be a week there never knew any of those to be done that with, 3621. Do you think if they were branded that would be prevented fi-I don't know, I cannot answer the coestion, everyone would know then that they

arec Avierana.

3523. Mr. Clarw.—You spoke of breeding from a
Hackney?—Yes, sir.

3623. The saure that you would mate with a Hackney would require to be a better share and make han the one you would note with a thoroughbred !-Is would with heater made and shoulders and wall sithed and straight on her less with planty of hone. 3624. So far as you are concerned, you would prefer

the shoroughkerd produce to the Hackory produce !-peefor a thoroughbood has so for getting hunters, for a Hackney, in my orinten, won't get any hunter but a Huckney, if he gets mated with a good sort of more, will get a fine-going carriage horse 3025. It is more deficult to mate with the Hackney than with a thoroughbrod !-- Thore are plenty of theroughteods that if you mate them with Irish mayor you will got nothing but would. I keep three thorough-land stallings of passens, and I would see let them

gives year borse a bad name, they are bringing westones
of mares there, and I would rather give them £5 or £10 and let them go somowhere else; in fact, I would not let them have the service of the horse.

2026. Mr. La Teurone.—You my you have had no net 3627. I suppose you have hought hence that were

by half-heal hereon !- Indeed I did, and sold them for hunters at hig prices; I heard it after.

3628. Yes: have no particular elijotion to horses
get by hilf-bred harses!—Not the beast. 3629. Don't you think a stallies that was got by a thoroughtent been out of a more got by a thoroughbred horse is just as likely to be as good a stallien as

lest not to get resolvence; we don't want any stellions in this country to get receiverer, we only want them to get hunters, or ecopping heres with Menty of hore.

3130. Do you agree with Menta East and Witnbush, for instance, who say/that the less upstanding carriage between me get by a thoroughbred home i-1 deressy horse in there is got by thoroughbood hor

3031. You are aware that East and Windmah, who are corriage home dealers, have expressed a strong erizion contrary to the adventage of introducir Harloneva t.- I know East and the whole hered of then there fifty your ; many men have many minds ; I sell there horses.

3132. You are aware they have expressed that critish 1... I am not arrays of surthing. I did not see t in the names, or look at it; my chief noint is to buy cheap and sell dear.

3633. Would you arree with such su etinien !-- I would, they have great experience, because every been they buy from me they must have the perfigree and they have a better right to know then any body, rice less I dee's bross what they said as assessful.

\$155. I don't want to know!-I will put it to writing, but I won't make it multie; I will put in writing what I got for them, and I will not the two 3006. You sold twenty-six harmen herses, at an

rate, at an average price of £90, thut was all round?

-All round; some of them perhaps as high as £160, some at £65 to £70, had the round number was £90.

a Hitea

3637. Out of the twenty-six, five were get by Hack-neys !—Yes, and they get Hackney poligress. 3638. The other ones were get by thoroughbred Mr. Thomas barnes !- Everyone of them by thoroughtred barnes 3630. So that there were five horses by thoroughbreak to one got by the Hackney !- Decidedly.

3640. And these were all harness beenes!-They tee all harness horses, but most likely I will not some of them back wat that will so contoring in horsess. and I will make hunters of them.

3641. You say there are a los of mores in the

amounty onite assumbable to put to the outrary but weeks t-My minion is, that if the thorough lend have in 15-2 to 15-3, with electr of bone and short legs, and has good stepping action, they may get it, but usless the beens is that I would think it a

very last unspose to put them to. 3643. Do you find a good brood more is invariably a good-looking snimol !- Yes, but the looks of a many or house is nothing until you tey them 3643. Do you ment to say you can stand not there and say that more will be a good broad more, and her province will be worth £90 as a three year-old ! ... I

would not nothing at all reviews I new her many 3644. But if you my her more 1-Thus I would give you my opinion anan, Don't you think mores Cas you despise to Sett. Don't you think more that you draging to look at loved very good fillies; very clien a big up-standing ours with action and style never produces saything as good as herselft—They must be mated

saything as good as nerself!—They must be mater with the right kind of bress.

3646. You do think you can judge a broad more by her personal appearance !—Yes; and if I know her breeding and new her appearance, this looks she has and the way she stands and walks, and if she gets

Hackney horse.
2047. Have you ever attended any of those shows of the Dublin Society to select mares for prises !-- I 3648. Could you always pick out the mass that had

her |-- I give my opinion, you cannot always do that, and perhaps you along with me; the two of us could not do it. 3049. Do you find at these more shows that the mare that has got first prize is always the most distinguished mars in the country !- Scoutleses a rest

may make a mistake, because many a young lady looks well and after one has gone for a time she term out wrong. Personal appearance is all very well : to have good beenes and legs, there is nothing like it to start to med with a sul notice-section for a harmon becomif they have not that I would not be broading from them only for a lumies.

2130. Mr. Wenness - With recard to those five

that were got by Hackmeys, were they as good as the other twenty-one !- They were not weens; I think they were nearly at an average. Some were Some rease but I think they were worth the average pechage of

£90 a piece \$651. Have you sold any horses in England on the way back from America—any American burses that
you brought to England — Yes, a great many at

Averpool, ruel a great many in England since. 2052. Have you sold only American house in Liverpoor to Means. Each 1-1 are not to answer you that question unless I think proper. Well, when you ask is, I did not list; out of the forty air, he only picked down in March. I thought he should have tought

the whole of them, and instead of that he only sicked the whole of them, and instead of that he only parked eleven; he said he did not like them.

3053. And do you think the fact of dealers being shio to hay the American horse in England preparate them bearing over to Irohard to buy homes i.—Alto-pether. But a good quaching horse is worth more Mr Down M Tabun

money in America than it is in Paris, where I weed to get the best prices. I sould buy a pair of good carriage borses in Loudon, and give a good price for them, and sell them in Chicago, New York, Phile-

bring in these places.

3654. The good horses are deaver in America than

bere !- Yes, but the commoner bornes sold for the working classes are cheen in America. \$455 So shed it is the common house in America that are mining the common borses have 1-They are

ruining the farmers of the country 3450. There is no trade for had housest... The farmers cannot get any price for their houses; where they used to get £30 they are down to £7 or £10 a piece these three years.

\$457. Do you think the trade in karness hoves is as profitable as the trude in hunters !-- No ; if you had the enstoner for the hunter it is a cond deal the bast. \$618. Which is the steadiest trude !-- Of course the largest trade; there are some dealers buy herpess house, and give good prices, and they hardly ever hoy a hunter; the bunting trade is a trade by

2659. Can you always sell a good harness horse !-m, you can. 3450. If he has good action 1—Action is every

thing; there is no use your baying a harness home without action : how them if you can that would ateras high as wild goose oan fly; then you will sell them. 3631. Then you don't think a loves could step too. high for salo !- No, if he goes straight.

3052. You think it is no safe a game for farmers to breed horses with good action as to breed hunters be A former might have seven foals, and he might not have a heater out of the seven, and he might breed another seven and have four protty fair harlike East and Wimbrub, and these men, are going in for a lighter cleas of harnon horses than formerly!ness horses, and he would get a fair price for them

3663. Then it is more cortain although you don't get as big a peice !-- I think for the firmer it is easier for him to breed horness herees then it is to breed hunters; in the first place if you want to broad a banter to go nerous country yes must have good must keep them well and train them well, farmer has a harness horse only half trained he can sell him, but there is no gentleman or dealer that wants to key a knoter if he is not thoroughly breken

out of the server

to ride and with manners 3664. And if you ere a good looking borse in a fair with good action do you ston to faul out how he is beed before you try to buy him !-- I did not core twopenes if he had action and looks to please me how he was bred; I would not bother the man to ook blen because every fire out of ten would give you a perferre that the horse never was bred by at all. 3665. Do you think other dealers follow your custom and buy what they see and like !- I won't answer for any other dealer's eninion but my own. 3016. You yourself would not think of asking how he was brest!...Not if I liked the horse, not oven a

bunter, if I liked the way be walked and cantered, because there is a power of them seld with false pedigrees. 3067. You think that as long as good borses, good beeses to look at, are beed in Iroland, peoplo will come over to buy them, no matter how they are bred !--

No matter how they are bred.

3668. You have heard that some people object to
the introduction of Hackney blood into Ireland; do
you think the more fact of there being a few Hackney stallions in Ireland would prevent people coming over resumes in accessor wome prevent people coming over to buy horses, and giving as big priess for a pool borse at a fair 1—Twenty years ago the best cosching borse that could be found was in Yorkshire, and when they started to introduce these Hackners they all gave up breeding coachers, and turned to the

Hackney breeding,

3659. Why ?-Become they made more money out of it; I hought over 100 Hackneys myself, sires and mores and took these out to America

sarro. What did was find the result of the Harkways in America !- I found that I sold them and got a send uries for them, and got a reedile, and I did not one what they done with them then. In China any kind of a stod berry, if he is got by a Harkney sells for more money than any other class of horse, 3471. And have you formed any opinion as to whother a good Hackney stallion, such as you describe. or a Cleveland Bay, would be a more suitable horse for Ireland, how do you like the Clereland flow t... don't know anything at all about them, I never saw a Clevoland Bay only some years ago, when I was in Yorkshire, and I was very sorry I did not buy him ; Yorkshire, and I was very many a contract toy man, he was a conclude stallice, and the man wanted me to to buy him and I did not; I was very sorry for it, and went lock to low him, but he was then bought

w a dealer, who enstructed him, and sold him to Wimbash for £150 for a carriage horse. 3672. Have you formed any epition who Ireland produces much botter houses than any other country? -I will give you my own comion-we have the six we have the water, and we have the around they are bred on, and my epinion is that for man or home. or beast there is no better place in the world, if they

had only contentegons and acted straightforward, then Ireland, to breed anything.

3472. You think they can beat the world in breeding house t-Yes, or cattle, or oven Christians, if they only conducted thermolves; they breed them with bone and strength, and they can stand more hardship than any other man in the world, unless a niggor. 5074. And I think you said that the big jebmasters

So they told mo; I need to buy bornes for different ople, and I used to buy thom 17 hands high and people, and I used to buy thom it mean man, see 17.3 couch horses, and they say that the correspon that they are building in London and through England, are all on a smaller scale, with lighter springs and lighter wheels, and they like these horses to be and lighter whom, and tony man the state of all under 16, from 15.9.

3675. With good setten?—Oh, must have setton, 3676. I think you said you had said some receives burg ago by a Maximy stalling, Great Gan 1—Yes 3677. Up you know anything about the maces, were

they small mores, or what kind of mores !- I know one very nice little blood more, 15 hands bigh, and the mae paid me £3 for the service of Great Gun, and she bred a little chestout horse, 15.3, with great notion; bo kept biso for a size for two years. bought him when he was 4 off, and gave him £100 for him, and I gos him contested, and sold him the Arril following to a Frenchman to so to Peris; he paid to very well, and he was a very also herse 2078. You got a good price for him 1. He said me

5679. It was stated, I think vesterday, that there wore not many troopers bought north of -Might I sak you where north of the Boyne is; in that the time they call "The Boyne Water," that is, north of Drogheda. I saw teocoars bought in Darry

north of Drogheda. I new tecopren bought in Derry for the Government; I new them bought in Salat-field; I new thom bought in Antrim, Ginne, Ennis-kulies, Bullybay Armagh, Moy, and Lisbann. 3680. And they are still bought in those fairs 1— I have not been very much in the fairs in the North

these twelve months. 3081 But within the last few yourst-Yes, they still come to the North and buy them; I saw this General that is dead about a year ago, General Bavenbill, I saw him several times to the Moy haying marcano, a siw hint several times to the Moy hayvag, troopers, light troopers and artillery houses—and blacks for the Queen's Life Guards.

3682. Then I think, in answer to Mr. La Toucht, you said you had bought vary good hunders gob by half-bred horses I—Yes, by half-bred horses, I found it out after; they turned out to be very good horses 1983. Do you think these half-hred bornes would est animals with as good action as a good Hackney saller !-- No; they won't get as high action or an 5684. They would get better hunters !--Yes : unless seen of these half-bred horses you talk about egald

you are on his back. The Communica adjourned to November 24th.

not, they would not get good barrons bersas.

well and tret straight, and give you a good feel when

EIGHTH DAY ... TUESDAY, NOVEMBER 2479, 1896.

Present .- Mr. Pency La Toucese, (in the Chair), How. H. W. FITEWILLIAM, Sitt T. H. G. ESMONDE, M.P., MR. J. L. CAREW, M.R. COL St. OUINTIN, and Mr. F. S. WRENCH. Mn. HUGH NEVILLE, Secretary,

Mr. ALEXANDER H. SPRODLE, Decrement House, Fintens, examined.

2686. CHAISHAE.-You are a justice of the 5706. Do they breed many horses from Hackney 366. Charman.—You are a justice of the peace, and live in county Tyrone !—You. 3687. You have had considerable experience in

horse-breeding !- You. 3678. What class of horses have you usually heed? Toroughbreds, Hockneys, Skire borses, and Clyde

3489. Have you some thursouthend master of your own!-Yes, I had 3590. You have not any now 1-Not at present. 3591. Have you got thoroughfred Hackney mass !

-Yes : I have at present 2692. Do you keep a stallion t—Yes. 1693. What beesd in the stallion 1—I keps a theroughberd stallion, a Harkney stallion, and a ball

heed stalling 1094. Have you got there all now i-No.
5095. What stallsons have you now i-I have none

1695. You have no stallions at present !-- No. M97. Are you will breeding horses !- You 3100. How many years have you been breeding bones !-- For the last nine years I have been breeding horses seysalf, thoroughbred Hackneys and half-tred

3019. What mares do you put the Hackneys to !-I get the Hasking mares to the Hasking hoese, and put the half-bred mares to a home got by " Coll Moret Palatine"; he was half-beed by "New-senster" by "Touchstone." I not the half-bred marge to birs, and I gut the common pares of the

southry to the Hackney horse.

2700. Do you keep the yeung stock yourself, or do
you sell them t—I generally keep them until they are four or five years old. \$701. And then you sell them t—Yes. \$702. I suppose the produce would be barness burses t—Yes; burness borness generally, and fairly

ennd action 5703. Do the farmers in your county generally sell their borses at four and five years old 5-The Power class sell their younger, as fosts or year olds. 3704. Where do they sell their horses !-- In the local faire.

seen fairs.

3705. And where do they go to do you know!—
They are floright up, some of them by men who feed
them and take these horses to the fairs afterwards. They keep them until they are five years old, and they are teken to the Moy fair 37/6. You mean the local men !-- Yes. 3707. As far as you know do the young horses that are sold by the farmers stey in the same neigh-bearbood until they are four or five years old 5—As a

rule they do.

stalliens in your neighbourhood I ... Ven. 5700. They use them chiefly 1-Yes : at recessed that it so

Royal Doublin Society sent down there-I have yet to see a good one out of them .- I have seen nothing but weeds bred out of them 5711. They are not good horses !-- It may not be the lorse's fault, but as a rule the horses are not good. 5712. Are there any segistered sizes under the Royal Dohlin Society's scheme there!-Yes ; two u/

three 3713. Registered 5-Well, they are supposed to be registered. 3714. Are they advertised as registrated 1—Yes.
3715. Do you know if many liceses are bred in
your country or district for the purpose of long tages.

into hunters !- It is not a hunting district. 3716. I know, but still I reasn are many such horses bred there !- Avyr horses that are lought are generally bright in the Moy and brought up here to Dublin. It is more of a driving class of horse that are reason in the North,

5717. Are there many Hackney stallions in your part of the country!-There is quite a few as the present time there. 3718. Nice horses !-- Yes, fairly good horses.
3719. What size!-- The resellent bornes I know,

Parages, is shout 15.14; Cyres 15.34. The Limnvely Sted Company, I don't know about the size of their horse, but he was a very nice looking horse. There was a bay horse from the county Donoual or Derry, a. very fine Hackney horse.

2720. The ferrors usually use these Hackney

stallions - Yes, they do, they are more suitable to

stations—xee, they do, they use more unitable to them. I may state that I was entirely in favour of thoroughbed herees saysoff. I have been poying particular attention to the breeding of heres for the part twenty or thirty years, and I was always in favour of thoroughbred horses. I breight thoroughhand stallings and tried the wave heat I sould to bread them in the North of Ireland, but I found the climate of the North of Ireland was too cold and wat for balf-bred feals, they are tender and cannot stand the cold. As a rule they are not suitable for farming purposes; our factors are rather small there. again the Clyde bores, he is too beavy and too beg to anot the poorer class of ferners, and the Hackney is what you might term the "go between," be is better suited for the class of mare they have there

3731. Have you any experience of what are called

half-head give lurges that are not by a thorogophyred

No. 24 122

5710. They do not breed many hunters there !-

They tried to breed them, but the class of houses the

Printed image distaised by the University of Southamoton Library Directionton Unit Printed impre distinct by the University of Southernston Library Distingtion Lind

How so, 1800. horne !-- Yes, I bread a half-head horse which stands norse: - x es, 1 bond a half-tred norse which stands now at Derry. I do not care for breeding from a halfhand unless one grows that is a gross from a Hackney horse and a thoroughbred mare—a stallion from that

I consider a carried good borse to cross the country 3722. But you would not approve of a cross between a thoroughband horse and a mare got by a thoroughbeed herset-No, that is unless I was quite satisfied

of the mare had a stain of Clyde or common breeding in her. As a rule when they are crossed out the minute you begin to cross again, you throw up curbs, spavins,

5723. Have you any experience of a stallion g a thoroughbred horse out of a Hackney mare !--Well. I have not. I cannot speak as to that

You think it would make a useful size!-I are meaking of Hackney berses had from theroughtred mores and a Hackney bosse. 3725. Have you any experience of such a stallion

t by a Hackney horse out of a thorough beed mare !got by a Hatkinsky sormood on a consequent That is whet I am speaking about, 3720. You know of one I—Yes, I do. 3727. You think he is a good sire!—My experience

of that heres and of the Hackney horses in the country to this ... I have not seen 3 per cent, of foals bred from Harkney horses of any description, that is of good thoroughbrod Hackney horse and a half-bred mars, I have not seen 3 per cent of the feels with any unsound ness whatever; and beyond all doubt. I am not afraid

of contradiction to say it, that Thave seen bally biem-isted mares put to Hackney borses, and their fools came out perfectly sound. 3728. You do not consider that the Royal Dublin Society's scheme works well in your district!—I do not. But I do not blame the Royal Dublin Society, The fixing it at £150 is not for the benefit of these the horses are sent out for at all. If the valention you not at £20 then it would benefit the noor man. but now on the contrary you are benefiting the man The value of the form who is quite independent.

now must be not to exceed £150. 5729. You consider that to be too high !-- You, the too bish. 37.20a. The smaller furners have no chance or a

bad chance against the hig man i-They have no chance at all 3730. Do many of the small farmers besed horses? -Yes, a very large unmber ds. 3731. You do not know as a matter of fact what the registered sires are in your district !—I do not know the names. I know the burses. There is a hoese from Fernanagh—the owner is Mr. Mitchell—

horse comes from Augher-a hungu horse, but I do not think very much of him. But in fact we have not use coast or ments become in my district. 3752. What would you suggest as the best means of getting a better class of house in your district or of improving the breed of the horses L. Well, as I said before, the offspring from the thoroughbred borse and the class of mares that are in the district in which I reside are of no value whatever to the majority of the

small farmers for farming ; their land is heavy and their farms are small. The Civionials been's of their farms are small. The Cipsennae brees co-spring is too big, the farmers consider; and he would require too much feeding, and he is too self to stand out in the winter. The Hastney horse is a hardy boses, which I know from experience by having the foal of the Hackney, of the thoroughbrod, and of the final of the Hackney, of the thoroughired, and of the Civila and seeing them running together. The Hackney bores meets the purposes of the poor farmer, and he is a horse he can take to fair and sall, and if he cannot sell him to one he can to exother 3733. And I take it you consider the test means of improving the horse in your district will be the use of the Hackney stallion !--By all means, and then

grow ad fliw test severe to seals a swall list nor ceeding from. Have you any experience as to the imports. tion of American burses in the North !-- Yes, I have

seen a great many of them, and I have great seperience of American horses, and I consider him very unsuitable for Ireland—he is too long in the back, too long in the legs, and too slept at the vibe sad tee wide at his kidneys.

3735. Are they southered about your county to Orelin a from 3736. They are bought in Belfast I-Yes, and

brought up.

STOT, Have you any suggestion you would like to make as to those imported bornes load think that as to all American kovers-in my opinion we should take a leaf out of the American book we should brand the horses coming in from America, and by all means put a duty on thorn. I should also slink to bulls, rams, and pigs, and everything clss, thereshold be a licence for geoping them, and they should pass

an examination. The majority of the power farmer have not the means to pay for a good horse, and there breed from inferior horses, leaving a very last class of animals in the country.

8735 Mr. Cantw.—You say, Mr. Sproule, that Hackners are the best bread for your district !- Is

my opinion they are. y openion they are.
3739. And that is only for barness haves 1—for farming and harmon horses.

3740. Nothing more 1—Yes, I think you can get fairly good hunting borses from them. have seen some fairly good hunters from a thorough-

tred mare and a Mackney stallion, generally a good short-backed horse. 3742. Can you give us any idea of the price obtained for the Harkway produce in different fairs? -They are different, and range from £45 to £15. 3745. At what age !- At five years old.

3744. Can farmers in your district keep them to long 1—The poorer farmers cannot. 3745. At what ago would they he obliged to sell thom f.-Well, from foals. I can only speak I suppose

from what I have seen, 3746. Yes, your own experience!-I have seen scens sell from £8 to £15 coming off very poor mares

in my district. 5747. Where would they on to I... They are bought up by the bigger farmers. \$748. Who feed them and sell them as five-year

philat Ves you raid that the 3749. And you find, I think, you said that the produce of thoroughly cal and half-legd in rather soft a fairly good home ton a shortest home. There is a and too delinate for your climate !-- I have tried then

and too delicate for your climate to a lare true them myself. I have an island on Lough Erro, and I was breaking extensively, and I want in experimenting in breaking horses long before I thought of any Ommission, and I was opposed estephticly to Hashroy's horses, but I was advised to tay them, and I put the colts on this island, and they all, during the screen, did fairly well; I had half-breds, Hackneys, and pure thoroughbreds, and some Chydesdales on this island I found, as to the half-bred foals and young house, at the latter part of December, I had to take them in and house them. The Clydealada colts, I had to take there all in in March; they could not stand out at all They all got hay on the grass, and the Hackneys kept all the winter, and were in better confirm arreally than the colts turned out of the stables after feeding them, and that was the first thing turned me in Hackney horses. I consider them hardier horses, and

esa stand more cold. 3750. Then you disapprove of thoroughleeds matter with half-breds |- | disapprove of a thoroughbred mating with our class of mares 375). You do not think your class of mares should

mate with thoroughbrods !-- I do not ; but I am were feed of the thoroughbred horse. 1755 How would you improve these mares !-- By

coming with a Heckney borse.

SIGI. The Hackney would give bone and substan sad then cross that produce with a thoroughbred in time you might; but it will take yours to remedy It never will be done by the thoroughbred some 2724. You do not consider the Royal Dublin Society agree good ones 1. Well, they have been a complete follow in our district. When the farmers came there

-it their reason before the Committee appointed to what the mares they are nothing but hig fat mares. and, with no fault to the Committee, it appears to me that held hides a great many blemustes, the poor furner suta no chance whatever. I have experience evenif in breeding and knoping stallien horses, and I went out and saw the class of mores these facuers and not only saw the foals from my own bosse. bet I now the foals coming in at foot of the mares when they were coming in to be served by my heren.

I find that the farmers have some excellent and good hitle mares, but they are not up to size, and do not have beef enough to pass the Committee. 5755. You think the Committee reject them because they have not beef enough !- Because they are

not big enough STEL Boy if they were his enemch they would be a good class of more to breed from 1—Yes; and some of these little mares breed fine his foals.

3757. Col. Sr. Quartes .- I should like to know if. in the course of your experience with the mixed breed of Haskneys, have you known the Hackneys put to big poworful mares to produce weighty draught horset—As a rule, if I were keeping a Hashcory stallion to breed with in the country, I would relect one with as light bone as possible, because the minute you cross him my experience is they become strong and heavy in the lone, and if you keep a very based

horse you will get very heavy bone stock afterwards.

3750. In fact, they throw heavier stock than they arn thomosphore i... Yea, that is why I say I would beend between Hackney sires and thoroughbred mere, and you have blood and strength combined.

5759. Do you find any of these mixed breeds run into that class of horse you are speaking of-the Clydendalo; you say it gots too big a horse—is it a weighty good horse, with activity —The Clydendale, horse-is it a

weighty good notes, with sourcey - who trydectors, as a rule, has very good setten, but he is not what was world call a reaching. 5760. He is a weighty home!-For a bur farm oothing could be better than a Civdesdale; I keen

ST61. Mr. Warners.-I think you said you had a good deal of experience of breeding from theremalired harnes t ... Vas. 5762. Which produce sold the best, the produce out of your mares by the thosoughbred horse or the

produce out of the mares by the Hackney been !- I got a higher price for the produce of some of my mores by thoroughbred borses.

3763. What did you sell those for !-- I got as high

\$764. We o your mares of the same case as the general mars, of the country t... They were not

5765. They were of a better class of mares !-- They \$766. But you are quite of opinion that the theoughbred is not the right cross for the mares in

your district !- Not in my district \$767. And they broad shortly there for harness, do they 1.—Chiefly for harvons and farming purposes. 5768. What ago the chief fairs about you where

horses are sold !- Do you mean local fairs \$749. No where most house are sold !- Well. oy. \$770. They go up from your district to the May \$--

Ob, 704.

S171. I think you said that you did not like broad- No. 14, 1801. fing from a half-bred horse i.- I would not care for a Mr. Alexader horse heed between a thoroughbred and a Clyde, or H. Smooth. brod between a thoroughlined and one of these

\$772. But between a thoroughteed and one of the to been from a borne like that i-No. I would not world have more blood on both sides and the same thing if you bred from a pare-boad Hasicrey horse and a thoroughbred mare, or a purchired thorough bred hove and a Hackney mare, or a nurshred Clyle and a throughhood home. As soon as wen throw up

mongrel breeding, you are very liable to throw up the bereditary diseases that exist in horses.

\$773. You are aware that at present only thoroughbred horses are registered under the Dublin Society's 5776. Would you be in favour of registering any other barrest-I would, I would be atroughy in favour of registering the house I say, that is the horses get from a Hackney men and a thoroughbred

house or a thoroughbred born and a Hackney more I would be strongly in favour of recistoring them. 3778. Would you register pure Hackneys!—I would register all pure tired Hackneys and all half-tred of that breading 3776. What about the registry of pure bred Clydes-

dale burses !-- I would, by all means 3717. In fact you would register all chases of mure bred horses in the district!-Decadedly I would, and not only register them but have then passed by an independent veterinary surgeon, a surgeon out of the district who sid not know the parties that owned the borse, I don't meen to say say partiably would be shown, but it would give more confidence to the public in

5778. You think it would give more confidence if the vetermary corminates required were obtained from a veterinary surgeon sont down specially !- I believe

\$779. And you think that the breeders in your dustrict, the small farmers, are capable of forming an position for the consives as to what serious suit tister best?-I think they see. As a general thing the North of Ireland men are protty sharp and shrewd man in bronding horses.

3780. If there were any public funds placed at their disposal for improving borses how would you take the opinion of the breeders in your district !den't preferenced the question as you put it to me. I dee's understand the question as you put it to me. 5781. Supposing there were public funds for the purchase of becam you describe, how would you take the opinion of the breaders in your district as to

what horses they would wish sent down, you have not considered that !-- I have not. 5782. There is no way of taking the opinion at the spirion of the peaple, once you put the horses in the market you will have no trouble in gesting the opinion.

3783. You think the best way would be to send fown a horse and test the origion that way !-- I believe if there is to be any improvement made by horses coming into the district they must not be house owned by private parties, they must be owned by the Government or the Royal Dublin Society

by the Government or the Royal Dunin Somery themselves sent down independent of any party, and I think if that is done it would be far obeanar in the and then the way it is managed at present.

3784. And you think it would be much the most

ortain way of testing the opinion in a new section way of testing the opinion in a m quite satisfied it will be more certain, I know for a fact that a large percentage of maces that have been shown a large percentage of mores unes have been shown there for the purpose of breeding to the Royal Dublin Society's horses, after getting certificates of passes I have seen them go to other borses, and not breed from the Royal Dublin Society's homes at all after

they had obtained the certificate.

Sec. 24, 1996 Alexander

5785. Then I eather from what you have said you think the small farmers require more help than the hig men over £150 valuation —I consider a man with a valuation of over £100 is my district wants no help whatever, so a rule they are generally inda-3781 And wer think it would be onite within his

power, no master what the different breesh of lateres. n his district, to guard against using any of these breeds in his mayes if he wabed to do so !- Yes, I

3767. You think there would be no danger if Hackney blood, or Clydeschile blood, or any other blood was objected to by him. You think there would be no danger of his getting such blood among his broad mares if he took the results to find out how they were bred i—I would not like to asswer that apostion. I thank there should be no special limit to the number of mares sent down by the Royal Dublin. I think as I said before, if the houses are award by the Society or Government and sent in there for breeding purposes, and sont under a competent the like of that before they were served by the house, then you will have a chance, and no mare to be served

ler a man whose valuation is up to £150. han 6013, its attitute ban 003, to acitatular att any yes to these horses being sound !-- I would 3789. You would not give any privilege to the

have seen some unround mures breeding very good 3750. Where would you draw the line t- Heredi

tory unseemdness is different. I would not breed from hereditary unsoundness. see heredeous unsoundness.

3793, You would disqualify all mores if they
round to have hereditary assoundness 1—Desidedly.

3792. I think you said you found the Hackneys Do you find they come to meturity somer? hardier. ... I find they come to maturity much scener, and as a rule are very easily trained, they are very tract-

3793. And very sound 1-And very sound. I have yet to see three unnound fillies from all classes of · mares unt to Hackney horses. I cannot think of one

3794. CHAIDMAN .- You said you have no objection. to the stallon that is a cross between two pure breads such as the thoroughbred mare and the Hackney more !- I think it would help to improve the brend

3795. What in your opinion constitutes a pure treed 5-I consider a thoroughlyed horse which is registered in the stud book is a porchard haras, and I consider the Hackney horse which is registered in the Hackney stud book is a pure-level horse.

heed horne, you know the stud book has not less in existence love i... Ves. they see the our Term sattle recently introduced, but we must start somewhere, 3797. Do you think the fact of their being in the Hackner stud book constitutes a pure bread III do not, at the first time they introduced Hackner kovers into our district they allowed sires to be introduced

in the register but not in the stad book, but that is done away with now. 3798. But it is quite possible the produce of these borses that are registered are now in the stud book !--

I hosk upon an entered bress as a half-bred, and a registered hove is as most pure breeding as they can 3799. Have the bosses in your district improved or deteriorated !-- Since the introduction of the Hackneys 3500. I see in your replies to queries you say that

Printed Impre digitized by the University of Southematon Library Digitization Unit

I see craite an intropropent.

you consider that they have deteriorated !- Thus the mares have. They have deteriorated 1-They have

3801. They have opportunities will be fastices selling 3802. You attribute that to the fasteers selling their best stock, I suppose 1—They do, they generally sell off their bost young stock to realise carls.
3803. At any rate the farmers of the country

whose opinion you consider very valuable on the subject of what horses they should use have allowed their animals to deteriorate b-Well, I think there is great fault to be found in many ways; until lately the unicity of house were less by a covinie class and a course the farmers were entitled to nut their mare to these beens or else select the powert boxes in the prighbeurhood, whatever homen thay could see for the chespest money, and they allowed their marm to deteriorate, that is the reason I would place a homos on thus. There are bornes travelling the country, and

actually ruining the source of the country 3894. Does in rather take away from the value of the quinion of the farmers of the district that they have allowed their macou to deteriorate by the rea of these house t-Well, yes, it does.
S805. Mr. Wassen.-Do you find, as a matter of

fact, that Hackney stallions in your neighbourhood are negation with the farmers !- Very I would have Hackney stallions at the present time I might state to you, but I was off in Canada and had my house sold before I west away. I would like to keep a Hackney horse and a thoroughbred horse. Tailier they are the only house fit for the country, but the

land, that is my opinion.

3801. Mr. Carre,—You say the favuer is quite conspetent in the case of Government horses being sout down to select good once !-- No, I would not say they are quite compatent, but they got such a terrible poisoning by those kores that were sent to they as Hoyal Debin Somety's besses, that in 1894 there were there. Mr. Heriman's I am sure of three horses of the Royal Dublin Booisty stood in Onagh, and during the whole senson I don't think those three

horses served nine mares, the farmers were so until 3857. Bir T. Esmonon.—What was that owing to! Owing to the breeding of some of the horses. Henderan has a more horse. I like him. I consider him a little light, but a first-class anomal.

1808. Had these animals been in the country before! Side. They had been for some years in the country!

3110. And the farmers did not approve of their progeny !- Not at all. SSIL At what ago are borson usually sold with

you i-In the May fair from four to five years and 3812. You don't sell them under four years old !-No, they would not be bought.
8813. What would be the average price that a

farmer would get for a four-year-old at that fair !-What class of horse would you mean! 3814. The ordinary house they breed in the country

now !- I would say the average price might be \$50 for a farmer. 3815. Mr. Camru,-I think you said to use up to £601-Yes, that is a good class of more from hig

3816. Sir T. Essenos.—Do you think £35 for a four-year-old pays a man to breed horses !—I think it does not pay a man unless he works his horse when young, but the unjerity ecomence to work their bosses when two-year-old, the poorer classes of

farmers. 3817. Mr. Canrw.—You said you preferred to seed from the pure blood on both sides !--! breed would have pure blood on both sides to breed

farmers.

from.

Hr. Alexander H. Sproule.

2226. There was a witness here the other day who 5837. You have been in Camada, I think you said \$ No. 24, 1884. and that the breeding from the pure blood on either the with violent crossing swelled in the produce 3828. What is your opinion of the Canadian horsest-I consider the horse of the needs west and with violent growing evented in the produce having the finite of both and not the morats !--Well. territory a capital good ferming horse. 2820. How are they bred !- They are beed from a much better class of maros than we have in this country, and then they are bred from pure stock

you will have faults sometimes. If you breed from a you was sorry made somewhere in you breed from a will have the produce thrown to the horse, because the strong ideas in upon the horse's side, or whichever brought out from this country spain. In the first place there are a class of muces in the north-west, my the mongrol masses through the country, you don't thing similar to what you have in the south of Ireland : then they erosed those mares with the Civila horse. 3819. Mr. FIREWILLIAM.-These horses that yo and they have got a very good class of forming horses in the north-west territory. But the American horse saw are not sold until they are four or five years old, so what use use they put in the meantime !- To farmfrom the United States is a very inferior class of

> \$830. That is the horse that somes over born !--Yes, there are a good musty of the north-west became \$831. You think they are better !- They are fairly good farming bosses indeed, not as a carrison horse or lunter, but they are a fairly good tous and

firming herse, they have good ribs.

S833 I apppear you would suggest that the should generally five is the average.

1873. What I saked you was what are those I would bound everything coming from there, and I would have a licence put on all stallions acryling 3834. Ko, before they are sold !-- Well. a great masses in the country. I would not on a heavy line or many of those borses that are sold in the Mov. a and if they passed a veterinary surgeon's examination I would reduce the ficuses. lengs percentage, if you talk of the burses record in

the district I could asswer you, but—

5825, I am speaking of the horses recred in the 1853. Mr. Whencer.—You would not on a pural licence !—I would put on a penal licence for all stallices serving mains that had not passed a veteriadatrict !-- A great many of them have been worked on farms and bought up then by feeders, who, when he sees a young losse that is turning out to be a small house, he have like and freds him and taken

2034. Have you thought at all of the amount t-I would not let a horse sorre under \$10 values he respect a veterinory suggeon 3633. And when he had passed that you would reduce that to a nominal fee !-- I would

Rev. A. STAPLES LEWIS, Tominght Bectury, examined.

Moneymore !- Yes. 3537. Do you loved howard-Yes, I brend eight : that is the extreme of my breeding. 3838. What class of lorses issue you heed!-Well mediam-charalteristics from 13 et. 7 lb, un to 15 at., but the last I sold was very well able to enery 16 at

3876, CHAIRMAN,-These small farmers in the

district. I approprie broad for the purpose of sele mare then for their own use !- They do.

ing. 3820. And they are suitable enimals for that pur-

5521. You think they are !- I consider the pro-duce of the Hackneys are far more suitable for

hurses used for 1-After they are sold !

him to the Moy and maless money of bire-

ticular purpose !-- You

incorers.

3839. How have you heed there !-- My first attempt at breeding was from a purebred "Birdesteler" as recoving was from a puretree "Birchettler" mare, a long time before some of you were born. This more had had a feel to the featous horse "Silinge." I mention this particularly, and bear this is case," "Blings" was a theoregibbred hrons; he was not with me. She had a fool secondly to a half-bred heres, a rather indifferent bosso; but I new both and the other when a two-renrold, and they were both Shoroughbead. The vesson why I mention that is this: I have a theory that a mare is infinenced by the first horse or suites | she is served by. I was staying with a friend in the county Tyrcoe, and we were driving up to a mountain to see some lake fishing, and one of the horses in the phestou I admired so much, a chestnut mare. I said, "Well, that is a bountiful mars." "Ah, ree, that mare los had two feals. throught also had that burness also was a little heavy in the middle. And when we came down from the sike in the overling after dimer, we walked out to see those feels. And one of them was such a feel-tha "Slinge" feel-such a feel! I never saw more beautiful. The other foad was a very good feel. And I mid, "It is a shame to put thet more in harness; end her up to Lord Caledon's heres "Bay Effica," and have more of that cleas of Soil." He seek her to

Dev. A. Lord Caladen's horse, and she missed feel. Next year I happened to go down to the same place, and formd him trying to make the mare plengt, and size objecting to fi, and the old asterand was standing by "Ah, sh, yes, sie, sho will never do; you will kill the berre." I made, "It is a shame to pot her into the plough of all; I will give you a £10 note for her." "Take it," said the steward, and I got the mane for £10. I want to carry out my theory, but I did not want to run the risk. I was a poor man, and I did not want to run the risk of breeding a weed from a thoroughbord more and a thoroughbred borne, so I put her to another home that Lord Caledon had not biterally halfdale mace, but a beautiful borse all the while, fine setion and nothing coarse about him. She had two feels to that horse, both thoroughbred, all the appearonce of thoroughbred. I never kept my horses long. One of them I got one hundred galance for, three years and three days old, and another I got eighty granem for at these wears old so that they were good. I mention this particularly for my theory, that the first house the mare has influences all her after recovery more or less, and that is carried out by the instance of the officer who had a mare in India served by a Quagge, and had a feel to this Quagge, Zohra, and it was brought back here to Ireland, and ever after when she was breeding been her feels had the natural stripes on the signs. And we all abow tens in a more has a mule as her first fool, her fools have always almormally long ears after. Well, now, my next alrapmally long ears after. Well, now, my next attempt at hreeding—you want to know something maybe of what they did. My next attempt at breed-ing was by "Old Swordeman" with a mare such as

Ber. A.

126

For. 84, 1894. the late Level Mayo as Lord Nass would have ridden. I am a very old man and remember those things This mare her foal was broated with the Ward Hounds for nice years.

3840, Mr. Carev.—What was her feel by t—Hor feel was by "Blarzey," a theroughbeed. He hunted nice years with the Ward Hounds, nover made a

mistake, frequently gave them the lead, and freenergie left there improveded and had hounds and sold in England, and he went then to Yorkshire and wen the Point to Point Steenleckase, five miles, 15

5841. CHAPRIAN.-He was a rood borse. I conclude these mores of yours were above the ordinary class of mares kept by the farmers in the country t-Well, new we have some on to that I live in a country of chalk formation which is very much superior to the lime formation, for this reason, that geologically there is a cood deal of silics in the ground, which is largely absorbed by the produce of the ground, the hay and

grain, and produces a flace kind of bone than the ne will.
3542. You" think the shalk formation is better adapted for breeding horses than the limestone for-mation b-Very much superior. 3813. Is the chark formation all over this particular

district l-Is in not over the whole district, it is a roundle production, it only covers it may be ten or twalve square miles. 3843a. And are there particularly good homes bred on that necticular formation !... I have beed now

3514. Do the farmers living on those farms always succeed in breeding i-They don't attempt to breed because they won't feed their berses or mores. I feed my broad mares well always, and I fred my colts. and I happened to ride him the next year or so after

their feals. The better class of farmers certainly like a strong thoroughbred stallion. 5846. I suppose the farms are small, are they not? -They are, but still they are not so small. 5847. Are there good stallions in your neighbour-

band, sund theremeticzed stallious 1-Not new to the mediate neigenourscon. 3848. Do von think the bornes have deteriorated or improved, as a rule, in your district t-Well, I think they are improved because we have had some good

they are improved because we mad not none good heress in the neighbourhood. There was one remarks ship good horse that I bred from Cashel, by Norman's out of Pannier by Dundee, a very nice berse, a good walker, trotter, and palloper.

3849. Have you any experience with regard to breeding from Harkney sires b-Wall, I have seen a little of it but I never took renel interest in it. have had a very good Hackney horse in my main's bourhood a course of years ago, and the property I

3850. I suppose the farmers in your neighborshood use them a good deal, don't they t—No, they don't like them much. Last year we got two very good conching Yorkshire horses into the neighbourhood, and I think they will take in the country and do good, they breed a better class of horses and bigger become Our neighbourhood produces harness harnes and they breed a better horse with better shaped forelage. Hackney horse produces a round leg, the coaching horse is more of a blood horse, he produces a good flat log with the sinew a good distance away from the

cone 3851. Do you think that the introduction of the Haskney blood will have any effect on the breeding of Irish burstes 1—Well, I don't know, I think the Irish kunters that get the prises in Dubin are pretty much of the Haskney class. I really do.

\$552. Have you any suggestions you would like to make with a view of encouraging furners to keep bester mares !- You; my suggestions would be to have a zeros for a mare of positive quality, not of a conparative quality, because if you compare two had things together, one very little better than the other. the better of the two is no use either. I would into fere largely with the liberty of the subject, and I would allow no stallion to be used that was not resis-

3555. And sound !- Oh. of course, that I mean sound and registored as sound—that is, without any boreditary defect that would be likely to year on. 3554. And I conclude otherwise suitable, with good home and action and share !-- Oh, of course, but I have to any what very few breeders have to say, that I never bred a wood and never bred an unecound one. and I was able to fellow my beeves, and I never knew

one of my breeding for years to go uncound except 3855. Are you breeding new !-- Yes, sad I have great faith in standard and tape lines 38.56. What are nor breeding from now bull and breeding now, and have been breeding for the last

nine years, from a mare by Fitzjams ent of a horse by Birdeatcher, so old mare naw, from Cubel by Nermanby out of Pannier by Dundes. Now Dundes I consider the very best blood there can be. SEST This been Cashel is the sire was neck-Cashel is the size of the last five foals I have beed.

3858. He is up in your country now !-- He is. 3659. In he a registered horse, do van know !-- Oh. na, far beiter year registored heres.

3860. But he wight have been recistored this year! four on that formation, and two of those that have here tried have been winners one wan at Ponches--Ob, he is an old house now; he is a very fine house. I remumber riding him. He was bred by a syndicate of flaxmen of Belfass. I don't know how it was be happened to come into my neighbourhood as a twovescold from Newmarket, where he was in training,

3845. What stallions do the farmers generally use t be came, and I mover set on a better house. ... They don't feed their mores, when they are carine 3841. Is be called after the Rook of Cashel !-- He is the sire of "Rock of Cashel." Wall I say not only did I never breed on annual one as a wester one but all mine were, for the size of their percents, bigger in every way than their parents, and I suppose that you in consequence of the soil and provender they were

reared upon and the good feeding besides 3862. Mr. Freewitssam .- Could you sell no what class of mares are in your neighbourhood, not those that you know yourself, but what is the average class of mares !- The average class of mares in the Drigh-

househood is not a sood class. 3865. Do you mean they are small and light!— They are fair height, but they are poor-limbed animals,

small legs, weedy.

3864. How have those mares been bred 1. They

bave been bred from weedy thoroughbreds often, and mosilish mares 5365. And are they in the hands, do you think, of farmers who can breed a good horse, I mean bene-

ficially-are they in the hands of very small farmers -There are plenty of men with good large forms, but who will not give a price for a good mare.

3866. Then they only keep their worst; they sell oceo. Amen they only keep their ween; they see their best h--Unfortunately, anything is good cough to breed from. My more that I bred from was 16 bands high. Yesterday, just to check my judgment for to day, I put a standard to a feel a year and seven

months old; he stood 15.24 high. 3867. Mr. CARRW.-What was it by t-By Clubel, and he measures nine inches under the knee, higger than his five-year-old bother, whose log I measured a while ago, which is nine inches under the knes

3868. Mr. FITZWILLIAM.—Do you think that it pays these very small men to try and breed heree at all-do you think they do themselves any good by trying to breed horses, the very small farmers i. Ob, they

seasy. The year think it is wise of them to try and do is 1—There has been a very great patronage given to As Vorkships horses, the coaching horses, two remarks ably good harnes in my neighbourhood now.

5870. What do they breed with these carriage house!-There are a good lot of good up-standing surprise horses, and that is the class of horses that should be bred in the country. There is no use in hreeding little horses, more than by hreeding

good sized horses, the farmer can get some little use of him when he is two off in light harrowing and that kind of thing, and then you him on and not sell Mee until four, and he then gets some payment as he

goes along. have some into the country, these coaching horse. what do they stand at, what fees do they serve at !-About \$2 for the Vorkshire bornes. 3872. And as a rule will the farmers go to the Assessed horses 1-No. not with us. 3673 He will go to the good horse !- Yes, but the fee must not be extravagent. When I say extrava-

gant I mean that it must not be anything over £2. would you eonsider a proper for for your district !... I think that if the Government gave some help it would be better to have a fee of not more than 30s, but it is really

not the borses we want, it is the mores. 3975. Do you find that the brood mares are diminishing !—They are not up to the thing. 3816. Can you give any explanation why the brood mares have disappeared !-- Oh, they were never

ere. 2077. Then you have never seen any of these old. Irish marce that we have heard about I.... I have seen

hat there is a great difficulty in getting a good more even there. 5675. In your district I suppose they are all small mares 1-No. they measure a sectain below. but they

are three cornered. I have great faith in like hegetting like, alshough I have seen great exceptions 5579. Is that from want of eare in breeding them or that they have no means 1... When they have a fair

mare they sell it. 3500. Are there many mares sold to foreign design 1—We sometimes get good mares from the south or west of treiand; they are beed there, made into comitties, and sold in Moy fair, and at a parti-tion of the comitties and sold in Moy fair, and at a particular senson of the year the foreign dealers buy them frequently. The Hungarian men key them and take them away and the produce of those mans will come back in trecopers in communicate of the Government sping to Hungary to buy troopers, which I think is a faine economy. I have had some little experience of American horses in the neighbourhood, but they

doo't take there 3881. CHARMAN.—You don't think well of them ! -No 3582. Mr. Canno You uncles of this Europataher

mare that was sent to the half-bred owned by Lord Caladon !- Yes. 5883. And two foals bred from her were sold at eighty gritness each L. No., one was sold at 105 guinean, a four-year-old, and another at eighty guineau, a three-year-old

How was this half-bred of Lord Caledon's bred !-- Bred by the late Lord Clonmel out of a Clydesdale mare by a thoroughteed horse, \$685. What was the thomosphyred t...I don't know, but be was called "Corrector," beense be came to mend our light legs in the north. He was a Best Show as a horse likely to get harness horse.

3855. You spoke of a "Swortleman" mare b—Yes. 3887. Was she a thoroughbred !-No.

sa," out or a half-breq. 2889. Was "Bwordsman" a thoroughbred !—Yes; 3890. Then she mated with a thoroughbred! -- She mated with " Blarner "

cet of a half-head

3894. And produced this great weight-carrying brater!—Yes. "Blarney" was by "Charet" out of "Magaum." by "Magpie"

3892. So that you approve of making builthred mares with thoroughbreds to produce hunters !-- Yes. 3893. And you disapprove of Harkneys !-- I disapprove of them entirely. I would not let them into the country; they have less legs, soft lean legs, and always guminy. You cannot latter my horses. You cannot puff their legs or that kind of thing, and although they look light, some of those well bred horses, they measure big for instance there was a home of mine exhibited at the Show last suremen. Am eminent dealer in Dublin said "My friend, you have

put him in the wrong class; this should have been in Class 9, instead of Class 10"; he was higger than the horse that got the prine in Class 10. \$594. You moke of a cell one-and a-half years old whose measurements you took before coming up hard I

"Net and the state of the state others breeding, and have bad a good doal of guiding of other people in their choice of mates for mares. Whitehen ... What was the name of the Hackney stallion you referred to in your district !-- I

atte forget. 5897, Who did he belong to 1---Mr. George ; he is dend now; he was burned to danth; his house was burned; but Mr. Gooren has now a way fine York. alize horse

ice horse. 1898. You cannot remember the name of the 5898. You cannot remember the name of the orse 1---" Performer /" he was bought in England---Yorkshire—some time are. 3899. Do you know whether he was a pure bred

Hackney !-- He was a pure bred Hackney in the Hackney Stud Book 3900. And had you experience of other Hackneys there !—No; there was an old Norfolk trotten. Was han Hackney ! 3901. Not the Hackney I am speaking about !-

2001. Not the Hastmay I am speaking about 1— There was a great Norfolk trotter in the resignbour-hood—the size of the late Lord Charlesson'te "Broad Arrow" — "Beanding Willow" was in my resign-bourhood for twenty years or assenting like that. 3992. He get very good stock!-- Understood; they solden went over 15.2, 15.1, and 15.9, but

beautiful netion. 3903. Did they sell well !-- Yes, and were very useful afterwards to the whippoord makers, because they required a great deal of it after they had gone a mile. 3904. Have you any other experience of Hack-

nevs !- No. I never saw any except these two. 3905 And therefore anything you have stated is founded on that experience and nothing also !-- They were never good.

3006. You have had no experience except these two 1-Name 3507. How long have these two Yorkshire coach-ing lorses been in your district t—We have had no experience of their breeding yet—they are only thou

last year. 1916. You have not seen their foals !-No. 3903. Anything you say is imaginary as to what 3909. Anything you say is imaginary as to what their produce will be 1—Only from like begetting like; their action is quite as good as Hackney action.

with much better exape.

Non as year V. John

- 5910. CHAIRMAN.-You live in the county of Tyrono !-Yes 8911. And you farm land 1-Yes.
 - 3911. And you term land I—Xes.
 3912. And breed horses !—Yes.
 3913. What broad of horses have you been breedor !-We have bred from shoroughbeeds and from
 - Yorkthire burson. 3914. You mean what they call a Cleveland Bay or Yorkshire mashing horse!--Yorkshire contains
- 3915. You keep stallions 1—Yes, sir 3915. What sort of stallions 1—A. Yorkshire.
- conching horse at the present time. 3917. How long have you had him !-- Two seasons. 3918. You got feels by him !-- His feels are six or seven months old now
- 3919. How do you like them !- They look uncorn-monly well; good fine aim and strongth and nice appearance, made like thoroughbreds but stronger,
- 3920. In this horse of yours in the Yoskshire Cauching Horse Stud Book 1—Yes, I have a certi-3501. Do the farmers breed hunters in your dis-
- tries at all !-- As a rule not, they have not mares to broad hunters 50 Pt. Do they try to breed parriage homes 5—They have been breeding different berses ; the mares as a rule are light and wanting in beight and bone, and
- they have bred different horses—not worth much 2023. Do they breed a good many transport !-- A
 - good many. 3934. Bought in the fairs !- Latterly they have not been paying; they used to get £35 and £40 for a trooping borne; now be is not worth more than £15
 - er £18, the same horse. or that the prices have gone down !- In my opinion the horses have deteriorated
 - 3926. What do you attribute that to 1-Latterly the farmors have bred a good deal from a couple of thoroughbreds in the neighbourhood that have beenght Knight," and that horse "Cashel," the last witcess
- light stock. 3927. The marce themselves-do you think they have deteriorated buil believe they have. 3528. That you also attribute to the use of improper
- strent-Yes, that would be the proper onswer 3939. Have they been long in the habit of breeding ross thoroughbeed sires i....There have been thorough bred sires in the country for the last twenty years ; some were good when farmers had suitable mores able they were not fit to breed from thoroughbreds; as a
- consequence the foals were not very good. 3930. How would you suggest improving the united under the control or supervision of the Royal gunized under the control or supervision of the Royal
 Dublin Society, and that the furners should get prime for foals of two, three, or four years old, or foals even, and that they would get out at five and
- leave room for others to come in. I think that would help to get farmers to keep their best illies. 5951. As a rule now they sell their best fools !-
- As a rule they do. 3933. In there a good class of stallions at respect in your district !--Just now the most favourable is a horn-a Yorkshire horse that come over about the
- middle of the season last year from England, owned by Mr. George, and the house I own myself 39Xt. What is Mr. George's borse !- A Yorkshire coaching horse.

 3934. The same breed as your own !—I believe so,

but I have not seen him.

- \$905. They are popular horses with the farmers !-loss last year, that they are very fond of him.
 2006. Your horse has got plenty of marents. Ver
- 3937. How many t-He served 106 mares this
- SPECOS. I don't know whether that is reach or have 3038. You spoke of these two horses, yours and Mr. George's, as being the most popular. I suppose that is not a sufficient number for the commonweals of the farmers?-There are a great many other horses of no particular brood; there is no Harkney in our distruct; there is a thoroughbrod house at some
 - 3930. There appear to be only two thoroughbreds. registered in the county of present. I suppose there are some other horses come in from neighborries
 - ocunties !-- Yes, there are. 3940 Do you think if there were more thoroughbreds the farmers would use them in. They would
 - want to be very heavy said strong, and at the persons time amongst the mores in the district in which I kee I don't know a mare fit to be put to a theroughbred to bring a good horse-a bunting home or carriage home
- 3941. Do you think that a more would be more likely to breed a useful horse by a Yorkshire conching horse than by a thoroughbred I—Well, all I
- can say is that it was not until after mature consideration with a gentleman of long experience named Mr. Elem, that we lought this combine herse for the make of benefiting the county as well as cur-
- 3942. Have you any suggestions to make with a riew of improving the marva in your district!-I think what I moles of about the local shows, that, with a little sime and a better class of home, is lindy
- to improve the breeding \$943. Getting a better class stallion !-- Yes. 3044. And you consider a Yorkshire concling horse would be best 1... Ho is a very fire leoking home, he is buy with hir flat short less without her,
- a creek back and who counters and long auching nack ! altogether a lovely horse, and should get very good arren. 2015. Would you profer him to a thoroughbred of
- the same power, suppose you could get him—the same thoroughbrod of the same power, but it is hard to get
- 3946, Have you say experience of Heckney stellyons t.....I have seen some us my time, and have som foals of these, but they have not grown out well. They are more of a receptain horse. A horse that might answer a mountainy district very well. I never knew of any high prices being given for them. 3947. Do many of the farmers sell their stock at
- keep them until they come of age. 3048. Do American lorger come about you !-- Just a little, they come as for as Belfast, and they scatter
- out a little through the country. 3910. Do you approve of the surrention made by other witnesses that they abould be bearded!obleve they are doing barm to the sale of horses in
- Ireland; they are no good; they go to picces scorer; they would not do to start breeding from as mares from what I have seen of them 3950. What sort of horses are generally hard in your district!—Generally harness horses, single and
- 2951 Are they improving in price !-- Prices bave been worse for the loss three or four years-3902. Do you think it pays the codinary small farmer to breed a second class barness born at all ! -If they start to work them as two year-olds I think

-A good many of them sell as year olds and recovery Nov. 54, 1890 olds; a good mamy sell their young stock at an early

it pays them; to get £30 for a four-year-old is better it pays mean, to get need for a near-year-ted is better than buying a £10 horse and selling him for nothing 3953. Mr. FITZWILLIAM.—Your borse that you have introduced into the country and this other Vorkablee coaching horse, is it with a view to breeding became horses or apricultural horses or what to

think they have strength snough to be used for agricultural perposes, and they have shape to make liber barroon or saddle horses, and according to the

mares that they got they may brood either. \$154. Do you think that the more round about wa ... I am not speaking of your own maree now -- are arge enough to breed first class barness horsest—In we orinion they are, the average of mures may be

said to be 15 hands, or may be 154 2355. They are fairly strong mares!—No, the general run of them are light; they are generally ared from those thoroughbrods that I have spoken of the "Knight" and "Cashel"—and are generally All the fiels I have seen from the coach

hore bare bone enough, and growth by appearance to prints anything.

5116. Hr Thomas Esmonus.—Did you say, Mr. Dickson, there were a sufficient number of good sizes with you or not i-I don't think I surveyed that

nucion. I think there are not a sufficient number of good along in our part of the country. 2017. And have you formed any opinion as to the seet that would be round suitable. It was lack a

little partial my tolking about this Yorkshire coaching horse, but as I said it was not until effect ha most puters consideration that he was bought and becords over. I don't know how his produce may turn out, but they are looking well, and he looks well enough himself, and I cament advenue any other horse.

2003. This horse was bought by a number of

guillenes !-- Two other greatlemen and myrelf. 1959. Of course you exercised your own origin in serving at the conclusion as to what would be most

these two men were of more matured knowledge than \$960. Do you think it would be advisable if the question of importing pour sires to Ireland arises to allow the different localities to agree amongst them-

selves what afre would be best 1-J think it would be best that the different loodities should have the seems that would note them best. I den't think every man in a locality in copable of giving a proper opinion, but there are mon in every locality that care form an origina as to the prover horse.

3161. You think by consulting loss lities you could arrive at a electrice as to what would be the most suitable been !- That is nov opinion.

in the district !- Not just now.

Jith Was there ever any !- "Performer," that was stoken about by the Rev. Mr. Irwin, from Yorkshire and only served three or four years.

When !- I expect he is dead two years. \$256. But he was serving then until he died !-Yes, until he died 3807. And he has not been replaced by any other Hackney L. No.

What sort was his progenty !-- Very variable orses, he bred horses of different type and colour, and more than £40.

3959. That is at full age 1—Yes, at full age. 3910. The experience of Performer's stock has not They are not found of them in my district.

tchool any other breeder to import a Hackney !--3971, Col. St. Quintin.—Do the small farmers around you breed for sale or for their own purposes ?

3973. Do you think their idea is to utilize there or do they breed as an inclusivy for sale 1-They breed as

on undustry for sale, I think 3573. You say the urion of these smaller horness berson has gone clown very much 1- Yes.

3074. Can you account for that 1-There are different reasons given ; some say that owing to the the places of the Irish horses; no doubt both have

3975. What do you say has brought it down!-The use of hieyeles, the importation of American horses, and the lack of amility in what is below here! \$974. Supposing them is a still further decrease owing my to the introduction of motor cars and the use of hirveles and the respectation of American borses. would it pay the farmer to breed, or would be broad only for his own purposes !- Only for his own purposes

if things go on like this.

5077. Mr. Wanners.—Where did you hav your conting horse !-- From a synthesion called F. H. Sterker, of Pickering, Yorkshire.

3078. Then I think you said your experience of

Hackneys was confined to a Hackney called "Per-forent "1—Yes. 3979. Who did he belong to 1-Mr. Gahriel

George. sorge. 3940. What was hel—A farmer. 3981. A rich man !—Well, he is in sood eigens-

stance; he owns a good sized form.

1982. You don't know how that home was bred !—
No, I could not say; I don't know anything about

his pedigree.

20x3. In the questions that were sent out to you by the Commission, in onever to the question "What are the most popular stallions in your district "1—You say -Two gets by "The Bounding Willow" and Yorkshire enables stellion to One of these sets in year 5984. What is he !-- His mother was got by

"Blarner," the property of the late Lord Char He is by a herse called " Bounding William" 3980. And he has been a very popular stallion !-3100. He served for a good many concest.—Yes,

hat not exactle in my district. 3167. What were his stock like !- Generally good, but under-sixed. \$988, "Bounding Willow" was a Hackney stallion !

Yes, with a succi tench of Arab in him. have been entered in the Hackney Stud Book. 2019. Then I think was said the average of the height of mases in your district was about 15 hands 1—Yes, about 15 hands ; a good many are under 15—14.2 and 14h. T should say 15 hands is the average. 14.3 and 145. I should say 15 bunds in the average. 5010. Would not the own of a Yorkshire concluing house on these 14.9 mares by rather a violent cross-

an extreme gross 1-X maces to rather a violent cross, tendency to do any harm. 3191. What height is your horse !-- 10.14. 3192. It would be rather extreme !-- They would

be two extremes. 5993. In it your opinion that the best results are obtained by using an extreme cross like that 1— When you get the mare 144, that is under the average 3994. The average you say is 151—The average. 3995. I am not talking of the big mares, I am

talking of the small. Would you not think it so extrems cross for them t-I have seen many small mares breed very noce horses of a good size. 3596. You have no experience of his stock yet !--Nothing more than coming year-old foels.

5997. Charman.-You live in the county of Care !- In the county of Tipperary, but my post-

3918. You have had considerable experience of borse-breeding !-- I have had I suppose about five and thirty years experience about the breeding of horses. and my brother, I was with him for a long time; he

took a great interest in it. Hunters and carriage horses entirely.

3193. Do you breed them in the same way t—I

ried to breed in the same way as my elder brother; have had a long experience of it at home and abound, and I tried to bread horses out of really good

mores; I think that soils; up in my councy factors -rem to think they can breed out of saything, and uske a great mistake in doing so.
4000. Yer say you breed hunters and barness hores; do you use the same stallions !-- I would; I

see thoroughbood stallions under all circumstances, ter I think the great mistake that people make is thinking that ear wave is good enough to breed from and I think if any encouragement could be given to farmers to keep their better class mores it would be o good thing; they sell now the better class ones, and if they could be induced to leave the better class of mare, and that some navmism could be given to them that they would do it-a very little would make them I would suggest giving consetting to them to so better class mures. They are tempted by a do it. I would suggest givin and sup and sell three and think northing such enough to breed from. If there were some result povenina or prim in districts divided into horonies. premium or prime in district the premiums in each acting a small thing, any ten premiums in each 'amony of £5 a piece for those preventing the best many and faul. I think you would unlose them to boop the good ones and belo in a great measure the

bee ding of a botter class here.
4001. You would give premiums to young mases? -I have head from two year old mares and found them answer extremely well. I think if farners were to head from two year-olds before they become nioable and useful they would be able to make constitue of them. I have done it myself, and have got a couple of fosls before the mores because five years, and made

mething of them. part of the country; I do it myealf, but I den't think it is done as a general rule, but whatever they see pay

4043. Are there some good stallions in your dis-tries !- Xes, in Litorrich there are some good stallians. but not yery many. 4004. Do you approve of half-breds !-- I don't believe in them as all. I believe solely in brooding from the best blood you can get, and I don's think people are half careful enough about taking precoutions against horeditary disease. I have known one mon in my part of the world who gave a large sum for a

horse, and nearly every horse he got was a roover. because it was in his blood-hereditary 4005. Do you think the Royal Dablin Society's scheme has been a success in your district I—Well, I do. I think they have done very well; impectes come down and register, I think, the best in the district, but it does not always follow that they are

really good. 4006. And as regards giving premiums to mores, that ought to be extended I—I don't think anything would do so much to improve the breed of borses as giving the farmers some encouragement to keep their

4007. That is done under the present scheme : they give prizes to mases belonging to farmers under a certain valuation _£1501_But they have to send them to the shows

4008. CHAIRMAN.—Oh, yes, they have to be selected !—I think that if some quiet encouragement selected to a timer mass or rooms quest encouragement could be given by letting the inspectors come down, and if some inducements could be held out to the farmer to bold on to his best fally instead of selling the best and keeping the worst, as he does now it would do more than anything to improve the breed of bornes. As long as you have no good mares was will have no good feals.

4000. Do you think the horses in your district

have improved or deteriorated !-- I do not think they have : I think that when gentlemen kept a good stal-You in the old days they did do better

4010. You think they have deteriorated then tall won't say that ; I think we are at a standed? 4011. Are prices as good for young stock in I don't

think so; if you got a really good saimed you will always got a good price for it. I keep a pack of har-riers with the object of improving the horses show me, and I think we are just about where we were... me, and I think we are just about where we were...

not much better. I have only done it for two years.

4012. At what are do the farmers will their breen. there!-They generally soll thou at about one and a half years 4013. The smaller formers !-- The better ones been

them on 4614 And sall there so three and formans odds to As four-year-olds: they work them at one and a hall years very constantly at light farm work 4015. Are these horses chiefly got by shoroughbred horses !- Yes, got by thoroughbreds. A great sway soney makes a grost difference to a great may money makes a good difference to a great may farmers; they get them seved by any kind of how rather than pay for it. If you could get good sta-lings, and farmers can be indicated to varyoning them

by cheapening the service of the mare. I think it would be of very great uso. 4016. You think the farmers consider the price more than the suitability !-- I do. 4017. Do the farmers take oper over of their brest mares and young lowest b-Thry do; they because them in winter. If they get held of a good lowe they know how to take one of it. The first experce is what they enrifer most. A good how e standing at £3, £4, et

£5, they won't go in for it; and if these mares were given prices in the different districts-crims to the man who presents the best foal and more in his distriot; and if he got the veryles of a stallion at a shoaper rote, say half rate or so, that would induce more than anything the greating of a good breed of

4018. Have you any experience of breeding Hech eys !- No ; I saw them when I went about a good deal as a Local Government Board Inspector in the North of Ireland, but I didn't breed them at all. maron in your part of the country !-- There are none in my part of the country, but I don't believe in their being generally useful; they are good for show pur-poses and barness and light work, but they would not

saswer in my country 4020. Do you think if they were introduced into your county they would affect the value of the hunters !-- I cannot say, because I have had no experience of that myrelf,

4021. Do many droves of horses from the west come into your district !-- Ob, no, not now; some years ago they used to, but not now. years ago mey men so, not not now.

4029. I think you said at the beginning that you had experience of breeding horses in foreign countries 1—Xes, a little. I have been a few years abread, and both rede and med them out them, but then we generally went in for Barbs. 4023. In India 1—The Ionan Islands.

4024. You used Bark stallions 1—Yes. 4025. Was the searc of any particular breed 1.... They brought two Borb stallions and bred from the says of the country, a very unful class of boston We med them for riding purposes principally. We had no bracting, and used these for paper charing, 4016. Were they small known I—Well, about 15 to

4027. What class of horses do you suggest would be best for the farmers in your district to breed 1-1 shiely that if they were encouraged to keep the best mares, the best fillins, good roomy, ususcular, suitable filler to breed from it would be of numerous advantage, and I would breed from nothing but thorough-heds. My brother William had a longer experience sion I, and he want to any amount of trouble to get the best weight-currying horses and crossed them with mores. Hadden's always do it with a thoroughhed, good half-hed or three-quarter hard mares, but

his main object was to got weight-earrying hunters 4018. You level them both the sums way-if you den't get a first-class hunter you hoped to get a first-class carriage horse t—I slid; those are the horses that pay best in my country, it may differ further north, but in the west I had some little experience and it is different, but in my own country nothing

pers like good horses, the better you breed the better 4039. I understand you suggest that the farmers should get good sires at low fees, and also premiuses to induce them to keen epitable meres !- They feel paying out so much money, and they would go any distance to a really good sire if they could be made to feel that they could do it for less money.

4030. In there any other suggestion that you would like to make !-- I would consider, if possible, stop the wretched class of stallions that travel about the country and which sorre rasses some times at an incalculably small fee; they go down to Ya.

4031. Mr. Wassers - And accretistes a glass of whiteley !- Yes, it leads to a very bad horse. 4032. CHAIRMAN.-Would you approve of the

ites of licensing stallices, making the sound stallices; pass a Government casmination 1—Ob, certainly; there could be nothing in the world more detrimental than allowing stallious physically unsound to cover mares about the country. I think that and sho chaosing of mares are the two things that would took must to improve the breed of horses in the country I would not allow a stallion to sorve at all without

to two year-olds.

being registered and proved entirely fit as to beyoft. 4033, Mr. Frygwilaian - You don't keep a stallion of your own !- I do not.

4034. Is your district a horse-breeding district !-and a great many good houses bred in the district 4035. You think it is expable of breeding first class horses !- Yes, I think we are expable of breeding as

good a hence as you can get anywhere; my brother heed "Chimney Sween." He was particularly feed of stayers and weight carriers. 4035. As to the present blood in Iroland-do you think the Irish blood as it now stands is the best blood for breeding general purpose animals?-I think for general purposes there is no horse in the world can

best on Just lacus.

4037. You are speaking of the blood !-- Yes. Then from that I presume you would be rather averse to any radical change !- There is comething in the Irish blood that seems to me to fence readier and caster, and take to it more kindly than any other here in the

4033. You should not like to see any mixture of blood in your country, such as the Hackney or Gleveand !-I think the English stallfun is not objectionable, hus I do not approve of sid racing stallings or marrie heing bred from; I thunk you should brend from the young and fresh; I think the feeding and training of old raring mores renders them unife to breed from. I

don't approve of them at all.

4009. Then if you are unable to get the number of thoroughbred stallions of good make and shape and bone would you be against half-breds? Should you be opposed to half-breds in the country t—I would, and I are not only speaking my or a opinion, but that of men of experience in the country. I would never seed from anything but a thoroughlyed; the beat shood I could get in the country, and then get the storruth and bose in the mure.

4000. Mr. Warson. The soil in your district is-

different from the soil in some parts of the west ?-- Oh, 4031. You have some of the best limestone land !--

We have very good land, 4032. And can twise a very different sort of bosse ! -The Hankney might do in some parts of the West of Ireland. I was acting as Local Government Inspector for some yours up there during the fazzine, and I saw a good dual of them; that country will every a class of bornes that is totally unit for my county. I think in all the South of Ireland you can

brood a zench superior class of horse.

Mr. James MacClancy, Miltown Malbay, examined,

4033. CHATRMAN.-You live in the west of Clare, 4039. Do you think your district is a good horse. Mr. I we

feeducing clustrict 1—Very much so, it is famous feeducing young cattle of every kind. 4040. And what class of horses do you think could I think !- Yes, sir. 4034. Do you farm lands 1-I do. 4035. And have you some experience in horsebeeding t-Well, I bred becaus for the last fifteen or be produced that would be most likely to be remana-

searction years.

4036. Would you describe to us the breed of
homes that you tried to produce 1—I bred from the
common more with the thoroughbred, the best rative !- I would say the larger class of farmers would produce a hunter or good harnest horse.

4011. Are they useful many, the ordinary run of mares !- The larger class generally keep a useful thoroughbred in my district.

4057. You think that the thoroughbred bosse is mare, but the smaller cluss cannot afford to do so, they are very weedy and defective, very

word. You wasse that the thereognities nome in the most mitable hove to—Yes, I think so. In my district, sir, in the west of Clare, the holdings are very exactl, and they cannot afford to heep good morse, they sell their best filles and hight 4042. Do the furners take ser trouble about mating their mores as a rule !- Latterly they seem more interested in the breeding of horses than furnierly,

they were rather indifferent, latterly they are rather more inclined to take more trouble,

4038. At what age do they generally sell the bornes, the farmers in your district 1—The larger class of farmers keep them to three and four-year-4043. What class of stallion do they like i-Generally thoroughbred, they are most popular and olds, and the smaller class one and a-balf year-olds more useful I think.

4044. Are there plenty of suitable stallions in the

Mr. James

country i--Bather too much stallions, but of a very indifferent quality. I think, 4045. Do you think they sould be improved !-Very much so, 4046. What would you suggest in that direction,

how would you suggest the improvement should come - I would recommend for the larger class of facutes a good threoughbred with plenty of substance and hove, and for the smaller class a half-bred or Hack-

nev stallion I think would do very well. 4047. Have you laid any personal experience of breeding from a Hackney stallen I—Nor myself, but

treesing from a Harkney stained b-xoc fryein, out-there is a Harkney in my neighbourhood, and he seems popular enough with rome of the farmers. 4048. Have you seen his stock b-Yes, I have seen some of his progray. 4049. Do you consider that they are good useful

horses !- They are useful for the farmers for their own work, and they can sell them sarilor than they would the produce of the thososphired saimal, they desclore earlier, and herouse more until 4050. Do the farmers in your district breed principally for the prayone of sale or for their own use?

Well, some of them have bred for sale and some

4051. Are there many horses sold out of your distriot annually 1-A great many, every farmer there scens to have a borse, and they generally keen a

mare, and whether it is good or bad they breed from 4032. What age do they generally sell them at !--The small farmers sell at half a year old and from that to a year and a-half, and the larger class keep then to three or four years old. 4053. Have you any experience of the Royal Dublin Society's arlower working in your district !-- I have.

ing of horses since it was introduced, but so far as the Royal Deblin Society in Dublic works I think we see placed at a great disadvantage in the west of Clare. it is so very remote and expensive to take horses from here to the shows; very often I knew a farmer to have a good heree and he is deterred from undergoing the expense last he might not sell him to

4034. You mean as regards the Show!-Yes, I think the scheme is working very well. 4005. But as reason's the horse-breeding achieve t.... It is working successfully; but it might be more beginned, it would be a banefit if we had correspond and prism given to the farmers to keep their good marca and fillies, for really an matter what size we have we could not produce mod horses from the

mores we have there. 4006. But still the schouse is in operation in your district L.So it is.

4037 And the mares are shown and prizes given to mares that are considered most aritable !... Ver. 4056. There is a local correlates I constrate there I... Yes.

ere l — x cs. 4 059. And these mares are brought to certain places 4009. And these mares are trought to certain places and judged and priess given accordingly 1—Yes.
4040. Do you think that we've assistancedly 1—I think to, but it sight be improved if we had mace of them; it is rather venote for parts of the country, it is recoverly both in Ennis, and that is very for away. furn the mest of Clean

4061. Do they sell many troopers in your dis-tries !-They do, they are quite estimated with their young borses if they grow up to be troopers. 4062. It pays them to brood a trooper t-Yes, but I am sorry to say very few would sell as troopers, they are not class enough or height enough.

4003. How are the troopers heed t--Generally from the mares we have and half-bend sires; all the beeses in my neighbourhood are half-breds, the theroughbreds that we have had there are some twenty-five miles from where I live, and further from

other districts in Clare.

4054. There are some few thoroughbred horses in your immediate vicinity!—The nearest is about swenty-five miles, Major Studderth.

4015. Do the farmers take good ears of their mans and young stock !—I think they take greater can now than heromore, may are more inserested, and they are becoming more intelligent I think in the

spect.
4015. Do you keep a stallion yourself!...No.
4057. What stallion do you think is most suitable. for the mares in your neighbourhood !-- I think to the larger furmers the thoroughbred with pleate of hone and substance would be the best. 4018. A good thoroughberd !-- A good thorough bred, and for the smaller I would my a half-bred as blackney would do very well. I would rather arrest

breed from the thoroughbred 4069. Do you think the introduction of the Hackney blood would have any effect on the sale of bunters from your part of the country's-I cornel sucak from experience, but from what I have beard F bolieve it would, there is a prejudice against it. and people who seem to know better than I do say they have not spirit enough or stamina as well as our Trish bred or thereugobred, which I believe.

4070. You think that the present Irish breed of horses is good !-- I think so, much letter than the Hackney breed. 4071. Mr. Firstwitzsan,—Which would you prefer

to broad from in your district, the half-bred, and when eroes, what I think is usually understood as a halfbred, a good half bred or a good Hackney !-- I think that a good half-beed would be better. I would wrefer a good half-bred at any rate to a Hackney, 4072. You think that they would be obtainable if there was a demand for them !... I think so.

4073. Then we understand you prefer that for the mares in your district to the Hackuny or to any other breed. Ilke that !-- Norme of the meenle in my district are attached to the Hackney, they my that he develope carlier and in very easily handled

4074. Still you roundly would prefer a good wellhred half-head to any other after the thereagh bred!-I would, but the great thing in our district is to im-prove the breed of mares, I would say the sires are good exough in a very but the mares are very defective. 4075. Can you reaks any supporting for irresposing the mares !-- If you had price given to the farmers to learn the best filler and record. I would say it would be a great thing, and then shows in the localities Ven could have a show in each harney and a few

prime for the best mares, thay are much interested and very anxious to keep them, but they are so poor they would sell anything they have to try and make 4076. Local shows you mean, prison at local shows for mores who have beed fools?-Xes, for the owner or who might have young foals that they would keep to breed, to encourage them to keep them because all their best fillies are now bought by freeigness, and

anything they have in the shape of a good bosso or good young beast of any kind they sell then to make the mency and make ends meen, they want soon encouragement to keep them; the best sires in the world would not produce a good feal from the mares they have at present. 407. Sir T. Kancorra. Are there many of these filles bought by foreigners!-All the most likely fillin are

bought by foreigners; as a matter of fact when a man has a good filly be is bound to sell her through 4078. I suppose they buy them at any cost !-- They

buy them at any cost.

4079. Did you notice a suggestion made by some witnesses before this Commission that the old marri used by the Army Service Corps and the Artillery. when their work was done and they were no longer fit for use, should be distributed among the farmers Show, and houses o

133

30 m 94 1996

1050. Why not 1-I would rather breed from are bound to sell well; they must be shapely soo. PORTER MATER 4102. Can you say from your own experience 404). You believe in breeding from vopus masses to whether Hackney borses get borses with better action than half-bred horses !- No. 4082. Mr. Canny.-Would won breed from a two. 4103. You have not much personal experience of year-old!—Yea, I have beed myrelf from a two year-old. And found it successful!—And found it 4104. Therefore, though you have a preference for

saccessful. a kalf-bred sire, you have never bred from a Hackney stellion yourself —Never. stead. Then the nursers of your evidence is that for high-class, with a good mare, you would breed from a 4105. Have you ever bred from a half-bred sire! chromehiced 1-Entirely. - Nove 4080. And you profer a good half-bred sire to a Wackney !-- I do, I think the Hackney mists do 4106. You have only head from a thorocophesed! 4107. And I gather from your evidence that you

fairly well, and some of the recole like Harkmen. they mature carlier and are saleable at a year or a your and a half old. 4086. Are they good workers on the farm!-They are good workers on the farm, very decile and easily trause

4037. You suggest that local shows should be held for the purpose of improving the bread !-- You, it would be a great improvement 4008. And if the board of mares was improved you

would have all that was desired as far as sires are engrerned, you have good enough sizes in the district if you have good mares !- I think so, the want of good mares in a great thing, but we want sires badly. You would be in favour of registering every

nice L. France accord of co. 4010. If you register him he must be sound !---! would prohibit, if I could, every unsound size and mare from breeding at all, become it is a dead less to the country so far as barolitary disease.

4001. Mr. WHITTON.—You would be in favour of

registering every kind of sire!-Oaly the sound sires. You would not mind what breed it was provided it was sound!--Provided it was sound would like to make to the Commission, Mr. M'Clanry ! 4093 You talked of the larger and smaller class of -Well, I don't know, sir, except we feel that we don't benefit much from the Royal Dublin Seciety's formers, what do you call the larger class of farmers, mesa up to what valuation about !-- I would say Shows in Dublin; we are too remote and terrilly from £50 upwards; I would say he would be of the some way by the Government it would be and use

high-class of farmers 1004. You would draw the line at £50 t-At £50 4000. You would call those above £50 the larger ? -Yes, or you might lot it down to £30; any purson with £50 valuation is meanly able to mind immedia they are rather independent 6086. Are there many faroure in your district below £30 who breed howers -Oh, must of them;

tay from £10 to £30 band borns, must of them; ther would knop a horse and they somerally keep a mare, and say they will have a feel out of her, to matter how she might be as to shape, roundness.

4097. Then any successions as to preventing these men from breeding would not be practicable !— Union they would be unseend I would not prevent then benedice.

present; they are breeding from very bad glasses. \$009. And manuful classes !-- I darway they are,

www. And unsound classes 5-1 deressy they are, but they are breeding them anyway. 4800. What fairs in your districted they generally sell their bornes at t. Even's fair. Spannil hill is a creat

fair in our country; we have several burse fairs in Sense; we have a Millery for and Millarb fair. 4101. Do you find house with good action self-

4005. Provided they had sound mares you would say these men ought to be allowed to breed !—I think it is a dead less to them the way they are breeding as

would cost the price of the borse shtogether if you don't sell well 4110. Sir T. Esstoren.-Do you find the railway

nearer Dublin.

horses with a friend of muse.

rates have an injurious effect on the trade t—Oh, certainly; if you have not a good home and cannot sell well, you won't try it again; there are pleuty of people who could not affeed to run the risk of commoun. 4116. Do you think the trade could be developed if the railway rates were not so high !-- No doubt shout it; people would be anxious to improve their breed of

think it would be better if more return were given to

seal shows!—I think so, to improve the breed of marea.

4106. Do you mean shows got up by local com-

ditters !- Well, yes, in connection with the Dublin

4109. And the Royal Dublin Society's Committee

do you know how that is appointed at present !-- I

do; I know now that a appearant at present t—I do; I know the mambers. 4110. Do you know how it is appointed!—No; but I think there could be no fault to be fruid with

the members at present in my district; but it is

rather for from some parts of the county for the people

to attend with their mores, they have to go to Kasis.

place in my escenty that I are aware of

4111. In Fonis the only place !- Engis is the only

4113. And you think that the smaller class of farmers, the farmers under £30, require more help

then the larger class?—I think the larger class of farmers are able to help themselves, but the smaller

4115. CHAIRMAN.-Any other suggestions that you

fares and our expenses, if they could be substitized in

we are terribly handscapped compared with places

horses with a friend of mans. If you don't sail well they are excrited altogalise, it hardly paid expenses to come three, and, as a matter of fice, I need hardly tell you he would not come there again, nor would I unless I was uses of sailing my base well.

4114. Mr. Carry.-What do the rollway covapanies charge from Miltown !-- I could not sell you,

but it is rather beavy, and you have to remain in

Deblin for a week with your man and becone it

I attended the Dubin Show with

If you don't soil

Mr. Boron

homes and moved some han to not a most market for then if they could do it with less risk 4117. They cannot do it now !-- They won't do it now : from the experience of a few of ne we would not

think of doing it.

Mr. HARRY M'DONNELL, Letterfrack, examined. 4118. CHARKAR,-You live in the county Galway ! beauting t-I do nit.

4121. And you think the soil is suitable for horse -Yes, sie 4129. Do many farmers brood borses !-- Nearly 4119. You are a land agent and furns land there! everyone keeps a mare, nearly all the small farmers, 4123. What class of mares 1—From 14 or 14-2 Yes, sir. 4120. You are well acquainted with a considerable

ertion of the county !- With the Connemara portion hands the Compensors pony. of Galway.

4124. What sort of stallien do you think is most

Printed masse discussed by the University of Southwardon Library Discussation Unit Printed image distinged by the Limsgrapy of Southernston Library Distingtion Line

May 20 1835 a van blands I -torus of mure t-I should my a Nr. Harr Walsh cob would suit the country very well. 41%. You don't think that country is spitable for hreeling hig horsent-I think the fairly well-to-do

people could 4125. I conclude the majority of people there are not well-to-do i ... No sir they are not 4127. But the reverse of well-to-dot-Yes, but

they must always leen a horse and they ponerally keep a working mure with a view to having a foal each 4128. Do they sell them early !--Sell them at six months old, they are taken in droves to the inland country, Kildaw, Moath and Resconting.

4199 How do there sell them !... They sell them at six months old and get very had prices; as Westport the Let Newscher I saw them sold at from thirty

shillings to £2 10s. 4130. What were those fillies got by t--They west he got by some of the local horses there 4131. One man I reprove buys a lot of them !-

Yes, different people come down there to hay them, take them sweet in deveces. 4132. Stenishi from the dama !-- Ves. sir.

4133. The fonls and clause rouse into the fair tearther !- Yes, and the fool is taken away, renerally ruled to Athlore, and started to walk from there, some come to Reservement, they walk them through the country and sell them whenever they get burers.
4134. The Congested Diviriet Board's stallions I process cover in that district L.-We have then in

Connecera. 4155. Has that affected the breeding of horses!-You I think, they have done seem good in the way of Webi cobs but I don't think the Hockney-be in touch him, they my when they come to Connesses. they only want to get a near, they don't want to have

4136. Do you think the Webs ook is better than the Barb !- I really think it is, it is hardler; Mr. Henry had a Barb, it did not fit the country, it was teo leggy, no body about it; we had a very good sine there from the Royal Dublin Society, at Childen, "Watchweing." 4137. A thoroughbred 1... Yes, he head some year good ones. 4138. Did his produce fetch good prices !-They have not been sold yet, but there are a good many inorising about there.

4139. Are there any feels by "Watchering"t... Oh, there are, but I have not heard of them being sold, the well-to-de generally went to " Watchapring and ther keep them, they are about four-year-old 4140. His fee was higher I conclude !- Yes, it was, it was I think £1 Is for over £50 valuation, the Concessed Districts Board is five oblitions. really if everyone is allowed to have a sire in this country it will rain the breed of horses altogether.

they don't mind whether they are well brad or not for the country people generally get the same price for e toal. I conclude that the smaller farmers very

selfom patential "Watchspring"!—I don't thung they don men.

4142. The fee was £11—I am not quite sure ; I
think it was £1, but I know he was a very good sire.

I have some of his gets myself, and they are very good. 4143. I see in your answers to quoriosyouadvacate a Suffolk Punch !—Well, yes. is conceally about 14.2 or so

4144 Would be not be too big to get posies !-- He 4145. I though a Suffelk Punch was a much birrer horse!-Something about 14.2. 4146. Mr. Warson —On an average it would be at least 16 hands 1—Well, comething to get something about 14.2, that is what we want, because they don't

want to set a horse in our country at all : they sale want to get a posty. 4147. CHARREAN.—They can always self their foals. I suppose i—They would self them at some

4148. At these fairs 1-At Cliftien and Westors : those are the peneral fairs. 4149. Do you thank it pays a small farmer to

bread a feal each year !- They must have a more; no matter what they get for a foul, it is a small undit 4150. The fee is so very small the service for !- Ver 4151. Are three any half-hard siem in your ditriet !--Well, I knew of one half-lend sure and we had some very good harners lowest from him; he was a horse called "Tassaway"; he was a hulf-bred.

4162, How was he bred !--I could not say, but he

name from the county Meath. 4153. How hig was he !- 15.8 or so, but we had 4105. How mg was not - 10.0 or so, but we had some very good harmons horner from him. 4105. Have you annual with the ponies t-Yes. 4105. Have you anything you would like to seggest i-Just about the sives; I think it would be a

very cood thing that every one having a sice should take out a licence, that licence to be given by agenbody that understood the class of beens or your that saited the place, and anyone that had a sire not licensed to have him beavily fixed. This would never

4156 But it would hardly you a man to view a suitable sire down there to cover at 5s. i-Unless the Government did it, I don't see a prospect of anyone else doing it. 4157. The Government have a great advantage over any local enterprise !- Indeed they have 4158. I suppose there are plenty of stallions there now of different sorts 1...Oh, yes, but very had.

4159. Do you think the positor have deteriorated or improved i—I think they have gone back very much. We have not the old Comments breed at all coarcely; they are a bit hardy, but weedy from interbreeding.
4100. You think it is from inter-breeding!--!

think it is from their own kind, I do, mideed 416). And the use of inferior sires that the horses have deteriorated !- Yes. 4162. Mr. Fryswyressaw ... Von woold from what

rou know of these stallions, pesfor a Walsh cob!-Yes, sir 4163. Have you any experience of them; are there any of them down there !-- I think I now one of them there with the Congested Districts Board, a horse

called "Sanbaym 4164. Is that a Welsh cob !-- I think he was. I know his gets have done very well; the climate agrees with them very much. 4165. But if you oreld get a horse like "Watchprovince "I.... I readly think ha fits all, the more and well-

4160. And if you could got him at the same price that you get scope of these other stallions, a Welsh ech or Hardway, we will say for Se, which would you prefer !-- I would rather have " Watchstring." 4167. That is an animal of the Watchweener elect -Yes

4168. A week or two ago we had some evidence ven that I think thirty years and or more there were a number of Arabe and Barks brought over into that country, and that they greatly improved the breed of Comnemors posice?—I don't think they improved it,

4169. By a Colonel Martin, I think 1... Yes, siz a row. sry a Colonel Martin, I think 1—Ye, sir. 4170. That they did a great deal of good 1—I could not say anything about those, but I know an Arab that came over there did not do very much good. 4171. You mean the Arabi laichly 1—Yes; Mr. Henry had one there at Kylemore, he was too legs? altogether for the country. Arah or Barb, abould you think that as far as blood is

Mr. Second

recovered that that would be a good eross to introentermed that that would be a good eross to intro-dice to rehabilitate the Contentus pony's—It may be, I think it would be, but really I would rather have the Watchspring class. All the Watchspring class you mean the Laglish thoroughbred of smitchle make and shape, and

action, at a low price t.—At a low price,
4174. Sir T. Emonna.—With regard to your sargestion of Recessing the stallions, would you have a suggested a recently the stalling should be brought before

a committee, and then any stallion that was fit for it should get a license, and the others should be cast aver, and if such a stallion was not cut or castrated

4175. Would you have the stallions examined by a veterinary surgeon 1—I should may so.

4176. Would you consider that necessary in your system of licensing ?-- Yes.

4177. They should he sound stallions, fros from any investigate discount stations, from trops any investigate discount of the state of the 4178. Mr. Carew.—You have said a good horse like "Terraway," was he half-bred !—He was.

4179. You have no idea of his brooding 5-I have 4179. You have no some of his brooking --- a never gat, is was there severated or twenty years ago. 4180. But his profuce were good 5.—Very good harsess horses. I have driven one of them sixty miles in a day.

4181. Did you ever see him?-Oh, I remember secing him 4182. Was he a small horse !--No, hir, 15.3. a hir

adi: borre. 4183: Mr. Wannen.—Talking of Barbs do you know that one of the heat Early stallions in the that one of the sees hard stations in the United Kingdom has been standing in Coassemans for the last two years 1—"Awfully Jelly," so I heard, 4184. You have not been in Castel when he was standing there 1—I bought some of his feals. 4185. Were they big enough 1—They accounted to

be too light for the country. I maid £7 or £5 for the feels, and ised to sell them going four yours for £9.

4193. They did not grow by enough 1.—They had not body enrugh. 4167. Do was know that the neonle of Cliftian were consulted about the horse they would have sad they said on no necount to send them a horse like

"Watshepring" !—I did not hear that. I don't think why knew much about "Watshepring" nutil hiely. Mr. Samuel Jouneron, r.p., examined.

4215. Do you live in the west side of the county ! -Nine miles west of Ballingales. 4206. He they breed many horses in that part !-

4207. Do you breed horses personally 1—I do. berness and good weight-corrying bunters. I approve of the thoroughbred horse, the but thoroughbred bere that can be got with good bone and substance, and puper thopes, and free from heroditary complaints, but I believe good half-berd haves are very useful for my district. What I mean by half-berd is the first

error of a thoroughbred borse and the good old Irish. mare, which is very rare now, but is sometimes to be get if only looked out for properly.

4209. What is your definition of an old Irish mare? -A good old breed of Irish mare, short-legged, good

shouldered mare, good slanting shoulders, proper action, in fact the animal it has been said is able to

the control of the co expetimes get a good hunter of the class, but invariably they were very good harmess horses, and not too hair about the legs, showing some kind of distant blood, I don't know where it came from but they are an old

four years ago, and did not know how his feals would 4189. Has be not been in the country five years !---No, only four. o, only must. 4190. Have you not seen only of his produce sold to No. I have not.

4191. Do you know the horse himself !-- I do. Mr. Berridge has bought him, be stands at Ballyna-

4199. Do you think he has bone enough for the mares of that country !-- I think so. 4193. You say the outside public condomn the

4198. You say the cutside public connenu use Hashing is—Aliogelder; they come into the country to buy a clear of pory 14 or 14.3 hand, but the Hashing grows them higges. 4194 Who are the cutside public is—Different people who come in to buy cattle, and who often buy 4105. That is pole posies?—Yes, sir.
4105. Then it is the people who come for pole
contex condems the Hackney?—I really don't know

what they me them for. 4197. The people themselves, the furners that leved these posies, what class of animal do they wonst -The Welsh cob, about 14.2, they don't want than very

hig, they scarcely use a cart, it is all carried on the 4126. Can you say whether the produce of the Welsh cohe or the Hackney are the best !- I think the

4189. And you have seen both f.... I have seen both a lib. And you have seen some in a lawe seen teen.

I think the Welsh ceb suits Commonara best, be is a short blick horse.

4200. You have never seen any Hackneys except that one !-- No. 4201. And you have never beed from any yourself 4202. CHATRIAN.—In three any faction suggestion

you would like to make !... I think not 4203. You think the Welsh cob is the most suitable animal for your district, and you think the stallson-should be liceased t...I think so. You rould not improve the breed of borees in our country if overview was allowed to have a stallion, because the country people will go to the chespert.

class that is very well known, and it is off them the

best weight-energing hunters have been bred in any of her own closs out of a mare of her own plant There must be a distant gross in the mare of course of thoroughlored, size shows a lot of greetness, a clean

scorrogamen, one shows a not of sweetness, a clean bead, and all that nort of thing. 4211. You say you breed hunters and light-has carriage horses 5— You. 4212. And to breed hunters you use a thoroughbeed size; what size do you use to broad carriage houses!-Well, in breeding from a thoroughbred houses !-- Well, in breeding from a thoroughbred

times out a hunter and sometimes got a carriage hoese ; for any that are not hunters, as a rule, are carriage horses, or they may be remorate for cavelry, but, as every breeder known, for one really good one we get a syeat many had or middling open 49.3 What is the arreal class of horse that is bond 4213. What is the usual class of norms runs is used by the farmers in your part of Galway t.—Indied I may call it a very nondescript breed, the house had by the small class of farmers; they go to the changest

animals they can get, which is often a distant cross of the Clydesdale or Suffelic Pench, or something or that kind, and they are a very bad lot. I have come from a large graving district, and the large graviers and gautleous who own land themselves try to keep the best blood they can, and generally keep them to three or four years old and Er Sannel

some mecale who tesis them been them to fire years I very often train them myself, and have them beating, and try to put them to as much as I can. 4214. Them I conclude the large farmers generally use a good size, and the small farmers only have record to the fire, the small for 1—I am greatly should that the want of capital amongst the small farmers is the crying ovil; they go to the cheap size. Then, as a rule, those people rell them as a year and a half old and sometimes as fault. Some keep them to two years old, and then they got their little work cot of them, which is of course very injurious to the horses They begin to work them at one and a half years old, and rain them by that, and they try to sell there as two and a half year olds, and some sell at three years old, but of course the large gravier who has large

tracts let them run from thace to four years old withont ever touching there 4915. What sort of mares do the ferouses breed !--As a rule they are too small and weedy; we want secrething to increase the size. Indeed, we want more

improvement in the mures than in the sires, as far as 4216. How would you suggest to improve the marcet.—We have a very good loud abov in my locality, which has been worked un wonderfully by some of the local gentry. Lord Ashtown is the head of it; he has done wonders for it at Balthe head of it; he has some women for it we im-linative, and there has been a good deal of good effected by helping those shows and giving good prime for the good animals. But I would suggest going further, and it would be this, if possible, to going tereser, and is would be took it position, to induce the owners of these animals, in order to get prines, to hold them on, to keep them on. Well is rather a difficult question, or at least a difficult matter, perhaps, to touch on, but I think that would be one way it could be done. It would be by giving there of course good prises, and then, when the good sizes are sent down by the Government or Royal Dublic Society, let them have the service of them grants as an encouragement; take down their yeaper description as the time, have properly qualified ven-riousy surgeous to do it, and qualified men to take down the descriptions of the mason that would take those prizes, so that there could be no scheming or dedring about it, and he core that the same many would be kept; have a regular guarantee from the formers that they would keep them for a certain numwould effect greet good and induce the farmers to

4217. You think it is absolutely processary to give additional facilities to farmers to induce them to small their mares to more expensive and suitable atallional -I believe that would be a step in the right direc-

4318. In the Royal Dublin Society's scheme work-ing in your part of Galway !---Ob, yes, it has effected a event deal of good, and has given records were teste for gotting the right homes and getting into the good

4219. Do you think the small prices given to these mores of £5 and £10 has the result of industry farmers to keep their marms |-- I believe it has end would have, if carried out further, as I suggested, if they keep on those mares and give a regular guarantee to keep them for a certain number of years, then to allow them to have the service gratis, I believe

to allow them to have the service greats, I believe would be a step in the right direction. 4220. Are three plenty of malable stress do you think in your part of Galway 1—Me, we have not many untable sires in my locality, we have got what I consider one good thoroughbred heres belonging to Lord Ashtown, a very well known old horse called Torror, one of the heat known horses in Galway, head by one of the Blakes of Ballinafad, one of the eld Ballinafad breed, get by Coward I think. There is another good horse about six miles from Woodlawn,

on the other side, owned by Mr. Dolphin, a horse on the other side, owned by Mr. Dolghin, a home-called Drono, that is a good theoremistic home, as-least he is getting good ones, then I tunk that is about the end of them. On the other side of Bullin-size there are a few good bornes; there are a couple and good theses womed by Mr. Lamburt; there is any old home side of the Blike breeding, Bellmand, if this kit at it one of the best breedings, Bellmand, if this kit at it one of the best breedings have be Ireland, one of the best bonad thoroughbred home. I ever saw, he is an old house now.

4221. Are his stock good half-heed start to t believe they are, I have seen some of them very good, I never bred from him myself. 4252. What horses do you use yourself 5-1 lane bred as could possibly be. I cannot follow his grand

hred as sense pository to. I cannot sellow in grand-dam's pedigree for enough, and he is not in the stud-book, he was get by Elaindrumscond by Elain Athol, and his dam by Solon, I could not follow the breeding of the dam for enough, but the horse is osting

4293. And in your opinion what stallies do you consider most asitable for the ordinary more of the district, you spoke of the maren being lishs and mend for the district, there would be the thoroughhead for those who can afford to wait for the progress to come up to the proper ago, and afford to train them, and who can afford to have the proper mares to put to the thoroughbond horse. the half-hred for the man who could not afford to pay the hig fees and wants to sell the produce earlies, if he wants to get a hit of farm work out of them they will also do it, and the thoroughbred would not as a rule . I think they would be very useful for the closs. of farmers who would not give thefee of the thoroughhend latere and would not wish to have him because he would be much rappe expensive in his keep if properly done, the half bood one'd be much more descrip long. and if you don't feed the thoroughtred we all know be in newhere. To improve the size of the small marce you want comething hig and useful for apropertural work; I believe in the Chydeolale to improve the size for agricultural nurscees, he is the purest heard of all those larger harves and most restul-4294. Then the three sires you would recommend are the theroughhred, a good half-bred, and the Clylies-dale !-Yes, sir, and the half-bred is should be readleated in the first cross from the thereprehiesed horse and good old well-shaped Irish more of the district, the good short-leaged good shouldered mare with stepping action and free from hereditary turns. 4215. Have you always lived in Galway !--Yes,

since I was been 4210. Do you see say difference in the breeding of the horses there now, do you think they are un-proving or deterioration !--Well, somewhere about when I began to know what horses where first in my beybood I think the horses were better then, and it think they fell away for a considerable time and get ready, but for the last two or three years I notice that there is an improvement. I think the house-are gotting better action, and I attribute that very much to the interest that has been taken in the hrooding of boress by the Royal Dublin Scolety

and those connected with it. 4227. Do the Countinara ponies come into your district in droves 1.—We have an occasional con-

Some of our people go down and huy them, and very useful they are for harness work and small farm 4528. Did you ever breed hunters out of them !-I have; I have heed one of the best hunters I ere had out of a Compensara mare by a thoroughbout horse. Steelboy by Tom Steels. 4229. Have you any personal experience of head-ag out of Hackney houses !—I never have, hat I have seen some in my locality, there are a couple

oward by my neighbour Lord Ashtown, one of them. I counter one of the best specimens of the breed that outd possibly be shown by anyone.

4350. And their produce?—I saw a good many 430. And their produce:—I are a good many with Lord Ashtown, and they look to be nice animals. the people about I think do not seem to have

availed themselves very much of the circs. availed themselved vary mines at the stress.

(231. The farmers don't seem to be favourshly
disposed to the Harlmay stallings.—No, they don't
ears about them; personally I don't like them.

(232. You have bred a hunter out of a Commenter.

pony by a thoroughbred hurse 1-I have a good

1933. If that Counsmara pony had been got by a Hackney stallion would you have expected to have brd as good a bunter !-- I think not. I am sure there was not a drop of the Hackney in her. There was nothing known about Hackneys in that district at the time. It was a good many years ago. She seemed to be of a good old type. She may have had sensou so se or a grou out type. Sase may have had a soon of the Arah in her; something very good in the animal. My idea of the Hackney is that he somet get a good hunter. I don't see how he can

from his action. from an action.

1934. Not binnelf but the more got by the
Hackney stallion, do you think she would be blady butting at all. I am sure they are useful in a way. handing as an 1 am sure view are used in a way, and they are very shown nice horses about a park or town, and I which they might go nine or ten mile-very well, but if you wanted than to go fifty or sixty you would be a long time coming to the end of

your journey. your parmy.

4255. Do you think the introduction of the
Hashrey blood in Connemara is likely to affect
bonies breeding in Galway 1—To a certain extent. If they come to a size in Connemara they might be brought further into the country, and I etunider that would do a great deal of harm. I would be very sorry to see it get in. I think it would apoil our winters Irieli hunters altogether if the Hackney hunters altogether if the Hackney Laurences they are, but I den't think they can have power of endarance from the great high knee action show have. I think they wont was thousandres out. They pound too much, and another thing that action

sensors to me to come more from the knee than from the shoelder. That I consider must wear the animal cut, and they cannot have the power of enderwace of a borse with the ordinary fair level notice. I like the even action, more low than high 4235. Mr. Cannw.-Too great a waste of power l -That is it, altogether too great a wavie of power.
4277. Mr. Fivewilliam. - You may you think the

blood of the Hackney is a soft blood; you say that ten miles, but that he would not do the long journey that we are in the habit of doing with the back one born of the present day !- That is my opinion of

4288. Do wen think that if this blood was introduced in a large way in the district that it would in course of time tond to produce a softer bred animal than you have got at present !— I am perfectly certain it would and they would not be nearly as suitable to good half-bend horse. 4219. And if so it would tend to deteriorate the

beesd and it would also tend to damage the prestige that the breed now has got as keing corragious with treat standes !- I am sure it would 4240. Sir T. Esconor. - Have any of those American berses reached your district!-No, not exactly my district, but I have seen a couple of them in Roscom-

non, at least I have seen two Argentine horses.
4241. CHAIRMAN.—Not stallform!—No, they were geldings, they were brought over there to bunt, and most uncleas brutes they were, cross made animals with no shape or power.

animale!-They did, they were a complete failure, no smore of them came, and those were done away with 4243. You have not seen any of the North American besses 1 No. I have not.
4244. Col. Sr. Quintin. You say that you have near

some of the stock got by Lord Athtown's Hackney 4245. What ages were they!-I have seen them as

fools and one and a half year old. 4346. No more than that!—Not more than that. 4247. So you could not really ludge what three

would grow into boal could not be save what they would do as trained house. 624%. I want to try to arrive at what class of animal they would grow into, for what purpose could they be used whether as riding or driving horses, or both combined !—They struck me as being more like

harness borses, any of them I saw, I thought that would be about what they would be enitable for.
4249. Mr. WREECH.—Do you know of any other natances of hunters being heed out of Connectacu passances of assisters being fired out of Connectacus passes besides the one you had!—I have often heard of people having good hunters out of Connectacus

4250. Then you think that Connemara ponies are becarist into your district and pand or hunter broad mares i-No, sir, they are not generally, it is only a very isolated case.

4251. Do you think that Connemary would be mited for a thoroughbred horse, do you think that the produce would be sufficiently bardy !....I think not 4252. You think they would require some stronger and coarser bores !-- I bullove so. 4253. Practically your opinion of the Hackneys as been formed on Lord Ashtown's horses 1—It has,

I know very little shout them unless what I have seen of Lord Ashtown's horses, one of them is a beautiful horse to look at and one of the best movers I ever now a horse called Marmadala, a abustnut here, perhaps you have seen him.

4254. Vos. like him the best of the two l-Well.

that is a matter of opinion, for myself I don't think he might be as useful as the other one, perhaps not, 4255. Is your opinion as to the breeding of Hackeva formed on what you have been able to learn from Letel Arbitown I -- Oh, I have seen Hackarys before I or ciceely as I have since Leed Ashtown one them, for as circely at a nave muce Loca Assistance government. In drive a good deal past by the read where those horses are, and I take a look at them over the feare and form my own opinion. But of course I have next Hackneys before, and my opinion is

that there is too much waste of power about them for 4256. You think they would soften the blood in the native horses !- Yes. 4257. Where does the soft blood in the Harkney

me from t ... I believe from their setion and the way I have seen them get so heated in work that they would not have anything like the arduring nowar of our horses. not have anything into the course from the course of th

mind it in shown. and it in shows.
4259. Where t—I have seen them in some parts of

agrand. 4260. Animals you know to be Hackneys t... Yos. 4261. Where do you think the soft blood comes in t I know nothing about the breading of Hackneys, I may admit that I have too broading a machiner, a there are I formed that existing

4162. You have not seen Hackneys that have not got extravagant action, but only ordinary selice, and can use their shoulders! -- I have seen some Hackneys that had not as high notion as others, I believe it is not natural to the Hackney to use his shoulders properly.

believe he is not made for that

For its, 1885

M. Saward

M. Sawa

138

with the Irish mare 5—You want accepthing to throw weight and strength into those weedy mares, and I believe he is the truest blood to do it, and he is always a good storper as a rule. 4285. Then you think action is a desirable quality

a good stepper as a rule.

4865. Them you think action is a desirable quality
in a borne 1—60 course it is, now I am talking of that
low cleas horse, principally for exprincitional work and
of course it is a great point to got the agricultural
born to wallt wall.

here to wilk well, risk marrer deficient in action as a 120. Are the link marrer deficient in action as a rela, the common marrer of the favorest i—Well, there as a good many rather evolved with terrigist thick shouthers and a great amony of them evolvenate. The poople say: "We will have comiting east of the marre and on will saredher to a after any the will also convoice.

and we will send her to a size and size will do our week along with bereding a foal," it is a great inducement to them to got a send-thing out of her. As a valle thay require to breed some animal that they can work on their farms in addition to breeding for sale, I believe that is the only way that horse-tereding would be

profitable to the small forces:

4267. Have you seen many of the produce of the
Clydesdales and the mares of year district !— I have,
a great many.

470R. And are they a fairly nice animal to look at V.—I would reader have the ascend or third cross away from the Chylendain.
4263, You would reather breed back again to the thoroughbred 1—I would, because I think from the first cross they perhaps get too beavy and this and times.
4270. Too like the sires 3—That is no, but a drop 4270. Too like the sires 3—That is no, but a drop

throves great strength into the small naive and her progress.

421. In the half-bried stabless that you would register would you require any particular musher of accesses 1—I would not go fewther than the first cross of the throughleved horse on to a good wall-shaped old Irish man, that would be my idea of what the half-firsh horses should be.

All fared horse, then worse or process the sol to the state of the sol to the sol the sol to the sol the sol to the sol t

further.

473. And you think it is safe when you are selecting a sire to judge by his appearance when you have no back pedigree to go upon 1—Wall, it goes a long way, of course, as a rule like begree like.

way, of course, as a rule like begon like. 4274. Even when the breeding is uncertain 5.—Of course I would like to know as much as possible about the breeding.

4375. Would you not think the result would be such more likely to be certain when you were able to truck his politice back for several generations i— Most certainty.

4276. But at the same time you would registee a sire without being able to teace his pedigree 1—1 would if he was a really good looking one and there was no assionantees, and good alogoe. 4277. Do you think in your district it would be

casy to find many good hald-ired sizes — I know of a few. Thore is can hore, the bestheres I ever knew, in my district, and he made more money for the yeople than any boxes I ever knew, that was Thunderbolt.

4278. How was he bred — A half-fored horse by

people than any boses I ever knew, that was Thronderbolt.
4278. How was he beed 4—A half-fred horse by 90d Thunderbolt, whole was thereughbred, and by Smillhopes, one of the best horses we had in our country for getting weight-carrying business. 4279. He was a great hig-boned heree 1—Yes. 4280. A blysized horse filmself4—Yes, 16 hands.

4281. Is be in the country stiff!—Yes, this halfhred berse is within two miles of Woodlaws, a farmor manued Planagae owns kim, he is an old born now.

4282. Do you think there are many horse of that

sype.—No, there are not, this is a horse that so smalled useful better, normally more larger, and scorelines horses better and covering a caraly removes, and his pairs a rule was able to with no hereditary disease writers there was smalled with no hereditary disease writers there was smalled writy wrong with the mars. I have get 870 for the vary wrong with the mars. I have get 870 for the year olds out of the halter get by that hows, I have get 8100 for a four-year-old trained hermer by

him, if you might call a four-pear-out trained frames by him, if you might call a four-pear-oid a trained hunter. I have seld them at £120, £120, and £140. 4383. But these were out of well-bred mares |---

Tes, good halfbred marce.

4284. Was there a Clydesdale standing in the sense district 1—Yes, there has been a Clydesdale all strough my summery within mins or ten suites.

1285. Which horse would be most popular with

the farmers, a horse like Timederbit or the Clydedale I—Timederbit by far, he got too many mane, his produce were soully sold, they did the farm work and it did not injure them and they could be old at form and five years, the could be found to \$400 MeV. The could be supported to the could be come horse like the Clydesbide I—I do, I believe that

come horse like the Grybouksh !—I do, I believe that the ordinary must flarmer werk spel the for a poul half herd home, not to talk of a thoroughberd losse, so he must have sereableigh at a low figure, and the so sopply that want I think I would give him the Chyboeksh burden anything else under than those monged hereds that are in the country as present. 4397. I wappen these are a great many hot stallines in the country at present.—It is inferred with them, it would be very well to have sure

stellines in the country at proceed.—It is infected with them, it would be revy well to have size registreed, I believe threeophly in that.
4305. Would you got a ground tax on stellin horses and then recluse it, provided they were stock, or have you carried as any parasitise platin-like solution to any "you must get aid of a certification of horse," saying to a man "you must do that "or "you must do that," and you have you have you will not be solved to you "you must get did of a certification of horse," saying to a man "you must do that."

te superty, I don't bulken in that, but I would consistly a part a good account to the burner, and there, when it is sometime to the consistent of the consi

and got prime should in order to bedues the owners to keep those source get the new ice of the best Society or Government bereas grating. It think southing workly the have more effect than that.

4390. Would you broad thous 1—No, because that

4370. World you head those 1—No, became that might interfere with the value of them afterwards to the farmer.

4391. How would you be sure that the same name was loost—I would be almost sure, I would find was loost—I would be almost sure, I would find

a have the owner give a guarante, and thin have I veerinary surgious and competent not to describe these mans properly and loop a peoper mound of them, and I then't think then there could be very many mintakes in the matter.

4592. You have not heard of such instances as 4592. You have not heard of such instances as

. In the control of t

about them, but you cannot believe all you hear from 4191. Do you think they are taking more trouble about keeping the pedigrees of the animals they have I

I think they are morn interested in horse-breeding altorother, and more anxious to do the thing well though they have been getting bad prices. 4255. But the prices of all horses, except the very best ones, have fellen steadily during the last four years !- Very much, and there has been very little

demand for remount horses. At the great fairs of Ballinusion and Banagher where we used to sell a large number, there were very poor prices this year.

420d. Even from foreign Governments L1 was wer hard to sell them-

4297. Were there plenty of remounts to be sold !-There were a great many, and people had to ascrifice them or bring them home. 4298. What becomes of these remount borses when they cannot be sold !-- I goodsto they must be sold then for agricultural purposes and harmons at a very small price, I think I had seven of them myself at

Sunagher fair, and out of the seven I only sold one, they were all suitable for remounts I think, at least all but one which was too small and I could not get them away unless at a sacrifice, they were only three page old, so I said I would let them remain on the farm and see what they would do at four-year-old

4200. Would they pay for the breeding !- They would not pay at the price I was getting, because I take more trouble than some people do about foals, as a consequence, they never grow as they should, but I shed my feels during the winter and give them plenty of case and hay, and let them run in a dry

in my district a great many people take no trouble about foals, but let them run about the farm during the winter and let them pick up what they can, and,

night, and let them have outs in the morning, and they grow bigger as a rule. I don't believe these horses I speak about would have grown to remounts only for laving fed them as feals.

4300. Mr. Catter.—What age is Thunderbelt!— He must be over 20 years of age. 4301. Hr. Firzwitzian.—Therewere two Thunderbolts, one belonging to Mr. Alexander, I forget who

the other belongerito, one was a very speedy hour!

—A hir brown here. 4302. I think it was by Stockwell !-- Well, that is not the horse I alluded to, this other borse was bred by the late Mr. Irwin, of County Galway. 4303. Mr. Camew — You don't know what he

field during the day and put them in the shed at

was by I-By Smallhopts.
430s. Sir T. Essexus. -- Do you possess any of these old Irish mures !-- I do, I have a couple of them with a great deal of that old tyre 4300. Then you believe it is a really gramine rece of marco1-I believe it is, some of those old marco died with me, and I kept on their breeds, I kept their

daughters to breed from 4306 Do you think it would be possible to preserve that breed in any way !- I am afraid it is rather too 4307. I suppose really we have no definite informatten about it !- No, I don't think so, it is a thing

nearly overyons knows sensething about, but still we cannot go for back to trace it, the fact remains that it is a capital breed.

6308. With you are there any farmers that have breeds of horses like that in their families for genera-tions !-- A great many, and would not part with them.

4309. Mr. Wansen.-You have never driven Harkneys vourself 1-Nevec.

The Commission adjourned to next morning.

NINTH DAY _WEDNESDAY, NOVEMBER 25vg, 1896 Present :- Mr Pency La Toucese, (in the Chair), How H. W Fitzwilliam, Mr. J. L. Carrw,

M.P., Col. ST QUISTIN, and Mr. F. S. WRENCH. Mr. HOGH NEVILLE, Secretary, Mr. Jones H. Banner, Ballyvocases, Domeralia, Co. Cork, anamined. 4310. CHARMAN.--Mr. Barry, you live in the

county Cork !- Yes, 4311. You farm land yourself!-I hold land nyself; yes.

4319. You have had considerable personal experi-ance of the breeding of horses, I think I—Yes; since I was a boy I was more or less mixed up with them. 4313. Will you tell us what sort of horse you kered !--Well, I breed off a good class of mare.

4314. What class of stallien !-Always a theroughbred stalling. 4315. When you speak of a good class of mare, you meet a mare got by a thoroughbred horse?-Yee : 4318. Are these mares shielly of your own breeding

generally she has one or two crosses of the thorough-less home that I can trace. I find they produce the very best bunters. or do you buy them from the farmers !-Well, they are chiefly of my own breeding, and if I buy them from the farmers I know their breeding. I may buy young ones which may go into farm work. I find if I can get a more of that class that works gently on a farm, that she produces a very fine healthy feel and 4317. Are these mares that you buy usually bred from a thoroughbred horse, do you know t-Yes, our tainly they have one cross of the thoroughboad.

4318. Some witnesses have spoken to us of what they call the old Irish more; does that convey any thing to you?-The old Irish mare-I happened to one across some old documents-what I call the old that was generally got by a good class of house, a hunter class of house. I just happened to have this (preduced). It is a very old bell that will show you the class of house. The strain remained in the country-the Andrew strain, the Merry Andrew

4319. What is popularly called the old Irish mare is usually a more got by a half-bred horse !- Got by a half-heed horse without anything at all of what we call the English brood-Clydesdale, Suffalk Pench, or say of those broods. 4320. Mr. Cannw (referring to the bill produced by the witness).-This is an ... I vertisement of March 22nd, 1822:—"A horse owned by Mr. Edstund G. Barry, a genuine bend Merry Andrew, got by Old as elegant a hunter as ever was mounted, and for which maces as two years old 100 guineau were refused. He is a dark boy, and from his symmetry of shape and gents strength, well known to be of the best hunter blood in Iroband i is allowed by some of the best judges to be one of the most promising hunt-

We John R.

after the 20th of July, and any more which misses this source shall be served next year. Two grisens and a crown for the groom Fituers -I had a direct descendent of that home

ing sires in this county, many of whom have already subscribed to send mares, but no mare to be served until a short time ago, when she died. 4321. CHARRELY.—"Merry Andrew,"by "Andrew." Was Andrew a thoroughbred horse t

Mr. Canew.-Hunter sire, "Old Andrew," it my Witness.- Here is another old document. This is

Cratico, County Clare. He is to stand at Ardsalina, in the mid county, from the 20th of Murch to the 10th of August next, and is to be let out to mures at two guiness a let so trials, and a crown for the groun, the money to be paid down before the horse is let out of the stable. He was bred by his Grace the Duke of Eciton, and was get by 'Fox.' His dam was full states........' and so on " " "His great-grand dam was by Mr. Place's White Arabian, on a thorough-hed mare of Mr Tregarville. 'Merry Androw' won the 700 Guineas' stakes at Newmarket in April, 1755, and the Thousand Guines Stakes in October After, from twelve of the best horses in England; and

in the year 1736 he won His Majesty's Plate at Levis, near Conterbury.—Sir Edward O'Brien, Bart." Test is tracing back Witness.-That is the strain to far as a hundred

years ago, and I thought it would be interesting. 4323. Mr. Canny.-It is getting somewhat at the Witteen.-What I call the old Irish mure was demended from that alass of horse; they remained in the county and the farmers would speak of "the old strain and the old mare." They generally kept one of the old mares in the family. The Andrew strain was one particular strain in the country. There was snother strain, a horse called "Diamond," got opt of

a Diamond mara. 4224. CHARGULY.—A balf-bred borne!—No, I think it must have been a thoroughbred borne. 4325. They bered a good many horses in your district —A good many horses have been beed in my district, and if you ask me our district, which I call North Cork, or the Duballow hunting district-off I was put to it I would go to it before any district I know in Ireland to get a really good bunter, and I attribute that very much. I have another old docu-ment that I thought would be interesting There

was an old sentleman, a Mr. Hutshins, who was a bechalor and a man of means, and his fad, if you think it so, was his great passion and love for horses. I happened to have all these (indicating documents), and I put them by as a matter of curiosity. In August, 1839, this old gentlemen sold 73 horses. He colled an auction and sold 72 houses, and they were all one better bred than the other, all thoroughbeed all one never ores many of these houses remained— some of them were seld very low—a great many romained in the county scattered about. I could

trace the redigree of several to horses nowhard at

those horses !- Virginia, grey mare, Washington, Regent, Oukstiek, Potenkin. 4327. CHAIRNAY.-Do you think the farmers are aufficiently careful about brooting from their best names; about keeping the best masses; about keeping the best masses; about keeping the best masses; —No, I san afraid not. I am serry to say that latticely the farmers have been selling their good mareas when they have been offered fair perces. The French height a few years age a great many of our good mures.

4328. Do you think the mares have deterlerated in

a more got a blemish, a fine more got a blemish; the was generally put to stud and generally produced a paying stock. systig cone... 4329. Otherwise they only heed from the mores than could not sell !- In many cases ven.

4330. Do you think that the farmers show a diserimination in selecting the sires for their mann't -I am straid not much

4352. Do you think that the scheme of the Royal Dublin Society has worked well !-- Well, it has worked very well, but I think it might be improved a little.
4333. In what way !- Well, I think you might make some alterations in the prices you give.
4234. In what way would you suggest i-I would

give more encouragement to undoor farmers to keep over a very good class of marss. I would give substartial prises for good four year old mures. I don't think I would so under.

4335. Do you approve of breeding from two-year olds !—No, not as a vule. I tried it is a few instance myself and I didn't find in successful. The two-year old mare in not a refliciently good norm. I have known two-year olds with rather weedy feals at first and they afterwards bond a good foal. The owel thing is the nursing. Unless they nurse the feel you carnet have substance or bone. They are always weeks

4836. And you think that more substantial prign to four-year old mores would be the greatest indice ment to farmers !-- I think I would give more substan mares either stinted to a thoroughbred certified sousi stallion, or with foal at foot got by a thoroughhed stallion I think, now for instance, supposing a man had a good promising three-year old mare, and that he thought he would get £35 for her and he would get at easily for a trooper, for a good clean more, if that man thought be would got a £10 or a £20 print, in would say "I will run the chance of a foal and get my would say "I will run the chance of a feel and get my £10," I think that man would consider before he

would sell the mare. I don't think I would give person for old anaces 4357. You would only give a price to a manu-that was covered by a thoroughbrod horse or had a foal at foot !-- Only to a more covered by a sound

thoroughbord horse or with a foal at foot 4335. Don't you find that some of these half-bred borson—horses of the same class as "Morry Andrew" -still exist in your country and breed very good hun-ters!---Yes, very good hunters, but I think the theroughbred better. You have more reliability in him. You may brood very good hunters from the half-bred, but I think the thoroughbred is more

4339. There was a horse called Garrett, a half-beed in the county Cork 1.—He is by this very strain I speak of. He was got by "Arthur" I think, and "Arthur" was a "Sir Hareslen" hore. They wore

very good armin of horse.
4340. There was a horse-called Hutchins "Hercelor That was Mr. Hutchips owned Hercules 1-One of those very horses; Mr. Hutchins parted with that borne for a Kerry cow-that thoroughbred horse. That thoroughbred horse than went into the hands of a farmer, and I may may that home left his mark. He was first put to march at a very choop for. He was a blind horse, a lopped-exced horse, but he was got by the famous Sir Harcules out of a more got by Pologan

That was thirty years ago.

4341. Was Hutchins' Horoules a thoroughbool horse? -He was by the Sir Hercules

4342. I thought he was a half-bred horse !- He was by Sir Haccules out of a mare got by Polegar. She is here in this list. Polegar is in one of those lists. 4543. Have you had say personal experience of beseding from Hackneys or Chydeodale stallions !your country !-- I am afraid yes. The good mare see ploked away and the rubbish bred from. Sometimes No, I have just seen Hackneys and admired them as

swetter barres, but I have very little experience of Harkneys, they are not much in the south 4344. Do you think that the introduction of the Hackney blood into West Cork world have any effect spen the hunter breeding in North Cork and the when hypere breeding districts of Cook by Well, I think that if you breed at all you must try to breed the very best. You will have plenty of minits, As year best. I den't think anything you brend from a Harbary will be anything more than a missit.

will have plenty of missits and dn your best 4345. I was not at all referring to breeding in the hanter producing parts of Cork, but I want to ask you whether you thought that the introduction of the effect upon the hunter breeding in Bast Cork or North Cork !- I suppose not, but I think what we ought to

envoyage would be the beeeding of the best and most escorage would nav. If we do anything we carlit class horses would pay. If we do anything we ought to meaurage fariters to breed wint will pay best. 4346. Do you know West Cark I—Not well. 4347. You have been there!—I know it of coppus.

4317. You have been there is very poor.

I think the class of horse there is very poor.

4318. Have you been in Bantry !-- Yes.

4519. You know the class of mure that you see there1.—Yes, I have friends living in the district. they wanted saything they would never think of looking for a horse about that country; if they wanted a good harness or saddle bosse they would come to

our country. our country.

4350. There are very few horses coming up from
West Cork into your district b-Very few, there are a few about Bandon which accordings used to come-

4351. But there are a great number of horses bred in West Cock !-- I believe so, that is about Fantry. I don't think they autend beyond Bautry-a good elses of horse, or beyond Bandan nimost.

4552. What becomes of the had class of horses bred on the mountain side !- I think they live and die

4355. I take it that you consider the thoroughbred here is the most unitable sire for getting a hunter or high-place locus I—Ven, decidedly, I think that is the borse we ought to encourage. If a man likes to breed from the Hackney it is his own business. If he is so ford of them he can early get them. I would not ulwidze that class of boxes, I think the thorough-

breed is the proper animal—a well board, sound horse, 4354. Mr. Caurre,—What beiotth.—He might be any height if he is good, about 16 I suppose, I have known them get a big horse.

4305. CHARMAN.—Are you in favour of the idea that has been propounded to us by several witnesses that stallings abould be resistered and examined and passed seemd before they are permitted to serve !-- I think is world give as an encouregement three money prizes, and I think then to approved mores I would give an order on a registered. thoroughband stalling at one £1 a mars and may the difference. I would say to the farmer " you can send your horse to any thoroughbeed horse; you will got that borse for a pound and we will pay the difference.

and I would have an understanding with the propric-tor of the stallion. I think that would be a useful thing. 4266. You think there is a sufficiency of good valleble, sound thoroughbred stallings !-- I think we see very well off for stallions. There is n Mr. Plannery, of Churchtown, very enterprising; Mr. Presson, of Mallow, has some good borow; and a Mr. O'Loury has some horses. I think there is nearly of

private enterprise to keen each stallions if they are 4357. You think, as a matter of fact, that at the

present time there is a sufficiency of good, sound, suitable stallions in North Cork !- I think there are enough of stallions in North Cork, and I would encourage those people who keep these stallious by

giving them orders, by obliging people to send mores to them, not obliging them but by giving them an option of patronising them.
4358. You are in favour of registering snand suitable, well-made, well-shaped thoroughbred horses t -Yes, that would be an inducement: the very fact of registering a stallion, is being known that he is of registering a stanson, is being amount one or receiptaged, and that the produce is suitable or eligible to so in for prices, that is an encouragement to the to go in for princy were owner of the stallion. 4359. Would you under any circumstances,

egistor a half-bend sire i-I hardly think I would; \$360. You think it would be better in fact to draw

the line hard and fast at thoroughbred horses !- I'm throughbred horses. If there is a half-bred suitable aire he would be patronised, because people will have those weedy marer and they will send them to him. 4361. Is there any other suggestion that you would like to make, Mr. Barry, with reference to the imlike to make, Mr. marry, with manager to the quali-provement of horses !-- I don't know about this quali-Seation as to valention. I den't know that the better class of farmers at the higher valuation should be excluded from competing. They take a little pride in it, and although a man may have a high valuation his calls are comparatively high, and he may be just as needy a man as the man with a very low valuation, and I think any man who is favoring for prices for cattle or butter, it is not because a man

is valued at £300 or £300 that he is rectuded. should a man in keeping horses be! He takes a pride in it, and his servants and his underlines take a pride in cetting a prise. It would be a pity to 4362. The tries is, no doubt, that a furney of over £150 valuation is able to take care of himself!---

age serry to say that I know men of high valuations that ere just as needy and just as envisor to make a ten pound note as men of 450 volustion. 4363. You would be in favour of the £150 limit being removed !- I think so. I don't know that I would limit it at all. People take a little pride in it;

and, apart from money matters, they like the resette; they take a little pride in it. 4364. And you would be in favour of civing substantial prizes to young mares, of subsidizing stallious to a certain artest, and of giving the envelops to

the prize mares at a very low figure to the registered stollions !- Ves. 4205. And the examination and registration of

4505. And the examinator and regiment of thoroughned horses I—Yes. 4305. And the removal of limits I—Xes. 4307. Mr. Cassw.—Do you think that breeding in Ireland from a thoroughlyed would profuse

in freezend from a terorongenised, would provide I have seen well-staped small thoroughbrad stallions breed immente borses -there is a little horse called -be is dead now, I think-" flepchilipse," not seems than Officers hands blob. I have seen that howen produces horses of immense bone, great big borses.

4363. Maked with thoroughbred mares 1—No. not with the supplied and but with good plays half-bred

mares or three-quarters bred. now. Leaft you think it would be vory mecessary to have a well bend half-head horse with a great many strains of the threoughbred blood in him I--I think it would be meeful. I now not sure that I would encourage them much. I think the thorough

bred horse is far more reliable. 4570. Would you be in favour of every man who has a stellion taking out a license !-- I think so; I would empourage that; it would be a kind of infor-

mation to the people, you know, to go to a sound 4371. The fair of Cabirmes is in your district?-It is in my district, a very fine fair 4372. One of the largest in the South of Ireland !- Mor. 54, 1866 Ma. John H.

4573. Do you see any deterioration in the class of horses exhibited there !-- There are horses I am sorry to say at Cabirmos recover maker forestalled. those dealers have topters; they are all spotted and very often bought in private stelles by dealers before hand. They don't wait for the Calarmee fair fold Men will go and buy them at home

business. Men will go and buy them at home.

4374. You say the valuation is too high !-- I don't any it is too high. off altogether, and let every fellow gn in for it.

4370. It is necessary in order to improve the horses to encourage the big farmers as well as the email farmers !-- Yes, I would not prevent the gentle-men farmer. As I told you it is not the money mine so much as the pride in it 4377. Are there any horses now with the Merry Andrew blood in your district I-Yes, thereare. You

can trace them, I think I have some mores with it; I have two Victor mores, they were beautiful hunters. and I can trace through their dam back to the Andrew blood.

4378. Colonel St. Quisvin.-You have in district, I suppose, a great number of very small hold-ings, small formers t—There are not a great many

4379. They are all espable of bringing up their young stock, are they, do you think !—Not all. You know if a man has a good colt he is sure to get a good price for him.

4350. Would you encourage breeding with the very small farmers !--Well, I would, yes, if they had a good mare. I do not care to whom a good mare belongs, he he rish or poor. I should encourage levering from a good mare.

4381. What would you say was a sufficient hold ing to give him a chance of bringing up his celt wolft-If a small farmer has a good valuable animal

he will supplement his feeding, if it is not good enough he will got grass for his horse, or he will manage it some way, he is cute enough, or sell is for a good price. I know a mountainy farmer who brod a good price. I know a mountainy farmer who brod a good colt. The colt was sold as he thought for a good prior, £25 or £30, as a two-year-old. That saimal was sold leads to the neighbourhood again. I saw it the other day sold for something under £100, about £5 under £100.

a four-year-old home got by this same 4582. Do you think he would breed him with any particular object—beyond desiring an animal to breed to any type at all, has be any idea of what the animal is likely to grow into—he will put the mare to the first bosse be comes to, won't be, or will be try to breed a high class borse 1-I am afraid the small

farmer will on to the channel bone; he won't on to a dear horse but to a convenient horse. 4383. And he does not unless the man who has got a certain strain of blood-he does not know what kind the animal is going to be, or care so long as he gots red of him at the fair-he does not know whether a

not; he goes in for a feel.

4384. Mr. Warsen.—Mr. Barry, I think you said that these old Irish marce—you throught that they were descended from the hunting sires in the country before any English blood came in Lavyes 4385. By English blood you mean !-- What we call

the Ciydeedale. The very heavy eart horsen, some of these have come into our country; these have been 4386. Do you know there are about ninety cart

horse stallions and half-level cart stallions in the I know there are some.

4387. Could you fix the time that those azimals first came into the country !-- I am afraid not, as long remember there was an odd one here and there. 4588. Even before the famine !- I could not go

. beyond the famine.

4389. You don't remember their introduction !--4590. Do you think it would be possible to get the pedigrees of any of these marse byed from the horses you mentioned. Do you think any of the facuses have kept their pedigress —I am afraid not. 1391. Then you don't think it would be possible from the mares in your district to breed up any burn. ing sires of the same brood, the same strain !- W.

as I tell you, I have a mere get by a horse called this.

Viotor, and I can trace her pedigree back to the Andrew. 4392. To this horse called Androw !--Yes, to the Cork Merry Andrew, that is to the strain Andrew not exactly to this horse but to the strain got by a

horse called Merry Andrew; he belonged to a man in-the west of the county man Kildorrary. 4833. Do you think there are many other people wite can do so t-No. I am afraid not 4394. So that it would be impossible to try to benef

up a lot of korese, more of the old blood !-- I am afraid is would be 4395. You would not register any half-bred horse!

lovel; if he was good he would be sought after 4396. Those animals that were bred out of them and makes by a thoroughbred house if perpetually reposed by a thoroughlood house would they on us time become too fine -would there be any denser of that !-- I have seen very fine well bened thoroughbred

4397. You meen in Cork, grown on good hard i—I don't think they do deteriorate much. The fillies to if they are badly cared. 4396. Bet you are referring to animals grown or od land!—Reared on good land and well kept, and

I think the first year or two has a great deal to my to the matter 4819. The first winter 1... The first winter, and the milking qualities of the dam too.

4400, Do you think that hunters beed now in Cork—

good hunters---are as good as the horses used to helthink they are so good as you can get in the world. 4401. As good as they used to be thirty years ago! -Just so good. 4402. You think that the men who breed then have

been able to keep clear of this imported blood !--! think they have. I have come across some of these good lecking korses with their dars, with some of the Clydesdale blood or something of that kind in them, and I found them very soft. 4403. You yourself have been able to keep clear of

that !- I kept clear of them. I would not think of buying them. If I saw a celt no matter how handne of that kind of thing I would not buy him, and if I had the misfortune of having him I would get rid of him as seen as I could. I would not like to ride him myself. 4404. Would you take the trouble to find out how the animal was bred before buying !-Always, I try to

so back as far as I can, but it is not always very reliable information what you get. 4105. You would not bye breed from a two year-old

4406. Do you think it is easier to get a fifly in foal at two years old than at three years old t-It is very

4407. And that is the chief recommendation in your opinion, is it !- I don't approve of breeding from two-

year-old fillies 4408. You don't think it would be a good thing to encourage the farmers to breed from two-year-old filties L. No. 440R. So as to get a feel out of a good filly 1-No I would discourage, as much as I could, the breeding of inferior animals: I don't know what we will do 4410. Mr. Canny.-The chief objection is that they are not likely to be good nurses !--Yes.

Printed more discussed by the University of Southwarden Johnary Distribution Unit Printed image distinged by the Linearaby of Southernston Library Distingtion Line

4411. Mr. Warron.-In recommending thoroughand district, and you don't protend to make any suggestion for the congested districts on the west court - No, I don't. I confess my own experience of Hackneys is very limited.

4412. And you think the system adopted by a Dublin Society now of registering stallions, the Dublin throughted stallons-do you think that is a good enel-I do, a very good one 6413. And you think that the people who have

thoroughbreel stallions in your district would like to have them on the Dublin Society's list 1—I think so. if they have good sound stallions 4414. I see that a great many of the thoroughbred galliens in Cork do not appear to be on the list !-- I

an afraid there are a great many unround thoroughbreds in Cork If a man has a sound stalling, and if he thinks he is perfectly sound, he would be glad to have him on that list.

4415. You appear to be very wall supplied in Cork,

you have 26 thoroughbeeds on the register and 40 off the register !-- I think we are, 6416. Do you think that most people who have stullions which are sound would like to have them on tie register?-I think any man baving a sound stallion would like to have him on the register 4417. Colonel Str. Occurry. I would like to sale or, with regard to these small farmers who you say hardly know what they are going to produce, do you

only goes for a foal, is worth taking, as to the class of horse that would suit his neighbourhood !-- I think those weedy inferior horses are not worth breeding at all; they are not worth their cost. I would not encourage any man that would not tay to go in for a really good class of horse. Do your best, you will have plenty of misfits. I don't know what you will do with that weedy kind of horse since bleveles and all those things came in.

4416. I don't quite mean that; I mean with regard to the individual bisself, the small farmer-is his opinion worth taking us to the class of horse that should stand in his neighbourhood, if he only breeds for his district in his famoy to have any weight in that way !-- I don't think it ought; if a man breeds

nt all he ought to besed a good article.

4419. You would legislate for him and not allow bits to legislate for himself !—Yes. 4420. His sornal opinion is not of very great value!—No value. 6421. Mr. Wanxon, Do you think the coincon of the small farmers of the west coast of value-doo

they know what they want for their own was !-- I have no experience of the west. 4422. Therefore, you are not speaking of them !-

R. E. LONDERED, LORDINGIES, Mallow, examined.

4425. Cwarman. - You are a maristrate and deveto. insteasant of the county Cork !- Yes.

4424. You breed horses yoursest :- a co. 4425. What sort of horses do you breed i-Manters from hunting mores.
4426. You loved entirely from hunting mores b-1

have brod eart homes, a few cort horses.
4427. By Clydesisle stallions!—Yes
4428. What class of home do you think your part of Cork is particularly adopted to produce f... I agree with what Mr. Barry said that they can produce the

I think well bred burges develop fally even better 4429. A good many farmers I suppose breed horses ! -A great many, yes.
4430. Do you think they take may trouble about getting the best sures !-- No. I don't think they do.

I think they have not extremely bad mares now. 4431. You think they have deteriorated I-I think they have 4432. Do you think they take sufficient trouble short relecting the stallions to mate them with I-No.

I think not. I think they go to the nearest or the chespeat, or to a stallion belonging to a friend in many cases. Of course some do. 4433. Are there many eart stallions in your district ! -No, there are more thoroughbred stallions than any-

ting else in my immediate originourhood, I think.
443. Do you think there is much east blood now
tening the mures 1—Oh, yes, I think there is here and there 4435. Do you attribute the deterioration of the

bones in any way to this cross, do you think there is more care blood than there used to be !-- Yes, I think a great number of oart horses were brought over thirty years ago or so 4416. And the farmers used them with a view of

getting more size 1-Some of them did. 4437. There is a certain amount of this eart blood permeating through the marent—I think so. I think what they tail the old Irish hunters were good on secount of the absence of that cart blood. 4458 Do you think the borses of the present day

Printed image digitized by the University of Southampton Library Digitization Unit

are sa sound as they used to be 1-I think they are very unsound. I think an encreases proportion of them are unsound, and I think a great number of

stallions are unsound 4439. You have a greater proportion of unsound ow !—I am afraid so, a great number of whistlers, 4440. Chiefly whistling !—I think that is the conord unsoundness

4441. Do you attribute that to the stallions1— Principally; yes. 4442. Have you any experience of breeding from half-bred sires?—No. I have only brai from one. 4443. Do the farmers use them much to produce

centers !- There are very few in my neighbourheed. In other districts, some miles away to the west, there ave, for instance in the Newmarket district about fitteen miles to the west of me I believe there are no thoroughbred horses

4444. There are a certain number of bulf-bred free 1—A great number of bulf-bred become. 4445. Do they produce good hunters 1—No, I don't think they do se a rule.

6446. There are not a good many good houses bred
in the Newmarket district !—No, I don't think so.

6447. Do you think that the Dublin Society scheme works well — I think it is a very good thing to register would horses. I think that is a very good thing, and I should support that a great many of the heres not registered are not sound.

4448. Do you agree with some witnesses who suggested that a horse that did not pass a veterinary

examination should not be permitted to serve !-- it think if it were possible it would be a very good thing. 4449. Or the licensing of stallions, it has been anggested to us that a heavy license should be put not stallisms which would be reduced in case they passed an examination for somelesss t—I would dis-

courage the amount ones as much as possible. I would prohibit them if possible, but I do not know the way it ought to be done. 4450. With regard to the mares, do you think the Dublin Society's scheme works well I—I think that a number of local shows would be useful, with, as Mr. Barry says, considerable prices for young mares

Printed image digitised by the University of Southampton Library Digitisation Unit

164 4451. Do you think there is any object in giving Mr. R. E.

prizes to old mares !- I would rather give them to young ones, I think.
4452. When a mure is old she has to be a brood more !-- You, she is nearly done then, 4455. Do you think that the registration of borsos

-I suppose you know most of the registered borses in your part of Cork-do you think that they answer all the qualifications necessary for a stallion — I have known one very had one I believe he was a sound bes extremely unfortunate stallion; he was a very mischievous stallion; he oost me a great deal.

\$454. A registered horse 1-Yes. \$455. Do you mean he didn't get fools, or that he

rot had fools !-- Got bad fools. 6456. Mr. Canny .- Unsound !-- Yes, many of 4457. CHARRHAY. - Do the farmers generally sell their houses at their own places, or do they part with

them at fairs !-- It depends upon the class of borses. If the farmer has a very good colt, the dealer will go to him; if he has a very valuable colt he need not take

him to the fair. 4458. What sort of stallion do you think is most citable to be encouraged in your district !- I should

like the thoroughkrod one 4459. Do you think the farmers would appreciate e really thoroughbred home if they got him at a rea-

4160. The ordinary farmer only pays a very small fee !-- In some cases it is very hard to any what they yay for the service. I believe some stallions serve for what they can get presty well

4461. Have you any suggestions that you would like to make with a view of suppoving the breeding like to make with a view of suproving the breeding of hones in North Cork 1—I should like to keen out the unsound stallions and encourage the good mares ,

but it is a very difficult operation. 4462. What would you suggest that those stshould be-what steps would you suggest!-Wal prizes for mares and some regulations for stallions. I

am hardly prepared to say. 4463. Prices for mares and registration at any rate of sound suitable stallions !- Resistration : yes. 4464. Have you any experience of breeding from

Hackney borses !- No, none. 4465. Do you think that the introduction of Hack-may blood into West Cork would have any effect upon the bosse-breeding in your part of the country !--After a time it might if the mares got by Harlmey borses got scattered about the country

4466. Do they, as a matter of fact, now come from West Cork into North Cork !- It is very hard to say ; I don't suppose they often do. 4467. Do you know West Cork personally: pretty well; I know the neighbourhood of

I know the neighbourhood of Eastry and Glenguriffe. There was formerly a very good brend of ponies about there, and they have gone-an extremely good lessed of poniss.

4468. Do you think that that breed has dirappeared !- Entirely.

6460. On account of the farmers using unustable stallious t-Oh, I famry they sold off their ponies in the famine: I think so 4470. They disappeared as long ago as that 1-They did not quite disappear then because we had some at kome, extremely good ponies that came from Glen-garifie; I think one of them had some Arab blood in

it, as good a poor as I ever say, 4471. What would you support as being the best means of restoring that breed - I don't know, I am

4479. You don't know what stallion because it would have to be done by the introduction of a suitable stallice-what stallice do you think, from your knowledge of the penies of Bantry and Glengarifa. would be enitable !—I think a great deal of that country is only suitable for breeding postes. I think the Arab blood did good there, but you could not depend entirely on that. I think the Arab blood made its mark there many years ago. Mr. Bernard ago said to have had an Arab there a great many years

4473. You would suggest the reintroduction of the Arab blood !- No, I think it would be a country that Welsh ponies would do very well in 4474. Do you think that the Hackney stalling is calculated to benefit the brend and improve the breat

-I do not think so. \$175. Have you any experience of Hackners personsily !- I have seen them and heard a great dad

about them. I never owned one 4476. You can only speak of their personal arms. saon then 1-Yes.

4477. And from what you have seen of their ersonal appearance, do you think that they would be

suitable stallions to put to those posies !- I think if you can breed any animals as big as that I would try to have something well bend. I don't like their shoulders. The country that can feed animals of that

size I think might breed something better. 4476. Mr. Frrewittian .-- There are a good number

of cars stallions down in your part of the country !-here is a Shire horse—there is a horse near me in the Shire Horse Sted Book, that I have used. 4479. Are they used a good deal by the farmers do you think !- I have heard that the farmers latterly

save been putting mores to them in order to get colts of size and substance that they will sell young 4480. And breeding from these eart stallions I prosome that the recolors is rather easy to tell, that habes cart blood in him 1—Ob, it would be.

4831. If you were to have my other blood equally
to what I should call soft blood, but one that you

might not be able to tell so easily from the appearance, do you think it would be dangerous in the country or nos !-- I think it would. I think my country on breed the very best. You asked me about Hackneys. chould like to read a resolution passed by the County Cork Agricultural Society, on the 14th September. I belong to the Society for many years. May I read it !

"That we the members of the Connection of the Cork Agricultural Society, protest in the strengest manner agricust the introduction of the breed of Hankany horses see Ireland by the sid of state femile as being detrimental to the best interests of the farmers and the good of the country at large, so as to deteriorate that breed of heres far which

Ireland has hitherto been justly celebrated. 4482. CHAIRMAN,-That was the Grand Jury!-No, the County Cork Agricultural Society-a very large Society. I think there are over not because 4483. Was there a large attendance at that meeting?

-I think so. It was passed unanimously. 4454. Were you present !- I cannot remember whether I was or not. I renounter its being passed, whether I rend it or whether I was there. I go to a

great number of the meetings. 4485. Are the names of the proposer and seconder there !-- No, I have not got them. 4486. Well it is stated to be passed unanimously t

4487. In that the official record 1-No, it is a copy, but I have seen the official record 4488. Mr. FITTWILLIAM .- With regard to half-bred stallions, would you advocate the use of balf-bred stallions if they were sound and suitable in action !-If there was a very little stain in them I don't think

4489. But you should not object to use such a halfbred as could win a steeplechase or had won !-- No, if he had proved bimself a good brooder 4490. If what !- If he had bred well be might be useful. I think if the stain was very small it might not matter. However, I would not register him if he had not proved himself a good breeder.
4491. Mr. Canny.—You said that you were a member of this agricultural association 1-Yes.

Printed image digitised by the University of Southamoton Library Digitisation Unit Printed image digitized by the University of Southampton Library Digitization Unit

went bee 4461. And that they approve of this resolution t ... Yes, it was passed masnimously. 4494. Have you any experience of the Hackney blood have you seen them !- I saw them : I saw them

at the farm at Shankill yesterday, and often at shows. 4495. Your objection is that three is too much asked a gentleman who is a very good judge, what he saked a gentleman who is a very good judge, what so throught of the Hackney, and he said—"There is nothing they can do that a thoroughlived cannot do a 4416. That is the thoroughbord can get all the

stimals they can get, and in addition the hunter !-Ver and there is a very important matter in a hunting country, that a farmer may often sell an unsound or lame heres very well, because they were good I have known two tenant farmers azimala for a large sum in a fortnight which were both unspend, they were both lame, but such good banters

that people put up with that,

4497. You say the descriptation of horses is due in

great measure to farmers selling their young mares? -I think they sell their good mares and have a very had lot now. 4418. And the creat desiderature is to offer there

some industries to keep them!-Yes. 4499 And also the deterioration is due to the number of bad stallions in the country !-- I think many of the stallions are very bad and very unsound. 4500. You would approve of insisting that every man who kent a stallion abould take out a Hennes L.

Something of that sort. 4101. And that the licence should show on the face of it whether he was sound, and what the defects were !- Something of that sort 4102. You also approve of registering the balfbeeds provided there was very little stain !-Yes. 4503, Colonel Sv. Quorrot.-I should just like to

ask was if you know anothing about the cases with the cart home round about you. What clear the preduce in I Whether it ampplies the needs of the farmers for their surrigaltural work! Whether it is large ter their agreeatural work! Whether it is large ecough for them, and not too large!—There are a greet many thoroughbord stallions mear me, and I only know one maily our loose, there are not many never had a better show of young horses

4204. But does it grow a very heavy horse in your district !-- Most of the farmers have lightish horses with some quality in them 4505. Yes, but the modern of the cast horse in your country deem? grown great weighty animal, it grows a medium?—There are some buy animals but

not a great many of them, there are infinitely more theroughbred stallions than cart stallions. 4506. You don't know what sless of home the Shire or Clydesials throws, it is not a big weighty draft bees !-- Not many of the very big ones. I have out name waved! but as a rule the vision the formers

breed from do not breed hig beavy horses. 4507. That is what I mean. They are maded from borses for that part of the country, I suppose !--

4508. Mr. Written.—When you say there are infinitely more thoroughbred stallions than cort stallions, you are speaking of your own neighbour-bood 1—Yes, for miles around.

4509. And not of the county generally !-- No.
4510. Do you think the mares have deteriorated !

-Yes, I am afrait they bave.

4511. In what way, have they become more coarse or weedy!...Some are more coarse, and I am afraid many are more unsound.

as good but not so many.

4512. And you think as good bunters are bred now as used to be leed, in your neighbourhood t-I fancy a smaller proportion are as good. There are some just

4514. And you attribute that to the unsoundness of the pirts !- The manuschess of the sires and the hadness of the dame 4515. I think you said you would advocate the reststoring of sires, it has also been suggested that we should have a tax on stallions, to be reduced to a neminal rum if award. Would you approve of any sugges-

at fairs are unsound.

nal rum if sound. Wount you appeare or any baggin-tion in that direction !--! am not prepared to say thus would be the best way to do it. I should like to encourage good ones.

4516. Your suggestion is to give prices to young 6516. Your suggestion is to mores 1—Yes, and local shows.

4517. Would it not take a lot of money to make that work !-- I think it is worth spending meany 4518. Do ven think a man would keep a mure for £10 if he could get a hig price for her. I should give him more, I don't think £10 would be enough.

4519. Do you know what class of mares there are 4519. Do you know what class of mares there are about Bantry and in West Cook I....No. I cornect sor-I have not looked particularly at them. 4520. You never studied that country with a view to here breeding !-No. 4571. Do you know anything of the hardiness of

the preduce of Hackprive se compared with thorough breds 1-I cannot say I do 4522. Talking of that resolution to which you re-Hackney stallicu in the whole of the county of

Clock 1... They don't want to have them there. 4525. But there is not con 1-No, I doze say not. 4524 And parkeys these people who passed this resolution know very little about them -A grost many of them are in the habit of going to shows 4526. Do you think any of them breed from Hackneys !- I should say not.

4526. You have had a great experience of Trebvod as a Grand Jeror, and doing the county work, and in many other ways 1-Yes. 4507 It is not your hard to est a resolution upoposed and passed about anything?-I think these people know what they are about; we have a very good show in Cork; the Judges there told me thry

4528. Did you over hear it argrested that Hackeys should be sent into the good parts of Cock !---No. if they came to one part I believe they would spread to the other parts. 4529. Do you think now that any of the good burners in your district are bred out of mares from Castlesowshops and Bantry and these peer districts !- It is not likely.

4530. And you don't think the Hackney is such a wonderful animal that he is likely to brood borney that will be sought after an hunter brood mores in 4851. Do you think that is likely 1—Oh, no.
4832. Mr. Prywyllan —Should you be afraid 4532 Mr. FITTWILLIAM.—Should you be ofreid

it nece were Hassinsy manifest largery used in the adjoining district that in course of time the blood would filter into your district and do harm t—I think it would apread inscassibly; it would be very bard to still how much, but I think it would apread by

spreading by dagrees would have an effect on the hunter broad !-- Tea, I think so.

4534. A deleterious effect !-- I think so. 4515. Mr. Wassen.-- I presume you don't know

bow the Hackmeys are bred, these that you are referring to !-- No, I don't know whether they are a very old breed or not 4516. You don't know anything about their origin i

4537. Col. Sr. Quarter.-What is it you object

Mar. 8x 1304 to about a Hackney, is it his appearance or broad-Mr. E. E. Longfeld. ing !- I don't like his appearance, and I have always understood that he was very soft, I don't like his

anderstood that he was very sort, a don shoulders. I don't like anything about him. 4538. He is supposed to have great action !-- I am told he goes for a little while, then he does not go armch further. Someone said that he was a reed home to drive out, but a had home to drive borne 4539. But was object to his shoulders, and do you think it would improve the mases of the country to get harness house by such a sire !- No, I don't think 4540. That they would get better harness horses

that action and formation 1-I don't think so. 4541, Mr. Wenner,-Have you seek driven a Hackney !- No. 4542. Have you over exted as a judge at any Hosse Show i-No.

Cantain Deswettan, M.P.

Ceptain coellan, w.r. 4543. Owners w. -- Ven live in the county of Cork 5 -Yes, sir. 46+4. In what part?-East Cork, near Midleton, I might mention in the centre of a leanting district.

4544. Mr. Canzw.—What hounds !—The United ; they have their kennels at Midheon, and incleed h

think East Cork may fairly be said to hold its own even with North Cork which has been prated so mosh, and I must say justificitly praised.

4545. CHAIRMAN.—Do you breed borses yourself?

Yes, I do; chiefy hunters, in fact I way may hunters are chiefly bred in Rust Cork-4546. What sires do you use i-Well, I am a firm believer in the thoroughbred sire for leaning par-

4547. And what class of mares b., Well T think that the only class of lumber that pays to brend at present is the weight-earrier. I think the light weetly horses are now practically unadeside, and the thoroughless horse and a good roomy well bred 4548. Got by a thoroughbred horse !- Yes : I should

- ear so, if possible; of course the half-herd may be successful of crossed with a lock-class mare, but as a rele, Ittale farmers don't keep such a class of mare. because she would not be any use for a farmer. Provided the circ is in the stud book, I think more shape and soundness are of greater importance for

hunters then any particular scrain of blo-4549. Do you repard it as essential that he should be a thoroughbred horse i—Well, as a general rule, there are exceptions. I know cases in which half-

hard burney have bred salenble legisters from good class maren. 4530. Do the fermers in your country breed many horses, around Midleton !- Yes, I should think to ; it is practically as oppole district for horonbrowling

4551. Do you think that the class of horses bred there has improved or deteriorated !- I don't think the acutem adouted by the Royal Dublin Society has improved the breed of horses in my district 4592. That is the present system !- I think the class of horses at country fairs is no letter now than

before the system of premiums to sires was adopted. 4553. Premium to sires—that system has been done away with since 1994, but, speaking generally, do you see any marked difference in the lower lovel on you we any morned difference in the horses hard now in the neighbourhood of Midlaton, do you think they are better or worse off then they used to be twenty or thirty were any I... I think the years have been deteriorating gradually, because as farmers have been getting power they have not been able to keep as good a class of mare; they are tempted to sell the

as good a class of mare; they are tempted to sell the best of the produce; farmers are always in need of money, and only keep mares they cannot realise a took price for. make towards reforming the Royal mission. I am astisfied myself that some other plan must be adopted before the broad of Irish horses can

4554. Have you any suggestions you would like to scheme to-Well, I have a suggestion which, with your permission, I would like to read to the Com-

be substantially improved.

4555. I would like to know if this reggerties which you are going to read is one that meets with your own approval?—Most covisinly. 4556. Mr. Canuw.—It is not an original suggestion, but you have adopted it as your own !- You. I have pervolution to mention the name of the author, he is a well-known anthority on this subject in the south of

4557. CHARMEN.-Will you be so kind as to ive the name if he has no objection 1-Mr. Charles Furlang, of Fermor, who is well-known as a juden of

these mares that are selected for price, and so on. He says in the first place:-"That steen should be directed towards improving the

breeding mares, for, without assemble warms it is impossible to breed marketable color; all manesy available should be devened to this purpose. Note should be given in pre-miums to time: there are pleaty of sum in finland with capital and enterprise to import high-class sires if there is a or At to thirty or Brity mores in non-newsy more necomplish then. Irish forester are nearly always in wast of money und sell their best mores, only keeping show the forest realism a good price for; these five prices gree by the Boyal Dublin Society to fall this readisan."

and in order to obvious this, this contismen successis the following solution :--

Int.—The the Ja500 per strains now given away in prime should be expended in laying east issuing more from huxing state in England and Ireland. These name when broken down through occulente or other course on frequently said by saidon, and at these actions socially traves could be purchased for about \$10 coch.—45,00 world, threshot, they \$100 more a year.

worst, therefore, boy 200 mores a year.

Ind....When purchased those sures should be distributed through Ireland, and should be less by the Hoyal Bodila Society to farmers selected by Local Committees in each course upon the following terms :-(a.) That they should be served by sizes chosen by these Local Committees.

(A) That there aims should be thoroughbred and sound

and each farmer should pay for the service of the stre choses.

10 That the progray of the more should be the sole. (c.) That the program of the more steam as property of the farmer.

(d.) That the farmers may work the mores on their forms

(c.) That there Committees should have the power to take (c.) That there Committees should have the power to saw the mares from any farmers not treating their preparty, and transfer them to alber formers upon the arms terms."

and then he some on s-

"It may be asserted that these mores would be service, the fire bending persones for an everage of listst sight-yans, and, theretes, by subgroup of the persons, and the person of the persons of the pe

I think there is a great deal in that worth favourable consideration. 4558. It has been suggested by a witness here that the Government should distribute out. Artiflery mares to the farmers for breeding purposes, would you

6540. I suppose a certain number of troopers are beight round about Midleton !- Oh, yes, no doubt.
I think it would be a great advantage if the military authorities were becugat more into centact with the

associates were occupit more into centact with the farmers, but I have not thought out any scheme. 5561. You would suggest the troopers aboutd be would direct from the farmers, and, if possible, do Sought direct from the names, and, it positios, do away with the middlement—If possible, I think it would be very desirable. With reference to Hackney size I might mention that I cordially agree with Mr. Londeld and Mr. Barry on that subject; there is a very strong feeling in the county of Cork that they the matter with men who understand horse-broading and the various classes of horses that are suitable for Cork, because we are in a very favourable nearion in

of reniers suitable for the English morket, and Huckney sires caunot, I think it is admitted, produce that class of hunters that class of fluorer.

4562. Do you think that the effect of Hackneys sessing in West Cork, Bentry, and Glengarride would have any effect on the breeding of houses in

Ridfeton i... I think, as Mr. Lougfield said, that in the course of time is doubtless would, but it would not be immediately apparent.

4563. Van think same of the bleed would seeme er later filter through ! - In course of time I am sur-4564. In there any importation of ponies and small

recipes !- Not on any large scale. Or course Electory sires might produce carriage borses, knoc agion is not required for hunters, it is retion as objection than otherwise, and I think the farmers in the county of Cork would be filedwised to cannon from the present system ned breed carriage horses; is view of modern inventions I think it would be rether risky, and there is not much chance, as far as recent appearances go at any two, of any machine invented for crussian country.

6565. Do you approve of the suggestion that stallions should be hormed !-- I do, rant decidelly, that has not been professionally recurrened and passed sound. I am told that stallions when they on to stud round. I are tool than stallions when they go to suo vay often go wrong in their wind; that would not be hereditacy, but it would be an objection.

4565, I see Admiral Roys, in his examination in 1873, said he thought that every stallion twenty years old was a waver!-That is rather an extreme assertion that depends on the ourcent of exercise vivus to

4507. Do you think there is a sufficiency of mitable sound stallions about Midleton for the vants of the farmeen ! - I think that my district is very fairly supplied. I quite agree that my district is very harry always supply that. There are planty of men with capital and enterprise in Ireland who will always be found to import high-class sires so long as there is a demand for their services. That is why I am in favour of improving the breed of marcs.

4318. Are you acquainted with the registered sires Milleton 1—I cannot say that I am.

4569. You think it is an advantage to have sires

registered under the Royal Dubba Society !-- I quite regarged unser the stoyes frames soonly we wonter of agree with what Mr. Burry said that every owner of a sound sire would be glad to have him registered, and to have a law to that effect, but of course the Owners of unsorned stallions would swrainly object

about you keeping up !- At far as I can understand No. 8, 189. light weight horses have reduced very much in value. A large dealer in the county of Cork told me not Decades we A sarge deaser in the country or Cora was me now long ago that light weight bornes have reduced in value as much as 50 per cent, within the last four or

4571. Light weight hunters ? - Light weight hunters he was talking of 4573. Mr. Warness.—Redneed how much !—Very mostly 50 per cent. I think what he said was that

you would buy as good a light weight horse now for £40 as you would pay £60 or £70 for some years 600 : perhaps 40 per great, would be more like the 6575. CHAIRMAN .-- I am sorry to say I don't find it so?-There is no doubt they have reduced year

much in value. I see not talking now of a borno with character; a hunter with character will always self. 4574. You mean the light-weight four-year-old !-

Yee, I only mean the average light-weight horse; of 4575. Mr. FITZWILLIAM -- What not of feet will the faratra give round you for the services of a stallion; of course they will go to the chespest, no doubt, but what do they give actually, do you think it -The service fee of the best class theroughhard stallion is £5 for half-bred mares. I don't think then o

is anything over that.

4576. A logres standing at that rate would not be likely to get a great many march, would be, every from gratheness and well-to-do people!—Up to the Heat few years I think horses standing at that fee wow fairly well patronized; now, I think that owing to prions having reduced, farmore would consider that

too high.

6577. The farmer who would give 455 for the service of a stallion would be a man who would keep a mare exclusively for breeding-not week the more in any way !-- I thick it is the almost universal custom in the county of Cork to make brood march hav for their keep; even the large farmers do not keen brood mores for breeding purposes alone, I am

arep used mores for treeding pur of course talking of the general rule or course saming of the general rule.

4578. And yet they will give that fee!—Up to the
leat few years borson standing at that fee were fairly
pateonized—now I fancy that would be considered

4576. Mr. Carry.—You said in that scheme pro-pounded by Mr. Furiong you recommend that the revolues of these major should be the absolute property of the farmer!- Yes.
4580. What do you recommend as to the maron themselves!-The mores were always to restain the

reperty of the Royal Dublin Society, who were to have the power to transfer then in ease they thought they were not being properly mested.

4531. They were to be subject to assumal inspection i Yes, and in case of ill-treatment the Royal Dublin

Society were to delegate to the local constittees the wower to transfer the mares to another farmer. 4559. Dan't you think that would create a great deal of friction !- Everything would depend on the 4583. Don't you think that the farmer who would

take over that maye would be subject to howcotting on the part of the others? -I think it would very solding he necessary T think as a rule forested do not ill-treat their horses; they are find of horses; and I don't think is would occur, in view of this annual

impertion, and I don't see why some system of small prizes should not be adopted at that annual impro-4584. Mr. Freewilliam.—Prices for good condition, you mean !—Yes.

4585. Mr. Cansw.—You totally disapprove of the introduction of Hackneys 1—Yes, for breeding 4570. Are the prices for horses generally bred ASSE Hackness would only be serviceable for) No. 28, Link

brooking harmon borses !-- I presume so; I have no personal knowledge. 6587. Don't you think a misfit for a hunter would make a good harmens borno !-- I think the shape and make are very different. I presume you require to

breed for knee action for harnous borses. 4588. Don't you find the tincoughbrod will breed ord emough action for increes purposes !-- As a rule, don't think the thercughbred has a high knee

action—showy action.
4589. Wall, sufficient action for barness purposes? Certainly, for safety purposes 4590. Do you agree with Mr. Barry and Mr.

Longfield, that everyone who keeps a stallion should take out a Econce !- Yes, certainly 4591. And that the defects of wind or limb should

to shown on the face of the homos —You.

4512. Mr. Warmon. — With regard to manys in Mr. Freienr's schoms. I think you said that you would leave the entire control with the local committee. I mean that practically carrying out the scheme would be left with the local committee !-- Yes. 4523. Who would have to inspect, and change the

mares if necessary !-- Yes. 4594. Would you have the local committees elected as at present, or would you give the people who are bonefiting by the scheme any voice in the selection -That is a detail I have not considered. 4505. You have not thought that out!-I have

4598. I think you said, with regard to Hackneys, through 1—Yes.

4097. And that you considered knee action objectionable !-- I think knes action is not required for

45fd. As I understand you, you live in one of the best besting districts, and you wish to keep the name of the leanters up, and you don't want any other 4539. And I don't know that it has been suggested that you should have any other blood, therefore, if

you are breeding hunters you would not choose a mare to broad from that had very high knee action? the great nursery for busters for the English assists. -I don't know that it would be a very street objection if she had very good shoulders, shape, and make, and in every other respect was suitable. 4000. You would not mind her having extravagant action !-- I think I would run the chance. 4001. And you think that could be corrected by the thorough heed horse !- Yes, I think so.

4102. Do you think it any drawback for a hunter sire to have extravagant knee action-does it not, to a certain exists, stop galloping power!- I think so, 4103. Therefore, in selecting a hunter sire, as long as he had level, straight action, you would prefer him not to have kness action?—I think he should have sufficient action to travel safely from cover to cover along the road without stambling; anything

buyond that is not necessary,

4004. With regard to harnoss horses do you think
action is a saleshie commodity or not 1—3 am cuite sure price is guided to a very large extent by action.

4405. You think a house with good action is some quinkly picked out in a fair than a horse that has not !—Yes, for harness purposes.

4005. Thus publish the Hackner aside altoucher.

and suppose some breed were accertained to be use-ful to the people in the very poor districts of irelend, would you deprive those people of that ad-vantage on account of any imaginary injury to the class that were well able to take ours of themselves!

-I cannot speak of the congested districts, or we poor districts, in Ireland, but I imagine a good class of pony ought to suit.

4607. I am only mying supposing they had been

tried, and it was found a certain class of animals enited best, don't you think the people who breed hunters in your district are very well able to look after the class of mares they breed from 1-You spe referring to other parts of the county of Cork.

4608 I am referring to Midleton, three people would not be likely to bring mares from Bantry or Castletown-Bere er other parts to beed hunters from in Midleton !—I thank, of course, there might be an exceptional case in whith marm might, but as a general rule I think not. But there is a very street feeling in the whole county of Cork against the introduction of Hackney sires.

4809. When you say the whole county do include the conjected districts !- I think I'do, conglish refused to the resolution of the County Agricultural Society-a resolution was also nacoud by the County Grand Jury at the last Spring Assisse—inanimously protesting against the intro-duction of the breed of Haskingy. 4610. You don't know that as a matter of fact we

had a thoroughteed standing in one of the congreted districts, and we were asked to send back the Hackney mext year !-- In West Cork ! 4611. Yes !-- No ; I was not aware of that. 4712. Personally you have no experimes of Hack-neys 1-I have no experience of Hackneys at all.

The proposer and seconder of this resolution are and of considerable experience in horse-breeding 6613. Charman....Mr. Wrenth asked von if some particular horse was most suited to the peasants in the congested districts whether you would deprive them of the use of that horse for four of some possible injury to a hunter-producing district, don't you comider that hunter-broading is much more valenble than the horse-breeding interests of the congested districts of Coric !-- Certainly, and I might go so far as to say throughout Ireland. Of course, I am only speaking for the county of Cork, but Ireland is

4614. Mr. CARRW.-In view of these new modes of conveyance, the value of the lunter is not hirely to be impaired !- I think it will hold its own. 4615. CHAIRMAN.-From your knowledge of the congested districts—have you been in West Oark at all t—filiuply visiting; I connot speak as to the can-ditions of horse-breeding there at all.

4616. But you have met the inhabitsons, and do you think they possess sufficient intelligence to be able to tell what nort of horse is best adapted to their needs ?-I think myself the welfare of the community should be considered in this metter before any par-4617. Mr. Warreen,-I think you mid the brusteebreeding interest was more valuable. Can you say

at all the amount of the valuation of the men who breed bunters in your district. What olsas of farmere!-In East Cork we have not a very large proportion of very small farmers, and I think as a rule the small farmers of my district very frequently endeavour to broad a bunter themselves, even the smallest con-6618. You don't quite agree with some of the witnesses who told us that the horses that gave Ire-land the name it less as a borse-brooding country were

bred by the gentry and men of over £200 valuation? -I do not ; many small farmers frequently broad a home that turns out a good hunter. 4619. That is in your district !-- Yes.

R. N. Tassov, Durrow, Queen's County

cent. The Courseau, You live in the Osser's nounty !-Yes. 1621. You have had considerable experience in

borse breeding !- I have been at it about swenty some proming! — I have been at it about swenty years. I have bed both thuroughbred horses. Nor-2.0 section a Hackney sire. a Suffick Punch, and a

Side borne, from time to time 4622. Have you got any stallions now !-- I have Alexander, Golden Croscent, going to the stud next I believe he is in the roug, and a treeting horse.

Harleney Stud Book. Humphrey Chinker is his 1888. In he a Verbahira or Norfolk Hashmer L... He is in the Hackney Stud Book ; he is an old horse,

and is by a horse called "Stopping Stone." I hought toe four Arnold at the Glassow Stud. 4624. What house do you breed yourself person ally |- I breed from thoroughbord horses only

4635. What horses are generally bred in yo denict I an At the present time it is very hard to tell what they breed from. They go very often to the country, a knowledgeable man goes to a certain home

rise whole townland will follow him-1621. Mr. Prygwitzan.—What is a knowledge shie man 1-That is a man who is a bit outo, or has a hit of back in selling lorses. If such a man goes to a carolin stellion, all his neighbours will go after

him prespective of anything else. Of course the hose must be obser-4637. CHARMAN.—Are there good mares in your district i—No: the mares have I think gone from had to worse even, for the last few yours. In fact the small farmers connect afford to been a cond mare

on get no price for a bad more and they breed from They are going from bad to worse, unsound, and everything elso.

4625. You think the mares are deteriorating in expecuation of the want of money on the part of the formers !- Yes : I do.

4019. Do you think that farmers appreciate the of the farmers that I know see fairly well off and they always send to a road thereughland horse : but very few of them have really good mores. When I had "Fride of Proxess," he always got from fety to seventy half-beed manes every year, and be did a lot of good to the farmers round about; they got from

£00 to £70 for the produce on three-renr-olds. 4520. Do you tidn't the farmers are generally influenced by the excellence of the locus or by the secount of the service feel- Some of them are inforested by his reputation on the turk; some are

influenced by their frience; and a good many of them wit send their mares to a borns and they will never DAY TOO 4651. Tony don't pay at all t-Not at all. 4652. Then it does not matter what the fee is t-

On t no; they would rather send their mares as a compliment to you; that is my experience. 4433. Are there many sires in your neighbourhood that you consider suitable to put to the mures of the farmers t-Well, there are a far-eome fairly good throughboard stree. I shink the curso of Ireland is some of those half-bred sires. Half of what they call half-bred sires are made up with bogus polityrees 4634. You don't anneove of half-breeds !- No. sir :

because they are not really balf-bred. They may be gut by a thoroughbred borne, and if be happens to tern out a good looking colt they won't out him but will say he is by ----, for instance; a good many are said to have been got by "Pride of Frussia," and I on aware teen got by "Priot of France," and I can swear the marce never came to the horse.

6850. Would you approve of breeding from half-keed borner reality not by "Pride of France,"—I

would like to have the dam at least those fourth- band besides; that is, you should go back as far as the great grandsim. 4036. And that the grandsire and the great grandstre should be thoroughbred !- Should be thorough

bred. If they were got by what they call the old Irish house they would make good huntur. 4637. What do you mean by the old Irish horse 5-

I could not exactly describe the blood. There were one in our country for some time, a great horse called "Sir Henry," who got very saloable horses. He was "Sir Henry," who got very saleable horse. He was what they call the old Irish draught horse—very light. without much hair on his logs, with really good bone, about 15.3 high. He got very saleable larges, as far as fravers were concerned, and he got some hunders

tist could always be sold. 4428. Have you any idea how he was bred!the man that had him for years, his name is Dalton.

4639. Do you know the horse himself !—I often saw the horse and his profuse. He is dead now, 4640. What impression did his appearance give on 1-He gave the sites of being even a bit more than

half-beed. He had no leggy bair and did not display any of the characteristics of the draught home at all. He had seed action, get very good troopers and very good learness horses, and a faw hunters 4641. You think the Royal Dublin Society's scheme has been beneficial in your port of Ireland i-

It has been beneficial in this way. The roce onlightened pecule always like to know if the thegoughbeed sire is sound, and it is a good thing to have a certificate of his soundness You opprove of registration !-- Yes, I do.

4643. Do you think sufficient cure has been exerclass in selecting really suitable horses for regis-testion — I think so. In the Queen's county there were only four that are registered, and I think one of 4044. Hach lurges as you know that are regustered

are in your opinion spirable houses !-- They are, to see really good hunters or high class harness borson, because if they don't breed a hunter you can turn back and sall it as a harness borne.

4048. What is your opinion as regards the prices of looses keed in your editrict i....The prices have at the very least dropped forty per tens, on all sorts of bornes, as far as I know. 4646. What class of horses has been particularly affected by the demonstration of value i... I think it is

meet in the trooper and in the light harness borses, in the light hunters. Even the common horses that the farmers now breed because they can sell them at one year and one and a half years old, and so have not to year and one and a rail years old, and so cave not to been them even these, that would fetch £12 or £13, we years ago, would not get more than £7 now.

4647. Who have them t.—They are all bought by the Northerns, who some down to Kilkenny to purcloses. Nearly all these horses go up North, but I

don't longer for what purpose. 4648. Do they breed as many horses in your intrict new as they used to half don't think so. 4649. What do you attribute that to !-- I'm bad rices. I did not put any of my half-heed mares to a

norm at all this last season. 4650. Are there many half-bred stallions in your part of the Queen's county !- There are.
4651. You don't like them !- I do not.

4651. You don't like them !—I do not. 4652. You don't see any of them of the same class. sa "Bir Henry !-- No, they are not. Most of them are said to be got by "Heare of Oak," "Prids of Pressis," or by "Roman Bee." They may or they may not be , the pedigrees they can make themselves, of this they often do, I know. improve the breed in your district |- No. I don't.

May 25, 1956 4654. Do you approve of the idea of registration and license of stallborn?-Well, I don't see how it is to be managed but I am some it would be a very good ides, of course a registered size now would hardly receive a licence—he has been passed; but otherwise

it would be a very good thing if they had to pay so such for a certificate of sornings, that they could show to anyone that would come to look at a house with the chiest of ois inc him to a mare. 4655. Is has been suggested to us that a sort of revel licence fee should be charged to pracumi

stallions !- I think it would be better to give them a 4626. Are there any suggestions you would like to make as to the improvement of the mares!-I have been soking some old men that med to kread very good hunters, what in their opinion were the best cians of marcs they ever bred, and they said they never had as good brood mores as in the time that Bisnoun's mad cars used to run. They said they used to get the cast-off mares from the care when they would be too old for work, and breed from them, and they said they used to kneed the best hunters. and that their daughters were good hunter producers to. Of course except a farmer is well off he cannot

afford to keep a good mure to breed from. If he is efferred .650 or .660 for a four-year-old mass he will he does not like to take a had price for he will send her as the result to a had see or a sheap can and 4807. But unfortunately we cannot go back to the how did they think these animals were heed, that,

of course, they were not able really to fell, but they thought they were by thoroughbred borses. That

is a good many years ago. 4638. Have you any surpostions you would like to which is to the best means of improving the maces at the percent day i....I thinh that would be very hard to tell now. This selects about adving the cost brosses from the artiflery and army to farmers is a queer thing to look as. Many of them might have been in, and the risk would be rea of the descriptors going back to the father, which would make things were Remember, many of them don't know how the anima's are bred. As to giving £20 for a good leaking mare that a man has been hunting for four or five years and broken down, they rould be bought for a lot That is my experience. I am occasin you

could.

4059. Would you appears of that suggestion that
was put before us by Captain Denellan !--It is a
very good idea, but just what some prolimper said it weaks be, very hard to prevent a lot of unlessy in the distribution of the mares in certain places. One man might be better off than another, and we small not say, "You see a well-enough off man, and we will give this mare to another man who is not so well off."
The man who was well off would say, "I can do the mare better. I can send her a good borse and feed the foal bester." It is very seldon that the foals in the country of any nort are well feel

4660. You don't think the farmers take sufficient euro of their young stock?—I dam say you have an experience of it yourself. If a man has a good farm and had bottoms on it, the ballocks will go on the heat land and the horses on the bad place

4661. Do you think if there was a distribution of maros snell as Captain Donellan spoke of the farmere would be auxious to obtain them !-- I are sure they would. A good many would be very anxious because they have a love of breeding. If it were not in their way to send to a good sire, with a little inducement as to a prize afterwards, it would help to improve the breed altogether 4662. What sort of borne do the farmers in the

three years they used to go to the thoroughtent boson nearly altogether—at least I mean in my own more district, but lately they have taken to going to the common horses again, or half-bred horses

the common nerses again, or man-upon somes, 4003. Why 1—Bonnes they can sell the produce easier. They cannot sell a well-bred animal that is only one and a half years old if they take then to a fair : but if they take a one and a half year chi "hairy legs," as they call them, to a fair, they can will "heavy segs," as they call them, to st them, though the prices will be had 4141. Your experience is that the hairy-learned one

looks batter in its worth than the well-loved cond Yen; and it does not require the eare a well-head one

4655. Have you say experience of heeding from Hackney sires 6.—Essept this horse that I here, 4006. How long have you him !-- I have him sty

yours : I have bred from him. 4057. Is these much of his stock about your neighbourhood!—No; there are some, but not many, He did not go down with the people some way or

other. I don't know the reason why. He has fine action; he didn't take at all. The other home, a Norfolk treater, at least my father hought him to Norfolk, did very well for three or four years as far on his cetting moves was concerned, but then his produce did not turn out well. They were very narrow, and the most of them uncound.

4665. And the produce of your present horse-did they sell well b-No; he didn't term ou well either 460k. "Pride of Prusia," of course, was an excep-tionally good stellies | Well, he come with such a good page that he got plenty of good names. I only gave him the best mares, and of course the purple got good prices for them. In fact in the Queen Courte there are not ten. "Pride of Francia." seem

I have not one myself. 4670. What breed of stallion do you think is best adapted for your part of Queen's county !-would not a three not bond brone ... doudnily, because there is a lot of limestone land in the Queen's County, and this is adapted for roaring young horses. have no hounds in the county pow-it is a great loss

We have not even a pack of harriers. 4671. But still I conclude that the burner dealers go into the county !--Yen; because most of the Queen's County fellows that are now go to Kilkson; to hunt. It has always been more or less famed for

good hunders. 4672. Mr. Frrawillian,-Do you think that the jealousy you talk of about these cast off lunting mares may not be chviated in some way or other by selling the marer by anotion confined to a district? Do you think that something of that kind might be done !-Not except you distribute the mayer to formers under (a cortain valuation, and over a certain valuation, and then allow so many to a district. Let the complittee pick out so many and then they would have to draw lets for the mare, and one would have it only for one or two years. Then there could not be any indoney: that is the only way I see to avoid it. I know pleate of farmers in the district I live in who would be very glad to keep a good mare like that, and work her and mind her. Of coarse is does not do a brood

maye any harm so far as harrowing or ploughing goes, but it does to care them -it is a risk to an apport 4675. Do you shired to half-hred horses 5-I do so

4674. You object to them mainly become you not rely as their pedigree lamb, you can't inded.

4676. Should you object to them if their pedigree
was able to be guaranteed the would not object to
them if they could go back at least four grown tion; because there is many a good steeplechase bores that is not thoroughlived—he is not in the Stud Book but he may be nearly thoroughbred, and he should Queen's county like to broad as a rule !-- Till the last est good hunters.

Ma R N.

1677. CHARRAN. -- Can you trace " Eileen Arose's" pedigree i-About four generations 4578. She was of the same blood or "Lochinvar" !---"She was in the same way bred as "Loohinvar," but She was in the same way bred as "Loohinvar," by "Bar Ons," out of "Etiem Ope," by "Heapy" out of constiting by "Small Hopes." That is as for as I can go; that is as far as Mr. Brindley could get it; the go; that is as far as Mr. Brindley could get it; the suin comes in then. But I saked Mr. Corline that overed this mare, and he said it was a general rele down there not to got their horses in the stud book as to lots of their local races they could claim 78bs. for

4576. And there were a good many more of these

a few years ago than there are now !- I have a more

being half-bend. 4579. Mr. Frezentalass —Do they do that now !— There is no such thing allowed now. 4680. Col. St. Quistin.—You say the prices have dropped very considerably in the last two or three years 1-Yes 4681. Do you think they have dropped equally in the very high-class hunters and harmes horses !- No. not in a good weight-carrying hunter.

4982. And in the harness homes !- The harness horses I have not much experience about. 4683. Do you think a really good thoroughbred horse with sufficient bone and action can get as good formed and good actioned a harnous horse or light draught house as any other stalling of any other bread it -I think so, decidedly.

4054. Therefore a lot of these berree that do not come up quite to the idea of the high-class hunter are very capable of making high-class harmen horses !-1685. And there is a great demand for these in the sarriet!-Yes. 4665. Do you think the price of them has dropped !

-I have no experience of that. I have never sold one. 1687. You have no personal experience, but round shout in the breeding country are not a lot of lorses said to the dealers as high-clar harness horses, not as

busters !-- I don't know anything about that at all. Mr. William Dunks, Ballymarius, Queen's County, executed. 4690. CHATRIAN. - You live in the Queen's County, and have taken an active part in horse-breeding for a great many years !-- Yes.
4700. What class of home do you principally

irred !- Thoroughbreds and half-breds. 4701. You have bred half-bred borses !--Yes, used within the last four or five years. rawfa I level a good number of half-breds. I always kept

three or four mares working on my form, and I always beed from thoroughbred horees. 1710. You always used a thoroughbred sire !-4703. Were these mares you get to these sires got by thoroughbred horses !-- There were some. Every helf-bred mare I had in the world descended from an old Irish mare belonging to my father. She herself I never had anything to my to, but they were all out of her, got by howes in the country, and of them, as well at my father could get them, and in my time later on there was a very good Irish horse in the country, a real set of an old Irish borse. A number of then were got that way, and others of them were get by horses with a tonch of the Clydesdale.

4704. How do you define an Irish horse every borne bern in freisnd !-- I don't ; clean in the legs,

4689. You don't quite understand use. What is the greatest age that you would hand over a many to the farmer at. Say sixteen years of age 1-No, I 4590. You see the difficulty of course with the Government horses is that except through vice or some disease they don't leave the service until they are sixdissues they don't have the service until sory see au-teen years of age. Would you consider that too old? —Too old, in this way. Yeary probably the more would miss the first year she would be put to a stallion.

service and other sources to the farmers, what is the

Any animal fed in the service on corn would want to be fed on grass.

4891. There is not sufficient life in her to induce the furmer to take her on these terms !-- Yo work and fred. Of scurse she might breed the next year, and it as not certain they would not breed the first year. 4693. Mr. WEINGE .- Your only experience about Hackneys is with regard to these two horses you sail your father have had?—That is all. 4693. One was a Norfolk trotter 1-- Dought of

Grapts, Wood Eridge, Norfolk 4094. The other Humphrey Clinker 1-Yes, 4095. He does not appear to be in the Hackney etnd book !-- I haven't a Hackney stud book. don't know whether he was in it or not. I know his pedigree. He was sold to me with his pedigree, and 4696. He is an old house !- A very old house now,

he is eighteen or twenty years.

4607. Charman.—Are there are observations you would like to make on the subject of improved breeding ?-I have nothing else to say, 4698 Mr. Frizwitatau.-Cun you suggest anything with a view to inducing farmers to keep their maces !- Nos in the present state of depression of everything in Ireland. As a farmer, I know that overwhite has gone down, as far as horses, cattle, sheep, sora, and everything else is concerned. many of the farmers when the landlord calls for the rent they have no other chance perhaps but to sell the horse if they have a rood one and they are very glad to have it to sell.

good-looking, strong, low, and short legged. You see a lot of them in the County Waterford without any hairy heels. I can't define them better.

4703. How were they keed b--I haven't the remotest 4706. Mr. CARRW.-There is theroughbred blood in them, you think !-- It would be more guaranty what I would say about it. I have no way of

defining them at all. I have always looked upon these as an old Irish breed of horse, just as I have a certain class of cattle that I look on as old Irish blood. I can't tell you why, and I have never heard any explanation of it 4707. Chargean.-Do the farmers in your neighbourhood broad a great many horsest-They did do so, but they are dropping out of it, and with all respect to you, gentlemen, I think the Commission is upon the wrong lines, as to suggestions for improving the breed. What we want a Commission for is to tell us how to improve the prices of homes in Ireland.

breeding has declined it is not because the blood is not there, but because there is soihing for the

4708 Mr. Canny.—Den't you think priors would follow the breeding !—I den't; I think the breeding

Mr William

No. William

No m. test. has not gone off. I think there are as many good We written horses bred in Lesland as over there were. 4700. CHAIRMAN.-You throk the horses have not deterrorated, but that the value has depreciated !- I am perfectly certain of it. I don't know whether this may he connected with this inquiry or not, but if you will allow me I will tell won what I think are the prices allow no I will tell you want I think are use process of horses now in comparison with what they were ten or fifteen pears ago. There are three fairs resend no, and they are typical Irish fairs. They are held at Rathanlagh, Frenthfurn, and Ceathelemon, I are perfectly certain that in those three fairs this veer there were not ten three-war-old horses sold for £40 nach, and I think I am over it a good deal in saving there were not ten. I don't think any three-year-old unless there is something remarkable about him, is worth £40 in the public market now. Pifteen years ago I saw £90 offered for a three year old in Rathago I saw Zoo offered for a three year-coo in featu-salingh one day; and I am perfectly certain that the full is in the price of the horse and not in the value of the animal. If the best three-year-old in a feir iv not worth £40, what can the average three-year-old be worth I Certainly, I would say not £20. This is what we farmers are asked to go on breeding horses for, and when we have them bred there is no for the ordinary horse. Consequently I myself and a

good number of other men are dropping out of breeding. It is better for me and others to go to me nur and buy a horse if we want it than to hered it. 4710. What do you attribute the fulling to, to lack It is better for me and others to go to the fair of quality !-- I don't think so; I can get as good a three-year-old locus now as I have ever dons.

4711. That is, you can get as good a horse for £40 now as you should pay £10 for some years ago !— Mr. CARRW .- That is, the cream of the three-4712. Bit. CARRY.—Take it, the oreast of the infer-pear-olds !—Yes. More than that, you will now got a 12 stome hunter for 50 or 60 guizeen as well as any that you paid £120 for some time ago. Widger told use that. He told it to use in explanation in a con-variation we had when I was remonstrating with him variation we lad when I was remonstrating with him on the price he was offering too for a home. I are on the price he was offering the for a notice. I am outle sure of that myself, for my own experience is

4713. Charman.—You are quite sure it is not ewing to any daterioration in the horses themselves? No; I don't think it is. There are as many good horses in the country as ever; there may be more had ones. I don't think that in my county this present scheme of the Royal Dublin Society has done

4714. What class of horses do you think your part of the Queen's County is best adopted to breeding !--Thorough breds.

4715. Clean thorough hands 1—Yes. 4716. You would not suggest that the farmers should breed class thoroughbreds !- I mean sires. . Will you sak the creation again. 4717. What class of horses do you think your part of the country is best adapted to produce !- Hunters.

I have never known them do anything else. fellow who thinks at all of what he is going to broad from has a hunter. I know nothing at all about barrous house. I never saw a barness horse buyer 4718. In attempting to breed bunters they very often breed steacthing that is not a hunter !- That is particularly so just now. There is a horse that is getting rather good stock, I noticed them in the show the other day in Maryburo'; his produce looked to me

more like barners horses than hunters and the sire is the only conlitable registered sire in the country.

4719. In it a thoroughbred sire in—Yes; " Early

4720. Do you think that the mares that the farmen use have deteriorated, to your knowledge !-heard you ask that question of one or two of the other witnesses. As a matter of fact until these mare shows were held, as far as I myself was concerned I

did not know, and I think that hardly anyone size did not smow, and a same sees ascury anyone each had an opportunity of knowing, the mares in the country. Until these mare shows of the last four or five years. I never saw all these mares. I saw then gathered together at the last summer slow, and I my that it was the hest. This year I was asked to indein Longford. I never saw as good a class of mare is my country as in Longford. As far as judging ros-I don't think myself that any man can may what is a rood brood more until he sees its revolves 4731. What !-- Until they see their produce. The

only really certain good broad more I ever had of an only really cerosin good proof more I ever not of my own was a mare that if she were entered in a slow would be hursed out of the ring with the first lot when the judging was on in her class. She would not sell for more than £10 I think, but I never sold a colt out of her for less than £200 at four-worseld.

4722. Do you mean that she would not get a prize in a show!—I say if the was the only one in her slass you would not give a prize to be for result of mer

4723. Mr. WRENCH .- How was she bred !-- I had her revealt by a stallion that led a good deal of Clydesdale in him out of an old Irish tears. 4754. CHARIMAN.—Have you say suggestions as to supproving the mases i—They are not of a very high standard. It have not; but I have this suggestion is make, and in that I think I will disagree with shoot all the witnesses here. The only way you can inall the witheness news. I me only way you can be prove the breed of horses is to go to the sires. In the latter scheme that the Royal Duhlin Society are now working under, one of the rules is that no price on be over £5. The price to the sire has been done away with. You can hardly imagine, or I con't images any man keeping a more for the purpose of, or lay ing a mars for the surrose of, taking a clause of ig a mare for the purpose of, toking a chance if otting a prize at some future time of £5 and no more. That is a present what you are doing. Under the system also a man may get a prize out of this mass when the feel is about two years old; and the price ha may get in £3. I me thoroughly convinced that at revered to my county at least their is not a year

more put to the stud then there would be if the Reval Society did not give a shilling of this money.

4725. You don't think this scheme had the effect of inducing farmers to keep their good mares t-it am perfectly certain it didn's. All the Barel Duble Society is doing now is giving a man a chance of 40.4 I know of my own knowledge of lots of man who had intended sending in mores to the shows in the Queen's County, and merely because it was a fine day and a good day for working on the form, they didn't send in the mary on a shores of esting £3 by

doing so, and I think they were quite right.

4126. They would not loss their duy's work!-They would not lose their day's work. I am rerr They would not lose their day's work. I am my strongly of opinion that there is not an extra mare in the Queen's County sent to a sire more than then would be if there were none of this moner of the

Royal Dublin Somety going.

4757. Do you think that one farmers have got a sufficiency of suitable sires 1... No, that is exactly what they have not got. I see a friend of mise here, and I would be very sorry to say anything burtful to say would be very norry to say anything harfful to say the dissistent, but I can't help it really. The sies in the Quase's County last year, were "Almane," Bell Demonds, covering at thicoton guides, "Earlycope," "Early Eiri," "Quastes," at the guines, "Early David," at thirteen guines, Then were, I think, put in here (referring to a decrement) as ma divertelement. I know "St. David" morn) as ma advertelement.

and "Bel Demonio" would not serve half-hred mares I expect Mr. Rinks yest them in an an advertisement for his size and a very good advertisement. That leaves three other horses. "Almoore" has got race horses, but I don't think be has size to got hunder nor either do I think that sither of the others are much. In that way I think we are wretchedly served with sires. I would almost say that unless there was something superlatively good in the mares I don't chink they could get very high class produce. ing to friends of my own, but a man most new what

4738. Do you suggest that the sires should be subsidised b-I do, and I can speak on that with a certain amount of experience. It so happened that I was saked to go and judge at the first show of perbe of heaves I never new in a show-yard. I never

was more dispusted in my life than I was with that lot. Hix or seven yours afterwards I was safed to go ne. Max or never years are reversit I was assess to go assess to another show. I think one hold at Islington.

is. I never naw a finer but of horses in my life in a showward, even putting the Royal Dublin Scriety in. in Ball's-bridge as I saw on that day

4749. Mr. Freewilliam.—Was that the class for precluss sires 1—Xes, the premium sires. I solved Captain Fife "Hawe do you account for the wondries temperocenses!" « Well? It is said, "it it worth our while you know now. We are gesting £000 a year for these lones now, and we can affect to go and lay then? There is another wan I know very well— \$100.000 or \$100.00 receisus sires!---Yes, the premium sires. I asked De Harlewood, of Buxton. I have to go to Buxton now and then, and he has ruther a fad about horses. When he asked use to look at his stud. He had two or three wretched boasts. Later on when I went there again he had five excellent horses. I was one of the judges

he had five excellent horses. I was seen in any in the who gave three of them £280 each at Islington. Ho said to see .—It is a real good game now. I can see the horses. I can give £400 for a affect to go and buy horses. I can give £400 for a horse now, and I can send him out, and it pays use well if he only lives two or three years." They have study to this one scheme from the beginning in England, and in my ormuon it has done an immensity of good in the shires. It has done that in the stree, and good sires must produce better fools than laid ones.

4710. Mr. Privatlisan. - Those is not a great number of them 1-There is not one extra one in Ireland. Do away with the whole of the Dublin Society's Scheme, and ven won't do away with a sire in Iroland, nor in my opinion will there be a single brood mare the law. With the quantity of

give it all to ; on the other side you move divide at aerought fifty or sixty mason, and that brings it down to nothing. When this scheme was going on in Iroland I know a man who want to England and bought in this country from the Royal Dahlin Saskey. He paid a good price for that kope, but then the past year another solesse for a year, and then changed that to enother scheme, and they sown to be changing it from your to year. I think they are clycking their money

4733. You approve of the idea of registering sound stallium 1-I heard you ask that of each witness; is it possible that you mean that every man who has a stallion in Ireland must register it.

4732. As far as the Royal Dublin Society is con-cerned!—You. 4733. You do approve as far as the Society is conengad L. Ven

4734. Three is also a suggestion that all stallions should be licensed !-- That is a most drantic idea.-unless they are sound they won't be licensed, they will

be driven out of the country, in fact. 4735. The suggestion is that a beavy fee at any rate should be placed upon such horses as are not ourtified to be sound and spitable !- But does that souly what to be sound and suitable !-- list does that apply to thecoughized stallions covering thoroughbrod marms ! According to that you know "Ormond," if he came to this country, would be buried out.

4736. Mr. Fryzwingray.-It need not apply to any sen except those covering under a certain fee !-I think it would be interfering; it would be very strong coereson.
4757. Mr. Canew -- Ormand" was sold out of horse I am thinking of is a horse that is covering in Ireland at the highest fee for the past two years, think this would be a very strong corrive measure.

could not say I would.

4739. Then the improvement you would answer to the Royal Dublin Society is to revert to their existing

athene !- Yes, and then stick to it 4740. You would appeave of the subsidisation of sires !-- Yes; and we pessed a resolution to that effect at our county meeting this year.

eners at our county recently this year.

4741. You would only subsidise thoroughbred
sires!—Certainly; I would only subsidise thoroughheed sires; I would draw the line based and foot. Mr. Fitzwilliam asked a question about half-hreds that were almost thoroughbreds. Of course I look upon "Maykoy" as a thoroughleed horse. It so betweened y father was one of the stewards who acted in the " Doeb-ap-Durrus" once which disqualified him from the stud books, but it was really that very tiding that Mr. Talbet said about the seven pound allowance called "Lawrey," one of the finest horses I ever naw,

a useful house and an arrival that you a great prouber of Queen's Plates, and could on ry 14 stone to bounds. of Queen's Plates, and could overy 14 stone to nomes.

I believe that he was really a cockodi.

4742. Mr. Perzwerzzaz,—Ha was bred by Sir Tatter Seles, if I reveniber ariefd. In the same and of way the seven pound allowance had a great deal Bast Riding of Yorkshine!—He was a most awful fallure as a circ of half-head stock. I sent him a lot of mares, and I never got saything worth a fig from

He covered in Kildare for two or those 4743. I dain't think he over covered in Kildare !-He did, at Waters'. I had three or four horses by him. I forgot that he went to Earl Fitzwilliam after-

4744. He was in Westerd afterwards, but he didn't come to us.—In my country by was a total failure.
4715. CHAIRMAN.—"Hotspin," of course, was a

horse not in the etad book !-- I don't know anything 47.16. You would suggest that the Royal Dohliu Society only recognise thoroughleed horses 1.—Yes. 4747. You agree with Admiral Ross that the

thoroughbord horse is the best horse to the world !--I believe that the thereurblered anicosi of any sort is, As a farmer, I have very strong ideas that it is almost impossible so breed from a half-bred of any almost impossible to breed from a nathernee of any sort—pigs, cettle, dogs, or anything. You may breed in the first eross, but if you try the second it is not satisfactors. We know the cross between the sector could not make head or trul of them. It is the same with pigs and cattle—Polled Angus or shorthouse. If you attacent to so the second time you get ment extraordinary animals, no two alike. 4745. Mr. FLYSTILLIAM .- I think what you say

about the second orces is almost universally acknow ledged I-Well, you see it will be a record cross if you breed from a balf-breel borse with a half-breel With half-bred mares the number of uncound foals will be twice as great in percentage as when breeding either from Chydesiales or thoroughbreds.

4749. OHAIRMAN .- Do you think that the therough-The dome has improved in excellence during your memory t-I dun't know. I never thought of that I don't think they are. I don't think I ever now a flor home than General Peel, or Blate Albel. or some of the horses of those days, and I suppose Nov. 22, 2124. W. William

when we were vogager we thought more of the horses we saw then. 4750. Admiral Rous said that the thoroughbred home increases an inch in stature in every twee five years, and that, in fact, the average height of a thoroughfred borse is a hand higher than it was 100 years ago f... I don't know about 100 years ago, but I ion't think he is anything higher than he was twentyfive years ago. I am quite sure he is not.

4781 We said then in 1873 that the average bright of a thorogen bred was a hand higher than it was 100 years before 1-I saw just as many hig horses twentyfive rears are at I are now.

4752. Do you think thoroughbred horses are more ensured then they used to be !-I think they are in

England, not in Ireland. home that would remain as sound if submitted to the

same tests as the thoroughbred horse is submitted to !-- I don't think so. 4754. Therefore you consider that a particularly around breed!—Much the coundest of any one single broad thest I know of. I don't know anything at all of these Norfelk trotters we hear so much about; but as for Christofales and all that nort of animal. I

so rure that the thoroughpred is the soundest; if people took the ordinary care of not breeding from 4755 Admiral Ross saws "The stature of the thoroughbred home has increased since the year 1700 as inch avery twenty-five years, and whereas the average size of a horse then was 18.3 bands, the

average is now 10.2 manns, and into in carrying power they can carry twice as much weight as they could 100 years ago "1.—What ago is the horse that the average size of in 15.2 ? 4756. He does not say!-Certainly the average height of a full grown begge is higger than that now. 4738. Mr. Cantw. In the licerolug schome that every horse should be liesused it is not at all successed than horses such as you describe should be rejected.

It is suggested that the object of a Hesses is that the defects from which a horse might be suffering should appear on the face of the licence, and let the farmers have the option of going to that animal or not, as they like b... What will be the affect of the horse is not

4759. He will not be licensed for shape and make : it would get rid of the bad horse we want to weed out !-

In it he may or he must be licensed ! 4780. It is that every one who owns a sire must get a licence!—Yes, but if he does not get a licence. 4761. That shows he is too had a horse to breed from that is, as reports shape or make !-- But that is what was are deing now. You are registering horses now but that is all you propose doing under this scheme as well as I understand it. You will resister any one that asks to get as horse regimeron in observed in the first service of the both force in the Queen's County is an mangistered horse "Philammon." I have sent a loo him the way became he is there. What

is your scheme! 4702. To attack the mongrel breeds going about the country i-But your scheme won't do that the country i—But your solvens won't do that.

4763. In this way, if so much is charged for a licence a great many would not keep horses i—But you are penalising the good horses.

4764. Not the good ones, I should say t.—But the good ones won't take out a licence. 4765. The owner of a good home would only be too.

willing to take out n license because the bad ones will be out rid of i... Why should you sak him to do so.

You are doing the reverse of my scheme. I see for giving a sire \$200 and you want to make him pay 4766. No, in the first place you would want a com-mittee to select the proper style of horse according to the sheps and make; even if that horse is suffering

from any potent defects, it should be stated to on the face of the licence. The farmers should have an concetunity of seeing that, and of going of he libed to that horse -But then you are not going to charge the sire owner for that. That would be terrible. What would you suggest as a remoly inthe avil that undoubtedly exists of had shared size in the country ! -Put good ones at a low fee to sare I wen perfectly certain of that. Let sound mares. I am perfectl them be Dublin Society sires.

4758 But if the Duhlin Society suggest any improvement of any value they should stick to ist ... I am very strongly of that coinses. 4769. And they should increase the premium t-

If they could. I think if they could give one good sire in every two counties busides what are in them. They have done nothing in my opinion up to the present. The messy that was given to my county in absolutely in my opinion thrown away, and if they

more than we are getting.
4170. You said when breeding half-book with half-bred there is generally had produced. It is ter. to one that it would be ansound. I would not

breed from a half-bred horse on any terms; they are 4771. How would you propose to maintain the size and substance of the mares!-Put a good thoroughbred size with a good wall honed mare. she be a thoroughbred !--My own experience with average is now 15.2 hands, and that in carrying power

marce is that no men knows a good mare until he sees the produce either in thoroughbreis or 4173. Mr. Warnen. - Did you hear it argued this sorming that if the Dublin Society were to give prizes up to £20 for mares that would keep the cool marse in the country. Do you think that is a practical scheme us all i...No. I don't. First of all they could not do it to any extent, and then a person must always look at it in this light. In their own view atways book at it in this light. In their own rises a farmer in not going to keep a mare on the channe of getting £50. He mry get it om year, if he he n superhitre mare he would got it every year, unless you prevent him getting it the second year, by a rele to that effect, then he will have his £50, and he will sell the mare, and will

to the foreigner who comes to buy the mare, "That's a grand mare, I want £30 more for her, for she will get first prize this year, she get first prize hat year." But if you give the one man the prize year after year, the other follows wen't send in their mares. They will say, "What is the use of sending in against him to 4774. CHAIRCRAY,-Are there any other surpre tions were would like to make as to improvement in

the breeding of horses !- I really don't think you want to improve the breeding of horses so much as to improve the price of them when they are as to improve the price of them with they see bred and reared, and the only way to do that I think is for the military authorities to buy yearlings and two-year-olds. If that could be done it would do a los of good, because it is very hard on a farmer with only thirty or forty acres of land to keep her horse up to four years old, as he much

4775. Colonel Sr. Quarters.---Why do you put in down to the military authorities?

not say the Government should 1-The Government would do it for the military. 4776. The military are only a small amount in the country, and there are certainly not so much funds

for them that they can affect to throw much away!I should think they would be making menty by doing it.
4777. It would want a large establishment!-If they bought the yearlings and two year olds and had them properly fed and kept up to four years see what

Mr. Willer

fr. George Colline

As a matter of fact, you are now making somer by them; you are having them for less than money by them; you are mying them for less than their rearing costs. But you can't expect us farmen to be such fools as to go on doing this. You can't expect the class of troopers you are now setting for £35 after five or six years.
4778. That is for the Government 1-But the Government don't want horses except for the military.

4779. But they are the people who should legislate. As a commercial transaction you would not go into the yourself. You would not set up a bir establishment and take the risk of all the animals from yearlings and those eighteen months old up to four year olds III think it would be well "orth the

many they take in the year 1-No.

4730. This were I bought 730 horses up to she present time 1-And where do you get all the rest. 4783. I have never bought more than a thousand in the year? - I thought it was a great deal more. 4784. I can get as many as ever I like in the fairs at my price of the highest possible class. It is a very, very small item in the export of Ireland b. Ves. W they only got a thousand a year.

4765 It does not affect the breeding of Tryland at

-They breed one almost every year.

ASTO. Used to be better 1-Ves.

these inferior thereuzhbreels.

provising. It is all well enough now, but how are we more troopers bought.

all t. No; not much I certainly thought there were George Corrors, Dipole, avareined 4804. Then they must breed a good many more horses than they require for their own requirements t

handler also, thicker and more suitable to our require-

4786. CHAIRMAN.-You come from Kerry !--You 4787. Are we much interested in home-tree-first -7-4788. What part of Kerry do you live in 1-Die 4789. What closs of horses have you bred !--Ob. some from thoroughbreds and some from half-brode 4750. What chest of horse do you find most suit-

relitary authorities while to look forward and make

able 1--Our horses are used for general work. Very few people keep more than one horse, and he has to do every kind of work. Our masces at present, I think, are in need of more substance; they are almost altogether the produce of very inferior thoroughbook.

4791. The mares are 1—Yes, thoroughbood or half-

bed, and the theoretic roany thereographic stallions
4792. Were there many thereographic stallions 4712. Were there many theroughbrea stanions standing in the neighbourhood of Dinglet-Yes: hardly ever without one for some years back. Those last two or those years there has not been upo. was introduced last year, but I don't think be has got much to do vet 4793. I excelude the Concented Districts Board

horses have taken the place of all other stallions down 4794. And gots much the most custom !- Yes, and its produce are very rouch superior in appearance to what we have been accustored to for a long time. 4795. How old is the produce now !- We have had the Harkney sires for three years, I think. 4796. They are two year old 1-Yes. I seen many two-year-olds altogother, but I have seen a

number of yearlings, and they are far and away superior to snything we were scountered to 4797. To the ferroger sell a cond many of the nondeen at a year old i They do and sell earlier ; thay sell the good ones almost always. 4708.—As fools and yearlings 1-And when they see older too-three years old and four 4798. They sometimes keep them as long as that I

-Ven 4500. Where do they go to !- They are bought in the neighbouring fair ; they never to to a fair outside in the county, 4801. You don't know who buys them !- No; s good many are bought locally and rest short from hand to hong sometimes, but most of the specially good ones go to the fairs and are carried away on of

4802. I suppose the small farmers in the neighbeerbood of Dingle breed horses more for the purpose of sale than for their own requirements !- No. on the contrary they bened more for their own mee, but when a 4503A. Are the owners of the maces very small farmers, as a rule !—Yes.
4803 Then they possibly do not want more than
one mare to work their farms !—Yes, and will only keep mares; they sell their out foals and geldings.

Almost always.

4316. Mr FITTWILLIAM.-What do you say the horses are to which you have been accentomed. say you profer the Hackneys to the borses that you have one apprehensed to in the district, what were skey !--The former ones were chiefly the coughbreds or sires got by thoroughbreds out of any more. 48 7. But I mean were they very weedy ones !-

4815. Von world set three too light !- Yes.

4805. Surely that man breezs his horses for sale t -Bot not for the ostride market; he breeds a large that would be suitable for his neighbours about him. 4805. You approve of the Hackney horse and his rendron in none district L. Ven sir they are a well

come improvement on those we have been accustomed 4807. Have you any experience of breeding from Well, I had a more got by a half-bred Clydoclale, but a very good one, that I refused £80 for one time 4808. Do you approve of the Clyderdale sire !—I should like them better than the thorough bred we have should not stem better than the thorough area we have been accustomed to, but I should prefar the echhish Hoskney to the half-bred Clovingtale. I think is it a

4800. Do you think that the class of horse in your district has deserteened in your own knowledge 1-4811. To what do you attribute that deterioration t To these poor thoroughbreds and their balf-bred Before then they were usually half-bred from either about the country whose pedigree very few crait hout

up, but they were stronger bone and larger animals. 4513. You thought the stock by them was better i -Yos, better tempered, we got a lot of sour weeds from 4814. Have you say reggestion you would like to make as to the best means of helping the farmore to the present horses for sometime until you lay the foundation to give an agene mares, roomy, encel dome.

in that might be put to thoroughly alterwards by those who prefix that class of bose you would be on the right read. But I think if we were to have theconglibreds constantly, even though we start with a lot of suitable mares in a short time we would be back again to those that were not useful for gueers

4319. Ween they often unround !- Yes.

Greege

thoroughbred, is that what you mean !- And at the present time I should prefer a Hackney to even a good shoroughbred. I think it more likely to give us a supply

4820. Then you prefer a good Hackney to a bad of square good dass to breed from.
4521. If the thoroughbowd was of the same callibre as the Hackney !—Well, even then, I think be would be more likely to get light homes than the Hackney

4823. What do the stallions there usually charge for covering a mare 1-There is no uniform charge, a lot of them follow their friends and they pay fees

down to almost nothing. 4823. And the mores are extremely small and weedy too, I suppose !- Yes.
4534. In fact they are not worth breeding from !-

Not worth breeding from. 4925. And you think you can removitate that class of unimal into a class of more that is worth breeding from !-- Well, your work is to improve had onto I

apprehend, we have no very good onesto make better, we have bad ones we should like to improve and I think the way to do it would be to make them heavier first of all 4526. Mr. Canew .- All the thoroughbrods that have been serving in your district were weedy ones!

-Yes, though one was the winner of the Grand Stand Plate in Cock, he was perhaps one of the worst in

4827. At getting stock 1—Yet. 4828. Then you approve of the Hackneys for the perpose of increasing the size and substance of the perpets of the breeding by theroughteets i - When you have a foundation of good dams I imagine the thoroughteed will find his way without any special assistance, the man who requires to breed from him will always find him out, and his breading constantly renewed there would in a very short time produce a lot of horses unsuitable to the requirements of the formers. 6829. You think that mares can be improved by

mating with the Hackney now !-- I do, sir, and then when the mares are improved you could go back to the Hackney. 4630. Colonel Sr. Quintus.—You don't require a very large breed of horses, do you, there!—No, ur.

4831. You want a think set, active, useful horse t -Yes 4832. Up until now you had a very good breed of posice and small animals in the country and they were kept at a certain size 1-My memory does not reach so far back as that time, I have heard of their

breeding in the neighbouring barony more than the one I reside in, my surmary does not take me back to the pony class.

4883. Do you think the country itself is capable of preducing a borne that would sell to advantage out-aids its own county t-Oh, I do. I beard a gentleman may a white ago that £40 was a good price for a three-year-old, I refused £50 for a three-year-old this

turney-pear-ole, I retilied 200 for a three-year-old this spring got by a thoroughbeed, but a good one cent of what is known as a common mare. There is plenty of good feeding down there for bornes, but I should say it would not be a thereughbred breeding country. 4834. You know some class of countries will grow size and others will not, do you think your country is capable of growing size t—I don't think so, size, 4836. In your cattle you cannot grow size t—No, and with difficulty maintain size when we import

6836. Mr. Wansen.-Do you find the produce of the Hackney very hardy !- They have not been amongst un long enough yet to know whether they are

going to be hardy horses, they have the eppearance of 4837. But I mean hardy young borses to lie out during the winter 5-Yes, I have beard no fault found with them in that way.

4828. And you have had no experience yet as to whether they are easily broken or not! -They seem

quiet and I have beard it remarked by some people that they very likely would be very easy to break. 4829. Have the produce of these Hackneys sold at better priors than the produce of the stalliers yea have had before !—I don't know that many of them,

here been put on the market at all. 4840. I mean in the neighbourhood where they have changed hands so far 1—Not enough to give an idea as to what the general value would be,

4841. Are the foals now and the two-year-olds or whatever age, are they superior in appearance to their dams !- I only saw a considerable number of yearlings and they were certainly very much superior. 4842. To their dams !- Yes, and to everything that we were accentored to see,

4843. And would you suggest any other house being sent there in preference to the Hackney or would you rather have the Hackney!—I should rather see the others exterminated, those we have. I should like to see the had once inspected annually and yot off altogether

4844. But you think the Hackney is very suitable for your district !- I do. 4845. And do you think the people of the district share that originish—I am onto satisfied they do.

4846. That is the general opinion of the district !--4847. Are those people an intelligent people, squable of forming on opinion as what suite them best 1—I expect they know their own business. 4848. The Kerry people are fairly shrewd, are they not b—I should raink so.

4849. And it has been suggested here that it is neeless for small farmers of that type to breed homes, would it be possible to provent them breeding!don't know what the law is capable of, but recesmendations would not prevent them breeding. 4850. And as a metter of fact it pays them to

breed, they get some profit !-- Ob, yes, the mare is never idle. 4851. It is an industry that paye them !-- Yes. 4852. And an industry that they will carry on !-

4855. Colonel St. Quorus.-You say that there are none of the Harkney breed sufficiently advanced for you to be able to form any opinion as to whether they are a bardy borse or not, or a useful horse, they

are only young!—No, sir, they are only young.
4854. Then you are not speaking from any experience, it is only your fancy or idea that this will be an improvement i-It is more than fancy, as to their shape apparently they are a stouter home than those beed from thoroughbreds.

4855. But it does not necessarily follow that because a house is large he can do more work than e small or lighter horse, therefore you have no actual practical knowledge that a Hackney will produce a home that can do more, it is only your idea that he will build know those we have from thoroughbreds are from Hackneys will be good

6856. Quite so, but it is only hope at present!-Only hope at present.

4507. Mr. Wanson.— Do you think you could suggest any improvement in the scheme 1—J don't know, sir, the removal of restrictions on the horses supplied by public bodies I think would be desirable, based on valuation or saything that way. I understand a mare that was blemished or did not recom mend berself by good shapes is refused the services of the Hackney down there, and I don's think thus is

the wisest way to proceed, I imagine it would be better to let all who would come to him. 4858. Would you let the unsound mares go if they are manifestly unsound !-- I would, they will go to some horse and they might as well go to a good one-4859. And you would leave the restriction as to valuation out and let everybody have the same opportunity of the same fee!- Yes, at present the

Mer 21, 1885,

low valuation means a seasity use of the house or a now you make the state of second work you would be often been to a clear of farmer that was much be giving into use to a case of access to the way inner care Early to sell a good one immediately, 4860. You would let higger farmers in h—Yes, 4861. You know as a matter of fact that all his services were iskirn up h—Yes, and in consequence of

the entrictions as to valuation I am aware that mores the property of farmers with larger valuation were surrentriopoly not to the horse, that is to say they were not in the name of farmers of smaller valuation gree pan in the name of partiess of smaller valuation.

4867. So that the object which the Board Assirad. was not arrived at 1... No, I think if you made away

4865. Are they decreasing in any way, the inferior sires in the district 1—Well, they have somewhat decreased since the Hackney made its appearance but pechaps you camput afford to subsidies become all over the country always, and if you require a home to pass an examination and be licensed I think you would effectually get rid of all the had once. 4864. You think it would be on improvement!--

The Commission adjourned to next morning.

TENTH DAY .- THURSDAY, 26vs NOVEMBER, 1896.

Present:-LORD ASSTOWN (in the Chair): THE HON, HEXRY W. FYZUHAZAM. Mr. J. L. Carew. Mr., Colonel St. Quintin, and Mr. F. S. Wrench. MR. HUGH NEVELE, Secretary.

sonal knowledge.

4865. CHAIRMAY .-- You are a Justice of the Peace for the County Kerry I ... Yes.

4355. You live near Traine!-Yes, within a few refler of it. 4017. You take a considerable interest in horsebreeding 1... I take a second interest in horses and

though the state of the state o seighbourhood !-- There are two or three classes; there is the branter and the deaft houses has one hunters are rather light in Traine and district

4870. You mean they keeped more of the draft than the kenterel-No, they breed more hunters, but the mater stallions are valler light 4871. The sires used are rather light t—Yes.
4872. What slaw of soil is there t.—Ballur coarse

4873. Is it suitable for horse-breeding !--Oh, yes. 4374. Are the farms large or small s-They are persently mixed. You would call them small, on here at any rate. Thirty acres is about the average

6375. Are there many sires in your district!-There age a fair nurcher within a radius of sen selles. suppose about six.

45%. Are they suitable for the wants of the district !- No, the stree for the hunters are too light, and have not sufficient bone. 6577. What class of sire, as a rule, are they i-boroughbred, mostly. Of course we have some of

the Clyclessiale, too, for draft work, and some half-breds. 4878. Have you say experience of the Hackneys introduced by the Congreted Districts Board 1—Not personally, nor have I had a chance of seeing them, because they are not need in the latest of the seeing them, the young homes, and connot give you an opinion on the young homes, and connot give you an opinion on them, hus from what I have heard, they are not giving such satisfaction

4879. You have not yourself seen any of the young kornes got by these horses !-- I have not. 4850. Do you think their introduction would have

ary effect on the breeding of hunters in your district?

—I think is would affect the breed of hunters.

4881. In what way, good or had i.—Bad, from what I can learn. I have no personal knowledge. I am speaking only from what I have learned from the people, who have seen the Hackney in the district.

Mr. Sv. John Donovay, Seafield Trales, examined. Mr. St. Jake 4852. That is the general opinion of the people 5-4553. You examet say yourself whether the horses are suitable for the district or not !-- Not from per-

> 4884. To you think the farmers would take advantage of suitable sires being places; in the district !-They would, they are very saxious to do so, if they got them at a fee that they could pay, har the foos enerally are rather too high for a good luese, and

> they will not take him.
>
> 4885. What is the general fee i—£1 or £3.
>
> 4885. What fee an elarged for collinery country stelleren leafet or At for a gentlessen's hunter. Porsonally I had to pay £4. I am not sure what the farmers have to pay. I think it is about thirty shillings.

4508. And they charge you £41-Yes. 4889. Mr. Prynvilates. - The ordinary country stallion !-- No, the thoroughbred. I have not heed from any of the half-breds myself, but to the furner I ellove the fee is from a pound to thirty shiftings.

4890. CHARRAR. — What class of masses are there in worr district L. The mares are rather weed and light.

hreeding. They are coming in rather too light.

4831. What ile you mean !- They are keeping them 4891 ton light, not looking out for the points to mane with

property.
4892. How would you suggest the mares should be improved 1...Well, if there is a good stallion of course they will come on 4893. Keeping the fillies 1-Yes.

4894. What sort of stallion would you suggest as minable !- I think the thoroughbred for a burier : a home with plenty of bone, and strong

4856. You would not appeare of the half-bred stallien b—I do not think so. They do not seem to do so well. We have a Yorkshire carriage hove there now, and he is doing rather well. I have seen some of his foals, two year olds, and they are fine promising celts. What they will turn out afterwards I don't know, because they have not had time to be trained.

4896. Are there any registered sires in your dis-trict under the Boyal Dublin Society Scheme !-- I

think Cashman is ; he is about ten miles away. That

is the only one in my immediate district 4897. Do they hold local shows, is the scheme in 20m, 25, 1896 Mr. Sr. John

eration !-- We had a local show this year, but the Royal Dublin Society unly gave a small grant to us. 4818. In the subtrue doing good in your district !-It has not been availed of by us in our immediate

4899. The farmers have not taken it un !-- No. 4900. Do you approve of the present scheme!-I think it will do good in time, but it will take time. 4901, Mr. Frrawistasu - Why do you think the

farmers have not taken up the scheme of the Royal Dublin Scenty L.-Well, I do not know. There is no special reason, only that they are slow to take up

anything that is.
4902. They have no radical objection to the scheme ! - No, not to my knowledge.

4903. Mr. Canry.-You say the farmers sencharrood £3 for the service of a horse!--From a pound to thirty shillings for the common breed, and £2 for the

4904. That is reach too high !- It is too high. Our forms are small. A large form would be there's sores in our distract.

4905. You think the introduction of a good thoroughbred eire with bone and substance would

41005. At a reasonable fee !-- Yes 4907. The farmers are quite excush alive to their own interests to select him in preference to a low desirable horse at a lower feet—I think so, and I think overy stallion should be licensed, they ought to be registered, and pass a thorough examination. It

4908. Unsequeduess in wind and limb you want to eradicate !-- Yes. 4909. Mr. WERNOH,-Your part of Kerry is better than the rest of Kerry, Mr. Denovan 5-Yes, it is the

better portion. 4910. There is good land around Trales, I believe? -Yes. 4911. What size are the ordinary mares belonging to the formers 1... They brend from 15.1, an accress

4912. There are many a good deal smaller, of 4913. Have they deteriorated or not lately !-- For

the last few years I do not think they have deteriorated 4914. Have they improved !-- No, they are just

4915. Do you say their greatest fault in that they arn weeds !- Yes. 4916. Do you think they are strong enough to go on hearding from thoroughbod hurses with these maren l.... Not with them maren. There are some of the farmers who have very fine mares, but comehous

or other they do not breed from them. When they are roung they sell them ; that is, when they have a good mare. They realise the money instead of keening the mare and making money out of her if she got a good cattle.

4917. You do not think a thoroughbred would be the right horse to he heed from with these weedy e right norse to an bred from with these weedy ares !—I do not think so. 4918. What horse, then !—A good half-bred would be better

setter.
4919. Then you would approve of a half-bred horse t. For these wordy mares 4920. What would you call a half-bood horse !-- If you could get one out of a real old Irish mass by a thoroughbrid sire.

4921. You would be in favour of registering house bred in that way !-- I would.

4522. Do you think there are many of what you

call real old Irish mares in the country !-- There are in our district a fair number. our district a nair number.

4923. You could trace how they are bred t—Yes.

4924. How long has this Yorkshire coach-house been in that district 5-Two or three years.

4925 He is a pedigree Yorkshire coashbons, is he l-Yes 4926. What rise is he !-- About 16.14. 4927. He would be rather large for some of the

smaller marce 1-Yes. 4928. Rather a violent cross t—Yes, but his coluare good, and I have seen some from small mayer and

they are promising well.

4929. Were you at Trales Show last Sentember t. 49.77. To you remember the class of colts entered

for a cup offered by Colonel Crosbie 5-Yes. 4931. Do you remember the first and second animals there !-- Yes; that is Murphy's, I think; I do not well remember

4532. Were they a good class !-- If it is Murphy's 4933. I am asking was it a good class, those partienlar animals !-- I think so.

4934. Those two !- Yes 4935. Do you know how they were hred !-- I think the one that got the griss was by Waterloo, one of

of an old Irish mare belonging to a man named Marnhy. 4936. And de you know what the reserve home was by !- No. I do not.

4937. Was he a nice horse f-I am not certain, really, because I was not over that class at the slow. I had some other duties to perform. I was on another committee.

4939. You did take part in the show !---Yes. 4939. Was it a good show!----A very fair show. 4240. Was there a good class of mares shown !-

Well, fair; it was the first we have started for some years new 4911. A fair number of entries altogether !-- Yes, a fair number.

4942. Were there many stres exhibited 1-There 4943. Any oart house I - Yes, some Chyleslales. three or four.

area or tour.

4944. Practically of the congested districts you do not profess to have much experience !-- No, I am not in a concented district mwsolf 4945. CHARMAY.... I take it that you suggest the best size for the best mares in your district would be

the thoroughbred horse I ... A thoroughbred to get 4946. And for the inferior class of mars a good half-hood 1 - Yes 4947. Mr. Canny.-You are strongly in favour of registration !-- Yes.

registration :- yes.
4948. Mr. Winners.--I think you have stated
that the taudenry of the farmers is to sell their good maren !- Yes, when they have a young good-looking more they generally sell her. 4949. Can you make any suggestion that would tend to make them keep the good mores and breed

from them!-I suppose if there was a price for a certain class-a good brood mare with feal at foot. That would induce people to keep the good oper 4980. Charaman, - Something like the Royal Dublin Society's Scheme at present I—Yes. 4951. That has not taken yet you say t-It has not

with us yet.

4000 When you say you are in favour of registr tion, do von mean for sires, as well as marcel-I think so

Nov 25 1256,

Kerry i-Yes 4984. Have you had any personal experience of home-preeding i-Considerable experience, for the last

twenty years. I have bred a lot of horses rayself and 4915. What class of horses did you try to bead t.

A good class of horse; I have beed some Hackneys too. In my country it is very little use to my to breed a good horse, a heavy horse in fact, when you

have them you want sell them.

4956. What sire did you keep!—A Shire hores,
hat he did not do very well. The people did not

take to him and I got rid of him. 4907. Are many because hered around your neigh bourhood !-- I think there are sems, very few. I had him only for three years, the people thought him too big and heavy for the district. The small farmers

bread a good many. The majority of the farms around me are small. They average from £5 to £6 or £7 in rent. 4518. What slate of marce have those farmers t— Usefel, bardy, colsby, pony marcs. 4359. What size are they t—From 14.2 to 15

hands, the majority of them. 4960. Are there many sires in the country suitable for those little marca !--There has been no sire for

some time at all suitable to them, until the Congested Districts Board sent one to Cabirelveen.
4951. You live in a congrated district -- I live in the centre of the most congested district in Ireland, I think, certainly the most congested district in the

4152. Do you consider these sires the most suitable the small farmer of the district an animal that will he couful to him for his own work, that is a small, strong, story because order and south trained, and he is switchile for the femous come much in that district

4963. What do the farmers do with the horses !--Light farm week, and for going to market, and drawfor light leads snawned and soud that is while they 4964. But do they work the emdage on the land before they sell it, of these hitle mares !- They either

keen the foal or sell it at fifteen months old. 4945. They do not work them before they sell them? -They either work or sell them when they are two years old or fifteen months old.

49ff. Are the houses in very district immersion or deteriorating f-I think they are pretty well at a stand 4047. No difference one way or the other !-- No.

for years there has been nothing but the worst class of bulf-bred and quarter bred sires, in fact sires withthe any breeding at all, standing in the district of Catiforneen and around it. There is no thosesortheed born, except one that was there some years ago. was there for three years, but he did not suit the district, though he was a very good horse in his way;

"Ward Uroon" was his name. 4948. Are there young horses sold at fairs or to dealers who come round !—They are principally sold in fairs for local use; bought by one small farmer

4969. They are kept in the district!—A great many of them. 4970. Are the prices improving !- The principal fair these horses are sold at is Puck fair, held at

Killerglin every August. I have seen a great many of them sold for the last few years; £5, £5, £5, £7, or £3 would be given for vessions. 4171. What were these got by 1-A green many of than by the Hackney here standing in Califolies Tire is the third sesson he has been there. A small

these Hackney berees, he preferred it 4972. You said you bond from a Hackney t-The

object I have got by him are only three years old. ave three or am gets.
4973. Do you like the look of the progeny !-- Yes,

for certain purposes.
4974. What purposes !—Harness work 4975. Do you think the Hackney stallion intromed into your district will affect the other districts

of the country 5-Very slightly, indeed.

4076. You think the horses bred in your district set kent in your district, and do not surred to the

rest of Kerry i - A great many of them are. It is not what you call a horse breeding district, and the harnes level there are fit for very little except for the use of the farmer.

4977. Has the Rayal Dublin Society Scheme been working in your district I along not within fifty or sixty miles: there is no home belonging to the Society.

ing of it !- I am one of the Committee that have been 4979. Do you think it is working sotisfactorily 5-No. I do not think the farmers are taking it up.

They do not send mores to the shows. It is very up hill work, trying to work it in Kerry. 4980. Have you a sufficient number of shows !-We have shown in Tealer, Cardenkend, and Killor-glio, but they do not send their means, and some to

take little interest in the schome. In time, I have no doubt, it will do good.

4981. Have any of the farmers in your district got what you would call a really good more, or are they all these pooles !—I do not know a mare in my dis-trict that you would choose if you wanted to breed a

hunter, with perhaps one or two exceptions 4019. Ves think the best filles are taken away from the district to Very few accommutively few they are not good enough to leave the district. The unjectly of them.
4965 Mr. Fixzwilszam.—You say the majority of

the forms in your districtors extremely small !- You. 4034. Are there a great number of these borses bred; do all the furnism breed!—No, not every year, as a rule; every second or third year only; and they breed chiefly for their own requirement either that or to sell the progony when it is a year or

4935. Where do they sell 5-In the local force. hitherte stood in the district were extraredy had b-These are four of them in the district at present, and out of the four, three of them are as but as they can be and the other is a fair have. Then there has been a horse sent down by the Congested Districts Board. 4104. Of the four local stallions there is only one that is of any use !- There are three bad ones in soldition. I am not speaking of the Congressed Dis-

tricts Board horse at all, 4007. But there has been one sent there !- Yes, for four years now in the distract. 4500R. How do the fees of the two arts of horses com-

pare! What do they charge for the service of these shoot ten to fiftuen shillings for a country level horse.
4109. What does the Congusted Districts Board shares !- A necessari registration for for a mare, of five shillings

4930. Half what the others charge i-Yes. 4991. Are any of the stock of the Congested Dis-tricts Board horse used yet for work !-- Very few. I brow ten or a down two war olds, that is two costing three, and they are working-4193. On their own farms !- Yes, and they drive

Printed image distinged by the Linearists of Southampton Library Distinguish Linit

them in light carts.

New 26, 1795. 4993. You have seen them !- I have sorn them. 4093. You have seen topen b—I neve seen them.
4094. Would you approve of a half-heed horse standing down in your country, if he was soliable in shape, make, and action 5—My ulea of a suitable. We J. Besley.

160

borns for that district would be what I call a lamore zire, a stout horse, bred well on both sides, and not too finely bred. 4595. If you could you would like it from the pr shops of one of these old Irish manys !- A very greed

mare, and a good sire that had been gotting a good place of borns. 4996. Von think that is the heat slam of animals to soit the district !- In my cousion, it is

4307 Mr. Cappy .- Better than the Hackney !-Ves. I thunk with the cross of the Hackney we have new, this home would be the most suitable, and a eat benefit to for diserce.

4908. A well-beed half-heed with a good dark of

thoroughband blood |-- A fair dash of thoroughband One maner why the boxes are so had in my dutrict is that for the first year or year and a half they are not properly fed. Unless you feed a house well when he is roung, he will never turn out well, in my experies 4919. Are you in favour of registering sires !- My idea is that all horses standing for a fee should be

certificate to my that they are free from kerelitary 5000. If they had any himishes would you have these stated on the certificate !- Anything hereditary. I would do away with all the common size in the

one time !-- I did, eight or uine years ago 5003. You did not find it suitable to the rountry marya !- No. 5003. Do you think a Clydesinie would be more

successful !-- Certainly not. 5004. Can you approved in the first instance a recey suitable also than a Hackney for the series as they are now?-I think not, in the first instance, but by intro-

will vestly improve the breed 5005. But you think the Hackney is the right cross to begin with ... For the present. 5005. Follow that on then with the cross of a

hunter sire !- Yes. 5007. You know to addition to your own Satulat the congested district in Kerry very well 1-Yes, I 5008. Do pretty weach the same characteristics

prevail all over it, as far as horse-breeding is con-Cablecireen district. The land is better, and there is a better clear of mares there.

5009. It is essential that an animal sent down there must get stock that will be able to go through very hard treatment !-- Yes. 5010. You want comothing that will do hard work

and can be out at night !- Yes, and be occanaratively quiet and easily trained. 5011. And you think the Hackneys do that !... So far an I can see they do.

r as I can see they use. 5019. Have the fees charged for the local stallions been reduced since the bosse was sent flown by the Congested District Board !—They could not reduce them much, they charged ten shillings and sometimes

volts. The owners of local stallions as a rule time for the payment of this ten shillings I. Yes, they take it as they get it.

by take it as they gos is.

5014. Whereas the Board requires their five shillings on the anot 1... Yes, before the first service. 5015. So the people like one way as well as the other. They would probably rather have the ten shillings to pay as they like, than the 8rs shillings on the spot !-- You. I think there have been frety to sixty or up to seveniv marcs sent to the Board's house in Cabinotreen every year since he has been there

5016. He has got his full number 1-Most ware I do not know about this year, but I know the feet year be could have got a great deal more than his They used wat he taken 5017. Do you know whether they have get better

prices for the produce of this stalling i- They have got from £1 to £1 10s, sometimes £2 more for the profuce of the Hackury than for the profuce of the 5018. And the price of horses has been falling all

the time!--The price of that class of horse has no falles as much as the others, it was always you los-That chan is bought by small farmers for their own

5019. How did the produce of the Hadrow but as compared with their dams !- They are storier, and a considerable improvement as far as shapes and appearance go.

5:30. Were you at Traise show !-- I was 5021. Do you remember the class I saked Mr. Donovan about 1—Yes; I have a natalogue here. 5032. Was it a good class all rouse t—It was a very fair class, very good considering.

5013. Do you remember how many entries them 50:53. Do you remember how many cutries some were in the class !- Twelve antries for " two year-olds, colts or fillion, validable for hunting purposes."
The class was for horses ever two and union

5024. Do you know how the horse that took first Ones was head landy a stee salled Waterles a 5035. And the reserve I.-The Reserve or Second in the class was got by "Piresway the Scoon!" a

bove bred in Califroivesa, by a Hackney. It was by 5026. Have you any scheme you would engest by which people could be induced to keep their best sares I I think the great thing for improving the bread is to have good suce. If you keep on having good sires you will improve the breed eventually.

Of course the mases are coly isolated cases, they my do some good but I have no automation to make to bulges there to keep there. 5007. You think the size is the chief thing and you know of no practical way to induce the people to keep their best mares !- No practical way

5018. Chainnay,-An far on I gather, you said our idea of the horse for the district was first the Hackney sire and the hunter sire next; have you any special reason for pratting the Hackney size Srall ... The Hackneys are there and have done a certain

amount of good. My idea would be to put the hunter sire on their property from a country mare 5035a. You would shoom the Hackney first !-- I 5029. Mr. Frezwitazam.—You think suitable sai-

male might be produced if there was a demandwell-bred half-breds, with a good dash of thereugh-hred blood in them, for the purpose of starding in these different localities !...! think it would be very 5030. If the demand were created, do you think it

would seen be surplied !-- If the demand were created and the men who bred that close of horse were rainer to keep them without cutting them-if the demand was there, you would get the berse.

5031. If you rould get them you would prefer them

to any other 1—I would, for that district.

5032. Mr. Wanren.—Do you know of any haster sires !- No, not in that district ; I have known then

5033. Do you know of any special borse you would like to have there!-Not that I can name at the present managers.

present magnets.

5034. The horse you suggest should be beed spe cially?—I think so. 5035. He does not exist in any great number t 5037. Onatemax.—Have you any suggestion to

Nov. 98, 1896.

Mr. J. Butler.

make as to how you would encourage the breed of make as so now you would encourage the breed of him!—I think if such an animal was there he would be burglet. If he was there certain men would breed Seem him gas ham. 8033. Would you be in favour of the Royal Dublin Society taking half-beed sures on their receiver !- For the convented districts I would, but not for ordinary service in what you call beco-breeding districts. For I think nothing more switchle then a good thorough-I think nothing more arrivants than a good three qui-bead, but in my district a thoroughbred would be no non-8619. We. Warner, Do you think the hunter were would be as good as the Hackney for action 1-I

think a great deal of the Hackney action is made, and ther are better without it 5040. Do you think the foals have too much action 1 No net too week Mr. Canny.—At the time of the introduction of the Hackney into your district, you would have preferred a hunter !-- Yes.

5042. Charman .- Have you any other suggestion to make b. Nothing : but I am afraid the introduction of bieroles and motor cars will injure the Trackers. 5045 Mr. Wanners.—In Kerry a good county for bicycling!—The fixest in Ireland.

Mr. GEORGE HEWSON, Dremahaire, County Leitrim, examined. 5044. CHAUDUS .- You live in Leitelm 5-1 Heeconsider this should be done by all hereders. I do

an the borders of Leitrim and Sligo. 5045. You are a land arent there, and own some reporty yourself!-Yes.

5046. Do you kreed horses yourself!-I keep from

two to four brood mures as a rule. two to fast frood mares as a rule.

5017. Are there a great many horses hed round
your district!—A good many have been. The farmers

are other going out of breeding lately.

3016. What is the reason of that 1—The reason of it in my solvier, is that it is so year difficult to and anything now, but a home really up to weight.

5019. What class of house have you bred yourself?

_I have up to hest two years invariably head from a thereughbred horse out of a hulf-heed mare. I have late years put a Hackpry in a few cases to a feight hand man to tow what would come of it.

5000. What was your experience !- I have been telegily as regards the produce. I have tree is on six occasions. On three constions the mase dail

is going to happen with the other two.

5051. That is your personal experience b-Yes, I have also been looking at the foats out by Hackney 5059. What is your equition of the feels !-- In my

orieisn the Heakney horse does not do with the options one meaning more over not do with the ordinary country bred mores. I do not like the look of the fools. They are a heavy, lumpy sert of suinal without any action. I think very likely with a small fairly bred more the Hackney would do well. 5033. What class of meens are in your district !-A good many half-bood mares, and further down sleea good many. In Sligo there are a great many good marse, but I do not think the farmers are sufficiently

alive to the fact that they should be sound. I think 5054. Are they small or hig !-- From 14.2 to 15.2

in Leitrim: In to 15:3 in Silco. no Learnin; I to no 12°C in Sugo.
5055. Do they work these mares on the leads 1—
Bit a mixed country. Many do, a few do not. There
are a good many small farms and big farms as well.
4008. You do not think the Hackney suitable for

year district 1-No. I do not. 5057. At what are do they sell the horses around ver neighbourhood !-- Smaller formers sell foals. year neighbourhood?—Smaller faruare sen toam. The farmers usually med to sell them as three-year-

olds: now they have to wait till they are four or five. who breed horses. Others keep them to work on their farms

5009. Work then first and then sail them when they got aged 1.—Yes, start working them at two off.

\$050. Do you think it as paying them to breed as well now so before !- Cortainly not. All the fairs in well now as before !—Cartainly not. All the bars in our county have gone utterly to the bad. 1051. What class of horses would you recommend the farmers to breed !- I breed at present by a theroughbred become out of a helf-bred mare, and a great deal of driving long distances. I never drive any hut this class of horse. They see excellent for reportal utility purposes. They do not sell too well as general stillity purposes. They do not sell too well as four or five year olds. In fact I cannot get anything

like the price I got ten years ago for them.

Note: I you wanted the farmers of your district to make money by beceding, what course would you Government should assist them by giving them a market for their lighter borses, which in my opinion

would do very well for process 5263 But cannot they sell the truopers now !- No. 5044. Don't they buy troopers in your district !--

Yes, they are bought by dealers who make their own market, and give nothing like the full value.

5005. You meen the Covereents should send a representative directly themselves and huy !-- Yo a great extent, yes ; but I think depots should be formed in wasters districts where spitable booms of that clear

are keed, and the house should be bought direct from the fearners. If the Government commet at rement have them as three-year-olds, I think they should huy direct from the farmers and send them to these depots for a year. That would get over the difficulty greatly.

mixed class of hard. It is vet, retentive land around me, a good deal of limestone, and a great deal of larger nature over the Emestone. The latter I find best for 5067. You prefer bog to limestone !- Not exactly bog; but bog running into limestone land that in years gone by has been turbory and has been re-

cosmec.

5066. You prefer to beend horses on that rather
than imperions!—I have both choses of land, and I

find my horses do a great deal better on that then on a purely limestone farm. 5010. In what respect - They grow better, and have better bone. I know that in against the general

theory, hat it is what I have found in practice.
There is immediate on part of this farm I talk of.

ACTO. What class of sizes are in your district to-Around my district we are hard up for sires. In Singo they have an excellent lot. "Sir George" has got some excellent market literen, and "Loved One. who has just been sold out of the country, was in my recipion a beautiful horse. Sir George is too old : a good thoroughbred is much meeted.

goes theoretic is much needed.

5071. In that a thereighted here !—Yes, the sire of "Diran Forget." In my opinion he was maker too liche for the country. I think what we rather too light for the country know as a casty thoroughbord gets a better market home than the light throughbord. 5072. A heavy thoroughbeed f—Yes. Then in Mayo, where I bought a good many horses, they had

a most excellent strain of horses got originally by "Blacklock," and by "Lothario," who got trut-class stock

Nov. 25, 1295. tr. Goorge

16:

5073. Are you on the borders of Mayo !- No, but very often go there, and I have bought homes in Are there any half-bred horses in your dis-

trict 1-Three was one, and he was a very good approve of the good one was called "Danly," belonging to a man named Nixon. I forget his breeling, but he got good stock
5075. Would you be in favour of the Royal Dublin Society registering good half-heed sires !- Yes, under contain conditions. Give them a homee and subsidies them as well. You cannot prevent any man keeping any sire he likes, but it a man applied to the Royal Dublin Society to have his horse registered, and got a subsidy of £15 or £20 a year for

keeping him, it would enable him to give that horse cheaper to the farmers, and by degrees weed out the 5074. Would you agree to these horses being regis troval under the same conditions to thoroughbrods now provided they pass good horses !- Yes , while on that subject I do not think the present scheme of the Royal Dublin Society is nearly as good as the old one, which was tubuilding sires. A good many more, used to go to the local shows when a submity was given to the sire, and they got the service at a Now it is a matter of speculation chesper rate. when farmers have to go to a thoroughbred horse, pay high fees, and trust to the chance of getting a prize at the autumn shows, the scheme does not work At our local shows, for instance, at a place called Manachamilton, speaking for Leitrim only, we had three aged mares, three young mares, and three feals to show. In another district, Mobill, we had only two young mares, three aged, and a foal. In Currick we had only one mare. Originally while the tires were subsidised we had a great deal hetter shows. should like to say also on that question that the Dublin Society's plun was not altogether a good way of registering their sites. In any application that came to them I understand if the horse was sound they resistent him as a Government size without practically seeing the house or whether he was really

suitable for the district.

5077. I think we had it in evidence that such was not the case !-- I am prepared to write you down the names of two horses, one being a suce non-foal petter, and the other a very weedy horse that was not sust-

able at all for the country.

5078 Mr. Wannen.—Are they on the register to make with regard to toving to keep the good mass: now !-- One of them is, the other is not. 5019. Mr. Carrw.—Which is on the register, the nominal getter?—Yes, I think to. The weed is not

The non-fool getter in. 5080. Mr. Wagnen.—In that in Leiteim 1—I abould not like to say what county it is. 5061. CHATTEAN. - Have you any other suggestion to make about the Royal Dublin Seciety scheme .- No, but I would like to my that I think

the Horse Show in Dublin has very much speaked the western market. All you can sell is a made horse, and it handlengs un enormously in the west to have to send up a horse to the Show. We campot do it under and up a horse to the Show. We cannot do it under £10, which takes a considerable amount of the price of an average horse. I think if the local shows were encouraged, and that a class at the local shows were opened for troopers, a trooper class, and if there was a trooper class at the Boyal Dablin Scriety Show, it would assist the breed of the ordinary home very I am very much afraid that the people in my sciebbourhood will so clean out of breeding horses for the reason that they cannot dispose of their lighter becase and that in the event of war and a lot of trongers being required they will not be there to be pol-5089. If it cost you £10 for bringing a love to Dublin, it would harely be worth bringing up a lores to get a trooper price !- I am only speaking of the

western counties to have local shows for troopers, but

I think it would pay the Dublic and Month tom to send to Dublin Show if there was a class for trooper, 5085. Do you mean to suggest that the money given by the Royal Dublin Society for the improve ment of horses should be sent to local shows 1-No. but I say the Government should give a connecessia amount more than now for that purpose. Of opens the argument is that the army estimates are framed on certain lines, and, pas army estimates, up cannot upend more than a certain amount on troopers department, I think it could be done.

DUST. What stallion do you think most mitable for your district I-I think the strong thoroughland is 5085. You would be in favour of a good half-beed being used too !- In my neighbourhood the differents is that these good thoroughbreds are fourteen sed fifteen miles away, and in the districts where the

is the case, such as mina, I think the Government should send down a horse if possible 5086. Then you do not think there are a sufficient rumber of autable sizes in your district.—No, there are not; they are all huddled up in one spot a long way off, and people have too far to so. 5087. Are there any registered sires mear yout-The nearest is fourteen miles, and a farmer will not

5088. In there a ready market !- There used to be an excellent market ten or twelve years ago. brought a string of young horses into Boyle fair, for stance, and friends of mone have done the same. These we used to self at £30 or £40 priese for a three-year-old; now you would not got asything like that price 5089. For what purpose were they sold !-- Mostly as troopers. Now you go to the seems Boyle fair on the list of October, which was our great market for getting rid of that class of long-tail, and we caused sell then at all. I had one horse, a four-year-old men, by a horse called "Dalhouse," and should not have had the slightest difficulty in getting £25 ten years ago. I soled £30 and did not get a bid. I sold my man to sak £10, to see if he could induce anyone to bid. I should not have sold her at it, of course, but there was nobody to make a bid. At Ballinuslee fair sold a five-year-old mare, by "Demounte" by "Speculum," sound and a good jumper—I sold her to Swiss for £26, when I could have got £000 for her ten

in the country !-No; I think it is an impossibility, as things go at present. I think it you go in for kreeding from a better class of horse, you will by dupon got a botter class of mare, and they will stop in the eventry whether you will be no. If you improve your mares up to a better standard, you will have a great many more good mares to keep.

5001. If you have only a limited amount of money, should you prefer to spend it in substituting good staltions throughout the different districts !- I shink it would pay a great deal botter, spending the mousy on the stollion. The stallion owner has much the greater risk. It costs a lot of money to get his stellion and

5000. Mr. Firswitz an Have you car encouring

to keep his stallion, as well as advertising and every thing else.

5092. In England, under the Queen's Premium, the arrangement is to give £300 to the stallion owner. and the horse is obliged to cover a certain member of mares in his district at a certain price—£2, I think!

—I think that would be a most excellent arrangement is Ireland. They allocate to our county sixty sovereigns, which has to go to several stallions. I think if there could be such an arrangement as there is in England it would tend to improve the class of horses in this country.

5093. What breed of stallion would you suggest

as the best?—I think, in the first instance, a strong tooroughbrod, certainly. Later on, I should say a

secret half-bred by a thoroughkend horse out of a some convoice by a someogeness often out of a soily well-known, well-proved, sound more, 5094. And you think these would be calculated 5004. And you times these would no cassimites between them to get eresy class of entiands, isoving, I will say, the agraniforni horse, that is required in the district L-Wen; and, as a proof of thes, I may say I have taken that closs of become up to the Moy fair, in the country Tyrone, which is the great harmen horse fair in the North, and I had no difficulty to

militer 5085. What sort of fees do you think a good stalling is man district could return they a thurstelloud or on of these helf-breds; what fee do you think he would command! At present we have to pay from shout \$4 to \$5, but I think the ferrors would may #1 if the owner was solvidered, and I think that would

5106. Mr. CARLW .- You say there is a great depression in prices within the last ten yours !- Yes. 2017 Res. on deterioration in the quality of the borse now an compared with the one you wold ten years

sgo 1-No 5000. How do you account for that depression tless wanted now thru formerly, and that he has some up in all grades. The heavy-weight hores, of course, is a speciality, and will always comments a big price,

mail they get to bust on lurycles.

5019. You assessed the Government should over depôte in the different districts for troopers, and hold

them on 1-Yes 5100. Mr. WERNOR.—You say the mases in your district are from \$4.2 to \$5.3 t-Yes. 5101. Have they much Clydeside blood, or any geomet-blood i... A few of them have. I have a Clydes-

dale more I bred from ; she has very good foals from \$102. Do you think, as a rule, the mares would be strong enough for a shoroughbred horse!-As a rule, yes.

\$103. He would be the most generally useful house at the present time !- Yes. 5104. You gave an epinion to the Congreted Dis-tricts Board that a Nortolk tretter would be a good bree to send there !- Yes, but I have changed my mind from anning the finds of the backney borne 5100. Have you seen any fools from the house that

has been there two years, this year's fosls !-- No. 5106. Not any from the house there now L.- Yes ; I my my own fool from the horse that was in Ballino terre, I think, last year, but I do not think it would be a fair miteriou to instance him. He was very small from a well-heed mare whose dam was a halfbred mare, but I think the size of the fred was the

more's own fault. She had not will enough for him 5107. D64 you know that the horse we sent there Horses before, suffectionately, was the only Hacking we had with any Norfolk thood in him 1—I think Belesby was supposed to be a Yorkshire. 510s. Was Bokeby there I ob, you are right. That

is the horse yest allude to 1-Yes. I think the orons to the tears you allone to t— Yes. I thank the cross between the Hackney and the yeally fairly beed more would probably got a good steeping boyse for London do not think it should be encouraged generally 5109. Do you think the furners, would send to a

5109. Les you tains the narrance would have be a thoroughbord borne if it was next there!—I am per-fectly certain they weeks, if they lack popular prices, 5116. As present, I believe, Leitrim is the only counts in Ireland where there is not a thoroughlived horse stonding!-I think so; we are very badly off for that reason. It is a long narrow county, and a

horse at the northern end would not be much use at the accithern end 5111. Do horses come in from Sligo !---Yes, and in North Leitrim we go to Sligo a good deal.

5112. Do you know any ball-heed beens in your county that would be worth registering !- This beese

of Nixon's if he was alive. 5113. You do not know bow he was heed 5-No. he got excellent stock indiscriminately, big horses

and posits.

5116. He was a half-lard horse !—Yes.

5110. This mare you offered for £10, was she a webbred mare!—Yes, a webbred foreyear-oil.

What I want to emphasize is that the fales in our country have gone to the bad, consthing must be done to create some kind of a market. Though we are supposed. I believe, not to understand this question. I think the treoper question is really the higgest one.

5115. The people must bosed some animals for their over yes 1. Yes. 5117. That must so on whether there are borreles and meter care or not i-I think so, outsinh 5118. A certain amount of creeding meating on, and the question is how that one be made pay 1-Quite so. 5119. Would you call it a paying human to head

from your own mares, animals only good enough for troopers L. What I find is this, for no reason whatsecret, you will get a big horse one year out of the same horse and the same mane and possibly a small one the next year out of the same house and mans one see next year out of un same bases and mare. It is these smaller horses that take the gift off the ginger bread. Whatever you make on the big one you hose on the small. That is really what is putting the farmers in my country off broading.

T. W. Wessen, Kelleville, Athr.

5121. CHATEMAN.-You live in the Open's County ? is when head from the hunter mare and the thorough bred; the only way I can exceed in breeding a binter is to have a first or second cross from the old Irish mare | I have get two of them now that I breed from

-Yes.
5122. And you have bred a good many borses your-sift.—Yes, I began thirty years ago, and have bred mostly every year since.

5123. What class of mures 1—Every sort. I have

tried every kind.

5124. What horse have you tried to breed to Principally the bunter; our county is suitable for 5125. Is the soil limestone able to breed a good

strong borse with plenty of bone !- Yes. The diffically is to get plenty of bone.

5129. Will you describe to un some of the different mares !-- I have heed from good hunter mares I have

ridden myself, up to fourteen stone, I put them to the but theroughbred and got a light weedy animal up to no weight and worth about £35 generally, is one use out of twenty I got a first prize horse at the Dub-In show of quality, but the majority are too light; that

are einteen hands; they are the old Irish breed, as near as I can get them; perhaps they may have one gross of the thoroughbred. I counider a first or second erose of the race-borne with the old Irish mure is the erous of the mone-borns with the old trian make it the best; that is the only way you can get a weight carrier; you can get lots of little light ladies' mounts but you cannot get a weight-carrier for certain with thoroughbred sires. 5127. What do you mean by an old Irish mare !-

In my younger days there were plenty of the farmers in the hilly parts who had the old Irish mares that they would not part with for anything, and they know their grandmothers and great grandmothers; they said they would part with the coits but not with

with the best borne I can get, a borne called "Philam-mon." He is a tremendom hig horse and the mares

No. 25, 1896 No. T. W. Webber.

this mases and they considered as long as they hope, the old stock of mares they would do well, but they found in many eases that the differently was to get the stallons of the same bread. There are very few of the stall frish stalliens existing now because the Royal Dublin Scotter but discoveraged the frish brevels and given only getters for the English breads, consequently be in searcely in the country.

given only prizes for the English breeds, consequently be is scarcely as the country. 5138. You mean the old habited stalling—I don't call him a half-red, I call hun the old frish stalling, they used to exist hat now there are very few owing to the Enline of the Reyal Dublas Society to encourage the old frush breed; it is very leard to get now, but I will believe it could be done if prizes

to encourage the old Irah hereat; it is very least to get now, but I will believe it could be done if prizes were given, sud I think in time you could get up a stook of these. 5129. You mean to raise a sort of half-breed t— I would not call it a half-breed.

5130. Can you get them with pedigrees to rely on 1
—If you search I believe you can find them. You
sea only take the minimals as you see them, as near
as you can possibly get to what you went, and if
his progray grow wrong you reject the bed ones and

his progresty your wrong you reject the bad once and keep the good once.

5131. Do the farmers round about you bread many horses 5—A was number.

5132. Whas stallious do they use 1—They used the

theoreughbed still shay got sidd of him; they cannot but the did litch stallion and they have to take to the filter beree.

5133. What class of mores have they got 1—The progency of the still frish more; the did fruit more I leoke on as the purest stood of the famous Irith humber, they have been crossed for years with the thoroughbrud, and they have go the small, and the farmer has

found that it does not pay him to breed and he has had to cross with the narrost Clydendale or Shire home in order to get size. 5134. Would you advocate breeding from the

Clydesdate or Shire horse I.—Curtaruly not, if I could get the old Irish horse; I pesfer the old Irish farm stalling.

333. There are some still I.—They are the horses that get most of the treopers, and the farmer finds is does not up at him to leveal from the thoroughly of

notice has been seen to recept big mars; the marse are getting smaller and he has to go to the Gydenials or Bhire for size.

5136. Do they work the marss 1—Xee, they cannot afford to beed unless they do.

5137. They don't work the young cases!—No, they are sold as long tails, untrivined, there or four years of 1575A. Are those a sufficient number of since in your district!—It think there are planty.
5138. Do they sait the identic! —There are to many throughlyeds—at least—planty of them, and the great thing their is warfing is the old Irright stallion.

many thoroughlyeden—ai least—planty of them, and the great thing their is wanting is the del frish stallion. It here get a Gitze stallion myself, site del frish stallion. Supproved of bosonas he is shret-lenged and has good supproved of bosonas he is shret-lenged and has good better the stalling of the stalling of the stalling of the breed hunters, and I have a fines helds they will be good hunters with good soliton. I know one so the that are likely to look very well before the judges at the shows as weight-searciers.

that 400 libry we come very was counter our pages on the above are regisheration. Lower will cannot all the died lo-That Dublin. Society don't in any way guesantee that a bone will stand up in the field. 5140. What shortly inflatoness a farmer in your disricts in entilling his mare to be sein-IT-file transaace inflatoned by eleopasse; they will send to the nearest borry whatever he may happen to be, and will give \$L\$, but the better class who have a flowy the feeredings and hard took indeed the contribution of the contribu

give \$L\), but the better class who have a flary for breeding and have been breedings for a great number of years are very particular about their sizes. 5141. They don't mind the fee if they get the right sire—Days don't mind the fee; they will give \$\mathcal{E}\$ readily and \$\mathcal{E}\$ is some cases. 5142. Was there not a horse in your district called

"Prince Imperial" !-- Yes.

5.14. Can you describe him 1—He is promy masthe cell Histo stellier; a big 14th start hours (steam as the belt; 181 has been conducted as and the belt; 181 has been conducted, and as 5.14. What sort of stock has in got 4—I have seen a good many of his fand; a have see one synal; (so a good many of his fand; a have see one synal; (so are not sufficiently oft to tell what they seen going is turn ont, but they look well; they are rather show appointing as to size, but that may be because of his department of the seen of the seen of the seen of the favourse posting small narras to the troe because he is

Yes, in the same way that you form a breed of race

gave some of the money to weight-carrying hunters to

horses, breeding in from the members of the same family until you get a bered of a permanent type in the same way that Booth and Bates herd shorthorm from a small family until they got these to be a permanent type, and until they got excellence and

sue, and everything else. 5153. The land about your district apparently doesn't breed home!—It doesn't; part of it does; or is not the hoveding alterether that makes the house

is the gram to went.
5154. Houses bred on most of your district are not inclined to breed hope !- Half and lolf. You most give your young horses cats in the winter to make then mow, a good dayl is impertone land where horses. will grow to a good size with plenty of bone.

Alas. Do the farmers treat their young borner well -They do, those that lency bereding. Of course those are some poorer fare ers that comes afford to do it but those who follow their own locate treat then well, and keep then set all the winter on the best of grass, out give them plenty of hey and some units

5156. Mr. Prinwingan.-You talked about the eld Trish station - I torget if you told us if you cold trace bis pedigres in any way- how he was originally bond !-- He was originally hend very simply, ariginally trees --- are wan originally seen very samply, he was the old Irish pack horse that was beed on the mountains, and was used for coveying peaks. There was no introduction of English blood, but they have been crossed so often that it is hard to find the cld

Irish blood, hus there is a good deal of it still 5157. Do you think it could be truced !-- Yes. I think so. I believe I could pick out a half-dozen

5158. And this horse "Prince Imperial," you say you have not this horse's pedigree—one you give

ol50. Without knowing the useon of the animals he is head from you know how he is heed t-He told run he was beed in a mountainous part where they had a good deal of the old Trial stock. 3160. Yet you say his foals are small t-- I could not ludge from one individual of that class, but I have known several old Irish horses that got magnificent big horses ; there were some in the district around

me some years ago, the old Irish, and they got splendid big horses, that were very good for treopers and also the mores for breeding hunters. 5161. You say the mares round you have deteriorated was think in size, don't you think that to a great extent is from the farmer selling the good

produce and keeping the had !-I think it is the want of large circl stallings. 5169. It it a feet that they have sold their best mares—that they don't keep their best mares !-- I don't think they do ; they like to sell their colts ;

if they have a good mare they will work her on the farm and keep her for breeding, but the difficulty is in ret the mean his enquely owing to the secreity of old Teleb blood 5163. Suppose you cannot obtain the old Irish

blood, would you object to an animal -a half-hredbut you seem to think there is no such thing!—I don't know what you would describe as that. 5184. What I should call a well-hard hunter... would you object to breed from that I-No, I think be he good animal but be requires improving on tha tystem I have recommended by giving prices for

weight carrying hunters-entire-you would have to valuation them in some way. 5165. I think you would have to subsidise the rider too. ider too. I don't think you would get any great You would not require a very great number of them

and they would not be kept for bunting ; it would be a limited class; a small number would be sufficient to start the breed. I think that for breeding weightcarrying hunters the first way is the best, and that would be to have a stud book for them and make a . He. 25, 188 perce breed of them, but the second lest way is to Mr. T. W. roed from the large Irish mare from the thorough- Watter bred, but your difficulty is to get a large Irish more, and you cannot get that without ancouraging the

5166. To make up a new breed would take a long time 1-It would. 5167. How many years—how many generations would you require!—I wrote an easy for Lord

Celthorps twenty-five years ago in which I advocated this—the establishment of a sted for weight-carrying hunters of nure breed, and I think if adonted then during that thirty years the breed would have become prouty well established by this. But the prize for that every was given to the meaged system of breeding—consistent erosing—which I conferm. When you breed pointers or setters or foxhounds you don't cross the bloodboand with the graybound to preduce the fexhaund-ross broad from fewhound sier, and foxhound dam, and therefore you got a pure-bred animal that will propagate his race. Why not have

the same principle when dealing with the most valuable entitied of all, the house 5168. Mr. CARRW.-You say there are some Irish bred sires in the country now !—Yes; a few.
5169. You know two!—There is one in my dis-

trict now. I knew of several some years ago, 5170. You would atilize these for propagating this hunter sire with the Irish hred mare !—Yoe; I think in time you could get sufficient of these.

5171. You have tried I rish hard maris 5-Yes.

5172. How are they bred?-I bought the dam of one from a farmer who had had the bered processions, and this was a feel got by a Welsh horse. I consider that the Welsh cart-horse is the nearest thing to the old Irish, and that the old Irish mares muchs, by improved by the come of the Welsh cart-horse; that is an animal used to mountains; be is not to heavy as the English cast-horse, and not to heavy at the beels. You might very softly uso him with the old Irish more for re-establishing a leved similar to the old Irish breed; that is, a breed of horse used to mountains, with activity, which gives jumping powers, which produce the hanter. The other mass was by "Knight of St. Patrick" that I see breeding from. I believe he was an old Irish horse.

5173. A hunter sire t.- No. a farm horse 5174. And you think if the Boyal Dublin Society subsidierd this form of breeding it would improve the hered of bornes generally !--Yes, they might improve them by a cross with the Weish earl hores. I have seen the property of the Welsh cart horse. I have big strong horse with plenty of bone and activity of go up and down mountains which gives the jumping

5175. And you find that there is as good a price obtainable for the weight-carrying hunter now as that is with record to Communers posses.

5176. You had better keep to your own district !-Direction and coefficients of your own inserted persons of a maxing them for yours, and I am using them now as hunses. I buy them every year from a dealer that brings down a troop of foals. I hay two or three every year. I have get some now that

go to hounds, 14.2 to 15 hands. I can show you two that I don't think can possibly be improved upon for carrying a fair weight over country safely and fact. earrying a fair weight over torinty sharp, and If wen could stereotype that type of Achill and Connectors pony it would be a great thing, and I think the Royal Dublin Society would do well to give prices for Connemara penies of that stamp and encourage their breed as much as possible and starcetype that breed. I could show photographs of

5177. Mr. Warren.—Have yen got them with you!—No, but I could send them to the Commission, there is no better shaped animal; he has endurance and his galloping is quite fact enough. I don't think any

improvement could be made. My daughters ride them and they get safe everywhere. I think probably ony improvement was to be made a cross with a Welsh cob stallion used with these Connectars puties would improve the breed; it would preserve their present character which is the character of the topcatain peny, and which gives jumping pover, motivity, hardiness, endurance and strength—twary-thing you can possibly want, and the Welsh colu-about the same see 14 to 15 hands, they have the muse qualities, and if you can send some of these Welsh coke, that would breed up to 15 hands, to Cognomers it would be a very fine thing. I have a half Hackney that I bought has your and I don't like it at all; it has lost all the qualities of the Conmemore, it has got into a long lengthy, leggy thing,

and I have seen a good many of them. Hockneys would spail the Connectant poules 5178. Onamus.—Did you key him out of the drove!—Yes, and the man offered some more than your and I would not key them. I think the breed would be entirely altered by introducing the plant horse like the Hackney to the mountain horse. If was cross the appentum horse with the plain horse you lose the jumping qualities, and entirely dislocate you lose the jumping quantities, and contact, the frame of the horse and make him all wrong. If

you crove the Connemara posies with the mountain cob you might improve them. 5179. Colonel Sr. Quintin. Do you think that the small farmer to your district is a capable judge of the breeding of horses-does he understand what he is

5180. Has be any payticular standard to breed on to, or is it only to get a feel !-- He first of all leeks to getting the measure and chespeat horse he can get, but he also cars judge what the final is going to forch - what he is poing to sell it for.

5181. But does he know her to breed with that

object?-He exercises some judgment; he won't bread a hose that he thinks will give him a small unadeable woody animal; he must get size; some of the

5182. With regard to these Connecears ponies and the difference between what you call the mountain snimal and the plain animal - you were some time in 5185. You have seen the different breach in India,

and how they were attempted to be crossed and improved on !--Yes.
5184. What was your opinion with regard to that ! -An utter failure. 5185. In the different districts the indepenous

borse remained the best in that particular district !-\$196. Under that climate and under those circumstances !-- Certainly 8187. And the general attempt to improve pro-

duced another annual that was not equal to requirements of the indigenous horse in that part of the country?-Certainly, it was a complete fullers. The original breed of each district, you might call them thoroughbrode, because they were bred in and in in and they were always the hest 5188. I think you were a great deal in Bahar !--No, I was in the Himshyan.

5189. You must have seen the introduction there of the Hackney-or, as it was called here, the Nortolla trotter—the thoroughbred horse, the Arab, the Persian; in fact, the introduction of a great variety of

breeds crossed by the indigenous horse of the country ! 5180. And with regard to the actual cross itself for the service required of it under these elimatic concitions, did you find any of these brends practically improve the animal steel for utility i-I payer actually visited one of the Government stude-the Burse

Stud-but I have seen a great many animals that were bred there-the original country mare providwith the Arab or English rucehorse—and, as for as my recollection word, there were general complaints that they were too small. You could not get sufficient size for cavalry purposes by crossing with the Arab or English thoroughbrook

5191. You found that the indigenous borne of that part was the most useful !- Yes, on tainly; the hill posies were something marvellous 5192. Mr. Wateron - You would not compare the limate in India with the climate in Ireland the

thoroughbred going to India is much more out of his element than the thoroughbred home going to Ireland? -No; I think the thoroughbred thrives very well in 5123. I thought you said his gets were not so good

his produce, I mean !-They are too small 5194. Therefore India would hardly be a fair comarison with Ireland I-No, staccely. 5195. The extremes of best and cold are so much enter l-Yes.

5196. Do you think if the breeding in Ireland had been confined to the old Irish been that the man

5197. If you kept on broading from these Irich mares and stafform, would you have produced the same hunters that you have now !-- I have never exshuled the introduction of the thoroughbred; it is the first cross with the old frish mare. That, I think, is the proper way of breeding weight-narrying husters.
5198. India is no comparison for Ireland became

you nimit that the thoroughbred has been a great 5199 You cannot compare India with Ireland!can encourse at in thes way, that I consider the old Irol: horse, where if he had remained pure like in the Island of Aphill, where the saimals have been lacd to

the mountains, and no cross of any extraneous blood-L think these animals ressons the bordy custities I make of before with reference to the horses in Itelia.

5100 Have you been to Achill holy 1—No.

5201. Do you know the sires in Achill have for the

last few years been crossed with eart burses in order to obtain san!-No, I don't know that 5202. Do you know that no pure Achill penies still xist in the way of sizes ... I cannot tell you; the man I bought them from told me the mares were surring with their own brothers and sisters on the mountain,

and were bred that way. 5255. This man is a dealer who hope and gives a pedigree in order to obtain a market f-I disin's sak him much about his poligrees. I can judge by appearance. I would not, of course, rely on all that 5204. Except for his telling you that these ariesals

you bought were by the Hackney you don't know 5205. Do you know the Congested Districts Board have had three Welsh tobs stationed in Consenses. for the last two years and one in Achill 1-I am glad to hear it. I approve highly of them; is in accordy

time to have seen their stock 5206. Do you know that the produce of the Hackney and the western pony is much better tempered than the produce of the Web's cob and the western porient

—1. course so. 5207. If you saw it of course you would believe it? —I would. I don't think the Hackney would improve the agreeability of the mount. 5208. Have you much experience of Hackneys !-I rode a thoroughbred Hackney once last season with the York and Ainstoy hounds, and I would never get on one again; it was like a ship rolling, and you feld when he galloped that he must fall to pieces, and the

first fence be stumbled into it.

Printed mage digitised by the University of Southampton Library Digitisation Unit Printed image digitized by the University of Southempton Library Digitization Unit

1108. How was be bred?—Bred by Mr. Dannington how they were bred !-- You might make plenty of

5010. He is not remarkable for having sood Hackmeys!—He has a very large stud.

5111. That is at Thicket Priory. You will be glad to hear that we have not bought any of his Heeksneys for Ireland -It is only with reference to the necessar

action of the Hackney. I think the Hackney is a spiendid animal for the North of Iroland where they breed carriage horses, but if you want one to improve the riding horses or the hunter I would not accrove

5212. If it was decided to buy any of these old Irish stalliens, do you think it would be possible to obtain them!-I think it would. tion them ion to them in would.

5218. They still exist 1—They do; it would take a

good deal of ferretting out, but there are farmers who still have the old breed. As I said before I think the Weish cart horses would help. 5914. I think was mid a creat many troopers were now heed by half-heed horses !- A great many.

now need by mail-need norms 1—A great many.
5215. Do you think it has become fashionable to say that a loves in got by a thoroughbred in order to sell him b... I think the farmers speak truthfully what

M16. Do you think that all the horses in the satskogos of the Royal Dublin Society are get by throughbreds !-- I don't think so ; they set out of the farmers hands and get pedigrees meaufactured to

5217. You think you can rely on the farmers !--- I think you can generally. I know one lastance where a very good lumber has been said to have been get by

but a sen of his out of an old Irish mare-a half-bred bunter horse-a fine horse he was too, but the farmers said he was by "King John."

5118. He left out the word " son " 1-Yes. 5/19. From your experience if you don't wish to

mistakes, but as a rule you would get nearly the truth M. T. W by going to their houses and talking to them. fc500. You would alter the rule of the Royal Dublin Yes, in a special class to be reserved for breeding 5221. World you allow mayer to be shown in Sal

by other horses than theroughbred !-- I would ; why shoold you exclude other horses and only admit the registered ones ... I would see what was the heat foal. 5193. You think with regard to producing some and size it is chiefly pasture !—. Not altogether.

5333. Climate 1-A good dad breeding : variure as well as breeding; you must have bone in the sire and dam in order to get bone, and that is the reason that you find when breeding too frequently from the race-horse that you lose bone. The average of the race-

horse is 74 inshes below the knee; the average of the weight-carrying hunter is \$4 inches; if you breed from 74 inches you cannot get 94 inches. 5214. Nine and a half inches is a hig average !-- I would like to have my sire nine and a half inches,

unless it is in the sire. 5925. Supposing you brought a breed from England -thoroughbreds or Hackneys—do you think you could produce that better in Irstand than Eagland owing to the soil and climate I... I think you can if

the young stock are treated well and are well think they probably would grow higger hore. 5226. Don't you think this country would better becars of any kind t-No doobs, the Irish horses are more active because they are grased on land, frequently mountain land, with broken down fences which they are always jumping, and then when they come to be trained they know all about a ditch,

a log, banks, water, and everything else. The English hunter is graced all his life in a equace prelime with hedges around it, and knows nathing but a plain piece of grass, and has got to be taught all the ing from the farmers you would be able to find out

Disasson Presugnasa, Turbunch Leden, Castlebar,

5127. CHAIRMAN .- You live in equaty Mayo ! -- Yes

100.

1008. You form a good deal t—I do.

1028. Do you breed any horses yourself!—I have bred a great many horses at different times, but gurs it up some time since, when my some went abroad and I had no one to rule them.

\$230. Are there pleaty of looses bord in the district secund you !-- A good number. They are a poor class, running between 14 and 15

kands as a rule. 5259. What part of the county are you in t-Turlough, mean Carriaban.

5133 They are a small class of mores as a rule !--Yes; I am speaking of the country mares between 14 and 15 hands high. 5934. Are there suitable stallions in the district for these mares? -- I do not think there are; there are

a great many small country stallions that are used by the people, and a great many of these are half Clyde, or half Suffolk...in fact, sorub I would call them. 1935. In the mountains districts of Maro what do

they breed !-- Well, ponies, a sort of rough pony; there is no particular type of them. 5256. In fact, they are crossed every way 1.—They are crossed every way. When I was young there was a particular type all through Consenses and Achili-all along the scaboard, and at that time you could have gone into the Intr of Westport or Now-

port, and got any number of most perfect ministure into home, pictures they were, of this particular type. These were running between 124 and 134 hands high. Then there was a gross of this half bred Sufolk and Lalf-bred Clydesdale brought in to make them larger, and destroyed the whole breed of ponies. They were more hise the Welsh ponies at that time. There is barelly any of the old type of Constrain your new pure. 8237. Con you call them ponies at all LaCh, wen-

should sail there so. They you from 15t to 14 hands-14.1 perhaps. 5258. You think the borses have deteriorated expsidershly from the old type !-- The ponies I speak of

certainly have. 5129. Are you in the mountainy district!-- I am near the mountains, near Westport

5040. Then there have detection tel there excludely -Oh, ceetainly they have. I am speaking of Conne-mera and Achill ponies—the mountainy ponter. You get, no danks, good ponies now and again down there, but they are the exception, the general ran are scrab-

to be used t-I think the Congested Districts Board's sires are good, indeed, for the porpose they are put to sures are good, moment, for the purpose usely are put to on the sucknord. I beaught some of their foals as an experiment myself, and they turned out well. 5342. What sgpl.—They are coming four. They are, I suppose, 142 to 143. I sheald think about

that height, or perhaps they might go to 15.

5243. What sires have the Congressed Districts Board there !- Hackney sires. 5344. You bought the produce !- I bought them in the fairs of Newport as an experiment, and have Board sires, but there was a Hackpey sire brought

Printed image digitised by the University of Southempton I ibrary Digitisation Unit Printed image distinged by the University of Southermoton Library Distinguish Link

Mex. 25, 1835. Ms Desport over by Mr. Mitchell, who lives in Tourmakeady, and I used him with small Connenses ponies, and got and I need him with small Commension princes, and go-wenderful good peeles, about 13.3, 5345. What horse was that I—Star of the West. 5346. Did you sell any of this stock at all I—No. I have got some now. They are all good; there is eas of them the best I ever followed in my life. at or soon soe best I ever removed in my life.

5247. In the teap 1—In the trap or so a fencer; he used to easy one of my sons, 104 stone, with the

stor bounds. 5218. De farmers in your district appreciate densings of good stallions !-- I think they do. Royal Dablin Society's stallion is too far away from them to use down there in my district. I sources he

is fourteen or fifteen miles away 5249. In your immediate district 5-In my immediate district. They are, as I said before, some of these half-bred horses. Some half-bred horses from Lothurio, a thoroughlyed hows; some from "Ballim

fad." another thorographyed horse; and from " Sogo, 5250. Will they pay a decent fee for the size!would be willing to may \$1. I am speaking of the

5251 Take the ordinary facure, is by more in finemed by the fee than by the making of the horse it -I think so, 5252. More by the fee !-- I am sure the small farmers will not put their mares to any home, no

mother how need be in if they have to new large from The feals are sent away at aix mouths old. A large number of finds are sold to the market at air months old, and go away in droves. 5253. The thoroughbred houses you have got, are they close to you !-- I suppose about also or ton miles.

15254. Do you think they are rotable for the district at all t—I think they are. I are speaking now of the sire that belongs to the Reyal Dukin 5155. Do you think he will sait well for the mares

of alm district -- I think by would. There are not a great many march; there is a great dearth of mores suitable for breeding hunters. A256. In the Dublin Society Schame to operation he your district !-- It is : I think it does good, but I think it is a mistake to have them always located in theore place. I think the Dublin Somety's horse, the Government beese, ought to be moved about from our post of the district to another each year, so that such part might get a fair chapes. Of course the persons

system is to register the horses that are suitable to ges good produce indiscriminately of where they are. We have a great number. There was Mr. Bislo, We have a great number. There was act, names, down at Ballinafad, used to breed any number of borses, and kept oned sires. Unfortunately we have lest him, and there is a dearth of thoroughbred sires. 5257. Have you say experience of the work of the Communed Districts Board Scheme in your neighbourhood!—I think they have done a great deal of good.

5258. Do you think the people are guiting a better print for the young stock since the Hackney stalling was introduced bed can hardly say that, because the

has introduced to the state of the state of the fools in the state of the fools of the state of the fools in the state of emisable to mate with marce in the district t.—Very much so. I think the theroughbred horses would not

looking fillies are all sold away, and the very worst

5252. Have you say suggestion you could make to remody that !- The only thing I can think of is giving promiums to mares of, say, four or five years

man on. I have an encouperated notices were as and at all to be put with these mountainty pendes. I think you would have a number of woods.

1 think you would have a number of woods.

1001. Do the farmers keep the best mares 1—No, I am surry to may there don't i they sell them: the heat

5265. Mr. Firswillian.-You my those Many enies, do you call them Mayo or Connemaca 1 There are usually called Connersare ponies, it is the district on the seaboard. 5254. Yours ago you say they were the perfect thing !-- Of a perfect type, 5215. And you would like if you could to reproduce that type !- I think it would be far supprier to what

that type to I mink it would be far suprime to what they are now, but I do not think there is any likely. hood of its being done 5266. You would like to do it if it could be done ! —I should, they were a perfect puny; in fact very much like the Webs pony, but there is happly one of

this class got now.

5267. You think the introduction of the Welsh
pany blood would be a good thing 1—Well, the mores now are such real screb that it is very hard to my, and we all know how mares throw back. It is very

hard to may what the progeny would be from the 5268. They were you say derived from a perfect type of pmy 1-Originally 5200. And they will throw back to that good type.

won't they !-- I am afraid we will have to wait a long time before we get back to that twee 5270. But you must make a hegianis would you set about it !- I think these Hackneys

are very suitable for the mares they have now.

5271. And was would under them to the Welsh t -I think so.

have not myself, the produce of the Hackney, they have very good active, good lesse action, reaching, and good hook action.

5973. And they were a breed which had a great deal of the Arab blood in them !—There was Arab

blood in them originally, far book. 5374. And do you think the grafting of this new blood into those would be a good thing !... I think it will produce certainly a more useful animal than is

5375. But if you say they were marly perfect and they were like the Welsh pony, why do you not like the idea of grafting the Welsh pony blood on to them again !—I dare say that might nerver. I have not seen any of the produce from the Welsh size.

5276. And you have your opinion on the product of the Hackney that you have already seen 1-Xes; what I have seen. 5217. What number of them have you seen !-- I

suppose I have seen fifty or sixty of them. 527s. What are !- Some are coming four-they will be four in May zext. 5279. And do you believe that the old breed of Connemnra pony can be resmoitated 1-I should hardly say that. It would take a very long time to

5250. Then you are going to strike out a new breed of them I....The ones that are there now are real struk taking the hig majority of them. Now and spain you can pick out a good puny, but taking the majority

meac.
5282. No, and if you are going to mend them,
would you not rather try to mend them on the old

lines -- try to reproduce them on the old lines so far as you know !-- You are speaking of the ponies 5393. Yes: these Connemera penies that you have been talking about all the time I understand!

Quite so; the same remark applies to the New Forest pomies, they have deteriorated, and they are trying to reproduce them again. 5284. You would not like to re-introduce the Arsh example a very selection of the selection of the Arab blood in Queensland, on the Arab blood in Queensland, on the

Nur. 24, 3604.

Mr. Deemond

smong well bred mure, you got almost a perfect park hack, but when you put the Arab to this nondescript bread which they are here I do not think at would 5285. You do not call the Consenses pury a nondescript breed !- Now I do, because they have good away from the original old type, and you can not

call it anything, what they are now. 5286. And you think it is hopeless !- I think on the old lines to produce the old Communic pony, but they were minuture bornes, and ran from 12 to 13 and 133 hands high 5287. Mr. Canne.-What has coused this dete-

signation in the Connermore pony t—It is chiefly by the introduction of half Sufolic and half Clydenlale. that has been brought in to increase the strength of them. I consider myself that all sires ought to be registered.

1088. Is there a Wolsh sire in the district at all !--I believe there is one but I am not quite sure, I have not seen any of the produce. \$280. All that you are accuainted with now is the reduce of the Hackney 1-I am speaking of the

Hackner that I have seen \$290. And so far as you have seen the introduction of the Hackney blood has improved the breed i-They are a very useful class of horses certainly, with action

fore and oft.

5291. You have got some yourself!—I have. 5092. What age are they t-I have one ten and another eight, another five, and coming four. 5293. Not all by the Congested Districts Board sire!—Not all; some by the Congested Districts Board sire, and some from Mr Mitchell's horse. He issported Elsokneys into the district some time before.

His Hackneys were larger than the Congessed Disjuriets Board. I suppose the horse I speak of was 5194. Now we come to the registration. You are in favour of registering all sires !- Stroogly in favour

\$290. You would register marcs too !-- I would, a 5196. Mr. Wattert.—You penetically know Con-

5297. So that you really know all that scabourd where the Congested Board have their horse-breeding arrangements point on !-- I do. 5298. And you know the mores of the district !-hunters, any smin ought to be on the side of the 5190. Both at Belmellet and Achill t-Yes. 5100. Do you know that the Board leve had

stationed both at Behnuliet and Achill in the some 5301. You don't know that !- No. been out there at the time. \$302. And you know tiese has been a Welsh pony

in addition !- Yes. 5303. And also across the bay !-- Yes, a Welsh poay at Louisburgh. \$304. You know the mares !- Yes, the general run \$305. And they are very much the same both at might be a shade better at Louisburgh than Achill,

\$305. But you have not been at any of the shows there to see the produce !-No, not at Louisburgh. 5307. And you know there was a Welsh pont at Louisburg); before 1-So I beard.

2303. You say you have got some of these animals yourself bred from the congested districts !- Horses, yes. 5309. Have they plenty of shoulder action !-

They have a good pitching action, knee and book 5310. You don't see anything in their scrien to find fault with !—Nothing.

speak of bred from Mr. Mitchell's horse, have you been able to test their staying powers !-- Indeed I have. \$313. Then you think they are a staying breed as for as your experience good-As far as my experience goes, that is crossed with the Connections pony. I have our of the old original Conner 20w, over thirty years old, one of the kind I speak of. 5313. A sarrel—A mare. 5314. But you have been able to test the produce of these Hackneys as far as staying goes !- I have 5315. And I trink you said your son rode them!-

5311. With regard to the other Harkneys you

Hunted them with Mr. Fitzpatrick's stephounds. 5316. Would they hold their own in the houting field !- I think those that were there could sreak as 5317. You think they could, I merely want to knowl-Cereanly, quite well, up to the front. \$318. And impo !- And impo any amount. 5319. We are not suggesting them as leasters but I merely wanted to know !-- Oh, no.

pony I am monking of is a remarkable imager, in her training she eleared by the tape twenty-four and a half feet over water. 5320. What beight is sho 1-13.3. 5821. Is the breeding of horses a considerable industry among the people along that seaboard !-- Is has been up to this, but I think the prices have deterseated so much labely that I don't know whether

they will continue it so much, but up to this they have been all breeding every year. 5323. Well, they have to breed a certain momberof losses in order to earry on their work !-- Certainly. \$323. And on you suggest any other class of stallious you would recessmend to be tried there !-You mean another-well, no, I certainly would not 5324. You think the type the Board is sending

there now is right!-At the present time 5333. You don't think the time has arrived to make any change !- Not yet.

5226 What do you think of the half-bred leaster sire!-Well, I have known some vary good bunters got by builf-hard sires, but then there are half-hard sizes that are virtually thoroughbrods 5387. And would you rather have a half-bred give that is virtually a thoroughbrod or would you nather have the half-bred sire with a course stade in him ! -I would rather have the high bredsages for breeding

5198. You would like to have your sires as nearly thoroughbood as possible?—I would, as long as I could get them strong. 5322. A gentleman told us this morning that he bought some notice from a chaler in Comsequere, I suppose whru you bought your foals you saw the dams?

5350. You saw their doms, and knew they weregot hy horses belonging to the Board !-- I got a cor-5331. They had their cortificates with them so that there ended be no dealet about your animals being bred as described. Mr. Fitzvilliam select you if you thought the recoess of rederming the original breed was coshle !- I would be inclined to think it was 5331. Now could you yourself at the present time

point out to any stallious in that district like your old larced!—Not of that type I spoke of; about fifteen years ago there was one or two of them. 5133. But for the last five or six years they have wastically disappeared !-- I have not seen any of

5334. And their place has been taken by a large coarse animal with some cart blood in him t-Yes, a sort of half Suffile or half Clydesdale, with a large

\$325. And the chief trade there is selling the fouls? -Selling the foals at six months' old.

27to 24, 1884 Mr. Lieuneni

5336. Are the feels from these lesses good looking feels as a rule !- Some are; they me taken away; we thou't see them after they go to the fairs and they are taken away; it is very hard to may what a feel will 5337. Do yen know that many foals were beed from Mr. Bishe's thoroughbred heren with Comp-from Mr. Dishe's thoroughbred heren with Comp-

mara penies 1—No; I don't know that; not with the Concernary panes, but a good class of mares were put to Mr. Blake's borne. 5338. But you don't know that the Connerses-ponies are crossed!—I never heard tiest.

5319. You did not hear about a sale of penies heed in that way recently !- No, I did not \$340, And you would be inclined to have all horsen registered !- All sires certainly registered. 5341. Do you ween by that homes of every breed?

5343. Weeld you register any half-bend situs or only the nure-bend situs !-- I den't believe in half-bred aires 5313. You would recister a pure breel of any breed? -I would; our great dearth is want of mores, for

6344. Of course you don't think that huntres would be at all likely to be bred, or do I understand that they would be likely to be bred from these little uney nould be likely to be bred mares you talk of i-Oh, not at all. 5340. Do you think there is any darger of the recoines of these mores in Arbill finding their way inte districts where the hunters are bred and becowing hanter brood mares !-- I should not think so : I

should think a man's own judgment would be able to detect the Hackney blood in the produce. I think he above a type, you can see the Hackney type.

1046. That is your experience !-- That is my ex-\$347. And you knye soon some of the produce of Mr. Mitchell's horse before any horses were seen slown by the Board !-- Oh, yes.

5348 Do you know resolve they sold for good pricest—Scene of them very good prices, sold in Ballierabe, very good prices as colts. He was a larger type them the Congested Districts Baard's 5349. CHARRAN,-As for as I understand what you are telling Mr. Wrench applies chiefy to the mountainy districts !—The recentuiny districts.

5310. Do they broad many bunters round you!-They do, a few business.

5351. Have they got good mares for breeding -kunters !-- No; there is a great death of marcs.

5352. Have they good sizes for breeding hunters!

Up to this we had, because we had Mr. Elake's become to go to.
5353. That is about three years ago !-- About three News ago; there are no thoroughbood horses actually

close about

Lisserick?-Yes, my lord.

PRIER FITZGREAUS, Prospect, Limerick, examined. 5369. CHARGERS.-I think won live in the County

5170. And have had some experience there in horse breeding?-Yes. 5371. Have you bred voorself!-Yea. 5372. With good sneess or otherwise!-I have not beed to a very great extent, but I have been assessful in those that I have bred. I have beed for other

pecclo and for mrself. 5373. What do you aim at breeding !-- High-class henten or high-plan carriags homes which are the only things, I think, that pay in this country, and what, I think, everybody ought to sim at deing, 5374. You know something about Kerry, too, I Believe !- Yes ; I am a native of Kerry.

0354. There is a dearth of good sizes !-- There's a great dearth of good stres. 5350. What is the newest home under the Recal Dublis Society's solution!-I should think about eleven railes. 5356. You don't know anything about the working of it -No, except that people gramble sheet learning to go so far, and I don't think they can to

make one of him for that reason.

5257. What sire would you recommend for the hantor-breeding districts for the mages, I den't cult now show the mountainy districts !- Well, I should bood heese with plenty of been

seconsmond a strong low long type of harse, thorough 5258. And you would be averse to my hattland horse !- I would be averes to any half-bred horse. 5359. And you with the Commission to under stand you would be in favour of the Hashner in the vicentality district and the thoroughbred in other districts !-- Quite so. 5350. Mr. WEESCH,-You don't think there is

any drager of the broad mixing in that way !not, I think if any schools could be adopted for introducing mures by picking up source that needs be injured in the hunting field or used up meres, and if there was any scheme adopted to give them get to the large farmers on condition that they kept the fools for a certain length of time. 5361. Of course that only applies to the good dutricts where they would be able to feed a most animal !-- Quite so, I am speaking now of the 5165. And you wen't give those mares to some of

the farmers !- I would give them to the larve farmers that were able to find them, on condition that they kept the feels for a cortain time, that were mitable. 5363 CHAIRMAN.-Do you rates a certain me conign of fouls or a certain number of years for excla foal 1-For the same foal if it was thought six was suitable and a type of mure to based hunters. I would give every independent to keep that mure in 5355. Mr. Cargo -And you would test her merits

by her produce1-Certainly, but we cannot beed hunters to order, and the only thing we can use is the best of our judgment to produce what we want.
5505. But there is a great death of thoroughhead sires since the death of Mr. Blake 1-There is and a

5346. CHAIRMAN.—Any more suggestions would like to make !- I don't thisk there is anything 5367. Mr. Canny .-- You spoke of an Arab proy in your district, did you see him !- I saw one or two of his gets, I did not one very neach about them.

5355. You never saw himself !- No, I never saw bimself.

5375. We will take Kerry afterwards. Referring 9 Limerick, what stallion do you think they must asopt to breed a profitable horse in your district !—The

thoroughbeed and the half-bred that has shown himself a good colt-producer—that has proved himself such.
5376. The thoroughbord, practically, with a stain in his pedigrow!—Yes.

5377. And your district in suitable for breeding high class horses of all types!—Yes.

5378. Are the mares suitable for breeding first-class horses, too !- Of course there is a great mixture, but there are excellent mores in the country 5579. What part of Limerick do you come from 1-I have lived nine years in Adare, which is almost in the centre of the county.

\$380. Would you describe the marest—It is very hard to describe them, there are such a variety. \$331. Give us some idea of the general type of name—I should call them the half-freed mares; they have all, or nearly all, got a cross of theorophism. \$332. Satishle for breeding hundres and high-class

have all, or nearly all, got a eros of theroughlered.

5332. Suitable for breeding hunders and high-class
harness because 1—Certainly.

5383. Are there a sufficient number of suitable sires
in your district 1—I should say so.

in your until return to a series of the coling from halffield sires t—Where they are known to be good extra producers, such as seene I could mention:—Traverse, Machinolah, Arthey, Markey; of course Maybey is specifically thoroughlered, but so is not in the Stud-

2535. Would you appeare of these sires being registered by the Royal Dublis Scototy 1—I should; their coits have fatched some of the highest prices in the district.

5336. Do the farmous grossully round breed a good

5326. Do the farmous generally round breed a good class of lorses 1—Yes; of course there is a good deal of rubhith, but I should say the best horses in Ireland come from my district.

corn rows my GENTEG.

5397. Do buy irrest there from two-year ald filles I

No, I den't think they do; they did breed from
two-year old filles, but they found that some of the
manes dids, and they thought that consed their death,
5308. You mean the fillies after having feated did!

-Yes.

1039. And did you breed yourself at all from twopear oble !—No, meers.

5390. Would you approve of it or utherwise!—I should disapprove of it! I don't think you ought to breed from anything under three, at least the class of

beed from anything number three, at least the class of name that farmers keep.

3391. Are many of the best mores sold out of your country?—Yes.

5192. If this farmers get a better price for the good sare, they keep the had one and self the good one b-Certainly.

5193. Have you any suggestion to make to the

Corrac raises you say reignous to mean to the these manus —— thinks the system and yet of the reignous problem in the same and the same

the subject, but I should like to put a tax on all poing meres going out of the country.

500. And all the young mares bought by foreigners I—Yes.

5096. Would you suggest licensing the stellions b— Yes, certainly. 1697. And taxing or prohibiting unsound stallions from serving in the country 1—Yes. 1698. Now the Royal Dublin Society's scheme you.

by has improved to notice, and in the usus way it, and the sum of the state way it is a supervised to the state of the state way it is a supervised to the state of the state

out a hunter trade in this country and unmong tracsteer was a very large trade in homes bores automized harness colts, I wrote to Mezers. East and Co., of London, to sak them what their experiences was and with your permission I should like to read a letter which I have received from them;— "I common-treet. May Fair.

"Sm,-Replying to your letter of the 19th inst. adfrenced to Mr. George Last, we are afraid we can give you

any greatest statistics as to trade to known known does not be related. More than one on pre-server in the field than for high than control to the state of the s

and we us may summer.

"Briefly we consider it must essential that the sire should be thereughbred, but with good action rocker than yood, and we say and that the test block browns we new key are marrly all by "Mackintook."

"Yours faithfully.

" East & Co. "Peter Fitzpershl, Esq.,

"Prorport, Lissenick."

5400. Now wa will take your experience of Kerry, what part of Kerry do you know I—Near Califeirees, the island of Valentia I am a maire of. 5401. What clean of marres are there in that distict I—They are twice small marre, I was at the

bill). What came or marret are table present with I-Dep or vacher small insree, I was as the Congreted Districted show and I was well 21 think in the class, and I should not yet the wave 121 think in the class, and I should not yet there were 122 of marret class, and I should not yet there were 12 good marret 10102. Have you seen any of the should of the Congreted Districts Board staffion, I suppose year old at that show I yet, a great old, I say them at the

tina scow :—1eq a great disk, I hav them at the thow, and I have gone over that district and seen a great many of them. 1403. Have you seen the sires?—No, I have not, I have seen their progray which I think is more

B404. What is your opinion of them 1—I don't like thee.

I don't think they ever will develop into anything like a good horse, they rever will nake anything mere than a feel onlike, which is a close of

tained which is every deep beering less valuable
owing to the introduction of motor cars and hispeles.

5405. What he have you seen these buries at 1—
Fasts, partings, and two-year-olds.
5406. What is the ordinary stalling that is standing in the districts being this harm. —In the Con-

ing in that district besides this harm!—In the Congusted Districts of Kerry they are the very worst.

5107. What is their propeny like !—Bad.

6408. Is it better, or as good as, or worse than, they
Convented Districts Reserve size !—They are no lead

Gongested Districts Reneffs sire i—They are so had that I don't think one could foun cay basis, bat I I have seen better coles from local sires than any of the Congested Districts Based sires. 5 003. Would they make calibres!—They might

service at their.

5410. What would you reaggest as the best means of improving the houses in these districts 1— Deliave it a good theroughteed size and a half-fixed size, or perhaps we might a too to at Arab, if these were introduced that consumpts on the same principle at the Congression Districts Board has intereduced the others, as you have been of the Universe were present made as you have been of the Universe way great number of tecopers might be bred in that scenario, T mean to say freen Diright, in Kerry, to Scholl, in coursy Order,

which is a very large district.

541). In that all congreted t—It is; if that was all stocked with the class of horses I have nominosed. I believe they would produce good troopers at any

rate, if not better.

5413. Do the farmers there treat their young

Nov. 25, 1896. animals well !... No. I think that could to be attended Mr. Petre the best yearlings in the goring to induce the furners to feed their foels during the winter, I should advise

, that, in all parts of Ireland as well as in the con-5413. Now how hig are the mores, I am referring new to the Congressed Districts that you know, he

his ore the reason L-T should say as an averson 15 5414. If you get a thoroughbond sire on those and don't feed the progray you will have a hig enestgh home for a trooper !—I have bred out of a many 10.1

none for a freeper—I have gred out or a mine 10.1 and get £150 for a five-year-old. 5+15. That is in Literarisk t—Yes. 5+16. There is a great difference helween Kerry and Limmack t—I though the Kerry land is capalist of

producing a home as hig as that, and it has done it, I lave seen instances of it.

5417. Mr. Presvitatam Talking about the Limerick portion of your evidence, I think you said

the marris on an average were good mares, the mores that are used for breeding from back on but of course

5418. But on the whole are they fairly good names -- Yee, I think so. 5419. For breeding hunters or corriage hosest -Yes: I think there is great more for inconvenues. of occurse the succe good mares we have the better 5420. But the improvement that you think would

he the most likely to be able to be rande would be to ous a need thereeighbrot stallism or else a good halfbred stallion !-- Yes. 5131. That is a horse with a seest admirators of thoroughbred !- Yes. oroughtren:--- a.e.. 5422. If you could not get the required munber

of thoroughtred etallious so you think you could produce refleient good helf-heed stallious if there was a demand for them I... I don't are why there should be any difficulty in producing that article 5493. And if no you believe it would fill up all the

considerants as regards house-havesling, except for agriculture in that district !- Yes, and the improvement of the mares. 5424. The improvement of the mores would, of course, come after the improvement of the stellions?

-I think we should retain the most marve as much as prouble.

5425. Can you suggest any way!-Well, I have engrested the system of prices, nominations to registered stallions, and taxing ore-going mores, would also engone in reference to the mares that if there were stud farms that the department which good young mores in the country so as to eccusion with the foreigner who takes our good maren away.

5426. You mean to have depote to Yes, I should sivocate having sted farms in several centres in 5427. That would be in the hands I presume of a Board of some kind 3- Yes.

5138. And you would utilise the monor that is evallable in those ways rather than solution the 3429. Are you a member of the Liucrick Horse Show Society 1—Yes.

5420. Have you seen the house that have more down there from the Congressed Districts Board !-Hackney stelliggs t-Well, we have had Hackneys et the Limerick Shows but not belonging to the Congested Districts Board,

5431. Are there may there now !-- There are none bred in Limerick that I am eware of.

5432. So they don't really based them there to any extent \$ 37e 5433. As regards the Kerry evidence you give I think you now the stallings are extremely had to be the concested districts they are very bad, there are a few good stallings in Kerry such as "Donale Donale "Royal Charter," etcl. "Waterloo" is, I believe, not wery much het be is fairly good, but they are at a distance from the congested electrics.

5434. Thun there are Congested Districts Board stallings there too ore there !- You 5435. And do you know these !- I don't think T

have ever seen them. I have not been there when they were in the sometry during the season. 5436. I think you made some compressors, did you not, between the presisco of the two classes of armeds?

—Well, I could not compare the produce of the

Heckneys with say good horses in the concessed custracts for those are wone.

5137. Then any comparison that is made between
the preduce of these Hankmays and the produce of
the ordinary stellman is comparing the produce of

animal that you admit is the worst class that could 5438. So that the comparison if it was made would not be a fair one i-Cortainly.

5459 What four do those become servelly come att -About 15s : I should now on un avenue 10s. perhaps, and they sometimes have an agreement at

30s, with a fool 5149. And the Hackneys, I think, cover at a good bless on a paper if I might read them.

3441, Mr. Whitsen.—I want to ask you, you have

been a good deal about Ligarrick, have you not I ... Yes. 3442. Can you tell us about any of the old Irin sares f...There was be some old Irish mores, but I think it would take a very clover man that would find them out 5443. You don't think it would be resulte to remeniuse this old Irish broad 1-I doubt it.

5444. Do you know of any stallions that are said 5.145. Do you know many good half head staffices that you would like to hered from yourself !- Yes, I

5447. I mean they have only a small stain in their pedigrees 1-Xes.

5148. They would all mass toto the Euclish Henter's Immovement Stud Book ton I should say sa, thore are several descendants of Arthur, Lesby's Aythur, and semplody alse's Arthur, horses of that

0449. They are not so highly beed as those you have given us t-No.
5450. Would you register may of these stallings until you had seen whother they could get such stock? -Net unless a Board appointed for the purpose had evidence that each a horse had receiped good colts. 5451. You would make producing good stock a necessity!—For the half-brod, certainly, I don't know

that I would not edmit a large to the register that has proved himself a good horse enross country, even if he was not thoroughbrod. 5452. A rood hunter, then you would be in favour of people hunting more entire horses !- Wall, when

that was gring on I think the horses were better in the country 5453. Would you be inclined to return to that !--

5454. But you think it would be a good thing if more laces were kept entire, so that there might be some selection by a Board I—Yes.

5405. I think you said you thought that the date of the charge for mares should be altered to the spring?

— Xes.
545d. Did you mean by ther, to do away with settoms shows, or do it in eddition 1—I should have only the spring shows 5457. Thun, you would not see what class of that the mure produced t—We should see them as yourlings. 5468 You would not see the feed at foot as they can be next now 1—It is impossible to judge a Sulfoot, I think you have a let of fauls at ages verying. I mean to say there in a difference of a month or two in every faul, which makes a great deal of difference and it is impossible to compare fools.

5469. But if you know the age of the foul, don't

and it is impossion to consequence the field, that is, fig. 2 list probable to form sensor opinion: 1—You possible it form sensor opinion: 1—You possible it form sensor opinion: 1—You can many opinion as to him fistense prospect, or as to his being botter than a fixed that is two months opinions.

54(0). Then, were would simply haves greing about the first prospect.

inving a feel abov.

5161. I mean more on a test on to whother a mare

herd a good fool error, you would lose that by the change 1—You would, of somes, but I think the jetroul thing is the spring show with a view of giving, contrastions.

5622. You said, I think, that you would suggest a

tax on marks that went out of the country 1—Yes.

5463. That is, that the foreigner should pay a tax 1

—Yes.

5164. Would not that practically come out of the

other, whether the trace processing come one of the seller's pecked-would be not got less.—Then the faince weeks not sell his more.

5455. Then home-breeding world gendually become not so profitable 1—Decoding names would not be no profitable for selling purposes.

540. World you have so put my tax on foreign bonse coming in, melt as American herest—Noogit think to 7. I think they ought to be either beautid or some way of libertifying them—unt having their soll again as Litch heren.

540. You would approve of beautiling American

540. The work approve of terming American Sounce—You. 5448. Have you seen any American homes—No. I have not; I have seen American tretting tomes—I have seen an American tenting stallion and a good deal of his progeny, but I have not seen any of these

of his progeny, but I have not seen any of these recently imported American horses. 5449. You took us a lotter from Meson. East, do you know how temp horses Meson. East med to jusy in Ireland in the year!—I think they spend £25,000 in Ireland in the year in laying horses beere.

5110. Do you know how many houses that represents 1—They say £100 m pices. 5411. But they only buy a very high class of horse 1 —Yes. 5412. And meet of these beams are lead out of

read-stand marro, on good land, and out of good sirrot.

I suppose i—They are laced by these aghired area. I
know.

5473. They require a hig sized horse, don't they, up
to 16 hands 1—Xos.

to 16 hands f=Yos.

\$474. Therefore it would not affect the trude of
very small farmers at all!=-I clot's see why a small
farmer should not brook in good a horse, it his farm
is large crough to food that horse, as anyone due.

\$470. Have you over som a 16-hands' home bred to Cohindren by small formers 1—I have seen a very good three-year old oolt midd in the Inhand of Valentia and long age for £35. \$470. There is some good hand in Velentia—Not better than the adjedning tand, not a lit.

better them the offenfully land, not a late.

4477. Bigger farms, are there not 1—1 suppose there
are on an average; there are a lot of small farmers
in Californivese district.

5478. The harm supposed that a Chelandele stell.

5478. It has been suggested that a Chydeolalo stalkon should be Emported into Caldretreen district, weakly you be in favour of having Chydeolalo there or not i... I don't think they are wanted, but I should murfer them as the Mc old.

prefer them to the Hashmays.

5179. Why 1—Because they are more distinguishable; they are not until an insidious beech.

5480. I thought you said just now that there was so flow of the Hashmay gets becoming anything but subtens, so if there is no four of that, that is a said-

y ofcost distinguishment in it not—I muon there is no bur of the produces of the Hackney being mistaken in for a hundre of the Hackney being mistaken other as hundre of the hundre of the consolver as hundre of the hundre of the solver of the hundre of the hundre of the hundre of the hundre of the SHS. Therefore two don't want may called that will always know —Now then at present, that you still always know —Now the man the present, that you off all as any know —Now the former of the con-

will always know 1—Xys.

5183. So year agreemt in favour of the Clydesthin—gathing that argument saids—do you shink inwould be a satisfied favour for the district 1—I think
the only object of having a Clydesdale would be for
egitentum purposes, and I think the agricultural
requirements can be met by prochasing runles, or a

ferror-coal by a heese to the highers were for a very small price; I avoid have been been been stated from been for a very small price; I avoid have bought farm been for a very small price; I avoid in the Liusechk felsivist, and good enough to the uny work in the Chairchiven districts, par I don't faitht you can heed anything that would pay so that price of 183. So you, proofcoly) don't wont the heavy 6183. So you, proofcoly) don't wont the heavy

5436. It you fracefully some was one many house!—I short think you end the average height you finespit of the mares about Caharatoon was 13 hands, do you think; it is as much !—I should think so

5481. You have measured there, here you 1—No, but I can judge, I have seen them constantly.
5481. For instance take these meres that we had at the above in Cahlestrem, do you think they were an average of 15 hands 1—Above it I aloudd say, there were some smaller certainly.

O487. I think you say you would, suggest sind forms in several certeen in Irohand I -I should be so listuee for the district, you could low up some of the meres that would observise be sold every, keep good statilism for the was of the size farm and for the year of the size farm and for the year.

yor bengite up ! — should have from them and then
you they properly to farmers, if they turn out will, at
a cleary nets for leveraling purposes.
5 \$430. Would you take any steps to enter farmers
bentler them marks I. I think it would be measured.

to do so.

5199. Here you ever thought here you could do
that I-It could be easily does, I would let farming
have the use of the more and get progray binaself, it

could be easily seen that they did not depose of thems or did not trent them ill.

5491. Do you see any edjection to having these nows benefit of think that would be a reco-

5492. When you say this produce will only develop into a cabber, you have mover kept any of these missels yourself I supposed - I bed ten. 5492. For long 1-No. I sold in as soon as I

orald.

5494. That was not a fair test !—I tried him well first I bought him for £45, he had becaring action in

first, I bought him for £45, he had becurified orthon in front. 5495. What age 1—Four-year-old.

of 549. Anything to my to the honor scat by the Computed Datainst Board!—Oh, no, he was by a final-new horse, M97. It was talking of the produce of the horses sensity the Beard!—Oh, no, the chinst in that datain, I taking, is tree-year-old, thay may be three in that

hemediate district.

The first is a server of the first is a server of

hi male at £12 and he was brought borne.

t

3hr. 11, 1616 Mr. Price 174

don't you know the prices for a cartain class of house in bad !- The class of horses head by small formers, yes. 5501. And were there not a creat many barnes conctically not saleshle in Puck fair!-- Of course there were a great many bosses that were not sold.

5502. At eary prices 1-Yes, there always are at 5563. The saimal you referred to that was not sold

belonged to Mr. Sullivan, the schoolmaster in the 5504. Was he not in the first instance offered £13

10g, which he would not take!—He said he was, I 5505. I suppose you will believe him if he says he

was 1-I would not dispute it.
5506. Then he refused that offer and could not get

5007. Ozzazonak.—Con you tell me at what ago Mesora. East boy their horses?—Four-year-old, I

think, unbroken 5508 Mr. Fryggilland -I should rather like to have your expenence of the Hackney than you bought for £45, although it did not come from the congested districts !-- I drove him to several mests, and when I had some about five miles I thought I was soing to get

to the meet too soon, but I found later on that I was 5500. CEARMAN.—Where did you buy the unimal?
—I bought bim in Limetick.

5510. Mr. WERECH.-What was he by ! 5511. Charguan.-Are you sure he was by a Hackney 1—I believe so.

5512 Mr. Wanner, —What was he mid to be hy?

-By a horse called Shales 5013. I am afruid we could hardly call him a Hackner i-Perhaps so.

erhops so. He may not be a pure-load, but has Hackney blood. Hashney, but has Hackney blood.

5014. Mr. Francistan,—He was overstaally got rid of 1—I got rid of him for half the price I got him for. 5515, Ma. Wetners,—You want to read some aggestions !—This is a report of our County Limerick

Home Breeding Committee.

551d. Changan.—Been it refer to the Dublin Society's Scheme !- Yes. It is as follows : "REPORT of the COUNTY LEMBNICE HORSE BREEDING

" November 18, 1800. " This year we held our shows at Braff and Bathkenia ou "The year we need our shows at Drill and amanaged or the Sed and Sed of September, at the Sormer we had tweaty-are mares, at the latter fifty tire. Some of the prise winners of last year were in the prize list for this year.

"We do not consider the present system of awardion "We do not consider the present system or awarmag prime to rares at anomal shows at entirely satisfactory, being of opicion that a 23 monthsion to any regiment size in Instant would be of greater advantage to the small

"We heliove that the registration of Stallions is now very complete, and is every year being worked up to a greater standard of evoillence, and would surrest for the condition tion of the Royal Dublin Society whicher it would not be well to admit on the Register Good, but having been at the which are not in the Stud. Hook, but having been at the stud for some time, and have proved themselves expalse at producing high class colts, and whom services would be of great bonets to the small furners. We allude to billion such as Mr. boy and Milatoch and Traverser.

"We ask to be allowed to reserv to the sessination system extension. We believe that it is of the greatest importance with a view to this we summent to allow seem of the grant to be given in primes to yearlings by Begistered Stalkers.

"Should the Royal Dublin Society's Home Breading Committee be still of spinion that the noncontion system Commonous on Hall or opinion that the monocollon system will not work in some councilor as well as the monetary system, we would suggest that it be left splinned for each county to select either of the two systems.

" Peter Peterskaro; "Chairman, Co. Limerick Conssittee,"

5517. Mr. WRESCE,- You mention prizes to year. at the same time that the mares are impreted in spring!-Yes.

5518. Immediately after the winter 1-- Certainly you could not judge during the summer as to the way the former had fed his colt during the winter. \$519. Just one show and that show would be for mares and yearlings !- Yes.

5520. Mr. Fyrmulatan.—Was that a resolution b. That was the report of the county Limerick Consrittee. Then we have a resolution that was passed on the question of Hackneys.

5021. Do you agree with it !-- Oh, yes, entirely. I was present at the secting and the meeting was unanissous, it was largely attended, 5522. CHARRAIN.-In it your own opinion !- It is,

and I voted on it. "That we the Members of the Committee of the Lieuwick Horse Show and Arricritural Society pretest most streets griest the State sided introduction of Hackney rallicainto any portion of this country, as we believe the blood will recovery decreased the class of botton any held is

it gottore. ** Passed nourimonsly.

" (Signed), Jos. P. Garrage, " High Shoriff, Chairman, " 3rd Oct., 1896,"

5523. Does that refer to the congested districts !--It refers to the concested districts inarmuch so the blood we consider personnes from the congested districts into our district. \$534. You don't want the Hackney blood in your district !-- No. And I may moution for the lest mouth or so a considerable number of posies or yearings have found their way into our country and have been sold at Hartigan's anotion publicals at mices varying from £3 10s. to £5; and on this point I should like to permented from the congested districts into our district con instance which has come under my own knowledge

"Arthur," a borse which Mr. Gubbias owned, and the respense of that was a mure which was crossed by a horse wounded was sold the other day westerned for \$70, and if think is rather an interesting instance in connection

with this inquiry. 5535. The original Connemers pony, you think, was by an Arab b-Yen; I may say the dam of this barso I am apending of that was sold the other day shows a great deal of the Arab blood and to does her \$526. Do you think there is any real fear of farmers taking up these Compated Districts Board's filler for

hored marce !- Three is an instance, and I know that at Puck fair I new several Cork and Limetick horse-hreeding and horse-dealing farents; I suppose there was a down of them that I know intimately; I mean to my I know who they are and what they do with their horses. Of course if they did not from out well. as I think the progeny of the Hackney will not turn out well, there is less danger of their breeding from them. but it is possible that they will breed from them, there

is always the possibility.

5527. Mr. Warnes.—And you think that any o the gentlemen who supported that resolution last had any experience themselves of Hackney breeding!-Everyone of them had experience in horse-breeding

5528. In breeding from Hackneys !-- I carnot say. 5038. In breeding from Hashneys 1—I commot say, No. I should not say they personally incl. Mr. O'Reien, the hense-dealer of Linaricia, whose cristenes was probably will haur. I suppose knows what a Hashney is. He was there. If I might read you a letter which I have received from Mr. O'Brian. 5529. CHARRIAN.—Have you may more to tell us rosself 1—I have nothing more to add. I should like

corner re- a diversioning secretor on the I thinks see thise that my reason for saving that a theroughbrol and a helf-bred would do well in Kerry is that in cid and at that time Korry and Puck fair in particular and at that time know, and were that in perticular In those days they had a horse called "Prinn," "Porte Rice," "Dusiel O'Cornell," sire of "The Liberston" "Touthstone," a horse called "Micky Fron," that, I believe, was by "Prion." I don't think it was the "Micky Free." This herso was by "Prove," out of a mare got by an Arab wheel Lord Econome fetrodroed into & comerc some forty years ago. 5550. Does that refer generally to Kerry or parts off for horses. In fact, I remember my father used to and mores off to a sive thirty-five and feety miles away

were in those days, mitable for breeding high-class were in those days, contains to ascents again to the ever colts?—I should say not, but I think it ought not to Economic. be very difficult to introduce just as good marcs.

5332. You would have to start with the marca you have got !- I don't see why you should not buy old 5333. That is rather a hig prior !- They could he

got very cheep to save them from the cib. There was one thing I forgot to say. It was with reference to local shows. I should like your much if they could be subsidized.

5534. You mean the district shows !-- I mean the Limitrick Show. I have from experience that there Limited cases. I make from toperouse the one are not paying their way, and if they are not heiped along they cannot go on. They are most unded in the direction of house breeding, and I don't think then they weekl in the least interfere with the Dublin Show; on the centracy, I think they set as feeders for it. And in connection with the question of horsefor it. And in commercion with the spinors of the breeding generally, I think that we ought to attaly the view the trude table of it. For instance, Mr. Widger, I leave, spends £109,000 a year in Irohand in horizing houses. I think that is even under the mark, but that is, I think, the great point to look into. I move to say the people who spend the manay ought to be convalted.

200 Mr. Groros M. Harrin exercised.

sion forty rolles away, and benught them back amin. 5525. CHARROTAN - Yen live in the County

5336. And you have considerable experience in lone-breeding 1—Yes. 5537. Tell the Compulssion what sives was bown.

you keep a good many, I believe 1-My father keys stren in the County Limerick for the last 60x reason He died a few years ago, and store then I have been keeping some. We bul such beenes as "Old Victor," "Porte Rice," "Commention," and many others. We "Forte Rico," "Committee," and many others. We have had up to fifty or sixty sires within that time; at mesent I have not a sires.

\$559. Courseys ... The district was five to is skepted to produce the highest class of horses i-And

\$540. What heres do the farmers broods. The fermers all aim at broading kunters and high class

1011. Are the mares good in your district !-- Very good marca as a valo, there are symp had once 5542. Do they beend from two-year-old fillingt...It they have tried it with your mod success, and some of the heat reco-because bred in Linnarch were from in the rearling class has year at Limerick was from

e two-year-old mare. 5543. Does that refer to theroughlised or balf-bred stock i. Does that Peter to thereughined or this bred stock i... The yearling was half-bred, it got first price and also get the Menter Improvement Booledy's medal as the best hunter in the show, and it was bought by Mr. Henry Thompson, I think he pure

1504. You approve then of breeding from two-year-elfst—Under certain circumstances, if the mare was well fed and was a good sized mare I would approve of breeding from her, and I say that it is from two and three-year-old mares it would be better to breed from see. If meet are trees now to the size if she is not put to the size; if she is not put to the size in the first instance she is worked as a two-year-old and sold away at those or four at a very bad price, so some of the best mares may go away leaving the country altogether.

\$515. Are the fermers about you recticular about mating their marce !- Latterly they are maying more ettention than they one one of fashios, took any sire and are year and they found they lost money by it, and they have stormed that system. Now they see

httping rome of them.

5946. What class are the stallions in the district!

—There is noticing within 10 miles of Kinstillock out thereughbride, I know of only con half-bred accept Mr. Guldries' "Mayboy," he is within seven niles. 1547. He is practicelly theorogal-bred 1—He is more threeughleed than many throughbreds, he is the size of "Chit-chat," the favorette for the Cenarewitch the other day, that is out of a half-tred more

5548. Is the Royal Dublin Society's scheme in or Metrical-Yes. 5540. In it doing good i-I think it is doing a great deal of good, and I was sorry to hear they are

5530. You suprove of giving the prime to mares? -Altoesther, and to limit it to mares of three or four years old, I saw some mares getting prims at 15 years of age, these mares are kert for hyesitar surposes and nothing oles, and there is no use in giving those mares prizes, treaty prizes of 45 each would be better than five prizes of 430 each; I would give those prizes to

mares of two and three years old served by a sire.

1351. Or three and four!—Two, three, or four, I
would divide three 25 reines amongst those mares. would divide more as prices amongst necessary.

If the more has a feel and the feel is a good looking
out, the feel is kept in the country and the farmer
gets rid of the old more, but if he can continue to win refers with the mure at the show he will out rid of the young once

\$552. A large number of horses are bred in your district, are they bought in fairs or from the breeder!

—Chicity from the breeder, the country is secured by menters of fexherines, they stay in the country and go round and see the young house and toke them

away, 5553. At what age !- Three and four years. 5554. And good prices 1-They get £100 and £120 le, Gosepa

for a three-year-old, the prices are not as good now as they were ten years ago. 5035. What do you think of breeding from balf-bed sires to get hunters i=I had one half-bred sire myself by Old Victor, and he was one of the best horsen I had. I buotest him regularly, and I sald bum to Mr. Denovasa, in Cork, the dealer, who refuned head been freen a half-beed more... that is, a more with

5536. Would you appears of the Dublin Society registering half-bred sizes b-As to the registerior of sizes. I would not only sugister these with the Reyal Dublin Society, but I would register all savia and intro-used for brouding purposes, and in this sonnection I may may that it can be done very elemply. In following and the registering of mures would cost a great deal of money; I believe you have all the machinery at hand, and it can be done at a minutes a cost. Sessions Clerk, just the same as you register slope and the revision could be oven to the unlike I would remiter all sires. Civilentales, Hockneys, and thereaghor thoroughbreds. I would have a register in every district of the sires and moves a that register would he corn to the tarmers, and they could see whether the view word resistered with a vaterious cartificate on not, and they excid see whether they were registered with the Borel Duldin Society or not. At account they have no mount of knowing whether the horse in The Dunlin Somety have at least 25 per round or not sound of their houses registered that are musual, and Well, the horse may be arreored. I know several-I know degrat—that are registered by the Society

are. I would also register all the produce annually of 5507. You mean you would knep a sort of studbook I Seep a stud-book in every district, and then the Circle of Petty Hemiore seeds incur a carifforta

that the more was served by such and such a hope and a certificate of the produce. 505d. You would leave it to the breeder what sive he would select !- Exectly. I would register then in every district, and the favore could are was the borne sound, and who signed the certificate, and the data Take overy home and register him in that district. 5550. Bed then wen would been it to the bessder altogether to select shores and breed of horse and expectation to Expect to 1 world not confine have at all. At present he is altogether in the dark : he does not know whether the horse is nound or not; he simply

5160. Are there ony eart sizes in your district !-6161. Or Hackney sires?—No. My father introcheers a Flackmay about live years accome small over

short 14.3 and it only got tix mare; they would not have it at any price. About thirty years ago be introduced a Norfolk trotter, and had to get sid of it; they world not have it at all. It is altogether a hunter-producing district, and breeding harness colts for Mesara, Windrash and Messer, East 5542. Mr. Frrawithian .- Do you believe the stal-

lions you have now in the country are the best colonlated for producing those 1-Yes. 5363. Thoroughbred or nearly thoroughbred !-

Thereughbred altogether. sufficient. The best sires we over had were light weeds sires, with very little bone. Old Victor was a home Extraordinary bone. It is the mazes, not the sizes: the sires are good enough for anything. It is the menes of the county you want to improve, not the

nee.

- 5005. You must improve the may through the sire1-Well, keep the young mares-that is the way to improve them.

supprove succes. 5567. In not the object of giving these prizes to induce the kerling of marce in the country as good Ference gardens It seems to me that you are object. ing to giving an old mare a price; surely, if the las tornel out a good brood some it would be a mod haved many I certainly would be inclined to give her a prize, and if she be a good broad mure the farmer won't part har at any price; but I knyw one more that won first perso in Dublin; she has won several times in the County Lieuerick, and she is not worth a button, and her produce are the most worthless bentes that ever were bred

5568. CHAIRMAN.-You have to give prizes accord ing to shares; it would be hard to guard the coulst -Exactly; that is why I say keep the young many in the country. I have beard it urged that the Country sion would buy up the old hunter mues, or trum meet, or artillery reares; well, my experience of breeding is and then now she is good for nothing but breedingand she is not oven good for that-and after a few years be gives it up, and blames the stallies. The young stares are the proper ones to breed from, and of you can know them in the country you will receive the breed of horses reaterfally. 5069. Mr. Whister.-You think, then, that the

fools that are hard out of a mare draing the fool veried of her life are the heat i-For and away the 5576. With regard to your suggested registry, have you thought at all how you would outore the restater ing? Do you suggest that a law should be made that

a horse chenic he registered, like a degi-Exactly. Make it an offence not to do so, punishable by fine or 3071. Would you gut on a fax, large or small 1-I would not on a tax . I would make it compulsory on every man keeping a size or more for breeding pur-poses that he should regreter the pedigree, and if he fulled to do that I worse have him fined or possessed

Then in after generations you could go back, sad if there were a Clydesdale or Hackney cross you could go 5572. And when you registered them the first time, you would have an full a description of the animal or book, and the trouble of the Petty Somison Clerk, and has to take it as presented by the Raval Dublin

that could be covered by 6d or 1e, for such one.

5573. And if you could keep up a religire like
that, do you think that dealers would give more money for the minute !- I on more they would. I know a case where a dealer bought a horse from a fittend of mone on the 12th of July, it was a trapper, between that and the Dublin Show he had it done up and docked, and he get account price with it in the Light Weight Hunter Class with a logue pelligre from two of the heat ares in the south of Ireland, and the mure had not a tore at all-nebody knows who it

\$675. You think that is not an encousage event that homes gain in poligree as they go up from Limerick to Dublin !—There are a good many buggs poligrees, and I think the Royal Dublin Society should group out a yealigned for publication in their cotalogs: without the brooker's name and address being known. 5575. You think whatever horse it might do at first that it would be very much wiser to face it, and have nothing but porning padigrees I—I think so, and the 5556. And they get good bone in their preduce !simplest way is by registering them in every district;

Nev. 20, 1806.

was have all the machinery at hand, and you will have no trouble but to some down a register, and the Check of Patty Sessions could issue this cardificate of pedigree, with the marks given at time of birth.

ALIR You think many of the horses on the register of the Royal Dublin Scooty at present are not sound ! _I know it. 5559. How would you have their soundness decided,

would you send down a vet from Dublin, or allow the men to select their own yets. !-! am afraid it is almost impossible to test a horse for soundness; one of the best veteriously enrycons in Ireland and he never new a sound horse yet, or, in other words, he

navar saw a horse he could not spin. 5580. How would you remedy that state of affairs I ... I would register them in the district, and let the formers see for themselves what certificate they held.

what they have done, who signs the certificate, and the 5581. You would not require any special examina-tion by a central body !-- No. because I know the

figures in our district are some of the keenest judges of a horse, and they can pick the sizes to ami their maren; I know one small former who has travelled the County Cork looking for a sire, 5582. Are they keen judges of vets, tool- Oh.

they know the vota, that is why I say when they would have the vot's certificate, and the date of is, they would know what reliance they could place on it 5583. CHAIRMAN.-You say you got some of the

best houses from these weedy sires, don't you think the land hee something to do with that !--! think it has, for in the County Limerick we grow some of the biggest men, and biggest houses, and biggest bullocks 5564. Have you only more suggestions to make to

take away the Queen's Platon, you have sownetown Queen's Plates given to racing every year, that is \$1,700, and those Quenn's Plates are usually won by some or two racing men. They are given for the im-provement of the breed of houses in Ireland, but they are no value. I think, as a means to that end. In 1503 Mr. Linde won seven, in 1804 he won ten of these, in 1895 he won eight, and, I am scory to say, in 1896 he only won two. He won twenty-even out

of sixty-eight plates in four years -that is 63,700 5585. What would you suggest to do with that, use it to help to make a registry of sirest-Either that, or give it to the different county shows. If £100, the value of one plate, was given to Limerickfor in Limerick we have been losing money for years

sizes the show was started; it is the same in Cork, and I believe everywhere clee-if that £110 was given as prizes for young mares at the different shows. I think is would be a great means of inducing the

formers to keep their young mares and exhibit them 5580. Do the farmers send their mares to the M. Harris Royal Dublin Society's more shows !-- Yes; it is not availed of though as much as it ought to be. 5587. You don't remember the number of mares

that put in an appearance !- I was at Bruff Show this year. I judged at Emis Show this year and last that year. A junger is knim care this year were for pear, and the maces shown there this year were for better than the case shown has year. I believe that is because the farmers saw they had not the alighten

chance with the rabbush they brought there the year 5588. It has done good in that way t-It has done good in that way. Then the class at Earlis was con-

most to mares under four years. I was very glod to see them doing that. 5589. In the County Limerick !- In the County Limerick; Mr. Fitzgreald has told you all about that.

I agree with him altogether 5590. Is there anything else you want to say !--Just one thing. I was emprised to hear the Con-gerted Districts Ecard's stallions had covered some-

ing like 100 manus last year. ISB1. It is hardly in your district !—I don't know whether it is a fact or not, but I think there is nothing so injurious in horse-breeding as an overlone \$550. That would not refer to your district -It

does refer to my district. 5583. You are not in a competted district !- No : but as to stallions being overdone, I have known several stallions who in the first season got extenordinary good fools, the first crop of them. There

the owner of the stallion would not turn away any mazes, and some of the house covered as many as 12 mares; their produce afterwards was utterly worththe Commission.1—There is one matter. I think if you less, and I think you should device some means to prevent stallion owners allowing more than sixty or seventy mures to their horse.
5504, Mr. Wanson.— Do you know as a matter of

fact that Hackneys are alle to cover a much larger number of mures than other horses !- I think a horse if you let him will go on covering for even.

5505. Do you know that stallions in Yorkshire wer 100 mares in a year, and some of them 110 1-

These are travelling stellions. 5506. CHAIRMAN.-You mean to infer that if the stallions are not limited the program is infusior after a hit !—Unless they are limited.

5197. Mr. Wrance ... What would you limit stallions to as a rule!... Not more than seventy. A stallion getting 200 mares, which I have heard of, means at least 260 covers, and so the covering season.

is only three months, it is at the rate of four a day. The Conscission allowred to next morning.

Nov. 27, 18.16.

ELEVENTH DAY .- FRIDAY, NOVEMBER 27vs, 1896.

Present:-LORD ASSTOWN (in the Cluir); LORD RATHDONNEL, THE HON. HENRY W. PROPERTY MR. WRENCH, COLONEL St. OFFICEN. MR. HUGH NEVILLE, Secretary,

Ma. R. E. Going.

5598. CHARRYLY - You live in the County Lime-

rick !-- I live in Tipperary, just on the borders of tho County of Limerick. 1000. You have considerable excessioned in horse breeding 1—Yes.
5500, What closs have you chiefly bred yourself 1—

Half-bred hunory-that is, hunter mares, crossed 5561. What do you call hanter mores 1-Marce with a complete groups of the coughbred blood. Some hunted, and have proved themselves good hunters

That is the class of mayor you breed from !-Yes, and I have also bred from east mares-at least mares who have been drawing carts and doing farm work - and I have been occup or twice from Cluderialo work—and I have bred case or twice from Clydescaso stallions and good marss, and I have also bred from

5563. With what some !-- Thoroughbred sizes. 5564. Have you bought any horses!-- Yes, a conriderable number

5565. At what age do you chiefly buy 1—Four ears. I have lought younger, but, as a rule, four. 5566. What do you do with them i—Sell them aga/a. pois. 3567. What also of horses is chiefly bred in your district 1-Well, they aim at breeding hunters.

small farmers, I don't think, have any very clear idea ay to what they are trying to kreed. 0368. What class of horse is most suitable to breed in your district !—I clank hunters—high class bunters and carriage or harness horses.

5169. And what class of mares 1-Hunter mares. 5570. Do they work the mores, or do thry keep them simply to level !—You mean turn them out in the field? As a rule, they werk them, but some farmers keep there simply for leveling. 5571. What sives do they obtifly use 1-Thorough-

bend street 5572. Altogether 1-They generally do. The formers that aim as breeding the best ligures only broad from thoroughbred sizes. Of course they may breed from beros with a slight stain. The smaller farmers breed from half-breds, and a large number of them besed in a hapbanard kind of way from anything they got

cheep.

5578. Do they breed from two-year-old fillies 1—I don't think they do stuch. I don't think in that country the two year-old fillies would be shie to breed; they are underfed. 5574. You don't approve of breeding from two-

year-old filling !- It depends altogother on the country where it is tried. If it is tried in a very rish country Where it is trad. If it is men in a very rish county

-Kildsee or Meath, or in a good part of Limerick...it
may be very successful, but not in the North Riding of Tionerury. I don't think the formers feed the filless enough to make them able to name a foal 5175. Do they take any trouble about mating the

sire and the more together !- Some do, but I think anywhere out of a hearing country they breed more or less in a henhand way. They are not raises of the horses they send to, and they do whatever the next rian may tell them. 5576. Are they influenced by the lowers of the for 1-The lowness of the fee! Well, the small farmers are guided very largely by the lowess of the fee, but I know some farmers who are quite reedy to pay

Mr. R. E. Goine, Cragg. Newport, examined.

£2 10s. cc. £3, and I know flymers to give as high as £5, but I think that is the outside that any of them would or could go

5517. Do you know do they breed from out or draught stallions, Clydesdales or Shires !- No. I dealy think so. About Lower Orenced part of Temperary, of which I know also a good deal, they have a gost of ball

breil Clyllouisles there, 5578, In the scheme of the Reyal Dublin Society perating in your part of the country !-- In some part of the districts I know it is. 5579. Has it token on at all f-I don't shick it has

done any good. I think the district is too remote for is to do much good. 5550. Do the farmers send the marry to the shows

-Well, I believe they do, but I don't think it does much good. I don't think it is sufficiently used to have any great effect for or optimat.

5581. What breed of stallion do you recommend

for that elatrics !- Thoroughtord error. I should not eleiers to a warm shight stain. I woon if a horse is to eligible, such a bosso as Mayboy, or Lawyer, lift Garry, or Reliable, I would not object to such horses, Gewz, or Estavas, I would not expect to some rown, but, as a general rose, I recommend theroughheeds. 5582. Would you allow the hilf-bred borses you

none amonest the resistered sires of the Royal Dubbs Society !- Yes, I would not object to their bolis registered, but to the ordinary half-brod sires, what is generally called half-bred sires in the country, I week 5583. The mongrel half-bred I—Yes, to a thorough bond horse with a stain who is not eligible for entry as

a thoroughbred, but is to all intents and purpose thoroughbred. I would not object. 5554. Do the farmers sell their best mures, or de they keep any good mares in your district !-- They sell 5555. If they can get the money for them 1-Yea.

5586. Can you seggest any way of preventing the fermers from deing that i—No, I don't thick it would be possible, I don't think if a ferrory has a more mufficiently good to keep hur as a heater breefity mare, I don't think he could possibly refore the price that that mure world be worth. I thank if he is that that more would be worth. I think if he is refuse that for a more out of the collar.

DIST. There is no solvens that you can suggest to

tompt the farmers to keep their good marcs 1--Ket to keep their fillies; I have put on paper some suggetions that have commend to me SISK. Will you kindly read them 1-Reading-SCHOOL TON IMPROVED THE BEST OF HUNTER

IN TARRAND *1. That Iroland being possiblely suited for the browling -L. Anna archard being possissive succes for the treeming and training of high dass business and harmons howers, and training of high dass business and harmons howers, the state of the production of these cleanes shown. 2 That good brook mores are seach needed in Irohard. 3. That is absolute to try to induce formures set to sell their been filled. begoins to try to indust formers set to sell their best filler, as no farsare could affect to traffices the print there more see worth. 4. Thus Government should shift the traffic second poster range of a really lagh daw, norther second poster range of a really lagh daw, norther second poster range of a really lagh daw, norther second poster second poster second to the second poster second second poster second distriction to forecers by reason of ional constants extending to. That the mares be paid for in tenthants extending over ton y secon. This factor to give accounty for the

usney. 8. That only Irish bred marca be bought for this Programme and a second 7. That arrivagements be made for placing manes work with Januaru high to offerd didu bound states. 9. Thus, a regainty of manner he opposed, and all supposed broad marries one in Tepland, together with those to be bought, be control therein. 9. That those public of time to rega-tion of the property of that a higher standard of excellence he adopted, and that each very the loast pool signs be married from the register. 16th That is been with a stan-tage of the control of the control to the control of the married from the register. nances from the regarder. In I have a series with a season in his pedigree but having proved hennelf to be a good size or having run well on the torf, be slightle for regionaries. II. That the fee processed to be charged for each

matter we appeared of by the Dablin Society, having regard to the circumstances of the farmers in that district, and that the society pay helf thes for for all registered mares going to the stallow. \$189. That is your soleme. You say only buy hisb tend mares, but if you go to buy mares in Eng had at would be very hard to say that they were Irialtred mares !- It would be very hard to be absolutely tred mares -- It would be very fard to be absolutely cortain in overy case, but I don't think it would be large dealers. There are several big dealers who hay a good many hunters in Iroland; I think they would be very buppy to really honoutly assist in anything in the way of gutting to know where these mures went to. If for instance, a more was broken down, as is often the case in the first season's hunting, I think the dusters in communication with a central society would pick up that horse for them for breeding purposes. I don't mean old, were out, and utterly broken down szima, but rance that have met with an accident. 5530. You mean that the Government should give an eaten award for the surrely of a heater breed of

would require to be given, but I don't think the maney given in prises does a great deal of good. 5391. You think the present system of giving prises is not working well! — I think the other system would work better. The thiny that really attracts a man in beese breeding is not getting a prize of £5 or £10sed it is only a classes if he gets the price-but in the other one ther own all get colts, and if there sell them. flor are sure of the messey. In the first case is in only a change of grating the £5 or £10 5552. Do you those on to the stallion for that

the farmers would pay a sufficient fee to enable the owner to keep a good stallion !—I know in a good many districts in the North Riding of Tipperary garerolly I don't think it would pay to keep a good stelion for the free that can be got, and that is the mark I am talking about principally 8593. That is why you mention that a certain pertion of this fee should be sunded by Yes, but at the men time I think if those formers had better broad

mares and had sold good coits it would encourage them to give bugher fees, but then of course that is looking a good way into the feture. 1034. Mr. PITTWILLIAM. - What fee do you think the farmers in your district could be fairly expected to pay for the service of a good stellion !-- I don't think it would pay a man to import a really good theoregibred stallion and keep him for mares under

Gree glineas.

5517. What do you think in the market, either mare in your district could be bought for-have you found any idea !- No, I have not, because I believe there are very few classes of unimals in which there are greater variations of price than in stallions. A stellion worth very hittle as a race borne might be got

very chasp as a hunter sire, 5516. They are very cheap just now !--Well, I don't think a basi thoroughbred stalkin would be any advantage, 1607. You would not object to a well bred balf-lead

etallion 1... No; a horse with a stain. I know some of them who have got extremely well. The horse "Mackintoch" in Limerick, I was for years under the

improving was a thousandhead has he is not and he gets extremely well. 5598. He is not a thoroughbrod !-I was for years under the impression he was, and I would have gladly sent to him as a thoroughbood.

5500. You would like to see the money spent on many, to a certain criteral that is used new in oth-

sidising stallions on the understanding that the stallions serve a cortex member of maron at a low fee !- Well. I would look, I think, to the mares. The mares are the main point.

5600. You thick the mures are the main point !--

I don't think the stellions, no matter how good they may be, can do much good in the country unless the storylard of the mayer be been up

5601. Do you think looking at the small amount that is now distributed for mores that the servere nystem is a satisfactory way of utilising the money than is available?-I connet say that it has effected nov district much but I have heard that it works well in

5603. Should you be afreid of the blood of the Harkney or Cleveland stallians which stood in a district adioming yours permenting your district, and do you think that the cross so produced would eventually do barm to the broad of bouss 1--Oh! I think they would. Possibly they would not come

an aires. DiOJ. No. but if they came into the district as helfbred mares t-Well, I would rather they did not some in, and I think it is very likely they would come come in, and I think it is very likely they went a con-in. I know some years ago an effort was made by Scotch fermers in North Toperary to bring over Chylealds and Shire borsa, and they heat a good many of them, and I believe they did a great deal of mischief. The first cross was undensibily a beiny beside marm in the country !-- I suppose some extra great mare that nebody could mistake. Generally, they grossed with a theroughbred and then they get a condlooking horse, were nice to look at until you went to ride him, then be abut no and was always a cor. I am the Dullin Show by the man getting haves on the lines I have mentioned. They have been brought up and trimmed and look well, and on Englishman buying one of them there says after he tries it "These are the Irish bunters we bear so much about," and the wrotehed brotes shut up. Very good-locking horses wen grism at the Dublin Show and they were excensively had buntors. There are three cases in my mind of excentively bullhunters and yet they have won prices egals and again at the Dublin Show, and they looked quite decoyving of the prizes too. I don't think any judge could have passed them over in the runany juage could have passed ment over in the ring, and at the come time they were extremely bad

> 5604. Then you believe it would be a dangerous experiment to introduce any foreign blood into Tenbood that had not a strong admixture of thorough head 1... I would revier not seeing it introduced for

5403. Mr. Wagiyon.-In sower to the last quor sion you stated that you would profer that no blood should be introduced into treland that had not a strong admixture of thoroughbred! Are you aware that the Yorkshire Hacknere have a strong admixture of thoroughbred blood 5-I was not speaking

8506. I know, but Hasknows were referred to understand that you do not reagself know that Hackneys have a strong similature of theroughbred blood 1—I do not.

1607. You don't know much about their breaking?

-No. I do not. 5408. Do you know whether the three herses that

turned out so bedly, that were really ted hunters and get prime at the Dublin Show, had much Clydesiale shood in them t.—I have a strong corression that two
of them had. My impression is that the bosses were not heed as they were stated to have been lead.

COMMISSION ON HORSE BREEDING.

5600. That is not an uncourage thing !-- I don't pe., E. T. I should my not. 5610. You could not detect it by looking at them? Grieg. -No. I don't think I could. That is where the reincluled lies. 5611. Therefore homes may be beed out of a Clydesdale and you would not know there was each

180 Sec. 92, 1985.

> a strain in them !-- I believe they could. 5612. In those suggestions you have made, in the first of them you say you would only give State aid to those classes of bornes that produce bigh class hunters or huness horses !- Yea 5513. You would give no State aid to small farmers who either because of their circumstances or

land could not been good bares !- I don't think so in the case of the very small or very poor firmers It may be worth his while to breed pole penies, but I scally don't know much about pole ponies-in fact I know nothing at all about them -- but I don't believe

in the case of small farmers it would ever be worth while to amist them to breed bornes 5614. Therefore you would not belo them at all ?-I would, I think, sasks them to breed proses, but I would not assist them to breed barses. I don't think it is in their interest.

5615. In No. 3, you engreet that a registry of mares he opened, and all approved mores now in Ireland, together with those to be lought, be entered therein. Have you considered when you opened the registry less you would work it - Well. I don't see why it should not be worked on the same lines as the registry of stallions is now worked. I believe the way it is done is that an Impector is sent down, and he makes a return of the stallions inspected. 5516. Would not that be a bugo work for the

Dublin Society to undertake to register the samber of good wares in the country !- No. I think the xarges could be collected at the shows, and they would send down an Impactor.

5617. Would you propose to leave it to the central body and not to the counties ;-I think they should work through the county committees, but they might send the Inspector down. Of course these are matters

5518. I thought you might have considered the detailst—Well, I have. My idea generally would be to collect the mares at the shows, very much as is done for the prices that are riven pow, and if the mare was known to have bred good colts it would be registered 5619. In the first instance, you would register them by appearance !- Or by having level good colts. I would be cleary about registering any except high-

eleas opes.

Ma. IS C

5690. In the registry you could obtain particular of how the different marcs were beed I-Yes 5621. They would be recorded in the books kept 5622. If a registry of mures were adopted, would there be any danger of massitable blood getters in amongst the brood maron of the country 1-After registering them I 5623. Yes .-- Well, I think the registry would not

prevent unsuitable blood creeping in 5624. Could not it be traced then to It would uplify the tracing of it.
5035. Having the registry established you would be able to teace the breading of the animals!-- I then

5626. Do you think it would put up the price of surmain of that class if the douler or layer could tell how the particular animal was bred! I or take think if the danier was absolutely sure of the breeking of the animal he would give more for it.
5637. Do you think it would put up the price of hunters in Ireland !-- I think a great runy boson

would fetch higher prices 1628. Do you think that a good deal of general information given as to onizals in the estalogued the Dakin Show is not absolutely reliable?—Will I don't see how it could be absolutely remove.

I have seen in the estalogue "breefer unknown,"
"pedigree so and so," and how is the exhibitor to

5659. And do you think if the breeding of the mares was registered the pedigross could be tessed !-5030. CHARLMAN.—When you formed your recisive of marcs would you register the produce of mares 1-Well, that is forming a Hunter Send Book.
5631, Would you do that 1-I think it weeld bee very good thing to do.

5613. If you did not do that you would not go any further !.... I don't see any objections to doing that 5433. When you had formed the register of more and register of street you would be in favour of extense the produce of those mores by registered sizes I—Yes, I would; that is very much on the lines of the Hunter Improvement Society in England I believe.

5134. So that there could be a grammatest pedigree given of these horses !-- Yes 5635. Mr. WEINGE .- I want to ask you one more essection—you think that the first stee in improving the orses in your district is improving the trood mares !-Unquestionably, I don't believe it is possible to work it altogether through the sires to improve from a vity bad stock, and I believe the registration of mans

upply the London job masters principally.

would do a great deal of good.

Mr. E. C. Winter, v.s., exercised. 5636. CHATEMAN,—You are a veterinary surgeon and live in the county of Limerick !—You. half good bequeen colts; it is one of the districts that

1637. Have you say personal experience of the bracking of horses i—Yes, I have bred none horses, and my father bred horses, and my brother is still 5514. Have the farmers got good marss as a rule!—In arts of the County Limerick they have, in the County Clare they have not, in parts of the Counties Cork and breeding them.

1638. What class's—Hunters and high-class barness Kerry they have not, and in the extreme went of the homes and couch borges.

5653. What sirre do you use !—There are various sites, there was a sire, "Prixos of Pere," who, I am surry to say, did a let of harm in the district.

5640. Were they thereughbreds !—Yes, with one 5641. You have bred from half-breds !- You, and with very good results.

5642. Is the climate and district in your county suited for breeding horses !-- Very well suited ; it is

5545. What is the general class of horses bred about

that district !-- I should say buil brater colts and

County Limerick they have not good mures, but round the Limerick district and towards Cork, in the Golden Vale district, they have very good mares.

5645. Taking shem generally do they feed sheer bung stock well !- They do not, and I think if any inducement could be offered to them to improve their young stock in the way of premiums for fonis, yearlings and two-year-clas it would be a step in the right direction, they starre their horson, anything is good exough for a boxen, because it is a dairy country 5146. They give the cown the best of it! - Yes, and they not the horses where the cows won't do-6647. Do they work their brood mares 1-Yes,

who are mable to work, broken-down hunters and booken down steeplechase mere 1618. Do they keep their foole when they have a g od fiel! I-I am sorry to say they do not, they go away at such farm as Spannil Hill, Cahirmon, we see de year going never every year of three and four-year-

1619. Have you ony way to suggest for keeping then from going away 1.—The only way to suggest would be offering brites for three, four and five-yearald mares, atlated to a horse or in foal, I believe if riev retuned them to five-year-old they would see the adventage of it sail keep them altogether. There is a forested to a surveily in the fact that the best of our same are sold at very small prices, I don't agree with

the last witness that you can get £60 or £70 for mares. Theliere there are excellent mares sold at £35 to on abroad mares excellently suited to breed from and mores three parts thoroughbrod.

5630. Do they breed from two-year-old fillies at all ? -Not much, the fillies are not well kent enough to escourage it at recession. 5051. You would not encourage it I.... I would like

to excourage it. I think there is money lost that was 5650. Are there ared sires L. There are assertal good sires and several very bad ones, but I am herey to say the latter are being done away with recolly.

5053. Do the farmers mate their mares well !--A snot many of the more intelligent furners do, and do act consider coything hat the moting, but they would not be 25 per cent, the fee is the main consideration with breeders in the worth of Traburd. 5054. Do you think there are a sufficient number of

sizes for the district !- In my immediate district there are, and good sires, but in Clare and Kenyy, and West \$655. Do you think the fee of the enod size is within the reach of the ordinary small furner 1....It is

not, it is too high to want consu 5400. Are the becree now as good as they seed to be or are they deteriorating !- Do you mean if they pioce as many good celts as they used to. 5637. Take the average class of horsest-The

average class of horses of which you see the rendace in face, the produce is worse, decidedly worse 5658. In there any reason you one give for that !there was a boom in the horse tends, people beed from enything and everything, and their sole object was to

protoco house, latterly the price for the average har-ness horse, and cobber, and busser, and transper, has gine down in prior nearly fifty per cent.

5659. And with that class of houses the price of every ordinary horse has sone down 1... Reserve the demand for those used to grade them hav sometimes

even a superior class of breses to put in their places when they could not get what they wanted exactly, and I believe the crice of that civils of horse will sedown still lower. 5800. Do wen think it is carsed more by breeding from had manus than from using had sires !-- I believe

Are there many half-bred sires in that district !-- There were a great many matil the Royal

Such its There were a great many matri one ruly in Dublin Society began to register horses, and then they were done away with ; the Dublin Society hall-marked ecrtain burson by registering them, and a good many of the half-hred horses which did good in the country have been done away with. I myself have been the cenze of doing away with some fifty or sixty in the Scoth of Ireland, and some very useful house.

1662. Did they get good stock?—Good saleable colis, saleable harness and hunter colts. 5663. And yet they have done away with them !-Yes, because they were not patronised, it does not pay a men to keep a stallion and get a dosen or twenty mares for him; there has not been half as much bread-

ing in the course in treasurer were not not account of the before, farmers have given it up.

5664. If these half-fired sires got good stock why were they not patentical t-Many farmers gave up

5065. Do you approve of the Royal Dublin Society's Scheme i-Not in its entirety, I believe they have teleen a step in the right direction in registration, I don't sureove of subsidisting stallions, because it has

5066. How do you mean?—For instance when the Society paid half a registered stallion's fee I have known cases were that was the only money paid to the stallion owner; and they were glad to get it. I have known horses bought for £40 and £50 in days gone

5667. In those days the horses were not registered? -Yes, they were, they were shown here and awarded emiguet. I call it registration

5668. What scheme would you suggest !-- I would surprist that if practicable every stallion of every acct stullion of every breed in Ireland be registered, and

5669. You would insist on their being sound, would you?-Decidedly, I believe that has been one of the curses of horse-breeding in this country, breeding from manuful stock, not so much stallings no marce

because if it gets shroad that a stallion is unasured recale will shop him unless he gets notoriously good 5070, You think there are a number of nesound mores in your district 1—J know it. I live on it.

567). The young stock are more usedend or are they getting sound 1—I think they are improving for the last three or four years slightly 5672. Are there any other sires in your district

bosides half-bred and thorough-bred 1-There are a few nondescripts, and there used to be a good many more.

SETA. We will call them half-breis, but are there any other pure-bred like Suffilk Punches or Hackerys!

—There are some Hackney sires, there is a Hackney sire it Circs, and there is a Hackney sire it Circs, and there is a Hackney sire at Guisa Coatle. I don't know whether it is in Limerick, Cork,

Coats. Idon't know whather it is in Limerick, Osek, Tipperary, it is near the whole three. 5674. What is his name!—I cannot tell you, he belongs to Mr. Abel Buckley. There was a Hacksay tire called King of the Forest that stood at Kilvadland think, and there are some Harkney horses in Galway bink, and there are some Harkney horses in Garway.

5675. Have you seen the stock of King of the
forest !-- Yes, I saw the feals who were very pretty; I thought the yearlings were not as nice as they should ba and I did not like the two-year-olds.

A676. They deteriorated such year I... I thought they I have neen none very nice Hackneys, hat they have been exceptions, one in a hundred, and I don't believe in the half-bred stalling. 5677. You don't believe in the cross between the Harkney and the ordinary Irish blood mare! ... I do not

2678. You advise the formers to beed invises and honter borres, when size would you use 1—They are the only honse that will pay, and I reconstrued them to get big-boned thoroughbred effect if they cannot get them. I would not observe to a half-tree size if new a second than the contract of the contrac hoese with three-cuarters English theroughbred blood

5679. Von are in fever of recistering mares as well as sires !-- I should like to insist on it if possible. well as sires 1—1 should live to insist on it is positive.

5680. And would you register again the progeny of
those marcs 1—Yes, like individuals are registered,
register the borth of every foal and keep a record of reguser the birth of every feel and keep a record of it, and have that record available on the payment of a small fee, 6d or it, by saybedy who wanted it. 5481. Mr. Frezentziau.—Dow't you think that mode of registering wealt cost a great deal of stoney; —I think it would be a very steple metter by insisten-ce the owner; of skillions expelleding the service of every more who comes to them, there is no used of No.17, M., bethering with mores who are not served, but where Kr. Z. C.

Agreemence a great many of the funerent level at loss bassed.

56:5. Mr. Fivewellam.—You would make it dispatory on the owner of the house to see that avery mass that came to his loss on was registered 1—Yes, if possible I would, it is one of the means I suggest of design is, and I believe it is the only mean, und it

would be able increase to do it and its show the best possible record.

From the record.

The property of the property of the price of second data brees had goin down, do you think that second data brees had goin down, do you think that we not do the other best of the property of the price of the going the price of the property of the price of the going the price days of the price of the price is a good measure to the importation of American the cold tends, owing princips, to the introduction of hereign peak horses shave good after very units, do that the price industry of the price of the of this executive points was an exercise number of and an attention number of from force, but over that they are single destroit reaction these brees that they are single destroit reaction these brees.

6577. I was agging to ask you that opinion too, the
would you take the opinion of these man who bread
in this nort of we y; we are told they go to the choosy
before, and very often go for a giass of whisky. Do
you think the opinion of these men who do that its

5636. Whose opinion would you take !-- I should place the greatest relatines on the dealers who buy for Mesors. East and Winnesst, and Mr. Withers, men who used to go to Yorkshire for their liceses, and had

to leave it and come to Ireland 5589. Why did they leave it !- Because the blood was too soft, and they had to leave & They ell state that. I have spoken to meet of them, and read letters

written by them. They want a horse with as unch thoroughbred blood so they can get, 5700. How do you account for the Yorkshire blood getting soft !-Owing to rosing Cleveland and Hack-

570). Yorkshire and Lincolnshire were framenly as celebrated for their hunter stock and staying powers as this country is !-- You, and they take them from hore now. I know Yorkshire dealers who take 100 brises a year, several of them come over leve and buy them. There was one uses, who died a couple of years ago, and he never has taken less than 100 hanting colts a year out of the district round the

Gelden Vale, and from Spancil Hill and Caldrage, and other fairs. 5702. Then it is your idea that if foreign blood is introduced in the breeding of those Cleveland Bays, Eackneys, and Clydesolales it will bring this country into the same condition as Yorkshire and Lincoln !-believe so. If we can retain the best we have not we

can do far more good than by importing anything. If we can induce the farmers to keep their mares, and I tirisk that can be done. 5703. There is a question that comes in with regard to Ireland, in dealing with the whole country so different, the central portion calculated to breed a high-class hunter or harness horse, all the copabilities, it has got blood and stock; then

there is the congested districts, all the fringes, and there is the necth where they cannot prodoes that animal, and appearently neither the soil nor the animal they have there at the present accept is suitable for the production of the hunter. Gen you suggest any means of helping the breeding in those parts !-- I don't believe, to begin with, they should breed horses at all. They have not the land to year thou on; most of those are usuall farmers; they have to sell their horse as a year old, no matter what he fetches, because they have no room to knop him, and they want what he makes. I believe it would pay them better to breed cettle; they should not breed horses at all. I believe it is a deaperous experiment bringing borses into Ireland because the farmers in my district go to

fairs near the congested districts, and hay their stores there, and bring them into the country, and once you get the 'clood into Ireland, it is not such a big place, they will go through it, and it will take years to eradioate, and will give the horses a bad name. I believe the place is too small for experiments. \$104. You look upon it so possibly a dangerous and expansive experiment !—I do, and I have seen the ill-effects of it, going through the small country fales now and seeing the things they bring in, nondescripts and useless for anything; some years ago they night have done as vanness or can horses, but there

is absolutely no demand for them now, you cannot sell them, they are hawked to a dozen fairs and the owners are not asked the price of them. \$705. Not only have they lost their staying power but they have lost their make and thaps i.—They have lost their moke and shape as well. The few cart

horses we had in our country have done incalculable 5706. Have you seen any powerful draught horses bred anywhere in Ireland from the Shires and Clydes-

dales !-- I have. 5707. Roally hig powerful horses 1-I have, and there is no market for them in Ireland; I have known that their owners could not sell them in

5708. And you think they could grow that clusof house if it was required !- They could, decidedly, but I consider it is a dangerous experiment letting then into the country, I have seen crosses with a good deal of Clystenials and Shire blood in them, soft brotes, they have gummy legs and bad flat feet, and they are a deligate-constituted herse and want staying ower; I have riskien horses to bounds with than cross in them and they were not worth riding, I

would rather ride a thoroughbred acrew not within three stone of my weight. 5709. You sucke of the high class harness horse that Meurs. Wimbush and East and thou big London dealers require, and that they formerly got of the old Youkshire and Lancashire stock, how is that horse got

and what class of home in that, what do they call a high-closs carriage horse, those dealers?—Well, he is an arrived that would make almost sa good a hunter as a harness horse, I have known dealers to take 100 away at a tuce from one man in my district. 5710. At what ages do they hav!- Three and four 571L. What prices do they give !- As high as £70 purce, comotimes bigher, I have seen them give £100. year-old, rising three, and as three-year-olds, and held

until they are coming fore, and hought at perety low prizes, held over for a year by men who make it their haziness to cater for these hazness herse dealers, and they are taken away, 50 or 60 or 100 at a time by these men, and the lowest price as a rule that these men pay is £50, and they pay as high as £100. 5712. How are those horses as a rule hand !-- From the good old stemp of hunter mare and the thoroughhred borse as a rule. 5713. Where are they chiefly bred !- Bound Kilmallock, near Limerick, Topperary, and that district and in north Cork, a good many of them, I know several farmers who buy them with the chiest of selling them

again to the London johnnasters and make a pretty good thing of it too. 5714. But they are all bred on the lines of the thoroughbred hunter stock with the Irish mare that is in the country !-- Procisely, it, as a rule, is a home three parts shoroughtered; they are heed on the some lines as the hunter, and the jobusaters say they are the best horses, they can get more work out of them and they last longer. 5715. Have you any idea of what becomes of the

very inferior class of horse that one sees in the fairs. that one cannot understand to what it can possibly be put !-- I often wonder where they go to, they pull possibly conteresets and the poorer class of tradessace a vans, and the farmers take them home themselves and use them to breed from, nimply because they esanot sell them, and they have a wonderful trust in Providence, they say they may get something out of them

5715. Even if they do sell, I anypose it is a ver unpremungrative price !-- It is a price that a calf would have made as a yearling, they had swooh better have out their threats the day they were dropped, many of them, for they feed them for mothing, they got a little work cut of them perhaps in the spring, and hawk them to a dozen fairs before they are asked where they

are going with them.
5117. Can you suggest any way, because that is the curse of the country, any way in which that could be neutralised !—Stamping out would be the best thing

5718. How would you stamp them out !- It is very hard to reggest a remedy, the only thing is to look to the fatero, they will grainably do out, but it would be a blessing if half the brood marce in the country

5719. I presume you consider it is very necessary to

of thoseughbred blood through the country, and that the courtberrd blood in crossed with the blood of what we call half-bood stallions and with Clyckachiles and with Suffile Punches and Shire horses, I fancy we don't distinguish much between them. I am not sware of there being any Hackney stallion in our part

5752. Do they work the mares on their farms or let them can out !- They san all worked, the farmers all work their passes. 5753. And the sisilions in your district, what are they I. The stallions, I think, are chiefly thorough-

hends in North Tipperary, but there are others besides, half-bred and pure-bred cartherses. 5754. And are thy annule to the sures in the district, do you think i—No. I don't think they are. 3755. What class have you's—I keep a thorough-

heed atellion as yeek. 5750. Do you approve of half-breds !- Yes, I think

the half-bred would be a decided improvement, if we 5757. Have you any suggestions to make as to how much blood you would want or any qualification in the horse !—I think it ought to be selected by appear-

sees first of all, but I don't think appearance would be sufficient unless they were tested an some way or other, either in the hunting field, or in point to point meet, or in public between the flags. Supposing n beese had get good stock I should be quite natiofied with that. If a horse got good stock I think is would be the very best test whatever his appearance was. 5758. Have you ever considered the question of introducing the Hackastyl--Not to any very great extent, but I believe it is necessary to have some coss, if you go on using nothing but the thoroughbred seems nort, what that group should be in quellorthing at persons the cross is Clydesdale and to a certain extent the half-herd, and I think if you could improve the half-herd you would do away with the necessity for any other cross, you would do away with the Clydendale and you would do away

with the Shire horse. With the States more.

5789. Is the Royal Dublin Society's scheme working in year district I—You.

5790. Is it doing good do you think!—I don't 5761. Do farmers avail themselves of it !-- To a

5762. Do you think the young steek has improved in the district since the scheme was started !-- I estnot see any improvement. I should say it had not 5763. Would you have any suggestion to make for a change in the adience ! — I should give prices to the horse that got the best stock,

5764. Thoroughhroi or half-bred!--Whateverit was 5765. Would you be in fewer like some of the other witnesses of registering mares !- Yes, I think I should, I think it would give a good deal of trouble, but if it could be carried out I think it would be very desirable. I think it would put down bogus pedigrees to a great extent, which is very desirable.

5766. You mean you could say "Here is a horse bred in such and such a way," and point to the register.

tion!-Yes, I think that would be very useful.

5767. Do you think the horses round your district now are as good as they were some time ago !- You, I

5768. Not inferior 1-No. I could not say that they 440 inferior to what they were a large proportion of them are very bad, but that must always be the result of cross breeding

5769. You mean breeding from a mare of one type and a size of another 5—Yes, two aximals unlike one

another, and neither of them the type you wish to 5770. Do the farmers feed their stock and trent them well i-No, I den't think they do as well as they

coatté to.

5773. Are you in favour of it?—No, I think it stonts the filly, and you are breading from an untred animal which I think is objectiousble. I would sconer brend from an old mare with broken knees than from an untried animal, if I know the old more was a good 5774 Do you think the farmers take any trouble

once or twice.

about mating their mores, or are they guided more by the fee 1-Some of them are very particular about the horse, but I don't think, as a rule, in our part of the country they have small judgment. I agree very much with what Mr. Winter and that I think they require to be taught, a great many of them.

5771. Do they breed from two-year-old filling !-- No. J. and

5772. Do you breed from them yourselft-I have Thomas

5775. You say the sires in your district you don't consider multible for the district I-No, I think there me very fow good sires in the district. 5776. Have you any suggestions to make for broad-

ing Improved stock in your district ?- I recutioned in the answers to the queries sent to me what I would 5717. Will you read it out plants !- Perhaps I

might read the conclusions. I wentere to suggest the following :-- First, that local shows should be held in the spring where prizes would be awarded to the best yearlings, the property of farmers. At these shows let the stock of each stallion be exhibited separately, so as to give breeders an opportunity of sulging of the characteristics of each horse by his prostron. Secondly, award substantial prizes to the group. These shows would be invaluable to breeders for nurrows of communitys. They would not be favoured by desires, who would prefer that the best stock slaught be kept in the back ground until perchased by thera-As n result of these shows I would anticipate then some of the best colts would be kept estire, and thus the pink of the half-breds would be used to perputuse thrir species. I think the shows being held in the spring would encourage the farmers to keep their stock well during the first winter, the most important period of a horse's life. I would shelish the registraperiod of a horse a me. A women necessar was regiona-tion of sires, and as far as possible let each borns aband on his own ments as judged by his stock, of

would still continue. Set, Rosring: in order to discourage the use of rearing sires I would have a register kept by the Dublin Society of all serned winded horses (not being goldings or mares) reserving in public, this list possibly might not be perfect, but it might easily he nearly complete, if the Society employed a veterinary surgeon at a yearly solary at each of the principal training grounds. These vecerinary suggeons would report to the Society as to each horse's wind, a matter which is perfectly well known to every stable boy in the locality. This list would not be published, but any loceder would, on rayment of a fee, be informed whether any norticular horse was on the list during his racing corner. this way breeding from sound winded borses would be encouraged, and an course of time we should cause to bened our half-beed stock from bosses of rearing blood The unsatisfactory working of the present system of veterinary surgeon's exemination of stallions I need hardly remark upon, the plan I have suggested would,

I hops, replace it with screeting more reliable. In conclusion I think we ought to try to based our bunters pure. If we could begin by breeding from the less looking bunting color we should be making a move in the elected direction. The Americans have outshillshed a broad of helf-breils which exp test as fast as our Grand National thoroughbrids can gallop, and there is no doubt we om breed our hunture to any type and standard we please. The obstacle at present is that a hauter galding is generally preferred to n launter stallion. I have already suggested how

hyerders might be induced to keep their colts entire. \$4.00 per Vr. Willem

Had the difficulty not existed we should have had a distinct breed of hunters long ago. But though we might breed cond-looking hunters in this way we could never expect to hring them to a high standard of excellence as regards performance unless they were tented as to speed, orderance, and veight-energing , powers. I entirely agree with Count Leinflorff that it is the test of the winning post which has made the

must be tested similarly if they are to excel in like 5778. In fact you would like to register mares and start a Ragistased Hunters Book 1-Yes, and they would have to be tested.

5779 In your district does the land green good hone or is it inclined not to !- I think the horses in reve district are vaclined to be light in hone; they are very hardy, the land is limestone and it is light soil the horses have wonderful endurance, you never 5780. What sire would you recommend in your district !-- I recommend a good thoroughbred sire and

5781. Mr. Warsen.—How do you account for the

endurance of the horses in your district, do you think soil or climate has anything to do with it?—I think that has a good deal to say to it, and elso there is a good deal of thoroughbred blood running through the 5782. And then you say that all these stallions should be tested !- Might I add I think it is also that the mares are put to extremely hard work and the farmer won't keep a mare if she is not hardy and

thrifty and able to do a long day's work and a severe 5783. Therefore you think it is an advantage breeding from mares that underso a great deal of hard work and hardship !- Yes 5784. And would not the bunting field by the best practical test of these borses that you suggest should be hred !-- I think it would, but I think point to point races might do something besides, it is very

difficult to tell of the private merits in the hunting field, it depends very much on the rider, 5785. First still is would be some test if he did a 5780. Her that I would not look on 5786. Mr. Freewalland, -- You would not look on the first that the county of th the test of the hunting field, as equal to the test of the recourse l-By no means, but I think

the test of the receptures is very often emitted in the theroughbred stellions we use, they are slauply hough by their pedigrees, homes uttoriv useless on the torf and that perhaps never have been tried are used as 5787. But then, sithough they may not have been great many of the mares bred from here never been tried, I think sites and dams were probably tried i... A great many of the mares bred from here never been tried, I think half the mares in the Stud Book have

never been tried, never been publicly tried, pohody breed from a home that had not proved a success on the responses himself, provided he was bred from usrents both of where had been very successful on the

reconcest -- I would somer have a been that was a tried performer himself. 5789. Do you think it is very hard to buy the right 5789. Do you think to be very hard on my me age-kind of throughbred stallies at present 1—I can hardly say that, I should say it was not very hard. 5790. You think you could buy a good also of thoroughbred stallion new st a reasonable price 1—15

is a matter of what you would call a wearnable write. 5791. Do you think you would have to give up to that sum !-- I would put that as an outside sum to give for a hunter stallion, from £150 to £350,

perhaps.

5792. But as a rule are not the most of thethorous. bred stallions that come over to Ireland boosts to very much lens?—I believe for very much less 5793. There are very few of that class of house practically in the country !- Very few.

5194. Do you think it would be easy to fird min. able hunter sires now !- No, I don't think it would they exist as political 5795. As sizes they don't exist!—They don't exist

If you could have your pick of the colts of Iteleof you would have a very fine class of bunite siese or if sould turn the price goldings of the Dublin Show into stallions you would have a very fine broad of hunters.
5790. But up to the present it has not been

possible to get them !- No. 5797. And they would have to be head. Palley such a hunter sire with mares that would be too fee and woody for a thoroughbred horse, what stalling would you use !-- I think the cort horses are certainly

objectionable, I think the Hackneys are perhaps less on then the cart bosse. 5798. Have you any personal experience of Hackmeys !-One of the best hunters I over rode was by a mays i—One of the case managers and I believe in inferior Harkinsy, but I don't think one exception neuron anything. Mr. Welber stand yesterday in proves anything. Mr. Webber stated yesterday be had ribben a Hackmay, and could not get him our the first fance, all I can may is that this horse-and a good many people remember him in my part of the country.—I never now a run too long for him, he was not very fast, but it was not his fault if he was not in

at the end of a love run. he could imm anything but had very laid sotten.

5799. His high setten did not suit his golag !—No. he west close to the ground, but he had beartiful shoolders and never come down 5800. If you could get a suitable Hackney for very

woody marcs with some thoroughbred blood in then you would not chicos. I mean in more parts where you sannot use a thoroughbred horse and caunot have bunter size !-- I have even the Hackneys at the Hackvery Show in London, but there are very few of them one would like to put to a mare. If one could get them one women must to put to a mane. If one could get then like that they would do (producing picture), that is a funcy picture, there (producing picture) is the realist, 0.00. He is not a very well bred Hackney!—He

was a voice winner at the Low-less Shore this year. 5002. I think you said that in the Dublin Show you would give prises to the young stock, no mailer by what sire they were!—I think I said I would give

prices to the size, no matter to what breed in 5803. I understood it was the eteck!-No: up object is to encourage the sizes that produced the built stock. I think that it is very doubtful whether it is very much use to give prizes to the best-looking stal-Eons. Some little time ago I prepared a list, west through the prine list of the Royal Dublin Society's Show, and, assuming the poligrous to be correctwhich, perhaps, is rather a large proxumption, but wante, permays, is receive a large permanent, as assuming them to be correct in the majority of in-stances—I found out that in the twenty years from 1818, when there was a regular list kept, until 1888, that the sizes that had got the most of the winners had never been shown, with the exception of one, and he had been rejected; and that three sizes, two of whom had never been shown and the third had been turned out of the ring, had got more urine winners then all the prine stallions not torother. These three

got 41 between them, and all the prim stallions in the Dublin Show for 29 years had only got 28. That (produced) is the list, and I think you will my the horses at the top of the list were deserving of a great deal more money than most of the others 5804. Practically, you would let all the prises be given according to the merit and not to appearance ! In the first materior, I think I should give a goodlooking horse a price, and then let him prove bloself afterwards. I would give him a start for his looks, for you have the valuable opinion of the judges as to his supermant, and that coveres out Mr. Winter's plan of educating the farmer and instructing him.

5805. In the Doldin Show, in those classes where mayer are shown with foal at foot to a thoroughbred size, would you extend that to every size registered !-I don't think you can indee a feel at all ; there is no 5556 Would you select mares in feel by half-beed

tes t. I would prefer not giving an opinion ; I don't feel certain about that, one way or the other 5807. You heard registration suggested of mares, and also it less been reggested it should be earried out through the Petry Sessions Clerk; do you think that is a renotical proposal i — Yee; I don't see any objec-

1805. And you think that any expense that was incurred by that would be well worth while !-- I am 1809, Can you think of any better personal than

there could be saything better. I think there should be a register kept some way or other. I think the stalling owner ought to be obliged to register all the waren that come to his home so far so he known them but I think some of the stallion owners don't know

what mores their horses come. 5810. But still you think registration might be carried out, and it is quite a practical proposal through the Petry Bestices Clerk !—I think so, or the Constabulary: the Comstabulary new-a-days have very little to do, I am glad to say. I just wish to say with regord to rearing sives that there are several of the crack Irish stallicus at the present moment that are supposed to be rearers. I won't stantion means because I don't know whether I might not be laring myself open to an action for libel or not, but I think it is very objectionable that nobody should be shie to say for cortain whether the bornes in that list ere sound or not-that is, whether we are breeding from rearing stallions or not. I have a list here (pro-

duced): I suppose it will be considered confidential torf, he might be perfectly sound off the terf, but he reight turn reares again ?-I should sak no question he had you in public up to there or four-year old and come sound off the turf; I don't think you can go now further than that 5612. Lord EARHDDENNIA,-That is, if he had a well-shound neek b. I don't leave whather it would be racticable to go into that question, I should not

practicable to go into tent quoteers, a sound so-tiles to go into that question, that I should not like to see a borse with a long nock like a giraffe—he would be lishle to be a roarer; but if he went through training up to formyses old, I think he would be very unifiedy to bread a rosaing stock. 5613. Chargean - You man if a horse come arend off the turf, you would sak no more questions i -Not two years old, but at three or four years

\$514. Lord Resurroycens. ... I think was soid that you were in favour of registration, rather than making a sted book for hunters !-- No. I did not intend to ary that : I think reconstruction and the making of a stud-book, there is not a very great distinction between

\$815. I just wanted to know what was your spinion t—I did not intend to distinguish between 5618. You have no perference for one above the other !- I think registration would produce a stud-5817. But a stud-book has to be alosed scenetime or ether !- No, you start by selection, in the first

5818. How do you admit ofterwards 1-Of course No. 10, 1004 in Westherby's Stud-book you must trace back to a Mr. William size and durn in the steel book 5819. That is because it is closed, but if you make e stud-book, you must close it, I fancy !- I have not looked so far abend as that

5820. That is why I wanted to know if you had any preference for registration over a stud-book 1-I should close it except to thoroughlired blood afterwards. 5831. I unties this is the role in the English Hunter

Improvement Society:-" The mare is eligible for cutry which has been awarded a prize, been reserved or highly commencied in heater classes at any show in the United Kingdom." I wanted to know whether you would be included to admit nutried enimals !-- I should try and knop them out as much as I could ; I think the system on which the Hunter Improvement

Society was started was necessary, but I don't think it was intended to be perpetual 5812. You also said, with reward to the revision

of stallions, that you would like to shough the regin-tention of sires?—The present registention of sires, I mean, under the Royal Dublin Society.

5838. What have does it do !-- I think horses are resistered that ere not in the least fitted for it; I think it has discredited the system because formers have seen horses registered which they don't consider. and I think rightly don't consider, to be worthy of 5824. So you would not examine or inspect any

homes in consequence of that !- I am not prepared to say that, but I think I would have there all examined

5525. You would not abolish the registration, but understood you to my you did not see that there was any use in having them registered !- What I mean was under the present scheme, as it stands at present.
5826. There is a certain amount of safeguard, I suppose, in that !—I think there is very little, I have seen as but hereys as one is resistered : I amount understand

on what principle they were allowed to pass—I have known horses unacted to the wind reststand \$811. CHARKAN.-Suppose a sire comes off the 5827. Did they come off the tool sound !-- I carnot tell you that, nobody knows that, we are all keep in ignorance at present about unround winded herses, I want if I can to throw a little light on it.
5828 Mr. Wanner, You think it would be

with to threw light on it in the way you supposed by having a veterinary surgeon employed to wisch lorses on the treining grounds 1—Yes, I cannot see any penetical difficulty, the matter of a horse's wind any practical difficulty, the matter of a horse's wind when he is an the turf it e matter of rotoriety, which is published in the papers constionally with regard to certain herees, and I often out then out for my own

5819. Suppose we solelected Mr. Winter to spend his time on the training ground do you think he would be a very popular man there !- I think Mr. Winter would be very glad to undertake the business, I don't think it would be a question of popularity at all, if you go to Newmarket you can generally find out about a horse's wind.

hear that they are rearest when they are not so t-I am is itsted the other day that Persimmen was a reary and their was contradicted next week; I know if anybody goes out and listens on the tenining if you listen when horses come book to the paidock. or if you haven when nowes some took to the panison.

I have heard houses rearing in the paddook, and I have seen them advertised with a reterinary surgeon's errificate afterwards as perfectly sound. I could sive was some curious instances in my own experience

although it is very limited indeed.

N e. E. 1816

Me R G Carner, n.L. Borrisoleigh, examined,

5831. CHAIRNAM .- You live in Tipperary and have had considerable experience in the breeding of houses

lask tun years, from 10 to 15 mares each year.
5832. Can you tell us wint success you have had? - I have wen a good many ears and prizes in England good Technol for animals unincomally lared by myself and I sold then for high prices in some mann : in 1891

to 1894 I was runner up for the Personance op in the Dablin Society's Show, and this year I won it, and sold the winner at a good profit. I have acted as a judge of horses, hunters and harness and Hackneys as well in shows in England and Ireland 5:03. What class of manes have you bred from and what stres have you used i-I principally heed from half-bred mores and in a few cases from thoroughbrode but the stalloon I have used boys been in most

cases theremethized, but occasionally I have used half-5834. What class of horses is three the most demand for in your district !-- The district is expelle I think of readucing the best class of horses of the various breeds if the proper measures for their production are taken, but owing to the demand in the local fairs being mostly for hunters and horness horses I consider those breeds most profitable to

5635. Are many horses keed in the district and of what class i—There are a great number of horses bred in the district, the people who chiefly breed the coall agricultural tenants and working facuers who generally keep one or two brood mares with which they do their form work and from which they broad a final as a rule every year. The closs of more in most instances is a half-bred animal from 15.2 to 15.3 bands high, whose principal faults are straight of their shoulders, bank of their knees, light of bone and what is commonly called goos-comped. 5636. Is breeding from two-year-old fillies a

oummen practice in your district!-Yes, more practised of late years; I think if a two-year old shows sufficient hone and substance she may be covered with advantage at that age by a half-lired sire showing quality, or a very strong boned thoroughbred.

0837. In there a sufficiency of skullions in your district, are they suitable for the neighbourhood! - The thoroughbreds in my district are fairly good, but in many instances light in hone and substance, and also very don'tabul as to symmetrees. The half-bred stallions as a rule are had; in most instances they are the result of the cross of a thereughbred or half-bred size on a mare whose pedigree can rarely be traced, and who has probably in some part of her pediagree a strain

of cart bosse Nood. 5838. Have the marus deteriorated, and if so, from deteriorated : the march one rese with the farmers have neither bone or exhetence, they had some years

5389. Can you give any cause for that et all !—Yes, I consider that mostly due to the fact that too weedy bred aires of good breeding 5840. What is your opinion of the so-called ha bred home with regard to his suitability as a ricet. I consider that the correct type of half-bred sire that

should be need in the country does not exist at mesent except in a very few eases, and consequently they would have to be beed 5341. You don't approve of the present class of half-breds t... No; not as a rule.

5342. Have you any observations to make with re-gard to the Royal Dublin Society's scheme in your istrict !-- Yes; the scheme bas been practically a sweat shows, with one or two exceptions, have been quite moles for breshing purpose, and if mated with any revistaged horse I know could not possibly onduce a hunter to carry more than ten or twalve stone. The number of manus shown at the shear have dooressed within the last two years.

5843. Have you any experience of breeding from a Hackney sixed - I never used from a Hackney sixe myself, though if I could get one of good breeding quality and hunter shape I should unquestionably agsome of my hunter mares to him in professors to many of the half-hand green of doubt ful need recein the common

5614. Do you think it is a desirable thing to intro. does Hadragy blood into a hunter district Lin the exclusively hunter districts such as Month I would not be in favour of introducing a Hackney size, but in districts which produce hangess borses as well as hunters. I thenk they could with advantage he med as a occupiete system of registration of every breed of bream in Instant would provent any mixing of the

5645. Do you think a Hackney is likely to get a bunder!-I should not advocate Hackneys for reducing lumbers, but I would not go so for as to say it would be utterly impossible for a good shaped one to do

5845. Do was think he would got a good harmen seen of Hackneys I think they are very suitable, for mostly all the price winners in the harross choose at the shows in England and Ireland are purelled Hackness. probable that the progeny of the Hackney weald set be low sultable than the missit of an animal level from a thoroughbred for a bunter and failing to be one. I cornider the cross of the Hockney on the resoly meets of the country would be better than the gross of the therenghized at present available

\$848. Have you any regrestion to make to ensoure the farmers to keep their good mares to breed from -I comoder if State aid was given Government Stud ... and that those study should be formed with a view of improving horse-breeding, whether with a view of improving norse-treening, westers with a view in producing furniture or harmons income as will be most at these study which could be sold at public assisten-the furners, or that the farmors could claim them at a fixed urios, with a view to breading from them, these mares should also be branded so as to prevent the free by whatever stallion in the Government stud, wheever was in charge of the stud should consider most suitable, this combined with a very strict system of registration would, I think, in time, greatly improve

the breed of mares in the country, to the farmer!-I exclainly would not leave it to the farmer, my experience of the farmer is that he taken his mare to a stallion simply because he happens to he friendly with the owner, onite irremetive of the cucation of whether the sire is suitable to the mareer

5850. You think the Government could in fact to supply at a low price the mares to the farmers who have not got good ones!-I think the farmer should be able to go to these stude and either buy a mase there or he able to claim her at a fixed price, for the purpos of breeding from her, and I might say also, that I think at those study of course there would asturally be colts as well as filles produced there—a very good type of half-lavel size would probably be predicted.

8551. You mentioned I think, that the half-leed
size would have to be bred, that there are very few failure in Tipperary. The young mares shown in the of them in the country at present !-- Yes,

acas. You would peefer to breed them than form Society L. I think it would be done quicker in this way than it would be to only me the stallions in the

5853. In fact the Government would breed the

I should have mentioned that I consider the manual and he sold to the furners at two year old or the 5854. At a regular fixed price?—Yes. Or also, by

public suction. ACSS. Ave a larger portion of the moves in year district mitable for breeding hunters?—Well of course.

a rule are a very bad type, not half as good as they were some years ago, and I think they are deteriorsting, as a matter of fact, from year to year 55d. Do you think they are suitable to be put to the thoroughbred home in the district !- As a rule, no. repressionably not. I should say nine tenths would be

much more swited to be not to the half-bred horse if such were available. 5857. And you don't at all agree with the present system of only registering thereighteed sires 1—No. I don't believe in the system of the Dublin Society, I

have some of the horses and Library, think then 5858. Lord Batteronners.—You mentioned halfbrd sires, whot do you weam by helf-bred sires!— Well, I think as I said, the half-bred sires in the eventury are vory but, the best description of the said-

able half-bend are would be the gross of the thoroughbred on the sire's side and two or three strains of the throughtred blood on the darris side.

More I - More if rosalide, very smed-

the type of the good weight-carrying hunter. that the mores in your district had deteriorated from 1661. No other consess, case you suggest any other cause t-No : I think that is really the eners, your

your ago, before, perhaps, I was old enough to form an opinion, I know that they used half-bred sires in the country, and then they rather changed their are rather inclined to go back again, they find they

except sell their animals got by the existing thoroughbred sires in the country at the early are they wish 5042. Do they find then more unsecond 1-Of corresp I should not like to say anything about anybody clock

5863. Mares !-- Oh, I think the mares of the entry are often unsured, because I consider the farmer as a rule keeps his more to breed from simply because he is not able to sell her owing to unsoundness.

5864. If he owns a sensel one he is not averse to sell it !—He will sell any spand one he has. 5065. Do ven think that has snything to de with the deterioration of the mores of the country lault probably has, unsurmainess is very often the result of the cross of the thoroughbred bores.

NSSA. You consider that the profince of the thoroughbred sire is more likely to be massed!— I am afraid so, I think the leved of thoroughbred house as a rule is unseend, because everybody knows it is not a question of sympless in the fashioroble sires that are used in England to produce thoroughbred

horses, it is simply a question of whether they have YOU PROM 5867. Mr. Freewilliam.—It would require a prote spend one to wim classic races all the samet. Oh, it does not follow with those short races.

5868. I say the classic races t-We know Ormonde was not sound.
5862. Lord Raymnoysuna.—You mentioned carriage

houses; what do you mean by carriage houses !— No. E. 200.
Harmess houses, I presente they are very much the Mr. E. 6.
same, I mean azimush that would be suitable to drive, agree. 5870. Do you mean the old fashioned carriage barness that had bone and size and action, or do you mean the smaller animals that are generally driven in Victorias and things of that kind !--When I talk of carriage horses I mean Hackintys, I consider the Hacking the acron of perfection as a carriage horse.

5871. What height 1—They evry in height. 5872. What is the highest you know 1—I have seen 5573. Now if the people who hur these corriage

horse, like Messra. East and Wimbush, had declared against the use of the Hackney stallion to get their carriage horses, would you agree with them 1—Well, of course it depends, different people buy different types of horses, if their particular type was the aminol get by a thoroughbred, of somes I should hav other people were to hav animals entirely out he Hackneys it would be the other way with m 5874. What other people !- Well, all the hest har-

your house in England that are shown at the shows 5875. You are talking of shows, I am talking of the utility class !- I mean animals that will make the

highest price. 5876. At a At a show it would be page-bred, I fonor !-It may be so or it may not be, I have seen helf-treed Hackmays at shows, not slighle for the Hackmay

Stud Book, and they have been emcedingly fine harness bornes. 5877. Do you know at all who buys that class -

5878. You know a good deal of unosey it spent by the Lovice dealers in Ireland !—I think as a rule a sod high olses hursess horse will make more securly than a birt slass bretter

5679. Supposing they said they wanted their horses to be by thoroughbred horses, that the thoroughbred horse is the horse they prefer to have used for their trails, would you be inclined to agree with these ?— Well, I don't think an animal got by a thoroughbred horse would have reflerent action for harness. 2680. Even if the dealers themselves said so !-- If they find morely to lary them that is their look out.

every near people to very them that is their look ord, but personally speaking if I went to look for a high-eless harness horse I should not buy him if I knew he was not hy a thoroughbeed, railess is had exceptionally good action, which as a rule they have not.

2881. I am referring mere to the dealers who spend their money over here, Mosers. East and Wissbash,

and these sort of people — Xee, I have.

\$882. Mr. Firstenana. — Did you hear it wated by one of the wincesse, I fouget a believe yesterday to day, that Mears. East said that almost the whole of their best classed enrises horses were by thorough-

heeds and bought in Ireland !—You, I believe one of the witnesses old my so. AREA I think he mad it out of a letter b-Yes, I was in the room at the time

pas in the room at the time.

5864. You don't agree with Mr. East 1... Well, I nave sold a horse to Mr. East. 5585. That he knows his own business best !- You are rare he close. page. I think you said that all the prices in the harvest charge in all the shows in England and Ireland were taken by Hackneys !—As a rule, yes.

\$887. Is that the case !- The case I have seen and judged at have been. There was a very noted horse, driven a good deal at shows last season, and I judged him twice in England, a horse called Norbery Square to year a nove level Hankney, he is omits undefeatable, I

5888. Were they open cleases or confired to Hackneys — I think they were open cleases, I osa

5889. I think you mentioned your half-heed home that you would like to breed from would be very

nearly thoroughtced, the one you mentioned instraw?

5390. The borse you would really like to breed from for producing a hunter and the horse you think would be most useful in Ireland would be a strong home that has a very large admixture of thoroughbred provided that he is sound !- That is in the baytar-breeding districts, not the harmon borse districts.

5891. Level RATHEDSHNELL.—When you say the

harness horse districts, could you define the harness evacurismes there is really only one hunter-breeding district exchainsly, and that is the county Meath, I think all the rest of Iruland breed both hunton and

harness hernes. 5892. And Meath is the only one for hunter exclusively I mean for hunters !- I think it would

pay in the rest of Ireland to breed harness herses as well as buntess. 5593. Col. Sr. Quarts.-You attribute the degrease in the value and the quality of the animals to the cross with the light thoroughlood !-- Yes. 5594. Do you think that the introduction of half-

herd horses like the Shires and Clydesdales, of which there are a good meany in the country, have had say-thing to do with it h... Well, not in my experience, though I certainly would be very strongly against a Shire or Clydestale.

5893. Do you go round many of the fairs in Ire-

had 1—A certain number.

5896. Well, walking through those fairs, when you have looked carefully over the naimale den't you think you can detect the groups without any difficulty between what is a high class suimal and not, that her been crossed with a half-bred, massely, the Shire or Hackney, at least I know vary little about Hackneys. but what I call the agricultural horse !- Yes, I think one can detect them in this way, that as a rule the lightest and werdiget animal to be sace in the faire in probably, if you impairs into the pedigree, get by a theremaished berne.

5897. Don't you see a very large number of what I call three-cornered brutes, useless for anything, with great beads hally set on to their necks, bud shoulders, bud legs, bud rumos, in fact bud every-where, flat sides b.-Unquestionship you do. 5895. Con you not in a moment say that that class of home has not into that state from the introduction

of other blood, other than the thoroughbred !- You not perhaps directly, but I should probably imagine if I may an animal of that description that his rive or dam might have had a soft strain of Clydesiale.

Shire, or Suffolk Punch blood.

5859. Yee, but if you go through the fairs and go with your eyes open you can see them by hundreds ! -I quite admit that.

5900. And you can detect that that is not the thoroughbred that has done that had don't new it is but I say it is the intermixiurs, not exactly of a direct coos of the cart been bloads was name 590t. I don't say the direct cross, not the first cross. I am only speaking of the introduction of the

blood that has altered the share of what was a nicely turned theroughbred horse, and he has grown a most three-conceved ussless snimal !-- J don't think there are as many strains of eart horse bitsel new of late years or used as there had been formarly

5903. That I am not speaking of best can you not detect the course blood and the coarse formation of the azimal in the fairs now to a great extent !-- You can. 5903. Theloubtedly there are animals that are weeds from thoroughbeed sires, but they are a much more shapely enimal, and though they are a lighter spinist, they are an animal you possibly could do now. thing with, they would make a light back or light herness horse !- As a rule, if an animal is strong even if he has bad shapes, you will find nom to buy him. whereas an animal may be of good shape but light,

sail nebody will hay him.

5904. What will be buy them for, and of what price 1-Of course at a low price, but one class of spiral is peartically unsaleshie

5905. They will pall a cart on the seashorn served the manure out of a farmer's yard, but he will not get 5906. And that is through the introduction of half. hred bleed 1-Of cart house bleed. 5907. There are certain besens of cart been yo would call pare !- Yes, I surmose at, every arrival of

its own breed is pure if it is entered in the Stud Book of its breed 5908. Would you advocate the introduction of any course bleed into the country to increase the size of

the spirmals !- No part borns blood 5000. You very seldon got this heavy size without getting a certain converses in the blood !-- With

5010. You get a big bravy hove I-Stallion, do

5911. He has generally got some coarseness in his blood !—Yes. 5912. World you advecte bringing say of that

coarse blood into the small muse of Ireland to improve her, to get strength and size !- I would not try to get strength and size by bringing in our herse blood into the country, I mean Shires, Chydesdales, or 5915. Don't you think, or rather do you think, with the roully good horse, clean thoroughband stock

with good hone, a newsorfal horse, you could build us the present breed of animals in the country !-- If they were procupable I should say so, but I den't think they are proquestion.

5914. That is the question, but if they were pro-

corable, don't you think you could do it better with that then by introducing any other blood !-- I should agree so in hunting districts if you wanted to breed 5915. Or even harous horses 1 ... Well, I differ from

5916. Will you take the men who deal in harness boroon, their opinion must be of a certain present of value! But with regard to the harness horses, say all the prices at shows are taken by the Hackneve : nov you have a slaw of four or five Hockneys. what do you give the prizes for fire a Hashney-do you beight of his action !-- General conformation and

5917. Which do you think gets the greatest number of points in the judge's eye, action or shape !-- Peror points in the jungers eye, acutes or suspensive security speaking. I have given about an equal number of points in my opinion, when I have been indeing

5918. It is not necessary that the highest sction gets the print I...Ry no magner of means ; in fact, I think Haskney men attach too much importance to 5919. Is it a physical fact that any extra action

beyond what is required to carry the animal safety and well must necessarily be a waste of powerl-That is a very ticklesome point to give an opinion on; I would not like to say that as an absolute fact

5920. Well, it can be proved !-- As a law of nature. 5931. As a law of nature, a physical fact, and it is a very essential one in a certain way with regard to the staying power of the saimal, because given two animals of equal staying power, if one has got this extravagent high notion it cannot host as long as the other, it is physically impossible 1—I drove behind a outer, to in physically impossible 1—1 areve behind a Hackney by Danegelt, a pure bred Hackney in Lic-columnies; I drove that been from twenty to twentyfive railes, and coming back you dare not tench that 5922. There are Hackneys and Hackneys, that I

don't deny for a moment, I wanted to find from you

whether you did consider that the present breed in

the country might be improved and built up by stick-

horse with a whip.

ing to the theroughbood, if you could get the really high class blood with home and strength, as well as by 5923. But if it was presentle you would prefer

is 1.—Certainly.

1804. Mr. Warners.—Do you think bunter missite severally make good harness horses, have they got record action t—As a rule, the unimal bred as a result of his boxes too light for that parnous; such

arinals are sold for little money, and would certainly he unweitstele as good harmens horses 5915. Do you think the horses that you see in the fair now are deficient in action or not what class of action have they?—Their action, as a role, is bad, and years often they are inclined to dish : taken on the

whole, improvement in action I should say was 1928. And what do you think is the most saleable ecumodity in harness borses !- Action, certainly, 5927. Do won think that a thoroughbrad horse to es likely to transmit action as a Hackney !-- No. I

should not say so. 1928. We have heard a great deal about this necellar action that a Hackney has, you have seen a good many Harksteys, what do you think of Harkstey action 5-I think there are two distinct corts of Hackner action :- The Yorkshire Harkwey, which gets his footlers will away from his shoulders, and enrises well of his books; and the Norfelk, which perhaps though usee shows of the two, is rather inclined to knee sction.

2229. Which do you prefer!-I should certainly profer the Yorkshire. 5930. You have seen a large number of the produce of Harkeneys, have you not; do you find that their action is objectionable in any way 1.—I have seen a large number of the progeny of Hackneys, and when they have been of the Yorkshitze type I have not considered their netton too high; as a master of fast. I have seen some Hatkners running on the

feld, and one would imagine their notion was no bister than the ordinary horse one seen. 2011. You have watched them as young Horkneys? Yes. 5012. What do you consider are the points that

these weedy mares that you have described in your district are most deficient in 1-As I said before. straight shoulder, light of hore in the leg, drooping rungs, and indifferent action. 5033. What horse do you think would be likely to correct that I .-- An exceptionally big, strong-boned showinghored, which, however, is hard to get; I comider a well bred, hunter-chaped Hoskney as being

the next most suitable. 5934. And if Government aid was given would 700 leave it to the fareness to not what class of stallion they required !-- No ; if, so I suggest, they were to get their breed mores at a reasonable price and free service of Government stallions, I should leave it to tie head of each stud, who should be an authority on horse-breeding, to cross the more with winterer stallion, in his orderion, would be most suitable to her.

5925. I think you said that in your district the femore had used weedy thoroughbreds very largely, and that you attributed the deterioration in more to that |- Yes. 5958. Are they at all falling into the opposite ex-treme now, and using course become in order to get rise t—Yes; farmers are certainly beginning to find, as a role, the progeny of the thoroughbred home in practically unsaleable before he reaches the age of

tiree years, they are consequently inclined to go to half heed stallions of purhaps doubtful pedigree.

5037. I think you said you would like these halfbred sizes to have three crosses on the dam's side, do you think it is possible to buy these horses in the country now!...I think a certain number of good half-beed sizes might be procurable, but not anything

like the number that would be received in the corn. No. 27, 1860 r, and, in default of there being a sufficient supply, Mr. R. G. I should be quite content to use a bantor-shaped Hack- Cartes. nor with a sufficient strain of thoroughbeed blood in

s peligree.
shift. Would you use one for your own marcol-Yes : I would to one I omsidered too light to yet to a thoroughbrod

a theorophicon.

5763. And you think it would be a distinct alvantage if it was used in your district with carefully selected sures 1—1 sheald say so.

5949. Do you know as all how Torkshire Haskingys
are kroll—Yes; I believe the foundation of the breed was the cross of the thoroughtred heres with a Yorkshire resulster mare, which is of a distinctly

staying type, for before railways were invented the Yorkshire farmer last to depend solely on his road-ster for means of locomotion; I believe there are great records of their orderance and stoying power. 5941. They were bred, as far as you could learn when in England, from a very staying race !—I believe so, 5942. A race that did very long distances !—I

believe so. 5943. Yes have described the results of the Royal Dallin Society's scheme in your district, and I think won said that the munches of mears were decreasing of the shows I-Oh, year they are, 5944. To what do you attribute that !-- I think they don't use the thoroughbred area as much as they used to said therefore they are not eligible to come

under the scheme. 5945. And do the young brood mares that are brought and accepted under the scheme show an improvument !-- With a yeary few exceptions, the young mores shown in the shows beld this year were outto provitable to breed any meful borner

5946. What class of farmers would you consider most in need of State assistance; we have had it advocated this morning that only the farmers who level your high class Funters or harmen hornes should be assisted by the State, do you agree with the 1-2 think it is the poocer farmers should be assisted now

5947. And on a vote do these farmers word a horse that produces hardy stock that can be easily reared -Oh, yee. It very often happens that they have no house accommodation to winter them in at all, they have to let them run out all the winter. 5948. Then I think you have beard it advocated

that there should be a very correlate system of veries and there appeal be a very comparts system of regis-tration, and I understand you agree with that b—Yes, a complete system of registration, and I should go as for an establishing a stoll hook of each breed. 5949. A stud book of insiter sizes i—Of every bread beed in Ireland that has not already a stud book,

5950. And you would call it a breed of Irish trintees!—I would call the particular breed Irish 5551. And you have board it stated here that some

words view with alarm the introduction of Hackneys. that it may effect an injury to the Irish bunters, do on think there is now real names for their alrem inthink if the registration and stud book were storted as I propert I stor't one how the legator breading as a suggest, I don't see now the number breeding industry could be universi, and I think there is come room enough in the country to breed the best harness hornes as well as hunters.

horses as well as hunters.

5032. Is it difficult to find burness borses now !—

H I wanted a pair of barness horses to-morrow I

should not onite know where to on to look for there in this country.

5153. Do you know that the trade of there big busanters that has been referred to it really a very limited trade as compared with the whole trade of Ireland. We heard is stated yesterday that Mesers. East bought 250 burses a year I—I should consider it

an extremely limited trade.

New 107, 1995. Ve II G

these hig up-standing carriage horses is a limited trade t—I should say so. Certen. 5955. They cannot be produced in large numbers?

-I should say not. 5956. Have you attended may males of thoroughlored bornes i-Yes, I attended the December raise at Newmarket several times 5957. Do you think it is hard or easy to find thoroughbred stallions with plenty of bone !- I should say it is very hard, at the last December sales I only

5954. Of seams there are others, but the trade to

naw one home sold in the whole week that I coneldered suitable either or regards shape or substance to produce a hunter.
5958. And practically now in breeding thoroughbreels conformation is not extended to at all !- I am afraid it is very little, it has simply become a question

of their galleging powers and the likelihood of whether they will brood winners of mees or not. \$959. Have you been yourself in the conqueted districts !- Yes, I have been in Cock, Kerry, and Donagal 5140. On more than one occasion !- Yee, the last two vegs.

5991. Judging at the shows !- Judging at the short. 5962. Have you had an opportunity of seeing the manes there and their produce 1-Oh, yes, I considered them, the marco, extremely bod, and it was hardly at their feet could be the property of such mores. 5953. And in saldition to the fools this you see older produce I—Yes, yearings, two-year-olds and three-year-olds, they all above a great impercement on the collinary type of more found in the district 5064. Have you seen the produce of different stallions out of the same dam 1-Yes. This year in Denced at one of the shows a more was shown and

she was not considered good enough to win a price in her class, and there was also on view three materials her progress, a four-year-old by a thoroughlard, a direceptar old by a Chydoddile, and yearling by the registered Hodiney, neither the fear-year-old or the three-year-old were worth saything, and the animal got by the Hackney stallion won first prize in its class and promised to turn out a useful animal. 5965. Lord RATHDONNELL -- Was that a feel !-- The Hackney was a yearling.

5103. Mr. Wannen.—When you were in the congested districts have you seen any of the former steen

that used to be used there!-Yes, I have. One of the stallions I saw was oneby, had spavin, side-bones, splints, and was a bad roarer 5967, I believe he was a very popular animal in

the district !- Yes, so his owner said at any rate. 5968. He said there were a great many marcs send to him !-- He did. 5969. If you had to advise the Congested Districts Board, what stallions would you recommend there to

Board, what summers women you recommens mere, to send into those districts !— Unquestionably the Hashney, I have seen the result of the Weish cob-and Arab there too, and I think they are by nomeans as good-looking animals as the samuals got by the Heckney,

5970. Do you think it would pay the farmers there to breed from sizes like the Arab !-- No, not like the Arch at all.

5971. You don't like any Arabs or Baths for that district !- No. 5972. You think they must have a stronger home?

5973. But at the same time if good hunter sirce exist you would try them !-- I think I should 5576. But failing these being promusable you consider the Hackney the best !- I am not at all sure that in any case I should not use the Hackney, for I think he would give them solice, which they want wery badly, he would give them solice more than any half-heed hunter sire.

5975. You would use the Hackury in the fint instance !-- I think I should. 5976. Have you, as a matter of fact, seen any of 5977. What do you think of them !- I think they

are very good of their kind.
5978. Have you ever, when you have been in these districts, talked to the people, as to what class of home they themselves like 1-Yes, at Bantry, in the present

year, the country people told me they would have nothing except a Hickney; the Board sent a thorough hred been there this year and he was not nearly as much availed of as the Hackney had been 5179. Was he a good class of thoroughlyed !- He was, I thought him a good class of thoroughbod horse,

he was good enough to win a good number of prizes as \$280. I think he tid a good deal of raciny tool-Yes, he won several zoos. 5931. We have heard to-day that there is some

confincity about the Hackney hocks, it only referred to be in the South of Ireland, but from your experience of the hocks you have seen on the Hackmays area to the west of Ireland do you think they are links to ourles or badly formed !—I should go to the opposite extreme, most of the Hackneys I have seen in both

Ipeland and Enghand have very good hooks 59c2. And do you know whether they are a sonal horse or not !-- I believe them to be a sound horse. 5983. But you have no experience us to that !- No. I have not 5984. I think you were asked if the harness classes

in which you said Harkneys had won were open, don't won know as a matter of fact that all the harness classes in the Dublia Show are open t-In the Dublia 5965. And for the last five or six years the majority of the prizes have been won by Hackney bred konet?

5105. Lord RATHDOWNELL -- I should like to sak a question or two, I know you know the formation of a home very well and judge at shows, I would like to get your opinion as to the Hockney generally-or the Heckneys that may happen to be in Ireland at the protest moment, but us a general rule I should like to know your opinion whether they have good shoulders as a rule !—I think the Yorkshire Hankseys have very good shoulders, and the Norfolk fair

5987. Do you think as a rule that the Hackney is at all inclined to calf kness h... No, I should say not. 5988. You stated just now that you think that the Hackney has a very strong hoak!—A good shaped 5989. Strong good shaped hook as a rule !- Yes

5900. Do you consider that they also as a rule lase good second thighs t—Well, I think that is another point where the two types of Haskney diffic, I think the Yorkshines have, and the Norfolks are indicated to he rother without second thighs.
5991. What do you consider their bone helow the

hook to be as a general rule !- I consider the Yorkship Hackney home very good, I may tell you that I think there is a tremembus difference between the two types of Hackneys.

5999. You think that the Yorkshire Harkney is strong boned below the hook as a rule !-- I do-5993. If they don't happen to be in very good es dition is their middle piece as a rule good i-The botter class of them are, but of course as in every breel

of horses you will find animals deficient in certain 5994. You don't think they require much covering up with fiesh t.—I don't think so. 5995. Mr. WEINUE.—Do you know any hotel of horses better ribbed up than Hackneys!—I think they are just as well ribbed up as any broad I have seen

2006. Colonel Sv. Quivyris.—Yen only advocate him to get harmon homes 1—Oh, yes, and I sharoli himson to get harmon homes that yes, and I sharoli himson to get harmon harmon that yet to be used with some of the weedy marrie of the country, 5007. To get risking horson 1—Yes, in default of being able to procure a good half-head statilies, 5608. Would you wish on actual Hockeny your-

taling able to procure a good half-breal statilises, \$608. Would you ride an actual Hackney yoursit?—I have never ridden one. \$509. You say you advocate the formation of Government study i—Yes.

Government study 1—Yes.
6000, Cookly yes given us any idea on to how you
would not about thou, and whether you would have
one large study or in different provinces 1—It is a
complicated question to go into.

dOU. Would you give us your idea with regard to the formation of Government state.—I think stofashould be formed with the idea of improving whatover bread of animal is most sufficient to the christics, in Month I should only have good thereughbreal bones, if they could be got, and also thereughbreal bones, if they could be got, and also thereughbreal meres, or perhaps strong indiffered masses, so that sizes

and mares estiblie to beend hunters might be level there. In the north I should have it always entirely for harmon burnes, and in the south I should have such to bread both sorts of animals, harmon and hunter. 6002. Haw would you propose that that should be initiated —That Government should be yet be best initiated —That Government should be yet be

initiated 1—Trial Government should buy the best promulate stallings of their respective breach, they should also key the bost marce that would be likely to produce more suitable to kreed kentees from, or more suitable to besed harvess become from.

5033. To do that they would have to take up a certain sewrent of ground and get up a certain smoon of buildings —They would. 6004. Would you recommend anything as to the number of levon mares they thould long and sives in the different enthilishments—Their would greatly

600. Hars you are though at all of what this Carles.

1000. Hars you are though at all of what this Carles.

1000. Hars you are though at the carles.

1000 don't know that Government 1—00, no, because I
600 What benefit do you think it would do to
100 the country, but do you propose that the country

100 the benefit of it 1—I think it would give

perpared, if they did so at all, to give.

the country, how do you propose that the country should get the bronft of it had think it would give the farmer in two years' those, supposing it was started this year, in three years' time he would have a twoyear-oil mane which he could put to one of the Government horses, and I think if it was only a question of improving the stallings in the centry; it would take

considerably longer than three years to improve the breef names of the country. 6007. Your proposition is that Government should have its own mores, and breed its own young stock?

— 1.0.

Olde. What is to become of that young stack i—
that of course would be a question of arrangement,
either that the actual should be said by public
staction, the moves I am tailting of, or that the farmers
als a fixed price, and first a two-year-old I think, 250
at fixed price, and first a two-year-old I think, 250

as a fixed price, and not a two-powers a way, would be a fair price, neither the deverment would less by it, or the farmer pay too much for the ardual at that price.

6007. But there only a few farmers could take advan-

togo of this 1-Why.

6010. How many fash are you going to keed 1It would begin in a small way, but every year they

would be increasing.

(601). Don't you think there would be a great cutery, that the fazzaces who had got but young stock
would say "The Correctment is breeding good scook,
and we cannot sell our had stock!"—I don't think
people would chiest to that in the leng rule.

Carriain, W. F. Sarruswon, Nanagh, exactions.

6002. CHAIRMAN. — You live in the county Experienty i... You. 2013. Have you considerable experience in horsebreeling yourself i... Yes, I have been breeling houses for translet for your.

for twenty fair years.

3014. You buy house 1—L buy a good many.

3015. And still them spain, what stallines bare you generally need yourself—L always use my own thousafted.

3016. What prices have you got for your young

0016. What petoes have you got for your young breas when you have sold them, did they my you will.—I think they have paid us very well, I got as much as \$110 and \$2100 and \$2100 fer heress under there year-04, overal tissue. 6017. What mares were they cut of 1—The mares were half-beed mares.

6018. The ordinary half-bred mare of the country?

—Xes.

6019. You say you buy some borses, what age do
798 generally buy them as!—I generally buy four-yearolds when I eye.

"Methods I com.

The high them is "Break them is, and but the a feel, and self them.

6021. What dean of barre is more twitable for your self-time is the self-time the three is most suitable. I don't know a let about Hackneys. I share never some there, and cannot are anything about them, where the self-time is the service of the self-time is the self-time in the self-time is the self-time in the self-time in the self-time is the self-time in the self-time in the self-time is the self-time in the self-time in the self-time is the self-time in th

actuation. If there's broom a test ascore Machinery, it is there, we can believe and control one properties of the control of

OK, Numph, examinal.

Opins of three has get very low, of source the best deathwish cone bring the same good prices, but the inferior once don't brong more than about one-third what they did, and thorn is a sweat momber unsatisable. I think

it is oversupply.

6023. You think it is because there is too many horses!—Kee .

6034. Surely there is always a sale for high class horses!—Kee, but they cannot find use for the infering horses!—Kee, but they cannot find use for the infering

ones.

O35. Do you breed at all from two-year-olds.—
I only once or twice brid from two-year-olds, and they tursed out fairly well, but from all I have beard I think it is not desirable, but thore is not such a thing as a two-year-old bed from in my part of the

Solidary. Do they feed the years pursues well 1—I think they do had been from two years of the first f

I be of the name are not worth anything—they are studies.

2013. Can you suggest anything so could be them to in loop better numeri —I made a suggestion, in rely to old the queries here, which was that the names mould be of bought by the dispoil Dabilla Society of a same other to way, and distributed about the country, and if they were add out to the fermers on the fathlement plan, three instalments, it would indoor an interness numetor of farmers more to be tend there if a think that be not distribute more to be tend there if a think that

Printed image digitised by the University of Southampton Library Digitisation I.

No. 22,136 would be an advantage, and it would give them a far

Capade W. P. superior class of marcs; they could easily get recently number of I myself would go security for a great number of farmers if they wanted to have marca, and I think you could get very good masses, for superior to what they have, for £13 or £15. t 9029. If they had these good masses, would they be sensible enough to mate them with good houset—I

think they would, I think the beeses are quite good enough; what we want is to help the firmers to improve the meyes, I don't think there is the smallest possibility in life of getting them to keep a good young one unless you made them rich, and thou I don't think you would, for a great many rich people would sell their mares if they got a good price, and

would not been them for breeding.

5010, What age do they sell them at 1-As a rule, three-year old and younger; rarely keep them longer, and that in a great measure induces them to send to the half-hand horse, because feels and yearings got by a half-bred will look very often better than those got by a thoroughbred, and I think in that way they are encouraged to broad from half-beed boron.
(03). In the Royal Dublin Soriety's scheme work-

ing in your district 1-Yes.
(032. Has it done good 1-I don't see it has done the smallest atom of good; I don't see how it oan, when I mention there was \$11 seems on mares in Nemagh district last year, that could not make much differ one way or the other; there were five more registered in Nemagh district, and I don't see how that could affect them in say shape

6035. In fact, you practically say you cannot im-prove the breed of homes in your district with the present class of mores! - It is the mores you must get of, I can see no other way, no, I can see no other way of improving the mores except by supplying them ; you cannot possibly make the farmers keep their good

6034. In the land good around you !-- Yes; some of the best borren in Ireland lave cause from there-Wild Man from Borneo came from my place and The 5035. Do you think the farmer's mores at present are totally unsuitable !—I do; I think they are the

6036. What stallion would you recommend for your district 1-Oh, a strong thoroughless stallism.
6007. Lord Ravinoswata.- I think just new you said that the Royal Duhlin Society's scheme had done no good in your district !- None that I can perseive.

6038. Are you aware that it only deals small factors under a certain releation !-- Yes. 6039. Not with the horsefieth of Ireland generally ?

-Yes. How bould it be expected to do any good on £11 for the whole of the Nemagh dist let ! 6640. You say you cannot dryin any means to keep the good sound mares in the country !-- I don't

see any possible means of doing it. I have never heard any suggestion yet that was in the slightest way reactioable. 6041. Are you aware that under the Dublia Society's scheme money is offered for foals !-- I don't think any price that can be given will over make any

difference.

Mr. John M. Kelly,

5051. CHAIRMAN.-You live in Westmenth, I believe, and are a magistrate for that county 1-Yes. 6052. What experience have you had in the way of horse-breeding !-- I have been breeding burses all my life, and my father before me, and I have a size at present, and I keep some thoroughbeel broad mares, and one or two half-broad mares. 6052. Are many bornes heed by the farmers in your district 1-Oh, yes, a good many farmers breed now,

9042. Are you eware that money is given to using marce, foals, two or three-punched in feal or stinted to a registered sire !-- Where was that gives, in Deblin 1 6043. No, in the districts !-- It has never been given,

T did not know that it was offered 6044. It is open to give it, the local committee on give it under the reles of the Society, there is a rule

to that effect. Now, supposing a two-year-old fifty or a three-year-old filly was in feel, is it likely that a dealer would hay it to take away even if it was sorred? -I don't think to, a dealer would never think of such 6045. Do you think that might prevent dealers from taking all the sound filling out of Treland, if they

happened to be in feel at that early age !- I dec't think it would, I don't think it would be an advantage to prevent dealers beying I was reading Costain Denelan's evidence, and he seemed to advocate the very thing I have thought of, of haying up the mages and distributing their through the country et a les rate, of course the farmers have no opportunity of saterriing these sales said they have no other way of getting a brood mare except by keeping a worthless thing, they have no other way of gotting them. think holon-down heaters might to height, I don't know much about empires and team horses, they may be notice, I don't know, and perhaps cost troopers.

6046. Mg. Wanness.—You think the farmen to our neighbourhood would take advantage of such a scheme if it was put within their reach !-- I think they would take advantage of it, I am certain they would, we had a meeting of the North Tipperay Farming Society, and I proposed this scheme, and the meeting was very largely assembled by the bornbreeding furnees, and they all seemed to take it to, and unanimously thought it was the best thing that was proposed, and they would be delighted with I

6047. Would you suggest that these mores should be baseded or marked in none way !-- I don't see any 6048. You don't think there would be any danger of those mores being sold again i-I don't think or, they would not be sold for saything but broad mares, the only way they could sell them would be amongst theseseives, and if they did that it would be no disab-

6049. You heard it suggested that there should be a register of all horses and broad mares in the district, would you approve of that ?- I have not considers that, I think a Hunter Stud Book would be of great use in time to come, but it would be a long time before we could see the effect of it, I think a Hunter Stol Book is what we want because you would then get the intrinsic qualities of the laste, now if you got a half-tred horse he is always left to be a stallion without knowing what he is, ho is an untried home

not relected for anything but because a man chooses to leave him. 6000. You think it would be worth the trushle of starting a Hunter Stral Book in Iroland 1... I think in future it will be of use, but I don't think we will see the edwarings of it, it takes a number of years to make a herse eligible.

Jone M. KELLY, Horselesp, examined.

6054. What class of marcs do they generally keep for breeding purposes !- Half-bred marcs. 6055. What cless of sires do they mate with !-When they can accomplish it they always go to the thoroughbred sires. 6006. Do the farmers appreciate the advantage of a sentable size to main with their mares, or by what considerations are they influenced when selecting the sire!-If they can manage the price they always go to

· Printed image digitised by the University of Southempton Library Digitisation Unit Printed image digitized by the University of Southernoton Library Digitization Unit

the thoroughbred horse, if they can manage the money the more spirers some, a test can manage the money more exhibitened every day as regards the thereards 6057. In your district are the house standing at a generable fee usually t—Well, the thoroughled been are £5, and for half-level mores and seem

theroughbred mures perhaps less, a little ises, I don't area There is a sufficient number of spitable shifting in the district !- There are now, there are a good many stallions in the loadity, years up there

and I attribute as immensity in the folling off in the wares to the want of mod horses, there are had bulkhand horses, and the want of thorough heed horses. Now for the last few years they are oversing up again and there is more thoroughbred blood in the country.

4(62). Where do the farmous sell their young bures,

and are the prices as recommentive as in former yearst.—If a farmer has a good burse now, he may be beight up in the house from him or at the fairs, there are planty of usen to kery there. But really what has filled up our fairs with those wretched horses is they have come up from the West, they have come up when fools, within the last ten days I have seen 200 of these wratched fools covering from the composted districts.

frees Galway, and they are brought from Ballinasion through the country.

sough the country.

5050. You could trace them at the faire 1-At the large fries in Mullinger I saw these wretched little borner, stall I think they have done an immessity of prisciplef, when they came up as ponice they were very ened but new I think they have deteriorated immentaly and are raining our horses.

· 0041. Have you had any experience in the breeding of Haskneys — No. I never breed from them and would not breed from them. There was one Hackney in my locality and I would not broad from him at any I saw a most remarkable thing with recard to one of his get, I knew the more, she had a feel from this Hackney horse, and she was sout to a thoroughheed home the following year, and it is most remarkable the difference between the two foals, one of whom is one and a half and the other two and a half years thi, one you would have, the other you would not

6002. Colonel St. Quintus,-Whish one would you have 1-The one by the thoroughbred horse, 6065. Cwarnway ... What class of stallion do you

midee most suited for breading high-class barness houses !- The thoroughbred, I think the thoroughbred action is before saything in the world, the motion of the through heed luring in to be preferred to that of my other azimal in the world. I think the Hackney and these Clydesdale and Yorkshipe horses have rained the country wherever they have come into it

6064. Do you consider the Royal Dublin Society's soheme has had any beneficial effect in your neighborshood !- I thonk it had a soud deal, because in the first place it registers the stellious, and the farmers when

they have a registered hoose near thom go to him, Sary have a regardered nove near them go or more because they may be in a sound horse, he won't be re-gistered unless, and I am glod to say unsound horses are going out very fast. As for their scheme as regards the marce, I think the present scheme is not M good as it curbt to be. I think that instead of giving prises to mares in the month of Outober, I believe in secing the mares brought up in the spring and then have them judged there and give them nominations to a throughbook home or regulateral home, the farrors paying some of the money, and then they would go to the good hose. I have been joiging the maren for the last few years in the King's County, at Tulleause and Parsonatown, for the Royal Dablin Society, and I don't think it is working, I think there were only two young merce in each piace this year.

6065. You have beard in cridence about the balf-

thoroughlood, although he is not in the stud healt. I would not turn him out; there are a great number of there with a alight stein and I cartefully model not reject these, but soundness shows everything in the world. I think stallion owners are to blame, if you will, for allowing their sizes to surve ensured record I think they should be more marticular I think they should reject unround mores, and if they did you would find the amoundness would wear away very quickly. I know I for one would reject all unsound marve, and 6066. Do was think that the moves in the district

are an good as they were in former years ;-I do not, and I attribute it to the bud half-bred horses and the want of the thoroughlored blood. In my recollection years ago we had plenty of well-bred horses in it, and the meen and the class of cattle were far before what they are now. There was no end of good beeven, Vulcars and Commer, all those good horses went away. and these half-level howes croreced up, and the fremery hred from them whosever they could. Years ago they bred from the good horses that I distinctly remember but now there are a good many horses spread over the suntry thereaghbred, and I here soon through the Royal Dublin Society there will be more; I think really their acheons is a very scool one, if they would im-

prove it in that way so so to give the nominations to the mares in spring to sinks that have been registered.

6067. That would be more or less an employmenton of the two schemes !-- It might be that, but my, let the former pay £1, and instead of giving a prior let the Royal Dablin Society pay the balance, it would work

5068. Have yen any other cheevations to make with a view of repropering the imbatry of brossbreeding !- Well, I cortainly would like to see good aires go down to the oangested districts, because we wrotched little feels coming my and bought at from £2 to £4 each, and the farmer when he gets a feel at £2 he will be anylous to keep him on, and when he is for-year-old he is not worth £4, not worth anything ; you will see the fairs growded with these wretched animals. I now at least 100 come up this year and tought in the streets and fales here, come up in a large string twenty in a lot, and bought by farmers and shrekarary is nown, and then they come into the foirs and they are looked on as being horses bred in the conserv when we have had nothing at all to say to

6569. What is the oblight was have seen them come no !-Only foals, this year's foels, I have seen a couple of hundred of them this year coming up at different times, and I think if there were good tires down in those parts we would have a change of good fools, those parts we would have a stiange or good tone, boosuse these people cell their foals, I understand, and they come up to us. When they bred pagies, the they come up to us. When they tred popler, the ponies were very good, but now those are not ponies,

neither are they hornes.

6070. Mr. PITZWILLIAM.—What do you think in your part of the country the farmers would be able and willing to give for the pervise of a good class of horse I. I am very sorn they would give &I a mare, getting more enlightened every day, and the first thing they do is to inquire whether a horse to sound, out whother he is registered and that sort of thing. 6071. I think you said that the horses that so down there covered even half-bred mores at about #51

-Wall there way he some thoroughbred better. I - well, there are, that cover at a little less, a well-head throughhood home extend he let less because he costs a pool deal hitsash. Some of there do when they can do it.

6072. My question referred to a good class of stallion either thoroughbred or nearly so, the farmers then, I summers, don't go to that class of home at all, do they? Mr. John M.

0673. They don't go to those that charge £5 a mare \$ -A few of them do, I have reason to know that 6074. You say the foals some up set of the west in large numbers and over-run your district, and you think damage the breeding of the district in consocuence !- I am quite sure they do

6075, Whatever class of stallion was sent down into the west I promume it would be the same thing !-They will all sell their foals, there ought to be a good thoroughbred horse sent down to the west, I would

6076. And for that reason you think there ought to he a good well-lired horse sout down there !- Quite so. 6077. And you should indicately prefer if possible a thoroughbord to any other i—Certainly.

8078. And if you could not get enough thorough-hrads would you like a half-bred 1-Well, if there was a well bred half-bred herse with very little stain in him. and there are a good many of them spread about the

6079. If this half-bred home does not exist now and a demand as seemed for stallings do you think they could be preduced in a short time !—I think they could, you will always be able to buy thoroughboad

6080, Colonel Sr. QUINTIE .- I gather from what you say that there has always been an indux of a certain number of animals from the west into the

centre of Ireland !- You 6081. And you think that will always continue, and therefore whatever is bred in the west must permeate through into the centre of the country !-Quite sure, I am octain it will; for years they are studing out their feals brought up by dealers, twenty or thirty at a time. When they were posies they were very good animals, now the mimals that are coming are very inferior, so if there was a good sire or sires in that

part of the world I think it would do an immensity of 6082. You could not confire any particular animal to a particular district \$-I don't know it sufficiently for that, but I would not have the Clydesinle or those

other homes on any consideration 9053. I toom supposing any purificular animal was brought into a certain part of the country you dan't think it could be retained there, it must filter through to the rest of the country !- I think it must.

6034. Mr. WRENCH - Where in the congreted districts do these fouls come from !-- I really cannot tell you, I know they come an through Galway and Rollingston, and we the country.

6065. You don't know where they come from !--Thry come from the west somewhere, the mountainous

districts, I always heard.

6088. You have no personal knowledge as to the
districts they come from t—I have not, I think they come from all the west down with dealers

6087. Up to the present you have only seen the fosls !- Well an occasional Ig year old

8088. You have seen nothing older than 12 year old 1-Certainly not. 6089. Then it is mere anticipation that you think they will only grow up to be worth £41-I have seen them over and over again that they could not be said when they are threes and fours, I have seen them in

8000. But do you know that there are no springle got by the Congressed Districts Board stallions that are four-year-old, they have not been long enough is the country, so you are speaking of enimals that came up before that time !- I am looking at them coming

we for years, and it is very hard to sell them when they come to age, they are so hadly made you know 0091. You are speaking of what was in the rest.

not what will be in the future !- Say for the last ter 5012. But you know the Board's stallions have GOIG. And these scale you think are not likely ever

to be worth more than £4 or £51-They look very badly now, it is very hard to judge of finis 5004. But you think these will grow into onimals only worth \$4 or \$50-Those I have men for the

last few years, I have seen them in the locality and they were worth sheeketely nothing or £4 or £5. 6025. Those are what you have seen at five or siz venry old 1 --- Yes. 6016. Then, as a matter of fact, you know that

those could not have been by any of the Hackney stallions !-- If they are only four years there they conki not 6097. Name of their produce is older than three years !- Than I cannot say I saw them. 6098. Then you are merely speaking about the

animals from the west and not specially about the suimals got by the Hackney stellions?—Ob, I am only speaking of them as they came up to un 6099. And you don't know how they are bred!-I don't know how they are bred, \$100. Are any of those animals used as butter brood maret 5--Oh, well, I should say not.

\$101. So there is no danger of the Westmeeth farmers making use of them in that way t-I dressy the farmers may breed from them. \$102. But you don't think they would produce valu-

shie huntern !-- Any of them I ever eaw would not. \$103. As a matter of fact are not the mares in Westmeeth as good marce is any in Ireland i-They were very good.

\$104. But are they not at present !- I am afract not, and I give my reacts, they are bed from bet half-bred sizes for some time past, and there has ben ! a want of throughbord blood, but the hat three years a good many thoroughbred houses have come into the country and I really hope for better animals from The Commission adjourned to the following Tuesday.

Major J. H. Convergas, Coolmon, Thomastown, Co. Killenny, examined. 6105. CRAINAR.—Major Connellon, you are resident in the County Kilkenny? Yes, my lord. 6016. What part of the county !- Rather south of

she widdle -- a little south of the middle of the county. 6017. You are a Justice of the Peace for the 6108. Have you had personal experience in horse-

breding!-Yes; I have been breeding for myself the fart twelve years, and I have been associated with my fother in breeding, more or less, for the last five and twenty years.

6109. What class of horses!—Well, I have bred a
great many from thereoglibred horses. I have bred

a certain number from half-bred horses and a few from because of what I would call the country ourthouse chan-not many; one or two.
6110. Wisat do you mean by the country earthere I-What they call the common horse in the eventry is a horse here with a certain amount of Irish

Used in him, no doubt, but with several crosses of the Clydesiale and other sizes. 6111. Clydrodale 1-Ciydendale. Scape of these have got the Clydesdale blood in them. It is very

had to define how some of three are bred 6112. Do you know where they get the Olydendalo strain!-A certain number have atood in the county -Clydeviale sizes. 6115. Are there any there now !-- Ves : three or

6114. Have you a good opinion of that erom !- Not of that cross-bred sire-not us a rule.

6116. Do you consider your district a exitable one for the breeding of bornest-Yes; particularly the southern end of the county. 5116. What is the claracter of the soil!-The

greater part of it is limestone. 6117. And do the farmers breed much about you? -They breed a great deal in the southern part of the county. It has always been more or less a good horsebooting district. They breed a great deal in the

northern district, too, but they do not breed such a good type at all so they do in the south 6118. What is that attributable to 1-It is attributable in a certain degree to the fact that in the northern port of the county they have not got many three righ-tred stallions. In the conthern end they have got neer theroughtreds, and they always used to breed a good class of hunter for the last century in the

southern cod in a district they used to call the Welsh mountains. 6119. In the southern part of the ecusty the soil is more suitable, is it !—I don't know that it is; there is a great deal of rough soil there, but the farmers have

gos prester taste for breeding than in the north.
6130. Is there a better class of marca in the easthern than in the northern part !- Decidedly.

6131. What clear do you think it pays the farmers to breed !- A good type of hunter.

6152. Do they breed much for harness purposes !--To a certain extent, what they aim mortly at it to sell a sell a certain number of troopers as well. They have gots large buyer of troopers in the neighbourhood, and breaters as well. They have got a very good market 6123. What class of horses have you been breeding resulf and your father before you !- Mostly we bare simed at breeding a hunter.

6124. Do you think there has been any fidling off in the quality of the mores generally in the district?

—I do. I see it in fairs, I see it in shows; and I. see it in exhibitions under the Royal Dublin Society's 6125. To what do you attribute this falling off !-If you will allow me, I will tell you the history of

If you will know me, a was ten you too amony on how this depreciation of the mores has been served at. The old Irah mars, with which everybody in familiar, was used a great deal in the early part of the century, and up to the middle of the century form casts were very small things; they were generally cars, and only carried a certain quantity of weight, As time went on, these carts become imper, and a denand erose for houses for van purposes, for krewers mechines, working threshing machines, and they required will a larger seet of cart bases for that purpose, and they began to breed them from a larger stellion; Clydealties were introduced, and they wroard them with these old mares; and they went in for other crosses, and gradually the type of the old clean-legged. Irish more was lost to a great extent in that way from crossing

\$156. And the rewest class of more is not as sood in your counion as the old class!-No, I think not. I have had some myself, and I have one now of the old type, and she is the lest out home I have. 6127. When you say not an good, do you mean not as good for producing benters or the type of home that there is a demand for now, the beary home! I think they would not pay a farmer so well to bread from as the old more; they would not got a class

as good.

6128. Do you know at all how long there have been Clydendules in your part of the country been conducted by the country been and the country been accountry been Cortainly, for twenty years there have been, more. They have been gradually coming in in larger

6129. And in the south part of the county, what is your opinion penerally of the stallions—the through-land stallions I mean i—There are some very good ones loud in Westeford by the Mesers. Widger, and there are other ones standing about. There are a certain number too light of bons, in my spinion, throughout 6130. And in the northern part?-In the northern

part there are very few thoroughbred stallions at all, except a few that come in travelling from other counties, and stand a day here and there. There are two or three baresies in the northern part of the county which have not got a thoroughbred horse,

6131. Are there may half-bred stallings t.—Three are what they call half-bred stallings, but they are crosses of various sorts; come of them by half-bred borses and so on ; some of them pretty good ones, and some of them not much good 6132. Would you appears of breeding from half-bred sirest-I do, to a certain extent; for certain marcs I do. I have known some marcs, marcs that I have had myself, that did badly with a thoroughbred bone, and that did fairly well with a half-bred borea. There are certain channe of mares that do not suit,

thoroughbred horses. Printed image digitised by the University of Southampton Library Digitisation Unit Printed image digitised by the University of Southamoton Library Digitisation Unit

Make A. M.

198 Dec. 1, 1656. 6133. What would you yet them to !-- I would put them to a thoroughly sound bulf-level horse, or to a horar with a good deal of blood in him, three quarters

bred or a really good half beed borse.

6134. Would you profer that to the Ciydesiale or the Hackney !- In our county there is only one Hackney, and it has been there only a short time, so my anything about the Hackney. I think a good hulf-bred with bone, with good style and notice about bits, suit someraures better than a thoroughtend horse,

susticularly as some thoroughleed bosses are light of \$135. How long has the Hackney been in your country !- Only two years; we cannot judge wint his stock are yet.

5135. Do you know the horse yourself i-I don't know him, I have never seen him; I only know what others have said about him. 6137. You cannot express any opinion as to the value or reverse of Hackney blood 1-No. so for an my own county is conserned. I have seen then in England. I have had some experience of them in

England in a large manufacturing town that I lived year for some years. They bred a certain class of Harkney to do a spin on a bank-heliday, and that kind of thing, and he was not a good horse 6138. Would you like to express any spinion to the Commission as to the probable effect generally of the introduction of Hackney blood into the country!--Not except in this way—that I think generally we ought to nause before we do anything to introduce any particular broad which is likely to cost the thoroughbrid hose. Beyond that I am not prepared to say anything. We live very far from any con-genteri district in our part of the world.

6139. In your opinion, Major Councilian, is there a tendency on the part of the farmers to part with their best mares, to sell them, and breed from an inferior close of mure !- Decidedly, and in certain districts very much so. In other districts the farmers seem to understand breeding better, and they often stick to a Down in the coutbern end a good many of them do, but taking the whole country all round they are far too apt to get rid of their good mures and that it turns out had, what would you do-deprive the horse of his certificate !- Yes, I should do that. His

6140. Is that tendency greater than it need to be?
—I think it is. I think they sell their young narron
more readily than they used to. ore readily than they used to. 6161. What is your opinion as to the desirability

of breeding from sound good mares !- I think that any good young mure from three years old and upwards is worth keeping by any farmer if he can make any use of her.

6142. I muse, rather, relatively to the importance of the stellion. Do you think it is equally important

to breed from a good mare as it is to breed from a good sire !-- Ob, pertainly, good are independent, or suppost any way in which farmer can be induced to keep their best sures!—
Yes, I can. Perhaps if you would allow me I would read some ideas that I just down on the subject of that, and of the thoroughbred borse as well. Ther are not altogether my own ideas; they are partially derived

from the bints of other people and partly from my own observation. There are some points on which I think some recody might be found. First, I would own observation. have a more rigorous selection of thoroughbred sires, and I would register none that got a woody or unsound stock. This would entail arms expense and some Stocks. Item would prevent much unscordings, for some of the registered stallices I know of have been motorious for gotting unsund stock. I would clues these as Class L on the register. I would have a classified register. I would make a sooud class, and would register in it three-quarter-bred sizes-that is, siren having three thoroughbond crosses to one strain,

sound. Third, I would have all sizes examined, if

nossible, and to those which were sound I would aware a certificate of soundness and suitability, provided they a certaintie to wearants and summarity, provided they had good shape and action. This would let in some of the country sires which had been getting a very subsubic stock and which the farmers like to use, and I think it would gradually drive out the amount and nondescript stellion. I would put those as Class III. on the register, but I should be inclined to may that the feet two only might be subsidized. The third class I would leave to be used by the farmers as they liked but would give them a certificate of spundness and sets. Fearthly, I would give premiums to all panel well-shaped marin from three to ten yours old severed by one of the registered thoroughtred shallons of

possibly by one of the record class. Fifthly, I would register the foals of such mores, giving the owner a certificate as to its breeding, and giving its solou: sed any marks tending to identify it, so that the owner could produce a warranty as to its breeding when he was nolling it. This would enhance the value for min, and would do away with finitions pedgree-making, and it would be more easily curried out then at first it may appear. I would subsidies all selected sires, so that small farmers owning the premium mores I suntioned could have their service at a low fee-that up all selected sizes of the first two classes. I would leave the farmers themselves to deal with the third class. I am aware that none of those remedies taken by itself would have any great effect, but I believe if all those suggestions were adopted a more saleship home would come into the market than is now the

case, and this in a few years time. 6164. You think that in selecting the sires, as I understand, they ought to be selected not only in view of the soundness of the borse itself and its qualification, but it view of the stock that he has get !-- I do, and I am driven to that conclusion by knowing stallion which were registered—and I have got one particularly in my mind-and which were notorious for griting unscund stock. Nearly all the stock were unsumal. That home is not registered now, and be is not in the country, I am glad to say, but there are others besides. 6145. If you take the stock into consideration and

continuing on the register, and continuing to get unsound stock cannot be a good thing for the county. 8146. You prepare to grant a certification to stalling, not anything in the sature of a lifecont— Well, a license would lead to legislation of county. You could not do that without legislation, has at the same time I think the effect of giving a bose a cornidence for soundness and suitability—for his shape as well as his soundness—would belp in time to drive inferire and unacound stallings get of the country. 61:57. By what machinery would you suggest that all this should be carried out 1-4t could be done in an amplified way under the scheme of the Royal

Dublin Society by amplifying the existing scheme to a certain extent. It would entail some makey and some 6148. Do you think it should be done by the Royal Dublin Society !-- That I am not propered to The scheme of the Royal Dublin Society has

worked very well in some districts, and not so well in others. It has worked unequally it seems to me. That may be the fault of the farmers, not the fault of the Royal Dublin Society. But in some cases the maret exhibited have been very poor. In others they have been very good. Very often the farmers don't like the distance ; they say they have got to go so for. If they have got to go 90 miles with a mare you don't get at the heat mares sometimes. I have beard scena armers with good mares say " we don't like to go so for; it is a very long way; we might not get selected when we go there."

6149. It would be a rather formidable undertaking provided the sire had good action and shape and was

to do this all over the country !- Yes, but I think

melon secretking very desstip is done you cannot hope to schieve much improvement. 6150 Assuming that some scheme of that blad overld be undertaken, do you think it ought to be corried out in localities by local societies !-- You, by local societies

and no doubt, inspectors would have to be amerinted. I wrongen and veterinary surgeons would have to be a suppose, and vatorinary surgeons would paid for the exactination of those snimals. 6151. I mean if there was any money grant or money from the Royal Dublin Society or some central

boly, do you think it ought to be entrusted to local people!—Yes, I do, because I think the local people would be more likely to get at the horses. They would

6162. Do you think the farmers renerally in your

district are good judges as to the best nort of size to district are good judges as to the test age of size to sait their mures, and so on i-Yes. It hink the furners is the conthern out of the county breed with a deal of judgment, and they have always done so. They have sot a taste for horse-brooding. part of the county they have use get it so much. They go for the law oless of fee, and the proximity of the

stallers. That is what governs a great many of them, 6153. Do you think generally that the quality and the grantity of the horses have increased or deteriorated or remained about the same !- Well, I think there are just as many house bred to-day. You see that from the local fairs. You see a great many horses there, but you see an enormous proporderance of horses not sold at all. They have a great many defects : of course I are aware that there are a version

of dealers in the country by whose they are picked up before they not into the fairs. Before all went to the here tay got into the fairs. Some an wear to the faun now a great many of the hores are picked up before they get into the fairs now, they are monely in ordered in the fairs now, they are monely all from two to four your olds. 5154. Do you tim't that the price of the better

studity harm—the hunter and the harrest horse—is long up 5-No. For the high class horse the price rechably is an good as ever; for the second class house, the harness borne of the lower grades there is 40 per cent. I know that from buying and so'ling movelf. At the some time I will say this, that if a horse has got some ctyle and action he will find a market; there will be a market for him, he will be

5156 About these Clydrolale sizes, would you have form registered also in Well, they certainly ought to

be examined I think us to their simulates.
4165. You rould not endower to chimate them
out of the country t—No. I then't think I would,
because them one sense of them that get a very good
stock—thereughly good and cound. But taking them
perceally I don't think they have been a good oreas
that part of female. They didn't still the little
that part of female. They didn't still the little for that past of Iraland, rasy mun't sunt as non-all Irish mare I think at all. \$157. Mr. Whence ... What are the shief selling

for in your district! - Will, there is Kilkerny and
Sov Ross, and there is Waterford, and in next
eccusiv, Channel, that a great many of the Kilkerny horses get into.

6158. Clemmel is the chief fair for the good hoeses? -Yes, but there are a good many sold in New Ross in the country of Wexfired. It is a large horse fair. the county of Wexford. It is a large horse fair. 6189. Would you be in favour of registering any of there half-bred sizes that have not loom proved by their stock !- No. I would say that every house should

be proved by his stock as well as by his appearance.

6160. Bo that you would make good stock a sine
que non 5.—Yes, I have been driven to that conclusion as the best thing to do.

0161. I think you said you would also set up registration of the foals 1—Yes. 5163. Have you thought by what machinery you would carry out the registersion !—No. I think that would be a most troublescene thing to work, but at the more time it would do away with what everybody

making that goes on. It would be a sort of hall-mark on the feal on the cas;

6163. Did you hear it has been suggested to us by
two or three witnesses that the registration should be

curried out by the Petty Sessions Clerk !-- I have not heard that 6164. Do you think that that would be a practical suggestion?-He might be put down to carry out the

more uschanical part of it. But of course the horses would have to be ensuined by somebody else. 6165. Oh, of course; I mean merely as to registra-

6105. Do you think that if registration was established the people would fall in with it 1—Yes, I

think the farmers would see the advantage of it if they got a good foal.

6167. Do you think that boing able to give a true
pedigree of a house in solling to a dealer would gut
his value up !— You, and I think it would put the value up to the man who hought him; if a dealer

bought how he might add to her price in selling again by saving " I have a certificate of the breaking of this 6166. You said you would give premisus to mores

to encourage the farmers to keep their good encour-6169. Have you throught of the amount at all !-

No ; that would depend upon the amount of money available for the purpose 6170. But say a promium of £10—do you think a valuable mare if he were offered a good price for hord

—Yes, I think it would tend to do so. It might not in

every case, but many farmers would do it.

6171. Do you think that action is a valuable item 6172. Charavan Has the Royal Deblin Scrictor

scheme been in operation in your part of the country? 6173. In it goarnelly successfull-Yes, I was tolking yesterday to the Chairman, Mr. Smithwick, who knows as much about the breeding of horses as any one in Ireland; he is an excellent judge bimoelf; he said that in score districts it had been successful

but he said he was afraid that they didn't keep their best traves, and that they didn't come up the saw an improvement in the foals within the last two or three mars; there was a better class of feals bred; but taking it all in all he thought the best mores did not come forward, and that the class of mores they had to adjudicate on wors not as really good as those were

in the country.

Giff. Do you know how much the Society have to
spend in your district!—I think it is from £50 to
£50 as well as I remember, but I am not quite certain. did know, but I forget. I dok know, but I lingth.

6176 I gather from you that this motter of the
registration of feels would be a purely voluntary
matter. A purely voluntary matter. I may stote

that that was a suggestion made to me. I thought of something of the kind myself, but it was made to me by a man who thoroughly understands the breed-ing of largest, and whose father for fifty years have as high class hunters as any man in the county.

6176. You think it would pay the farmer to be

side to produce this registration—that he would set a better price 1-I do; it would make people certain that the pedigree was right. SITT. And as to the stallions, that would be

outs, and as to use seamons, that would be roluntary also; if a man obose to have his stallion examined he would get a certificate; if he did not chose to he need not!—He need not, but the channe

are that he would if the stallion was sound. 6178. As to the marcs, you would give a direct premium !- I would give a direct premium to the 6179. And the effect of that would be to trud to Dec. 1, 1991 Major J. H. Doggetture.

kness the better class of mares in the country; of course the result would draund largely upon the amount of the premium 1-It would, of course. 6180. Did you read the whole of the paper !-- I have given you evidence on most of it, but these were

\$181. Is there anything else on the paper you would like to read !- I will look at it; it is only roughly made out. I would say that in my belief the very small farmer cannot make home-breeding pay; be carmed informed the fee as a rate; he cannot afford the fee as a rate; he cannot afford to feed the feel in the first year; they want feeding when they are young, and as a rule the small farmer cannot afferd to do that I have seen a great many colts sold for a very low reice. even up to four years old. I think if a farmer could get £10 for every your be would do very well—that is £10 the first year, £20 for the second, and up to £10 for a four-ven-old. But very for that at all. The majority do not got that price at all. If he could do that he would do very well. But when you see a four-year-old, and I saw plenty of them sold in fairs for \$15-1 saw one the other day, not a bad one, for £14-if they are sold from £10 to £18 one must conclude that that won't pay. A four-yearold hullock would pay him a great deal better 6182. Do yot think, or a rule, they find their fosh reporty !—The small farmers do not. The large

armore, who go in for breeding, do. They give them a little hran and turnips, and purhaps cate and bay in winter, or cles they put then on good gens when there is clearly of it to keep for the winter. The small farmer cannot do that : he has not got the land. 6183. If, an yeu say, that it cannot, in your opinion pay the small farmer, won't that cure shelf, the small farmer will give up breeding !-- Many of them keep on taying it. You see the small farmer bringing a colt into the fair and colling him for £18 or £16 as a fouryear-old; I don't think that can pay him. The better class of farmers can make it pay; they have got some feeling to give their colts; the others have not.

6184. We should like to hear anything you can tell

us on this or any other points !- I was saying that some mores do not suit the thoroughbred. I have tried them myself. I have lad a mare—a small coh mare—that I brought over from England; I tried her with a thereaghbad horse and she never produced a feel worth anything. I sent her to a good half-bred boses in the country that I know was getting good stock, and I have a bose by him now—the best general utility home I ever bad. There are some

which have been getting good feals—half-hred homes, sound borses. They got a stock that furnees one rendily self, and I think it would be a pity to do anything to push them out. But I say I would have them selected, put on a register by themselves. getting the best stock they would gradually give to roing to local sires that did not get good stock What they went is to have sires evenly distributed throughout the country. In some ports of the country there are plenty; in others too few, except inferior

6185. You think the distance is a socious consideration to the farmer !- You, I do. If the farmer has to go a long distance, 15, or 16, or 18 miles-if he has to do that again and again to bring his more for ber trials, it entalls a good deal of trouble and true. and they won't do it. 6156. Do they leave their feals out all the winter!

Yes, a great many do. If they have not a run on a hill or anything of that kind they will leave them

6157. Do you wish to say anything else to the Commission !—I should like to say, generally, that I believe myself the thoroughtred house see the heat house for our county, for they have generally peured therrselves to be the best homes, if you gut the right 5185. I gather from you that you think that the thoroughbred horse is host, except for certain mares, and that you think for them, a half-beed horse with a convilarable number of thoroughbred crosses in him would be best !—Yes, if he has got shape and action

and gets good stock, I think be suits some years 6189. Lord RATHEGUNELL-You are aware that he money at the disposal of the Royal Dablia Society is very limited !-- Yes, I know that

6190. Your scheme with record to recourse and registration would cost money 1-Oh, ves. 6191. Do you think if the money was there all difficulties could be got over 1-Of course, I think that if the money was increased more would be done. I am aware about the difficulty. I think if every suggestion I make were carried out there would still be a certain difficulty. But I think it would

tend very much to improve the breed of hones-through the country.

6192. Even if it did cost mapey, if the money was forthorning you could get over all difficulties .- Well mates that do not produce good stock from a thorough-6193. CHARREAN.—Is there snything more you would like to my i—I think not, my lord. bred, also there have been some horses in the country

Mr. JOHN CHARLES FOOTS, West Lodge, Tullow, examined.

Mr. John 6194. CHARMAN,-You live at West Lodge, Co. Waterford !- You sir. 6195. Have you had any personal experience of borse-breeding !— For five and twenty years. 6196. What class of horses do you breed !-Generally hunters, and some of them turned out good

earriage becses, but they were chiefly hunters. 6197. Your object is to get leasters, I suppose !--Yes 6198. And if he does not do for a huntert.-He does for a carriage horse if he has action enough.
6190. What kind of mares do you breed from t

Well, I breed from the one stock for forty years. She was an old mare as far as I could understood My father bought bor, and she was a "Merry Andrew" and the sire was "Lottery." At that time they were the very best horses that were kept in our part of the That was the information I got as to my old mare edam that was forty yours ago whon she would have been been you know. The old mare I have now in twenty-five years of non.

6200. How many mores have you now !-- I have four now, siz.
6301. You generally have about that number !--

Three, four, and two. 6202. Have you any stallion of your own !- No. 6203. What class of stallion do you put your mare to 1-Well, I try to suit-chiefly thoroughbreds. If I can get them to sait the mores I would have nothing

but a thoroughbred, but I would risher have a these quarters heed stallion than a bad thoroughbred 6304. Sconer have a good three quarters hed !-Yes; I would expect to have sensiting out of him. nothing out of the other.

6205. Is your part of the country well supplied with thereughbred stallious!—Fairly. 6206. And half-bred !-- Oh, say smoont of half brods, and the worst breeds-wretched things-6207. Most of the half-bred horses are wretabed things in your opinion, they are not much account !-Oh, not at all. The small farmers think they would

Mr. John

year olds. I bring them in then and break them, you may may, until they are five. They are five when I

(208. Do you sell them at fairs or direct to the yen buy from me and take them over to England. I

have sold a good many to dealers. 6210. Do you breed from two-year-olds !--Oh, no, siz. I would not approve of it at all ; it radus them ; is makes woods of them; they never grow. My idea in that the nourishment that would go to support the foal—that the mother would require it for berself to

develop her. I would breed from a three-year-old and 6311. Is is at all customery in your part of the country to breed from two-year-olds t.—Yes, a great many of them do. They are under the idea that a time-wear-old more will not breed, which is a fallary,

They are under the idea that a two-year-old will and that a three-year-old will not, but I have found then to always.
6312 What class of horse do you use on

farm-do you breed your own farm horses!-No; I have very little tillage, and I have a common old here that does that for me. I would rather pay for the tillage being done than keep a bad horse.

6818. Are there small boldings or large boldings

about you !-- A good many of them are small--40, 50, 100, 100, and 200 acres. Some of them are smaller thus that ; some are 30 acres.
6214. Do the occupiers of the small boldings of twenty or thirty acros-do they breed !- They do, if they have a mare. They are under the idea that it

is a great thing to have a reare in foal not knowing what the offspring may turn out, and that they would make maney some day or celer at the fair 6215. Do won think that the mares in your dis-

trict are as good as they used to be !-- Yen, we have sene very good mares in our district; they are good 5216. Are they as good or better than they used to

be !- Weil, they are more breedy than they were. don't think thry have altogether the same amount of bone. They are of a different class. They are longer in the legs and longer in the bodies than the old class of mores that I remember.

6317. Not such good bone t-Not as good bone. \$218. Would you consider that to be a fulling off

\$219. And so to the sires, are they sound as a rule the thoroughbred sizes !—Well, some of them are.

\$220. I don't want to specify particular ones, I want your general opinion !-- Well, I don't know. Ob, here are some of them—I would not say they all are. A great many of them are not.

6321. Are they as good as they used to be in ferrors days !-- I think not. They may have bigger pedigrees, but I don't think they are as good as some of the old sime. 6222. Do you think the farmers are more inclined

than they used to be to sell their best marss, and to beed from inferior case t...Oh, yes. 6233. Why is that t...Poverty. They are so poor they cannot afford to keep them.

6224. Do you think that it is on account of the farmer being poorer, or on account of the fact that fireign or other governments will give more money for the mars 1—No; to depression in all sorts of re-sion. They caused afford it. And then the landicel requires his rent, and they think if they owe £20, and they can get £30 or £40 for a good brood mare, they will pay the lendlerd—that is if they are inclined—but a good many of them are not, whether y have it or not, and that will leave a belance of £30, and that goes to pay the aboptroper.

less !-- I don't know. I think it is more so now. 6256. Do you know where these marts go to-do Charles Frott. they go abroad!—I think they go to the foreigners.

6127. Within your recollection does the foreigness buy more than be used!—I think he huys now more than over he did.

6225. That must have always been the case more or . 20c. 1, 100

6229. Let then run t—Yes.
6229. Let then run until they are four-year-olds!—
6229. Let them run until they are four-year-olds!—
Until they are four-year-olds. From the time they are wessed I let them run. I think it is the very best thing. I don't appears of pumparing animals at all I has then run and it downlore their runsales of the present of the second of the

sees thing. I won a appears or pumparing measures at all. I let them run and it develops their muscles, of course giving them a little heeting. I would not do that on the top of a mountain. I would like to have them in a place of abelter. I have particularly good

them in a place of theirer. I have particularly good shelter myself. Perhaps what I do would not suit everyone. I have very good siziler, and I have between exceed only places, but they would rather stop out than go into the bouse. 6231, Do you hand feed at all t—Nothing, except during a lead winter I give them a little hay. They have pleaty of grass to est on the land, and a fine

6332. Are there say Olydesiske or Hackmey sires in your part of the country!—No, sin. 6333. And you have so experience of breeding from Hackneys or Chydesiske!—No, I have not—mon. 6324. In the Royal Dablin Society! sobrate in

eperation about you!—Yes, siz.

6135. What have been its effects in your opinion! Well, I think I carnet my it is doing very much. It does not give enough money. £100 in the County Waterfeet is a very poor thing. I believe it County Waterfeed is a very poor thing. I believe it is very difficult to get the money, so we must be

6216. Do you know how long it has been in operation in the County Waterford 1—Three or four years, 6257. As to prices that you get for the stock you rodnor, are you getting as good prices as you did

fifteen or twonty years ago-bigger prices or less prices!—Less prices. I get more now than I did then, demand and supply, most of these good beeses go to England. 6238. Do you know what kind of prices they get for an inferior class of horse—is the price as good as

it used to be !-- Oh, no, sir, a very bad price. No one cares for an inferior class of borse; they are 6539. They are not worth now as much as they were !-- No, sir.

6240. Do you think anything could be done to nervoyle or induce the farmers to keep their best mares to breed from instead of soiling them 5-I do;

I think by giving larger prints, and by allowing a longer time for going in for those shows. I would limit the age to fifteen instead of four. A great many people may have a mare; she may be a very useful maze; she may be bunted until also is twelve or thirisen; and then she breaks down, it would be very hard to put her out of that. I would limit it to fifteen years.
6241. Did you hear what the former witness said

with regard to giving certificates to stallions and registering feals?—Yes, sir. 6242. Do you agree with him at all !- I would 6343. Do you igree with aim at an image water after no statition in my country without paying a license. I would license than all. I think it would do away with all the weeds and bad once. 6243. You would not allow a stallien to be in the

entry without he was licensed!-I would not What is the use of allowing them in the country to breed inferior animals t 6244. What anthority would you entrust with the duty of licensing those which you would have horness for 1-Ob, I would have a local committee that know

Printed image disitised by the University of Southampton Library Digitisation Unit Printed image digitised by the University of Southampton Library Digitisation Unit

them. It might not be a very pleasant thing for the local committee to do, but at the same time I think

Der 1, 1806.

Mr. John

a local committee would know the had ones better than a stronger. There is no use in letting a had Charles Footle stallion go along through the country.

5245. But would not the lond committee be per-

here more or less interested in the owners of the stallions !- They may, and if they do not give licenses very hard to knew, but I certainly would have a Incal committee and a veterinary surgeon

6245. And as to the registration of feals, do you think that is practicable, or would it be any use ?-I think it would be the very best thing to register them. I would put a half-grown or five shiffings registry on them, and have a sire registered in each county. I would have then examined there when

they were twelve months old, and I would see if they were sound or likely to go on well. I would have then examined at two years old and up to three sometimes or saything of that sort I would south them cut. It would be a genrantee to everyone as to the breeding of the animal; but some people do not attach much importance to the breeding. 6247. I was going to ask you are the dealers who

buy your horses particular as to the pedigree of stock, buy your horses particular as to site poligross of stock, the breed of them I—Some of them are; but I was selling a horse to a dealer at one time, I thought I would get more money by telling him how he was brod. He torred around, and est, "I did not sak his breeding; leave that to me. I can find a poligros for that fellew if it suits may. 6248. In your opinion one the formers in your

district be trusted to select the most suitable sizes for the mores they have got provided the sires are there !-- Yes, they are very keen, some of them. But the normarity of the size owner goes a long way with them, at least amongst the lower class—the small farmers and that nort.

6349. The popularity of the sire or the owner !-Oh, the popularity of the owner. If he gives credit, and if he treats his customers to a few planes now and egain, he will be very popular amongst a certain 6350. Are there a sufficiency of sires in your

county, enough of them !- Do you morn thoroughbred 5 6331. Yes :--Yes, there are, but they belong to local possile.
5252. Have the farmers to go a long distance to get to them I... No. in my district they have not --not

periups more then ten miles.
6263. What is the general fee charged 1—£3 and £5, and down I suppose to half a sorecriga. 6264. Are there many horses bought for the cavelry remounts in your part of the country !- Not

6256. Mr. Warnen.—Do you keep your mares entirely for hereding—the brood mares you refer

never work them 6256. Keep them entirely for breeding !- Yes. 6257. You don't believe in feeding your feel well the first winter !- No.

6258. You have never tried that 1-I never did They go on well enough for me without trying that,

6276. CHARRIMAN.-You live in the County of Carlow !- Yes. 6277. Are you farming there !- Yes.

6378. And you breed horses yourself 1-Yes. 6278. Have you done so for some time t-Well, I mave been breeding on my own account for IS

Printed image digitized by the University of Southempton Library Digitization Unit

or 16 years, and my father hred a good many There are a good many. 6280. What class of house du you try to produce t 6305. Mostly for agricultural purposes !- I don't -A good many classes -bunters, working beenes, and think so. They are protty mixed—bunters and har-ness-horses and a good deal of very low class. harness horses,

6169. In yours very good land !-Oh, well it is rogh land, but suitable land; it is good land, sound land-a good run on it you know. 6350. But you have never tried feeding the fals well the first winter to see how they would do in conperison with those you did not feed 1-I tried man he was delicate; he did'nt do well; he never graw.

6081. You knew he was delicate in the first instance !-- Yes, I thought I would do better for him;

6102, I think you said you were in favour of a local committee; how would you select your local committee for the examination of sires - Wall Y would my that the chairman of our Waterfeed committee, Captain Maxwell, who is a first-cute judge, be would be a very good man, and let him associate three or four with himself.

6263. I am not talking of individuals. Would you leave it to the charman of the county committee to select his committee !- Curtainly, leave it to him. 6164. You would not give the heroders any poles in the selection !-- Of course, I would take in two or three breeders, large farmers. 6265. As regards the farmers themselves, would wa

give them any voice in the selection of the committeefairs-would you let them have a voice !-- Of course 6966. You would take their orinions !-- I would

of course, sir; they ought to be the best judges of what would suit themselves. 6267. Have you any experience of selling to foreign buyers 1-I sold a few, sic \$108. Did they generally ask you about the poli-greent—Yes, latterly they have saked me. Not in

the beginning. Letterly they have.
6209. You think it would be an advantage to be able to give true pedigrees for the freeign huyers !wrote it down for them and they took it. 6270. They attach importance to the pedigrees !think so, siz.

6371. Did you sell many harness horses t—No; I menlly go for hunters. 6373. Channean.—Have you any suggestions, Mr. Foots, that you would like to give the Commission or to how the industry of horse-breeding can be improved in your locality; snything that you consider could be done!—Try and encourage the farmers to keep their

good mures, and I said to extend the period to fifteen 6273. You think as far as the sires are conserned? - You would have an opportunity of seeing the young stock of a mare if she comes up to fifteen. 6374. And you think that the sires should be Bleensed !--Oh, I think the sires should be Bonned. and the had ones done away with at any cost. 6376, Augthing clse you would like to say, Mr

Fonts 1-Except I think I said it before if we could get more money for the county than £100 a-year; it would be an encouragement to give more morey to the owners of good mares. It would be an encouragement to them. I would do away with the valuation altogether—either that or raise it to £200. The man whose valuation is \$500 a-year would be more likely to keep a good mare than the man whose raleation is only £50.

Mr. Tricusa Corrusas, Maplestown, Rathvilly, Co. Carlow, examined.

6281. Do you breed any hunters 1-Yes. 6362. What do you find pays you best to hreed? -I think, taking a given number, that the street beavy horses pays bost.

6283. The strong heavy bornes, what are they used for !—The agricultural horse. 5234. Are there many horses beed about you!-

goss. What kind of mores do you use vormelf!--I have one three-part-beed more and a couple of plain tred mares or cross-bred. 6287. Do you think the quality of the maces is as good as it used to be throughout your county b-I think not at all as good. I am certain of it, 6288. You think the farmers are selling their heat

wares out of the country altogether !-- I do 6289. What beed of stallions are generally used-thoroughbred i-Both thoroughbred horses and some

draught hornes.

2590, Draught horses !—Yes. 2591, What are they!—Clydestale. 2692, Ie there a Clydestale size steading near yes!—Yes—withm 10 miles; there is one in \$293. Are there many of them in the county !-

Not meny. 5294. Any Hashneys !- No, sir. 5295. Have you bred from the Chydodale sny produce you have sold us bunters or harness horses?

No, sir, not as bunders or harness-horses; I den't think you can breed them that way.

all !-No, sir ; I bred some from the Cleveland hause with small well-bred mares, and f found then a very useful karns. \$297. Do you think the Cleveland and Clydesdales

are suitable for your country !- I think the Claveland would be a restable cross with some of the small meres. I think he would be a more suitable horse then the Clydesiale.

on the Copuspanie.

5198. Do you know saything about the Hackney?

No, sir; nothing except what I beard tailed about him. I don't know what a Hackney is.

6293. Is the Royal Dublin Society's Scheme in

operation in your county !- Yes. 6230. How long has it been in operation !-- I think somewhere about three years.

6231. Has it deno my good do you think !-- I think

2932. Not had much effect !- I have not seen \$253. Are the horses produced in your part of the sountry as good as they used to be 1-I think not

How do you account for their not being so

good t-I think in a great measure from the good mares being sold out of the country, and people beening from things that are not ever to sell 6235. Do the prices keep up !- For the high class of hunters I think the prices are as good as ever ; for say other class, I think they have gone down our-

\$236. Have you head from any half-bared stallions? -I have, from what are called half-bred stallions. I

would not breed from them from aknion, 6237. You mean you would prefer a thoroughbred t Certainly, if I had a mare to suit him. \$238. Are there a sufficient number of thorough-

bred stallions in your part of the country !- I think there is a very good number of very good horses in 6239. Are many horses in your district bought by

the Government!-At Castledermot fair there are a good many bought sometimes. 6240. What do you think could be done to keep the best mares in the country!-I think by giving

good prizes for the best broad marce it might have a bradency to keep them in the country; in a great many cases I think it is want of capital that makes the ecple sell their good mazes; and how to remedy that

6241. These good marge that so many of the witnecese complain of are leaving the country are they fetching hipper prices then they did twenty years ago!—No, I think not that closs. 6042. I mean the good mares !- The really good high-sless bunters would be worth as much.

6343. I vacon the mores !—I think not. 6244. Where do they go to !—The tramway comanies take a fairish unmber of them 6245. In your spinion do you think the foreign governments are buying more of our good mares than they need to1-I den't know that; I could not 6146, Lord RATEBONNELL.-Would you at

of what is called the half-bred sire with a seed deal of theroughbood brooding if he had bone and action !--

6247. What would you yourself use, a half-leed of that description or a Clydesciale or Cleveland 1—It would depend on the class of mare; if I had hone enough I would rather use a horse with breeding ; but if I had a light well-bred more, I would rather cross ber with a Cleveland.

6248. I am talking of the half-bred sire with pleat of bone and action, which would you send to f-1 con't exactly understand. 6149. I mean the ball-bred sire I am speaking o with a certain amount of theroughteed crossing if

be had bone, and was a strong and active borse, which would you send to-him or a Cleveland !--I would rather sund to the kulf-beed horse. 6250. With regard to your names, have you had

6330. Wills regard to your many, here you many happ moves that you bred hunters from t.—No, not large enough; I find it easy to bred a twelve or twelve and a half stone horse, but not higger; I can 6251. The nimal mire you have bred from is a email type 1—Yes.

6252. Mr. WEINCH.-Your evidence is that it pays best to breed strong draught houses !- Yes; I think a given number taken all round, they leave you more profit than the other horses. \$253. Referring to other horses, you are chiefly

referring to thoroughbreds —Yes.

4254. Have you beed many harness horses —Net 6255. Have you sold them at good prices - Yes,

6255. Did you find it easy to get action !- No ; it is not so easy to get good action.

6207. If you had good action would it be of any use to you !-- Oir, certainly.

6155. You think it is a good thing t...It is the chief point with the barness house. diffe. The class of burses you see in Castledermen fair, are they much wome than they used to be !-

they run un or

6300. What is the average price they run up or down to 1...In some of the last falm I have seen threeyear olds sold at £10, and some of them as low as £8. 6241. beed i-No. 1262. You new three-year-olds sald at £8 and £101 Yes.

5263. And Castledermot is considered the best fair in that district !- Yes. \$254. Are many troopers bought there !-- There are, a good many.

\$265. Are they bought direct from the breeders or by dealers !- By dealers generally. 6266. Do you know what prices the brasslers get for them 1-I don't know; they get very different

6267. Did you see many sold !—Not personally.
6263. Then you say the mares bare deteriorated—
by that you mean that they have get weedy and
smaller !—Xes, and mixed up, and bred every

\$209. Do you think it would be a good thing that

all hopeco should be registered !-- Yes. 6270. So that it could be ascertained how they were beed 1-Yes.

6271. You think the farmers would fall in with that iden and corry it out 1-I do-I think they Mr. Harbert Wassen.

you would like to say to the Commission !- I think in our district I would not confue them to oue class of beese; it may suit some to breed from the thoroughhred, while others may be induced to breed from another sort of horse, and I think as the present time, with the

6272. The CHAIRMAN.—Is there anything else that

class of fillies in our country—that is with the mare they have—if any horse were sent into the eventy, the Cleveland would be the best horse and most likely to improve the breed of homes. I dun't say that would be the way to improve the breed of hunters, but it would be the way to improve the present mares.

Mr. Hessener Wanners, Gurrandensy Castle, Queen's County, examined,

6224. What is your oninion of the half-hard stalliest -I think the half-hred stallion is very useful. 8215. Provided of course that he is sorred and suitable 1-Oh, undoubtedly.

8296. What is your opiniou as to the Clydesials or Cleveland or aux other breed !- Is there not a great contenst between the Cleveland and Clydesdale !-- My idea is that the Cleveland is a rectal horse, and that the Civdesdale is hardly wanted, except in very heavy tillage land where they are required with the plough,

in parts of Kilkonny and parts of Kildare. 6257. There are Clydesdale sires in your part of be country 1—There are 6298. Are there any Gleveland sires !- No.

6299. Any Hackney sires !—No, not serving, 6300. Have you any experience of Hackneys!—

6301. Where did you gain that !- In this country triffingly, and in America principally. 5302. Have you over head from the Hackney size! 6303. And with what results !- Well, I lay great

stees on the choice of any sire—not in the breed but in the choice of the individual, throughbeed or Hask ney; I believe there are very charming horses in the Hackney Book, and I believe there are equally bad ones: I think the Hackney with a cross or two of 6304. As a stallier !- Yes, as a stallion; that is to say a stallion out of a thoroughbred mure by a pure-

bred Hackney. Is it not a fact that thoroughtred bornes out be entered in the Hackmer Book, and see, as a matter of fact; and also that horses of two or three crosses of thoroughbred bleed are eligible to be

6305. I only wanted to find out what you mean You think a stallion would be useful crossed between a thoroughbred and a Hackney !- You my lord.

6300. Have you seen such stellines!—I have. 6307. And their produce !—And their produce. 63(6. Where-in your own part of the country !-

In America. 63(0). And you spacove of them 1-I do, my lark I think they are a resful all round azimal, and I think

a maze of that breeding would be a valuable aring crossed with a thoroughbeed sire-her produce, I

mean.

8310. Then you, yourself—you have no objection to
the introduction of Hashney blood into your part of
the country!—None, if he was of right type. Some of them are very short and cerky, and with abort posterns. They are, undeshieldly, bud enimals; some, I remarked, are very short from their hip to their

6311. Is the Royal Dublin Society's scheme in operation in your district — For years.

6312. Has it does any good !— It has done harn.

6313. In what way!—It has put a theroughbod
airs before the small farmer, which is a ruinstim.

considering the mares he has, and that is the reason you hear of three and four-year-olds being sold for 48, £10, and £20. If they had a proper size they would be worth £30 and upwards, but the miserable the roughlived sires which have been in the country, and which have been let chesp to the small farmer, has rained him; he has had the use of a horse with a long in the peris of the country you are acquainted with are as good as they ought to be !—Undoubtedly not. poligree for £1, and it has done harm. 5314 What class do you think he ought to go to !-

5273. CHAIRMAN.-You live in the County Carlow !

-Queen's County, my lord, but I am intimetaly acensuated with the county Curlow. 6274. Have you a farm in the county of Carlow !-

5175. Mr. Where abouts in Queen's oney do you live !- The eastern portion between

Kilkenny and Carlow. 6276. CHAIRMAN.-You live in Queen's county !-

6277 Which are you best sequented with-Queen's county or Carlow !- Both, equally re 5278. Did you bear the evidence of the last witness

with respect to the part of Carlow that he is sequented with t-Yes. 8375. Do you agree chiefly with what he mid !-Printy so; I believe the difficulty myself is that the

thoroughbred we have had in the country has rained 6680. What is the matter with the thoroughlood house i—At least 50 per cent, of the thoroughloods will never got a weight-curring hunter.

with about seven inches or eight inches of house below the lines, and possibly able to carry 10 stone, will never get a kuntor except off z Clydesdale mare, 6781. Do you kneed homes yourself t—Yes, my 8182. In both places !- In both places. 6283. What kind of mares do you breed from?-

From all kinds; I like the mare with a cross or two of thoroughbred bleed the best, 6284. And you breed for what!—I attempt to breed aunters; I have also used Clydesdale sizes to

week keed mares, and they are an utter fallers.
6285. They were a failure i—Yes, my lord.
6388. And as far as the hunter is concerned
you found the thoroughlyed the best—Oh, un-

doubtedly; the failure in that instance is in the mares being too small. 6267. You think the mares have deteriorated !-I think they have.

8388. Not so good as they used to be 1-I don't think they are.
6289. I gather from what you said you stiribute that to the inferiority of the thoroughbred sire i—
I think that is largely to blame—very much as,
They are both unsownd and small, and the consistent large one you see is not a success. I know several large thoroughted horses have been unacount them. selves, and have produced stock singularly unsound. 6270. Do you think the deterioration is due at all

to the best mares being sold out of the country !--It is, undoubtedly ; but I blame the sizes just as much as selling the mores. 6391. Do you know about these foreign govern-ments haying those mares more than they used to t-Thoy don't come to the fairs for them ; the occasional

trooper purchased is purchased by the dealer 6293. I mean that farence are more inchined to sell good marcs and breed from inferior ones than they used to be. I want to find on to what that tendency is due, whother it is that they are offered large prices or what !- They are not offered large prices for them ; as a matter of fact a gelding of equal quality is worth more than the filty.

6293. You don't think the thoroughbred stallions

Printed image digitised by the University of Southampton Library Digitisation Unit Printed image digitised by the University of Southernoton Library Digitisation Unit

wer lord. 6316. Lord RATHEDONNELL.—Is the soft cenerally of

a light neture about you !-- Well, perhaps, I should 5 237. When the heavy horse is not reprined i... Not

2016. You mentioned about Hackneys; do you conaider the Hackney a stout breed of horse !- I do 4310 Good staving newsp... I am talking of his eleving power; that is what I mean by stout t.-He munct stay as long as a thoroughboad horse, but I

den't lyon that is a point that will touch the smaller farmer, that wants to sell what he grows. He would We to penduce an animal that would renders the 6520. Would you advocate using a stallion that how

not very stout staying powers !- But the poor man. would allow him to use the house the produce of which would make the most money. 6321. Do you think that produce would go on second eroses !-- I think the cross of this Irish blood

with the thoroughbred would do away with all the waskness of the Hackney. 6322. Supposing there was a stallion of the hall bood staron you have montlered out of the old Telch

mare with two or those crosses of thorough breeding. if he had hone and substance and setten, would you exaider him a good sort of horse 1-Yes, better than the Hackney

6525. And you think it would be likely to do good to the smaller farmer if he had a horse of that descrip-

6524. In preference to any heavy been of any heard at all 1. Well, mores vary so mask ; but on the shatnest I would say yes, 6305. Do you consider the hone of the Cleveland as hard as the thoroughbred !- It is larger, but not so

6326. Mr. Wassicz.-Have you ever seen a halfbred horse, such as you speak of, with as good setting

\$327. Do you think that class of sire would be likely to beget as good setion !- The Hackney will get the best astion. 6318. Do wen know at all how the Variables Hook-

neys are largely bred !-No, sir; I do not \$329. Von know that a most many have a thomash. beed strain in them !... I do. 6330. You know that in Yorkshire they used the

thamaghbred house very largely in producing 6831. But you don't know out of what class of mares they are bred !-- I do not.

6437. Have you seen the result of the cross of the Hackney with the country-bred animals in America?

6533. And what class of animals do they produce? -A needs all record asimal with action that would be decidedly useful and a seller, 6234. Were the massa very angular and uneven in share !-No, they were not.

6336. What were they like 1-Not a wild mare by anyments, or pony—a mare of very considerable size. The State I refer to hed mares of considerable size. but I could not my what breed they were.

but I could not any what tree tany were.

6336. Were they would I—Not would,
6337. Was the production of the Harkmay hetter
than the dams!—The production was better, but the Hackney was a good one with a couple of crosses of thereognized blood—a hunting looking horse 6355. You are very much against the Circlesdale

6319. And you don't think it is required on the 6340. A lighter horse would do as well 1—Yea. 6341. Have rouhed any success in breeding hypters 1 Yor, considerable.

facuse in your district !-- No.

6342. What marce did you breed from 1-Half-bred maron, and what you might call common mayer. I have a couple of traveners

6343. You don't know how they were bred!-I know nothing about them.
6544. I think you said you had seen a good many

bad as well as good Hackneys !-- I have 6245. And have you seen as many had thoroughbooks

as good 1—I have—more, 6346. So that it is not a psculiarity of any breed that there should be a good many had animals in it t-

6347. And you think that giving prominence to the theroughtend over any other are acmally did an interv to the farmers of your district !- I should classify the animal you refer to.

6348. I understood you to say that your objection

to the Royal Dublin Society's scheme is that they only subsidies thoroughbeeds, that there are no suitable thoroughbrods in your district, and that they had encouraged the farmers to go to the thoroughbreds in preference to the horse that world soit they I. Onite

but the farmers are not judges. . 6349. The formers are not judges 5—No. 6340. You think the horse ought to be selected for them 5—Yes, without talling them so.

6361. You heard a good deal about reststration !-6352. Do you think it practicable that every horse

and more should be registered —There might be a difficulty with the marce; I would lienue all sires. 6853. Would you do that with a local committee or central body —By e central body; I would not trust a local committee very much. 6364. You think the infinences are too great!-

Not that ; but half the mon you meet breeding horses know nothing about it. 6366. You would prefer a committee of experts 1-

Yes. \$355. You think it is wranticable to register become as surposted !- I think it could be very easily managed.
6357. Do you think it would not up the price of

horses !-- I don't know that it would \$358. Are they very particular about pedigrees in America !- Yes, very America 1—xea, very,
5169. And you can generally ascertain there how
the house are head to Yea, you can

6360. And when they are put up for eaction their pedigrees given are generally correct t—Yes. 6361. Charman.—What part of America are you acquainted with 1—The North Western States—Lews,

Minnesota, Dakota, Nebesaka 4342. And you spent a good deal of time there !-Yee, three years. ce, tures year. 6163. Were you farming 1—Yes. 6164. Did you hreed houses there yourself 1—Yes. 6163. What do they try to breed in those States?

... They only aim at bounding the utility spinel to do 6166. For their own response !- Yes, for their own

purposes.
6367. It is an enermous district, if you can speak of It as one -all these States and Territories -but what

are agricultural-not like Montana, wild cattle countries—they are sgricultural and require bosses. 6368, What kind of sires !- Several kinds -- Clydesdales, Hackneys, Shire, Suffolk Pench, American trotters, and thoroughbreds, and French and German. 6369. Can you tell us et all which answered best

out of all that list !- In America !

Ter 1, 1996 Mr. Herbert

206

6370. Yes, those parts you are sequainted with 1-It is very difficult to say; I liked the American twetter with lots of thoroughbred blood better than any size there.

\$371. These Hackneys you spoke of had get a strong cross of theroughbred blood 1—Yes.

\$372. What were they used in 1—They were used.

for every purpose; but they were fine driving house with great power; none of the amusals I refer to were

used for the saddle.
6373. I suppose the saddle herse is not so much
naed in those parts 1—No, the peny is used. 6374. I think you said you thought the sire he should use ought to be selected for the farmer 1—

6378. Do you think the farmer would appeare of that i-What I menut by that was to place the describle kind of sire in the country. 637d. And for the hunters that you said you had been so successful in breeding, want sires did you use !- They were all by theroughbord horses; I think

that crossing a thoroughbred on a thoroughbred too often is a mintake; if you want to breed a borso to carry some weight you will have to begin with a more of great strength as a rule, and she will be a commoner mare than pedigrees will give you to believe. I might say that I beed one specially grand colt, and his grand

dam was by a Norfolk trotter.

6377. It's grand dam!—Yes; there was breeding before the Norfolk blood was introduced, and there there were two crosses of thoroughbred. That horse when four your old sold for £400 in England. 4318 Lord Eventory at Did you over heat him !-- He was just ridden quietly about the premises when a dealer came and took him. 6579. He went to England as a hunter !-Yes; he was bought by Hames

make as to what practically could be deno to improve the broad of horses in your past of the country !-- I have heard a great many suggestions, and I think Major Connellou, the first witness, made some useful suggestions. It means a lot of trouble and expense argustions. It means a not or trouble and expense in shoulding the seen to do it. A very simple thing to do would be to negister the abox and not touch the do would be to register the sires and not teach the You cannot buy maves and give them to him, comequantly you want to give him a sire between a thoroughhed and a Clydesdale that will produce him a mare that will be useful with a thoroughbred cross.

4351. Lord RATHDONNILL.—You don't man a

eron of the thoroughteed and Cleveland 1-No; 1 mean a distinct spinal. 6382. Did you not may you approved of the half-bred horse out of the Iriah mare stamp by a thoroughbred been i-Yes; I do. The great thing that is wanted in bone and power to make means.

6383. Mr. WRENCE,-Tou would grade up the meen by crossing the present means with a stronger class of stallions 1—Yes; exactly.

6384. And when graded up you would use the thorough heed in. Yes. 6335. Lord Barmonward. - Mr. Foots suggested that the produce of the registered stallings and mares

should be examined as readings, as two-year-olds, and

as three-rear-olds, and then if unsound should be accestched out 1—I would leave that altogether to the haver, and leave him to find out the emoundment. \$386. You would not register them !-- I would as

\$387. Mr. Whence,-You would register them as to pedigree, but you would register the sires as to soundness!—And the mares, too. If you are going to consister a foal. I would resister his dum. 6358. You would recistor the fouls as to breading but would register the stallions as to soundness !-Undoubtedly. I would allow no unsound house in the country. Public opinion will support the Royal Dablin Society in extinguishing unround hoeses.

6389. CHAIRMAN.—World you prefer registration

to blooms !--I would license as went, and object except she owner who had an unsound one is 310. Lord Raymenwar, --In the case of a side of the control of t woald you do at two-year-old and three-year-old if she was to remain in the country !- Offer a prize or give the man some subsidy to keep her if sound 6391. I thought you would not examine har !-- I would examine the dam before I registered her, and then the produce which would probably be sound, 6392. You would have to examine it too i—Yes. 6392. You would have to examine it too i-Yes. 6393. Chairman.—Have you any other suggestion

to make !-- I don't think so, my lord, except that I would have to differ from the opinion of one of the Queen's County witnesses who said the mares are good enough. 6394. When was that !- A few days since-I don't

lifts to mention names : he said he may/dered the sizes and mazes good enough, and to improve the price. I think that that is petting the cart before the horse, because if you improve the animal you got the price. I would give no stallion owner a subsidy; if he has got a good sire he will make a fortune. and get enough mores and too many. I would give no stallion owner a corner.

6305. Lord RATHUGETTL .- You would license him i - I would prevent the unround sire in the county, and there will be no ill-will or objection to that; the public would like to have the uncound

6396a. CHAIRMAN But what about the owners of 6396. Mr. Warren ... Thay would be a small min ority !-- Yes; you see the golding that has been a sire sold in the fairs, so I think the compensation you would have to give a man for doing away with his sire, altering him to a galding, would be triffing ; we often hear of unsound stallions and macund mares producing sound stock, but I think it is well to keep clear of them, though indeed I am bound to say that I know of a man bearing of a mare, suffering from a

large ring-hone, producing seven foals, all of which were perfectly free from it, and sold at five years old. at aver £100 such, 6397. You don't know how they ended their

#800. Lord Raymonways.....In it not possible for ring-bone to come from accident!-Possibly it did come from accident.

Mr. Remann O'Masser, Woodlews, Santon, exemined.

6399. CHATRIAN.—You live at Woodlawn, near Santry, so. Dublin 1. Yes, my lend. 6400. Are you interested in horse-breeding 1—Yes. 6401. What kind of horses do you generally breed? -Chiefly Clydesdales and Shires; some barness and some hunters I did breed some wars aro not cuits so many latterly. I chiefly so now for Chylesdales and

6402. Why have you changed \$-I found that the Chydsedale pays me much better and the Shire. Being so near Dublin I have a much better market and carriers. I can work those horses before they and corriers. I can work those homes before they come up to four or five years old, when I dispose of them in the city, on my own fares from two and a helf years old. I generally yoke two of them at a time, and then each of those two and a half year olds only does half a day's work, and that brings them into a good working condition afterwards for one. 5:03. What kind of mases do you breed from !— Circlemials and Shire success. 5:004. And what kind of stallout.—I profer the

6994. And what kind of stallions—I prefer the Optionable stalline to the Silver; I think be in a baster loose, he has hetter boxen and Grance, he gove better; with the Silver sheen, to any findin, this feequate went well away, but this hind park was awaying after than I doe's like a became of that starning if the obeam not go straight, and I think they are a handler and better here, with this and decame became,

that remark on some of them, that I could not keep them as strong that vary without bard day feeding as those that I never bend from as two-year olds of 0.07. You have from them as a three-year old I. I have from a three-year old, but I float that it is assorbest more difficult to get the three-year old in old than in get a fore-year old or a two-year old. I of 0.00 the old of 0.00 the old of 0.00 the old of 0.00 the following them are three-predicting inclines about 6.000. Any them are three-predicting inclines about

6400. Are there any thereughbred stallions about you!—There are, under the Koyal Duklin Society's selected and the Royal Duklin Society's selected the Royal Duklin Society's selected and the selection of the Royal Duklin Society's selected and the Royal Society and more about my own neighbourbook.

6409. Any half-bred stellions t—There may be

6179. Any half-heel stallines 1—There may be sence, but I do not approve at all of the half-heed stalline, I would like them pure of any breed. I find, from seeing the result of howe-heeding by half-herd stallines, that the means were inclined to run currly and to form the book in a round form and not a summer own or the hook.

proper can be hook.

6410. Wenn you brod hunders what stallises did you me!—Therenghiered stallions and a Opioshile boxer. I have brod a Opioshile boxer. I have brod a Opioshile boxer. I have brod a Opioshile boxer is that I was roads a present of by Mir. Warfall, the owner of Ben Bittley and I gave my Opioshiles boxes to dark move, and at three-year old I sale and it by its fer 4315-a, in logital. I then fillowed the next years and it level a moving and I think it was 450-li go for her a) she da a night core his was 450-li go for her a) she da a night core has

three-year old.

4111. As to the general quality of the braces in fell is that to the general quality of the braces in year district, do you think they are improving to I think they are about the same for the last twenty years—that is, in agricultural bornes.

4418. In the husting horses—In the husting loces; any hustour I see around me I think they

recess; say bustness I see around me I think they are equally good as they wren your age; you will get them as all times bad, armetimes you will get a more that may hered a good fool or two, and then the may have not as good a cos; she may breed a soft here or a very hardy horse one year, and the contrary the next vess.

16.13 Mers yn wegidigt on sy droet the Borgal Dubble Society a bowlen — Childri to werding revy well allower the country the solony thing that I have got to say to fail we show not say on more years for a few or say to make a short of a few of the first half or the brees; that is not the case, as early give 45,000 to the side that we are specifiging that all on the brees; that is not the case, as early give 45,000 to be side of the wearing just I aware and 42,000 to be limited of the wearing just I aware and 42,000 to be limited of the wearing just I aware and 42,000 to be limited of the wearing just I aware we could be first from good to be a first of the way we could be first from good good I am of options problems I aware for good good in a most options to be such as a first commend on the same have, we could be first from good good it as of ground problems I aware for good good and a most options of the same part of the sam

belong to the Tramway Company and their way into farmers' hands as brood marsal—Several of them ds ; I never brought any. 6431. Is it the custom among a good many of the smaller farmers to buy them 1—A great custom. 6432. So that a great many of the brood more

smaller favours to help them !—A great custom.

6432. So that a great many of the hroot pares
round Dublin come from the transways!—A great
number.

6433. You don't know how these transway house
are bred!—I don't know anything about them, they

must be very much oround,—I see some nice mans, 6534. Cantinax.—Have you any experience yearsalt of breeding from Hotoray sime 1—None; you hardsen have breed from Ab., Xianay Reverb horse, and the horse have been been been as to be 6435. You have no experience you of whether the Hockeay is soft or not-class to whether the Hockeay is soft or not-class and no yellow the horse of the horse of the horse my leed; but at I have already side, even such into Clydandsia and other dans I have bree hards.

from, and I have got note outsin in the same way from the same dears.

6436. I think you said that even if the Hadray was not, that as far as the sale yrice or value of the produce was concerned that would not tigniff — Hen't

know did 1 my blash.

Know what you nexten by that effect. I want is know what you nexten by that y per sinker persons for what the persons have understand back you did not think it a mandreal consideration whether the persons on we wan set not respect, any level, I did not mean that. If has been add that the Hackmany an very owil; I can not also to any whether they are or some in level from the conduction of the constraints of

by this scars more, more as the state of the scars more, there were not and beside-dist is what I mean, my local.

[18]. I wanted to know what year opinion on that was. It assumes to this—year might protect any saintable heres that would faith a good price, has if it between due to be such, allowage that would not a fleet year immediately, I penurus, in your opinion, is would not be a wise thing to monourage — Any raw understan.

my lord, to the Hashney?

6439. If was referring to the Hashney?—If it turned out to he soft of course you could utilize a securior on the form or in human work driving.

(Northeast strike, by direction of the Chairman, rande Guardian fidea).

G440. That gave me the impression it did not signify whether is turned out not or not I—III me the style of house before me that will suit my masked I buy him at once.

6441. And if fitterned out to be soft do you think you would buy again with equal confidence i... I would not go to the same place perhaps again.
6442. Lord RATECONNEL.... I notice in giving your criticone you have used the word "wa" in reference in the Royal Dublis Society a warell (upon... I would like it.)

ask you whether you are speaking on behalf of the Royal Dubbia Society or on your own 1-0n my own-0445. Mr. Wannes, "Con you tell need all when the supposed soft blood in the Hackneys conce in 1-I could not tell, because he is a period rada arised, as I have already said, and I don't blank he onto be

as I have already and, and I den't think he can be seen to se soft as some represent hire.

644. Do you know how Yorkshire Hackneys are brid!—I do; there is a good deal of thereughberd blood in them. I was over at last York Show, and

move the score of the most beautiful horses I cooks

as there score of the most beautiful horses I cooks

be look at.

6464. Lord Baymoscuria. Do you think they

have very good strong second thighs as a rule "They

have plenty of there, and good books and good gaskins

and splendid packed ribs and beautiful quarters, and

will set bind. It think they are a period model of a well set bind. It him they are a period model of a period of a peri

Ma. R. B.

prises, and I never consulted any one how I should made my mare to my horse. If there is a bad phon in my mare or a weak spec I watch that in the horse, and that is what I generally go for. 6447. You would not to admit of losing their maner approxing the Hackney stallien was used when they had expressed an opinion so strongly against his use, for it is in evidence already that they have !—It moreld not influence me at all, not until I had recoved

is myself.

64:8. I mean you would not have any fear of losing
their money i... I don't know for that.

64:9. Mr. Wanstu.... Do you know, as a metter of
eart, that the tends of Mosars. East and Messra.
Windows, and these big desless who object to Hackneys for their hig class of borees, in a mere haratelle as compared with the reasers trade of the

country i... I would say so. I don't know anything about those gentlessen, but I think there is room for every breed of hurses. 6450. If you go to an ordinary fair in the country do you see mony high class carvings horses in the fair i One short for some fifty we are here in this rity of Dublin-the remains of old thoroughbrods and words tarned into trans and ours—and they not able to raise

stemplyes, only kicking the stones out of the streets. They have no style, or elegance, or substance 6451. Do you know that there is a good demand Dublie for hornes horses with action 1-Gurta so. If I have many because bornes or wagges borses can sell there whenever I have them. always orders for harsess horses or wagger horses, or any horses I have to sell. have bred though have been heavy !-- Cludeniales and

Shares, and hunters and harmen borner 6453. You, but your lassters were bred from a Clydesdale and a thoroughbred horset-Quite so; a clean shouldered good theroughbred mare, and I had some beautiful fillies from her.

6454. CRAINMAN.—Have you enything you would fru to say to the Commission, Mr. O'Malley 1—I don't think I have anything more to say, only that I, some Years and, tried close breeding—in and in breedingthe result of that was in ten years I tried I had only one road rambi.

6455. In said in breeding of what 1-Of horses-Circiortales they had all mulformations over their bodies, their backs not right, their becks not right, their foom not right, so I storged it.

Mr. R. B. Bencey, Clarestoccia examined.

Mayo !—Yes.
6457. What is the nature of the district in which you realed !-- It is a congested district for the most part - recreation half of the Chesterowia Union is see-No, the prices me down considerably

6158. Do you brend breses yourself at all t... Yes. 6459. Do meny of the farmers near you breed \$460. What kind of became do they breed i-Harsees horses and horses for pulling heavy loads, earl horses, and they broad pole and small vorter

6461. Where do they sell them !-- At the fair of Chromeeris, and when they have good once they take them to the fair of Ballinssion and dispose of them there; secretizes dealers come into the district and buy them re-6662. Are the holdings small about you !-- In the composted division itself the holdings are all small. \$463. Do you know anything of the Congested Districts Bosov's stallings !- I con't know saything

shopt the Convented Districts Board's stelling know a good deal about the Hasimers I don't know short the Harkupya that the Congested Districts Board have sent out, but I know about the Hockmers hat have been in the district before that ; there have boon some Hockneys in Mount Partry belowed up to 5464. What are the stallions ownershy in the Sia-

triet !-- Ho'f-beed stallious and some thereughbood, 6465. And Hockneys !-- And Harkneys : the only serty who keeps Harkusys in the unishbourhood are the Witchell Brothers. 5688 What do you prefer yourself !-- I prefer for that district -- a congressed district -- a half-ired hunter

stallion with strong bone, plenty of zensols, measuring from 15-S to 16 hands. 6467. You think that he is likely to receive as hile a carriage or harness heree so the Hackney !--- Yes,

for the class of mares we have in that district 5688. What kind of mares are thay, to you know i.—They are a light class of suars, and the Hackney with them I fancy would not produce a

borse hig enough, tall enough.

6489. How do the people shout you treat their young stock—do they take sufficient care of them, do they bease them!—They house them in the winter season, and take fairly good one of there.

6470. Food them 5-Food them fairly well 6471. At what age ere they generally sold!-Sold at three-year-old, at four-year-old, and at two-year-old, and they sell them as fouls. 6472. Are the retes as rood as they used to be !--

6473, For all kinds !- For nearly all eleases of horses in that district. \$474. Are the farmers in your district inclined to sell their heat mayne and bread from their fufceior ones - Well, no ; they are inclined to keen their good ones !- Well, no; may are meaning they have an in-ferior close of feel produced and they have to dispose of the more and keep the feel when they want to realise and get some money out of them.

\$475. And you think your diviries is reflectently provided with suitable stallous !- Yes, I think there could be more stallious sent into the district; the halfbred bomter staffions that are in the district are private property, and the people have to pay so much for the 6476. What do you mean by a half-head hunter b-

One that is not a thoroughbred 6477. When you say the half-brod is a sentable heren do you mean the helf-bred with a sessiderable strain of thoroughbred !-Yes. 6478. Do you think saything ournt to be done in

the way of licensing or registering stallions !-- I conalder it would be a very good thing to register all at the time of registering I would consider it a very good thing to give certificates to the owners of the followithmen. pass them over to purchasers later on, and it would be a supernior that the foals were of the slare than

hardly call it a distinct puny.

649). How has that been produced do you know \$ Out of the old Irish pony, the mountainy puny, and
the kunter; there is a good pony sometimes produced. out of the mountainy pony with the thoroughbred.

6481. What are those ponics used for 1—They are used in barness and for different purposes.

upping. 8482. In them any sale for them out of the country \$ -Oh, there is,

Zvs. 1, 1895. Mr. H. R. Begley.

6483. Mr. Wassen.- Have the mores run down very much in your district within the last few years ! -Yes, they have ; they have deteriorated considerably. 6484. From what causes do you think |-Well, I believe it is principally from the fact that the thoroughhand become such into the district by the Royal Dublin Society were too light, and did not mate requerly with gues we had in the district, and preduced a weedy class of reares.

GES. The year things there went none stranger room interduced to lead them up !- Yes, they want a halfhard viru of the description 1 gave before, something like 16 hands high, with plenty of bones and muscle, and a dash of breading in him. 6486. When you are speaking of the half-bred size.

what particular district do you refer to !- I refer to the district around Chremoeris, the low lands where the teamt farmers are fairly wealthy and able to live confertally.

6437. And what class of sire would you recommend for the poorer districts nearer the mountains !- The 6418. To you think the Haskney in the heat size

for that district !-- I do: I have had a good deal of experience of the Hackmey in that way myself, I have beed from him for the last 10 years. 6189. With what result !-- I have got a small pony

6100. With what result best have got a small pury from an ordinary mountainy pony by a Hackney belong-ing to the filtehells of Tourmakesdy and Meantportry, subal Bur of the Wen.—she could make an English usile in three minutes. 6490. And keep it up 1-Yes, I drove her 56 Irish miles in one day. They repeatedly driven her 12 Irish miles in an harr and ten miresten and I

prizes with her for action in horzess at the Hellymount. Heres Show. I have hunted her with ten stone on her back along with the South Mayo hounds, and she performed well across country. 6491. And could keep up and stay 1-And stay.

woontainy nowy by Star of the West, a represent I event tell the irreding further than that he was

6404. Mr. Western.—Prom Yorkshire 1.—From England. 6405. Dut they have bad Hackneys in that district for some years 1—Yes; I have got ponies by Hackneys that they had below liter of the West, and they were equally good, but not so good as this one by Star of the West.

6406. You think Star of the West was the heat

sire :- I do ; I have known The Willow, a beese land by ttre :—I do ; I have known The Willow, a beese lavel by Mr. Vahy, v.a., Ballinrobe, took the champion wall jump in all the shows. 6137. He was by Star of the West 1-Yes.

6406. He took the prine in Hellymount!--Yes, and in Roscommon and Bulliansies, and the all-round prize in Castlerea : I have bunted charmide him and he corrying thirteen stone; hearted the whole season. and now him fluish up in the evening freeh and hearty 6409. And he was not by Star of the West, tor ? -Yes 2500. Have you known many good animals got by

Star of the West in that district !- Yes, I have four others myself get by Star of the West; can I have four with the South Mayo hounds, enrying twelve steas. sometimes thirteen stone, and the could jump any-thing. I have obtentions put her seroes a five-free

6501. Then your experience of animals head by Hackmeys is not that they are soft 1—No; on the contrary I believe there is no beating them for derability.

6503. Are they sound, do their stock seem sound? -Prefertly sound. 6503. And easily reared !-- Very easily reared : as early reared as a donker.

4505. Is been-breeding a considerable industry using the people there !- It is. 6505. Both in the lowkards you speak of and in the recovered Materials 1. Ves 6506. Then you don't think that may suggestion to prevent these people broading horses, or not to oncourage there to been horner, would be precipable !-don't think so; I think it would be very injuring

6507. You think they must go on breeding t-I 6306. And do they use many of their rainrals them-selves early on the forms 1.—They break those in at two years old, and week them along then; sometimes they sell them recording as more course for them. 6509. What are the chief fairs about there's. Chromovris, Bullina, Castlehar, Sermford, E.H. hannis, Bullincobe, and Tunn.

6510. And I think you said you would advocate a register for horson and give certificates to the bacaday I

6511. Have you thought at all how you would get that earried not ; you have heard it supported that the system should be just in operation through the Putty Sections Clerk—do you think that would be a prac-tical way of doing it i... I would much prefer to use it handed over to the authorities, the pelice of the

6512. Can you tell me at all about the opinion of the people in your district of the claws of sire they would like 1... They are all of occasion that the halfbred kunter sire I have described already in the class they want about Chremorris. 6513. You don't know the column of the needs in

the poorer districts !-- I den't know the opinion of the people in the other districts; but I know what class of pony can be produced by the Hackney horse and e mesatain peny. 6514. CHAIRMAN.—When you speak of the exexperience you have had of this paymentar home. Star

of the West !- Yes. 6515. How long has be been in the country !- He has gene out of the country about two years.

6516. How long was he in the country i—About five years; they change their houses very often.

6517. Who do !—The Mitchells, the owners of the

brene 6518. Do you know where he went to !-- Tkey took him book to England.

6319. What has replaced blant-There is another Hockey, Van day's know who they took him array -They wanted to bring other blood into the district; they mustly get all the good mountainy puries served by this sire, and they buy up the produce at renumerative prices, all the foals produced, and this

them away to England.

6521. Yet; but I wanted to know if you could tell 6031. Yes; but I wanted to know it you could see at all if you have got any like why if this herm was so successful and so much liked he was taken aways—I cannot say. I suppose the Mitchells could tell that. He was private property, sail they could dis with them so they chose.

6122. Mr. Wannen.—Do you know the muse of

the horse that was there before "Star of the West"! -" A la morie."

- "A is more.

6523. And do you know that the present horse is

"Lord Rattler" !- That is his name.

6524. And have not the Mesers, Mitchell a good revealer of Hackney mores of their own standing at Tourmakeady !-- Yes. 6525. They have a stud of their own that they broad with the horses they have from time to time:

-Xes, and they also buy all the feels in the derict.

6536. Before Mr. Mitchell began Hackney breeding do you know was be engaged in other home breeding there b-I council say. He is not usury years in the

Printed masse discussed by the Hursersity of Southwanton Library Distinguise Host Printed image distinged by the Linearaby of Southampton Library Distingtion Line

West.

6526. But he buys up a good number of fillies bred by the country people from his own bonet— He buys nearly all, and hardly gives the people of

9537. At long prices !- At prices that pay them-6518. Lord Retribuserall.-What is be ! In be a horse dealer !- I don't know, really. He has a

shooting lodge at Tourmakendy. 5519. CRAIDMAN.-What does be do with them ! ... Takes then over to England. 6530. Lord RATEDONNELL.—All of them 1—Yes.

6531. CRAIRMAN.—Do you know what fee they charge for "Star of the West!—£3, I think, to an estader. 5532. Mr. Wusnen.-And less to his own tenants?

-Very little to his own tenants-a few shillings. 6535, CHARRAN.-You said just now that you Lave a high opinion of the half-bred as being suitable to the district !-- Yes ; suitable to the district round

Claremorris. 6534. You don't think the Hacksey is suitable there, or do you think it is suitable !- I don't think

6535. You think the Hackney is more suitable when crossed with the mountain ponyl-Yes, that is my own experience of it. I tried it in that

5536. All the produce of this Hackney sice and these mountain pontes, you say, is bought and taken out of the country !-- Yes, most of them are taken away, with the exception of a few ponies that may be bred by private parties who send their mores there and get them served by the locue.

6557. Have you say practical experience of the ureduce at three or four-years old ?- As a three-yearold I took a price with it in harners, and one of these ponies as a four year old took a primugain.

6518. Yes, you have told us your own experience I wanted to know rather if the produce is generally takes out of the country !-- Oh, yes; the produce in renerally taken out of the country \$559. You connot tell generally throughout the district what this produce turns out to be as three or four year-olds !-- (knew several of them that belonged

to private parties who kept them and bred for themselves and they were very good.

6340. What kind of a sire was he!—About 15 hands high—"Size of the West "was. He was long

6541. And these mountain ponies that he was put o !- They were long, low ponies, something of the old Irish breed as described, with good reins and good

backs, end well coupled. 6542. Do you know at all what becomes of their produce that is taken dut of the country !-- I don't know what they do with them afterweek. I got a nob bred by "Stor of the West" out of a half-bred man, and it was a very good cross. I said it as a long

price at Ballinssloe. prior at paramasses.

5543. Anything you would like to say to the Com-mission 1—I think there is nothing particular that I have to say except that we would wish to see home

neighbourhood.
6544. Lord Raymonwant.—Did I understand you legis. to say that you comisier that the Royal Dublin Society had done haves in your district !— Yes. 6545. I think then you said it was owing to their laying sent down certain theoreuchbred stellings !-

Yes, on account of sending down a threesurphred stollion that did not seit in the datriet. 6546. What stailon was that !- He was too light

6547. What stallion was that !- Looksley Hall and The Course 6548. What year was that in 1-I could not give the exact year-about five years ago.

6549. That was mider a different scheme, though, to what their present scheme in !- Yes, it was 6550. Do you consider that their scheme as worked et present in your district is doing barm !-- Well, it has done no good, all the hunters that are got by these sires are wondy 6551. It is for that reason you would needer to use

e good half-bred stallien, approved of, with plenty of bone and minimum and action 5-Yes, because these mants have been tried with the half-bred before the thoroughberd came into the district and they have bred a very good closs of horses, which have been nold in Bellimetice at fairly good prices.

6552. What nors of half-bred stallion was in your

district that you referred to just now !- A hunter class a half-bred. 6503. You have some of that class there !- We

6554. Have you say of wint has been described as ougrel breed, half Clydesdale and half courses !--There are some of them too in the district

6535. Are they patronised!—Very little, but I believe if there is not some change they will be patronised because the people that have bred from these thoroughbrods that have been sent in are so discusted with the produce that they say they will brood from anything now rather than send their mores to a

thoroughbred. 6556. Are there any thoroughbred borser in your district L. There are son 6557. Are they all bad !- People don't wish to

broad from them, they consider what is produced by them as not strong enough and they are not marketable, as foals they are too deliests, not able to bear any nost of hardship. As yearings they cannot dispuse of them, as two-year-olds they cannot work thern, as three-year-olds they see lying over in their hands and then they have to sell their dams and keep these weedy things and brend from them. 6558. What thoroughbred stallious are in your

district !-- I earnot just think of the names of them \$550. Cuateman.—Is there any stallion belonging to the Congested Districts Board near you !- No.

6100. What is the nearest !- Swinford, that is 14 The Commission adjourned to next morning.

2 E 2

THIRTEENTH DAY .- WEDNESDAY, DECEMBER 2ND, 1896.

Present:-THE EARL OF DEXEAVEN R.P. (in the Chair), LORD RATHDONNELL, LORD ASSIGNME. SEE, T. H. G. ESMONDE, M.P., Mr. F. S. WRENCH, Mr. J. L. CARKW, M.P., and

Mr. Hugh NEVILLE, Secretary,

Mr. R. Kuwany avaconal.

6161. CHAIRVAY .- You live in the county Kildare. 6578. What is your opinion about them 1 -- I don't do true mobile... You like them. I think them is very little desired for 6162 New Straffant-Yes thrir stock now. At the same tions, the farmers find

6563. At Assetuwn Stud Facult-I don't exactly live there: I keep horses there 6364. Are you the manager of the Blood Stock and Hunter Sale and Insurance Agency !- Yes, Inm. 6565 What is the nature of that agency !- I keep

212

Mr. E

hooks in which houses from all parts of Ireland are registered for sale. I advertise occasionally in Engregulatered for nair. I advertise occasionally in Enghomes privately in that many 6366. Does the business of the agency take you

6500. Does the business of the agency take you about released a good deal 1—Xes; that and other business takes no through all parts of Ireland. I am reasonably acquainted almost with every part of freland where horses are bred. I don't know the North, but every other part of Ireland I am fairly ocquainted with 1 learns of the land I am fairly ocquainted.

with. I know all the horse false.

6167. Does your hu-iness take you to England!—
I am taken to York-hire every week for about six menths out of the year. 6568. What do you go to Yorkshire for !-- I am connected with the cattle trade. I so there once a

week for six months out of the year without missing a week. a week.

6862. Do you breed horses yourself !—Yes, rather
largely. I keep two thoroughbred stallions.

6870. What kind are your moves !—Nothing but

thoroughbred mores. 617. Nothing but theroughbeed stock 5—Yes; I have a half-bred, and I keep her for old friendship more than saything slee. I have got rid of all other

half-head mares I had. 6072. What class of horse is generally heed in your set of Kildare !- I think that in Kildare most people try to breed a really good hunter, with the excep-tion of those like myself who prefer to breed thereuzhheed former, but the poorer formers maturally ter to

6073. What class of home do you think is the more profitable to breed!—For the farmers the best high-cians bunter they can breed. It is very hard for a poor farmer who is not very artistic in handling young lurses to breed anything but a hunter. He is not altogether, perhaps, scientific energy to breed thoroughteed stock that will sell well, and it is far better for him to confine himself to breeding high. alass hunters and high-class carriage horses.

6374. Which doyou find payabest to breed—hunters or horses horses 1—Oh, hunters, or tainly. Then very often if a borne that farmers have got, by thoroughbred stallions, fail in becoming a hunter it very often becomes a largest berse, provided it is well prown. 6575. Do you knop your stalliess entirely for the service of thoroughbred stock !—No; I have one horse

which gets very few thoroughbred marramall half. breis, all farmers' marse almost.

6376. Are there plenty of stallions in your part of Kildard — I think quite sufficient good horses. Kil-dars has got the advantage of having the Carragh, which is the headquarters of the turf, and you have

which is the nearpeaseers of the virt, and you have the advantage of having thoroughbred stallions always. there. Kildare farmers have, I think everytimal advantages for breeding 6377. Are there say half-heed stallings surving to that part of the country 1-Indeed, there are.

they are chean and convenient, and they are were often more fruitful then thoroughbred horses that are not properly hooled after or properly exercised, and the furnish go to them sometimes for that season, box. 6570. To get the hunter and high-clear carriess horses in your part of the country you would prefer a thoroughbord b-Oh cortainly.

6580. Are there may other stallions of any other breed in your part of the country i- Not exactly in my part of the country. There is a half-bred, a few Cledendale horses—not very many; they are more Clydenda's burses—not very many; they are more confined to county Dublin then in my immediate

6581. Would they be need to get herses for the service of the trans and care in Duhlin!—I think the formers like that part of horse and I think were often find they can sell a rough two-year old for any port

and him after the spring work is over. They are bought for vanners and transmers at low prices that scarcely pays to produce there.

6082. What do they use for their own from week! Bome of them we very useful mares that will breed a very useful mares that will breed a very useful bunter. Others of them who are

Improved of the advantage of breeding a good loose breed half-beed animals and sell them at a low price. but a great many of the Kildore formers keep very neeful mares 4083. What kind of mares do they generally breed

from 1-Maren that are got by a thoroughteed horse ont of, perhaps, some of the old native mares that one one of, perhaps, some of the old native mares test one hears infined about. I mean mares that itsee back to the old nation mores 6584. Is the quality of the marce, generally, as tod as it used to be i-In may part of the country

really think it is ; I am inclined to think it is, but Kiddre being near the Currugh is exceptional.

than they used to be to sell their best mares and breed from infector coast—I think the Kildare farmers see the advantage of keeping their good mares more than the farmers throughout Ireland see it. They are so near the Curragh, and they see the advantage of the high prices that horses are sold at ownshings of the aigh prices that sorres are sen as there. I think a great many of them like to keep their good marea. I know many of them who don't like to park with the marea at all that they have been soccensful with. But I am accommitted with other necto of Ireland, and I know that in these places the formers always sell, the price is always tempting for

6588. Is the price kept up as it used to be i-I think that high-class hunters are sold dearer than ever they were—high-class hunters and houses calculated to win races and steepleshaues. I think Ireland, during the last ten or fifteen years, has become the world's market for a really good horse, and I think it is the daty of Irishmen to maintain that constation. 6387. We have had a good deal of evidence as to the price of high-cises barness berses and hunters !-r price is as good as ever it was, 6588. And we have got evidence that the inferior clauses have gone down in price I—Yes, I think the

American competition has had as much to do with

occount, 6037. If a half-beed stallion with good bure and good sortion of the bunter class was standing is the country, and that must door to him a buildred Clydesdale, or a Clydesdale, or a Clevedand was a standing, which do you think the farmers would

outpressents, or a utpressible, or a Circumania training, which do you think this flurarer variable thinking so in far, if all were standing at his said thinking so in far, if all were standing at his said thinking to the said thinking the said that the said the s

on have each animal exemined before registration you have each animal examined server registration; I shiek it would be a very big business to have moh animal examined—that is, each azimal got by a registered sire. 6340 Supposing the mare to be registered also.

on would not allow the produce of that more to be registered without examination !- I would if the produce was got by a registered sire. 6611. Regardless of its soundness or unsoundness !

Is would be an enormous husiness. I think it world not be possible. In my opinion all steels not be the projectored stallions should be projected wearlies of their soundness

4642. You think that would be too hig a business? ... Well, it would be a big basiness after a few years.

It would be hardly possible, but not feasible. If they were out of a registered mue, and got by a registered stalling, I think that would be sufficient, for scredusers now be trusted to always defend there-

selves against unsound animals \$543. Purchasers might, but if a mare were left in the country would you register this mere before she is going to breed? Would you have her restatement as a mare out of a registered animal, or would you have her examined !- I think it could

to be sufficient if sho is got by a registered stalling out of a registered score 6516. Mr. Canum .-- You spoke of "Abdellah" as a laff-bred: is he not practically a theroughheed!

—Yes; there is only a distant state in blue.

6047. And that is the style of half-bred you appears of i-Wall, yes, if I would approve of any isifored. I always prefer a thoroughbord, but not being able to obtain a thoroughbord, I don't in the

4648. He is prectically a thoroughled too 1— Tee; be has a distant skin that cannot be traced, 4649. You spoke of Concourse posies Eading their way into Leinster 1—Yes; about fifty per 5550. You don't know if they were produced by Hackage or not i-I asked the question of our mon at the last fair in Nose, who had a number of them,

and he told me they were not. I saked if he last got any by Government or Hackney boyers and be 665). Do you think it would be possible in Ireland to indute the Haskney broad in the communical districts and keep them there !-- Certainly not. They would be prechased with others to be imported into

Lekaster, which are the hunter producing grounds in Ireland, to be sold there. \$652. And you think they would deteriorate the beating stock in Leinster !-- I am inclined to think 6653. Your experience, from what you have heard of Hackney breeding in Yorkshire, is that the crossing

of Hackneys is disapproved of by the well-known broders !-- Any broaders I have spoken to are very find of their Hackneys when knot to themselves; they dont so largely advocate the oron; they don't appears of the cross; they don't approve of the toming with the country mares in Yorkshire.

\$654. You think breeding from a thoroughbred by s thoroughbood size will get good hunting stock and

harness stock as well i-Certainly. 6656. And that it will be more popular with the bayers from Exclored 1-Yes, cortain 6605. Have you any experience of breeding from hypercold fillest—Personally, none. A two year-

old is too young to breed from unless it is an excepod is too young to uress and, foodly developed animal. 6407. Mr. Winnen,—You would have thoroughbood stallions or horses with a slight stain I—Thus is my

6658. You would not have cart horses or half-leed eart becase at all ! — I would not like to curtail certain

furners in certain districts in the north where it is all tillage from bereding Circlesdale burses. 6650. What about Kildare and the south !-- We have no anxiety whatever for them. 6600. Do you know that out of the fifty-eight stallions in Kildare eighteen are cart horses or halfheed to I don't exactly know the number. I know the number. I know the number.

many as that.

6661. Do you know that care bornes and half-bred

6662. There are a great many stallions in the country that ought not to be in it 1-Certainly.

6563. You have referred to the west of Ireland Does your experience of the west go beyond Westport? -I know Wostport and Newport and that country, 6465. Have you leen to Achill I-I have not. here been to Halling and beyond that convey. think I have been to Bolmullet, but not lately.

6615. Have you been in Connemara bod bare been ry little into Connessors ; not much beyond Galway. 6666. Denegal you don't know !-- I don't. 6667. Do you know the western coast of Kerry and

Cork !-- Yes. 0468. How far have you been there!--To Dingle, sherrivorn, Valentia. Calentiyorn. 0800. In Cork, have you been to Schull !-- I don't think I have ever been to Schull.

5570. Von would recommend that the penies there should be crossed with a thoroughbrod size!-Certainly; the buggest boned and best thoroughtred size possible; the better he is the better for the cross. 6671. Do you know there have been some sales bately of the purelts of that gross in Dublin 1... I was

6672. You don't know there were twenty-rig corflogs and two-year-old ponies by a thoroughbred horse sald in Dublin at an average of seven guizens a piece lately I-I woun't aware of it. 6573. You didn't bear of Colonel Blaba's sale of

Communes ponies got by a throwughted home !-- I did hear of it, but I didn't pay much attention. 6074. You dish't have that thirteen of them were sold at an average of 52s, 1—1 dish's. 6575. That is not a very encouraging result of the eross i-Mest discourseine; but I would like is to be understood that my principal reason for advacating the thoroughteed stallion there is that quite 50 pe

cont. of them porter same into Leinster, and I think if they were got... I will not say by a Heckney... but by mre inferior been nor a Welch now. that the formers up here in Lapsater who bey thou would man become tired of buying and would not buy them 6470. You think the tends for these people is to produce foals, so that if these term out well so here people will go buck and buy again 1—Exactly.

6677. If you found that the result of the Hackneys

4677. If you found that the revent of the Hostmery were bought and produced good prices you night alter your opinion 5—Most certainly. I would nather prefer from what I see—Hackneys to the small breed of Welsh scenies which I understand have been also imported into the West. 6678. You would needer the Hackpey to the Welsh

pony !- Yes. pony: -- xes.

6879. Would you prefer the Hucksey to an Arah
or a Barb!--X con't say thut. I have no expirience
of econ-head stock of a Hackney or a Barb.

6100. You would prefer a thoroughbred to an Arab or a Barb !- Certainly. 6681. I suppose you know that in these congreted districts it is necessary to have a sire that will recduce hardy stock. I mean that the stock that is got has to go through great hardships, the land being ery wrotehod !- Yes; the stock they keen down

there has to be hardy. 668). I think you referred to the Hackney not crossing well with the country mares in Yorkshire Mr. E. Kenzely.

.— I have only that as bearsay from the Vorkables gentlemon I meet.
6688. You have not been about through the country districts in Yochshire to see what these mares were !—! have seen them at fairs.
6688. Are they not very much coarser than anything we have in this country!—Yes.
6688. With a big of our blood in them !—Yes : a.

very had class of mare.
6186. A mare that wants a thoroughlised horse if
possible 1—I should say so.

possects be-1 security and not at all like asything we have in Irehard b-I think they are the worst class of marcs I ever now—the small fastners' seases. In Yorkshire. I think that going into a Yorkshire fair, where you see the house of the country, I have never sees anything so thusny and underbed-fielding.

over sees saytessy of the any part of frederic, 6658. They are coarse and common 1—They are comes and common When I go to Descaster and so the horses that ply from the station to the course I always wonder have they got so many load horses tagether, send must of these are half-bred Hashmeys. 6458. You are strongly in favour of lineasing

men. You are attengty in Isveor of linearing radians, and also of forming a bunter's stud look in Irehard t—Yes; I think it would be a great industrated to beyone from about 90 men of the 6600. How far would you go in registration; would you register every horse, or merely form a hunter's stud took on the lines of the Rustare In-

handers' Han been to Registed 1—I am afraid I don't know energic about the Heaters' Improvement Society lines in England.

409 L. What is your idea of a heaters' stad book?

0071. When is your serious as a scalar of the produce of registered stallions. It is hard to make a beginning said to draw the line in this hanters' soul beek.

6029. Dal was been it movement by some of the

witames that every horse should be registered with the Potty Sowiam sirek !—Every stallice, 6103. That every horse should be registered in exactly the same way as days !—I think that would be a very good suggestion if it was practicable. 6103. If a hunter's that home was formed would

there by any danger of the four that you untiripate of Hanknoys deteriorating hanters — If the stud book was fermed I certainly think it would lessen the danger, but the danger might still exist. Gifth. But how could that be, if the breeding of the animals was registered b—There might be a good.

ourse, and now evident that to, it too insecting of the astronals was repletered better might be a good that the property of the second section of the into the book. I am told that froud has related in a great range cases in the Hackony stat beek in Yorkshire. I was told that only guatefully by a Verkshire man. I was told that only statefully have law up tight the book that are not Hackony at all. 0000. Yor think it would be hard to guard against

front is—4 co. 6997. But is would leasen the danger i—3 think the sted book would outsirily leasen the danger. 6909. I think you made a magastica at the end of your quarries here that you were not quite satisfact with what the Government here does not quite satisfact with what the Government here deen with regard to herea-breeding to Irchard up to the present, and sugmented that steps should be taken to improve the

from 1—Orthology. Good to clause to induce to improve the Good Windows Spewment of the fair, the quest plant is necessary 1—I think the fairs as they need present in the commission of the find the state of the true on commissioners. The commissioners throughout lendand are dress from the publichess infection, and they would like to keep reliable to the publichess infection, and they would like to be applicable and the commissioners of the commiss

there. I think all the good fairs in Ireland should be provided with a field where you can get a good test of what a lower can de-fineer, galley, jurya, and so on. I think this would be an indirectant to foreign beyone to come into the country. I think the foreign beyone to come into the country. I think the strength of the common test of the project who look after these, but the superiodizers of the various towns who look after them, with some energtions only.

970. You think if the accommendation was foremed.

670V. You think it the accommediation was improved it would help the tends in bornes I—Without ideals. I which it is a crying accousity to improve the fairs and the markets where the assall furners dispose of their stools. 6701. De you approve of the present Royal Dublis. 80elety's scheme 0—1 think it is working very well indeed. I should like to emphasize the fact that I indeed. I should like to emphasize the fact that I

indeed. I should like to conprisance the fact that I think the fairs in Ireland ser very disgueshily managed by the various commissioners who have the province of looking after them, with some exceptions. Limerick and Killsonay.

Limerick and Kitherany.

6702. Mr. Canne.—These are the town fairs of courset.—Tin town fairs.

6703. Channess—Are there as many been sold

at folias a three moud to be-I—think the high-class hunter is sold privately, but the young because as always sold in the fair—three and four-para olds. 670s. At when age are they moutly sold in your part of the country—from and five-para olds moutly at four years. 6705. They run out all the time !—Almast all of

t 6705. They run out all the time!—Almost all of it them run out the whole of the winter. 6705. Are they generally fed at all !—I think they if feed them runnimally; not, perhaps, as well as they might feed those. 6707. I gather that you think that in the western

all distriction and the widely part of the country the her possible statistics would be a good and thereopelism with plenty of lone 1—Than is strengty my options. While the property of the property of the country of the would see the shifts to pay the feet that would have it to be charged by private owners for horses of that held 1—I folick you can buy very worth throughdown 1—I folick you can by very worth throughdown 1—I folick you can by the property of the 1-1 folick you can by the property of the 1-1 folick you can be you will be 1-1 folick you can be you will be 1-1 folick you can be you a drong 1-1 folick you can be you and 1-1 folick you can be you a drong 1-1 folick you can be you a drong 1-1 folick you can be you and 1-1 folick you can be you and 1-1 folick you can be you can be you and 1-1 folick you can be you and 1-1 folick you can be you can be you and 1-1 folick you can be you can be you can be you can be you and 1-1 folick you can be you can

allow bits to sove as a not used bitset fee.

670. Yes tablek the Government could have more
a spitchle sizes for the same price that they gave fee
the Hackroy stallions L-1 am not absolutely assure
of what the Hackroys costs.

6710. Do you takks that a thoroughbred stallion
of the clawy yes have in your mind can be begin for

say, 2500 on an avenue-L-1 do.

might not be able to get him within six secutes, but take your time, and, I think, you would get a secure of the presentable supply for \$200 cash, good thing if such 9711. You think is would be a good thing if such process wore standing in the same district at the Horkneys as the same fee so that people could have their chiefel—I should like to see these have

bave their choice?—I should like to see these have their choice.

6712. I think I gather generally that your opinion of the Hockney is that the pure Hackney is volumble, and is micable, but that the cross is not good!— That is the opinion I gathered from my visits to

Softshire. All the Hackury breeden there are very strong advocates of the discoughted Hackury, and have made very considerable sums of nucey bressles.

6118. Assuming there being any monty fether in configuration of the second of the second

done of the aires in time would improve. 6714. It has been suggested that east Government homes paight to distributed about the country or sold chean throughout the country !- You mean cast chesp throughout the contamy I to mend care think that all the troopers one sees are all remonable well-heed mares. I think they would do steel 4715. In these sawthing else you can request to the

Commission on the subject of improving the breed of boxes conceally b-Nothing further than my arguenos that all useful horses should be registered—that all thoroughland horses should be registered. I should like to see the unsound horses of every class extinuated emirely. Let the owners use them if show wish for their own mares, but not use them to do harm to the public.

gen to use pouce.

8716. Von serald have cortain horses not absolutable theroughbord-that is, not in the stud book-allowed to be registered korves like "Maylooy," for instance ! Certainly-horses like "Maybor." 5717. How far would you go in the direction of registering horses that are not thoroughbred, say, if they were examined and approved by Yes, and with

all stallings I should no rather for performance house had been a good steenlechase horse, and if he had a stain that could not be trood. I should our tainly permit him to be registered in the hunter stud 6718. You think a horse should not be recistered entil there was some experience of his stock !-- If the

home was right in every other way, say a good-looking well-heed have, and had been a fair performer, I den't think any one would have any necessity to see his stock. 6719. Lord Barupoungua.-You advocate the brustion of a stud book !-- Or stree general system of registration which could be used by foreign pur-

\$770. You said a stud book decidedly !-- Yes, \$721. I suppose that has to be closed at some time Colonel D. Dr. Bonney examinal

observe coming into the country.

which if only registration were used might be still eligible for entry on that registration !- I don't think you would close a stnd book except to bring out 6724. How do you propose then to enter in the future if you don't close your stud book h-I would have them entered exactly in the same way as they are entered in Weatherly's stud look 6725. That is the produce of the stud book animals 1-Certainly. 6726. That would exclude animals bred outside

quite eatch your mesning.

radous volumes

that stud book. You would have no chance of entrr-ing them !-- I would bring in missals got by the onlinux thougastherd dre or a losse seen fit to be registered in that way 6727. If you call it registration !- I am quite satisfied then to alter the name to registration. I would rather like to have a stud book or a general ayaton of registration. Either would perfectly satisfy

I would like to see seen with a carsificate they and who usual show the certificate abroad with the purchased animal. That would, I think, largely nhance the value of many of our horses. instance when horses that are "placed" in races here are sold abroad, the entry of them as heving been so placed is produced by the vendor in Ruff's Guide, and on this certificate the animal is rold. So I am more the registration certificate would be extremely the registration certificate woman on exceensive advantogrous in celling Irish hunters. 6126. There is a difference between registration and a stud book 1—With a general system of registra-

tion I would be perfectly satisfied. on I would be portectly intented.

6729. Would you limit animals to be registered for breeding hunters to such as are got by a thorough brad sire !-- I world, or such sires as "Abdullah " or "Marboy "

6730 Courseas ... Von ore Secretary to the Ett. due Horse Show! - Yes. 6731. And to the Dablin Society's Horse breeding Scheen in the County Kildam !- You

\$739. You leaves the scenary well to Ven neutral 6733. In your part of the county do the farmers breed smuch !- Yes; a good many bessel. They hered from had mores, instead of keeping good ones. would be much better if they beed fewer; it would be

such more paying. Small farmers breed, and have no method of breaking the horses or getting good Priese for them. I clon't see how it nove a lot of them to bread 6134. What do they aim at breedings-Huntern principally. When they fall as bunters they go off as carriago bornes or as troopers. We give prices at the

carriage borses or as troopers. We give prices at the show to farmers under £50 valuation, as we do to the bigger farmers, but very few of them enter. They

my they have not time to wrote a day in sending the saimais into Nass. 6735. Do you think the small farmers can broad that kind of home profitably !-- Some of them can They can sell them as longtails about the place. I think it is very hard for a lot of the small farmers to do it profitably. They breed them and work them as two year olds, and then try to sell them as longuis. If a small farmer had a really good more people would get to know it, and they would so to him and buy his

loant potes

4786. What are the class and quality of the maces properally !-- I think they are well-head mares, most of A lot of them I know about the country have been broken-down bunding or racing mares, or have

been given as presents to farmers, who keep them and work them. Any mare that does not breed easily they send to a eart-house, and the produce they keep to breed from, and then, I think, the produce is uncontain. One might be one year a good hunter and the next not much good. to la-One man has what they call on Irish cart horse. to i... One man this what they can an item our botto. He has very little hair on his legs, is a very strong house, and looks like a cross of the Civdesshie. Mos-

nee is a man who has a horse that gets a lot of mores that are fairly assits! I have often tried to get him to tall what the breeding is, has the man may that he does not know the breeding of the borte or he won't tell it. It is what he calle an Irish cart-horse.

has it is a coord medul stamp of horse to see a tram

horse or a canal horse, but it is not a very hairy legged

ere. 6738. The produce of these part stallions are put

again to a chargoughered house !- Yes, in a great many

6739. What they produce is somewhat doubtful !--Very doubtful I bred one myself from a cart-horse a useful sire-and a groy more that had a certain

hunter as ever was seen; her next was bred exactly

Aur. S. Sant. the same war by the same stallion, and is a useless Celonel

sort of a carriage-horse. One showed quality, and the other threw back to accepthing or other 6740. In your part of the country well aspplied with useful sires—sires suitable to the marce in the country !- Vary well supplied; we are very well of. We are no near the Currigh that we have a supply of road stallions.

741. Have you any personal experience of breeding from these part-horses 1-Only in this way by this one mare who was from one of these eart-horses. didn't beend from her again after the second one. 6742. Have you bred at all, or have you any

experience of breeding from the Hackney sire !-No ; the only experience I know of is that of a man who sold a very valuable horse as a hunter and was known as the breeder of valuable animals; he bought a young more the other day and found out to was a Hackney mare by a Hackney horse, and he sold in

case his regutetion would go. 0743. Who did he buy it from I...He hought it mewhere in Galway. I think. The only other thing I know about a Hackney was selling a pony that came from Mayo somewhere; Meleady got it. I was came from Mays somewhere; messay girth. I was selling her to a man as a pole pony, and drove the buyer in a trap with her to the station. There he looked at her action, and he said be was afreid she had Hackney blood, and he would not take her then.

6744. Then I gather from you that, as far as you ean judge, you would not think the introduction of errtainly not, as far as Kildare is concerned. A certain amount of it is bound to be overage wanted. It where I should say it is certainly not wanted. It would spoil the sale of the horses a great deal. We have tried in our show nodes the Hunter' Improvement Society to register some of the mases in our part, and lave got ten or twelve mares entered into their book, and the produce of every one that is named is examined by us. Some of them entered are two and three-year-old mares. Out of the two-year-old mares shown last year at Naas for breeding purposes four have been kept on as brood mares as three-wearolds. All took prizes this year except me that was unsound, and the man said he would not breed from it any more. The prizes that induced them to keep them on as brood mares are worth seven to ten pounds. There are five or six prices to each class. There are five or six prices to each class. There are also prices for foods, so that a mean may make £10 at the show. That pays for the keep of them, and they are able to work them too.

6745. Do you sores with Mr. Kennedy that the thoronyhbred, or a selected and approved half-bred, is the best to get high class hunters and carriage horses t -Certainly; I think a thoroughteed borse the best, er any horse like "Mayboy" who has only a stain of er any losse like "Mayboy" was his only a main or three or four generations ago, which was probably coused more from carolossoss than anything clos-In Kildare the registered horse is beginning to do good. In the show of '95 only one horse in the whole show out a price, which was by a borse not registered. and this year there was also italy perce, though accused

6746. You think the Royal Dublin Society scheme weeks well in Kildere !- Yes; before the farmers went to the nearest house and the cheapest, now they are beginning to understand that the saleme is really to help them, in giving prices to the maren. Several men have shown their mares every year, and are taking prices every year. I think that is a good thing, for if a man has got a good mare it encourages him to

6147. Do the farmers generally appreciate a good sire !—They do; but money has a good deal to do with it. They will always try to bargain with you. A lot of them will pay a lot more on the sight of a feal. Many would rather pay £5 on the sight of a foal than £5 or £5 as the service of the mare. 6748. Do they breed from two-year-olds !-Yes ; we

give prime for the two year-olds, and a lot of them breed. We give as much for two year-olds as we give for the aged mares. There are very few entries so to this in the Nass show, but each year we are gettless this in the Nass thow, one care your we are going botter. Three years ago it was only three, it is nor un to seven or eight. There is a very good class of two and three-year-olds.

6749. Do you approve of breeding from two-ear-old fillian?—I blank it depends on the shape of the animal to a great degree. Some are delinate by a strong thick one I would not wind breeding from a all. I have bred from them myself-from a two-yearold only moderate sized filly-bead a 16 hands high hunter which was sold last your.

6750. Do you think the furners conemily under enough, but they can't resist getting the money when they can, and then they chance a bad mare. They say "she may be a fairly good breeding mare and may throw back to the sire and not show her con

675). Sir T. Esmoons.—Do you say you have adopted the system of the Hunter' Improvement Society !-- We have affiliated with them, and foliad them. They enter the mares. They gave in five free morninations the first year. Beaden that, where we entered mares that didn't get the gold medal or silver medal we get five free into this year, and we have about tex or twalve entered in their book up to this They are principally young ones. These young ones - two and three-year-tide-were shown at Nass show. and one won first prize in the open class judged by different judges. They are a good class to keep if we

could encourage them to least them. 6752. Do you think that system will encourage the keeping of good mares !- I think it would do so. I would be for giving more money to really good ones. though I would encourage molerate animals with small price. I have no objection to giving price rear after year to a good one until some one produces a 6753. You would give the prizes according to merit!

 Tou would give the prises according to ments
 Would give a prise to the best till a better one came. A five-year-old mare this year best all the nthers-two or three were complaining, saying the same maces were over and over again getting price. tried to tell them if they got a good more they weald be as likely to get a prize as the other man.

6754. Is this the first year you have adopted the pretent 1. This is three years now; but this is the first paid for entering in the book two or three mores every year. We have had a gold medal or a broase medal

or too years, and this year they gave a more most any young mares—two and three year-old marce—as well. 6755. You find that the farmers like the system! —They like these medals very much. Two of them, instead of taking the bronze medal and 45, preferred a gold medal, but they much prefer the silver medal a gion ment, but may much more shown.

6756. They are beginning to understand the areas in-Yes; they have alred une could they not show more in feel by unregistered inter. It waste more advertising still. They are beginning to find

ont it is for their own good.

few; but there seemed to be a strong feeling against 6759. You think it would be impossible to keep them out of Kildare if bred in Ireland 1—Half-bred ones by a Haskinsy may get into Kildare. Some marce we think are well bred may be by Hackings; you can only go by eye. Would you prefer to be affiliated to the Hunters' Improvement Society or would you prefer to have an Irish Hunters' Improvesent Society !- I think we ought to have an Irish one. ers: Ven woold advocate it being started !- It would do a lot of good, I think.

6742. On the same lines !- Yes, and being very careful what is entered in it. 6763. Do you think there would be much danger of not being able to tell how the horses were leed !--I think there is a great deal

476i. H a Hunters' Improvement Society was started, do you think there would be as much danger i -Yes; a horse who was successful in one part of the country and every home from that part of the country now is always from that animal.

eres. Von think that practice is likely to continue ! -I think it will.

6766. You know that the Dublin Society have
sovied suggestions to alter their acheme this year. Woeld you approve of that !- No ; I think the Autumn show does very well in Kildsre, because you are the produce as well at the same time then. thick it was better for the stallion class that there were nominations. They got better by it, became you get so much for each nomination. The Dublin Sofiety scheme gave you £2 for each paper you sent in. Now the stallion owner has to make the best terms be can with the farmers. At the Automorahow us get now a much better class of mares than at the Spring above. At one of the above there seem only three animals. At Donades a large number came, but that in the only time there was ever a big

orn. You think it is better to keep to the same aveten !-- I think it is beginning to work very well. 6763. You are rolber speaking against your own interests —I think it is against one's own interest. think they ought to be subsidized-the good ones. Really there is no inducement to register your horse whatever now, except that they are beginning to come more to the better house and to the registered lorses than to the surregistered horses. In fact the propositioned houses are having a lad time of it in Kither just now, I think.

6769. They will probably disappear 5—I think so, and I will get the blaze of it as being Scorotary of

Spring show.

The farmers said they were too huay.

6770. CHAIRMAN...When you my you are affliated with the Hunton' furnessment Society, what do non mean !-- I mean the Kildace Horse Show

6171. What have you got to do !-- We pay them All a year, and I try to get as many of the people to just it as I can. For that they give us a gold modal for a mare and a silver medal for young mares, and thay give un free cutries into their Show in London. So that they are very liberal, I think. There are four er fire people in Kildare belonging to it now. I think it is a most uneful excipty. 6772. What are the caperal lines it gots on 1-It enters mases that have got prizes at these Shows, and the

pedigros has to be very carefully entered if they he passed free from hereditary disease by competent velationary surprors. They enter these mares and take a note of their produce, and they will exter these, too, if they can be passed free. Then they slive a certain member of stallions to be entered that are not quite thoroughbred. There are various rules for that laid down. I think it is the third generation I think something on that principle might be worked

I think semsuhing on that principle might be warned in Kildars. There are one or two half-bried burses in Kildars. There are one or two half-bried burses in Kildars got good hereson. He was not quite theretails, but very mearly.

5778, You think we ought to have something of the same kind in Irekand 1—7 think so. If we stopped the principle of the same kind in Irekand 1—7 think so. If we stopped them breading from the worthless things they do bread 6774. Would it not be better if they could get been assistance t—Whatever one can get most

money out of is the best.

6775. Do you think, speaking generally, there has been say deterioration in the quality of mares or their produce in the way of hunters and high-class carriage u. De Robest barses in Kildare, to your knowledge!—I think wan would me a lot of robbish going to fairs, and they say they can't sell them , that is principally because they are bad. I think that really good mares and high-class horses are there still, and men keen the good cose. Desires come to the same farmers time after time if they have had one good one from him. 6776. Taking it generally, would you say in your

part of the country that the farmers are more inclined will keep their good ones, but they cannot resist a good price occasionally, and will try comething that has met with an accident or a good-shaped one. There are a let of mares about the country that have been good hunters or racing mars, and have been burt and passed into the possession of farmers. They are

broading with them now, and they do the farmer's 5717. Mr. Cannot.—They are quite good enough to do the farm work !—Yee; in the south of Elidare there is more tillage, but all shout us is light work and a light animal is able to do it all.

6776. CHAIRMAN.—Are you in favour of licensing license them. Registration is doing a lot of good, hat I would be more particular still.

6779. You would conneter it a danger if the
Hashney produce should drift from the congented

districts into the other parts of Ireland; you think that would be projudicial I think so. The dealers are very particular in asking the breeding, and finding ont about it. I think it would certainly. 6780. Have you any idea how they got this pre-

indico against the Harkney !- Seeing there in different They see them trotting, and one dealer enows. Iney see them trotting, and one dealer remarked to me that the back bers of one horse was the wrong way up. They wanted it arched the other way for a hunter-it is hollow in a Hackney. have seen in a veterinary surgeon's yard the bone of a thoroughbood and the bone of a Hackney. Oza seems quite process and light, and the other like ivory and hard, and weight more, although it might be smaller than the other.

6781. Are you protty well acquainted with the South of Ireland generally 5-I have been to Gienbeigh. We had a camp down there—soldiering—and I was going about the country there a great deal in spare time, and talked about their horses with the farmers. I was there two or three years. I thought they looked well-hard mares. The animals were they locked well-hard narces. The nationals were poor small things, but they worked uncommenty well. They carried large looks thirty miles a day. They were not a big breed-probabily not same day. They were not a big breed-probabily not same day, they were not be a superior of the contract of national section is a superior of the contract of particles of the superior of the contract of the page of wife way from the railway to make reg maps or seem away from the railway to make entitings and things like that. The contractor seemed very well astisfied. I also saw a very bad class of smalling down there. They were small wretched

stalled down there. They were small wrecond arimals. If they had a good class of animals there they would get quite good enough animals. they would get quite good enough ammus.

6782. I gather that you appears of the Royal
Dublin Society's scheme 1—I think certainly that this is the right one now of giving the money to the

6783. Would you suggest any way in which it could be improved 1—I would say give more prints, and hold more local shows, which do a lot of good, here were propie see the class of animal that is there, and what they ought to breed. They see their friends have a good mare, and send to a good borne, and then do the same. Small local shows would be a good

5784. Do you think, se a rule, the distribution of

meany prices, or whatever it might be ought to be entrusted to local committees -I think so. Colonel W Par Patron have a large committee in Kildsre, under the Royal Dublin Society's schome. We have six gentlemen, six farmers, and a secretary, and between us we work it seems or other. In fact it is left to us to distribute the prime.

6785. How was your committee formed !- The Royal Dublin Society appointed a chairman, and he paired anybody he thought was interested in home beeeding to make up this number. I think it is compercently to share up this number. I want it is com-pered of six gentlemen and six farmers of the neigh-bourhood that we thought would be interested in it, and would take a little trouble. We asked them if they would serve on the committee, and they all

served to ; we had no referals 6786. As vacancies owner do you fill then up by election or nomination !-- Anybody would suppose one and we would think of it, but we have had no vacancy vet. Generally the chairman suggests somebody, and he writes and soks if that person will agree to serve

on the committee, and the reply is " yes 6757. You find the farmers are auxious to serve on it 1-Yes, and they attend the meetings very well. We don't have many meetings, one just before our show and one the other day to consider a letter from

the Royal Doblin Society who asked us to send in recommendations on the scheme; they always attend to anything like that. 6758. Sepposing any large system of registration was started throughout the country, what would be the best authority to deal with it the police or the potty sessions oferk !-- I think it would have to be Society, or an agricultural department of the Government. I don't think a patty sessions clock would have time to do it or be able to do it socurately enough. I should be very particular before entering

them in a book. I should find out all about them.

6789. Lord RATHDONERA.—Are you on the Royal Dublin Society's Horse branding Committee !-- No 6700. Are you on the Horse Show Committee !-On the Horse Show Committee

6791. Have you heard that it is likely there will be any alteration in the borse-breeding scheme this year !- A thing came round to the different comsittees to ask their opinion on the present scheme, I think it was started by the County Dublin Committee, which said this scheme was no good at present. I think the thing is left to the different counties... whatever works in the different counties 6792. Have you heard it said that it would be betautiqual to such county committee to select either of the two schemes !- I didn't hear that. 6793. The nomination system or the premium

system 1-I didn't hear that 6794. Would you be inclined to appeave of county mittees having the option !- I think no-certain Different districts would want the thing worked

clifferently, I think. 6795. Mr. Warners.-Do you think meny false. pedigrees find their way into the Hunters' Incorre ment Somety's books !-- I should not may they did They seem very particular. You sign a pertilicate. and they get it signed not only by the somer has bethe breeders of the mare. They are very particular about it.

6796. If a Hunters' Improvement Society was formed in Ireland they ought to be just as particular here !-- I think they ought to be very particular. I world be very bard to start the book, and you would get very few at first. You ought to be very particular in ferming a back like that.

6797. It practically would not be your much and unlest you could rely on it !-- I think not. shiefly hunter dealers or come from pole popies? We haven't many pole ponies in Kildare—but what are bought from other places or sold.

6799. But you spoke about a pole pony bayer who earne to you t—He was a pole player who came down.

I but played with him. I trained the pony sayed.

SiO). You were talking about the bose of a Hask ney !-- I forcest the name of the house 6801. Was it in a veterinary yard? Did you see it in Ireland or England?—At Woodon in England, when I eas soldiering, it was our veterinary surgeon got it; I forget the name of the horse at the present mount

6803. CHAIRMAN —Have you anything you would like to suggest to the Commission !—I think if they could improve and add something for the registered horses and give more prizes to the mares in ortain districts—I think that would be a good thing. 6803. You mean the present system carried out more fully !-I think if carried out more fully it would do more good than anything else. I think it is buginning to work well now. Of course it takes some time to get the thing fairly started.

Mr. THOMAS ANDERSON, Levitatown, Athy, examined,

and Characan. You live in the county of Kildare 1-Yee, my lord-South Kildare 6815. Are you engaged in farming 1-Ves. were largely

He Thomas

out.

asgary.

6306. Do you breed bosses yourself!-Not so
much now as at ope time; latterly I go in more
for having colts than for breeding. I breed draught 6307. Do you think it pays better to buy then to breed 1-I do 6309. What do you buy! -- Four or five or three-year-old colts that would make good benters \$810. Where do you buy them !- Largely in the

6811. You go about the country looking for them 1-6312. When do you sell them !—I sell them at

6813. And you still breed draught horsest. Ven still largely-and must have a heavy home for that sort of work. 6814. For your own purposes t—Yes. 6815. Do you sell them t—I generally wear them.

6816. Are they out of your own mares 1-Out of MY OWN MARON 6317. What kind of sire !-- Usually a Circlescale horse or a Shire horse. 6816. Do you buy three-year-olds at all in your

part of the country !- Sometimes I do, but never free a small farmer. 6819. Three and tecommonds edite t-Under free

6820. And not one from a small farmer t-Not from a man, I think, who is under £100 valuation. 6821. Do you think the small farmer is mable to breed !-He is not breeding a good horse just now in

our district 6822 What are they breeding !-There seem to be two classes of mares; of course there have always been Shires and Clystesdales in our district-some are heavy and suited for heavy work : the other seem to have got weedy and too light. 6813. Some too heavy and others too light 1-They look like that, 6824. How long have you been haying in this way! 6815. And do you find you have to give the same

-For some years

Printed makes discussed by the University of Southannoton Library Discussion Hint Printed image distract by the Linearaby of Southampton Library Distraction Line

welco in the south that you need to !- I don't think the price of colts has changed very much; thay are easier bought than they were, but not to any resat extent.

(826. Where do you buy generally—at fairs t—At fairs, or at home if I can hear of a good home. 6887. As far as the fairs are concerned, do

think they are as good as they used to be 1-I think they have deteriorated greatly. All the better class horses are bought at home and never come to fairsthey are bought by dealers, the majority of them. good Am they hought at home more than they

weed to be !- Yes; the good borses that are in the exentry don't come to fairs; they are all picked up. Ven never me a really valuable five-year-old house at

fair. 53:50. You think the good burses are as much in the country as ever they were !- I think so. 6830. Do any ponies come into your district lo-

6351. What are they used for t-I bought some polo posites in the district which turned out well. 1321. Bonght them and sold them as pole nonics i

6833. Bred in Kildare !-- Yes, all 6:53. How were they bred!—All by thoroughbred home, and in some parts of Wicklow by a pony called "The Midgo," a Harrow pony I have heard of: I don't

how what they were, but some I not, they had some 6135. These were not bond in your county h... Ves :

but they seem to be suread over the country to a 648d. Do say ponies come from the West !- You.

6837. What kind are they !- Useful trappers ; they never exceed 15 hands-14 3-very useful sumals for driving. I think the farmers an our district. larger ones, are very largely horsed as regards their driving by Commenters posites.

6838 Mave you lought any yourself !- One or two, but I have never soon a Communicat pole mont;

if I do buy I try to get ponies to make polo ponies; they are not quality enough.

4839. How are they bred 1—Out of the mares of
the country by a zondespreipt half-bred sort of

animal. Many of these Connemara posios carry boys and girls well to hounds, and are capital jumpers.

**Sift Vow said you gave about the same prices as formerly !—I was not buying them antil the last six or saved years. In that time I don't think there has

been much of a drop in the three-year old colt
6841. Do you think the price of high class harn
boses and hunters has kept up t—I think so. high-class hunter is an good as over he was it is so

difficult to get him. 6842. Did you hear the evidence of Colocel De-Roberk and Mr. Kennedy 1-Yes. 6843. Do you agree generally with them 1—I don't

they think the thereughhred is the only house. absolutely necessary to have scenething else.

6844. Why do you think it necessary !-- You must both. Way so you thank it message; b.—You must have draught horses in our district; you cannot do heavy carling with the thoroughfred horse. You must have bone somewhere, and I think in heating

breeding you must have bone, and the question is how you are to get it.

6345. Do you think the mares producing these tigh class hunters are deficient in hone!—There are very few beed in our district.

6846. You say they must have bone, do you mean

troughout the country generally !—They must.

4847. How do you think that can be obtained !— Supposing you take a good draught more and more with a theroughbred, I think that animal would be likely to produce a hunter. If you go any further than that you degenerate into weeds.

6848. You think to prevent degeneration into weeds there ought to be a cross, with what kind of blood I—I think the half-bred horse, such as we rule to bounds, a horse of that class would give the bone. We have many mores too weedy to he put to a theoreughbred, and with a home with bone of that description something metal might be beed. The fairs are filled with light weight useless animals, no use for anything in these days of the bloycle; some might carry a lady or light weight, but they are all using hieyeles now, and the price of these animals has

6849. Do you know the horse that has been described as the Irish dranght horse!—I do ; we have est lets of them about us.

6810. What are the cart horse error in your part of the country like t. I own some that are c.lod Irish draughts-good body-lightish-looking horses. without much hair on their legs, and then, of course, there are the pure-heed Civelescales and Shire horses. 4851. Do you think the cross with the Clydradale or Stize would be more likely to give the bour you consider necessary than the cross with the thoroughhard—to receive a good hunter 1-I think so.

4852. How about the Hackney !-- I don't understand the condemnation he has come in for. at the Hackney stallion I think he would be a mod artinal, failing the horse I speak of, a half-bred horse, but I don't see that he is to be out at versent . I don't see him anywhere.

6853. You think, speaking generally, that the mores and stallions in the country require something to improve them?—In North Kildare they are exceed-ingly well of: We don't benefit by the Society

school at alk; it is entirely confined to North 0554. Then the scheme is not in outration !-Prostically it is not in cogration in our district : it is Practically it is not in operation in our coveres; it is entirely confined to the northern pertion of the county : there it is working admirably : thay have

get a botter class of stalliers. Down with us I don't think the stallions are good enough. 3635. You do not agree that sound thoroughheed stallions with good bone would give authors; stontness to the class of years t... To many it would : some are suite heavy angual. There is not much house-breed-

are quite newly amough. There mans much house-breed-ing in our part of the county, and except by large farmere, who have not succi mares, there are very few good animals bred. 4816. Lord RATEDCOVELL-You say that you would

ross a Clydeolale stallion with a half-bred mare, or a coss a Glydsonae seation with a nativest many, or a threeughbred horse with a Glydsedale, to get a good hunter 1—Not to get a hunter, but that animal might be useful to get a hunter—a thoroughbred put to her

4857. I understood wan to say a second cross would be weerly !- No, the first cross would be all right to be yet to a successifiared horse, the first cross, a half-bred, I think would be likely to produce a good hunter; if you then use the third cross with a thoroughkend is would be weedy. I don't fancy the Ciplesdale. I would rather have an Irtish draught

mare to start on as a foundation. page to start on as a numeration.

6868. Have you ever hunted one of that
description — I did. I have a very good horse now get out of a Clydesdale mare

6550. Was there ser thoroughbred blood in her !--Youh draught. I don't know how it is got 6810. Do you know the name of the horse!-

Which ! 4961. The Irish beed horse !- I bought this mases in Wexford, and the mare I have now is out of her by rather a clean-boned Gydeshale I had myself; this old mars I speak of had a good deal of the Irish

drenght mare. 4813. Do you remember a horse called "Hunts-4863. In what class would you put him !- The sort I am speaking of—the half-bred horse that Den. 3, 1896. Mr. Thomas Applemen.

992

would out useful stock in our part.-I would not him to some of the weerly mares I talked of. 6864. He had been hunted and ridden to bounds ! -Yes; he would be a most valuable horse.

6865. For kene !- Yes ; very much better to get it that way than by going to the draught borse. 6856. You prefer him to the draught horse !-- Un-

doubtedly. 6967. Sir Tromas Excessor. - Would this more correspond with the old Irish mare !- Sho would, I

suppose, as far as I have beard or seen. 6868. Do you think there is such a thing on a special broad of the old Irish mure !- There was vadoubtedly some noted bread; it was a good deal

thorough bred. 6869. It was crossed with the thoroughbred !-- I should think so. 6870. You never eache access anything you could

say was an old Irish more 1-No : I should fancy there always have been thoroughbreds in Ireland; it is only of late years that Civiordales and Shires were 6871. These two mares wer talked of you don't

think they had Clyslesdale or Shire blood in them !- I exuld not say ; but I think the introduction of Chydesdale is comparatively recent in Ireland. 6872. Mr. Canew.-You say North Kildare is

much better off for sires than South Kildare 1-They have a much botter class of stallion. 6673. How would you suggest they should be improved in South Kildare 1—I think the Royal

Dublin Society's scheme is very good as worked in North Kildare. I am a member of the Kildare House Show, and have attended every year, and saw a marked improvement in the quality.

4874. Are there many exhibits form the South !-There are none at all from the South-not a single apimal, 6875. Are not one fourth of these exhibited from the South !-- Not from the Athy district -- I am sure of that : there may be from Ballitors, but not nearer me than that, and that is ten or twelve miles away Do you think Nass is too far from the centre of the county 1-No. I cannot say I do ; when the Society gave nominations we had shows of mares as near Athy as possible, and they were not patronised; the farmers did not send, and they didn't seem to catch on ; it often takes a very long time to get them to catch on to a thing. In Carlow they are not estehing on to it, and though they are subering to

the old class of nominations there the class doesn't seem to be impreving. 6377. You don't agree with the condemnation of the Hackney's—No, from what I have seen. 6878. You have no experience of Hackneys !-- I

have not used them or driven them.

6879. Mr. Wanner.—Do you know anything
about the West of Iroland — I know Mayo pretty well; I have never lived there, but have been down

there pretty often. 6880. Have you been at some shows of the Con-rested Districts Board at Belmullet and Achill !--I have this year.

6881. And had you the experience of seeing th meres and young stock there !-- I only saw 300 at one show.

6382. Were you able to form any opinion from what you naw or heard as to what would be the best class of sire to send to Scinullet or Achill 1-1
was. I think that the Hackney, in the absence of the half-bond borse such as I described, is the best borso for that district.

6883. Would you be inclined to send a thorough-hred there i—No, I don't think so; I think the produce would be too weedy, unless you get good bens in the thoroughbred, which you seldom do.
6884. You would be in favour of sending the Hackney to those districts !- Yes ; I would.

6885. You have since seen the sires belowing to the Board !-Yes. 6886. And do you think they are mitable to use

down !- With one or two exceptions. 6887. But as a rule !- As a rule, I think they are suitable to the district. 6888. I think you said you benght a good many

horses from farmers in your district !- Yes 6839. Are they large framers !- Yes, chiefly: at least their farms run over £100 volcation 6890. Are they the men that breed good benters in

or district !-- I think so. 6891. Do you think there is any danger of these men using puny mores that come from the West as hunter brood mares !- I think they would be been from

6892. Do you think they would be beed from to broad hunters-the animals you have seen coning from the West?-If the stock was reared on road

land they might produce a hunter; they run up to nearly 15 hands, and have pretty good bone and sub-6813. These that come up now !- Yes; those that

6894. Do you know of many hunters being sold in have known of borres being sold with Clydesdale blood in them, and a good deal of it, too. 6895. And there are cars horses and Clydesdales

standing in that part of the country !- Yes, there have been for a considerable time. 6-896. Have you formed any opinion about regis-tering borses —I think mares ought to be registered, and I think the Royal Dublin Society's scheme god as regards giving the prime to the mares, but I think the stallions ought to be improved; the system of registration of stallions is good, but I think the system of inspection should be more stringent; and a great many borses at present registered by the

Society should not be allowed to be registered, sound or otherwise. The system of registering sound marcs is very good. I know it is very difficult—you mares is very good. I know H is very managed you buy three-year old colts; they look very good to make hunters, but when they come to five years, you find they are whistlers. That must come from comewhere -it must be inreditary; and as we are told the stallions are sound, it must come from the dams, and I think the dams should be registered as well as the

6897. You would have them exemined for stendnees 1-Yes. 6898. Is unseend wind becoming very prevalenting Ireland 1—I think it is; the number of borses which

should be valuable as hunters, rejected for whistling, 6890. You have not sold or beed many harnous

horses!-I have sold horses which were not good enough for hunters or harsess horses. 6900. Do hunter mis6ts make as much money as harpens horses !-- No. not so much.

6901. The CHAIRMAN,-In buying these three-yearold colts in the South do you ascertain how they are bred 1-I always undeavour to get their podigree. 6902. Do you find any difficulty !- It would be very sunch easier if the breeder could hand you the certificate of the service of his more, and show you

how the dam was bred, and show you a service note saying that the mare was sorred in such a year, and that this was the produce of the service; at present we bave just got to toke the statements that we receive, and in many cases they are quite entrue.

6203. And for the western districts that you know on think the Hackney is a useful kind of sire!-I think so from the class of work the animals have to do-carrying big hack loads from the sec. have plenty of bone and a certain amount of strength. 69%. I want to be quite sure that we exactly order-stand your opinion. I understood you to say you approved of the Hackney, provided you could not get a beliable borse !-- I think that a helf-bred borse one-bito be provided in the country, and I think it should Le done by Government; that borso should be sent strongh the different districts, and half-hard horses should be pinged on the register so that people could mso them if they wished

6905. The thoroughbred sires you are speaking of, what are they !- I don't think the ordinary thoroughbowl as we see him the more valuable animal-would be a good horse for that district. I didn't see the produce in the shows of the Congreted Districts Board of any thoroughbroth losse, but I saw the produce of Welsh cobs, Araba, and Barba, and I don't think any of them as suitable as the Hackney for the purpose. 6106. You said, in speaking of the half-bred, you preferred him to a thoroughleed, provided he had

sufficient bone and was sound 1-Yes \$107. So I gather that your opinion is, that for these western districts the thoroughbred, provided he was a enitable thorogenhered, or the half-hred if he had home. would be as valuable or more valuable than the

Hackney !- I would do it in this way, because of the prejudice which seems to exist against the Hadeney. Mr. Thomas 6908. Put away the prejudice—we would like to know your own opinion —From all I read about the Hackney I would imagine he has good action and good staying powers; if we read the evidence of the dellers they say the produce of the Hackney will not stay, and that they are not any good as harness herses. Of course I have no personal experience, but my idea is that a Hacking stallow put to a half-heed more would produce a very good animal to breed hunters; that would be my own inter-

6939 And put it to the thoroughbred afterwards I -Yes; I would rother have it than the draught

6910. Are there any suggestions which you would like to make to the Commission 1—Except about the ristration of stallions. If continued by the Royal Dublin Society it would be a very committable improvement in many districts that the stallions should be improved and the inspection made more stringent.

Cuptain Townsmenn, Derry, Rossenbery, examined.

6911. CHAIRMAN.—You live in the County of Cork 9 -Yes, in the south of the County of Cock. 6912. Have you any personal experience in brend-ing larges there !-- I have been breeding them about

fourteen or fifteen years. I keep two thoroughbeed 8913. And what class of snimal do you aim at producing b-I have been trying my heat to produce the high-class hunter over since I have been breeding

-for the last fifteen years. 6914. What class of mare do you use !-- I, myself, have always used what I suppose you would call a three-quester head more—a hunter mare. 6915. What do the farmers about you breed !-

Till I introduced the thoroughbred stallions they ared a most miserable class of mare, and they have been breeding from that. There are a few better cless maren gring now.

5916. What kind of stallions were there there before you introduced your thoroughbreds !—It would be hard to say how they were bred. My own

experience of what we call half-breds is that they are the most abordinable brutes to breed from. "Corrors who can and was placed in the Derhy is supposed to be a kulf-heed, so that it is a large term. Half-hresis in my district are the most abominable hretes. There was a man in my neighbourhood tried two; they were both supposed to be got by a thousughbood out of fairly well-beed marce, but I am glad to say he has good them both. He did a good deal of service with them at first, and did a lot of harm. The gots of one of them were all bad-tempered-wretched creatures altogether -- in hoart; then be selded him; then he tried another, and I am thankful to say he gelded him also.

6917. Are you altusted in a congented district !— No; I wish I were. 6018. That seems odd; why !- Because I could tion get the service of some of the Hackney stallions. 6919. But you are near a congested district !-Not for away ; Schull is the nearest, about fourteen tailes from me.

6920. Are you acquainted with the stock got by Congested Districts Board stallions I-No, I cannot my that I am; they have been there such a short time-only two years. 692). Would you use a Hackney stallism if you had access to him!—If I could get at a good Hackney

would put him to several mares. I would not breed from them otherwise. 6952. Why don't you in that case substitute a Wife why don't you in this case sussessed that he was a first one of your throughbreds in If I could pick one up I would, but they are vary expensive—sign-class Hackneys. I don't like a low-class, but

high class, such as you see at Mr. Burdets-Cousts's, or Sir Walter Gilboy's, or the London show. Anyone who admires a horse must admire them I they have bone and substance and pluck, and are eager for work. I think they are mornifornt horses.

6923. Do you think a Haskney is suitable to get hunturs t—Oh, no; you must have blood on the top and blood all through, but you cannot grow hunters in all parts of Ireland 6924. In your part !-- I have been doing my best feeding them with outs wines they were feel, and have

never grown a really high-class borne yet.
692ft. What do you think your district is suitable to produce t—I would like to try the Hackney; from what I have known of them they are a really good

6926. What close of horse would you expect to get !-A saleable horse, with action, for harness purposes; you might get good backs too. I have been going to fairs for a good many years, and my ex-perience is, that you can sell anything with action no matter if it is not big, whereas these weedy light horses at the present moment are almost unashable, whenhar it is because of hirreles or what, they containly

m't pay to breed. 8227. You would think your district more aritable to based horses exclusively for harness !- Let people who have the desire try the other too. I would like to see the Hackney as well. I weald leave the farmers to try whehever they libed. I would encourage both. I think the Royal Dublin Society. does a good thing in encouraging a good class of

\$216. Have you ever seen the Hackney produce eround !- I have at present myself what I suppose you might call that class of house, and he is a good burse. I get him from Yorkubire under the impression that be

he was not, so I golded him. I have been working him since, and have found him a most useful horse, a capital borse, unriessant, no doubt, to ride, but charming in a trap, and drawn a common cart with neard and manure; he jelts you to pieces when riding, 5929 How old is he !—Four off; I could have sold him several times; he is a capital good becomend I don't think a bit not. Of course we have not very I use a same a ter som. Or course we have not very long distances in my district. I am eight miles from the railway and he will go there and come back as 6500. He is not quite pure-bred t—No; I under-stood he was. I lought him from an Irish doctor who went ever to Yorkshire, and when I found he was not

a pure hred I would not keep him as a stallion.

Captala Tawan

6931. Do you know enough about Hackneys to know that the thoroughbred Hackney is a valuable herse which the half-herd is not!-The only Hackrays I ever knew were good horses, pure-bred. My poor father, who used to drive a scash, brought over a couple of animals-one was a leader and the other a wheeler; they were insignificent horses. He poid £150 for one and £120 for the other; they were very handsome horses. I did not know what they were until I took to going to shows in Eugland and saw this type reproduced exactly; we know

and saw tass type rep nothing about Hackneys 6032. They were pare-bred!—I don't know at all ; he hought them from a dealer; we sent one to Mr. Harris's—he keeps stallions at Kilwallock—and ho and he was a Spillale Punch, but he wasn't an atom like a Suffelk Punch; I am sure he was pure or usuarly

0333. How do the factors treat their young stor about you do they treat them well i-Nu I don't One farmer, a righ man, hrud from think they do. the first stallion I got, " Controversy," and I think he regularly sturved the wretched foal to death. I naw it in a field as have as this table for mouths; it grow thinger and thinger, and at last he got alarmed about it and gave it out, and correspondly it died ; but there have despit he regularly courdered the animal. I think now however, they are beginning to realize that if thay haved well-bred stock they must take better care

of there.
6234. Where do they sell their horses?—At Ballyboy principally; there is a good fair at Bandon also, and dealers are beginning to come to it. 6933. Are ponies as good as they used to be !-- I

doe't think they are rood now.

6136. Do you think that generally your part of the country is capable of producing a high-class limiter or earrisgs herse with any kind of shallies !- I don't think we can produce a high-class become on our soil; everything is small, the cattle are small. a friend of mine who brown borne in the King's County. He never freels his young stock at all, and be produces source grand, magnificent, weight-corrying borses; if I was on limestone I would breed as poor

6937. Are there any ponics in that part of the econtry !- A few, but they are increasing; the roor people prine there more than they used to 6936. But there is no indigenous breed-no native breed !- No. I don't think so.

\$030 Level Darrencovery What stalligenedic was keep-what were their names had Controversy the first, "Beaucourt" and "Townman, nee mrs, "Beaucorte" and "Tomumoor," that I goo last year; "Beaucourt" is breeding well. 6940. Do their lists fill !— Well, "Beaucourt" was a good deal ecubbed by opposition shallen owners, but he is getting so well that I fazer; if he lives in will pay. At our show we had four first prizes not of our towns, belonging to the Royal Dublin Society, and his gets took three first prices out of a possible form.

6941. I think you said the mares had improved

since you imported the cuchbred stalliona L. They have, certainly; they are breeding from some of them, 6942. If you approve of a Hackrey stallion, why have you not imported one !-- They are so awfully expensive borner to huy. I could not affect to awai I am not going to get a bad looking brute.

6943. I suppose the thoroughbreis you get are of a cheaper class — You can get thoroughbreis much theaver than the Hackney, there are no many more 6944. And there is some difference in their size,

6945. Have yours got great bone and size!-Yes. "Beancourt," the one getting well. I never naw a horse of bis size with better bone and back. coas. What size is he !--Supposed to be 15.5, but he is not quite so much; he has got good bone, huge knees, and buge hocks. I don't think I have swe knees, and unge noon. A copy a same I have over seen a better horse behind a saddle, and I have visited a good many good study in England.

6947. You say the soil in your neighbourhood is not adapted for horse-breeding !-- It is very bard to breed a high-class horse. I would not touch horses at all only I am so fond of them; they are not a paying game.
RD1S. Is there any limestone in your district. Absolutely none, not neaver than Cork, and Cork is

fifty miles from me. 1919. How do you expect to increase the hour ! It is a very open question; by going and getting the best heree I can bay hands on, I may increase it in

that way.
4910. Without the lime, the bone-forming soil!--Of rourse. I have no limestern. There is a ferror near me who has improved his land very much. He near are who has improved in said very midt. He has grown some fairly good foils, and got £00 at Bandon for a four year old. He thought it mail him

and was very pleased. I don't think it would pay me the way I feed my colts. 5951. Hir Timestan Ennounce. Did you say there were a sufficient number of stollions with you !- I think there are too many. (25). Of cool stallions !-- I think we have very

few good stallions. 6953. Most are of an inferior description !- Avtul stallion bred better. I think that is only because, as a rule, they work them. There are a few good I think most stallions are kept in a most enough. nanctural way—pampered up and kept in hot stables. I think that, is the only mason. I think a well-bred horse would breed just as well, and with more viscor. 695 6. Went do they charge for the service of these beauts !- It is hard to say. They have routizal feet but they take anything down over to \$4, and that terests

\$255. I suppose the farmers so to the chespest horse !--Generally. Last year a good many came to "Townstow" because be is a log upstanding fea-leoking horse. I made no reduction in his advertised fee of 3 grison. A good many of the strong farmers would pay a good fire. GROC. If they had a suitable horse b—I think so. GROT. You think the reason they go to these bad

because in because they have not got proch choice!-A. great many of the small farmers would unless they got stallions under the Royal Dohlin Society school; unless they got him cheaper they would me to an

4010 Mr. Conws - What recommendation would you make to get rid of the bad sires !-- I have always been a believer in the theory, though it is against my own interests to say so, that no private individual should keep stallions, but that we should have

6939. Would you be in favour of every owner of a stallion taking out a license !-- I dure say that would be a good plan—anything to reduce the brates. There any another of "Young Yorks" in my neighborhood —such awful brutes. "Yorks atood one year as a Royal Dublin Society horse—the first horse that care down to my neighbourhood, we have been to very back-ward until the lest few years. The Royal Dublin Society onlygave one grant for Cork; the facuses herebreeding county, North Cork, pot the advantage of this, and we but none for West Cork until I represented how hard that was, sad they then generorally gave us a grant for West Cork, and I hope it will do good. The fouls certainly are good, but whether

will turn out with bone remains to be seen. tany will turn out with bone remains to be seen.
6960. Do you charge the same for all classe of
marcs, half-bred and thoroughbreds 1— There are
penctically no thoroughbreds in that part of the 4961. "Townmoor" is by "Doncaster"1.-Yes, by "Doncaster," out of "Eszine." 6982. "Controversy," is the winner of the Lincoln Handicap!—Yes. 6963. Have you got him still !—No; be died, I am

sury to say.

4161. Mr. Warron.—Is horse-breeding a considershis industry among the small farmers —Yes, most have a more they like to been from.

hard a Yee hare a good part of West Cark in a fitting by or own district. Yes, pretty well in 6000. Do yee think three would be any use in the neight here typing to breed bentreet—I don't think 10 ye would be waste of time; they would grow things that would jump, hat could soughley; they would be an down as possible. Any horse can jump. You can can a Cytolesiale to jump. I have seen one s.

as does at possione. Any across can jump. To so one
reach a Clydraside to jump. I have seen one a
capital jumper, but they cannot gallop or stay.
6967. To you think it would pay them better to
broad horses with action 1—Destinedly; houses, as I
mail before, my experience to a fair in that at one you
see a horse with action picked up, and the action of
the Hackursy is good knee action and fack action, it

looks no well.

(1988. You have not seen much of the produce of
the Congested Districts Roard stallions there!—No, I
have not. I tried to key one. I wrote to a man
Eving there who thinks very highly of them, and who

he a cyclile judged becreas, to try and laws a moth for the Hashney I spoke of that I have. 4169. Lord Raymorxuna.—Mr. Wrench asked you wisher the small farmers made here-breading an infestly in that part of the country. I want to know what you files of an infonting in I-Help to pay their

way in keeping the horse and paying vars.

[970. You mean to say they kreed for sale!—As
well as for their own use. Most of the formers wently
always sell the horse. For instance, the other day I
suzzied a working horse, and toops of these havies
were bought up for me to see; if got about the
constry that I wanted one; they presently keep them

country that I wanted one; they generally keep them and they get a market. I think the Hackney would go a pool general home for them. 6971. From your orthone I should suppose your district was not a natural horse-breeding country.

and you could easewly call it an indicate y —I think must of the farmers about breed horses.

1672. They haved because they have got mores, is that it —They have got a more and they don't feel the celt growing up as they say just to rell.

ass in — any mave got it more not may don't see the celt growing up as they are just to not?... 6373. What age do they sell at 1—I have move seen them hought as fools, as one of the witnesses asid. I have naver seen any market for fools.

6374. What do they do with them t.—Work them still they are two off or three, and if they have not still they are two off or three, and if they have not

Mr. R. Matows, V.S., Werficel, examined.

6079. CHAUMERS.—Mr. Malone, you are a veterinary suppost—Yes.
6360. Living in Wexford 1—Yes, Wexford town.
6361. Have you had any experience as request bece becoding personally. I mean not previously; iddo you bread at all yourself!—Yes, I breed a good dust from the procedured.

to you breed at all yourself!—You, I breed a good deal from throughbreds.

982. Are many horses heed in your neighbourheed!—A great many. I think Wentred is about the horpest horse-breeding county in Iteland.

6868. What class of become do they hreed t—Halfbrids, and high class thereoughbreds.
6864. What do they aim at—60 get hunters !—To get hunters, high class harmens herries, and pole pource. 6968. The pole pony I suppose is a matter.

per bentiers, be do that's man as—so get intriers such poly position, and the property of the period of the period

any good and have nother young one coming thry will sell them.

6975. The CHARMES—In three anything you would like to suggest to the Commission I—I would be worthing. I fallink, to get rid, if one could, of these body, and that if they could have on you will experience to those who get well through the a good thing. Some for you want of group on the properties to tallies without knowing what they would get in Bing driving precursion in this submitted in the worlding the properties of the submitted through the properties of the submitted through the good of the property of the properties of the submitted through the properties of the properties of the submitted through the properties of the submitted through the properties of the properties of the properties of the submitted through the properties of the properties of the properties of the properties of the submitted through the submitted through

Boyal Mostle—being morphi to Bandon by Sir-Olor Amorti, who brought the Dads of Devonskirshire and the Amorti, who brought the Dads of Devonskirshire and the six who of the Committee of the Committee and the committee of the Committee

prever attretied a Lendon show.

3877 Three is no possibility of judging the proince of them in Treland — No; they have been how too short a time—they seem so popular in England and bring modal large prices. I think it was \$0.00 gainess Sir Wilter Gilbey teld me he refused for a two-year.

old bits year at the store.

\$W\$. Have you sayshing further to say 4—I might just mention an indicate that struck me less March at Mattershin. I now a good Beddeng, I don't know a good Beddeng, I don't know good match for this home I have. A great many good match for this home I have. A great many good match if the sign of at five on \$15 to \$200, and I thought I would get this one for \$25, on the durit show half the quelity of them light animals. He was down as 60 quitness. They are valurable from their good straight action and substance. He was not more good straight action and substance. He was not more good straight action and substance. He was not more good straight action and substance. He was not more than the substance of the substance o

than 15 hinds, and if got by a thoroughbred would have gone for about 15 guiness, became he was small.

Weafice), excussiond.

18. 2. Maine, 1688? What kind of sires do they use t—Three ordinates are sire with strong bone; hig thick horses.

3888 Is the county well supplied with thoroughbroid of this kind — We are makes above of thorough-

brid horses now.

6189. Are there any half-head horses in the county?

—A few half-heads, but a great many mongrel horses,
underhead horses.

underlined horses.
6190, Bred snyhow !--Bred snyhow.
6191. Are there any cart house sizes !--Very few ;

one or two, porhaps three, that is, thereoglybred curt hereas, Shire hereas, and Clydeschies. 6912. Are they patronised much t—Not in latter years at all.

60 6392. Are they patronised much t—Not in latter a years at all.

6953. Do you think the demand for bunters and re high class corriage horses is as great as it used to be t —I think it is more see than ever it was.

0994. It the supply as good as it used to be 1—Wo cannot get them.

1 2096. You mean the supply is less than it was formerly 1—There are too many looking for them.

no. 2 tess. Northerns some down to Renissorthy fair and boy all No. R. Malon, the provings and two year olds. They buy a string of yo. farty. I do not believe a good here was ever lead in

the North of Ireland.

6916. Does your county produce as many of that class of horse as it used to f-Yee, they are all bought at a year or two years old. Mr. Brown, of Donosater, the heat hover of yours haves in England, paid £50 for a two-year-old, and £65 for a three-year-old

6907. At what ago ure they sold 1-A good many of the small farmers sell at a year and two years old 6919. Does the price keep up f.—There is a good price still for a good two-year-old, or a good yearing.

if he is a shapely colt, and has good bone. It is only this week I saw a grutleman, Mr. Topham, give a handred entress for a four-year-old outy six weeks in

tesining.

6909. These yearlings and two-year-olds that are
bought, where do they go to!—To the North of Inshead on envelie. 700). Kept there and sold again 5—I think the man that come to Wexford rough them to the farmers up there, and they are kept there till they are four or

five years old.

7001. It may your farmers better to sell them young 1-Bone of the farners loop them till four years obl. and break them and best them. 7002. In your opinion, are the threoughbeed sires

in the county suitable -- search and so on 1-Any horses there that are on the register are sound, and they are suitable, shapely, good burses. 1003. Have you got a stallion of your own t—The last horse I last I lost him. I have a hell-beed size new and a Verballor couch horse. Our time I had

five thecoughland sires.

7004. Why slid you discontinus keeping them 1—I 7004. Why this you discentious keeping them 1—1 was offered a good prace for them and sick of these.
7003. Are those young horses generally sald at the fairs or jukked up by dealers I—There was a good many going round the country booking for than. A good many sering round the country booking for than. A great samy sure, foresees themselve, July than at two parts of di, leave them not hant them, then said them.

years old, keep them and heat them, then sell them, in the county !- Limestone.

7007. You consider it a very suitable country for beending borses !-- I do. 7003. Do you consider hunters and high-class car-

place horses the most profitable kind of horses to haved there!-I do. 7010. How long have you been in Wexford!-All my lifetime. I was born in Wexford.

7010. How long have you been practicing !-7011. In your opinion, are the borner produced in the country deteriorating at all in soundness !-- No;] think the borses at the present time are very sound 7012. As good as ever they were 1-As good as ever

7013. Are the fermore inclined to sell their best maren, or do they see the niventage of keeping throat Well, they are beginning to keep them now, under —Well, they are usgmaning so seep them now, under the Royal Dublin Society's achieva. 7014. You think the Royal Dublin Society's achieva-has worked well !—I do. It is an evcellent scheme, but it wants more advertising. The Sermene do not

know enough about it yet 7015. You approve of the system 1—I do. 7016. Have you any opinion as to the desirebility of licensing or registering sires !—I think the regis-

of licensing or regression areas—1 think me regre-tration that is going on at the present time is first closs; quite sufficient. It is working well in the County Wexford. 7017. De you think any system of registering marses would be beneficial?—I would scorer go back

mares would be beneficial ?—I would sconer go back to the old selecte in that direction. I you'd sconer give nominations to the mares. Instant the high ga-few premiums I would give up to forty or fifty. because, when farmers bring their mares a few will get prizes, and farmers do not like to go the follow-

ine year because they might meet the same mine 7018. Are many house beed for harness purposes in your district?—A good many. We used to have a good man coming down to Wexfort to buy horses, Mr. Shirls: be used to huy for East of Louder. 7019. Are they bro! specially, or ore they berne that do not turn out quite good enough for hunters -That is it; horses that do not turn out quite mod

7021. Lord RATHUGONALL.—With regard to smale and demand for horse flesh in your district, do you mean to say the comply is not count to the decreed to

-It is not 7023. You do not mean to say there are less good houses bred !- I do not. Those are as many good boases bred there as ever, and the farmers are

7023. You say there are several half-bred house in Wexford; what do you mean by half-heal?Horses got by a thoroughbred horse out of a threeenarter brod mare or half-bred mare. I once of these

produce very good stock. 1024.—What sort of stamp are they?—A good 1024.—What not of stamp are they?—A good big home, about sixteen hands, with quality, stand-ing on stenight good legs, good back and thighs, and quarters. We had one very good insibleed size in the County Weaford, Mile, a sheathaul lowe. He

receipted a whole host of good horses; he even yes-7025. What seet of breeding was hel-They say hy a Saffelk Panch out of a year thoroughbred more. I only heard that in trucing it a little bit, everything

he produced was really first class. 7026. Thus, there are other classes of half-bred 7026. Then, there are other classes of iniffered sires in the county which you seem to disapprove of; how are they bred!—God knows how they are bred; they are bord and re-bond, and you would not know

how they are bred.

7017. You also said you had a Youkshire costs horse size 1—I heaght a Youkshire costs horse short. five years ago in York from Pickering. 7028. What sort of produce had be!—He is producing good stock crossed with small mares.

7019. I think you said you sold him!—No, I bayo the Yorkshire coach horse still; I sold some

7030. Lord Assrows.-What made you think of getting a Yorkshire coach hereo!--I thought be would be a good own with the maret in our part to produce mares to byced agoin from.

7031. What is the general class of mares in your district 1-A good class of short-legged thick mares 7032. Do they want bone t-They have good bess. There are a great many mores heed by old Connects popies, some of the heat broad marra we ever had-7033. Do the farmers keep the fillies by the Yorkshire coash house L. Yes, to breed from them

7034. You do not like the general half-heed horse! -I do not, I like a half-bred by a thoroughbred sire out of a three conster-bred or half-bred mare.

7035. Would you appeare of their being registered by the Raval Duklin Sariaty L. Not antil I see what stock they produce.
7006. You would sooner register sens pure beed like a Cleveland Bay or a Yorkshire coach horse; Would you register any other breed but the thorough

hred !-- I would register half-bred sires if I knew they were producing good stock.

TOJT. You would not register any pure breed !--TOS: 1071 WORLD to Topology of Tost Topology of Tost Tost Topology of Tost Topology of Tost Topology of Topology have a stud book of their own 7039. You would be in favour of registering these!

- Yen

1040. Sir Tromas Enteron.—What there of burees is produced in the County Weefred!—Mostly harders, horness berses, and pole peaks. 7011. In these a large trade done in those three classes !—A very large trade. There is a good done for hauters and peaks, is fast I never aw the damad

for hunters and posion, in fact I never saw the demand no girel. 7012. Which class of horses finds the most ready alls in Wesford 1—Hunters. 7043. Which are the periodical fairs 1—Emiscorthy

is the principal one.

Total. And is this fale obtended by foreign dealers?

—It is; in face it is a great fair. I think they come
from all parts of England and Ireland to Enniscorthy,
and of course the Northerna come down there to every
far; they lary all their good lowes there.

and of course use A reterms come down incree to every face; they buy all their good lowest there. 70.16. These horses, I pressure, would be herd in the county in the county. 70.16. What have you to say about the sires in the county in which was a few more good there-applied gives in the county with pleasity of bose and quality. 70.17. What price would you suggest these sires

your, weak puts would you would get mee.

Total Would that he about the average price paid
Love I—I do not think you would get more than £2;
I think the favours will not give uses for any size.

Total Agriculture from throughbord horses, what kind
of stallions are there in County Westfeed up t—A

HIS Rut Morntonal

"York, 20. 3, 26,

"Dave Me. Maneys,.....In memor so your inquiry re-importation of Harkeny sires into Ireland, judging from what I see in Yorkshire, it would consistuly distroy the what I see in Toronton, it would community under the what and chainstire of the Irink hanger. When the Reistrops boson arrans some (in our trender yours ago, every mark) his mans to a Harizory size, and the consequences in that we are used to be the lab for of common, underwised horses wilk one fear Yestable's hanters and harmon for fear Yestable's hanters and harmon forces have while our fear Yestable's hanters and harmon forces have been constituted by the proposed of the prop the power of transmitting all has own and memble properties and want of the only. As a bastler cross is has been a the power or management and transfer cross it has been a and want of the only. As a braster cross it has been a decided failure lare. I have often keepen a horse so bred to be good trailer jumpers, has never to skay. Why the year want to mose year hunter marce? There is no conyou want to goose jour hunter marce? There is no com-petition. Soweeds any hunters one bond in England naw. The game is in your own hands. Stick to your short-legged, thirt, theorygistres iron, and you will catalize to have the from breed of horses in the world.

"Yours frithfully. " Anners Trenan?"

7050. That letter was written after you had tried the experiment you wore speaking about !-- Oh, yes, I byught a Huckney too from the late Edward M Donnell of Ashtown. He was a dealer in horses. I gave him sixto suineas for it. It was a very had breed ton-

7000. Do you know how it was heed !—He bought it in Regland the time of the great beom in Harkneys. I think it will robe this country if you bring Hackneys into it. We are purely and simply the best hunter breeding people in the world, and if you allow a horse

staying power, one trade is some. 7001. Mr. Canuw,-The Hackney is brought in not as a hunter, but for harnous purposes 1-1 do not as a unitor, but for mirrors purposes in 1 do and think he is a harmens house at all; I think he is a dung eart house. He is a house slapping his legs acalized the ground; he is a cond house to drive from

one theology to another.

TOO. My. Weisren.—You say your Yorkshire couch horse is getting good stock !—Yes. ten norse is genting grow stock :-- \ en.
T003. Are his produce selling well \(\frac{1}{2} \) Yes, I could sell the revenut horse to Mr. Widger. He bought a

lot of the stock. 7074. They are selling at a good price !-Yes. 7075. As well us the naturals got by the thoroughbrod stallico !--Ols, no.

7076. They have good action !—Fair, nice, graceful notice 7007. Solling at a fair price !-- Yes.

7036. You bought him at Fickering; who did you have been from !— From Sterieber Brothers. 7000. What is the name of the horse !-- Incomp. thorne Pashion; they call them after the place where 7100. You mentioned having used a Hackney on

one occasion: what home was that !-- I would not file to mention his name, but if you wish I will hand it is,
7101. Did he stand in the County Wexford !-- No. He is a well known Hankney.

7102. I would like his name harded in, I do not want it for any public propose Witness handed in the name)

Witness hances in tan many \$103. In Mr. Topharn a large dealer !—He is one of the largest dealers. He has a house in Dublin w, to buy all his horses in Ireland.
7104. He has opened so Brish branch!—No behas only some here to buy heres for his English trade.

Of course I are not prejudiced against say breel of horse, but I would not like to see our county me had horse breeding 7105. Do you approve of registering stallious. Half-bred stallions, if I knew they were producing

good stock. 7106. You would approve of registering then at well as thosonglibreds !—If they were producing good

7107. Would you be in favour of having a Huster' Improvement Society in Ireland !-- I would.

The provement Society in Ireland !-- I would.

Tios. Do you think it would add to the value of houses if their peligree could be certified !-- If they

7109. You think that would not un their value t. I think it mould 7110. Would you register all broad mores in the

country !- I would register the good sound maren : 7111. Do you think the facusty are parties with their med mares at all new t. They are not now They are lesseng them now But if you so hack to the old schoun, I think it would do more good.

7112. CHAIRMAN. Are there generally large heldage about your part, or small I .- A good many been habitage and a good many small too. 7113. Do the small farmers breed also f.—They do; and do these well too. They look forward to breeding

a hunter; that is the great object.
7114. You think the small farmer is as capable of broading a bunter on the larger man 1-I do. I think

they take better care of these. They take ears of these like a child. A small farmer got a hundred gainess for two of them, two-year-cids, a short time sizes. 7115. How are the pole posies beed generally !-Out of the Consessors ponies by small thoroughlord

7116. I suppose the production of the polo posy is a matter of chance !- A great many go in for them as n specialty now 7117. Are they fairly anoonaful in that 1-Yes, they will get forty-five or lifty golseen for a good pelo perp.

7118. In it not a moster of chance whether it terms out a good poly !-- If you get a good made pony, mated with a good small thereughted bors, the result is sure to be a good pole pony. 7119. Do these Companies pooles come in every year!—They do. Tinkers bring them down three from Communic. They are not solling so well for the

last two or there were. 7120. Have you seen any you know that were the mitrate I saw them; little needry feels with upright

7121. Have you seen any t-They being then in to Weaford and sell them on the quay. They bring them down as fools. 7133. World you have any objection to that !- I think it would ruin the country; getting them in and making brood searce of them by and by. The result would be that we would have Hackney bleed there.

7123. You say a mixture of blood, other than a theremetitized such as a Yarkshire coach horse, might be boueficial !-- Yes 7124. But you think is all cases the introduction of the Hackney blood would be detrimental f-I do of the Hackway blood would be decremental 1—2 or I do not care very much about very large bone in a benter either. I like a lorse with modium bose that stands atraight on his logs. The bone in a

that stands straight on his logs. The boos in a thoroughbred horse is a good deal heavier than in the cart horse or the Hackman. You may have a larger bone to look at but it is all cancellated times, whereas you have condensed ivory in the thoroughlord horse.

7125. Are you acquainted with any parts of the country where the farmers aim principally at breed-ing barness bornes, and not so made busters!—I do not think there is any part of Iroland where they breed exclusively for harness horses. 7126. Not exclusively; but in the north don't they

Mr. W. Commis-

principally !- They do, but I never remember having seen a good horse bred in the North of Ireland. 7197 Do you think harditary disease is as vowerbest as it used to be !- I believe there are not so many unsound hornes now as formerly 7138. How do you account for that !- The farmers

are paying more attention. They feed there treat the young stock well and food them well. 7110. Mr. Whases.-I do not wast you to tell me the uses of the stallion, but do you know that

the Harkney stallion you albeled to it a Norfolk Harkney!—They nearly all come from Norfolk. You know, dun't you, that there are two dissinct breeds of them !- Yes. 7131. This year horse was a Norfolk Hackney !-- I do not know that, but is he not a Hackney !

7132. Yes, but there is a great difference !- They are all the one breed out of the one stud book. 7133. Did you over own a borse called Stanley III. 3

713). Was to a Hackney!—No, one of the best half bred horses. I have him still. 7135. He is a bay hone!-Yes.

7135. Where did you key him !--In Dublin, 7187. Does he breed good stock !---IIc foss, 7138. Is his produce very good?-He is not long eactigh with me yet to know, but his two and threeyear-olds are very promising. 7129. You have him five years t—No. I don't think

I heve.

7141. Are his stock promising !- You, his two-yearolds and three-year-olds are very promising now 7142. What fee do you charge for him!-Thirty 7143. Would you be surprised to hear that he was a Hackneyt-I would be surreised because I know 7144. If he is entered in the Hackney stad book by

-He is not in the stad book. My horse

3595, you would think that that in the wrong large Moukamen out of Sweetment by Carnival, He was level in Wieldoor

7145. Then what is Stanley III. 1-He is not my res, my heese is Starley I., Stanley One. 71-6. He is a half-bred horse!—He is a beautiful 1147. What was his dam?-His dam was a halfbred mare, more than a half-bred mare. 7148. CHARRIAN.-Anything you would like to

suggest to the Commission !- The only suggestion can make would be to give the nominations to the neares again, instead of giving the permisses, to give feety or fifty nominations, you would have a lot of marre, instead of laving only four, or five, or six you. would have forty mores; it would encourage the

6149. That is to revert to the old system !- Yes.

Mr. T. Courseogn, Ardavon, Bathdrom, Co. Wickley, examined. 7150. CHARMAN.-You live in the Co. Wicklow !--

es. 7151. What part t—Rathdrum, about eight miles from the town of Wickley. 7152. Are you interested in breeding horses !--

cs. I am very food of lorses, 7150. De you breed yourself!—I keep one breed 7154. What do you breed!—I try to brood bunters. She was a really good home. I send her to the heat thoroughbred I can find within distance. Some of

them do not grow very large, but I got £130 for a four-year-old that never saw horners at the last 1165. Do you consider your part of the County

Wietlaw seitable for horse-breeding !- I think we should breed as good berses as they do in Weathed, but we have not out the material. But the many and stallions are inferior, especially the stallions 7106. You think the not out effects as exalt ... I do not see may difference smally.

7107. The county is not properly supplied with writable stellions !- No, in my district there are pape, at least, not stullians I would-

7156. What ere the stallous mostly in the examp!

—I have been obliged to send to Wexford and to Coolsitin for my own more. There were two borson there, "Torpulo" and "Zenophon."

7109. There is no thoroughwood borne near you !-7100. Any half-heeds !- There may be a horse tr two that was bought simply on account of his chesp-

ness, and brought in, I do not know the names, but they are not a suitable breed. 7161. Do not the farmers absent you broad!-Then do, several have broad mares, but several of the man

in a position to beyond the best borner are inchined to have given the mures to had sieve, and the stock has

give it un because it is such a losing game. been so but that many have given it up. 7162 Would they pay for the service of a good bores !- I think they would, if we got a good, young, fresh borne, with good bunting action; I do not want a race house. He would get fair carriage become

bunters, and he would be largely peternised, provided the fee was not too big. 7163. Are three any cort stallions or Clydeschie or any of these kipin !-- I have seen cort stallions ming through the country but I do not know where they

and. I do not know some above them.

7164. Lord Raymonness.—In your district it is very billy h...It is very hilly but there are some nice skeltered valleys-lev-lying farms. 7165. You have the see on one side of you!-

The sen is about eight miles from whom I live. 7166. Would you put it down so a matural house-breeding district 3—Well, I have seen some splendid bores beel by the very see. There were two very good horses level on this farm I speak of. 4210 was offered for them as four and five your olds

7167. The former in the district is not naturally e man eddicted to horse-horseling!- Well, I do not think their horse-breeding has been sufficiently more their Louis to stok to it very much.

But there is no reason, whatever, if we had good sires, why they should not take to it and breed encoresfully. They are fairly well off and able to take care of young

heeses well if they had the right nort. 7165. Is there any Smeatone exil in your district ? -No. I do not think there is any limestone. 7169. Lord Amurows,-The reares, are they good ! They are rather wanting in quality. Short legged meful mares, they move fairly straight, and would

to arrest nurses. 7170. The reesent class of mares you think would pay the farmers to breed from !-- I think if these ness had a good thoroughbord horse with good mares had a good thoroughtern horse with good leasting action they would produce good bunders or

7171. You think it would pay the farmers to breed from them !—I do not think it would pay any farmer

to bread a licene at less than £40 for a francescold

7173. You think they would get that !- I think if they had a good stallish they would, but not with the

7173. You would want a good stallion !- A good straight stall on, a good mover on the road on well

to I use so in the field. The horse I meak of would surdice Mr V. Comer a good carriago heres or a hunter, but mainly for 7174. Sir Thomas Esmonds.—You think the stal

220

liens in your district are not good stallions!—The very worst I have bad. There is no thoroughlood stallion in the district, and avery year there are observed. stallions imported, which means ruin to any man who puts a mare to them. 7175. Are these stalliers sound 5-Very unsound.

I believe. T176. What is your opinion about breeding from an energial stelling !-- I think it is a reinous game. They cannot he sold. They will not average more than about £20 aponce as four-year-olds, and very often

they have alone, taken to fair after fair, and cannot be sold 7177. You think a stallion should be examined, and not aflowed to serve if not sound !-- I think it would be in the interest of the public at large, to prevent namend stallions from being rat to stud purposes at all. A stallion to be advertised for stud purposes should be at least free from hereditary disease.

7178. Near you at Wicklew is not there a very An odd good colt comes in and there are a hundred harvers for hors.

7179. Are there many foreign buyers at the Wicklew a iru i... Not so much at many of the fairs, but there are any number of buyers for a good home

7180, Which is the largest fair in Wickley t-On the 13th Angust ; there are fairs there quarterly, but they are not attended by lanyers or horses much Tisl. In the other parts of the country we there hove fairs !-On the other side there is a heree fair

Castledowoots, I do not know whether it is in in Cattledownott, I Wickley or Kiblere. 7182. There are a good many burses produced in

T183. A fair trede dens in horses t....I do not know that it is a very profitable one.

7184. There are a good many bresest—Judging
from Wicklow foir, there are a good many bress in

TIRS. You think it could be made more profitable ! -Yes, with one good stallion or two. 7184. What about the brood mores !- They are warting in augisty, and I would not expect to least bishclass horses from them at present, but they are sound

and move straight, and are good nurses, and I think they would breed good hunters. they would breed good Institute.

T187. So that this how-tweeding industry in Wick-low is capable of extension—Yes, and of great invervenent. It is nearer to Dublin, and more convenient to desire than Engiagestly. Thus is no

stalliens.

7188. Mr. Canew.-How was the been you add at the show for £130 bred !- By Zenophon, his dam be 1289 Star. 7189. Where does he stand t—At Coolstin.

7190. How many miles away 1-About sixtee miles: but when I speak of farmers I do not think they like sending a borse away a long distance; they have to pay for grass.

have to pay for gram.

710). That is the only theoreighbred home near
you t—Mr. Thompson, of Newcastle, has a thoughtbeed home, "Backinstor," hat that is equally fir.
Tince was a horse at Boundwood called Glimari, in 7192. The only thoroughbred sizes zonr are at

Coolettin and Newcastle !-- I do not know of any 7193. How far is Tesperio from you !-- He is at Ballinskil; that would be auton miles.

to breed from it you got the good thoroughbood sine you spoke of 1-As a rule they are sound more, more etraight, and are good sures. It is very hard to lay down any general rule; there are good ones and bal

7195. There are a great many mourrel sires !-Yes: on normant of the scarcity of stellions, these borson I speak of are bought for about £50. 7196. Are you in favour of Komming sires !--! would not allow any owner of a size receive money was free from hereditary disease.

7197. You think every owner of a borne should toke out a licence before keerday him b-Yes; and should not get a license for any horn, exemt a sound 00.0 7196. CHAIRMAN.—Anything else you week! like to tall the Commission, Mr. Comerford !-- Well, I would not like to see Heckney blood imported into

the country where there was kunting stock. 7199. Why have you an opinion against the Hanksay !- Because I have seen them: I don't wish to run them down as harpess horses; I den't know anything about them as harness horses; they may be very showy and good, but as hunters their hind legs are behind them and their heads up in the air; their frame short and very maste. I think it would be rotness to the conduction of hunters to introduce the

Hockney stallios.

2300. You man you would be opposed to the introduction of the Haskney sire, or of the Haskney alood t-He besso many faults in him as a hunter, I do not mean to say a word assists him as a harness horse. Personally I do not like him as a hurness horse, but there are others who do; but as a hunter I waste why we would not broad good because if we had think he would be of the worst description.

Mr. B. Gravase, Elverstown, Blessington, examined.

7201. CHAIMAR. You also live in the county Wiskinst-I live in Kildson, but quits near Wickley, Wishfour -- I live in A. 17240v, but quare near reason only about a mile from Elessington, on the border. Are you sequested with the county Wicklow i-With the part of it that lise on that aids of the morentain, least a belt of it up towards Bultingless, I knew it year well. 7203. That would be some distance from the district Mr. Comerford was speaking of !-- Yes, the mountains En between; but I have travelled that district too going to fide, and I know it in a general way.

1204. Do you haved burnest—Yes, for the last twenty-six years I have level from one to three fosles every year. I have bought a good many becase too, and though I could make more that way than breed, ing, still I keep on breeding.

T203. What kind of mares do you breed from t-Every kind. Since I was fourteen years of age I

of feel or more, and my experience is that the best brood mare to breed weight-carrying hunters is always by a draught horse, I don't oure what enybody says, but then I would like them off a will bed more. When you breed them you get a really pure half-hred when you breed them you get a really pure hard-more, as far as I know, and my experience is not very hir or wide, but from what I saw myself, a halfto breed weight as if you got a five hony mare, with planty of cotion, a good back, and a good neck and shoulder, I do not care what her pedigree is, and give her a good thoroughbred horse, it is the best chance for a hopter 7206. That is the kind of more you have beel from cursel?!—Wall, I have beed from every kind. Always

nearly when I bred from a too high bred mare, e

have had experience of them. I was find of horses, not only my own, but I would so for miles to look at race that had two crosses, or even one by a thoroughbred horse, they have not been as good horses for me. The horse that makes the most money in the best for no. A dealer does not sak you when you get into the fair what your force is by. He illuss the horse that is nightly, with plenty of bone.

and the property of the proper

big bries that med to get first prize been at Billsheign, a here belonging to Mr. Mooney, of Cresslin. Bowen Masself tools inch beg 01.40 merse a year for the least ten years. 7100, 817. Estotype. What was his more \$-"850 William Wollace." He nowe lith his cornesho to get that many merse. He is by a here than get

don't like the borne at all.

1337. How was he bred t—I do not know; he was
a pare threenghierd.

1338. Take the ordinary farmer in your district.
What sire would you recommend him to send to
nor!—For the average of the colls that are bred thus

Dec. 2, 1314. Mr. D.

draught horse is paying for more at present than the thoroughbook horses. There is no dealst about it. What is it if I get £100 for a horse, that is only an exception. If I have five others that won't pay see it taken more than the whole of that, that is my experience. I have never seen a farmer that abuck to thoroughbred horses-that bred from thoroughbred horses continually, without crossing with a draught norm......I merer saw one of them but become poor. That is the reason I my they should use the dreaght horse sometimes. However, it is not horses altogether I live by. I am fead of them, but when I am taking stock in the beginning of the new year I never put down any of my horses as worth anything. If one in a good horse to-day he many be a lead horse tomorrow Whatever I make in the year by them I get

it down in the latter end of the your. Tank. That is profit !- Well, it is. I put it down in that sort of way; because if you have a lesse that you think a lot about you don't know when you go out into the field to-morrow a questing may not have hap-

sened. I had a basetifal colt that put his foot through do you brood from 1-All kinds of mores. more I ever led was son that died in Major Rynde hand. She was by the horse I told you of, and out of a Curraghtone more, a more we had for years. I got up to £00 for a three-year old from hrr, but they were dear at the time. This mars I sent to "Heart of Oak," and get a fool uset of her at three years old. She missed next year and I pet her to work. She worked well at pleughing and other work, and I sent her to him again. She had a filly feel that time. I sent her again, and I thought I was doing a great thing sending her to Major Rynd's good grass which was on the way to the place where the horse was standing. In the morning I got her dying of convulsions. I brought the feal home and petted it. I have it now, and was offered a hig prior for it. One colt she did brood. I used to ride han myself un odd time, and he was a good one.

7131. Do you approve of keeeling from young mares !—I have bred from several two-year old filles. I have a filly this year from "Heart of Oak" by "Zingari." 7232. All your breeding is from young maren 1232. All year aroung in from young moon practically f.—Nu; we adverye keep as more werking and hreeding. I would not keep my brood more unless I knew it was something extraordinary. I get

as much work out of a brood mace-work of a certain cluss—as if she had no fool.
7323. Have you say opinion as to whother breeding from young mores or old in better!-I think young from young mores or old is better?—I tamk young saxes are the best. If you bred frem all mares you will find they are api to have big hellows over the eyes. My father said this to mo, and I watched it. You will find it is right.

When they fail to feed thesessives they fall to feed the fool, and the first year is the year to make a borse. I never saw a good feel that was sterved in the 7234. Duyou think the farmers take anticient care of the young ones |-- I nover have a foul by a heed been that I do not give a feed of oats every night. In the case of the drought houseful I do not do that. I put him in a

different place, and den't give him hay or eats, but you carnot expect a high bred horse to grow up on nothing. If you buy a Kerry holi it will live snywhere, but if you buy a beautiful shorthorn hall you must feed him well. People used to come and my to me "Our cattle are not growing like yours, how is that?" Well, we have only a poor place, but my father would be up at five in the morring feeding them and stuffing them, and if they don't pay for feeding them, it is a fact that they won't pay for starving them.

7250. Mr. Cansw.—Yen say the best brood mare is

that one, but I tried it on several occasions myself.

You want to have bone; home follows the size. If you go to a draught home with a bred ware he is too soft. I would like to have a thoroughbrod sire with a mare with plenty of strongth. I would not take a present of the produce of a thoroughbrod home with a Clyden dale uses. In my opinion you might as well expect n moves, out of n wren's egg. But get a more wigh proper hips and back, tidy and well made, and a med rein above all things. I have watched it, and watched it close, before there was talk about giving us premiums. I never war a must broading well with a great big classey neck on hor. Got a more with the send sonere ou, and a big neck under, seel, realmon, the is light above. I don't care what home you go to Favo, or the best home on the Currage, it is ten to

une yes will have a bad horse. 7236. Can you give an idea of the breed of draught horse van would select?—The denerth horse I would like is one that some people wouldcall a half-heed horse. would like his dam to have had some breeding. B he was light in the shin he should have pleaty of muscle on the arms, and muscle behind over the books. Go to a good puny home with her, a basse with good round action. You may be disappointed, but you are most likely to have a good one from that. That would be the horse I would like to see coming into the country. I would send him the test more a nave.
7237. That is your description of the dwarght house

-Yes, but not a pure draught horse. That is what I 7338. Out of a well-head more !- I would not say 7239. Some thoroughbeed blood in the mare !- Yes.

he was't work for you notes there is some blood in him. I have tried the lear horses and heed them and broght them, and I mover got one that I had my pleasure with. I trained several horses when a young had with my father, I hated him to give me a young renglet heere to tenin because they are harder to train. If you have a learne with a little breeding he will nearly do snything you had him, with kindness; you will always have to walker the other. I am decidedly in based very well. For instance, a sheep at two or three yours old won't make as good a hand for me as if she is foor. If you give me a shoop with her tooth fair that she can cut, that is the sheep that will suckle a lamb and give yet a fat one. If you put a more to hered before her teeth are developed you cannot expect she will have the some amount of milk to give, or keed a foal as well as one that has got up in years. Some

at sixteen or seventeen or eightness even was too old, hat when they come to twenty I say they are. 7240. CHAIRMAN.—Do you consider the breeding of larges a profitable business in your part of the country !- Most unprofitable if you stick to the head horse I am decided on that, I tried it. If you kneed a light filly at three years old it is hard to get £15 for it, and if it was an old draught one, worth nothing in a

way, and bring it out you will get something, but bred herses are not fit for small farmers. 7241. Do the farmers about you look upon it as part of their regular farming business to brood horses? -Generally they have a broad mare, and there are a good many broad mores in our district. Anyone that was at the Nass show this year would see there were some as good three-year-old celts there as there was

any need for se hunters 7242. You think it pays them !- Oue gentleman said if he get £00 it would not pay him. If I get £10 for one at three years old, or £40 for one at four years

old, I think I am well off.

7263. Can you suggest anything that would make it more profitable!—Seed na a good drought borna.

My idea about a throughbeed horna I give it to you. by a drought horse out of a well beed mare i- Not colv candidly. I think my man that it saits to use a have been pering from 28 to 28 to 38 to 4 decreasibles as a stall also as per fits service of a leneraciphed have does not write a bloomylifered full. are resident in Dublin and the adjoining countles, there is no county in Iroland without sevenil repre-sentatives on the roll of Mrmbers. Twenty years ago the number of Members and Associates was 1,208; the increase has therefore been 127 per cent. and an Assonate !-- A Member is entrusted with the

power of voting-he has a vote for members of Council and members of Committees, and for the election of new mambers: an Associate is not given any such

power, and his subscription is correspondingly less. 7256. What is the subscription i.—The subscription of a Member is two guiness per amount with an entrange for of three guiness, his composition, £21. The subscription of an Associate is two guiness, except in the case of certain agricultural Associates anali tenement valuations whose subscription is £1 Lr., and Associates pay no entennee fee. early date in its history the Royal Dublin Society by offering premiums for the importation both of

stallions and mores. 7257. When was that !- I on ancertain when this practice become. The following extract from the mirrores show that the practice was in operation 128

Expands from the Mixures of a Mixture of the "DURSEY SOCIETY, February 11, 1765.

"That a premium of 430 be given to Mr. Thomas Johnson of Slevice in the County of Tapperary, being at the Jahness of Slevine in the County of Vispersary, being at the rate of AS each fee six strong allowants in first this placely, and other country work, and from four to six peans of "That a gold model the presence of the Sheety's like of a health of the Country of the Sheety's like of a the Each of Sheeters of a resolve of this Sheety's like of a state of the Sheety's like of the Sheety's like of a sheety and other country went; and also that carried in about and other country went; and also that another cold the beginning of last summer, six strong this moves it for alones and other country work; and also that another sold plugh and other country wors: annuae the amoust gen-medal be presented to his lordship in then of a pression of \$10. for having imported at the same time a fine block druß stallion. The said models being adjudged according on a premium of 410 he given to Robert French of Brienfield in the County of Roseousmen, Require for a first

black draft stallon imported by him in August lest-Then follows minutes to the effect that a claim for Then believe measures to the except than a seem for a premium ledged by Mr. Philip Hutchinson of Chemkeagh, country Dublin, for importing ten marris and a stalling, should lie on the table; and postponing the consideration of another claim for a presslum for importing a stullion. I find these alains were subsequently disallowed on the grounds that the importations had taken place before the period proscribed in the announcement of the reveniums. the year 1800 a Furming Society was storted under the patronge of the Dublin Society, and it was manted a related of £200 per annum by the Dublin Society. The Farming Society held two shows annually at Smithfield, Dublin, and con at Ballimasloe. In the latter show a premium of £10, was offered for the best draft stallion of any kind; and a pensium of £59 " to any person who shall import the best lot of homes of the Suffolk Punch breed, to consist of one stallion and two meres." This encouragement led to the importation of a number of horses. The Farming Society was not self-supporting, and someone to an end. In 1851 the Royal Dublin Society commenced a suries of Agricultural Shows which have been praintened in Diblin without internatesion to the present day. At first the Shows were very small. In 1831 there were only 52 head of cattle, six sheep, thrue swins, two Spacials asses, and six horses. The bories were agricultural draught stallions of various breeds. These Shows struck out of the price list in 1865. Agricultural horses were sgain introduced at the Spring Shows in recent years. It was not until 1863 that the Society held a Show for horses exclusively. At this Show the entries numbered 386. At the S4th Annual Horse Show, which was held last August, the cutries numbered 1,363. The Dublin Horse Show is now the argest slow of hunters in the world. The prime awarded at the hast Show amounted to £1,953 , the Show was visited by 56,728 persons, including putshasers from the United States, France, Belgium, Cormeny, American Hungury, and other countries. I have resirved in the brightest manner the work of the Royal Dablia Before the Art of Union the Society was the median through which the Irish Parliament admirestered grants for agricultural perposes, including large less But from the time the Society started agriculbeen supported out of the private funds of the Society exclusively. I wish to point out specially that not one penny of Government mensy has ever been meny upon the Horse Show. On the conteary, the Society offers out of its private funds at the Horse Store valuable prizes which are intended to supplement the efforts of the Committee entrusted with the administration of the public fund to which I shall refer presends. It is difficult to say what has been the

effect of the HorseShow aron horse breeding in Ireland Concurrent with the development of the show there has been a marked development in the keese trade. Then are no statistics of this trade available before 1878, in which year the Irish Veterinary Department commenced the publication of statistics of the expert of bosos from kreland to Great Britain. The had published return shows that the average around expect of horses from this country to Great Britain has been au follows :---

Period 1878-90, 1861-65, 1888-90

These figures show an increase in the borse teads of the period ending 1895, when compared with the period ending 1880, amounting to 33 per cent. On investigating the increase in its relation to sense, it find that the export of geldings has increased 25 per cent. in the period referred to, the export of mores has increased 44% per cent., and the export of stallows and increased 1-6g per cents, and the export or statutes has increased no less than 134 per sent. These figure are significant. It is important to note that the number of houses imported by Great Britain from Ireland exceeds the number of house imported into the United Kingdom from all the countries of the world. For example, in the year 1834, Great Britan imported from Ireland 33,589 horses, while in the nome year the total import of horses from all countries into Great Britain and Ireland was 23,866. Aberrium quarter of these horses came from Canada, about casfifth from the United States, Germany supplies another fifth, while Russis, Dermark, and Holland are the rest in order. I am not aware of any means of accertaining countries and British possessions. In 1804 the United Kingdom expected 239 stellions, 3,891 meres, and 13,317 galdings, making a total of 16,457 house. Nearly half these horses went to Belgium, about quarter to Holland, while France took the greater part of the remainder. It will be seen from the figures I have given that Ireland has about twice as great an export teads in horses with Great Brisin as the United Kingdom has with all parts of the world. Or, to put it another way, Ireland is far shad of the rest of the world in the horse trade with Great Britsin. This development bee taken place concur rently with the development of the Horse Show, and must, I think, be largely stiributed to the Hores Show. must, I attint, he largedy skiributed to the Horse Scate, 7188. Before you leave the figures I should like to take you can or two guestices about them. Howe you got any returns of the imports into I reland b-From Great British, yes; I can quote figures dem the British Beard of Agriculture returns. 7259. Because some of the experis ought to be balanced by the imports, ought they not !- Yen : the number is small. 7293. There must be a certain number of lorses backwards and forwards .- The brown that go conductes and norwards - The history part Mr. La Tourre Does it distinguish the

sures and stallions !- Yes; 82 stallious and 1,775 pares, 2,690 goldings. Test. Charman.—You gave us just now the incounty percentage of the export of goldings, mores, what do you deduce from the figures!—The relative that do you decide from the Egires : - The relative eddings are 25 per cent., whereas in the core of

garm it is 44g per cent., und in the case of stallions as much as 134. It is not in galdings that the main increase has taken place.
7553. Well, the main increase according to that is in stallions, what do you deduce from that to. That it is the breeding stock that is leaving the country-

7251. The stallions would probably include all the 7294. The stations would probably include all the using thoroughbook horses b.—Yes. 7265. Can you give us the actual number of stallions ?-I can.

7504. In judging by percentages, it is necessary to beer the basis was stort from b. The remiser of stallions, of course, is relatively small; I have sollected five-year periods-they give averages of five years which are, perhaps, the most trustworthy.
7367. You said the amount of stallions had in

mused 154 per cont. in a certain period, our you tell as how many very expected at the hogisting of that period !-Yos ; 43 in the first five-year period, 56 the second. 72 the third, and 138 in the last. 7208. Do you think that would be accounted for by increased expertation of young thoroughfired stock? ... My own oninion about it is, that it shows that the foreigners have been coming here in increasing num-

ters to get our around general.

Title. You think that the stallions serving in the sountry were sold out of it 1—Well, you; hat it is inpossible to say how many of these are yearlings or roung horses before they are put to the stud; it is successible to say what the number is. \$250. And can you give us the fleures in the case of enting 1880, 9,901. I should my that that particular print is calculated upon three years figures, because the statistics only hegin in 1875, but it is the yearly

swemps for that three years; then the period ending 1885, 11,617; the period ending 1890, 12,992; and the period ending 1894, 14,042. It has gone up from 7111. That appears to me more rignificant than the case of the stallions !- The number of mores is very much larger.
7372. How are them statistics collected; by whom t

The statistics I quote are published by the British Board of Agriculture ; they get them, I believe, from returns precoured by the Irish Veterinary Department. 7171. Do they publish the returns of exports and imports — They do, from Ireland to Great Britoin. 7174. Do you know how they are collected !—I

late to direct knowledge of it.

7215. Do you think that they are sufficiently reliable 1... campt say that at all; I quote them so the only official figures available. 7275. But such as they are, the only official figures, do you think they are sufficient to enable you to form a errect opinion !-- I should suppose them to be trust-

7277. Can you suggest any improvement in the datistical information !- Without knowing exactly the method of collecting the figure , I should scaccely venture to pronounce any opinion on the subject, hut I have no doubt the department do their hest to get 7278. You give us at any rate the numbers, whether

be actual result.

they are mores, galdings, or stallions 1—That is all in 7279. No particulars as to ago or breed 1-No. 1 Mr. E.J. Moss. clon't know whether such particulars can be obtained 7280. Have you got any figures as to the number of

sen in the country during those same periods !- Yes. 7261. Would you give them to the Commission !refer to those later on.
7283. Quite so. You were saying that this great

development of the expect want on at the same time as the development of the Heave Show !-- Which is the effect is a matter of opinion. 7293. Mr. La Tonogre ... Ave not the statistics of publish a workly return of experts and imports 5-Well, I am not sure what is the abortest period that

they are available for ; I slou't know about that, 7354. There are vo figures in the report, at any rate, that show !- There are no figures to indicate 7285. You cannot show the exports of horses for the week of the Horse Show !- No : I have no doubt that the officers who make the returns have their statistics of the daily shipmouts leaving the North Wall. T256. CHAIRMAN,-Will you go on with your state-

ment?-I wish to refer to Lord Culthorpe's proposal some years ago. 7357. When was that I....In a letter to the Woof May 4th, 1875, Lord Culthorne expressed the belief that no Government would interfere to check the exportation of mores (which, at that time scene to have

attracted attention), and that his tract was rejumed could be effected by private outerprise. He offered to subscribe £100 ner arrays if 100 other gentlemen 7253. What year was that 1-1575. He recovered that the found abouted be devoted to the purchase of sound stallions to be located in various parts of the United Kingdom, and rendered available for farmers at low rates. Referring to horse-breeding in Irehad, he stated:—"The climate and soil are most favourable, the holdings are so small that most men have counts time to look after and educate their colts, and there is an innate love of horses in Trishmen propulled oven in Yorkshiremen." In the Times of May 5th, 1875, Lord Lucan sublished a letter strongly unycoring Lord Calthorpe's proposal, and offering to subscribe £100 per sugum. A committee was appointed by the Royal Dublin Saciety to advise as to how Lord Calthurge's scheme could best be carried out, and the sum of \$100 was pleed at the disposal of the committee. Prices were offered by the Society for essays on the best method of carry-

ing out the details of Lord Calthorne's prozonal. first prize was subsequently awarded to Mr. H. A. Smytha of Langach, Fortarlington, and the second Serytte, of Lannges, Fredrington, and the second prine was awarded to Mr. Davson A. Milward, of Tullagler, New Ross. These crossys were printed; I have in oresies. The financial support processary for carrying out Lord Calthorne's suggestion was not. however forthermine, and the idea, was abandened for the time being

7989. Are these essays long t-They are perhaps too long to read.

Tito: Reservation have the scheme might be carried entl-Ther are interesting now from the historical

det of view. 7291. Can you tell us shortly the general effect of them 1—It would be very difficult to summarise either of the sohemes. The financial support necessary was

pot fortherming and the idea was abandened. 7292, You mean throughout the United Kingdom? Throughout the United Kingdom 7293. Did the Royal Dublin Society take any

setion in the matter i-No further action than that; funds not being forthcoming, the sebeme fell to the ground. Acting on the recommendation of the Horse Show Committee, the Society, in 1887, approached Lord Londonderry, who was then the Lord Lientenant, and after some negotiations the Government promised a 34.7,196. Y

under af ΔJ_0 00 to measurage improvement in the bread of losses and out their in Irainal. This erm salesquarily beams appals assumally to the Society router and the salesquarily beams appals as smally to the Society router. In the contraction of the salesquare and the salesquare and the salesquare and the perion of the fund appropriated by the Society to the Society to the salesquare and the salesquare an

teenth yer cent of its value.

7294, What do you want us to dedune from that?

—That the result to be obtained from such an expenditure no doubt would be proportionate to the expositions.

Ti95. Bet, of course, the more recessful yea were, and the greater number of heres in the commy, the loss per bessi there would be to devect to them.

Quite so; but the fact stands that that is the actual amount per heat.

Ti96. That would be reduced in proportion as you

were successful in one point of view |—In the first year, the season 1885, 16 pressums of £500 costs were offered for thoroughbend stallions to serve not less than 50 half-bred mores, the property of farmers whose tenessent valuation did not exceed £200, at a dee of £1 for each more. Sixty stallions competed for the premiums at the Horse Show in August, 1887. Sixteen were selected as sourd, and suited for the necposes of the scheme. Each stallion owner rectived immediately after the Show, £10 on account of the previous. Local committees were apprented to sarry out the scheme in their several districts in the couning vesson. After cureful inquiry the Horse-breeding Committee of the Royal Dukin Society selected compotent percons to not as Civilnum, Sourctary, and Treasurer in cosh district. These offices were sometimes combined. The Chairman submitted the names of the persons he proposed to constitute the consultates. The actual appointment of the committee rested with the Society. Each local committee consisted of not less than 5 or more than 7 mambers, of whom at least 3 were farmers. The local committees held impections in their districts, and examined 1,743 mores: 790 guarda were record as suitable and 764 were served. smars were pensed as suitable, and 164 were served. The braid-quarter of the service districts were—(1). Steahan, (2) Antrim, (3) Partadown, (4) Jaronken, (5) Ballymote, (6) Ballymote, (6) Ballymote, (6) Ballymote, (7) Dangdord, (6) Edgelse, (12) Eucephonner, (13) Templey, (13) Capples, (13) Templeymone, (14) Templeymone, (14) Templeymone, (15) Templeymone, (16) Templey riallions serving in districts in which the owner resided, the service and grouns' few were paid over to the Society. This change enabled the Committee to increase the number of districts from 15 to 15. to fourness the smaller of dustriate from 18 to 18. The distribes were rearranged, and the head quarter changed in several cases. They were—(1) Straken, 6(3) Bullymon, 6(3) Bullymon, (3) Bullymon, (3) Bullymon, (4) Sungacon, (6) Mullrague, (6) Sungacon, (6) Sungacon,

13th and 14th, 15th with a rotal arrange, certainly
13th and 14th, 15th with a rotal arrange for
the 18 percentage.
1197. Why do you make three changes in the
head-quarters—I... would be difficult to give the
rescons in each individual instance; the countities
had reports before them and, in some ones, in the
foliateration conveyed to the constraints by members

selected. At the shows of mares held by the district committees there were 1,745 mass submitted at fifteen districts; the numbers were not severalin three of the districts. Assuming that the marshes in these districts corresponded with the average in the other districts, the total for the eighteen districts would be 2,004. The number of marcs actually served was 833. The following year the Society seek a chronice to the owners of 890 marcs in fourteen of chronics to the owners or one masses in fourtees of these districts, 517, being 55 per cent. of the funces, replied to the chronics; and from these replies it was succreained that 401 foals had been precised, 205 secretained that 401 foals had been produced, 203 colts, and 198 fillies. 59½ per cent. of the tenses served produced foals. In the third year, 1888, covered changes were made. Shows were held it the Autumn of 1889 for the selection of stallings no. 1 At these shows sixty-one stallions computed for eighteen prises of £30 each, on the condition that the soloted stallions should each stree not more than fifty mores, the property of featners of not more than E250 terminent valuation, at a fee of £3 2s. 6d, of which sum the firmer was to pay £1 2s. 6d. The stallions were assigned to the following districts: Bolfast Centre-(1) Londonderry, (2) Eallywess, (3) Beläsz Centre—(1) Leobisokarry, (2) Eallymens, för Arrangh, (4) Beläss, Silgo Contre—(4) Silgo (5) Casileren, (7) Ciozas, Ballinasion Centre—(4) Beläs-sion, (6) Athenry, (16) Parasonatoren; Dubin Cason —(11) Navan, (12) Mullingen, (13) Köyniben, (14) Casion, (15) Weedlood; Cork Centre, (16) Diago, non, (17) Rethibosh, (16) Mullow, 1z cach of these eighteen districts shows of mores were beld these eighteen districts shows of marca were labil.
Excluding Bullymens, where the number of marca
was not ascertained, there were 1,745 marca inspected. Prizes were awarded to the owners of the best mares, divided into two classes—those over fee rears old and those under five years old. The prises in each class were £8. £6. £4, and £3, with a free nemination in each case; there was also a fifth print in each abas, consisting of a free nonimatics, as well as a champion point of \$10 for the best mass to each class. The number of mases served under this acheme was \$41. A ceture, sent in subsequently by 648 owners of marcs, showed that 465 feels were produced 218 colls and 247 filling Seventwise prcont. of the mores served produced foels. In the year 1891 the Society reverted to the selection of stallion in Dublin, and a Show was held at Hall's Bridge on February 7th. Forty-nine stallions competed for sistent \$200 programs, the selected stallions being required to serve afty mares, the property of factors of not more than \$100 tenement valuation. The trudens of the stellfore on this occasion reported as

In compliance with the interestives that we shall we have a report upon the attribute with term been refer or explaintable, we have the approximation of the compliantable of the

7500. Why did they give up the system of having below distributes than in Dellin — I cheard first is very difficult to give any resease; on the constant of any change being rands the matter is dealt with by a Commission; the undividual resolvent of the Commission have their own opinions, and would not constant have their own opinions, and would not constant the constant of the commission of the commission of the 1200. All you know as the change was made — It was I know in the change was made. The solvented size

Ross were assigned to districts of which the headmoss were assigned to districts of which the head-quarters were—(1) Stenbesse; (2) Magherafelt; (5) Ambient were—(1) Stenbane; (2) Maghemária; (3) Pathabon; (3) Emaintaine; (3) Espis; (6) Holly-gathabon; (3) Espis; (6) Holly-gar; (1) Manoumman; (6) Porturea; (7) Manoumman; (6) Mainment; (14) Mary-bareaf; (13) Manoun; (14) Listiwel; (16) Carvide; Carlon; (14) Thuries. The local consulties in these districts held thouse at which 1,610 more were where districts seed thows at water a, too mores were awarded at these shows for mores under 5 years old. granded at these shows no mares update a yearh one, and five proces of £5 each for mares 5 years old or up-words. There were also champles prices of £10 fice the best more in each class. At the close of the meaning the number of major served was 772. The owners of these mates were subsequently saked to send in a produce return; 500 replace were received, showing that 410 fools had been produced.—207 solts and 312 fillies, neventy-five percent, of the mares preducti foals. In 1893 a new system was nikrodured. The owners of thoroughbred stallings were invited to register them. This was done by adverirrited to register them. This was done by accor-tisements in all the Irish newspapers of any in-portance. A file of \$1 was charged for registration. The animals were examined as to soundness by Veterinary Sargeons appointed by the Society, and, each stallion was required to be in other respects suitable for the objects of the scheme ; no charge was nade for examination. Applications were received for the registration of 147 stallions. Twenty-more for the registration of 147 statitions. Permiy-more of these failed to pass the Veterinary Inspection, seventeen could not register for other reasons, 101 wone registered. The Veterinsey Surgeons reported that rouring, whistling, and ontarnot were the discreters vasst overalest amount the rejected assends. The statest care was taken to ensure that no unround salmal abould be registered, as it was considered that registration would be regreeded by breeders generally. and not marriy the farmers who received nominations, as a cuspentee of soundness. In the recistor, a conv of which I hand in, the stallions are cleasifed under counties taken alphabetically. Particulars are given of age, colour, bright, pedigree, stad book reference owage, breader, stations, and for and the propher of services offered. There is an index to the stellices and to the owners. County committees even appointed, and in the months of March and April 101 above of Extraces' mures were held, and at these shows 2,473
mores were improved. In most of the counties the coffections of marce were large, and the number were of a attisfactory observator. In a few counties, notably in Ulster, difficulty was experienced in obtaining a sufficient number of suitable moves for the available nominations. This was attributed chiefly to the look commissions. An even convenient centres in these counties. The fees to be paid by the farmers who received nominations varied according to the fees charged by the stallion owners; when the stallion fee did not exceed £3, the former poid £1 and the for this not exceed £3, the former point £1 and the Society point sub-sharpe. When the stallies for exceeded £3, the Society paid £1 and the former paid the balance. The former paid also in each case a groom's fee of two shillings and stopenos. The fees were collected by the County Committees. At the close of the season, the returns showed that 1,449 marss led been served, and that the owners had read £2,089 18s

Security one per cont of the mares had

turbuse and caternal were the revuiling ailments in the rejected scaliform. They draw attention to the

registration, and that several borses rejected in the Mr. R. J. Moon preseding season had disappeared from the country. As regards the maces, they were required this season to pass a veterinary exemination; the number of nominations in such county was protricted to one for every £3 allotted to the county, and the former's there of the survivo for was payable direct to the stallion owner instead of to the County Committee. As the close of the scason 1,490 nominations had been issued 1,234 marcs served, and £5,536 14s Od. was paid by the Society to the stallion owners in addition to the payments they had received from the owners of marss. Returns were received from the owners of 878 mores, aboving that 628 feals had been produced-334 cotts and 294 fillies; seventy-two per soni, of the mares produced foals. It will be observed coni. of the insire produced toals. It will be observed that a comparatively small number of farmers sens in seturns this season. This is perhaps due to the fact that they were sent stamped post cards to he filled in and reterned, whereas in former yours they had been sent cuvelopes bearing a lef. stamp which had been sent currenpen Bossing a today cover. In enation them to return the norms matter there is no the costen 1894 the proportion of the service fee payable by the Royal Dublin Society was made a fixed sum of £2—the bulance was payable by the farmer. The scheme was in other respects almost identical with that of 1823. Ambienties was dentical with that of 1973. Applications were failed to pass the vortreinary impedies, and thirt three sould not be registered for other reasons; 105 were accepted. At the shows of marcs held by the County Committees, 1.448 nominations were ferred. As the close of the season 1,254 mares had been served, and £3,368 was poid by the Society to the owners of stallions in addition to the fees they bad received from the farmers. For the season 1895 a number of changes were made. The sums allotted to number of charges were mone. The sums adoptes to the several counties were re-arranged, the abstracts of some counties being servesced, while those of other counties were diminished. To each countyn area exceeding \$10 was allowed for expresse. The meximust be be the valuation of the farmers meticinating

Rosessemon, Timpersey, Westmeeth, from £150 to 7310. What do you meen by £10 for expenses !--Veterinary surgeon's fee and small office expenses allowed to the local committee, a sum not exceeding lines was alsolished, and premiums not exceeding £5 to the owners of mares selected at shows held in the stinted to a stallion on the Society's Register for 1803; (b) Mares with foel at foot, stinted to a stallien on the Society's Register for 1895; (c) Foul at foot by a stallion on the Scenety's Register for 1894 or 1895. The exhibitors of marce were required to produce autificates of service from stallion owners, and to The owners of thoroughbred stallions were invited to register them free of charge, the fee of £1 being abolished. Instead of requiring that each stallion in free. The owners of stallions were paid the sum of \$4,794 18s. It was found that risety-two stallions had participated in the scheme. Returns absolutely should undergo examination by a veterinary surgean appelinted by the Society, a certificate of any member of the Boyal Cellege of Veterinary Surgons dated sent in by the owners of 1,016 maros, showed that of the Moyal College of Veterbary Surgions dated not later then February, 1894, was accepted, the Society reserving the right of further veterinary examination, 752 foals had been produced—355 colts and 267 reserving the right of number veterinary examination, or examination as to suitability if they thought fit. Applications were received from the owners of 368 stallions: 219 were accorded. The Country Comshood foals. The arrangements for the season 1893 differed but alightly from those of the preceding season. Applications were received for the registration of 137 stalking; eleven failed to pass the veterinary mittees held in the autumn 48 shows of mores and foals, an average of rather more than two above in examination, eight could not be registered for other reasons; the remaining 118 were accepted. The each county. At these shows 1,106 mares and 700 Veterinary Surveyors reported that rousing, whistling, fools were exhibited, and premium amounting to £2.541 11s. Bd. were awarded. The arrangements

for the current year are substantially the some or

COMMISSION ON HORSE BREEDING 238

those for 1815. The limit of age for mares in class (a) was extended to four years, and the itmit of £3 to Hr. k. I Most. the mure premiums was withdrawn. The number of The returns of the local committees have not yet been completed. So far they show a slight increase in the number of mares and foals competing for the premiums. 7301. If you have done with that part of the subject, there is, periaps, a question or two laught ask you !— Yes; the next is statistical.

Dec. 2, 1006.

you 5—Les; the next is statistical.

7522. Price to 1803 stallines were inspectful by
vehrvisary engrous appointed by the Society I,
understand 5—See; greet to 1805 by veterinary
engreens appointed by the Society.

7393. And since then you take the contilions of
any member of the College of Veterinary European.

Very her the Committee program of the same trans-

the right, when they think fit, of having their own veterinary suspect, or a veterinary surgeon entwinted 7304. Did they usually employ a local veterinary surgeon, or a veterinary surgeon from a distance, when they did the work thouselves I-When they

did the work themselves they went to some trouble to set the actoringer successes to inspect stellions in the districts in which they did not practice ex-7305. Do you know how it is now when you take a certificate; in the certificate governily derived from

a receivary surgoon in the locality !-- Frequently 7305. Besides unsoundness you would not register horses that are unsuitable in some other way; what are we to understand by that !- Unsurtable to get

half-boyd houses such as the Committee think it 7397. You mean when the Society is sending down a veterinary susyoon to examine stallions you must give him wase sort of direction to to what is meant by suitability !--Oh, yes; it would be very difficult so say what the directions are: the directions are not in print; a great deal is left to the discretion of the

inspector or veterinary surgeon 1308. Lord Asstrown.—They are good jedges of a home penerally !-Of course they are selected as bring suitable men to judge, from the Commister's point of view, what the stallium ought 4) be.
7209. Mr. Warson.—Is not the impactor saled

to furnish particulars of size and measurement and substance of the horse to the Committee !-That is so; he pires a return in detail 7310. So that they actually have all the particulars of the horse that can he given before them?-Yes,

7311. CHARMAN.-Who decides as to the house being suitable or not!-The Horn Breeding Con-7312. That is not a question for the veterinary

surgeon 5-No; he only reports so to soundness.

7313. Mr. Whench.-Do you know that the Committee also ask for a description of the stock the horse has get?—Yes; that is an important element in deciding whether the horse is suitable or not. 7314. Chargenay.—They are inspected also by an inspector !-Yes.

315. Even now that the certificate of any member of the College of Veterinary Surgeons is accepted as to soundarm i-Yes, as to soundarm. As to stisskillty the Society send their own impector to furnish then with a report, and to see the animal end to judge himself. He sends in all the particulars, and

the Committee arrive at their decision 7316. And those horses are examined for soundness every year 1—Not since 1895, when the new system was introduced. A certificate dating back to the

date which I mentioned is accepted. 7317. I don't quite understand that !-- In the year 1895 we accepted the certificate of any member of the Royal College of Veterinary Surgeons, provided it was dated later than February of 1894, a short period 7318. Is that to hold good for all time !- This year it would be a year advanced; this year it would be February, 1895, for the year 1896. February, 1895, for the year 1990.

7319. Then the house would have to be examined.

Well no: the Committee. if they think fit, forego the anothel examination is

they have evidence before them satisfactory, 7320. Then a stallon need not necessarily be evarated for soundness since 1894 !- No ; but the right to examine is always maintained 1321. Luri Assrrays.—If a new stallion is wanted

to be rut spon the resister he would have to be examined 1-Oh, of course 7322. Mr. WENNER,—Is it only for strong reasons,

or "Toyedo," that the Committee dayense with the exemication !-- That is so. 7323 CHAIRMAN.—They have very strong reasons when they disnessed -Of source; they don't dispense arbitrarily with the examination; it is on evidence

before them that they dispense with it or not 7324. You said just now that it was reported that one of the results of registration was that unaound housen were tending to champens-horses that did not pass?-That is so; that was in the second year of the registration. 7325. Whose report was that 1—The report came

7326. Can you tell us whother you have any further returns to the same effect !-- I believe the Committee had information, themselves independently that ench a change had been effected by the system of registra tion : stallions were known to have dissurranted which had previously been serving-unsernel stallians.

7527. Do you think you could give as any figures !them, that is some years ago now. 7328. In the second year of the registration scheme !- That was in 1895. 7319. It would be very interesting if you could give ue any figures on that !-- I will look that point up and see if the netual figures are available.

7330. Then you said, I think, that in some parts of Ulster there was an excess of nespinations !- In some parts of Ulster it was difficult to get a sufficient number of persons to apply for nominations. 7831. What did you do in those cases-were additional nominations given to other parts of the country I-The effect of a circumstance of that kind

would be to leave a certain portion of the fund unexpended, and I deal with that afterwards in referring to the statistics—the financial results. 7332. Can you tell as at all why the somewhat

averying change was made in 1895-was there any particular reason !-- There, again, it is a matter of individual epinion of the Committee selected for the purpose of investigating the matter, and the reasons are not recorded upon their minutes.

7533. And so to the effect of those changes you bave not yet had time to form an opinion, I suppose !- No. 7834. Mr. La Toucue.-I would like to ask you ne question-bow do the Committee account for the fact that the momens they accept the certificate of any vetorinary surgeon the number of stallious scorpted and decked to be suitable increased something like

70 or 80 per cont. 1-There were other changes made simultaneously; it would be unfair to assign that increase to the change in the veterinary examination

7385. Charman.-The See was abolished !-Yes : the whole system was altered that year. 7336, Mr. La Topeny.-How did that affect the

stallion owner !- It is hard to say how the system of the alteration in the mode of paying the owners of the mares would affect the stalken owners, exceedingly difficult to follow it. 7337. Lord Astrows.-In that year I think it was a rak that although only mores received prices they also go to the registered size.—Yes.

1.335. Therefore if a bone was not registered in two a certain lost to the soliton corner—that was made inducement to them to register.—Freuery, there was an inducement for their to register.—Freuery in these was an inducement for the register.—Freuery attacks which slid not strict before, and no doubt that induced excitain stallings which lad not been

registreal before to come in.

7310. Cuanaryas.—But that is not spike Mr. La.

Touche's question. He wants to know how you account
for the fast that the wants or know how you account
for the fast that the wants or knows passed some
and registered appears to have become greater since
on accound the cortilation compared to wind it was
increased from the legislating that has steadily
developed, in that it operation is this way—excess of
stallicies that use unmound dud they have no chance
of registering them, and I have no column that if the

stallines that me minored that they have no chance of registring them, and I have no doubt that if the system of registration were continued sufficiently long is would be found that very five nemound stillions would be possibiled for registration. 7300. Give us, if you can, the percentage passed send or rejoint in the your 1930 as compared with

sound or rejected in the year 1895 as compared with 1894 1—There not calculated them out in percentages, but in 1895, 308 was the number presented and 219 was the number accepted.

was the number accepted.

7541. Mr. La Tovcan.—The number passed sound?

—Aport from accepted, I could not give you the figures without examining the return for each in-

T312. You gave us the figures of the number passed sound and the number rejected for other cames I— I did; but I have not those figures for last year. 7248. CRAIMAS.—Three hundred and eight pre-

7343. CRAIMAN.—Three hundred and eight presented themselves in 1885, and 89 were rejected for some cause or other!—Yes, for various causes. 7344. What was it in 1894?

7344. What was it in 1894?
7344a. Mr. Wansen—On a different system !—
Yes, it is a clifform typeton; it is impossible to compare one year with another; there were 141 applitu-

Total 1895 and 105 for really the only years that can be compared together 1—They were the only two years that were welled on the same basis in the registration system, and there is a little difference oven in them years.

7345. Chartests.—What was the difference mode at regards the stallions —As regards the stallions the system of registration is almost identical. 7347. The only prestical difference that occurred between 1894 and 1805 was that in 1894 the Society

between 1859 and 1850 was that in 1854 the Society improved the horons themselves, and in 1859 they acousted the certificate of any member of the College of Voternany Surgeons as to soundness.—As to soundness, that is the difference.

soundness, that is the difference.

7346. Lord Ameroum. "They impect the horse as
to sufshiftly themselves!—In all cases the question
of impection as to suitability has rested with the
Society.

7340. Ourneaux.—Then there was an immuse.

increase in the number of stallions seeking certification 1—Xee, a great increase, 7350. An enormous increase, as increase in the one year from 141 to 3661—That is so. 7391. How do you secount for that 1—How much

of that fact it due to an alteration in the system of dyring the mance, and how much is due to the alteration in the system of the veteriousy surgests orientate, it would be impossible to say, these are two course, and which of them in the man one I due't knew.

Table. What promise may it that, according to that there must have boos, price to 1816 or price to 1814.

107 stallings in the country, the owners of which thought they were sufficiently sound to obtain a continuate they desired it, and yet they never came up to try to get one 1—Yes.

7355. That is vary odd 1—It is.
7356. One you account for it in any way 1—Well,

it is impossible to assign a cause; I don't know what the cause of it is. Lord Autronic.—There was not much inducement. ^M is show days, was there, for a stallion owner? 7.335, Mr. Wannin.—Was is not a fact that the Horse Decoding Committees as that three when this new

730.5. Mr. WHENELL—Was in not a fact that the More Executing Committees that they when this new registration was eccumenced, stigl to succeive the masons of the owners of every theorogylitheed horse in Ireland, and next circulate from the Debbin Science, to them and capitained the scheme—was there no succeived to them and capitained the scheme—was there no succeived to take and experienced particularly known and more execution and more execution's advertised. The formal many constraints of the formal more executively advertised, that it is a succeived and the constraints of the formal constraints.

to them and explained the elementary area on December Screen; to them and explained the elementary are tended in home 1—Yes; it was note extensively known and more excendively and extensively known and more excendively and extensively in an area of the extense I don't known.

Per 9 1996 £47 390 and expenditure on horse brooking, £36,614, Mr. E. S. Mon.

£47,390, and expenditure on horse irrosting, £40,094, and on eatile breeding, £10,684; the balance on 31st December, 1816, was £702, which has since been expended in the current year's work. It will be observed. that the cost of administration is not charged to the fund. It is easy to estimate what this charge would be because in salaries and waces the administration of £15.312 mata ske Royal Dublin Scorty £2,503, or 134 per pent. On this books of calculation the adminiscent. On this trees of calcustron the immuni-tration of the Probate Duties Fund would cost the Society £734 per annue, but visitorer the cost in it is pead out of the private funds of the Royal Dubin Society; it would be difficult for the

State to ensure efficient administration on more forcerable races. I bond in also the annual abstract of the accounts which shows the financial results of the schemes which have been in operation each year 7363. CHAPRICAN.-In that all you wish to say on the administration of the grant i-That is all I have

to say on that subject 7364. Owing to the fact thatit is administered out of the private funds of the Society, I understand that the whole of the grant is expended for the purpose of herse breeding!—The whole of it. The enture sum reaches the heads of those for whom it is intended. No expenses of administration are charged to the fund. 7305. Can you tell us where those stallions were bencht-these ten stallions !- I have not the figures

with me. I can get the figures. They have been with me. I can get to byreht in different places. 7365. At an average of £2501-An average of shout £250 a piece. 7367. Perhaps you will let us know !-- I will sacor-

7358. And also to whom they were sold i-Yes, 7340. Can you tell us how it was managed, that

they were sold for less than cost price i ... It has varied with the different stallions. 7270. How did they select the remons to be allowed to hay them?—By inquiry as to the districts where they sould be placed. Almost every year the Society has lowned that in certain districts good stallious are not forthorning, and they have inquired in these districts as to persons who would be inclined to take 'stallions on payment by instalments, with service con-ditions attached. From the beginning it has always been one of the regulations in the scheme that in the

event of persons coming forward and expressing a desire to obtain stallions that the Scotety would sel 7371. They selected the man most suitable in a district). That is the way it is really worked. A ruit has been contained in the regulations almost from the heginning, that in the event of districts not being mittady supplied with stalliens, the Society would consider in what way the deficiency could

he remarked 7373. Mr. La Touturn.—Have you any record in reference to these stellions purchased by the Compopularity with more owners 1-I have no dealst in-7373. The CHAIRMAN.—When were they sold !---! have not those figures with me. They have been sold have not those ngures when me. They have seen uses within the past ten years—from the very beginning. The total number purchased is small. I have given the results in ten years. I can hand in the name of

7374. Mr. Warnen,-I think they are all in the regular L. You. 7375. So that the Commission can turn to them at once 1—Yes; three is a return showing the names of the stallions, when purchased, the amount paid, the 7376. The OBARGUAN.—Have you saything further

more statistics : if desirable I can supply further facts.

7377. You said, I think, that prior to the Act of Union this Society administered whatever grants were made by Parliament 1-Yes; sometimes have 7378. Can you give them to us!-It extends

over a long period. One of the last Acts of the Irish Parlament was to vote £15,000 to be at Irish Partiament was to vote account to se as-ministered by the Dublin Society for the encouragement of agricultural industries. 7378. Can you get this information for mit-it

would involve a good deal of research, because it extends over a long period : but I have so doubt to be obtained. 7380. I noticed from some of the minutes was read

out to us of the early days of the Society, that grants appear to have been given for the importation of more, and occasionally for stallions !—That is so. 7381. Did that continue long!—I have maken oned to get the information, but have not been successful and carmot state precisely how long it continued, 7362. You don't know when it was discontinued! That is the difficulty; the minutes are often year

brief, and it is not easy to not information on a voice. 7383. It would rother look as if there was a last of good mares in this country at that time !- That is distinctly the inference to be drawn from the early work; persons were encouraged to import not only stallions but mores.

7281. As far as stallions are expormed that con tirces !-- Yes; premisers were given in the latter part of the 18th century for the importation of mares. 7535. Would the records of your Society be able

doubt that it is possible to give any fuller informa-7386. You could not for instance tell us what kind to get large animals "fit for the plough" as the term was strong large estimate. At the heastning of thus century, insmediately after the Union, the Bouists surveyed Ireland-made statistical surveys of 24 cut of the 32 counties, and published these in some 25 volumes. I have noticed that in these there are repeated references to the horses of the county. In some of the surveys the class of home in certain parts of the country is spoken of very highly indeed, and in other cases the houses are described as being

miserable, and in two or three reports they are peferord to an being bushespeats treated by the normale -badly fed and cruelly treated.

7367. From your statistical knowledge can you ony at all if the rose of house has been improv-ing in the country of late yearst-Well, almost the coly data man which I could presentally form an opinion would be from the Horse Show, and most unoccaliombly there has been on extraordinary dovelopment in the horses that come to the Horse there is the development which I have pointed out so taking pines in the horse trade—the expertation of horses from Ireland is accreasing, and I think if the breed of horses were deteriorating it is scarrely

likely the trade would be increasing. I would draw

the opposite inference, that because the trade is increasing the breed most be improving; it must be worth the while of Englishmen and foreigners to come to this country to hoy borses or they would not come.
7388. Mr. La Topour. -- How do you arrive at the value of a home at \$3 1... I take the official figures ; I would not venture to value them 7390. Are you quite sure you have got that correctly; in his statistics he value horses of different ages at different prices and different valuations i-I

have taken would numbers, five millions for the name of the person by whom the stallion was mer-630,000 houses; it would not make much difference if you altered the valuation a little one way or the von wish to state to the Commission !-- I have no 7391. To 1888 or 1887 I collected some statistics. and adopting Dr. Grimshaw's figures then, I arrived as \$15 per horse, yearlings, two-year-olds, and threeyear-olds, and the numbers of the respective agos b-If that is the value the expenditure upon the article becomes ridiculously small. It would become about contractly sixth per occa.

7592. I should like to sak you if the Committee or

Council have soy information showing which of the many schemes adopted by the Society was most popular with the horse breeders !-- The Society is at presest collecting information on that point, but the retemps are not complete. So far as they go, it is pretty much of an equality as to the scheme considered most popular. Some counties prefer one scheme and another, I mean the system of subsidizing stallions is preferred in some counties, and the system of prizes

he mares in professed in other counties, and at the present moment the Society has in draft a scheme which would afferd different counties opportunities for carrying out whichever scheme they preferred 1393. And you propose for 1897 a new soheme !-It would be practically a choice of either of the schemes formerly in operation 7294. Are the owners of stallions consulted as

runds the popularity of the various schemes as well as the owners of mares !-- I cannot any that they have been. I don't know to what extent we have obtained opraicus from them.
1395. You are endeavouring to obtain the opinious of the owners of mares !- Woll, they are the people

for whose benefit the fond is destined. 7386. Mr. WRENOS.-With the exception of these orpies of the Surveys, are there any books belonging to the Society that would be likely to throw any light on the arbitect of the ancient livib hornst-1 have consulted other works, but I find they are for the mest part prepared from the Royal Dublin Society's

7397. So that the County Surveys are the only books available !- That is so. I might say that I noticed in one of these Surveys that in the year 1607 there was a scheme for the registration of stallions, and T. J. Rawson, who surveyed that county, recommended getting vid of what he describes as the "barrel of oats stallion "-that is the house that gave a service for a harrel of onta-and he procosed a system of registration, and that suitable stallions should be cherged a fee, except in the case of those recognizerded by the local Farming Society, in which cave the fee should be remitted. That was nearly a century ago. 7398. The CHARMAN.-I suppose nothing came of that at the true !- Nothing 1395. Mr. Wheron,-Have you anymore informa-

tion of that kind or anything of interest you have ome across t...It is scattered through a great number of volumes, and I have not read them all through. I have read a large manner, but not the whole lot.
1400. Mr. La Teorem.—Is was not before 1888
that the Royal Dubin Society gave any prizes to
thoroughbred stalliens, the first subsidiaring of stalliene occurred in 1888—The submit

in 1887 and 1888. 7401. But were there not prizes in 1868 at the Horse Showst.—The Horse Shows commenced in 1888, and that was the first year the Royal Dublin Scenety offered prizes for thoroughlved stallions. They gave Lord Shannon and others gold medals in the last century for druft stallions. Immediately on the Parming Society discontinuing operations in 1631, the Society commenced shows, and horses were

included in them up to the year 1865. The borner were for the most part agricultural become; but I Ha Z. I Here observe, in looking over the catalogues, there were occurringly throughbreds.

7403. These were occusionally !— Yes; and apparently hunters on some occusions. That system of

giving prism to horses at the spriog shows was discontinued for a couple of shows, and immediately afterwards the system of holding a show exclusively for horses commenced. 7403. In the ccientific department of the Royal Dublin Society is there any information reparding the ancient Irish house I—There is not; the best record

is in the statistical Surveys.

7404. That was in the middle of the last century i That was in the beginning of this century ; most of

the Serveys were published in the first five years of the Is there any information concerning the horse of the 16th century !- No, there is not; these Surveys in some cases refer to what is called the old limb house, described as a "survey "-a horse of the notive breed in frequently spoken of as a "garren."

7406. The CHAIRMAN.—Amongst all these different changes I think the limit of valuation has remembed the same !- In certain counties it has been extended from £150 to £200, it being believed that the best than 50 marm resuld be found in those counties in the bands of persons of the higher valuation-a more suitable class of mares.

7107. About these load committee-they were entirely appointed !-- Yes, entirely appointed. 740s. Has the Society ever convidend whether it would be advisable to have any elected element in thum !-- You see the sum the Society has been dealing with-£100 per county is exceedingly assall-and any system of election would be a costly system. I think the cust of election would expeed the £100. 7409. And for the future I understand you to my

that the Society propose to give to these local committees the option of adopting which of the two schemes they like best i-That is the proposal they have at present in draft; it is practically accepted for the cossing season, but not quite definitely arranged. 7410. Supposing there was a larger Government grant, have you considered what would be the best way to administer it?... The Society has only dealt with the administration of this fund; what they would do as regards the administration of a large

fund is a contingency that has not arisen, and I could not offer any opinion. 7411. The Society, I suppose, would think itself capable of administering a larger fund !- That as rather a delicate question to answer. 7413. It has been suggested by a good many witnesses that mares in foal should be registered -- a lurge system of registration-can you give us any idea as to how that could be done if considered desir-

sale whether it should be undertaken by the police or what t-Ench a thing could not be carried out without very comiderable excenditure. 7413. Probably you have not convidered that!-No; the position of the Somety has been that we get £3,850 for the thirty-two counties of Ireland 7414. I mm not asking you the question as repet-ioning the Society, merely as your own opinion !--

Individually I have no organion 7415. Is there any other information you can give us, Mr. Moss !-- I am not aware that there is , if any should occur to the Commission as desirable I shall be happy to farmish it.

Mr. Dawson A. Milwano, Lavistowe, Kilkenny, exemined.

7416. CHARMAY,-You live in the County of Kil-kenny 1-Yes. 7417. You are engaged in farming 1—I have been since 1848.

7418. And engaged as a land agent 5-Engaged as

a land agent and very largely engaged in farming, and have been breeding burses. 7419. You breed yourself!-Yes; I have always

Dec. 3, 1895. Mr. Denson A.

been brooding half-bred horses from my farm mores. and mostly with thoroughbrel horses, some of those in some instances with the half-bred.

7490. What do you sell them as b-For hunters. and some first-class exerisge horses. A large number

have turned into rather good hunters; they are large

7421. In your part of the country suitable for horse breeding b—It has always had rather a good name.
The south part of the county, which is called the Welsh mountaine, has always been noted for a good class of medal house. The north side is not quite so good. but at the same time produces a good class of horse.
7422. Is in funcatons sell !—The north end is all meeting, the south end is not

7423. And you think the southern end is hetter than the northern and 1-Just so reed every bit in 7424. You think the limestone soil is not necessary!

It has not been my experience that it is necessary. I may say I was the person who week that easy that was mentioned by Mr. Meas just now in 1815, and I had say attention pretty well called to public horse breeding ever since, and I have been a member of the Horse Shoot Committee for many years 7425. It is rather generally expressed that lime is

necessary—do you know if the water contains lime !--It is almost entirely gravets and slay state soil in the coutt of the County of Kilkenny; the limutone does not come below Thornastown, two-thirds of the way

7136. Does the river come from the same place !--Year but it is a tidal viver in a low part of the county, and it is a hilly district, so it could not derive

anything from drainage. 7427. Does the river rise in a limestone country? -Yes 7436. And it is possible there is lime in the water? ... The water in the district I live in it sheel at dwderived

from the watershed of the bills, and these bills are very high and pass their water into the main river, which is a tidal river for many miles up, so it could not possibly derive any lime from that not possibly derive any mee from that.

7429. What is the general closs of horse bred in
your part of the country to Very poor; worth from
£15 to £20. They have degenerated very much indeed. There is a large fair in Kilkenny and you would not,

perhaps, got times or four £30 horses amongst them.
74:50. To what do you attribute this 1—To the sale
of marce to go abroad very much. I find M I have a
goodish mass the foreigness will huy her. I sell a great many horses in Cloumet fair, which is the hour sir in the country, and the foreigners almost always take the best of them.

by the higher priors they get for the maren !--Absolutely: I don't think that the proportion of brasters bred by the small farmers is worth talking of. You sometimes may got a nice light weight, but the average beeses in those fairs are altogether below troopers—stere cabbers and delivery care-horses. 7432. For that class has the price core drown

much !-- Yeey prosh. 1433. Do you think it can pay any small former to breed 9-It cannot possibly; to sell a four-year old. at £10 cannot pay them.

7434. Then what do they do it for!—They have the marcs and send them to the horse without knowing what they are doing it for, not as a moneymaking transaction certainly. 7435. Are there as many bersus hred now as fermorly !--I think so. 7436. What kind of meres do yes breed from yourself!--The Irish half-fred mare--desarlogged,

hig, beavy, lumping more, such as if a little better cisas would go into a brougham-they have been suitshie for my work. 7437. Do you always put them to a thoroughbord? Generally. Some of the best steppers I have beed -Generally. Some of the

7438. What do you mean by half-brein !-- Annthing that cannot go into the Scud Book, because Iroh half-bred horse is almost a thoroughbrad. Rehas a great many deshes of thoropolisms

7439. Do you keep stallions yourself to No, never 7439. He you stop stations yourself to No serve.
7440. How is your county off for stallines to think we have quite enough. I think the system of registration has effected it a pool deal, but I think a

7441 How has the registration effected it 5-I was put on the Horse Economy Commission in Access and T was rurally the origin of these changes speken about out on the Horse Breeding Committee in 1889 and I was partly the origin of these coangenepates about so it might be well to give my origins on that Is 1889 I started the proposal that it would be hotter to give the money to marea, because we thought the there were plenty of stallions in the country, and that the stallion owners were able to take sare of shore solves. I was very much out-voted at the time, but subsequently, in 1894, that same proposition was adorsed, and that is the meaning of the resuchange your louiship has mentioned in the system of working of the Government grant. Since that I think that avoices has been hardicapped by the fact

that the horses to be used are obliged to be registered

In the registration of these horses-7442. Stallional-You, I call them beeses; in the registration they are liable to be selected and also to be inspected for soundness; I think that the sound-ness opertion is a prestion beyond all dubt -- the they should be inspected for soundness; but I age not property to say that the itanection for coulty is fairly carried out or worth doing. I find here is the statistics of the thoroughbrid class to Dukle. which are supposed to be the better shan haves of Queen's premiums-that the judgments there are so baye destroyed all coeffdence. I first the pose that wins first urise this year, leaving another house onnoticed, next year he comes out unnoticed, and the unnoticed one of the previous year comes to the front, and so on. That has had a great deal to do with injuring the idea of registering, and provented many from registering in the limit place; the fee for register ing was an item, but that has been done away with. The idea that men should not be allowed to exhibit their mares unless in foal to registered stallings also works badly. In Kildara there are 16 keess registered, and out of these 13 are serving at feet registered, and not of times 13 are corving at two over £4, leaving only three horses in the county of Kuldere—which in horse-breeding is the leading county in Ireland—to be used by the farmers notice £150 valuation, because they charge only £8. In other counties I have the statistics showing very

with the same eart of thing.

7443. What are you quoting from — Frem the
Register of Thereughbred Stablious of the Royal
Dullin Society for 1816. I have taken all the house with their face : the horses are given in each county, and the fee they charge is also given. In the county of Londorderry—take that as an example no borne is registered, and the result is that no farmer in that county can exhibit a nero of any son or kind. The farmer might go outside the county if he got the chance, but in his own county he has not the chance. Therefore I may the registering system has rather broken down. The total number of house that was put on the register was 534; out of this there were 69 sharging over £3, leaving only 165 horses in all leeland from which these men could select That, in my opinion, has tended to reduce the number of mares exhibited to an enormous extent. My experience of breeding horses has been that it is exceedingly diffcult to judge from the looks of a stallion what he is going to do at stud, and my opinion is that the farmers judge by produce more than by appearance. A farmer would therefore be rough better pleased to judge by produce than to is bound to go to any particular home, and if he had his choice I think or should have a very mosh larger number of same rabilities. It has been said by deletes, by autors of bounds, and by every person, that we want many we have plarey of stellines, and it is with that plant I tasked that system of trying to get money given in prizes to interect; box, at I said just now, it is harden-pear by this regulation pressed on me at the needing. I have been the original resolution proposed, and that was assented and altered, unreclaim; then system or negatives within I while has done the

against a market.

7444. You think the system as applied to mares has not been as successful as it engin to be, from the fact that these mares common be sent to a registered staffing insamuch as there is not one mear enough?

...There is not one near enough.

14.6. Yes object to the system of registration as splinds stalling, one on account of the examinations for conducts, but on account of the satisfity I—A god deal; I den't think the stallion owner likes to sakeit his brace to be orabbed, in either words——74.6. You would not do away with the examina-

7:46. You would not us away with the commention for soundness 1—No; I think that is absolutely generary, and for the mare too.

7417. And the horse he man passed sound you would have it to the farmer to go to the horse he liked bost?

here it to the tarser to go to the cores an inter-very —Yes. In my optimics the faraures of feedered have profitsed this wonderful breed of horses without any suitance from any society or association, and fides tsee why they want it mov, if we could just a stop to these unascend horses. I have a map showing, in Klikczny and Wanferd, the location of these horses, 746. What map is this 1—A map of I trized on

7-144. What map is this?—A map of Iriciand on what I have pended down the location of those with I have pended down the location of the location of the Irician of the Irician of Irician o

Smally a Jones also rejected for a Quant. P. Nus. voic scored. Heart of Oak was third, and Boat Ceris, highly seasonated and reserved. In 1922 Assolubility is successful and reserved. In 1922 Assoluted and the property of the property of the conorday of the property of the property of the control of Oak gas working at all. In 1933 Marcheway gate of Oak gas working at all. In 1933 Marcheway gate and Smalley, M.P., and Vistories in mentioned; M.P. and Vistories were bought at large prices and Smalley, M.P., and Vistories and E. 2000. In 1934 Marchavery was par first, bending Royal Month of the Control of the C

That, I think, shows the ups and downs of stalling judging, and that, in my opinion, has tended very much to her a stalling owner from showing as local shows for those Queen's peties.

7435. What do you support should be done t—I have supported there should be no judging of stalling.

latting the farmer to judge for himself.

7446. Then you edject to prizes being given for stalliens!—Lot the prizes be given as before, those me the Dablin Society prizes; these are the Queen's

stallions I—Lat this prime to given as before, those me the Dablin Society primes; these are the Queen's premiums of £200.

7407. You object to them I—Yes; if a borse is really proved somet, let the farmer judge for himself.

tan). You output to them in-rest if a house it fall, if an indicate the rest is a single property of the rest in t

say life in can yard." They were got by a locus I had given £25 for 1449. What yevents the man now choosing for 1469. What he engineered here. 1469. What has registration got to do with the fact that argumently there are great diverpanties in

julging at the Home Show 1— It would tend to show that registeration hos broken down.

7401. Lord Austrony.—I think you mean that the or impection of home for Brosse has beenen down as that officers has been down to convey.

or in 1990 we have nown some bornes were all
the way from Dultin to Cork, and from that to
be Belfast, and when they got to Belfast they were
we found to be good corough, while in Duklin and Cork
as they were rejected.
7448, Oranius are. What is good corough for Belfast

is not half good enough for Oork b. That is it. I found
many instances where howes rejected in one instance
afterwork got prises. I have always said all since
that this system of inspection of stallous has been a
mistake.

massize.

7.0.5. Have you any other suggestions to make as 7.0.5. Have you any other suggests the Royal Dubles Scoting's Scheme 1—1 thick regards the Royal Dubles Scoting's Scheme 1—1. Thick is consistent of the Scheme 1. There is no seen and the second on the second of the scheme 1. Thick is right to consistent of the second of much, and I stead to call his attention to the fact that in 1504 th beams a condition in congesting for

think the crossing in 100 years would be appreciable. all prizes that all stallions must be registered; that is 7476. Would not the blood be likely to spread largely - There are 600,000 house in Irthond: it the reason of the great increase of these stallions that

COMMISSION ON HORSE BREEDING.

competed for the £50 price were obliged to be tegistered; they never were registered before. the result was that brought them in; it runs up the number of registered stallings, but does not help us a but in the way of breeding horses. A great deal has been said about Hackneys. I am not an advocate of the Hackney in any shape or form. I don't know anything about the Hackney, but I think it should be understood that no one has yet, as far as I am

244

aware, and I have attended a good many meetings of the Royal Dublin Society. I don't think it has been suggested that any part of this £5,000 should be devoted to Hackneys. 7465. CHAIRMAN.—Have you ever bred from any thing but a thoroughbred !- The Irish half-bred. I never bred from a Hackney. We have no Hackney that I am aware of in our county. Major Connellan said there was one, but I don't know where he is. 7400. In your district is there a Clydesdale or cart horse t. There are one or two, and they are

rather popular, but I don't think they are doing very 7467. You have never used them yourself !-- No.
I don't think the Royal Dublin Society ever introded to introduce the Hackney; in 1891 and 1894 they did give prime for Hackneys, and it was understood if any person chose to bring a Hackney they should be allowed to come there and show them and allow the public to judge for themselves; there was such a ory not up that that was put a stop to, and now they

reputints them; if I wish to breed from a Hackmay I don't see why I should be prevented. 7466. Do you wish to heed from a Hackney !-- I think from the class of mares I see going to the fairestrong thick little mares that would kick storence for a mile along a road-that a cross with the Hackney would do good : I don't think a gross with a Hackney would ever produce a hunter, and as to their being inferior animals I cannot understand it. From what I have seen I think they could not be so bud as

7450. From what you know of the Hackney you don't think it would cause any deterioration b-My nephew has brought a Hackney from England, and he is as perfel a cob as I have ever seen. 7470. Do you think from what you know that the Hackney blood would be likely to knyrove the breed

of high-class harpers and carriage horses?-- I don't think it would; but those horses are a small item in proportion to all the horses-one per cont. 7471. What do you look on in your county as the most profitable class of horse to beed 1-The most class is of course the most profitable, but very few can breed it. For one £30 or £40 house I saw in

the fair at Kilkenny, there were a couple of hundred from £20 to £25. 7472. If you can produce the hunter it would be the most profitable !-- Undoubtedly. 7473. You think the introduction of two or three Hackneys would produce a better class hunter !—No, but it would produce a more saleshie home. What the farmer wants is a horse that will go to the dealer and get his money-a horse that there will be a good

sale for ; to enggest that every borse to be bred by every common farmer is to be a hunter, I cannot see it 7474. Do you think the Hackney could be kept from controlling other breaks -- We have admitted

Civdesdales and I don't see they interfered. There was a gentleman said he had brad from a Civdesdale and sold it for a very large sum. 7475. I was not talking of Clydeniales—all I want is your opinios. You said you think it would be a good thing if there was a Hankacy sire or two in every county; you think at the same time that the Hackney

wood would be detrimental to the blood of housers to -I don't think it would be actually detrimental: I don't think it is going to help the hunter, but I don't

say that the stalling had been proved for sundana. 7483. Most stallion owners have the certificate, I funcy t—They have; because I should say the Royal Dublin Society would have the right to shp in and have the horse examined.
7483. Would you publish a list of sound stallians? I would not exactly publish them.
 7484. You would have to have some list for the

would take a long time to permeate them.

7477. Are the sires in your part of the country sound in your opinion ?—I think so.

any great improvement, and unless we got more money it is very hard to do much with that.

7479. Do you think the system of registration has ourload to the disappearance of any unspend stal-

7480. Lord Assrows.-Speaking of the Royal Dublin Society's Scheme, I gather you want to give

7481. How would you manage about setting whether a stallion was sound or unsound-some as-

thorsty I suppose !-- I should say it would be cuite

sufficient for the owner of the more to be broad

before he could exhibit his more to procure from the

stallion owner a certificate, and be in a position to

the money to the marent-Yes.

7478. Are they good enough !- Quite good enough I don't know though that £3,300 is going to make

farmer !-- I think the local Committee would be competent, and if they had any doubt to call on the Committee of the Revel Dublin Society and certify in examination by a Dablin veterinary surgeon. 7485. You don't approve of inspection on the principle that there sizes had been put up and down in the Dublin Show!—Certainly. I don't think the

introcotion goes further than to say these sires are fit to get horses. It sometimes has been said a size is not suitable and when the sire has been shown to others they said be was quite suitable. I have in my mind a sire rejected by the Inspector of the Royal Dublin Society; to my mind he was suitable, and some of the members of the Committee said he

was; but he was rejected on the ground of saitability be was perfectly sound.
7486. You would allow a farmer to send his man to a half-bred or thoroughbred, whichever he thought most suitable !-- I would allow the farmer to be the

Judge, and in my opinion he is as good a judge as we shall ever get; he judges by produce. 7487. You would not hind him down to go to a thoroughbred !--No; I would not hind him to any particular size 7488. Mr. Canrw.-You moke of breeding vari

good stock by a half-bred sire that you bought for £35. Can you tell us his breeding !--By a thecough-heed out of a Clydesdale mare. I bought him for the use of the tenents; I was at that time agent on a very large property, but I used him myself for three or

7489. He is what you call a draft horse !-Better

than that—a dean-legged horse, a good stepper, 7490. You would approve of that crossing t—If I could get another horse like kim, I would never breed from anything else

7491. Mr. Warron .- Have you ever heed from the rodnos of a thoroughbred borse, the second cross !-Yee; these very often run light. I think that what a light horse runs anyway contrary with you he is literally worth nothing; if he is a perfect hearty of a

thoroughbred horse he is worth a good dud, but he must be a very good one. 7492. Do you think the heavy class of house like the Clyclosdale or Shire is required on Irish farest No, I don't think so; I have compared notes with Sooteh farmers, I have had as many as fourteen pain of horses working, and my opinion is that on the light-land I had I was able to plough quite as desply as

they were.

Mr. P. Bloft's.

wore Which do you think it nave a small farmer to breed, a hunter or harness horse t-It is very solden you get a hunter—the barness heres, I think. 1494. You think action is closenable in the harness hors !-- Rather; it is most important. 7495. I shink you said Ireland had encomeded in bresting better horses than any other country—ron

dri not say to what came you attributed that !--The Iriab farmer has always had a dash of sport in him; he is fend of a good horse, and for that reason ther have kept up this class of bores all through. 7496. Do you attribute it also to the soil and climate 5—I don't think it has much to do with is--

feeling is much more important 7497. You know a great many parts of Ireland nearly bread the best known !- Man from 4500 to 6100 valuation—big men beyond all question : I know

£100 variation—big men beyond an question | I know a great deal of Cork and Limerick, and there the borns are much in the hands of his men 7408. They are a small proportion as compared with the entire !- They are; the multitude of horses ers in the hands of small men, and that is what I want to improve : if I could do that I would be satis-

fiel to allow the few to go on as they are.
7402. You think the few are also to study their rests 1-I think so. 7500. The CHARGEAN.—The smaller farmer in your looking connect broad at a profit L. I don't think there no ray for the service of a ware-rest the colt to for years old and sell it for £15 or £90. I would

try and give them a heese that will get the £20 to £10-give them more action. You. They cannot brend at a profit pow ; wen don't see any reason why they should not with a ruitable stret.—Certainly; I think this haying of stellions by

7517. The animals in the fair at Kilkenny von

has been suggested that we should go to England has been augusted than we should go to ranguage and bey maren. I don't see how that could be done, Mr. Dewen our experience of bringing over those stalliens is not attackney. One was killed on the read, and smother, beinght for £330, was add for £50, and one of that sect of thing rather frightens me—I don't like it.
7502. Have you considered the question of Govern-

ment Stud farms !- I have considered it : I don't know it would be a great advantage; I think it would be a out he carried out. If they had not a demand for the ean be carried out. If they had not a demand for the refuse borses I don't know what they could do with thom. Everybody must have refree; I don't think any man can breed more than one good herse out of every ten; if he does that he is very lucky. The refuse would hardly be good enough for troopers, and what they would do with them I could not tell.

7503. Assuming there was any grant of money, in what way do you think it could be best expended? -1 think nut in the hands of local committees to hold shows and encourage the farmers with lumping prices. It is nonsense giving £5 prism; is doors't induces any man to keep a mam. If they gave £10 or £30 in two or three districts it would be such an induce-

ment as to influen a lot of farmers to compete for them. In that way we could get the mares keet, if we could run the chance of getting £30 or £30.

7504. You think this money should be expended in prices for mares 1—Yes; I have thought so for a veers, and at the time I wrote that paramilet I thought that was the great thing. I only

get second prine because I gave my opinion very strongly. Poor Mr. Morrogo told me that was the 7303. You have nothing also to say !-Thank you.

think I must have exhausted you.-I know I the Dublin Society has been rather a mistake. It

Mr. P. SHERLY, Ballywalters, Callan, examined. 7505, Ostareman,-You live in the County Kilwould not consider a fair sample of the produce of beeny !-- Yes, sie, South Kilkenny, very near the the county !-No

borders of Tipperary. 7518. Do you key generally in the fairs, or how do 7507. And are you encaped in farming 1-Yes. you kny !-- Sometimes in the fairs and sometimes at

7519. To whom do you sell !-- I make a hunter, and 7508. Do you breed horses yourself 5-I do, three or fair foals avery year. sometimes I sell to gentlemen who make bunters of

there and sometimes to dealers. 7509. And do you buy also 1-I do, from twenty to thirty borses every year.
7510. Do you buy all over the country !... Geografic 7520. Do you sell generally to the locality or to oalers !- Both

in the district I spoke of, South Kilkenny and East 7531. How is your part of the country off for stallicus la-Well, fairly well off, but we might be Tipperacy.
7311. What kind of horses do you breed yourself!

7911. What kind of horses do you broom your and I was fairly 7522. Are there any half-head stallions 1. There are a good namber. 7512. What do you consider the most profitable kind of borse to broad 1—The thoroughked borse. 7521. Do you approve of them !—If you mean by half-lowed stallings a horse that is one between a throughbrot been and a Clydoudalo. I cortainly Semetimes I have bred from horses that are not in would not approve of him under any conditions; but the stud book, but practically thoroughired horon.
There are two or three in the locality I speak of that there are a good many horses called half-bord horses

that are really almost thoroughbred horses, and I consider as good as any thoroughbred horse to would approve of those; I have used them suscessfully ; there are two or thron in the locality at present, 7513, What kind of mares do you use !-Wallherd maron with sire and relatence about them. ercy successful sires.

7514. And you aim at producing hunters !-- You. 7504 Ave there any Circlesdale stallions in your 1016. And you aim at producing hinters I—Yes.
1016. And if they are not good enough for benders
they sell as harness horses !—If not good enough for
burders I sell them as carriage horses, and if not I wort of the country !- Yes ; but they are not used in he south of Killerows or past of Timmerary : in north Kilkenny there are some Cl-deedale stallions.
7525. Do you think the farmers generally about sell them for troopers. 7516. Do the farmers about you aim at producing buriers !—Yes, the farmers of South Kilksony and

you take unfficient care to mate their mares to mit-able stallions! —Generally speaking I think they do, But Tipperary. They are principally sold at the fair of Clumet. Mr. Milward made an observation about Kilkenny; but in the fair of Kilkenny they insonth Kilkenny they take an interest in horse-bread ing and have bred a good class of horse there for a

7536. In the Royal Dublin Society's scheme in cally get the refuse because the best of the colts in operation !- Yes ; I am a member of the committee the county, so it is only the refuse of the county that goes to Kilkerny.

7527. Do you think it has done good !-- Well, I think so.

size must be sucet profitable

Dec. 9: 1906. 7508. Have you may improvements to support with Mr. P. Shelly to be subject to some system of registration and 7520. But they say now, are they not 1-Not

246

altogether, I think. Every stallism no matter what class he is, whether he is a thoroughbrol horse or a half-beed or a draft here or saything also, should be examined particularly as to soundness and I would suggest that there ought to be some system of prince of sign and substance-ofer them good prizes to keep them.

7530. Are they inclined to sell their best marred -They are unfortunately.

7531. More than they used to be 1—Yes, I think so. 7538. You think sometimes ought to be done, if easible, to counteract that —To keep the good

names in the country. 7533. You have been accustomed to frequent fairs: do you think the quality of the animals at the felou is as good as it used to be !- I think so. 7534. I suppose a good many becaus are sold direct to the dealers without going to the fains at all ?-

Yes; as I said before, the dealers scour the curl of the county and in Tipperary also; they buy the foreversedds from the farmers, the farmers don't make bunters out of these, and they go around, a good many what you would call gentlemen dusiers, and they buy a cost to make a hunter of him 7535. There are no Clydescale sieus in your part of tim country!—Not in the south of Kilkenny; but just on the bordom nour my district there are two or

three Clydesdale sires, but they are not much used by the farmers of south Kilkenny-very little word. 2536. Are there my stallions except thoroughbreds or half-breds--any Hackpeys or anything of that kind !- There are one or two Hackneys not in the county, but they come into the very extreme nouthern end of it for the last year or two. 7537. Are they popular 1-No, sir made

inquiries since I got the notice from Mr. Noville, I have made impriries from the formers of the district. and I have found they are not popular -- they don't like those horses. 7538. Have you had any experience in breeding yourself from a Haskney size !- No, I never did.

539. What sized holdings are there about you'l -They are mirerel, on an average 60 to 70 acres-of a source there are some larger and a good many amaller -but that would be about the average of those who breed horses. 7540. Do the small complex breed at all 5-Not to very much. Not so much as they used a few yours

ago when a two-year-old sould be sold at £13 to £13, but latterly that trade has dropped 7541. In it, in your opinion, the case that the price for high class hunters and carriage busics has kept up, but the price for the inferior house has gone down!-The price for good class borses I think is as good as ever it was if not better, but the price of the inferior

cess has goos down 50 per cent. or more. 1542. How do you seesant for that 1—Those dealers that used to expert chesp horses tell me that the American horse has knocked out the trade, and I suppose motor ears may have had something to do with it, or bicycles; but the principal reason, the shipping dealers tell me in the fairs, is the cheap Americ

7543. Lord Astrows.-You say that the most profitable home to breed from is the thoroughbred...do you mean the thoroughbred or a home got by a thoroughbred !- Well, a horse that is a pure thoroughbred, that is of course the right sort

7544. By thoroughland I mean a borse that is in Westberby's Stool Book !-- Yee. 7545. Do you breed those yourself !-- I do. 7545. Do the farmers round you !-- No ; I thought you said the most popular horse. 7547. No, the most profitable !-- Oh, I would not

7518. But do you think, taking all the mares in your district, the average of the home got by a thoroughbrod tire is the most profitable !- Most decidedly so. 7549. Do you think if a farmer bend from . thoroughbred or from a half-bred he would get a better price on an average for the house got by the thoroughbred !-That depends on the mares he krossis from 7550. Do you titlak the throughbed is the west saitable become for all the macros on an average in voter district !-- I would say so.

7551. You would not be averse to a half-brid sire !-I would be averse to a half-brest stre; as I said before the size got by a thoroughbred home out of a common more most decidedly I would object to 7002. But a half-bred size with three or four crones

of blood in him !-- I have used such a horse as that with waccoss myself. 7553. You think that is a sire that is useful at times !- Most decidedly ; we have two or three horses, of that knul in our county that are good sires.

7504. As present under the Royal Dublin Society's scheme only thoroughbrod sires are registered!-I should not be averse to registering borses that are not iu the Stud Book but whose poligree can be proved satisfactorily, and in addition to good looks I should go in for performance of some kind or other, either in

on hemtene field or over counte 7556. There are very few helf-bred sires that are bunted !-- We have some hower in our locality that won point to point races. 7555. Stalliona !-- Yes, and have been used with

7557. Are there say half-bred sires in your district that are getting good stock that have not won races? Yes, there is one horse. YEGS. Could you tell us his name !- There are two :

you mean to say a horse that has not wen most; there is a horse colled Reliable in the East of Tipperary—he is a son of Old Victor; to my knowledge he has never won rames, but is a very successful country sire as a ster of franters and market stock. 7559. Do you know how much blood he has !-He is at least three-quarter bred; his dam was a wellknown good heater.

7560. There are no Hackneys in your district; what are the Hackneys that stund near you!-I am not up in the podigree of Hackney horses, but they are said to be pure-tored Hackneys. 7561. Can you tell the Commission their names!— I could not; I paid to little attention to them that I really don't know their names; but one of them. I am sure, is a pure-tred Hackney, for I would not doubt the

gentleman who owes him : he would not tell an unfruth about anything.

7552. Where does he stand!—He stands in the month end of Waterford, at the other side of the Sun from Killman

7543. Mr. Wersers.—Xon may tell us his name; we have a list of all these horses 1—Mr. Malcolmon is the owner of one of the stallings; he lives at Port-7564. Lord Assrrows,-Have you seen stock by him !-Foals. 7565. Do you know how they sell 1-There is no trade; they are only foals.

7566. Mr. La Toucurs.-You slways breed from gistered sires yourself !-No, mr; I have occasionally bred from a horse not in the stud book, but I would be very far from caying they were half-bred siren; they were considerably more than half-bred.

7567. When you breed from a thoroughbred sire would you get any value on the fact of its having been registered by the Dublin Society 1—1 should. 7548. And you think, apart from the Dublin Society, that no boses should be allowed to cover marce whatever his brood unless he had a certificate of soundness !-- I would say that would be a very good thing.

Printed image digitised by the University of Southampton Library Digitisation Unit Printed image digitised by the University of Southempton Library Digitisation Unit

7549. Here you found that the price of horses has much deteriorated in your district !- The price of a and well-herd horse has not detenuented at all, but the order of the inferior bream of the wood or screw. has deteriorated more than 50 per cent. in the last

7570. Has the price of the ordinary light-weight barness horse determinated !- No; if it is a rully

7571. Then what class of horse do you think has (attendental), the been that is a little worse than a 7572. Mr. Warsen,-You think the cood harness hore has held his own in prior I—I think so, air.
7573. Do you think Killermy fair is improving b—

In numbers it less, but in quality it has not. 1574. The other Hackney you mentioned. did he stand -Almost in the same district, three or for makes away from that.

\$675. Also in Waterfeel or Killsoney t-It is in Tioperary, in the town of Carrick-un-buir. 1576. But you are not sure it is a Hackney!—I am not; I never now its could of poligron; it is only heavay, but I saw Mr. Mulcolement Hackney.

7577. And they have only been a dort time in the country 1-Only two years.
7576. You have had no opportunity of judging what their stock would turn out !- Except what I

sould judge from the feals.

Boelety's scheme !—Tierry of thern.

7580. And do you think that could be carried out is the country without too much trouble !-- I think so. 7581. Do you think that would put up the price of horses if you were always able to produce a certifi-cate and if the breeding could be traced !-- I think so

that a good thing !-- I da.

with foreign buyers; it is always an object with them to know how colin con head 7532. CRAISMAN.—How do you think such a universal system of registration could be carried out \$

-I think it could be carried out through the County Cornelitices at present—the County Committees appointed under the Royal Dahlin Seciety. Of corre, it would cost a little more than at present. There would have to be some paid officials arrointed.

7583. It would have to be compolery-the universal registration of huran that Mr. Wrunch was speaking about \$
7584 Mr. Warmen,-Mares and all \$-That would

silvo a great lot of machiners 7585. Cuaisman.—Your snower to Mr. Wrench was intended to apply to stallions only b-Stallions ey. 7186. Anything ske you would like to say to the

Commission !- No : I don't think there is.

Mr. H. Raywogns, Ballinalos, Edinworthstown, examinal. 2587. Crammay.-You live in the county Longford, I think i-Yes, sir. English dealers,

7588. Have you presonal experience of horsebreeding !-- I have, for over 21 years, 7589. Do you knop stallions yourself!-Yo-7500. Are they registered under the Royal Deblin. 2501. How many do you loom b. Five.

7522. These of the five are registered. Do you think the scheme of projected in has done good 5-1 sectionery to continue it if you want to improve the broad of horses. 1993. Do wer think it ought to be carried further -to all horses -All sires, in my epinion, should be

7304. Do you mean that if they did not pass the reterinary supposes examination they should not be allowed to serve buildhood put he allowed to serve It is the only possible way you can relieve the small farmers from those mongrels that attend markets and faire for these months of the year. If you give the farmer any encourapement or assistance he won't poss

\$1 or 15c. Sometimes they make cheaver bermins and some of those recols are caucht in the market through favorerities or other things, and they might blo their ness next day for going to an unwitable size. If these sizes were not in the way you would have suitable horses, and would have soundness on the one side. 1536. Do you find registering your own horses has made them more popular with the farmers !-- Not a

hit more popular. 7596. How many mores do you keep yourself for beceding purposes 1—From five to seven, and sometimes I have eight or nine, according as I breed a

young mure.
7507. What kind of marse are they!-Four 7595. And you breed thoroughbred stock 1—Yes, and bays bred in.

on nave bred to.

7519. What are the others 1—The others are bulfbeed mares, mares that I work on the farm, and if I get a good filly I take a feal of her, and let her stay matil she comes of ages. 7600. What do you expect to get out of them !--

If I not a most one he will make a bunter if not be is brund to resice a coaching home to sell to the

7001. Do you breed from two-year-olds yourself!-Occasionally, if I got a good strong one, that is, one well grown, that develops early. I take a fool off her as two-vear-old und I find it does her no harm. He has the next year's rest, and I have a feel for her 7002. Are there ment learns in your district 1-A great number. 7503. What are they mostly t-The majority are

hunters. A great number are what you call medium or high class coaching horses. They are sold to the moritorn dealers who feed them for six or eight acriticen dealers was seen torms for many region resistered after possing a veterinary survices's examiher are well in Mullinear fairs and all around me, three-year-old colts. Sometimes a farmer keeps so odd one until four-year-old. If he has a sou to ride him or is capable of doing it himself, he will keep him and train him, and sell him for a burner at a fair roice. If a horse can least the county Longford and

has a fair turn of speed he will go with any beenda in 7604. Do they sell them at home or in fairs !-They sall them in both ; but nearly the principal men

who breed maything worth while are so well known that they are attended by the principal dealers. 7005. How is your country encolled with stallions ! -It is fairly well surplied. 7505. Are there any half-bred stalliers 1-Yes, a

good many of them, but they are a mongrel sort, you cannot call them half-breds. I have a half-bred sire myself, and he is a very old hence now and very fresh, he has been as largely patronised as any heres in Ireland and has got a good class of hurter and

arness horse, a good merketable horse 7607. Are there any pure bred cart horse, or Huckney stalliens 1—No; there was one Hackney stallion came to it about two years ago, but he has

fold. Why did he go away t-Want of support; that is why many a man changes his residence, my county would not have a Hackney; they are very

fond of a nice good horse, and our get as much for him as any county men in Ireland.

7609. You never used the Hackney size yourself! No. nor would not. 7610. Or anything except a thoroughbrod 1-Or a half-bred. I went over two years ago to Yorkshire and bought a thoroughbrod coaching home; he was a prize taker in the Yorkshire Stud Book; he has taken very well in may locality and they are men of very showed good judgment there. I went to see a number of the foals-I have three myself-and as far as my judyment goes they are n fair good feel with good points and plenty of lone, and I consider these

good points and parity of tone, and I consider these to put to our small fillies-to put strength into themthat even if they went back again to the thoroughtrue even it they were nork again to the thorough-bred burns it would not be a taint in them or softness. 1611. You think it would be an improvement !-

I consider so. I have tried the experiment, and a great number of farmers about me have approved of 7612. When did you buy this horse -Two years ago, and some of the six mouths old fools sold at £10

\$19 wishin the less month: those farmers who alid not want to keen them, or could not affect to do 7613. And those feals you have by this horse !-- I propose to keep these. Tills. Do you propose to put them to a thoroughbred horse !—I have only one filly, but I will try it.
7315. Your idea would be that the introducton of this strain of blood would improve the mares and

render thou more likely to produce good stock !-- I would not go so far as to say improve them, but it wearful been it and soll a little more born, so that you ean so back again to the thoroughbred. 7616. Are the people in your district inclined to sell their meror and breed from infu ior onest -- As a rule they will sell all their good young mares, three your old and four your old : the last flow yours I found more to try to hered from two year old fillies than all the time I had sires. I first there more inclined to take foals off those young mores this year and had go life and come to maturity, and if a mare pro-

drawn a falsey good faul is will now for her grown and the lotter she is the more valuable she is when she scopes of age. ones or age.

7617. Do you think the young stock in your part
of the country has improved or not l—I do. They have kept up very well, comparatively speaking. As a proof that they are fairly good they are patentived by northern dealers. They don't breed so much in the morth, but they come to our locality and very frequently they would get a fair foundation of tworequestly they would get a mir reducation of two-

the newthern brecker. 7618. Are the prices kept up !- It is for a good horse or the making of a good one.

7619. For the infrator large in the series as good as 7629. Do the small farmers brook small about you -They do; they are very foud of broading, and the very small farmer sells the feal of short are months old and it helps to pay his little demands, and his many works all the same for him. These are the man

that would require a little senistage, but I don't high-class barness horses from them, but you would get a useful borse. You might get some of these three-quarter mares they call them; they will breed neeful horses if they get a good sire

7621. What kind of a sire do you think would be most useful !-- I think a half-bred horse-may a borse with one stein or two from the thoroughless home. If his mother was of a good family—would be the best, of his mother was of a good hamily—would be the best. They want to have them to work a little as a two-year old on the farm, and let them grow to five years before they sell them to English dealers, who wont buy them under four and a half years old, and very few farmers can affect to know them. Them farmers have not hands or don't understand the munarement

of there. If they got a thoroughbred horse he is toof their. It they got a tooloogueres note us to hot and contrary. They have unrow prowers in their farms, and crocked ways, and the thoroughbed to too outcle; the only way they can do is to stay o them, and then they are no use for anything shee, 7622. Lord Astrows.—What are your sirest... Three recistored thoroughbrods and the half-had

home and the coaching home. 7023. Which do you find most patronised!-The half-bred.

7684. You think the half-bred sire is the most useful in your district?—To a farmer be in; they can

artial to keen their produce a little longer, and can work it and use it. 7625. You think it pays a farmer best in your district to breed from a half-bred size !- It is better

for a farmer who has good land to breed from a thoroughhred horse.
7625. You mean a farmer that has land that he oan let a maro and foed run on !- You; but to the small farmer who social work the mare up to the rises

it foals, and after it foals, a thoroughbred is no us. or the medice of it, because it gets crabbed; he is up nee afterwards. 7627. What made you got the Yorkshire coath horse i-I was recommended by some of the principal Rugish dealers. I could not get a half-bred horse, and they said to give this a trial and get a pure-tred horse. I went and got a horse in the Vorinkire staf

horse. I went and got a horse in the corn-book. I spent a fortnight looking for him. I wanted book. I spent a fortnight looking for him. I wanted light action, and good shoulders. He was five year old when I bought him, and I gave a long price for m. 7628. You find the farmers patronise him i-They do ; they admire him very much. Some of them are

more than satisfied with the produce of the foal. They have great boro and nothing clumer : shoulders good for one and a half-year old, and good back and 7620. Mr. Canry ... How are the dame of your half-hand sires band b-There is only one half-heed sire; his dass was by Freeny, by Lord Clarence's

7630. What nort of draft blood is in the dam!-His dam was by Freeny, and grand-dam by Rough Robin, that is as far as I could trace him; he hieself in by Lord Clarence, a horse that stood out at Swords, 7631. You spoke of heading from a two-year-old, what sort was the produce!—Very strong; and forthermore I found the dillies that had had fools there were five fillies, and I found the three that had

had fools just in as sood condition and looking as well to-day as the idle costs. 7832. Mr. La Topens.-What do you do with the young stock yourself that you breed !- I keep them up to four and a half-year, or if I have a good

colt I sell him in the cavacon, or a good-looking horse I keep and train him as a horster. 7633. Which do ros find you get the best price for 1. The produce of the thecoughtred beens, 7634. Do you think the average value of the produce of the threeseebbred been is higher than the produce

of auviling size !-- You get as much for one as might bear you over three or four years as for the other. 7635. Mr. WERNOM.—You keep five stallions, three registered and two not i—Yes.

Which do you charge most for !- The registered bosses 7637. And you think it is an advantage to have then registered 1-1 believe it is a very great advantage. and I believe it has caused a very great improvement since they began to register, 7638. Would you like to register your coach home too 1-If it was possible I would, but no horse would be registered up to this except it was a thoroughbood

7610 Would you approve of verictering other

7092. CHARRMAN,-What do they use these Come. now they have seen the felly of it, and I don't think man posies for !- They make very nice cohe and they are breeding so much this last your or two Mr. Thomas good trappers, good hardy bread, some of them are 7675. Are there any stallions in the country that would suit their mares at all!-No; they are hally of sold for very good prices. 7693. What use are they !- They are up to 14 for a horse to put more size and bone and action into hands, 14,7 some of them, the produce 7694. Do the small farantes breed from them at 7674. What kind of a stallion do you think would all !- No, not very sunch. be most suitable !- I think a good half-hred stallion. 7020. Just use them for their own farm purpose: 7677. In the Royal Dublin Society's Schoole in operation about you i-Oh, yes, -Yes 1016. Can you make any suggestion how these farmers could be induced to keep their hest mares to 7678. What has been the effect of it !- I think it has had a very good effect. has and a very good enter.

7819. You approve of it !—I do, decidedly.

7880. Do you think the furners have a tredeucy
to sell their best pures!—They lacve I think; the breed from instead of solling them !- I would be greatly inclined to give the money that is distributed to the young mares to encourage people to keep their trooper tagle has done a lot of herm buying good three or four-year-olds if possible, and I think if fillion for troopers; they go away, and we never see they were offered a good price they would keep then, and then there would be a chance of their being bought as hunters when four or five-year-old by men 7631. Do you know are they kept at home or hought by frieign Governments !- The three-yearwho won't buy them as three-year-eld-7697. Do you approve of lauxiling from two-year-olds I-I would on good land, but I would not allow olds are bought by foreigners now, as I don't believe this Government will buy less than form-your-olds, and the best three-year-olds are taken away them to be bacd from if they are put to week. I think the small furner that works the atimal and breeds 7633 Does that on on to a great extent !-- Ever good three-year-old filly if it is sound is sold; there is from her, revaluous an inferior animal, and destroys plenty of demand for them the muc itself 7633. Do you think that the produce generally of your part of the country is worse than it used to be, or better !—I think it is holding its own with a 7698. Anything else you would like to suggest to the Commission !- No. my lord, except I heard a good deal of the registration, and I think that is one ened class of mare served by a thoroughbred house. of the principal rocats that should be adhered to. I but I cortainly think the half-bred animals bred from mengrel horses have deteriorated considerably. of the inspector so far as his appearance in concerned, 7484. Mr. La Toucre.—Have you any experience of Hackneys 1—No. I have never seen a Hackney but I certainly would have every horse that a men is getting a price for having a more put to, I would have in my part of the country, either size or produce.
7635. Do many droves of these Communes posies him registered as sound. 7699. You think a man caght not to be allowed to come up to the County Longford !- A great many. keep a stallion as a matter of profit without a certi-cate of soundness !-- I do ; and I think if these men You have seen them !- Yes. 7687, Bought them?-I have. were asked to produce their horses for recisiontion 7688. Noticed my marked improvement in them they would do so if they believed bim sound, and the for the last two or three years i-I bought more for the last two or there years.

COMMISSION ON HORSE BREEDING.

7700. Mr. WRESTER. Do you think these small farmers who beyes such had animals now need animals. 1089. Why !-- I have beed a good many other houses 7010. Have you observed any difference, improve-7701. And the class of anumal that pays them best ment, or the reverse !- They always come up as fools. is something they can work on the form with good and I really have not seen what they have been like; they come up in droves of twenty or thirty, sotion, and can sell efterwards !-- Yes. and the people about pick them up. 7703. I think you said action is essential 1-06, and the people about pick there is any difference in the price i-Well, I have not asked the price this cortainly 7703. Helps to sell them 2-It does, year, I have not seen them sold even. Mr. T. M. Céraw, Ködencan, Kinesud, examined. 704. CHAIRMAN.-You live at Kildangan, Kire's County !- It is just in the County Menth, berdering on the King's County. 7705 Are you pretty well acquainted with both counties !- The district about me I am pretty well sequented with ; I am acquainted with three or four

7713. CRAIRCEAN,-What do you put the other seres to !- The strong mares I put to the thoroughbred horse, and the light mases to my half-heed horse. 1714. And what is the produce generally said as, or do you use them voorself !-- I was them and sell them when they come to five yours old mostly as counties, Kildare, Westmeath, Meath, and King's hunters; I take a foal from them at two years ald, and leave them idle until four-year-old, and then if they 1706. You breed horses yourself!—Yes, I do. 1707. Thoroughbred stock!—Yes, and half-bred. are atout and good and make a frunter I train them; but if I don't think they are suitable for that I try 7708. Have you a stallion of your own !- I have to sell them as a trapper or harness horse a half hard stallion for my own nee 7715. Are there a great many house bred in your part of the country!—Yes; nearly every factor. 7709. And how many thoroughlyod mares !-- I have two thoroughbrod mares. about me produces a feal every year.

7716. What class of maces have they got 1—The 7710. And how many others t-I have seven or eight or ten; I had ten foals this year. small farmers have very coarse mares, about 14 hands or 14.3 high, rather stout, bad action; they 7711. And putting saids the thoroughbred stock, what the you aim at producing !- I put the thoroughbreed from half-bred horses. I don't think we have Bred mares to the thoroughbred horse
'7712. Mr. Carry.—What do you sim at producing a good half-hedf-horse in the district.
7717. Are you pretty well off for stallions in that estable a thorough bred!-I understood that I was asked part of the country!- Fairly well off for thereoghhad I thoroughhred mares, I said I had two breeding: bred horses, but badly off for half-breds. shelythose mares I am broading from by a thorough-bred horse. 7718. Are there any certherse stallions or Hacknevs or anything of that kind in the opentry !- The

sale barsa I know there is a good Clydesdale horse color from me, in the County Westmosth; his get guest great me, in the county were modelf it has get are good marketable horses, and a great moay of the furners shout me go down to him, and they sell very erro. What are they sold for 1—Sold as elbs: the

small farmers about me sell their colts at one and a half year old, and the northern dealers buy them at tory 68 to 410 and some 46; there are some had description of mares about me year woods

TON Solving the opposition of the fermion should what do wen think is the most profitable animal for them to try to breed!--Hunters, if they can afferd it and have a good rater to breed from a thoroughbred horse, but the helf-heed burses I think are the most profitable; they are easily kept, and

pasters early, and may be turned into money. 5721. Do you think the quality of the moves has deteriorated 5-I don't think they are as good as they were twenty or thirty years ago; in those olden times it was all a tilings country youwi me, saul a farmer with 100 acres keep sight or ten horses. and then he had good strong stoot mores, and breel from the same class here so the mure, and I think we had a better stock at that time. Now there is sheeth of one and a half year old; a great many of then not their turn versuald fillies to the stud and let

7722. You opprove of breeding from two year olds? -I do, greatly You think it does no have t-I am not onite sure it does not, if they are well fod ; but you must

work their two war-olds when carryfan o feel or suckling, drawing toof. 1721. Have you any knowledge of the Hackney stallies at all 1-No, none; except that I have seen then out at Mr. Weenship

tion out at Zer. Wrenetts.

1725. Have you seen any of their produce t...No, except at Mr. Wrench's. I may the produce there, and I have seen some of the shows. 1724. You support from now certains no to whether their blood would be suitable to those mares !- I am certain it would be an extraorteen to even these had-

actioned mares.

1707. Van think it would or would not be an advertage as far as getting benters 1-I don't think they have not action they cannot dispose of them except

at a bad price; in some cases they cannot turn them late money. to money.

This. Would it be un advantage as for an resunts in the army !-- I would not may they would. I think they would be rather small for remounts; they want them a good bright. I don't think they want great solites. I think the action of the blood

best would do for the remounts; they carry a men hetter than the Hackney produce. 2739. Do you think anything could be done to induce the farmers to breed from their botter maron?

-About me they are very keen to keep a good, mare, and I think if the half-preis were encourage they have got no encouragement at all, the half-bred

7750. You shink the balf-book stallion is a reseful home !- I am sure of it. 773L And you think they ought to be admitted to registration !- Certainly. I would have every stallon registered for the purpose of knowing whether he is sound or unsound. I think the greatest will we

have is that there are so many unsound horses, half these high-class houses when they come to 5 years old are whistlers and unsound, a large percentage of mine go wrong and I got very little for them; for one

7752. Mr. CAREW.-You have tried a great many Carew. periments in hereding !—I have.

7738. Have you found after making a thoroughbred with a higheless mare that the produce was had t-If the more was light of home you would certainly

7734. You would remedy it by mating with a half-bred L. Ven 7735. Have you say produce that would instance

TY36. I think you had a mare from which you got

strie of weed !-- Yes; she was a stare by Solon, a very and I not her to the herm Stockinger by Stockwell. she produced a calt that was worth nething. ber with smother thoroughbred and the produce was weedy. Then I put her to a carthoree of my own, and she bred 2 colts that at 3 years old I got close on and size fixed 2 constant in a years to Eulyhoggan and £40 for them; I brought them to Eulyhoggan and sold them in their halter; I get £35 for one and £38 for the other. I continued breeding from her, and she bred o mare then by a half-bred home, and I

have brot that mare for a stud mare, and she is a regular gold mine to me; everything she has bred since are the sellers as hunters.

1737. What did you main her with 1—The best oughbred sire I had

7735. Was she by o size of your own 1-No, a country stalling, Ton Turk, in the Co. Meath. 7735. And by crowing her dam with a half-level you got this good result, you got a good mare, which by

nesting with a thoroughbred you got high prices for her produce as huntern!—Yes; they were hig and 7740. You arreseve of broading from half-brads for

market purposes I-I do. 7741. Do you think the nero thougashired blood is won't get the highest price in the market for it 1 you may have a very nice horse there and very well brad.

may have a very most force there not very well zero, ord a man will say be in set up to weight enough. TF42. But ho is in reality!—We, that is my experience. Kow I sold a very well-hered hereo as the show for £136; the hoyers were saying be was not up to more than 13 stone, I thought him a good 14 or 14, stone horse, but he was of quality and good in well-bred stallier of my father's, great grand-done

7743. Mr. La Topgun.—You said that you thought from seeing the Hackney horses at the Commuted Destrict's fitted from that they would be colculated to improve the mores !- I am sure of it; with low class vares what sher would produce would be moricotable. paren wast they welld preduce would be moriceable.

7746. Would you profer them to what you call a
half-teed stallon t...Well, I would prefer him for a
mare that would preduce hunters.

7745. But I mean for the infector class more would on profer them 1.—For the very small mores I would. 7746. You profer the Hackney to the half-hred 1.—

7747. Why 1 ... Because to give them action : these marce are small and their produce never will sell well values they have a hit of action about them, and then

y will sall for teappers. they will sell for templers.

748. You prefer the Hackmey heres and hissortion to
the action of the nice half-bred horsel—Oh, no, I don't my that either; but I say with a mare with little or no action, the class of mares that are about me -a great many of them are small mares, about four-teen hands—they are neither one thing or the other, their produce is very bad, unmarketable; the great action of the Hackney along with their lad action would

give a happy medium in the cross.

7769. The extravegant action of the Hackney !--Exactly, and putting one against the other 9 K 9

7168. CHARRAN.—What could the small farmer soleable. 7754. You have heard that English corriage horse about you afford to pay for the service !- They will dealore have strongly constrained the introduction of getting a good marketable horse.
7769. Would it pay a men to buy and introduce a the Westween blood 2... I have heard it : I am only Titl. Would it pay a men to ony ann intronse a thoroughly good half-bred sire such as you would like to see there i.—I think it would. I think his subscrip-

action one of the first things looked for 1-It is, I like to see an animal of good shape, like begets like. quite agree with you. 7170. I gather from you that you think that so far as 7755. Then with record to the class of horses you the Hackney blood is concerned it would not be an try to breed, you think that when a dealer comes to improvement in the petting of hunters or high class carriage horses !-- I think they are not an seed to were close was want something with aim and substance that looks up to a lot of weight !- Exactly. the saddle, carrying a man; but I am certain the hit

of action would be of great service consuserstally.

7771. You think as regards the smaller former who 7759. Unioss you have an animal that looks up to the weight you won't get a good price !- No has an inferior more you would get more acleable 7700. And have you found it necessary to introduce cert blood in order to get that !- You, and it turned produce !-- Yea ; and some of the larger farmers too get very successful. 1761. You bring in a Clydestale cross and cross 1777). Have you over considered at all whether if soais with a thoroughbed !- The Clydesdale is the the Hackney was once introduced in that way it may not permeate through the country so as to deteriorate the hunters produced there !-- I think the people only thing we have to give us size, I don't know in my

he is not at all as lubberly or snything like the boosts would be keen enough to take care of themselves I saw in the Dublin Show ; he is a compact horse, but 7175. You think it would be possible for men to project the more than 15 and 15 would be easily detected to I con told he is yours bred and has produced very good Sorres from common mayes about -I think it would, I think they would be very care-1762. Do you know whether the Civicadale blood ful : I excuse very well offer an existing on that, but has been in your country for a long time or not 1-14 has been up in my occupy at 10 lode for pearly a I think the majority of furners are well able to take care of themselves. 7774. We have had very different opinious !- I am contery; it wast be sighty or ninety years ago since the Raits came in there sure there is a diversity of coinion. 7775. Have you any sugmentions to make to the

7763. How were the Clydeolale horses brought over eriefually 1...The Reits were Sectabroom who came over and brought a great lot of them, they are there still; they took a lot of fine land and farmed very extensively, and brought over all their cart-horsen and form bosons, and result to immort Chickwish stollions new and assim 7764. And that is really how the Clydesdale blood come into that district !- That is how the Civinglale

will have plenty of quality in the second generation; no judge, no one could tell that there was any of the blood same into that district, and most of the hig mares about me have a drop of it, being descended from 1765. And it is in breeding from that close of mores stance !- It is, that you have got the higgest price for the preduce?

-Yes, when they have a couple of crosses. afterwards !--It is ; we want substance, 7778 Courseau. Von lies in the secrety Res.

keep one thoroughbred more, and my balf-bred mares fluctuate in numbers. I always breed from young

Present impro-chatgood by the University of Southematon Library Disdination Unit

Galway, just on the borders.

7779. Do you breed borses yourselft—I do; I tree from all classes of horses, particularly the thoroughbred, but I have also hied from half-heels and good three-quarter breds:—Lochinyay, a winner red them rather largely.

7780. Do you keep stallion t—No, never have at Ponchestown, heed at Clarescorris by Mr. Coughlan; a horse called Thunder, a kind of Clydes kept a stallion.
7781. What kind of mores have you !-- I expendit dale, he belonged to Mr. Neary, of Creggs ; and I bred some wooderfully staying hunters out of them

marea, three-year-old mares, and let them run round until they are five-year-old, and then break them: stay for ever, with not quite sufficient pace enough a first-class peols of hounds. they are at their prime then for the English market 7783. Have you ever used the Hackney sire t-I never have used the Hackney, but I was trying I have there myself. Printed image disprised by the University of Southmenton Library Distriction Unit

Mr. H. B. Sawpey, Ballinlouds, exercined,

through Mr. Wernch, to get a Hackney down in my neighbourhood under the Congested Districts Board, and they had not the money as the time. 1781. Mr. WERNELL—You were not colliciously congested 1—I could not tell you this, but we wanted home in that country, for we have some desperate

a have in that country, for we have some desperate repeit.

7753. CHARRAN,—What is the general kind of same that the farmers possess 1—The very word swanched, low-shouldered, long-backed mares; they are generally seld to lead dealiers, and go for pit ponies. You could buy a street field of those as fools for \$2.100. All the good mares in the country are in the

Structure district, and they are in the lambed the large farmers.

738. What kind of sires do those small farmers until We had a brate called Stockton that came over from an English dealer, who twopped him for a goddeolting country mare. He was standing as ballytamis.

Yer. What kind of a horse was he b—A thoroughbed weed about 15 hands. He had a very long posigne. I thusk the service fee was taken out in all finds—potatoes and overything like that—from the small furners.

1788. Would you think that a suitable kind of home to make with three mares 1—Certainly nos. I think he was the greatest have in the construct.

1789. What do you think is the most sentable kind offsire—At the present moment, I think the Hockmay for these sental mares would be the heter, provided.

adjustments. This is the general run of maries in the country in the worth inguived in — don't in which read out in the run of the r

mony later on.

7791. You think, if it was feasible, the best thing
well be to introduce new manes into the country
ellegether!—I think on. We have plenty of good
stalkines, every round Bullyhausis and Bullio'negh,
but round the good hunting districts, Secksetown
and Rescourage on her was read borner. I think

one more than Favo or Victorious !-- My failer had it for the last 40 years. got some years ago by a thoroughbeed house—Chitchat was got by Bendiom 1—The Chitchat we had was

a Magnic berns, bred by Mr. Waters of Monastereran, I think; but all the old marm there are three-constant bred, they have all a touch of Will Scorlet, and in a great many cases of Tom Steele, a half-level horse by

the name of Chitches or Sandhopes crops up in the 7807. I understood you to say for the improvemen of the ordinary horse in the country you would parfer a good half-tood to a Findency i-if I could get a

shortlanged good shouldered three-quarter hard borns, I would prefer him to the Hastiney, but it is very hard to get that storen of truleal home; every good sole is nearly engeneed on a veryllow; it is very land purposes, and when he has done maing he may go to the stud, but it is more difficult to get a good half-

1909. Do you know much about the South I-No my connection is meanly all with the west; I go into the congested districts portion; I buy a good deal of eatth in Swinford, and than part of the country. 7809. It is not the fashion in Rescourage to home well-bred colts where i .- No, they are nearly all out as

7810. Mr. Whinen. Is home-breeding a considerable industry with these small furness in Companie 1-Is used to be, but I think it is driver paramake missish have been so bad, they have hundreds ou hands ; there are lundereds of florers as present in Commanght that you cannot absolutely sell. In the note Jamesey you will see hundreds of them that are alsolutely worthless; they cannot be called; they used to be bought for light you week in Lendon. Lot the Argenthia lores in conting against them. 7811. Is it no very hard to realize how but mores

can be until you see those in the bands of these small fanners 1-20 person could believe it until you saw then ontil you resulted on down and look at them it does not down on you hear but a more can be. 7812. There are vary few left of the better class? -Any good more or any of the road more type is

either picked up the foreigner or kiggs farmer. 7813. Is the find very bad in these districts !-- No ; I would not say the land is bad in Roscommon. 7814. Take the Swinford district!—It is very bad

down there and round Killselly; it is all monutain or lake 7815. Requires consthing very hardy to live there? -It wants to be conclining very hardy; they are not

able to ford them in it Tolls. Do you think from what you know of the mares in the hands of the small formers in Correspond tiess there is much dancer of their produce finding its way into the hands of men who now brood high closs hunters i ... I should not think there is the elightest hunters I -- I should not imme there is the slightest dancer, there are altogether a different breed; you might as well any you would limit on a mule as to hent on one of them. I don't think those is the slightest danger of their mixing ; no man will ever try stigntone canger or man imaging; no man win ever try to breed a hunter from the mesemble weeds down in

that country. 7817. Are not the more intelligent people of Rosoccumen very much more enlightened now on the subject of brooding horses since this discussion totaken place i—I thruk they are.

TEIS. And they would be very careful what they

bred from .-- Very well able to take care of then actives. Any man who goes to breed a hunter generally knows what he is about. If he does not be soon leaves 7819. If you wished to buy such a kalf-heat single him t-No; I would find it very difficult; that is why I have great hopen out of a Government stod. If they laft +he colts untouched until two years old you could nick the best of them and let them run round as

country sizes. I don't think a good stamp of half-bred have exists in the West of Ireland, except in a 78:0. Changan.—You don't mem he does not exist anywhere !- Well, I don't know. I only speak

from my own experience. I should not any then 7621. You stoke just now about the Government breeding establishments in Hungary. Do you know

anything about them yourself i-Except to read 7832. You said "where all over hest reason born res to the Negrety all the good march I have sold I

7813. More lately than formerly !-- I think there is just as good a demand now for the foreign conject as over there was

7834. You think it is the case throughout the country, or in that next of the country that you know. that many of the best mares have been benght for abroad !- I think all the best mores, except in cases where a year goods aftered to keep one of the old stance or a strain he thought a lot of the boost has for boost. ing purposes, but everything one was sold that could he turnoù iaco cash. I think the Land egitation. too, had a good deal to do with it, because when rents did not come in more had to realize their barren 7650. You think no man would undertake to bered a burnter from the rejectable speeds to the part of the country !-- I don't think there is the abritist four

If he does he will mover try it again 7816. Dat if these miserable weeks were improved by the introduction of Hackney blood, would they not be liftedy to get about the country !-- Even if they did would it not be a great these to suppore it !

7827. That is another question. Assume, for the salared objectionable in a part of the country where they breed learners and harness horses, do you think there is no danger if these mares were improved by find their way into districts producing buston !-dup't think they would

rate. Why should they not !- They are altogether of a different type. Any man who come to brend a unter would nover take a Hashney as a standard.

7829. No; but I am talking of the produce!...I rould surmise that the produce would have the true of the Hackney

7650. And that the produce would show that true so strongly that no man would breed from them !-certainly think they would. Of course if I could ret a three-currier bred horse to my liking I would prefer him to the Hackney.

prefer him to the Backney.
7831. Anything further you would like to say to
the Commission 1.—Nothing; only I think the great
those would be to try and improve the mare. They

talk of subsidising owners to keep their mares. Then would want to put them in some way to get a mare to start with. They cannot start from nothing. The things they have now are used to for any purpose.

Mr. RICHARD FLYSS, Table, examined. very bad marcs, but there are some very good ones, and Mr. Webrel

erro Cerrousy -- Von also live in the County Recommend 1—Yes, my lord.

7813. In the same part of the county as the last

7813. In the same part of the county as the last

of Rescommen, the richest part of Rescommen. 7834. Have you expension yourself in hone beeding 1-Oh, yes, I am very find of that; my

boother load a large number of mares. TRUE. Have you found it profitable b-If bord 1835. Histo you seems to promote the property, certainly.
1805. What class of horses do you brood yourself?
Scendings from a thoroughburd to un Irish draught.

held-head described so become it has a stain, but a half-bred between a thoroughbred and the Irish segue seare. 7557. Have you bred from any other kind of sires!

None except the throughlood and half-bond The highest furm on record a horse called Shaurove carried me over in the Dublin Show, and he was not

Yes, they do. 7839. The small fermers !- The twesty-acre farmers.
This. What kind of animals in they wenders b-Hrater foels as a rule, and foels that go to London

as carriago horses; they sell their feals nearly siways to that class of people. 7841. At what age do they sell them !-- As wean-

tings. 7449. Where do they go to 1---Kept in the country to make hunters of them. 7843. What class of mores do the small furners keep to breed from !-As a rule these eless legged drught mayer. There is an old Ivah drangist mare down at Tulsk.—I know she was bought for £12 for I bought her squeff at one time.—I think she has beed thousands of rounds worth of hanter stock, and her

feel sold as a weaming this year for \$10, and the is an old mars, I desceny twenty-four or twenty-five. 7844. To what bind of sless do they send their drught mares ! - To a thoroughbred or a good half-bred. The best sire required and sure to get the most soliable stock is a sire got by a thoroughbred have out of a hunter mars or Irish draught more; was have rebutance and quality, action and orderence, they are very saleabla too.

7345. Are there alenty of suitable stallions in your country !- There are, I think, good stallions enough, and pleaty of good filling too if they were legt there. 1346. Are they sold away !- They are nivers sold

7847. Where t.-Telem away as troopers to France or Gormany.

1848. Do you consider your part of the country naturally suited for breeding horses 1.—The best in the world; real limestone; they have all big legs, planty of manufe; they seem to grow with very little one; the land is wonderful hand to make home. 7849. Can you suggest any way in which these filles could be kept in the country t—I den't know any way except to give sobstantial prices. They don't get very much now. Where they used to get 540 they only get £30 or £33 now for good ones. I think it would be very easy to keep them with sub-stantial prises, and growlet them good half-bred sires, it is not the thoroughbred with a stain in it. I heard Mayboy described as a half-bred—that is not the sort I mean, but one get out of a hunter mace or Irish I mean, but one get out of a number hour or arms desaught. They are up to plenty of good weight, lots of bons, fine long shoulder, good needs and feet. 730. Do you think the preduce of borses has improved in the country or not!—We have a lot of

I would say that they are a hit better now than they were some years ago. There are some very fine brood mores, but some awfully had ones too. 7851. You think the produce is better!—Ob, yes, as a whole. About seven years ago they were in a

very bail state indeed. 7852. How do you account for that improvement!

Several oted sires came into the country, and some people sout their fillies to the stud 7853. Mr. La Toucus.-When you say the old Irish ourt mare, do you mean any particular breed !— The Irish draught was a breed in itself, I think; they were a nort of slow hunters with clean hard loan;

could step well. 7854. And there was a rogular breed of the sires 7504. And there was a regular second at the and same 1-Oh, yes; they could jump well and sallop fairly fast and were never tiend; they were a

7853. Would you appeare of the scheme of the breed fillies !-- I think if the prizes were given to the topic to keep the fillies there would be no peed for lla ta shuts tenancesco

7854. Have you our experience of Harkney harnes? No, sir, except to see these. I was judge in Derry and I saw a very beautiful borse, a Hackney.—Mr. Archiales—and there was n very fine hunder size there called Erin's Fraud. I know the qualities of the hunter size, and I felt a good deal distensed I could use give two prises, I filed the Hackery so much. But there are so many steries about them-

coplo who use and breed them like three, people who have not bred them abuse them 7857. Do you think the introduction of the Hoslenev stallion in the western districts is likely to have any effect on hunter breeding !-- I cannot may, because the legs of the Hackney pleased me 7818. Do was think the introduction of any parti-

oular breed of soft blood into the western parts of Ireland is likely to affect the hunter breeding in your part of Rescoumen !-- Certainly ; if you beved any would be sure to get into the security. But I don't so why speak who wish to hered Hashneys should not be allowed to breed there. In the North of Residual, Bellist and Derry, they like these well. 7539, Suppose, jost for the site of argument, that they were detrimental to hearing blood, would you still permit them to be herught in 1—Cartalaty inci; I they were detrimental I would not allow them to

7:00. Mr. Waserest.—Xou used to jamp your here in Kilkare Street when the Stow was held there i.—Yes, sir, and in Ball's Bridge too. 7:851. You began in Kildare Street.—I began in Kildare Street.

7802. When you had to jump 881-6ft 14in. I 7563. And you heed him yourself 1-My father bred 2004. Mr. Canerr -- What weight were you then I

7045 Mr. Www.mr. -- Von have had a great many good jumping horses in different abows !-- Yes. 7516. And most of your horses have been bred by

a half-loved size i.... Cartainly, and the very best in the 7357. Would you be in favour of registering these half-bred sires !- Yes, and encourage them in avery way possible, for that is just what is wanted. I sa a long discussion some years ago on this point, and I a long discousion some years ago on ten yours, and a was making or my mind to go into the battle field, but family affection left me idle—I had my proofs ready. Those people who talked about fast runs did not know how in the warld the lours they rode was Zec 3, 1996 Ka Richani

True.

heed; the very best I ever saw in the hunting field were by these half-bred sires; they are hardy and clever and never put a foot astray. 781d. So when people talk about there being nothing like the thoroughbred sire and the good horses only being got by the thoroughbred sires, they are talk-ing rubited b.—Most fallacious. There was a man down in our country at Ballimasloe fair that used to coin pedigrees and sell horses as thoroughbeeds. Hismomory failed him one day, and he saked his groom to tell failed him one day, and he saked ms groom to this gentleman what the borne was putby. "Got by Major Cir out of Jennatte," said the groom. The English gentleman thanked him and gave him a half-

"Major Grr" was not the sire at all, he sovereign. was a wicked mule. 7869. Are there many Clydesdule beeses in your rountry !- There was one in Elphin; I don't think

he would suit there 7870. You would not have any eart blood at all ? ... I would not have him at all; he is a big soft home made of bean and buttermilk. 7871. You don't think be is wanted for the farmers ? ... No : he would destroy them more than the Hackney

would a great deal. 7872. Are there many horses said for troopers in Rescommon !- Hundreds of them. 7873. Are they bought by the dealers 1-By Mauly er Daly.

7874. Do you think it would be an improvement if they could be bought direct from the farmers by Government !- Certainly ; if they got good premiums to keep them on, had a foal out of them first, then

yen would soon find with a good crossing of the half-bred horse that you would have a substantial borse with andarence, and not these hig soft-legged Clydesdales, greasy-heeled, if you test.
7875. Mr. La Toucazz usked you if Hackneys were bred from soft blood they would do harm to bunters-

if there was a breed of borses of proved solt bland that would do harm to hunters you would be against having them in the country and you said "yes"t ... I said I should be against anything that would produce bad steck. 7876. If, on the other hand, there were Harkneys that were bred from good hard blood with pleate of thoroughbred blood in them, would you be against then then !-- Certainly not 7877. CHARMAN,-I think you told us that you don't really know saything at all shoot Hackney

blood 1-80, I have said, except to see them in the show ring. 7878. You have seen one Hackne that you thought a good horse!-That is all, but I have heard them opposed by people who knew nothing about

7879. Is there anything more you would like to me to the Commission !- No : except to keep on civing cremiums to the young mares and fillies and get some salf-bred sires, and I think it would be very easy to bring the horses back to a standard better than ever they were. Rescommon I suppose can produce better horses than any place in the world; if the English people only knew Resessmon and started stud farms there they would have superior home to "Red Heart" over and over again

7880. Mr. Wazzeg.-You exhibit very often in the Dablin Shows !-Always, 7881. You know at present you can only show maren in fool or with fool at foot to a registered thoroughbred stallion !-- I do.
7852. Would van appeare of mares being allowed

to be shown in foal or with feel at feet to a half-bred stallion 1-Oh, surely; I would encourage the half-beed in every way. The Commission adjourned to next morning.

Mr. J. P

FIFTEENTH DAY-FRIDAY, DECEMBER 478, 1896

Present:—The Earl of Dunhaven, K.P., in the Chair; Lord Ashtown, Mr. J. L. Carew, M.P., Mr. Perot La Touche, Mr. F. S. Weence.

Mr. HUGH NEVILLE, Secretary,

Mr. J. F. Bouroup, Dyomlargan, Kilcock, Co. Meath, examined

7833. CHARMAN.—Mr. Boofired, you live in the south Meath, do you not 1.—Yes, sir.
1834. And you have been personally compled in tending boress 1.—Yes.

7527. Have you any definite opinion as to thereis tive importance of the sire or the dam - some witnesses attached more importance to endeavouring to some sound stallions throughout the country when seemed to attach more importance to endeavouring to improve the breed of mares-what do you think about that I—I would attach much more importance to the stalling for the simple reason that he will produce u go est many more feals, but I do not suppose that the produce will take more after the stallion than after the more provided they are both equally provide boat My opinion from breeding different kinds of average my openion from breesing efficient kinds of animals is that whichever animal is the purest bree and has the longest peligree will be the most impression whether male or female. I never could find that the male was more impressive than the female unless be was purely hred and she was not. And the more in and in brod an animal is the more impressive he is either for good or evil. 7928. Could you suggest any way in which the

TEES. Goald you suggest any way in which the farmers could be included to keep their bost marss for hreeding from instead of selling them 1—I don's know of any practical way.

The Mr. Le. Yourse, — Would you approve a bit below, Mr. Bonderic, that all statifies aloual he interest, and that those that were unascent should be just under lawry pushible where he you a permitted to suppress the hered of sorress in Teshand as to dicompany the livered of sorress in Teshand as to dicompany the livered of sorress in Teshand as to dicompany the livered of sorress in Teshand as to dicompany the livered of sorress in Teshand as to discovere the livered of sorress in Teshand as to of executing at that is hy having a task upon all testing without pushing a task. — TSDM. I suppose you would remain the state to be \$100.00 to the pushing and the pushing and the state of the \$100.00 to the pushing a task.

remutate in ascen where the studies would be asset and matable-1 date say that would be a very considered by a very considered by a very considered by a very considered by a very small one. I don't think it would be a very small one. I don't think it would be a very small one. I don't think it would be a very small one is the very considered by a very large the very large three studies to sun that different cales of outstands on our that different cales of outstands and the very large very large places in the very large places in the factors, who do not easy what they have fewer the factors, who do not easy what they have fewer would study in another home you would see the very large places in a very large places.

the heat.

7981. You think the marce stand in need of improvement 1—I am pure they do.

7193. How would you suggest that they should be improved 1—Well, the only presided way that I know it to excourage breeding from young march, became I think if a man flads a young marc breeding well he will probably stick to breeding from he.

7503. How do you shink that that encouragement abould be afferded—in what manner —I think by giving more prizes for young brood marce.

7934. Do you think that 65 and 610 prizes would be sufficient to encourage the former and induce him to from the march. I think it would. But the worth

be sufficient to encourage the former and undree sum to keep the mare I—I think it would. But the west of it is that the small formers who keep the west class of mares really do not axhibit. It costs then too much, and shows are too far away.

713. Do you hink, in your experience, that the coeffuncy light-weight driving been is very mobile of ceptesting in value 1—1 containly think be in for the 7 least five yeast.

7706. And possibly, with the introduction of notice of cares to anist the keylest, there will be a still fartise of cares to anist the keylest, there will be a still fartise of the cares to make the keylest. The compared to the care to th

beeding of light-weight small harness horses is Hiraly as he ever a profitable enterprise !-- I would not like to go so for as to say that, but at present I think it 7938. Have you any experience of Hackneys !--Xn I know nothing of these, except what I invoscen

1939 Have you say experience of the companie districts 1—Yes; I know the districts, but generated in the control of the control of the charm. Of course I sew their poster when going shough the districts, and I saked them bow they got as, and asked them if they were bred from the

Sovernment borses or what. 1940. Have you seen any of the produce coming down in droves to the county Meath !-No; not to ny knowledge 7941. You have no personal experience of the pro-

gicts !- I have seen the feels on the mountains 1942. The foalst—Yes, both in Leitrim and Galway, 1945. Have you seen two-year-olds and three-yearolds !- I have seen two year-olds, I nover sew a three-

7944. Do you think that they benefit the strain of heren there !-- I naw a drove of them very near the Twilve Pina-the first lot I naw, and I was able to pick out all the fools provated they sold me the truth afterwards, and were not flattering my judgment, I was able to pick out the foale got by the Congusted Datricor stree, and I picked them out as the bost

with the best action, and they said I was right in every metacoo. However, they might say that to 7345. Were these fools or two-year-olds !- There versume two year-olds and some foals.
7946. Mr. Wanner.—You know the whole of Ireland 1-Pretty needly.

7947. And the North particularly well !-- I know the North very well. 7948. Do you think that the different parts of the country require different treatment 1-On, certainly. 7949. You would not suggest the same horse for Mesth as for the North of Treland !- Decidedly not. 7950. Do you think that the different breeds of here, the different stamps of horse can be raised in

Irriand generally without interfering with each other? -I certainly think so : I do not see why they should 7951. Do you think there is any danger of the big breeders in Mouth breeding from ponies that come up from Connerman and the Tweive Pine-breeding bunters !- No, I think not, breeding bunters.

7505. What class of farmers house the best harses is Month i.—The large graciers.

7500. Not the small facmers!—Not the small fermen.

1954. No better judges of horses, I suppose, in the world than the Meath graziers !- I fampy they are as good as any going.

7900. And no better mares 1—No better mares. I

here not seen them better; I have som them very good in other counties too. 7956. And no better land t-I would not say that Beath is the best land for raising becaus in Ireland What would you say is the best land in Ireland t. Where there is more limestone. I think I was in a better district the day before yesterday,

down in Rescommon ; I think it grows every animal Neger.
7938. Mr. La Torenn.—Rescenmon does !— Wherever there is limestone, grows sheep and bullooke larger. I rear a great deal of young stock myself,

and though they are very good and in very good con-tition, I think that in land not so good for lattening purpose they would grow quicker; of course, if you see a lorse with oats you make up for all that, and so the best house are fed with oats in Mesth.

1950. Mr. WRESCH.-I think you said you would be in favour of licensing all stallions !- Yes ; I don't think any stallious ought to be let to mares without a 1960. You have seen it suggested that every horse should be registered, mares and all !- I have read it; cannot see the object of registering the marea. 1961. Do you think it would be a practicable scheme

to carry out 1-If you register the marcs you would find very great difficulty indeed, in preventing a man slipping in another more instead of the registered one. 7262. Do you think there are many large granices and breeders in Meath who could tell you the breed of their mares now !-- I am sure they could; most of them know the pedigrees of their mares.

1963. How they are bred !-- I am sure that those he bread really good ones could sell you

7964. By the records 1-By the records. 7965. Would you be in favour of establishing a Hunters' Improvement Society in Ireland 5-I don't know the details, but I dage say it would do a great

deel of good. 7955. You don't know the work of the Hunters' suprovenent Society in England t—I do not. 1961. But if such a society were started, you think the material would be in the hands of the big breeders in Mosth for giving the pedigrees of their mores !-- I think so, for a good many crosses. 7968, CHARRIAN,-You know the whole of Ireland

retty well !-- Yes, I know it all.

7959. And I think yos attributed the falling off in the demand for the lighter description of harness horse a good deal to the diffusion of the hiereles I say that is the principal reason-what you call the

lanck horse 7970. Do you think there is any danger that the introduction of the motor cars will interfere with the trade in the heavier kind of horse; the tram horse and the dray horse !- I suppose it would. Well, I

don't know about the dray horse, but I should think it would interfere with the cross-bred draught horse that would be fit for a trum our, but after all that is nothing like such a large class of horse as the lucks.
7971. Speaking generally of Ireland what class of herse do you think the country is best seited to prosees on you man, an econory to see sees or by co-doos—I could not reoften it to any one class. I think there is a great part of Ireland that is not at all fit to predoce hunters; in fact, I would go so far as to any, the greater part of it. There are some exaction in Conneght, and a great number of counties Munater, and a great part of Leinster, where undenhedly they our produce hunters as good as any-where size in the world, I suppose; but a great part of Ireland is not fit to precious hunters at all, I think. 1972. And do you think that anything could make it fit-say mixture of the blood for instance !-- I do

not. I caused see the use of encouraging some small farmers to breed horses at all. I think it is an unkindness to them. 7978. I would like to know your opinion on this point as to whether it is or is not the case, that where

the production of hunters or high class excrisge homes is concerned, Ireland has not got a regutation for superiority over any other country-is the Irish hunter thought more of than the hunter produced anywhere she i-I should think there is no doubt about I know how they speak of them in Eegland, and I know when I have been in England I have been offered a mount as a luxury on a horse from my own rountry as the greatest indocement; and I have hea,d then say that they could not get a borse, except an Irish horse, that they cared for in the best Shires in England, in Leicestershire and that part of the country; and I have heard numbers say they would

not ride anything but an Irish horse if they could get 7974. Do you think we have the same natural advantages in the production of any other kind of 2 L 2

4. J. F.

herre-do you think we rould breed a heavy drought hoese, or a cast horse, or as creamy agricultural the hunters, and all that, would decidedly do it for all other horses 1975. How do you think that we have established

this superiority in the production of hunters!—As far on the highly-hard horses are concerned, I think a great deal of it comes from this—that is England the great coal or it contex from the—that is Reightful that theroughlind horse is nut to work when he as two years old. Hitherto in Ireland the habit has been to let that here restore until he is four or five, and I think that is one resson why the Irish horse, as a role, bests the English horse in steeplechases I think the same class of Irish borne that goes and wins the Grand National in England would have been running for more when he was two years old, and would

have been broken down when the Iresh become begins to win I am sure it brings on unsoundness to work them before they are fully developed. 1976. What I want to get from you if you have got any opinion on it is, assuming that you are quite right that the grice of what I may call the inferior horse has greatly declined, and as far as I can judge is likely to keep down, taking Iroland all ever, what kind of horse is the most profitable for the country to

newlynes !-- Where they can produce a high-plass investor unquestionably it is the most proftable, because the prices are so very much larger 7977 And some parts of the country are adapted to producing them, and some parts of the country are not !- That is my opinion.

7977a. I think you said you had no experience yourhave got any opinion as to what the effect of the introduction of Hasiney blood would become theoreduction

f hunters !-- Provided at had not mixed with the hunters t tunites?
I'll'in. Yes, certainly?—Well, I think from what
I have seen of the Hackney at shows—I think they
are a very site style of horse, but I think they would be an anguitable eross to serve meres for the purpose of bracking hunters from these mores, and for two reasons. The principal reason is that what you want to add is size, and the Hockney, although he is a very stout horse, is not exhaulsced to add som to the And the only other reason that I say that he would be unsuitable for broading bustors from ... I may be very wreng in it—had looking at their action at circum, although it in huntiful road action. I think it is not field action, it is too high. But it is only from looking at them going around the ring that I have come to form that opinion. I may be entirely wrong, 7978. Assuming for the sake of argument that you are right, and that the Hackgor strain would be neaindicted to the production of hunters. As you think if any large apartity of Hackney blood was introduced into the North or West of Ireland, that it would do any harm b-I den't think it would do any harm to

the marca spitable to board from 7979. You think they would be able to detect the Hack ney !- I think they would, the wast majority of them. If there was anything in the mare to unit her them. If there was anytaing in the mace to unit net for breeding hunters I think they would detect it at case. I would be disappointed in them if they didn't. 1980. You do not think that the Hackney blood 1980. You do not tunne that use manning moon would be likely to gradually spread all over the country—I don't think it would. I don't see why the breeds should mix at all. There is one suggestion I would like to make... I think you sometimes talk shoot the breeding of ponies and the improvement of them-I think if any means could be taken to stop the im-portation of Iceland ponds into Ireland it would be a good thing for the breeding of Irish penies. od thing for one precoung of true penson.

7981. Do a number of them come !-- An immense.

the best class of hunters, because I think the usen who

number of them come in. I never my one of them yet that was not the very worst possible description of animal, and I know that up in the North, in Autrim, it has gone so far that some man have go Autim, it has gone so me that some men have got these Redand points, and have run them up on the hills and sold them as Cushendall penns, which has given the Cushendall posits a very bad mane, and I have heard that they have begun to boned them. 7982. Where have they landed these Iceland posies!

—In Dublin very much, and in Bellius.

7953. What ago are they t—I think they some over two-year-olds and three-year-olds. 7984. What do they sell for t-Semething very small. I think they are brought over for ballest-or

they get them for nothing.

7965. What becomes of them 1-Mr. Gavin Low has large sales in Dublin of them very frequently, getting a great bargain. They are generally sick of them before they have them a month, and they cannot get rid of them. That is my experience. 7901. Do they spread about the country !- They

spread very man 7167. You think it is a had thing !—I think it is very had for Irish ponies. Title. Why don't the people protect tlamselves from them !- I think the reason is that they can buy

From them was come to come to come to the will turn so chang. You get a big strong looking your for some very small price; you think he will turn into a good one; when you food him.

7609. What is the matter with them, why do you

chiest to them 1—I don't think they have a single good point about them. They have no setion, no aboulders, no strength whatever. Vivo. Do they brood from them in this country !fear they do now. I did not know it until lately They have been investing them in Cashendall, and agreeding them. They are the very worst description of animal I seer now.

7591. How would you propose to stop their im-ortation by legislation !—I would leave that to the egislators, and I thenly it would be a very good these if it could be done. 7902. Lord Assrows.-That would only affect the

ony breeding !- That is all. pony argoning — That is all.

Thul. Would you check pony brending, provided it suited the ordinary farmer — Well, I thought there was a good deal of effort being made to improve the Connectars ponces, and that is the reason I mentioned in at all. I have no experience of pany brooking

7994 Mr. La Topcore-Is it your experience then that Iceland scores have percented different man :-- I think they do. I thin would easil the meets of Iroland 7195. Then the cross between the Hackney bore and the congested districts more possibly night to something larger than a puny-supposing it is pre-

bread the heat class of hunters would be able to judge judical to the hunter breed, you don't think that had juneans so tee hunter breed, you court think that produce is likely to permeate the eastern province?——It may as a hack, of source.

Tip6. You said that the farmer who had hunters would recognize in the mare that was not by one of these Hackney stallions something that would induce him to halieve that she would not breed a good bunier; is it within your experience that you can tell from so is wearing your experiences that you can bell real the outward appearance of a masse what she is likely to produce 1—Two reasons I said. The first is the size; three would he no difficulty above seeing that, and the other is the action; and I think he should be

able to indep of that too 7997. Don't you think that a mare 15 hands high is hig enough to breed anything i-I would like to breed from a larger one 7996. But it is within possibility that a mare 15

bands high would breed a borne 16 hands hight-7999. Do you think that the ordinary facurer good be a sufficiently good judge to condemn a mare

0000. Then it is outto nowible that many of those colonals that were heed by a Hackmey horse out at

Consensus from congested district mares might find their way into a hunter breeding district !- They might, of course. Sold. And he bred from !- Yes; but I think the corders would be sold as a harpers borse, not as a

2013. Mr. WEENCH .- Do wen think that the man who understands broading hunters would select a more of that class, 15 hazzle high, as a brood more?

-Not unless the was a very good one. Lots of small mares breed well. 303 Do not all the hunter breeders in Meath aim

at producing a weight enzying bunter !-- Of course they aim at to. 8304-5. Therefore they would not be likely to

select a small animal as a broad mare !-- I don't think they would huy a small mare for breeding. 8006. They do not generally breed from small mares in Meath now !- Not very many of them. 8007. You think the conditions of the country are

salcolated to improve every kind of horse i-Yes : it seems to said them very well. 8558. And that we can grow better horses in Ireland than in England !- I think we do. 8009. What has been the chief reason, no to the

resert, that we have acquired a name for huntershas not more temble been taken to encourage hunters than any other breed in Ireland t-Well, I suppose that is only within the last twenty years. 800. Have not all the shows—now, for instance, take the different shows throughout the country-as

a rule are not all the shows composed of hunter classes !- The wast hulk of the show is. 2011. There have been very few harness classes in any of the shows up to the present !—I think so.

8012. And if equal trouble were taken to improve

the harness boese do you think Ireland could also grow harpess borses !- I see no reason why it should not: I think the awards have as much to do with filling classes at above as anything.

5013. And they are easily sold 5.—Very easily sold.

8014. But that up to the present there has been no special encouragement for breeding harness borners

-Not wrosh. 8015. It has been suggested to us that foreign horse should be branded coming into Ireland, would you appeare of that-following your Leeland ponies

there are also American horses occupy into Irelandwould you approve of branding American horses!-I have seen some American horses and they were all very bad; they were so bad and so ill-formed that I do not understand why anyone wanted a brand to distinguish them,

8016. You think they would be known !-- I think they would be known 8017. We have also had it stated that some American horses were shown as Irish hunters and were not detected !-- I think it is quite provible ; they might be better American horses than I have seen.

8918. Would you be in favour of branding American horses !-- I don't see what harm it would be. I would be very glad if it would deter horses coming into the country and spoiling the price of

8019. You said in answer to Mr. La Topche that you had asked the people in Connensus how they were getting on with their horse-breeding !-- I have saked them in different places.

8020. What opinion do they give generally t—Some of them spoke very highly of them, and said they had improved the ponies very much indeed; others told me that it was Government homes they had bred from once or twice, but that they had some back to 8021. What were the others !-- Nondsecripts

8922. Larger or smaller !- I think they were posites very much, and when I pressed them as to why they did, and was it that the others were better horses, it didn't appear to be so : but that they went to some fellow who had a horse, and that they didn't like to leave him-that they preferred giving their money to their neighbour than to the Government as far as I could make out-

8023. That was the ground idea !- That was what I gathered 8014. CHAIRMAN.-I am not sure you have not

said something you didn't quite mean. You said, in answer to a question of Mr. Wrench, that Ireland could produce better bosses than were produced any-Mr. WRENCH.-He did not say exactly that.

Pitters.—I am very much obliged to you if it wants correction. very clearly, and I may not have answered them. (Shorthand writer reads Q. 8007-8008)

8015. OHARDEAN,-You say that you think we breed better horses in Ireland than in England; that would include the draught horses and everything else? ... I think we grow them better. I think there is no difference between the blood of a good Irish hunter or merplechauer. It is all the same as the English

8006. I want to know whether you think that wa reduce better carriage bornes, better draw horses. preduce better carrage numers, better ears botter in Ireland than in England !- No; I would not my it about the heavy day house, but I think we can produce them just as good.

8027. I wanted to make sure you did not say any-thing you did not mean !- I don't think we breed better draught horses than they do in England. We do it on a very small soals.

Mr. J. O'Consula Munray examined.

8058. Onarayay -- Von are also a resident in the county Meath 1-Yes.

8029. Do you live at all in the same neighbourhood as Mr. Bornford !-- Yes ; about five miles from him, wiwsen Trim and Summerhilli. 8030. Have you heard his evidence !-- I have.

8031. Do you agree pretty generally with that t— With some parts of it; not with all. 9032. Do you breed horses yourself t—Yes; I breed

a good many horses. I have at repared 18 broad marcs. I have been breeding horses for 25 years on my we appound and all my life I have been looking after them for my father before that.

8033. Do you keep a stollion t-I never kupt a 8034. Do you breed hunters or carriage horses, or

what sort !- Hunton ; atemieshase hower. 8085. Mr. Canuw.-From thoroughbreds t-You 8036. CHAIRMAN. - Altogether thoroughbrein!-

Oh, no ; I bred some balf-breds.

8037. What class of size do you use! - The test thorough beed I can get.

strin. And out of what kind of mares do you breed? I have generally mares with four m. five mosess of

there ognithed. I have only two mates that have only 8030. Do you find that the thoroughband home and the more with three or four crosses of thoroughhred blood produces a good hunter !-- I think that is the heat around one man broadless can newlood. It is

the blob type of heater : the significant horse: the Lefocatecation hunter 8040. You think that class of horse pays the best to produce!—I think for the best, that and the thereaghbred. 8041. You consider the stallings in your neighbour-

hood of the quality and the kind that emit the neighbourhood is some of there are very rood. 8042. Are you sufficiently well supplied with sent-

able stallions f.—Yes; I think we are.

8013. Do the small farmers been much f.—They breed a mod many; but I think every inducement curebt to be held out to the farmers to hold and hand from their good young sound mares. I would give as substantial uries as I sould as local short. I would increase these if possible, and give the formers good substantial voices for their fillies from two to saven years old. I approve of breeding from two-year olds; I have bred from them myself, with the very bust results, but, at the same time, I would give the facuers princefor marcoup to any age. But I would have special prizes for feels at feet, from three to seven years old. There ought to be good sound stallings, with good feet and legs-pool cannon bones soughly balanced with no one had point, and with a good colour and then ought to have these horses in districts to be travelled over by the horses which ought not to commence to areve till the 1st of May ; and I think the average the horse would get by this travelling would be very brusficial to him. Let him mate to 40 to 45 mares, and give him to the farmers at as low a fee as could bet at the most. Farreers wont send a distance, even though they get a horse at a low fee. Colour is most important for the country farmers, because, no matter how good the celt, he cen't sell if he is a bad colour. I think that people, when comparing thoroughteed stallings with others, abould take into account the quality, looks, and the bone. It is a well known fact that if we take the cannon bone of a thoroughbred herm's lee and weigh it, with the home of a Chedendala

the thoroughbred bone will natweigh it, and it is a well

known fact that if we hury the bone of a thorough beed

them up in ten years, the bone of the chydrocals, or of one of those other horses, will be porcus like a spenge, and the thoroughless hone will be solid as when it was buried. As Colonel Fitneygram desorthed prejudice against the Harkney, but I there is in your wrong to by out Government money on a breed of horses that we don't know are going to improve the breed of Irish horses, and I am estite certain that the blood from the congested districts will removed through the whole country, as the blood of the Center. mays none and the Keary ponies permeated through it in the past, and I say percented through it with great advantage. If we could got back something on the tree of these routes into these districts it is the years heat thing could be done. I have known now of the lest animals I ever say in my life by Connemous ponies. I have seen some of the best animals I over position. I have seen some or the text annuals I cour-naw the produce of Communara ponies, and their pro-duce were the very best animals. I lived for each tupe were the very best animals. I fived for eight Connectant pony with a feel by her side grazing on the road. I fitted it, and bought it, and learned the foal was by Fairyland. I sold him to Captain Steeds for 10 gainess; he sold him to Colonel McCalmont I don't know for what sum, and he was sold at Tatter-

house and the home of one of these other horses and rate.

them up in ten years, the bone of the Clydesdala, or

it to Lescard Moscock and it was one of the best animals that ever wa with the hounds. In 1895, I exhibited two-year old colts in the Dublis Show, and days in each of these coass was a Consessare pony. 8044. Then you have a legb opinion of the Comemare posted — Wonderful ; I never new as good saimals as they were, especially the Comments postes that were cream coloured, with black mones and talls ; they were the best of them that I have seen, 8045. Do you know Compensors yourself!-I don't; but I have seen these coming up for years in droves.

sall'a for 210 spiness. I sold another out of the same

mare to James Masgher, of Williamstown, and he sold

They are not immoving, they are dismovering, 8046. Have you seen those lately !-- Yes. #047. Can you doingt anything of a difference !--I dan't think they are the same stemp at all. 8048. In what way! How are they deteriorating? -They are negrower and taller, and I don't think they are nearly as well shaped, nor have they as good

2019. You have had no experience of Hackness yourself - Nothing, except what I now in the Debin action and shoulders, I would say they are not at all enitable to improve the bread of hunters. I think all Inchmen sucht to ter and forward on the breed of hunters, because it is the breed of Ireland. We combt to yest our shoulders to the wheel and forward that as

8000. You think we have obtained a certain repre-8051. And you think that comes from some natural cause !- I am sure it did in the past come from some natural cause. I don't think the general run of farmers' meces are at all as good as they were

8002. Can you suggest any way of improving matters t-The only way I see is by giving the prime I would keen un the cross of the thoroughbeel horses

8653. That is to say, a thoroughbred horse such as you describe !- Yes, a good thoroughbred bome with good shoulders.

8054. A horse to serve at a low fee !-Yes. 8055. I gather from you that you look with some excelenation to the Hackney blood-you don't know wint effect it may preduce !- I don't know myself but from what I have norn and hoard and send I Abob is would very much deteriorate our hunters. benting; it is quite extravegent, and a waste of stilly. You think the Hackney blood may conductly

fürrthrough the whole country!-I haven't these allest code of it but that it will filter as the Consensor blood filtered before, and as I say that blood filtered though the country with advantage

8057. Have you any experience of Clydesdale blood!
---None, I may say; I never bred one. I had a few 8008. Then may I take it, I gather from you that

what you think should be done to improve the breed overeally is to oudrayour to induce the farmers to keep their best mayes at home to breed from, and that thry should obtain the service at a fee they can affeed of a really sound thorough) ced home !- Yes.

of a really sected thereogniced home b— Yes.

8859 Would you have any objection to a sound
and selected helf-bred home b— I would yield to no man in my appreciation of the thoroughbred, but I think a horse with three or four crosses on his dam's side by a throughfurd house would be a year agod size—in some cases as good as the others and perhaps more marks. Summ of these houses should be in the Stud Book. "Mayboy" and "Pairyland" should be in it too, for they were nearly all thoroughkand. sar a borse with three or four crosses on the dam's

asy a none with a good family—I would be most pasticular side with a good family—I would be most pasticular about the family—and herd from a thoroughbrod weald make a first class tire. I think that every man ought to sim at breeding a high class hunter, and failing that a good horners hove. 5060. Do you think it is possible for the small farmers to broad that class of board 1. I think it is.

think a man with twenty acres and one mare or per-luse two could. I think there should be a print siens at the end of Auril or May for the heat done pending by the factors, for I am a firm believer that the best part of a house is what goes into his mouth. 8011. How do the small farmers generally treat their foels !- Very hadly.

8042. They don't find them !- No. 8043. Here you say opinion about registration! Do you think all stallions should be registered or licesed !-- I think they ought to be all registered. 8064. You think the Bayal Dublin Sonety's school has been of vac in your part of the country !-- Yes, I think it has, I think the colts at the false in the

comiry, as far as I can see, are not at all as good as they used to be, but I think the shows took a great deal of them away. I think the places where fairs are hald in some places are most disgraceful , it is almost as much as a man's life is worth to go into some of see. They are not sustable at all 8965. I suppose you don't know enough about these

Communa position to give us any opinion as to how the breed could be restored to what it fremerly was it -I think a Welsh pony stallien would be a good thing

-I think a Wells pay see through the country to the country the country

ing. 8067. Do you know something about these Iceland Posizis 1-1 Go, a little.

5008. What do you think of them 1-I thank they
save the most wretherd animals you could irregize of
the equine race. But I could not understand Mr. Boxford's evidence that they could permente the country and that the Harirney blood could not permeats the country.

8069, Lord Assrows.-Talking about breeding bunters, do you think it is possible to breed the barb ranger, so you came to is possible to driven see angu-cians brighter in every district of Iroland t—I think it is not possible, but I think you could do as much good for the farmers in these districts by introducing a breed the blood of which, when it permeated through the country, would not deteriorate the hunting blood but would add to it

but would add to it.

8070. That is not the question I am tenching on i
I am speaking of breeding lumbers. You cannot
breed hunters in a great vary pasts of Irakani t-I
think you could breed a hunter of a certain close
desidely. The Commensus poay was a good henter,
I saw men on them stating down the field.

8071. Do you believe that sa a rule in the more districts it pays the farmer to try and breed a branter, counting mistin and everything b-I think if he does

not second in breeding a hunter or trying to breed something that will afterwards produce a hunter be 8072. You think they ought to try and produce riding horses !-- Of course now more than ever,

when you have the motor our and the bisycle com-peting with the other classes of horses. Now is the time to try and keyed hunters. 8073. In the good districts, I agree with you !--Yes, and had districts. Tell me any animals that one he head on Connection and the amounted districts

that will do better than the animals they have. 8074. What about medium districts like the North of Ireland !- In medium districts I may you can breed a very good bratter.

8075. You could to take into calculation the mis-

fits 1—I say a misft limiter would be very much better than a misft Hackney to my mind. Pat the two to a plough and how do you suppose they will manage; the hunter will pull the head off the Hack-I don't believe any borns with the action of the Hackney man if he got it by chance could stay : it is 8076, Mr. Ganzw.-Of course what we want to

also at it to set a home that will elegate and do some of the farming work, and what you mean is that the Connemes ponies will be deteriorated by the introduction of Harkeney blood !- In my opinion they 1000. 2017. The droves coming up now are very inferior b

8078. And the best thing could be done would be Conversory district and to the rest of Ireland I - Yes.

8078. You spoke of breeding from half-bred mares with sufficient dashes of thoroughbred blood to go the best weight energing hunter!—Yes, mare 1—The old Irish type.

8081, Mr. LaTorezz. —You think the stallings are

up to the requirements of the country !- I think ther are : but I don't think the farmers can get them of

are; but I over a to a low fee county.

a low fee countyle.

anto. Would you approve of the Mes of the establichment of Government study for the purpose of dissensinating maros amongst the farmers or for

going to establish.

8033. I am taking it fee granted that you would
nivests thoroughbred sires I—Yes; I would.

8034. Your personal experience of Communes penies

was that they proved to be a good brood mars when crossed with a thoroughlyed bosse!—Yes; decidedly. 8085. You startbute that, I am told, to there being no admixture of any English bleed in the pony 1—I believe there were Arabs at some time or Spanish horses let out in Commenter. I often heard that these cresm coloured posies from Compensara were the denoendante of two Spanish stallium—Spanish burbs. 8986. You would beside now to breed from a Oceanment peny!—I would not hesitate a bit with one of the old sirt. 8907. But with the new sert. Would you breed from a three-year old peny that came from Coronment now, if you were built it was get by a Government now, if you were built it was get by a Government now, if you were built it was get by a Governform of the corontensing it might be get from a Government stelling. 2008. Do you think this well depressible the who-

of animals soming from the companied districts to the contern districts b—I think it will make then unsaleshie in our country, 8009. Do you find the farmers are buying them now on feedy as they used to —I don't think they are

hying then at all.

800. You would hesitate to lary one of them for breeding purposes 1—Decidedly.

8091. Mr. Warcom.—You have got eighteen brood mares 1—I have, at present.

800. How many of these are thoroughlyed 1—

About eight, I think,

8093. All except two have four or 5ve crosses of
theroughbred blood I—Yes, and those two are the

"Faryland," out of a very good mass—I think shy
had a tot of Communes blood in her.

6004. Let hat the other constraint was have bad

60%. In that the only experience you have had yourself of thereling from Contacture an Bloch—New Mart is all. I talk you about those two forces I bought that I had in the Dublis Blowe had your. I would be also had been been been been been proved by the I was a pool only I I was a pool only I I was a pool only from a Generous an poory—No 1 the Orienzara poory—No 1 think II I was a few and the I was a pool only from a Generous an poory—No 1 think the pool was a few and the I was a few and I was

ensetly, though near it often.

8097. Never in the congested districts 1—No.

8098. You can't say the mares have deteriorated
wery much in recent years 1—No 1 last I say that the

produce coming up here has described and up that the produce coming up here has described very much. 8699. Do you like a Cipizadale cross—I don't like him at all. 8100. Do you know they have been uning stallion, half Cipidedies, down there before the Commend Dis-

hilf-typescases, 50-m such protection that have affected the produce b—Indeed is may.

BIO1. You have not bought any Consumers possess lately b—I have not.

SIO2. I think you said every men ought to aim at

hreeding a high cleas hunter i—Yes, I due't mean the usual farmers exactly, but I think every sean engit to eits at treeding a hunter of some ser, and I think every mean who has a fair smoons of head and can afferd is will find that the house that will key fire best is the Leucestershire hunter or a steeplechaschers ;

and if yer don't success in that you will breed the next best thing to it. 8103. Do you know the North well?—I don't. 8104. Have you come seroes my North of Ireland people I.—I think I have.

people and A see they fairly intelligent b—I think the
2005. Are they fairly intelligent b—I think the
2005. On the people are intelligent.
2005. If the people are intelligent to better to
2005. If the people are the segment I would certainly yield; I would not as once olange my criming the people are the

broof 1—Yes, I would,

8106. And you say all North of Ireland mus eight
to bread a hauter 1—I say they ought to try and breed
hunters, and if you miss him he will do for a harness
home or a plough bores, or artifug else.

home or a plough bees, or anything else.

3108 A Do you consider high action a good point in a hunter - No.

3109. Do you consider that action often sells a larness here; I think it does into I think there.

may be good action and extunvegant action. I think them is a lot lost while the lorse is carrying his forlowed by the control of the control of the control action. But he code to pay good action that will be him would you not be obliged to have rather extraorgent action to one side 1—I would not my ac-8111. You have not tried breeding barrons brown; —I nerve want to breed a here that I don't best for

18.11. You have sever rold your huster using, as houses beyone I—I never bad a hunter using you. 811.1 Then you never rold a harrass bows I—I, never said a horse tast I had driven myself in horse. 811.6 What sort do you occubier used reliable for Commenzar I—I say if you could get sensibility for style of the Galloway coh or puzy, he was a most anducible andman, affects huster high.

sackies-the animal, atteen reasons segs.

\$115. World you be surprised to hear that they
had this class of stalline standing there for the parthree years — L would not be emprised.

\$116. Then why are you so adverse to heying
Comerous position — Fearing there may be Harirey
hlood in them; it would deter me from doing anything with those.

8117. You would give substantial prime for enouraging breeders to keep their good fillins 1—Yes. 8118. What would you call a substantial prime 1— 1 would not £10 and £5. I would give more if I could. 8119. Do you think that would be sufficient to

make men keep their good fillest—II you could gree more I would oppose of it. I don't know excell what you would be prepared to give. I would gree them the most I could—that would be my idea. Si 10. Then I think you aid you would exceening stalliers without a single bad point I—I said with to

wary had point. I would not have a stallon with done very had point. 8.121. With one specially had point 1—Yea. 8.122. In it hard in find good threeoghived stalling

5 at present — I don't think it is. B123. Where would you go to hay then 1—Then, are several statilities in England, if these was a deceased for them. I had two horses operated on asyself this of year, and there were not two fines bursts statilities in the world; but there was no me for them. One of them would be "Machine" out of a donebter of them.

in 8130. Mr. Warron,—Do you enmouse the Cryster dale black has filtered through the construy.—I shisk is Mr. Bousford was the only roan who was filtering it through. I don't think to hea. I know very little shout earl stalliens.

8116. Do money exist through the country h—Not declared coronary. There was an old type of sim in Meath—as oil, I field nor of hornes—and I aw some

at 3128. Vot think that all those small farmers in the West ought to aim at hreeding hunters of sense in the West ought to aim at hreeding hunters of sense in the West ought to make the whole country into the hunter trads 1—I would.

ti that the hunter feads 1—1 would.

\$130. Do you know, as a matter of face, that do
track in hunters is only a small part of the track in
horses generally 1—Yes; hui I say in trying to lived
a the hunter you will head a good type of hunter
horse—the best wort of hunters shows. The best sort of hunters is core. I have 15 or
a 5131. Even if he is a small horse of about 15 or
15.1 handle—I think howshid he a very reinbla home.

Mr John

4119. In mile of bicycles!-That is my arouncut. I say I would brood nothing but the hunter on es of the bievoles and the motor ours \$123. Would you solvise these small men with saza, would you sorne mess small men with these small mures, who could not produce an saimal of about 15 hands, to breed honters !—Yes. at 14. Do you find it cosy to sell 15 hands hauters?

gias. Are you must be easy so wen to minima himbers?

Very easy.

8105. Would you buy any at present of that size ?

If I thought he was a wonderful animal I would hay him, but I hay and brood the very best I can. I lave not seen the smirnsl, but I bought one bred in the consented districts this very work, but it is by

"Watchmeine." 8135. Do you often buy without sooing !-- I have bought a great many horses without seeing them, because I depend on the pedigree.

The CHARRAN.-As to these Connemas posies, Mr. Murphy, you told us you did not know the district yourself, and that all you judge by is that is your opinion they have deteriorated !-- Yes : the stock I new coming up I judge by.

8138. You told us what you think would be the

but way of immoving them. I gather from you that best way of improving them. I gainer them you man Asa't think that the Hackney blood is likely to be of general benefit throughout the country, and I think I objected to principally, as regards the Heckunys, was that the Government should supply these Hackunys Var: that there should be monty spent on a breed that we didn't know was going to improve the breed.

6150. The results being uncertain in your opinion, ment to expend public meney in that particular way? -Yes 8140. I gather from you also-correct me if I am wrong-that you think, taking it all round, that the most advantageous thing for Ireland, generally, is to turn its attention, as much as possible, to breeding hanters!—Yes; I think the Irish hunter now is a specialty, and I think in most cases it is one of the

increase as far as I can see. 8141. You think the best way of improving the besed would be to supply-I suppose you mean that tio Government should supply—suitable sound toroughbred stallions at a low for to walk the

control - Van filds. And that all stallious should be recistored. which of course necessitates an examination for their soundness; and that salutantial prices should be

exactly my own ideas.

offered to induce farmers to keep and creed their best sites — res.

8143. Is there enything you would like to say to
the Grenzissies 1—I think that what I said about a
prize in the end of April or May, for the best done Scale, is very important. I think the farmers carby to be encouraged to do their foals wall.

8144. Mr. Wanner.—You think the best way to seet the agricultural descession in Ireland is to turn

the fareness into hunter breeders !- I don't now that 8145. Mr. Carew.—What you mean is the most paying thing is to produce the hunter, and if they fail

paying thing is to produce one number, and messay issi in the production of the hunter, they will have the next lost thing!—Yes: I am a very large farmer revielf, and I don't believe I would be in Iroland as all now but for breeding bunters 8146. You bred a rest many kunters voucself tes; and succeed as well as most men

8147. And got very good prices ?- I cot \$1,000 for 8148. Mr. WERRICH,-Do you know a man who breeds as many good hunters as yourself 1-Steeple-these horses, I do not.

8149. Mr. La Teuring.—Yeu admit the necessity for harness horses had do, of course. 8150, And you acknowledge that there is energious sale of largess horses out of Ireland i-

8151. And the best way to brood these harmons become is to broad for hunters t-Yes; and some of

S152. The CHARMAN.—Are Home presents about you!—Very few.
S153. Mr. Warson.—They are all too good!—I is chaffing me or not, but if he comes down, I will show him the lorest I am breeding, the way they are bend the way they are fed and if he discrease with gre. I will consider his views with pleasure 8154. CHARRIAN.-Any other remarks you would only things I see to help the farmer in his ever in-creasing difficulties, which I think are bound to like to make !-Nothing, except if it came within the line of this Commission, I think the present way of handlegroung horses and short distance races, very reach against the thoroughbred horse; and I think that this should be looked to, because there is where we have to se for our stallions. I think these

waser we have to go for our stations. I think there
should be a few good leng welter weight-for-age races
established through the country. I think it would be
a great means of keeping up either marcs or stallings,
scapething on the lines of the Paris Streyleclasse.

Mr. Jone Ponner, Athlor, coamined.

why Ireland has became famous for hunters, or is it mere shapes t... I think the olimate has a good deal to 8155. The CRAIRMAN,-You are also a resident of county Menth !-- Yes. may to it, and the fine big fields the horses are silowed to rosm over. In England they are kept in small 8156. And you have had a long experience of horsebreeding 1-Yea. paddocks and little yards; they don't see the natural 8167. Hare you beard the evidence of the guatienters wis preceded you !-! have ; and I theroughly agree with every word Mr. Murphy has said. They are country like ours do. with every word Mr. Murphy has said. 8160. Do you agree with him as to breeding from

swa-year-alds Lad think it is a very rood thing if the \$158. You agree with Mr. Murphy as to the desirability of breeden turning their attention as much mare is a cond stort one, not a wordy poor two-year-old. 8161. In your opinion is the price for hunters and high-class escrings houses keeping up 1—I think hunters are, but I don't think the harness colts are as possible tobeseding hunters1-Yes, wholly and sciely. 8159. Do you think there is any natural reason

selling near as dear as two-year-olds. Colts that are taken down to the North of Irriand are £30 less than

four years ago, \$182. Have you may experience of breeding from Connemans positive?—Xes; they are useful good animals, no better. I am talking of ten years ago, \$165. Have you som any lately?—I idd. I now twenty on thirty of there vesters in Athhay fair. 8164. What do you think of them!-A noor looking

lot. I thought. sot, I throught.

S165. Do you know how they were beed !—I don't

—I didn't ask what they were got by.

8165. Mr. La Tourny,-You have been in Galway roncelf i-Yes 8167, And did you notice that the mares there have very much deteriorated in late years !- I may

some beautiful mares in part of Connemara, but I think they belong to one man who kept a special breed for generations.

past Massocross; they were beautiful mores; I never saw lovelier mares; about twenty were in the drove,

and foals with them. They were the perfect type of a small thoroughbred mass. 8169. Mr. La Toucits.—Have you any personal experience of Hackneys yourself!—Very little, I have

seen them in their own country, in England. 8170. Do you think the introduction of any strain of blood into Connemara and the western districts is likely to affect bunter-producing districts !-- It keeps coping up through the country here and there, Fifty or sixty of these ponies are sold into Meath avery

ery year. S171. And some of them ure beed from !--- Host of them are laved from, I think. 8172. Do you agree with Mr. Murphy that the best way to breed barness horses is to try to reced hunters !

-1 think so; that is, they will go a long distance on a lourney for you and won't shot you 8173. Do you agree as to the registration of stallious? —A very ended thing.

8174. Would you advocate the establishment of
Government study for the purpose of sending moves to
farmers, and of patting valuable thoroughleed sizes in reach of poor farmers at nominal feas!-That will do away with private enterprise altegether, and then if the Government yet into any little difficulty to moreover or next day, and the shop is shut up, the farmers

will have nothing to fall bank upon. I, and people like me, who keep stallions, if this is to be cotablished, will want to be bought out and get compensation for It outs both ways. I sould not compete against the Government. \$175. You disappears of Government study !-- I my it does away with private enterprise S178. Do you think the action of the Convented

Districts Board has denn away with private enterprise in the West !—No ; I think there is very little private enterprise in the West. S177. Were there not borses heed there before the Government stallings went down t-Many, indeed,

8178. Then how were they heed 1-With their own country stallions, and they get from time to time etrange blood sent into it.

8179. Didn't they belong to private individuals t...

Some of the landlords down there may have bed useful bornes. The very man I talked about just now must have produced very useful stallions and mayor. 8160. Bet is not private enterprise, even by a landleed, weethy of protection !- I don't know about the

private enterprise of a landlerd only to pay my runt. S101. It appears to me you object to interference
with private enterprise in Menth, but you don't see
any reason to object to 2s in Galway—The people
there are poor. I have seen the greatest ingrovement
in their cuttle since hells were sent then. I think
the control of the co that did them more good than horse breading. The that did them more good toon norm becoming. The cattle are worth £2 a piece more than they were before. S1S2. Have the young horses improved likewise t.

In that country t 8183. Yes 1... I don't think they are as good as they The Connemura pony is not the tetre peer that I recember. S184. While the cattle have improved in value!--

Very much 8185. You don't think the bornes have done the same !—I don't think so,

8186. Have you arted as a judge in any Shows le. these districts in the poorer parts of Iroland !- Yes: down at Hollymount.

8167. You didn't see any of these penies there !--They have a class for popies there always 8188. Do you think that any part of Ireland that you are sequainted with, that is capable of breedings horse at all, is capable of breeding a hunter!

Wall. I don't think that in Connectors was result breed a brutter, but you would breed a thing that aright produce a hunter 8189. Do you think it would be to the advantage of the Connectors losse breeder to endowner to

increase the size of his animal 5-I don't know very much about poules, but I think any peny over 18 hands is not my valouble as one that is 16. 8190. For pale, I suppose !- That is the only thing you would get a good price for them for 8191. Would you approve of stallions being next

down of a larger size with the idea of improving the size and stature of these ponies !- I think they are more model their own size, and ecaier sold.

8102. Mr. Whymon.—What stallien would you think the heat to send into Connectors 1... You are asking me a thing I don't very well know, because I have not studied pany breeding. I suppose the of type of short-legged useful thing, with good neak and

shoulders-a ministers thoroughbrod bores 8193. Do you think on a rule that hunter missismake paying prices as horness horses !-- I think then

60, and teac tray are very second.

8194. I am not talking about their use, but whether they pay well 1—No mists pays.

8195. What do harness heres buyers generally lock for in a barness horse !-- Celour and setion, and a cortain si

S106. These are the most important enalificational -Yes

8197. Did you ever see any of the country stallisus 8198. Recently !- Last summer.

8199. Where I Three or four of there I saw at Oughterard, at a fair, that were brought in to be shown there 3210. Did you act as a judge of the jumping at

Hollymount !- I really forget ; I know it was very good there ; it was two years ago I think. H201. Not last year had wasn't there last year. could not so 8203. The CHAIRVAN .-- I didn't ask you a great many questions because you agreed generally with Mr Murphy, and there was no occasion to go over the

same ground twice ; but if you have got any suggestions to make, or anything to say to the Commission, I should like to bear it!—I think the suggestion of Me. Marroly, of giving prices for the best dope yearling often said the same. 8203. Mr. Cannw .- And for the establishment of long welter races 1-I would not like to compete with

Mr. Murphy in his long distance races. 8304. The CHAIRMAN.-Do you keep a thoroughbred 8294. The CHAIRNA 8200. Mr. CARRW. - You are the owner of "Ascetis"!

Mr. Chuzka Wahla

seed Mr. Wastern-How many stallions have 1316. Mr. Vascur.—Did you ever drive a Hackney!
1 del. Wher are very pleasant for a short distance. but are not able to stand a long one. sens What is the difficulty do you think !-They

are goody overs, and, of course, wear themselves out more than one that slips slong.

8209. Mr. Waxsees,—You think a horse that slips along neve the best 1-I think on Solls the best !-- Yes.

Mr. CHARLES WEER, Costlemanner, Slice, examined,

8210. CWAISMAN,-You live in the county of Sigo 1-Yes Still. You set as land agent i-Yes : I am land agent to Sir Henry Gore-Booth.

Do you know the county pretty well generally 1-Yes; the morth part better than the south, but I know the routh too. EHS. Are there many house bred in the part, you knew best !- No, not many; it is not a very horse beseding country; it has not many advantages; there

on your few sizes, and I don't think there is a good one in it. see in N.

5214. Is the southern portion of the county hetter?

-Yes. The late Mr. Alexander had some good sires. and there was another size, more towards Tubberour

"Rattleonah" he was called—that got a wonderful t of good horses.

2115. What kind of mares do the farmers keep short you !-- Small weeds muren: the wonder is how

they could pay them to breed from. 8116. And what kind of stallings is there!-About us there is one thoroughbred home, and there was a Hackney-a Congested Districts Board horse there last year; that is the only one about Sligo.

There are two or three others, sold to be thoroughlooks; one is, but they are unascend; this yest of the overthe is over badle off for sires 8217. What class of sire do you think is most suftable!—Thoroughlored. 5218. Have you seen any of the produce by the Hackner !-- I did not hear of him getting say.-- I

Handing 1-1 and not hear or ham gotting say—I don't think he was liked; I besed the farmers may they don't like him; and Major Ecolor that had him told me be doln't like him vision; he was not appreci-8219. Ven think that with a switchle thoroughbord ies, assuming that he stood cheep enough, that the

formers about you about bound a subsable your t-1 think they could, more saleship than at present. I think it would be a good thing if the Government would great money to landlords to enable them to huy a good sire to give to their tenants at a norrinal price : that would be going agricust Mr. Purdon's private enterprise; but I think that landlede should encourage their tenants by having the best sires of everything, cuttle and sheep. Slipps I want down there Sir Henry has allowed me to provide bulls and runs every year for the tenents, and I think if the same thins was done about cettiny enod sires, it would have a

\$250. Are there one halt-herd stallings in the oventry t-There is one that I know of at Sign. 8231. What kind of a horse is het. He dishes great deal; he is a fine looking horse got by "Wait," dam by "Lord Gorgh." I have a few feels of his, and

one is specially good the other not quite so good beking; they are both one of good mores. 8932. Is he very popular!—I don't know: his action is spinet birn; he dishes a great deal, but a fine dashing goer; be has great occurage, and it is a

pity his notion is not better; he should get a good

\$225. Do you know what fee he stands at 1-65 8224. Do you know what are the fees of the teoroughbreds of the district i-£2 to £3. A great many whatever they can get, the chesper the better: many winterer they can get, the energer the better; and that is the reason I my the landlerds should try to get good sires; if they got money from the Government they could afford to do it without making more out of it. Under the Reyal Dublin Society's

Scheme the stallien between m in for beening stallings. it pays them well, which is their object.

8525. What do you think the eval! former could afford to pay 1-The less the better-half a severnize

8128. Is the money the great object-avegoring he can got a sound house for a myseries, would be en to the unsound one for half a sovereign in preference !-Yos. I think you should leave the discretion with the landlord or wheever had the horse, to refuse to give the service to a mare unit for breeding; the farmer would then see the advantage of luving a poor

8127. At what age do they sell their horses in vour district !-- As young ones \$225. Where do they go to !-- There is a few at Ballyshaman release they sell a good many, and a fair at Ballomets, and at Carrigmoral, in February,

and some go to Ennishillen.

8129. What becomes of them!—They are drafted away; they sell them young; there is not many of

them can affect to keep them; some keep them until they are two or three years old, and get a little work 8210. Have you ony idea how the mores can be improved lamilty giving some substantial prises, and he affective some industruent to the farmers to keen them, by giving chear service, or at a small rate for

good reare. 8231. Is the Royal Dublin Society's Solome in meration in your district!—It is, but it is almost a operation in year electrics 1—4.5 M, Not it is almost a dead letter; there is cally one horse there belongs to the Royal Dubbin Secisty, and I don't think he is excel for. I think there is only one good borse in then neighbors/bood, and that is at Manorhamilton, in that neighbourhood, and term is no ammor-a house called " Red Anchor"; I have been breeding from him recently; he is not very high—15.2, with action fitted for anything, active and a fellow that racel well; he is spientedly beed by "Mask," dam "Cathen Galas," by "Stirling."

5212. During your experience of the country, do was ablak the breed of horses has improved or not !--

8253. Do you attribute that to any known cause !-To the drafting away of the muce Sint Lord Astrown.—You think it would not

new a landlood without Government societanes to keep pay a landlord without Government assumance to keep a sunt - I don't think he should look for predit. 8235. Could be keep it without lesing money !--I don't think landlords should be saked to do every-

a good rager.

Dec 4, 1896. thing : they are asked to do a great deal at research : Mr. Charles Webb to get a good sire means laying out a very large own 8236. You think if a landlord has got a good sire he should be helped !-- Yes. 8237. This horse "Red Anchor." how far is be from you !-- Seventeen miles.
8238. Is be one of the registered houses !-- No, and I don't know why he is not. He ought to be; the owner, I believe, is applying to have him registere

owar, I don't think he understood about it until I 8235. Mr. Whence,—Was not a thoroughbred standing at Major Ecolor's !—You ; I don't think he is 8240. He was standing the same an the Hackney ! Mari

8241. You don't know how many survices this croughbred get i-I don't think either get many 8342. They are not a very home-breeding much then 1.—Not very. I think they would, though, if more indecements were held out to them. They have to go too far; they have no industries to bread tow.

8:43. Mr. Cantw.—If indusements were hald on would they haved 5-I certainly think as 8244. The Hackney chiln's hold out these indusments !- I heard them may they didn't like him. \$345. The CHATREAN,-Is there my suggestion you would like to make !- I agree with what Mr. Marcha has said; I think his ideas are very good; I think ho speaks like a hook.

8246. You agree generally with what he saidt-

8247. CHARRYAN .- You live in the County Wieklow's Mr. R. D I live in West Wickley. 8248. Have you any experience yourself in horse reading 1—I have hose heading horse myself for the last twenty years.

8249. What class of houses!—I have been siming

to breed hunters, and have been fairly suscessful. 8210. What do you do with homes that are not quito good enough for hunters, or are they all good enough for hunters !-- I manage to turn them all into 8851. Do you consider that the most profitable horse to breed in your part of the country!-Cortainly

the hunder is the most profitable kind to bread. 8852. How many brood mares do you keep !--At present four throughbroit sail three half-bred mares. 8253. Have you any stallines !—I have two. 8254. What are they !—One is a thoroughbed and the other a Chyderdain; the Chydoxiale I got only last war.

8555. A pure-bred Clydesdale 1—Yes, a pure-brod. 8156. You only have the Clydesdale lately 1—Yes. 8156. You only have the Clydesdale lately 1—Yea. 8157. What mores do you put to him 1—I did not put may makes of my own except one east mare.

8258, Do you propose to try any experiments with him with a thoroughbred or half-bred maryl--Cornelly

5259. Why did you get him !-- We want from house, and there are very few Clydesdales about. I got him more as a profitable horse. The farmers want to brood Clydenislos. He matures earlier, and they got rid of him earlier than the thoroughbred.

8500. What kind of mares are there shout the country generally !-- About 15'I is the average fairly well-bred; some descended from the old Irish breed, and some of them descended from a very good home

in that locality forty years ugo, called "Midge"; and more of them described from "Irish Red Catches" and once and standages of his 8951. Is the quality of the mures about the district improving, or the reverse!—They certainly are not improving, or one reverse i large certainty are not improving, insenuch as good ones have to be said. and those mares that have to be sold are, of course, all by thoroughbred horses. I would call those the good

8262. How is your part of the ecuntry of for sires !-- Not as well off as I would like to see it. I mean to say that thoroughhred horses about have not sufficient home in them to my idea.

8163. Are there any half-bred sims 1-There are

My. B. D. Lawrenson, Coolivano, Wickley, examined. 8944. Do you approve of them !-- I much order the theroughbrod; at the same time the half-lend home deconded from the mare with three pare crosses and that looked like a hunter, I would my would be the next best thing to a theroughlyed home. 8205. Are there any other stalltons of any other broods !- There are one or two Clydrefales about, and in Carlow there are some share bresss. I live on

the honler of Carlow. 8395. Have you any experience of the cross of the thoroughbord with the Civicadele or Shire house; -I have, one or two cases, but I don't like the cross.
6107. You don't like them 5-No; they generally have him books. Assals not stack on reconstr. You

cannot catch them properly in your hand, and they are deferent to starring. 8168. What do you prefer !- The thereughbed berse and the horse fastly approaching the thereognbred horse.

8183. And the half-bood mare t... Yes : I have seen some good honizes level from Connemies ponies. 8270. Have you ever done so yourself !- No, but Beighbours of mine have. SITI. That has been excessful!-You very sur-

5273. Are they dring so now !-- There is a neighhear of raine building out of a years from a Connecres.

pomy at present. 8373. Do you know at all-oan you offer say opinion as to whether the Comments pray has deteriorated I—Yes, deteriorated a good deal. 8274. Since when L., Within the last cight or ten

8275 Do you know Connenara yourself—have you ever been there!—No, I have never been there. 8276. And you have no opinion as to the cause of the deterioration of the region . The droves that come to the country are plainer looking; they are more off the pony, and more Clydesdale blood in them, I should say. 8377. Mr. Canny.-Have you any experience of Hackneys L. None ercord that I have seen them at 8278. So far as you have seen them at the Shows

you would not care for them !- No : I don't like their action at all. I had a drive in a true with one and I digh't like him. 8979. He belonged to a neighbourt—Yes. 8180. What didn't you like in him t—He west very well for a few miles, and then died away and

warned about every way, 8281. Mr. La Toucata.-There is traffic in ponies between the Western districts and Wicklew L. Yes: they come in large drown to the fairs shout-Shillebuch, Timebely, and Carlow. branes buy them and keep them to work, and they

8283. And anything that affects the bleed of the Connemara pony is calculated then to affect the breed

in the county of Wicklow !--Certainly.

#284. Mr. Whencer.--You think beveding from thoroughbood horses is the most successful way of home location I... I would not it in the most moreoful way to beyod the hunter. \$985. And was think bunders are, the best borner to old at breeding !-Yes, I do : the high class hunter.

8386. And that is what you try yourself!-Yes. 8387. These neighbours of yours, can they sell their oduce from Connemara pontes as high as you com produce from Communitate points as righ as you can sell your produce not from Commonara poster!—I would not go so far as that. I have known—a Con-

mercers pony being the grand dam—the produce to go to £150, and he up to 15 stone. 8035. Have you known more than one instence of

that 1-Yes, two or these. that 1—xee, two or three.

8289. Did you sell a short time ago some borson that you beed 1—I did.

8290 Did you find they sold at paying prices 1—

No. I did not : I sold the worst I had.

8201. You sold about twenty, did you not !-I did. 8292. Did you sell a black four year old by "Anabasis," grand dam by "Old Midge" 1-Yes

8293. You got 16 guinges for that many 5-Yes, she

was a play 8234. Did you also sell a hay golding, these years, by "Xenephon," gened darn by "Old Midge," for 10 gainess I.—That was a pony also ; these two were very Assistable of the re-likes

esall—mush undersizes.

8280. Was a bay mure by "Sylvia," don by
"Eevenge," a peny t—It was not, but "Sylvia." was an
unserned heree, and the neare was ansound.

8310. That went for 14s guiness 1—Yes. 8317. A bay yelding by "Pollons," dam by "Cham-pion, went for 10s guiness 1—Yes; I have 40 houses at

the present time 5216. At that time didn't you sell your entire Heck!—No.

8210. How many did you sell 1-About 10 8300. And you didn't find those pay !- No, that is why I got rid of them.

8001. As a matter of fact in breeding you must have a great many relefits 1...Of groups, you essent

breed there all to order. 8302. How many broad moves had you at that

time 1—Four or five, I should say.

8303. Did you find the horses pay as well as cattle?

 Wen; I have got some very good prices for benters.
 Side. Do you find altogother that horses pay better. then cattle !.... I think they do.

8505. In spite of the missis you breed enough need over to overcome the minits !- I should say so; but I would like dendaily to you assist the event little of sublic money on Hackney blood being introduced into Leinster. 8306. Churnman,-You natorally admit that in breeding heren you cannot always ensure that you will be quite satisfied with the saintal you produce!

-No, you cannot. 8307. Any more then in cattle breeding or may

thing else !- No.
8308. I take it was think that horse breeding can be made to my under sertate elementances, and as far as your equation is concerned, you think breeding hunters is the most profitable?—I think so. 8503. You don't mean by that that it must be the

most profitable everywhere l-No. 8310. Mr. Canzw.—This sale of yours was not with the object of getting rid of your entire stud !—No. 831). Only with the object of autting rid of those

that did not pay 1-Quite so. 8315. The CHARMAN.—Is there snything else y would like to say to the Congression ! I would like

would not to my to the Community 1-1 weaps more to say that I think encouragement by prize to yeardings in the myring would be very good. I don't soo how very well you can encourage farmers to keep their lest marra, homers when we went money we must sell the best mass; and I do think that if fools must sell the new mares; one I do think some it town are not fed from the wearing time to the following service they never toys into earthing. In reading the that one gentleman wanted to do away with Queen's Pistes. I would not at all approve of that. Those

are the horses we want to encourage most; they see the ones repred to have stamine. I would retire agree with Mr. Murphy's idea of having long-distance 5313. You think the improvement of thoroughbood

stock would be of general value throughout the country, heavier you would have a hetter class of size. to go to I-- Certainly.

8314. Mr. Wesson.-- Would you register

tallisme except thorough breds !-- I would register half-tred stallines with three pure contes on the dam

5315. Would you make that a sine gun non i-Yes. 8316. Would you register any suitable lecking horse that had that breeding 1.—Yes, provided he was hite a hunter and aboved quality enough. I would also suggest that all stallions about the literased and

extended by a veterinary surgeon as to sociadness.

8517. Mr. Canam.—That is, that every owner desaid take out a license before keeping a stallion !-Yes, to serve for the public; but I would only register Yes, to serve for the puttio; but I would only register the thereushired horse, and heave fast anymoushing \$518. For the nurmose of potting vid of this moneyel?

-Yea, and unsound once.

Mr. Grouge Resents, Dundalk, exemined. 8519. CHAMMAN You live in the County of Louth!

- xee. 8520. Do you wish to meek on behalf of the Committe e of the Dundalk Horse Stow 1-I have not been specially sent here by the Committee; but speaking about coming here to some of the members, they thought if I could come and give avidance on a

particular point it would be a good thing, a point that we are all served upon \$321. You are a member of that Committee 1—Yes I may say I have been the one to start the Show from the beginning. I have worked it up, and taken a

great interest in it.

8322. What are the particular points you wish to areak short !- Well, all the evidence we have read goes to show that the improvement abould be in the direction of the mares; well, we don't think so-es least I don't. I think theim provenent should begin with the stellions. At reseast in the county I don't thisle we have five thoroughted weight-corrying bontons. 8238. In the county-you mean in your district !-I don't think I saw more than three in my lifeture that would carry 15 stone to hounds. As long as we are breeding from cast off 5 furloug horses from England what can we have but those miserable mares we see in the fairs! What I would suggest in the

COMMISSION ON HORSE BREEDING. 970 8326. These horses brad in the stud, do you want establishing of a stud farm for the purpose of hypoling

Zec. 6, 1896. thoroughbred weight-corrying hunters to let out for Mr George

8324. Hunting sires!—Yes; the only valuable house we have in this country see those carrying 13 to 15 stone; but for want of suitable mares and suitable stallions we cannot produce them in sufficient numbers.
6325. You are in favour of establishing a Govern-ment establishment !—It is the only way to company the thing ; it would take a large sum not within the

range of private enterprise. with the fillies !- If you have a weight-carrying hunter sire you are bound to improve the filline in time. \$327. What would be done with the fillies in the Government establishment?-Let them out to suit-

able districts, not to every district; it is a well-known inct that you cannot get bone unless you have Emestone. I would shoom the districts, and let them out to spitable parties; a certain number would have to be kept for the production of the very thing I am advocating. 8326. When you say let out, you mean for purchase

\$319. And then supposing these sires to be irred and produced in Them I would let them out on the some terms as under the present scheme. You have house seathered all over the excepter not fit to be let

\$310. They would have to serve at a low feet-I think the fee is reasonable at present. \$351. I mean these Government horses !-- If they sould charm a lover fee so much the letter, but they are not unreasonable at present.

8131 You admit, I suppose, that the existence of

bad meace is detrimental i-Yes.

but make is decreased by the second of th noticed at our shows is the few mares that are shown. and their very had quality. 8334. I suppose you have not thought out in detail anything about it !--Oh no, sir; I merely wished to state that as the concentrated coinion of some of xay

8335. Lord Assrows.—Do you want these horses bred at the stud farm to be theroughleed horses ! turn out a lumber is said for horsess rurnoses. Surely I want to breed straight; at present all our weight-sarrying hunters are meagrels; they have all a gress of the draught in them; for the nursous of getting strongth you have to get the draught.

e.i.d. what mass of somes do you beend — I was trying to breed hunters. I was breeding from very good mares. They were all mares in the Hunters' improvement Society's Record, and there was some of

tiem mares that had taken prizes in England, and I

them to be what are called half-heed horses or thoroughlends!—I want them pure heed if possible 8337. Pure bred on hunting lines or racing lines? I den't think horses heed for racing purposes are fato let out for hunters at all 6538. But you want to hav hunting mares 1... Von have to begin with the hunting mare; you would have to begin with the nanting mare; you would not get a weight-carrying thoroughhed mare. 8539. And you would foun a brood of hinting sires t—Yes; and endeavoor to bread straight instead of an at present by orcesing.

8340. Mr. La Torons.—I understood you said

these sires ought to be pure-hred, and then you said they should be thoroughbred burnes out of burnisse mares—that would not be pure-head !—You will have to work up the breed. With the present horses I don't think you can get a reflicient number of weightcarrying hunters.
8341. You propose that the Government should

manufacture a breed 1—Yes. 6342. A breed of sires 1—Yes; to get a horse that will carry 13 to 15 stone to hounds.

8348. You don't think that could be done by heeding from tharoughheeds !- Not the nort we have

at present.

8344. Do you think it is beyond the bounds of
possibility to breed a 13 stone to 15 stone barse with
a thoroughhed sire b—If you do you must put them to a draft mere. 8545. Do any of the horses of the congested districts come to you !-- Nome whatever. I don't

know anything about it.
8346. Mr. Wansen.—To keep up this breed you would creas the horses with such other !- I think it is the only way.

6347. You would not go on erosting with the thoroughhead, but gross the animals with each other? 8346. That is your idea of creating a hunter breadl-

Yes; they have become lighter in bone, and not marry such good action.
ASSO. Do they breed many harmon horses!— Everybody goes in for brooding a lumier if they possibly can, and, of course, anything that does not

8351. Charaman,—Anything clue you would like to say !- Nothing, my lord. The Commission then adjourned to January 5th,

Jan. 6, 1087 SIXTEENTH DAY .- TUESDAY, JANUARY 518, 1897. Present :- LORD RATHDONERLY, in the Cheir; LORD ASETOWN, HON. HEXRY, W. FITZWILLIAM,

COLONEL ST. QUINTRY, Mr. PERCY LA TOPOUR, Mr. F. S. WHENCH. Mr. HUGH NEVILLE Secretary.

Sir Douglas Bronen, Eart., Colchrook, County Fermanach, examined.

8352. CHATRMAN .- You live at Colchrook, county put them to the best thorough head horse I could get. 1 Formanagh, and take considerable interest in the put them to several of the horses sent down under subject of borse breeding !- Yes ; I have been on the the Dublin Society's first scheme, which were supposed Dadin Society's district committee since it was first to be the heat berses, I suppose, in Ireland at the time; and I put them to all the best throughbred houses I could find about the place, and I had a very started. I did secretary for it for some time, and I have taken a good deal of interest in the local shows there too, and I have been breeding for some years a good theyeogishred stallion of my own, but I did not good many house myself. find that I snooseded in breeding breess of the class that one wanted as hunters. 8354. What class of land is there in your district:

what soil !—It is a good deal limestone, but it is rather a poor soil on the whole. 8355. Are there many houses bred in your neighfrom Chydredulen at one time, but they gave them un they found at was such an excessively lad cross. I am sorry to say there is some of the blood left in the country still. But the other homes they beed

are mostly said as remounts for the foreign Govern rents. The better class and the others are largely cad in the country among the farmers. When I say the better class, the still better class than that are sold for harmess purposes, I think, more than

anything cho. \$337. Are there suitable mores and stallions in the district for getting that class !—No; there are very 'ay good mares. I don't think there are frient mares is the whole county that are út to be put to a thosoughbred stallism at all. The rest are all either these had brutes with half Clydendele blood in them or else they are too small and weedy altogether and when put to a thoroughheed they breed nothing but absolute weeds, and the result of that in that the people put them to what they call half hard stallions -not what I call a half-bred stallace -- I should call

then a mongrel stallion, simply to get a little weight and action ruto the produce. \$558. Are there many of these stallions in the country !- Yes; a good mony, and I don't think very many of there are sound.

8359. A bad class of stallion !-- A really bud class of stallion \$380. And the mares, you say, are-1-Small and weedy, the majority; there are a few good mores,

8161. Do the farmers in your district rear their foals or sell them young 5.—They rose them mostly, and a few are sold young when they are weanon 8352. Where do they sell their horses 5-In Clones and Ennishillen, young horses, and in the Moy fair snything that is better; but the case that are sold in the Moy fair are horses that are bought in the South of Ireland and brought up and fed by the farmers.

8163. Do they do the feeding business in your district 1-You some of them: there are very few broses boad in my district that are fit to send to the Moy fair at any time of their life. 586. Do you are remuler any better class of wars in your district then what there is now, are they deteriorating, do you think 1.—They are certainly not improved, and I am told by men who have more

superience than I, farmers who are breeding horses, that in their memory they have decidedly deteriorated, d compa my memory does not go far back, it only free back give wears, they certainly have not improved \$265 Have you say scheme that you think would

present time are not suitable, and I have seen the prodaes of Hackneys with these weedy marcs and it our tainly has been very successful, they are animals which have theiren well and fetaked good prices. I head two of them myself out of two indifferent mares that I had, that I only heed from because they happened to go lame, I certainly abould not have bred from them with a theroughbrod, I tried the experiment with a Hasknay and the produce of these two mures soid for more than the produce of hunter mores to a thoroughheed stallion, and gave me very much less trouble to feed. I had them all running in the Deer-park together, and where the thoroughbred produce Was not shriving the produce of the two Hackneys were as fat as they could stand. There has been one Rackney stallion in the district, only one and he not a very good one, and I have seen the produce of this Hackney and certainly with these weedy mares it has

lard a much more saleable and useful article to the small farmers than the thoroughband did for them But I believe the only thing really to improve the lared of house through the country is, as was suggested here before, I believe, to register all horses, in fact, in here bettor, a conserv, to requirer on towns, in Justice Herizott, register them with a full profigure, so that anybody can see what the profigure in and I think it will stop a good deal of false pedigrees that are semetimes put on indifferent

8866 Have you had any opportunity of sceing any of the stock by the horses imported by the Congested Districts Board 1—Ch, yes, I have seen two that are close to me that were bought as foals down there, one of them is a very fine on about 15.9, with good action, a beavy weight-carrying cob, the other shows more quality, is lighter heift and is a very good bunter,

it was out hunting the other day, and is a very fine jumper indeed, I have mover som it in very long runs but what I have seen it in it has done very well.

And then I have seen a lot of the produce down at he stud farm and I have seen some very good open. There are two cohe that are down there now that would, I think, make a good enough pair of colu for sayone to drive. 8167. What stud farm !—The Congested Districts

Board's stud farm, Chantilly, 5168. You mean you have seen the bull-beed Hackneys !- The half-bred Hackneys, yes, and also

there are some of the produce of the Arab stallion. "Avfully Jolly," they are very nice posite but they are absolutely out of the market, as far as I can see they are only about 13.2 to 18.3, would do for a child's pony, but there is no value in them, which the others have decidedly. I don't believe those two color are trained to harness yet, but they are certainly worth

£120 to £130 as they stand.

8369. What age are they t—Rising four. Then I have seen two others on Mr. Weensh's own farm, one of them hred in Achill Island by a Hackney, a bove of over sixteen bands, well I don't think if Rest new

is be would refuse to buy it.

8370. In there a Hankney stallion standing in Achill
Jaland 5—There was I before. 8571. Has the Royal Dublin Society's scheme been of any benefit in your district !-- I think not. I have

been working at the whole time, but I don't think it has been of any real benefit.

8372. Have you say improvement to suggest with regard to that scheme?—I don't think it can be im-

proved on without more money. The money is too little to do say good. The money devoted to each county must be so small that it can do very little. county must be so small that it can no very must.

8373. But you think with more money the scheme
would work beneficially to the country i—Yes, but I should register other horses than thoroughbreds. should register them according to the desire of the people in each county. You might have it the same wark out well for the improvement of mares !- I am as the present scheme, and allow anybody who had a

certain that the class of stallions that are there at the Hackney to have him registered, and anybody who had a thoroughbred to have him registered. would soon see to which of the registered stallion the majority of the people were going, and would thereby be able to judge which was most required in the country. I certainly think the scheme should be open that way to allow other horses of pure breeze to

8374 Have you any further chieresticus you would like to make to the Commission 1-No, I cannot think of anything at the present moment.

8575. Mr. FITEWILLIAM.—You mentioned some of these house by, I think you said, Hackneys, that they throw and did well; you are referring to the first cross of them, I think t. The first cross, yes. 8376. Is it not a fact that the first out-cross of any distinct breed generally does show great thriving powers, whether it is horse, or whother it is cattle, or anything else! Do you think the Zes. 6, 1000. sages theiring powers so you describe would continue in future growes !- I think so from what I S'r Bragles Lodg, Bart. have been told by pusple who have tried the second gross, both orossing the half-bred produce back to the

Hackney or crossing it to the thoroughbred. here told that the produce thrives very well; but I home none times nor provided further very wait; one I have not any personal experience of it.
8377. Then that is your opinion against, I may say, the generally accepted theory: 1—XX.
8378. But you know that that is the accepted

thory; -Yes, I know it is.

8379. Lord Askrows. -You have tried breeding hunters. Do the fareners around you broad hunters at all 1-No, practically not. They may by an accident you one; but then it is not said as a hunter, but

to some horness dealer in Clouss. 838). When you were broading hunters you said you failed. Do you mean they did not grow !- They

grow tall enough; but not with sufficient bone, and they were weak 8381. Do you think the soil is not suitable for heeding or sultable !-- I certainly don't think it is

soitable for brooking hunters.

6382. You said a lot of removants were head in the how are they bred !-- Mostly off the half-

teed stallions

8381. Off half Ciydordale mares or weedy mares? —Off weedy mares and off Ciydordale years, too. If it is off the Glydesdale it is generally by a thorough-bred horse, and off the weedy ones by a half-heed. 8384. Not counting remounts, where do the horses go chiefly that are hought in your district!—They leave Ireland, most of them. I think they mostly go to the Continent; they are bought very largely for the Swiss and Italian Governments.

8385. You my you have seen the produce by the Congested Districts Board's horses, have you seen the bares themselves !-- Yes. I have seen there all. 8184. What do you think of them 1-I like them very much. I think they are exactly the horses to come with woods Nobt course conceasing as I have

eros with woney agin mere, especially as I have seen the profuse and the result of the cross. 8.57. You have heed, you may, two horses yearsell by a. Hackney; have you had may experience of working there, or saything of that kind i—No, I sold them both. But one of them was worked by the farmer who bought it, from the time it was nearly three until it was four, on the farm, and he then sold it and get a good price for it—a good price, econisoring the sammal, something under \$500 for it. The other

one was not worked at all; it was just fod and seld.

\$338. Have you owned any Hackneys yearelf,
crossed or otherwise except those two 1—1 own one half-bred Hackney at the present moment, a pony of shout 14-3. I have bunted her for the last five never got left behind on her, I know that, and I have had some very long runs. In the the casens she has only given us two falls, and the grantry about us it is very easy to get falls over. Tolking of that, I know another Haelensy belonging to the local doctor, a Hackney hred in the convected districts, which he bought as a feal; he regularly bunts this peay, and not only hents it but rides it across country to visit his patients; he always goes

straight across the country, and when he is not with hounds he is a man it is rough ensise to see the rail of his peay than anything else.

8359. You keep a thuroughbrai stallion yourself!

8390. Do you get a sufficient number of marvalue

No. I do not. 8391. Mr. Werrors.—Have you considered the creetion of licensing stallions at all, having a Government licence 1-Yes.

Sig. Do you approve of that suggestion t-I do most distinctly approve of it. I should get a very howe penalty on any unsound stallion covering any 8393. Would you follow the system adopted to

mares except the owners'

neveral foreign countries, of putting on a very become any mares but the owners' l-Ve-BOM. The owner may seem his own were as he libre 1—Yes, I think you can havely prevent a man serving his own mores, if he libre, with an unsound size. in your district has to breed, hunters or harners harses i-Harness horses unquestrocably. There are no dealers coming up into the country to lock for

hunters; any dealers that are there are kelling for 8396. Is these a good dereand in local fairs for a harness horse that has notion 1—Yes.

8397. And notion is the sine gue non; you must brood for what will hring money?—Undoubtedly; they will look at a hurse to see has he action, and won't look at him again if his action is not peetly

good 8398. When you speak of remounts being bought do you chiefly refer to foreign Governments :- I think almost absolutely to foreign Governments;

there may be a few bought for our own Government, but not many. 8399. There are men in the district who deal largely, quite close to you !- Yes ; I heliave one have nearly a thousand houses in the year. 8100. Aud did one of the hunters von bred take

and prize at the Navan Show in Moath 1-Yes. 8401. I think you said that there were a great many half-bred stallions, but what would be were definition of a half-head stallion that should be revistered under the Duhlin Society's scheme i—Wall, occionally a horse with at beast four crowes of thoroughbred blood. I know Captain Fife's definition of one for the Hunter Improvement Society's Record is that the horse should have four crosses of thoroughbrod, and the original dam should have been a registored mare at the time. I think that is pertupe rather a severe condition, but certainly there should be not less than four crosses of thoroughbond : whereas those half-bred horses, I may mention, their sires very often are build-bred horses and the

may be head anywhere : I know some to have Obvicedale blood in them. 8402. You don't think that the Cleebookske blood has been a success 1—Certainly not. 8403. And it has been your largely introduced b-

8404. Charman,-I would like to know what bounds there are in your district !- A post of harriers. when I say harriers they are 21-inch foxhounds.

8400. But they hant bares !-- Yes. 8400. Not foxes !-- Not foxes ; I wish there were forces to hunt, 8407. Mr Whanon,—There was one thing I think on said in answer to Mr. Fitzwilliam, I think he said it was an accented valuather the first owns from any breed was the most hardy; you said "yes," do you imply from that that the second eros from a

Hacking is any less hardy !-Oh, no, not from what I have beard : I have no personal experience of that, but from what I have heard from others I don't at all suppy it.

8408. It was only the general theory, not referring
to Hackneye specially 1—Yes.

8409. CHATREAN.—You think the Hackneye then are the exception to the rule !-- I would not say that, that

is the generally accepted idea that the drat cross theives because it is simply the case of fresh blood \$410. But the second cross again t-I think the feet of the fresh blood will still tell. 8411. Although it is generally accepted that the

second eross is not so good in all other breads !-- Yes. 8412. Except in the Hackney !-- Yes. 8412 Mr. Warren - But would not the Hackper be nesers to the mares in your district than a thoroughbred on the question of affinity in breeding?

-Yes

Mr. ROBERT M'KINLEY, Stamphmore, Castlefin, Doneyal.

\$414. CHARMAN.—You live ut Sconaghmore, on the east side of the county Donagal !—You. 8415. Are many horses bred in your neighboorhood?

_Oh, there are a great many. \$416. What show of mare do the farmers evascable

time, small light-legged little mares. 2417. Do you consider that home-breeding can be 8417. Do you consumer trust norms breeding can be carried on processor in Arcaegus I—well, we a cream actent it can. Generally the farmers in my migh-borhood, the majority of them are small farmers, varying from 20 to 40 acres of land, and they breed a years hours to do the work of the farm, and then X he turn out well he is sold to the best advantage.

when four or five years old, that is the way breeding is generally carried on.

Hills. What class of houses in your opinion should be level in the district !- Well, to suit the wants of the farmers themselves, to login with, it requires a strong horse; peobably to turn into a van horse or

go to the Glasgow trams or somothing of the sort, when they turn up to a certain age, or a strong Still. Ata the mares of the district suited for breeding that class of horse i-Yes, when you get a heavy excessfs horse to cross with them.

8410. What hind of a stallion do you think the mares of the district should be mated with 1—The stallien that gets the most trade in the district is a cross between a Clydesdale mars and a Welch borse, that horse is doing more trade in the country thus any other, whether it is that he is letting at a lawer fee than the others I don't know.

8431. What sort of produce comes from that I.-A.

even from the light mares and that class of horse generally brings a van horse or to go to the Glasgow leave, they begin to work these young borses at one and a half wave old and they work them on until ther are shout four, and sell them off them to the

dealers in the district for the purposes that I have mentioned \$422. Are there many horses level in the district?

-Oh, yes, generally every farmer breeds a foal for binself every other year, I myself breed a good many hereon every other year, I myself breed a good many hereo, but I go in for a stronger class of here, my land is very heavy and I go in for a Chylandala homa generally. given it up, it did not pay me, I have half a docen Clydendale mares at the present time and I am breed-ing from a Clydendale horse from there. 6433, What seet of soil is there in your district !--It write a good deal, my land has a good deal of lime-

bond god box frodus 5424. Does it require a heavy hurse to work it t

Well, the land is very hilly, the farms there are very \$425. Do you think a heavy horse is better for the mountains !- It is better for the hills on my farm. 8425. Have you made any observations of the stock

got by the Congested Districts Board's horses !--Oh. I have seen a good many of them, but the farmers there would require a stronger horse than a Hackney to cross with their mares, that is the opinion of a good mean I have been talking to intely. When I found I was coming up here to give evidence I asked anyone that could give me information, and they say they

would rather have a stronger horse to mate with their waren, they think the Hackney is too small, Si23. What class of stallies do you yourself recommend 1—Speaking for myself I would go in for a Clysteckle, but of course for the neighbourheed that

is entirely different. Anyune that I have been tallifee is entirely diserent. Allysis that I have been tailing to wants a strong horse up to about 16 or 16.2, secondaling like a corriage horse or a wall made hunder. that would be exhibited in the Dubin Show in August, up to eighteen come weight. breed from 1 .- They are very insidifecent at the present

S420. Do you think you would get that from a Cledesdale stallion 1—I don't know. 8430. At what age are the young stock nearly said in your district in Some are said at one and a

half and some of them are sold from that up to five 8431. Has the prim of heroes deteriorated of tate years in your district !-- It certainly has

8132. Are there any thoroughbred sires in your district !- There is one, a horse salled "Greenfold." standing in the district under the Royal Doblin

Society's schouse.

8453. Do you know where he came from t.—His sire is "Springbold," he is registered under the Royal Dublin Society.
8434. Mr. Prrewnam.—What age is he!—I

think he is an agod home now. Grounfield by Spring field by St. Albans, I think, is the broading of the borne as fay as I our make it out. The has been modes the Royal Dublin Seciety's schome for a road number years now. He belones to Mr Hamilton of

spino. 8425. Chainnas.—Now with regard to half-bred horses, are there many in the district !- Yes, there are

Scores, are there many in the cistrical 1— Eus, there are, a good many heaves, very influxion because too.

8.150. How are they mushly healt—Well, I took some little notes of some of them. There is a man has a borne celled "Six William". His size was a harve salled "Wixdow," and "Window," was not do have salled "Wixdow," and "Window," was not of a three-quarter bred thoroughbred mass, by a Clydes-dale bosse. That is mixed breeding altogether. I had it from the owner of the horse himself

8437. Lord ARRYONE.—He is by a Clydesdale house out of a nearly thoroughbred mare out of a maxed mass t—No. This borse is by a sire who was by a Clydeudale home out of a three-evanter mave. 8438. And his dam is enything I respons!-- His dam was enviling at all

on was snything at all.
5432. CHAIRMAN.—What nort of stock does he get!—The stock is not very much. I have seen a good many of the stock after him. It is very infector. and the for that man charges in £1 for the service, and 2s. 6d. to the green—no feel no money. That house does about 102 marss each year. Considering the low fee he gots trude. That is where the mistake arisos with us. The facusers are in such a way they are not able to pay high service fees, and they take the obsepost horse they one get. This Welsh boxes I mentioned before, his dam was a Clydeschile mare,

menticated before, his dam was a Chydeshle mare, and the sire was an imported Welsh lavare.

8440. Mr. Wastron.—A. Welsh martherse:—Yes. 8441. Chatmars.—Yes. dent knew anything about the beeding of the Welsh cardborn!—No ; he was a horse up to 16 kands I see sews, and this berie. was a horse up to 16 hands I see see, and this here is up to 16 hands, too. This here with the light mares round about my district gets a fairly good beast. It is able to do the week of the small farmers when I pear cld, and they make is week until four year cld, and then they sell it for £25 or £30, and perhaps some would so to £35 when four year old 8442. Have you any suggretions to make to the Commission with a view to improving horse-breeding n the district?—I would say three-tourths of the horses in my neighbourhood should be castrated by

8443. How would you replace than 1-Of course cano. Most would you repuse usess 1—Ut course these men work these house from the end of the season until the next season begins. They work these horses ou the farm. I would say compensate these men for the loss of their horses, and lot the Govern-ment assist them in byring switchin horses for the former of the course of dutriot, subsidies the owner, and compel him to let 174

it is a to low enough service has to smit the water of the constrir.

844. What stalling would you propose I—I would propose to stalling a stalling to the sta

wead lie if at 30s, they would patronic him, but be finds it would not pay him to be it as such a low fee.

8445. You not you would also have a corriage or hunder sire. How would you pay this class of house 1— That is a difficult question. Firms a know-questive Cypicide many with a horoughlord more. I have some in particult that I beed quit forth from with a choroughbred hour. The first I brief I said this is the May fail of 35 at four years old, and he synthesis.

that benght him from me (Mr. McGII) kept him for those his nearth and took him to Lincoln fair in England, and pol 2130 for him. \$448. Mr. La Teccus, "Was he a golding!—"Yee. \$447. Lerd Austrown.—How was be brief!—By a throughphed horee, "Extrabacille," by "Birk Arbal." He is dead now. He belonged to the same sum that has "Greenfald!." He was about the best breefing

has "Greenfield." He was about the best breeding borns we had in our country. He died this has second. 8448. Mr. Warder.—He was a much brees i—Ch, no, he was a big borne, up to 10 hands high.

and so wash on go more sign with manning and the state of the sign of the state of the sign of the sig

the mass was a good one.

8468. That must have been accidental, because
Hilarious is particularly well-bred, and an extremely
strong horse, and a very good-looking horse tool—
Yes; I sold that mass in May fair when econing five
year old as £70.

year one a live.

1649. Then can the whole your experience of breeding the control of the control of the control of the first the control of the control of the control of the tast of the control of the control of the control of the state on well, and I got a horse not worth more than \$16 or \$2.5 when four year old I lose with on a borse until he comes to a certain ago, but the majorily of the farmers cannot wait, and when they hereal to horse they want to put him to the pluciph when he is young, and as they cannot put a light herea they

young, and as they cannot put a light horse they want to breed a steering bone.

8455. Dea't you think in Irshad they want to pix a horse to work early, no matter by whetever horse they are—don't you think early work in Irshad in a great number of cases is conside too fat—I think as great number of cases is conside too fat—I think as I don't think as young loose should be put to werk until the is considing throw your old, and then to

8456. You say that in your district there are a

number of stallions that you describe as being of a very nondescript kind!—Undombredly. 8467. Have they been three long, or are they new importations!—They have all been heed in the district.

district.

8497. And used in the district 1—Yes.

8498. And in fact they are to a great extent responsible for the present dearth of good maces that are in the district 1—I don't say that that is just are in the district 1—I don't say that that is just that the present dearth of the pr

are in the district I—I, don't say that this is just a languabler the reasonates I—To a sersian extens it is. I think the cases of the deterioration of the is. I think the cases of the deterioration of the moreout the delitric is thin—I should be follower as not so well off as they used to be, and when a man bus as well off as they used to be, and when a man bus as well off as they used to be, and when a man bus a bast to sell her to meet a pressing demand, and one that meet with as a reddened in veolit int is not one that meet with as a reddened in veolit in all is not

suitable for the market; I faitht diah has more in the with it than anything dise. 8460. But still you say on the whole that the masses are very bad \$\int_{\text{c}}\$ \text{Test} (m) as a bad descripting, they have descriptionated estrictingly within the last ten year consistently. And then with regard to the Libral consistently. And then with regard to the Libral allogather, there is nothing being lared from his. only five or six mares in the season, they have so only five or six mares in the season, they have so

only five or six marces in the sesson, they have no marce to suit the horse.

8461. It that on account of the high fee or what

-The farmers don't like to bread from a thorough bred borse, they think the progeny would be too light for their work, and that is what they look to price

ore their week, and that is what they sook to good deal to decipally, and the high surrice for has a good deal to dewish it too, I think, this horse is let at 23 5s, if you look at the book.

8402. I sam not surprised he does not got many marest—If we had a heese lot at 30s, or 23, I deet think he would got more to do, the farmers are po-

judiced against breating from a thoroughbord hore in our district.

8163, is that on account of the very inferior and an account of the very inferior and the control of the very inferior and the control of the very inferior and the control of the control of the account of the control of the control of the account of the control of the control of the account of the control of the control of the account of the control of the control of the control of the account of the control of the control of the control of the account of the control of the control of the control of the control of the account of the control of the

a thoroughbred home at all.
 8464. For recommend either a hunter stallion or
a carriage horse !—Yes.
 8465. How ought such a borse in your opinion to
be bred !—The most successful breeding I have over

to be reed i.—The most secessaria necessing it have ever y had is an ancommonly strong mare put to a thoroughto be discuss, you will either get a smiable bunter or a very strong harness bores.

Nétô. How would the mare be bred !—I have told you that I hred myself from a three-quarter Clydes dals mare, the mother of those cotts and filles that I

are stim.

8401. You would not chipe to Clypdackle bridge streed cost into the size I don't kink its world bring streed cost into the size I don't kink its world carry lizers at all years. It have not one gives proc. Clypdackle nature, and I have noil some of their young steel, I sale one here in Turne said some of their young took to Koolland to keep for a stud larse, of come went to work to Koolland to keep for a stud larse, of come went to work to Koolland to keep for a stud larse, of come went to come the size of the size of

marror; I bought two marre in Sociand at our and a half year old which cost on To guineas, I bought another which cost on 240. 8468. Lord Austrows.—Where is the young stock bred in your district, you say they are bought sometimes as foals, who bury them b—Very few are bought

times as foals, who byps from h—Very few is no tongen as foals, I don't bink! I said to to \$400.5 When they are sold, who buyps them L—Just the dealers to all to the Glasgow trans. \$400.0 They are buyght by dealers to go not divtors to the said to the control. Do, no, they controlly have dealer to the control. Do, no, they \$411. Mr. La Toyour.—Do you think that the \$411. Mr. La Toyour.—Do you think that the young stoke in your country had estimated that think as, I think thay are.

Printed image digitised by the University of Southampton Library Digitisation Unit.

quality of the mares, because they could not keep good acres.

\$475. Who did they sell them to 1—They went out of the district altograher.

\$474. Do you know the county Fermanagh 1—Not

some. You haved its Dought Brooke's evidence to the effect that be subtrivated the disconstraine of the the effect that be subtrivated and elementaring of the subtrivated of the subtrivated and of the subtrivated subtrivated of the property of the subtrivated of the existy Dougsal, it is alongsther on a gritchineal constryvator I live, there are no trusts of graning land in al, it is consequently alongsther on agricultural country, and the introduction of Organizable bided into these country. I think, tends to improve and strengthen the class of more more than anything and

class of marce more than anything class. Sin X-ra countries that this blood has does good in the country Dorongal I—It has not been introduced in the country Dorongal I—It has not been introduced authority for not to give a electrical episition on that. 3477. You need by yearned, I suppose I—It tend thoughther from Objection Las sites for the instruction of the country of the countries of the country of the countries of the cou

and eligible for the stud-book—from a Hadimey hores that stood at Bellybodey, "Bay Malhon." I had a foal from her this year, a filly and a nice filly it is too. 8478. Have you come any three-year-old by three Congested Districts Board borses —No, I have not.

SiTP. Two-past olds 1—Well, year-citis is about the about the sabest I have seen.

\$150. Year experience of the Clydradale does not existing with that of Sir Douglas Brooke 1—Of source I had been the country to the country the country that the country the country the country that the country the country the country that the country the country that the country t

I don't know the councy Fernancesh wifficiently well to say what would sait the county, I only know what saits my own country.

5481. You don't consider it is calculated to determine more in your country!—Not at all, I think they are nearly as bod as they can be at person, any

charges at it would be on ingrovement; of come from one selected few letter than others. 8433. Mr. Wenner.—You have in the good farming part of Dosepal, when you talk of Donegal you are leardly a fair specimen.—I don't know that, 5433. Its there in it a great difference between your part of Donegal and the part of Donegal we have to cled with I—Well, so far as the Doughed direction is

deal with i—Well, so far as the Dunglee direction is concerned, I think this is entirely different. 3484. There is a good deal of good farming arabic had about you !—It is all arable land.

and some you -- it is in strate indo.

4485. And some very good forms 1—Undenheidly,
I bold 350 areas of land myself, all arable land.

5496. From wind you know sold I gather, you
think, a thoroughbred horse is really no good in your
diries t -- No; the Royal Dublin Society's schemes
have boon a fulture altogether, the last show of masses

we had there were three mares and three feals, we had to give Ein prime, and we could not distribute all the money we had to give away, and that has been the ease for the last three or feer years.

tis ease for the last three or four years.
5487. When Struthardle was there, was he largely
med 1—Very largely used.
5480. What was his fee 1—Two guiness.

8889. Then penciscally he was only used by the well-to-do farmers I—Am extraordinary thing about Simulatedle was that, all the cell foals were exceedingly good, and all the filly feals were small and light and weekly, his filly feals were small and the majority of them corbod.

8490. But his out foals were sound 1—8000 of them were cerbed as well, but the majority of the filly foals were curbed. 8491. Of course hunter-breeding is quite out of the question, it is either a question of breeding an agrieditoral heres or a harmen house 1—That is it.

Gifford loces or a harmon house!—That is it.

5492. For harmon hereon is it necessary to breed
then with action!—I would my so.

5493. You would say that is the chief thing to reli
a lone !—Yee; let I would not go in for so much
stian as the thoroughleed Hackney has.

al 8494. It is not necessary that these should be extrawagant action on the circle wide because the manutal take not very much action 1—Not very much, but I believe three should be section on the strete side, because it in that which impresses the program more than the mother.

3495. What is the feel like that you may you beed from a Handary very self-II. is a nood may as mod

34%. What is the feel like that you may you bred from a Hackrop yourself!—It is a good may, a good fall, that it was a particularly good may, and the mans was beed in the county Fernansels by Mr. Footer Factor, of Ballinanalland; I was a judge at Emmission Show one sesson said bought the saste

Fortier Fueter, of Bellinarcallind; I was a judge at Enmidlien Show one season and burght the sate from ids there.

8409. You say there must be a strong harse for the farmers, and, I suppose, a hardy house; do they house their young stock in your districted—They do it is story to be good one of them.—They don't taking seed one of them, although they home there, I stong seed one of of them, although they home there, I

don't think they are well enough fiel in the winter time; a young home has a certain amount of growth to autain, or well as to keep up the system, and is requires to be well fiel. 8498. Have any of the American horses found their

way into your district I—No, except a few at the very beginning, but they were soon put away again; there are some in my district new. 8419. They did not there i—No.

8490. They claid not blee them 1—No.
8490. You have heard what has been stated about registering all homes, would you be in favour of that 1—I would, of stalling, but I don't see how you

to the second of sames, the touch see hew you to only register all races.

8 8301. Would you be in favour of their being illicensed, too 1—Yes.

8 8302. Can you see any plan by which you can im-

prove the broad of marces!—The class of marces, I have studied that question thoroughly, and cannot it sees any vary of improving the marce, except the provinces table it into their own beads to improve them to better the proof marces.

8203. Are there any local aboves!—Yes, a show at

Leadoudery;

8704. Do they give premiums for the best mares is

17 get first prine for a mare and foal off a Hoshings

bores; I get first prine at the Deery Show with that

blied mare and the faul by Bay Malten hast war.

see the seeks I got most prize to the neety slow with that the blood man and the find by Bay Malton skep year.

15 8505. Do they give any special prominum, except the price for god marest—None. methods by the cally show of any sine in the district—1—The cally show of any sine in the district—1—The cally show.

18 8077. Can year suggest any plan to encourage farmers to keep marest—1—dead thinks giving prizes.

farmers to keep merse i—I don't thinks giving prints on to a few merse would be of any good, untoo you could see the secretary to be a certain standard that would see the secretary of the secretary to the secretary to be in anything class, and I don't see that there would be any use to anything class, and I don't see that there would be any use to anything class, and I don't see that there would be any use to anything class, and I don't see that there would be any use to anything class, and I don't see that there would be anything class.

to be bought and given out to the small futures to breed from, do you think that would be prestented by a sight but for the less would be prestented by a sight but for the last would be prestented by a sight but for the last would be prestented by a sight but for the last would be prestented by the ferrest for two years, do you think farmens would it takes good case of the 1-d dot's thank they would; it would be very difficult to work, it would require to be looked after for more than my ans would be able to do.

at 8510. Do you think you would get us good results by in breeding from a half-breed sire stock as you suggosted, as you would in breeding from a pure-breed of sire, such as a Headeney or Yorksthire coach-borse, or any other sort—I think to. 8511. That is, a half-leed sire by a thoroughbreed

be been out of a strong more 1— Yes throughouses the been out of a strong more 1— Yes #8512. CHALBRANK.—Mr. Wronch, in putting a quotion to you just now, said that you had given it as your opinion that a thoroughbred horse was of no

your opinion that a thoroughbred home was of no use in your district—Yes.

SSIS. Yet did you promue a very large sum of money from the produce of a thoroughbred horset— Yes, but I was only speaking for myself when I

mentioned that, I was not speaking of the country in Jan. 6, 1992. Mr. Babyer

mentioned that, I was not speaking or the occurry in general; there are very few farmers in the country farm as much land as I do—I can afford to wait. B514. If a smitable big-boned, thoroughbred horse was standing at a low fee in year district, would they bone and substance about how than any thoroughbreds I have seen . Hillsrices was the strongest horse I say. and he would require to have more hone.

8515. Do you think the bone of the Clydeslate

stallien as as strong on the bane of the thoroughbord 8516 You have pever heard it was more pour -There is a creat difference in Civioudales as well as thoroughbreds. I have seen some Clydesdale mares and their boses are crite as hard as any thoroughbreds. The last mere I hought in Scotland I would

any her bone was quite as strong as any thorough. hred here/s, and as clean, nice legs as can be under any animal, although she has the fash of heir on her bolind, she has not grossy, thick logs you will see in R517 Size for size; the hope of the Chalenton home is an heavy as that of the thoroughbeed ... Yes I think so ; that is, the real, proper Clydesdale streewe have very few of them in this country.

8518. Have you anything further to say to the Commission 1 - Nothing further than I would may that all stallions should be registered in the country, and substituted by the Government, all correct and proper stallions, and they should pass a voterinary surpose. and that stallion should be licensed to travel in the district and serve mores at a certain low fee-that is the only suggestion I have to make.

Mr. JAMES GALERARYS, Foyle Road, Derry, examined.

8519. CHARRAIN.-You are an auctioneer, and live at I codendary 1-Yes 8520 Have you had any personal experience in home breeding t-Yes, for the last eight or ten years have been breeding horses, and paving perticular attention to horses in penceul.

\$521. Are there many horses beed in the district with which you are acquainted !- There is a fair average.

5122. What class of borses are mostly bred!— 8322. What class of bornes are assaily bred?— Well, cart horses, Chydachales, harness horses, or half-fired, and the Hankney, there has been very little heredling of therepublicade for the mast four or

\$555. What cleas of horses do was think heat to breed in your district, with an eye to profit !- With an eye to selling or for profit, harmen horses are the principal horses head; they generally breed the heavy 8124 Have they suitable surres and stallions in the district for breeding purposes I—No; they have not.

8525. In there a ready sale for horses !-- You ; there to a fairly good sale for big, good stopping harosse 8526. Is the price as high as it used to be !- For a really good horse it is as good as ever it was; for the average, common place home, it is not quite as good. 8527. Has the Rayal Dublin Society's Scheme been

tically uncleas for maren; there was but one mare in there was one in Lissavudy, one in Derry, and our in Strebene 8528 Have you any suggestion to make with remod to that scheme!—I timk the Royal Delstin. Society has been gradually slicing the award; they started with £200 or £250 to the owner of the stallion, and the owner of the mare that received a personation raid a second and half a cover, so that the covers of the stellion had £250 on £200 for his season, as it is now, you may have a ten pound note or a townty nound note, in one district the Government borne served three manys: the owner for that had £9, so they went on sheing the Royal Dublen

they won't get good thuroughisms stallings to commete 8739 Are there many thoroughloods in the disstrip are many coat, there are two old horses, "Strathartle" and another horse belonging to Lord Branery, called "Nailcote," but they are very old horses, and have been doing nothing interly, under the Royal Duhlin Society, and he was the only theroughbeed horse within feety or fifty miles of Derry The year before last we had Mr. Herdmen's \$520. Where are the borse sold in your district,

and what becomes of them t-A number of them are bought at home by dealers, and a number of farmers go to May fair ; it is the leading fair for good horses -the principal fair

8551. Have you had any experience of American houses t... No. we have had no American because of secconsequence in the neighbourhood or district; there were a few some five or six years ago, but I would not call them American horses. \$552. Have you had an opportunity of sociar say

of the stock got by the Congested Districts Board's 8553. And what, in your opinion, has been the offect of the working of the Congested Districts Rosei Scheme in your district, as remode horse breading !-Science is your contrast, as regards bores treeting!—
I believe it has been of great banefit to the small farmore; it has put a horse wishin their reach for a could fee, which they otherwise could not have had; it is bard to cut in some of the converted districts a pony stallies for the small pony marce in the district.
Of course the computed district I know most of, Caradonagh, I would consider it the second less district on the list-Strangelar would be first, and Carudonarh second. The mares are very inferior; on would be surprised to see the steak they are producing . it must certainly be the effect of the berns; none of the murce are saleable; for a dozen of them you would not give a twenty pound note-you would

henceleist in your district L. No. it has been year. not take a gift of some of there 8534. What do you attribute that to?—They are starved from their youth, and their life is wrought out of them : working from they are fifteen or eighteen months old, they are all spread of their hind quarters. 8335. They are worked out of shape1—Xes. 8335. From heling worked too young1—Xes, and

the work too heavy, and they are not fel. 8337. You mentioned just now a pony stallies, what do you mean!—Get a Welsh horse for these arnall pony meres in the congested districts.

8040 You think that is the best stamp of animal as a sire!-Yes, for these pony mares, and in that district; but, in my own immediate district, the barress been - aither Hackney or escoling horst-0 good holf-bred hunting been, with three or fear econes of thoroughbred breaching. My experience for any fair or murket is, that what the forever want is Society's grant till it is arentually worth nothing and

a big, lefty home with plenty of bone and substance, with a thoroughbred top, Hackmay substance from the arms and under the knee, and Hackney action, with as much quality as you could give them. I could give you an instance of a home bred in the congested districts that made £75 as a five-year old at the Moy fair. I bought the horse myself; he was 18 hands high; he was reared in Caradonarh, and he was by a Hackney sire only 15.2 hands high, and his dam was about 15.14.

8519. What was the dam's breeding f...I don't know that I could get you her breeding; I don't know

Printed image digitized by the University of Southwardon Library Digitization Unit Printed image distract by the Linearaby of Southampton Library Distraction Line

a little short-legged mare with a fair top on her and good bene too. good some too.

(540. Have you any suggestion to make to the Communion with a view to improving the breed of howest ... In the first place we are in as much need of mores as of stallish borses to been from ; the formers Makey have a good more worth \$40 or \$45 she is seld, unless she develops some unsoundness, and then she is kept as a brood mare. In the North of Ireland we are only getting the cast sires of England and Scotland to brood from both so thoroughlared horses and cart horses; they travel at a fee that

than I would give you any policyre for her; she was

have forme recent and hellogrown and evines to a 8541. Is the nature of the soil in your part of the scentre adapted for burse-breeding t. Some of it is that there should be a standard for brood mures an to also and quality and to every farmer of a certain solunting irreging a broad mare convine up to that standard-every year he would show her with a feal at

fact, either by a thoroughbred horse, Hackney horse, or whatever he chose to breed from that that former get a Government grant of £5, and that all stallions should get a certificate from a veterinary surveys, of searchest and that he was free form benefitson timese, and also some aki from Government. 8542. Would you approve of licensing stallions!-

Yes, I would say that a certificate of searchers should he the licence; if not sound let him not be registered er not allowed to travel as all.

8543. Mr. Pyrrwitanau.—On the whole do I understand you to say that you should prefer the Royal Dublin Society's system to return to what I believe it was originally, that is, of precolumngiving a good heree in your district a remains of mr £000, and obliging him to sorve mases at a certain Shows, that Uleter should have control of its own money of there is to be Government at that Theter should have control; it is owite capable of looking

8044. I think you said you would like to have all stallions registored 5—Yes; I think that all distinct breads of house, Clydesdales, Hackneys, Shire, Yorkshire coach homes, or thereughbreds, if a gentleman shooses to own a stallion and to travel a certain district, let the horse he reststand as a seemd size—the registration only to secure sound-

8545. Did you say too that all mures onebt to be registered !- Not register the mores, but let there he a certain standard of quality of sixe and substance. and when a man owning a more coming up to that and when a man owning a mane coming up to that standard if he broods off but overy year she is shown with a feal at foot he should get £5. 8546. Would not that be rather an expensive

itse, 1.-Five thousand is a mere drop in the bucket Mying it is coming off a broad back, we might as well bave a good baul as none at all.

8547. Have you thought over the idea of registerto mares that should be allowed to be bred from. tig marre that should be allowed to be bred from Do you mean to say you would not allow other marre to be keed from 1—Oh, yes; it is only to encourage the factors to keep a really good mare. If a former has a mare worth \$40 now the is sold unions she develops some unsommers, and then she is kept as a begod mare. The Limanus's Stud Company had two or three Hackneys, and several private people have Hackneys, and they seem to be breeding

NAME. — Five thousand is a more drep in the industri if three is to be Government aid for borse-breeding in Ireland. There is ten times as much spont in other countries. The Government has planty of money; there is no want of coin; there is an old

very well in the country; they have been able to correct at small shows favourably with the readers compact as the a sure invariancy with an promon of the thoroughbred. I myself wen the North-west Oup with a half-bed Hackney out of a three-quarter hred more. A half-bred Hackney get first price in a very strong class in Belfast some years acc. a class of twenty-five

a dias of twenty-five.

3548. As to the stallions you would like to see in
the district, I think you said you would like to see a
good agricultural horse!—Yes, we wont that tee. 6549. Would you describe the helf-heed produce of an agricultural stallion as belonging to the hunter an agricultural stallion as belonging to the number class i-What the English people are going in for now is a lumber size, and the flackney and the Yorkshire couch here if you like; be is a good house

to repeless harpess beened 8510. And for the smaller mares a Welsh horse ! would say a Weish horse is a good borse for them.

Si51. In the main the small for secon to be in your idea a great advantage to the farmer whatever the horse may be 1. Certainly, a small fee to the farmer, of course if you can get a good horse; but .

you cannot get it unless there is some Government It won't pay a man to give £300 or £100 for a good horse and travel bim at a small fre, and guarantee a feel, and taken all the responsibilities and risks, \$552. Mr. L. Tovons.—This horse that \$552. Mr. L. Torcan.—This horse that you make of as being beed in the congested districts that brought £75, he was not by one of the Commuted Districts Board horses t—He was by a throughband

Hackney—a very good breed of Hackney—Drawgalt or Dramark, and Lord Durby was his breeding. 8393. What was he sold as !-- He was sold in Mov

8554. But what as 1-As a hunter; and would give you in nice a feel as any home could be the sakile. and would canter se handy as a pony.

and would canter as nancy as a pony.

8095. Mr. Whirton.—As a rule are these many
hunters bred in your district !—Vory few.

pal industry in that district in the way of horse breeding !--Yos, the principal. 8357. And the draught horses-acricultural horses ! -Agricultural bosses and harness horses

SSSI. They are the two that it rave to breed heat ! ---Yes, if you get a good strong agricultural horse you can work him from four until five, and then sell him; that house I spoke of wrought from three-year old.

8520. Where are the most of the bornes sold !--

Good herses, a lot of them are sold at home, and a but of fearners take them to Mor. 8560. Do many freeign buyer come to May fair ! -Yes, a great many. 8361. Do they look for action in the horses they

buy !-Altogether for notion; if you have a horse with action in the Mor they will overlook some other points of quality if he has a go about him \$562. It is the reast saleable commodity!-Yes. you will have twenty men pulting you on one side if you have a road sterring been paining you on one soot it a Nobe house with were little action they don't notice

3558. Have you ever seen any of the stock of a horse called "Broad Arrow" that Lerd Charleman used to heve!—No, I cannot say I have, but I have heard of the horse; and I know that suything that came North that they wanted to give it a character they would tell you it was by "Broad

Sid4. That was to belo to sell it !-- Ye \$555. Yes know "Skitchardle"—Xes. \$558. He was a very uneron breeder, bred good colts, but had fillight—Xes as role the mares were light, and wanted here and substance.

\$567. And were liable to curbe!—Xes, they were

prone to ourba. 8568. Have you had any experience of testing the I have had eight or tan Hackneys of my own, breeding Sec. 4, 1867. between having these as three-year olds, and breeding tr. James them, and I have not had one unsound one out of the

8580. Camdonagh is the district you know best ! -Yes. I know it well. 8570. Do you know that the Congested Districts

borro. Lo you have been there hast your as well as a Hackney 1—Yes, I now him.

80711. You have bred from Hackneys yourself for some time 1—Yes, for the last sures or eight years.

8572. Have you seen much of these Asserious borsest.—Very little. 8375. You have not seen them in Belfast !-- I have just seen them; but peld no attention to there

8574. Do they do harm or good t-They do harn in this way: that they are injuring the prices of the ordinary horses; but I believe eventually the (cherowers will set sick of them. I understand from

the dealers that they are soft horses. SATA Would you be in farner of having them branded or marked so that people would know what they were buying !- It would be a wise thing to

brend them; but whom some people are buying a borse they huy regardless of what he is if they get what pleases them. 8576. You suggest that Ulster should have control of its own tievermount grant. You mean by

that the North-East and North-West Agricultural Societies L. Yes. SNT. If they had control do you think they would confine the grant to thoroughbords as it is now confined !-- I am very sure they would not. They would go in for both Hackneys and thoroughbrods.

2073. About Belian are they great breeders of harness bornes !—They breed a good many thoroughhead in the countr of Autrice

8579. And I think, you said you had seen the produce of Haddneys in the different shows of the North-East and North-West L. You. 8580. And have they hold their own in the show ring!-Yes, very favourably against the thorough-

8581. Practically you have hardly any thoroughbred horses in Londonderry t-Very few. not get off a thoromeblend horse the same hope and enlistance as off a backney unless with a cart mare 8582. It is not a broater-breeding district at all t-

8583. Any ligges that come there come from the South !- Yes; a good many are bought in the South and fed and sold at Mov. 8584. And most of the houses out of that west of or on, and most or the news out or take part or the country are sold to go to Espland and Scotland, and not to other parts of Ireland 1—Very few. A good many go Daklin way. Tou Milahou, of Cashibitayary, attends the Moy regularly and hurs a

lot of horses ; but he sells them shiefly in England. 8585. A let of because that are above in Moy come from the South and are fed in the Korth I... Yet a let of farmers make a teads of going to the South of Ireland and buying borees and then bringing them to the North and afterwards selling them in Moy fair. It is the best market in the North of Ireland : it is the only really good house fair we have in the North of Ireland. We have had sorred fairs in Dayre anyeal

Ireland. We nove man server; nurs in avery, amount or quarterly fairs, but they have greatly died away. I account for that by the dealing meageing into the farms and buying any good colis that are at home, they never me a fair at all.

\$586. The Chairman.—You said you won prices with a half-bred Hackbory in some above in the North; in what shows did you exhibit him !- Three-year-old geblings or fillies-the price was for the best stiding or filly likely to make a bunter. would try to breed hunters from half-bred Hackneys with that. Let me choose my mare and I will take a Hackney stallion, and I will breed you a hunter that there will be no day too long for.

8588. Mr. Weener,—What kind of mare !—A mond these courter-head years 8589. You would require a good deal of thorough bred blood in the mare !- No, a good three-quarier have a mare that I am breeding from and I said Hebe weight hunters from her by a Hockney, a very mod more, gallers long and low

8500. Von don't think there is any noft blood in Hackness ! -- Any person who says that liackness are soft really does not know them. I can drive a Hack-noy pony for forty and lifty miles and never lift a whip, and travel six to eight Irish miles up hear

8591. Do you know how those animals are bred!— Yes, they are half-bred. I have bred some myself and bought some. I know their breeding perfectly 8592. Col. St. Quintum.—What class of horses is it that is renerally brought from the South and taken to

the North-riding horses or draught horses 1-Riding 8323. Which sells best in Moy fair, those that come from the Scuth, or those that are herd in the North t ...In one season of the year there is a demand for the

\$594. But as to price !-- I have seen half-bred Hackney horses to make £80, £90, and £100. 8095. Yes, and I deresay you have also known a hunter to make £80 or £101-I have known them to

8506. Do you know that the demand for harness -I would say the demand for harness horses would

be double the demand for hunters. \$597. But that is not an answer to my question? ... The demand for the commonplace harnest borse is net so good, or the price so good. 8598. It has greatly decreased in the last two or three years ... Yes. I one account for that

8000. We can all account for that—how do you account for it is—Owing to the introduction of electric trams and biryoles there is not such a demand for 8000. Has the higher class hunter and siding borse kept his price !-- Yes, and so has the high class harpen horse.

8601. Do you think the breeding of the moderate harness been is likely to be a cond industry in the 8002. I mean with them electric cars and hirreles. with the less demand there is, do you think the good riding horse will keep his price in the foreign market as well or the World's service to I believe be will

8603. Are the freeignes as less for him!-I bolieve they are. Sint. Are they as leven for the harvess horse!-Yes; they are very keen for a really good harness

sources.

\$105. Can you breed a really high class horness home in the North 1—We can.

\$500. Then why can you not breed a high class hunter [—We don't go in for hunters, and have not the mares exactly 5007. Because the Frodish dealers tell on that their best hish class harmes horses are all hred by thorough-

bred horsest-The dealers don't really know how they are bred. 8108. Well, they know their own business !-- They do, of course,

8609. And they say they cannot buy high class harness houses in Yorkshire and Lincolnshire as they used to and have to come to Ireland for them!-There is a prejudice against the Hackney horse I know . by especially the South of Ireland people. we have had southern judges coming north.

8610. Putting the prejudice saids, it is a matter of really and truly what pays test |- I don't see if I

shoose to breed off a Hackney there should be any plaction by anybody. I have a right to breed what 2611. Nobody says you should not !- According to the Royal Dublin Society we should not have a

\$612. Well, herse-broading is the industry of this Is it not! -- Horney cattle is just us gross an indicately as breeding horses to an extent, if you

\$613. In it not a large industry !-- Yes. 8614. All you want to do is to preserve it in its hishest form !- Yes, but by keeping out the Hackney

I am not saving that !- That is what the Royal Dublin Society is eventually wanting to do. fect, that the dealers wise have objected to these fact, that the manner of the large part of the large of the large part of the large not; I have known Hothecasi, an English buyer, to

give a long price for Hankneys 8617. He knew them to be bred off Hackneys !--\$518. If a house has good action in the Mor fair

does a dealer stop to ask how he is head !-- He will never stop to ask what he is by. 8519. Is not the breading of very high class horses in the hands of a very few men !—It is very few can afford to breed high class horses.

8820. And the meet of the industry is in the hands of small farmers !- They don't want to bring those to meturity, and if they breed a small class of home with action it is the one thing that will help them to

8021. CHARMAN.—You are an auctioncer!—Yes. 8022. And you know a good deal about buying and selling borses !- A little. 8523. And you know that a great many high-cless

harness horses are bought and sold in May fair!-8594. Do you know who the chief buyers are 1-I know English buyers, Hothersell and Vanderlyn and there are several buyers from Belfist

8525. Are there any foreign buyers !- A lot of foreign buyers. At the last May Edr there were three from Switserland.

cannot say I did; it is only conscionally I go to the May fair, 8627. You never heard of Mr. East or Mr. Wanbush haying many borses there !-- I cannot say

9123. You don't know the name!-I cannot say

8629, Supposing large bayers like East and Winhush were to say they distinct the Hackney cross in harness horses, and preferred the thorough hred cross, would you agree with them !- I cannot say I would agree with thom. In a harness herse I 8130. They won't buy without action !-- You

cannot always get action from a thoroughbred horse; of course you would get it to a certain extent, but not to the extent of the Hackney. 8331. You heard of the feeding system in the North of Ireland 1—Yra. 8632. Where do most of the horses come from that are fed !-A number are bought in the district, and

at Ballinaslos and fairs in the south. 8553. Don't most of them come from the south !-A good number. 8134. The chief number 1-Yes; but there is a lot bought at home

9135. Of a high class !- Yes. 8636. Do you think the horses beed in the north fotch as high prices us the horses from the south that ere sold in Moy to Mesara. East and Wimbash !-Yes; and some of them, I deressy, would fatch more

6437. But, as a graced rule, which fetches the higher price i—I suppose there are more horses come from the south to Moy thun from the immediate morth, because they go in more for horse-beseding, I think, in the south than in the neeth of Ireland. 8138. Mr. Warner.....Do you know that Meson.

East only buy elect 350 horses in Ireland in the 8639. CHARMAS.—Is there snything else you wish to state to the Commission 1—No; unless to

improve on them the desirability of getting the stallions registered, so that they will be sound sires. not letting a lot of rubbish of unsound heres going to travel a district or country. had lost bone, they had not got us much bone as the

den, and what action they had is acratchy know action—so hind action; they had entirely lost that. \$648. What class of borse do you think the country

is less mismisted to breed !- As distinct from Connemace. I think the county Galway is well swited to

hunters : it is decidedly a hunter breeding county : of

course Connemara is absolutely distinct; it is only a

youy breeding district, mountain and bog. 8540. Do you think there are suitable stallions in the county i A few; we want more; the prices are

Mr. THOMAS CRADDOCK, Somerset, Baltinasloo. the mores as well as the stock, in nearly all cases they

the county of Galway !- Yes. 8641. And are you acquainted with home-breeding there and in the rest of Ireland !- I am acquainted with home-breeding in Galvey and King's county, not very much in other parts of Ireland, except what I have seen in abows.

8642. What class of bornes are bred in you immediate neighbourhood !-- Hunters principally, and a very had alass of nondescript wretch; I slow's know what purpose he is wanted for or what purpose they

put him to. 8543. There is a large fair held at Bullimatics t-8544. Where do the horses come from to that fair! -They come from all over Ireland, King's county, Boscommon, Galwey, North Tripperary, and from all

8545. Are you acquainted with the extreme west of Galway !—Yes; I lived in Connemara and lived in

the Island of Achill for years.

8645. Have you had an opportunity of obserying the effects of the Congested Districts Board Scheme in that country !-- Vor, in Mayo. 8647. To what conclusion did you come with regard frees foals up to 3g, I think the Haskung cross is decidedly a failure. In those cases where I could see

too prohibitive; there is no good sire in Galway standing at less than £3, and the best is £4, which is absolutely prohibitive to the farmer of £75 valua-tion, and he forms the largest number. 8650. What breed of stallions would you advise should be used 1-Smitable theroughbred stallions, and if there is such a thing to be got a good hunter sire ne typical borns of three, or, if possible, four distinct ercess of blood; a typical 14 stress blood hunter I should like to see. I have only known a few and they have all been exceptionally good. I recoilect in Leicestershire, when I was a young man, a horse that was ridden at Malton eleven sources, "Geribaldi," belonging to Mr. Gilmour, who got very good hunters; to that scheme !- From the stock I saw from all ages and there is a good horse, safe to got hunters, now standing in Tipperary, "Reliable," he was in the

Hr. Thomas Onddoor.

bred; he is a good 14 stone blood harder, I have been a sea of the force by hear; I have been a sea of the force by hear; I have been a sea of the force has been a sea of the force has a sea of the force of the fo

nome causes. "Lammer coll," And he got wavy possistock, indeed I atcord any three is more passi-scale, going out of the country of Galway by "Thrandertol," or descended from him than any other throughland, 8661. They there sine and bone and quality !—Ver. 8662. He has the Royal Doblin Security asknown had any been fixed a classification of the contraction of the box adversaria who has much benedicial effect in

any beneficial client in your district,—I don't think the last solution has had as much licentifial select as the previous one, that is the scheme that gives free and the many farmers anglets to part belt graves and and to many farmers anglets to part belter masses as a throughburch here at all; they bring them must be shown, and your given a print to the foll and fluid it is needly all. The whole thing, as for as the country of charge is conserved, it the print they can get bring give move thought it is former must to the would give 20 that would be formers with a valuation.

between £15 and £200. 8563. At what fee did "Thunderbolt" serve at 1— At various fees; the nominal fee is £1, but you can male your own baryain.

566. You don't know what "Reliable " in serving at 1—No. I don't.

6656. Here you may suggestions to make to the Commission with a view to halping the ministry of horse-brooding 1—Well, if funds would advert of it in Galway—saw of Galway mad Kingle commy—I think we require masses as much as we do anything she. I think it would be quite feasible to work such a scheme

if the money were furnheaming.

1800. What sentents—I think you could give 1800. What sentents—I think you could give 1800 or 280. The could be the country of the country

as once. Here you may further engagesian to make a the Commission—from their g. Houself like to may it shes—that I think in relating stallings for half was present to the commission—from the stall the commission of the commissio

8600. I think you said you would like to have what you call a hunter hard sire!—Yos, with as many crosses of hood as possible. I don't think you can get them with more than three to start with. 8001. You would object to having Hackneys placed in your district!—From what I have seen of their

8.61. You would object to having Hackerps placed in your district 5—From what I have seen of their gets I certainly would.

8692. Lord. Amyrows.—You say you would not register any size except he stood at a moderate fast.—

No. I dear't see what tensiti the country gets.

8683. But what would you call a moderate feel24 for frames with a valeation not exceeding 500,

8684. If you did that you would have to subsidise
the stallon owner!—Of you of course.

the stallion owner i-Oh yes, of course.

S085. I thought you meant without a subsidy iOh no, I was looking on them as being Government

Siries Siries of system of nominations, the owner to get as much and the famour to pay the rest!—That is the best because it does not interfere with niviale

enforcem.

8037 Colonal S7, QUINTIN —We have been told that
the work of the Congented Destricts Econd in to been
fat the small farmer—do you think the small farmer
is capable of expressing a good opinion as to what the
real requirements of former breeding are 1—Net the
least in the world; he would not know one horse
from mathem-of begin with he would slowly

from methor—to begin with he would always take the checopys, and if any one of least infrazons sold him to go to a certain horse he would go irrespective of whether he is good or tho. 5640. Do you know what the feelings of the heapchas of framors and gentlemen in this district are i— With regard to the Hochiney blood you mean! 6049 With regard to the Hochiney blood you mean?

and the condition of breeding generally in the country!—The feeling emongs in the larger former underheedly as in Gavaer of thoroughlaced brees to be given them as a seal for e-than is what they all the given them as a seal for e-than is what they all the given them as a seal for e-than is what they all the given the seal of the seal of the seal of the tens to them, they think that the constitute of the Dablin Society means that the scallifect owner give something out of it, it is only the larger formers and the gradients who are getting the breath.

is 46% Mer. La Tuttian.—You were asying from your engineers of the scale of the Interpret into a Hardway in the Hardway in the Hardway in the Hardway in the Hardway had been ruber to destripents the heard of the been things to Chemishy not be increased them; and the place of the term of the term of the hardway in the heard of the hardway in the heard of the hardway in the heardway in the heardwa

stokie bosks. \$671 You are laying great stress on the necessity of good bone, do you think the conformation of the Hackery generally, as far as his neck and shoulders go, is likely to improve the shoulders—Gersinity pat, I case rode one as a hack and I hope I won't

go, is likely to Emprove the shoulders !--Certainly not, I come rode one as a hack and I loope I won't have to repeat the does. 6673. You don't think his shoulders are riding shoulders !--Certainly not. 8673 Mr Wenters.--Ten say you lived in Achillit

h 8574. How long !-- I was there in 1883-90 for one
by year.
i, 8575 Did you also live in Connemars !-- Yes.
s, 8575 What part !-- At Leenane on Killery Bay.
that went the wear before.

18 3018 May be also five in Commence on Killery Bay, that was the year before.

8571. You want there for according purposes, not fee horse-breeding purposes 1—That is so.

8578. And I think you visited Beltenilet and Achill recently for the Heres-breeding Association 4.

Yes

\$679. With Mr. O'Donnell !--Yes, to Achill, but not to Belannilet, I had a local men there. such How long did your visit take there t ... I was there a work.

\$581. Going through the district !-- Yes. 8683. And what class of stallion do you recommend are Belgrallet !- A nice active thoroughbeed horse, when he had been in the country one year I would

the in the term in the country one year I would the to select the best of his stock to serve again in the country. I think the characteristics of the pony are so strong, they have gone on for generations with her ent-rosses, that with at least one or two inercases of fresh klood they could keep up the type. ### 2555. Did you see say of the native stallions there!

-Yes, two; "Erris Chief" and Gallaghar's horse.

8654. That is near Newport!—No, there are two

Dallaghers, one in Achill and also one near Belmullet to Einghamstown. 8685. I think you said you would approve of hunter aires !- Yes. Side. If you wanted to key half a dozan hunter sizes at the present moment where would you find

then 1-That is one of the greatest difficulties; I saw one in that district, but I am afraid he is no longer a bunter sire, I saw a typical sire in Ballina. higher sire, I may a typical and 1-Yes, but they can he frand : they so over to England now and smain have brown there or fore and to Forland and

rickies in Lefcestepshop. 8688. Talking of the young stock I suppose you know the best are sold and the worst left as rule !--No, I don't think so, I saw one cob as a three and a half year old now for which £10 was refused as a fool. 5659. That may have been a good foal !-- It must have been. It was one you gave a prize to as a feal and as a yearling; but the man said he would like to take #10 for it now if he could get it, that was in Newport.

8190. When you talk of large farmers in the

congested districts, are there many !- I would not say there were any large farmers in the congested districts at all. 8011. And very few gentry 5—Very few. 8015. Would you register the breater sire before you tested him as to his stock !---Yes, because I think you would have to wait so long 8693. You would register the hunter size with how

many crosses of thoroughbred blood 1-Not less than three four world be better but I don't think you would get them with four : it would only mean that a pedigree would be manufactured to suit the market: three is not very far to go lank.

8094. You would be inclined to give out mares to the farmers !-- Yes: I think probably only a few menting in Tradard would recover these

\$695. In those counties that would require them \$ -Ye \$896. Would you give these horses out as two-year old dillen or aged mares !-- I would sooner have aged

8697. Have you heard it suggested that two-yearold fillin should be bought from the army and given out for two years to the farmers and taken back Again 1-In the hands of the farmers that taken need

too young to breed from-I think they would require too much feeding.

able for the stock for a certain number of years and procluce the mares every your. \$100. Mr. La Touche. Do you know anything of what becomes of the feals sold from Connessara !-They mostly go through the country in droves ; the

aged mares t-Yes, with certain restrictions.

Comessars posites principally go from that part of Galway and the corner of Ruscommon into King's county and South Tipperary, and the Belmoiles coies mostly go through the North of Slige and into the North

8701. Do many of the ponies from Commenca-stay in East Galway!—Yes; they go through the country and overybody gets a pick, there are about fifty bought in Galway every year. 6702. Are they only sold for breeding purposes !--No. they are penerally sold again when four year old, No, they are generated and all the property of the Ballimathe and the Coll. For a member of the Ballimathe Agricultural Society P. Co.

2104. Is that open to residents all over the county

of Galway !- It is now, but it was not until last year, It did not take in Commune up to last year. 8705. Did you pass a resolution there in reference to the introduction of the Hackmay blood into the we see recreations of the Effecting blood into the congented districts in "Fys., we did.

8707. Unfavourship to it in "Unfavourship to it.
8707. Was that passed after Counsenava was included in it in "No, before.

8703. Commence was not represented then !-- No. it was not: it would be difficult to our anchody to egresent it at any time 8709. Was it the bollef them of this Association would do have to the district in which they were executed or was it out of regard to Connecessa !-No, because you cannot shut out the leved; if they are used in Comments or anywhere end in Franch they won't remain in it: they are just as likely to be found in Meath or in any other county; the steel

bred in any county is not kept there. 8710. Then it was out of regard to the general horse-breeding of Irritard you peased this resolution? —Certainly. I think there is a general feeling that the second or third cross from the Hackney would do races haven then the fleet. 8711. CHARRYAN Is there envilose further you wish to state !- No, I think not. STIR Mr. La Torone.-It would be impossible for private enterprise to supply such stallions as you think are required at fees the farmers are able to pay ?

-Evactly : we have an aveilfent size standing in my Immediate neighbourhood—Ballinafad—and he down to get enough mares to make him pay 8713. Mr. Wannen -Is that Col. Hiske's horse b It was bred by his brother, Mr. Joe Highe. \$714. Have rou sees any of the stock sold up here by Ballinafed out of Commune posics !- No.

8716. Do you know that they nod a sale, and they went at £3 a head 1-No. I don't think they could be

8716. Col. Plake said they were t-I den't think he has been into a neary breeding district.

Mr. WHITAM PARTY, v.a. Athenevan Ladeo, Kildare,

8717. CHARRIST.-You live in the County Kildars, and are largely interested in the horse-breed-ing industry, I believe !—Yes.

6715. You also are a Fellow of the Boyal College of Veteriaary Surgeons t—Yes. 5719. And you have purchased horses for the Government t—Yes, very largely. 8720. Under what scheme was that 1-I was Sprinted on the Province Commission when we were buying horses during the Russian source in 1878, when

unber of horses for the Government. stallions also. This is the list of the stallions that

the Government required a large wamber of horses Mr. Wittee 5721. You have imported stallions, and have bred borses for a great many years !- For thirty years. I have brought a list of the stallions here, which I should like each of the Commissioners to see, a list of the stalliess that have been imported by me into Ireland.

Jan. 6, LIST. de William

have been imported and used in my stud. I think peorly fifty. 8723. A great many of these borses were leased out, I suppose !-- Some were leased and some were

seld; some which I have seld to go abroad have stood in the country as well. I lease a number of borses an ann country as well. I rease a number of borses each year, as well as using a good many borses at my own stud. At present I have eight stallions at the

8724. Do many of the smaller formers of your dis-triet breed horses, and of what class 1—In Kirlare the farmers breed principally hunters and utility borses. 8725. What stamp of mare do they assally keep

for breeding purposes 1—Do you refer to Kildare 1 8726. Yes; your own district 1—Principally halfbred mores; moves got by a thoroughbred horse out of the usual half-brud eccamon mare, generally with one gross of thoroughbred.

8727. In your oninion have brood mares deteriorated of late years or not !-- I consider the brood mares quite as good as they have been for years past 8758. Just now you said you had eight stallious. Are the eight you keep included in this list !-- They

Are the eight you also, are instanced in this list.

8729. Would you mind telling us which they are 1— Perhaps you would mark them on the list; you can then send the parner !-- I have imported even some eithers, which are not marked bern. These ones marked

are the stallions I have at present. 8710, Would you read out the names !-- Branz-holms, " "Master Nod," "Astrologis," " Holtherry," "Favorius," "Witemas," "Beentos," and also an Irish pony stellion k use nea teaser. "Branzholme" is a home that has had four Queen's premiums, and has a horne that has had four Queen's premiuss, and has stood in a great rouny districts, and has done a great deal of good indeed. The year marked on the list is the year in which I brought each horse over. 8731. Ostable the stalling you mantion here, is there a sufficient number of suitable stallings in the district, standing at fees within the reach of the smaller farmers in I consider that in Kildare we are well surplied with stallions, but I think of course those districts where stallians are not sufficient in the principal thing to look to. For Kildare, and Dablin, and Cork, and Carlew, and Linerisk, and these phone

I think the present supply of stallions is very good indeed; very fair. 8732. You are well acquainted with a great mee parts of Ireland I.-All over Ireland I have had horses. Last year I had one in Mellow, in the remny Cock, one in Galway, one in Waterfurd, another at the Compton stad in England, and five at home.

8733. So that you are pertty well acquaintal with 5755. So that you are parity well acquainted with the resultry !— Each year I hire in different districts— Wexford, Waterford, Wickley, different places those boroes go to. My borses are all registered. 8734. Registered under the Royal Dablin Society scheme!—Xee; I may say that hence suited for one district are not suited for another. Different horses

anit different districts. 8735. Have you made that a stridy in order to gride you when sending out your stallions !- Yes, I tried on far as possible to spit the district. Of course the men that lease bave the selection as they take the men that sense bave his selection as they make them, but I know myself from experience that outsin horses will not soit certain districts, and I recommend horses will not sent certain course, and a recommend there got to have them. I have so present numbers

which I have not done anything with yet. Several which I have not done anything with yet. Several gentlemen breeders have come to take horses from me for the corning season. 8735. Do you think the fees at all prohibitive in any case you are aware of |-In Kildare. 8737. In any part of the country !-Oh, I think

order in any part of the country b--On, I thank yes; in certain parts the farmers are not able to pay a high fee. Of course in Kildare we have rather a rish peacantry, and in Carlow, Meath, and these phases I think they are quite well able to pay for a good heese.

8738. Can you give us any idea of the few tha horses you hire out notally stand at 1-The horses hired out from me usually stand at £4 for what we salled continues's more, and £3 for tenast farmed 8739. Have you attended any of the more shows

mares, some at £5. have, some of them.

8740. Perhaps you could give us some idea of what you saw at some of them !- I am disspeciated with the mare shows, because I do not think the farmers have come forward as much so I expected they would at the mare shows. First of all, I do not think the am entirely an advocate for substantial recent prices to be given for mares at these shows, and unless that is done the farmers won't come forward. For the sake of a single medal or a sovereign they will act to to the treable of bringing a home to shows; and up to this in Kildare—and perhaps we have an good show as most—but from what I can gather, the mare shows have not been as good as they might have been doe

I think, to there not being sufficient inducement.

87sl. Do you think the mates have deteriors
ted at all of late years, that is, among the smaller farmers who are under the scheme of the Road Doblin Society to T think the smaller formers are not breeding so much as they were, while the larger farmers and the men that have places for there narmers and the men that have passes for them are breeding larger. The smaller farmers are not breeding as much as they were, but the larger farmers with good tracts of land find that borns breeding is a remmerative industry, and therefore breed as largely as ever. I think the price for a good here is quito as good as it ever has been in Ireland, and the facilities for selling him far greater than ever it has been. The Royal Dablin Society's Show is one of the largest horse marts in the world, and no doubt has robbed the fairs, such as that held st no doubt has retired the farm, such as that held st Ballination and other places, of a number of herest that used to go there. Now, the Royal Debita Socioty Show has become the head borse mart in Irchard, and all the people who used to go to these fairs keep their horses for the Reyal Dublin Society's Show, where they have a better opportunity for selling and a better opportunity of getting them bought; buyers and sollers have a better opportunity for testing them than at the fairs, and no doubt that is one of the greatest benefits, to dispose of our learne-

diste industry there. 8742. You have board it stated that the sound rear are picked up by dealers in the country and unusual cure left behind h. There is a sectain amount of troib in that. A mee'v farmer, if he has a very good mare, is tempted to rell it, undoubtedly, but at the same time I know that in Klicker the tenant farmers

Those that can afford to keep them always dothe poceer districts, of course, the mares are sold, no doubt, because if a poor farmer has a good mare he is tempted to meet the half-year's rent by selling the good mare; perhaps one that is infirm, with a cush or a spayin, and may be an own sinter; he sells the one that brings him in the money. I do not think there is any possible remedy to prevent a man from disposing of them, because it is human mature after They want the meney and dispose of the horse. You cannot hind a man to keep these mares of applications for the certing season for my horses

are very very slow to part with their good mares.

8743. Money is at the bottom of it, you think!— That is the truth of it. The only way you can co-courage them is by applying them with a sire to breed from these mares, and provided you can supply them with a sire at a price that is within their resolu-it will be the means of causing them to rotain their meres to beend from. If a man has a good mare, and he knows he can got the service of a really good heroe for a pound, he will be more inclined to keep her and avail himself of the benefits of this boom than otherwise, and in the same way the planing of this borse, a good horse, within the reach of this man

bunters. There are several others in Wexford, "Young Jan. J, 1907. M. William Palife Sa.

will be the means, of course, of spreading out the will be one seems, or course, or spreading out the benefits of the borse in the district. I am greatly stood we can deal very little with the insuressented attact we can deal very more with too improvement of the marcs. It is a very difficult thing to do. and at te purchasing marcs, I am afraid it is far too wide a thire to come within the scope of any Cournission. Tower to any it would be a very, very difficult thing I mean to say it would be a very, very difficult thing to do. It would cause endless trouble, expense, and isology in the end, probably, in the distribution of paren. I think to give them bersen to breed from that are of a high class, unproving the class of houses. would be the strongest moure to indees the farmer to keep his good mares to breed from them in the

contry.

1144. You know the present scheme of the Royal
Pathia Society - Wall, the present scheme of the Baral Dublin Society 6115. Task you this openion now because I want to ask you another following upon at 1-All my borners

5740. As regards the marca i—The present scheme of giving prince for the produce of these marce is a 5747 Well, now are you aware that under the

mucht achene there are prizes for two-year-old mares that have been stinted to respetered sizes !-- I am quite aware of that.

8748. Also prizes to three-year-old mares with foal at feet by registered stallions I-Yes 8749. Do you think that would have any tenders to present regard mares leaving the country h... I think

that way would keep the mares in the country A dealer penerally bury at three or four several of those mores in any district which have been they have bred a foal, they will have quite answered the object of the Royal Dublin Sourty, xamely, to give the furner an opportunity of beceding a foal from a good mare, and afterwards selling it are four

5751 If she bred a road one it misbs have a indecay to prevent bim rolling it !- Quite so; I think it is a wise provision on the part of the Reval Dublia Society, inducing them to breed from marra of that chass, and shove all, to induce these to bread

fron reares that have been passed sound 8702. Of course that is the parears of their scheme? -Yes, that is one of the main points 5753. With regard to half-bred stallions, what as

the origina in compression u isl, them t. Mr orderen it corpection with half-layed stellions has generaled ever a great many pears. I may state in the first stalling, I think it would be unvise to regeter halfend of the weige would be got in, on registering these horses you would find that unsuitable half-freed stalling, and become unfit to be registered would be registered. At the same time I am outo sure we bare had a nerober of half-bred stallions in Ireland in the nast, that have done on endine amount of mod Lord man some of them; there was a horse called "Harksway" in Carlow which I would say has more son and doughters serving in the army than any Oher harse that ever stood at the stud. all good second horses; he was a half-tred horse by "Geogral" by "Red Heart, "out of a mare which was af a famous breed called "Champions," cleanlegged Irish horses with beantiful heads and nacks. and shoulders. They have courage for a hunter, can feet eight or nine miles are hour, and draw 20 owt. traier a cast. They were specially in the district short Trillow. The cross of these because with a

thereoglibred has produced some of the very best

Elvis," out of a half-bred mare by "Old Elvis," a Myis," out of a nan-creat more by "Out Elves, a very famous Whalebone borns, which got most excallent beron. There are many ball-bred horose cellent becom. There are many tomous through Ireland at penerat that are doing wonderful stervice, and are lakely to do so. Of course we could elses "Mayboy" under the head of half-beed bornes. but he is a long way from it. He investive thereone, bred horse. I at present have a very good bunner tedend, got by a horse, "Young Selin," a son of indeed, got by a horse, "Young Selin," a son of "Selin," out of a next mare, out of a common mare, that is, by a thoroughbred horse. Mr La Topcia knows him; that gray borne I vide. He is a wonderfully good horse, and a good stayer, the produce of a balf-bred mare. I am quite sure a geori half-bred horse of that cluss would do very much more good in the districts where they want to breed the utility borse in the composted districts than any other horse. except, of course, a thoroughband horse

8754 Have you any experience as to the breeding of bunters from Communica ponies!—I have very large apportunce. I consider some of the best lanters I have seen bave been bred from pure-bool Countemara ponies with a thoroughbred horse. I am at present riding a horse which I have ridden for the last three seasons, "Bog of Allen" He can two years at Punchastown, he is out of a youy that was bought out of a drove from Connecess, and by Favo They have all the gift and the bardihood of the Connerates pony, with the quality and courage of the theconglined horse. They are particularly sound. I know no animal so free from disease as the Conneit has a tendency to keep the mares in the country; I decidedly think any encouragement you can give in mara pony, and they consequently have a tendency to stengthen any deliency the thoroughbord horse may have. I know many instances where very femous bunters have been fred direct from Counmara ponios themselves, or from their descendants in the first or second generation. I know also a very excellent bunter, a wenderful hunter, which was cot by a thoroughlord borse by "Radorroch," out of a

by a threcognosed torus ny "Encorrect," set of a mance, designiture of a Communica porty, 5735, Colonel Sr. Quinvey,—What sine is this borse you speak of 1—"Bog of Allen" won a race carrying 14 stone; he is 14 3 bands bigh 8556. CHAPMAN .- You may have heard it stated here in evidence, with regred to the bone of the Clydaudala and the bene of the thoroughbred, that the bone of the Clydesciale was as good as that of the thoroughbred horse. What is your experience !- The gentleman that said it had never seen it no doubt, but I can tell you selemifically that the bone of the Clydesdale borse is percen, the other is dense, and the delicence m weight a very nearly a quarter more.

so much !-- Very mearly; it is not quite a quarter, has vary nearly the tissue in the thoroughbred is so very much denser and very much stronger. That of and to have love extraorth, and not to waith mear as 8758. That applies not only to the Civdesdale !-

To any of those other mongrel-well soft-broods. It is not the same with the deer; the bone of the deer to very small, and yet it is very dense; it is

8719. CRA-RMAN.-I believe the bone of the fox is very close. As thick as ivery !-- Yes, he re-

8760 I take it from what you say Mr. Pallin, that you would not have any objection to using ball-bred norses, provided there was some method of keeping unsound burses and wrong ones out-I would approve of the use of certain half-level sires in rectain districts, but I would not register them, became I think at would be a dangerous exper-ment. You would find nitrately that we would register house that would not be half-breds at all. I

Mr. William

mean they would be monorols in the end. same time I should approve of good selected balf-bred sires being sunt to those districts where they need size and strength, and that these beens should be

878). How would you select them !- By a comhands of the Royal Dublin Society we are safe; and

they have done so much for horse-breeding already I are quite sure under their committee we would be safe in their selection.

5762. You were going to say something about the registration i-Of course, registration has really been on: of the most effective checks to diseased horses in the country. It has been a great help to housebrood one country. At has been a great help to neces-breed-ing endoubledly; yet I would not wish to say anything about registration of horses in the past, became thousing I am quite sere no trouble or pains has been spared by the contenan who has carried it out, and it has been done with every care in avery possible way, yet at the same time I think that the registration sch to have the beneficial effect it should have, should be carried out in a different way from the present. should be carried out by a committee appointed by the Royal Dullin Society, that committee to meet in certain large piscos like Limerick, Waterford, Pel-fact, and those piscos, and a horse should be submitted to them for their approval. I would go so far as to say that the owners of horses should be allowed outsin travelling fare to present them to the committee, and this committee should see these horses and approve of them; and, if they approve of them, they should then be examined by one or two veteri many surgeons, not local men, but men associated by the Royal Dablin Society; and then they should be registered, and that registration should entitle them to stand in the country. Of course the present regio tration has been carried out with a great deal of ears and judgment, indeed, by the Royal Dublin Society, and has done endless good, because it has

pointed out to local people the sound and unsound orses in the country 8763. You may have bessel it munificated here by certain witnesses that they would prefer to have stallions licensed !-- I do not think it is resultio. I think the licensing will comist in properly registered horses. It will be quite sufficient if horses are proerly resistered by the committee of the Royal Dublin Society appointed annually. I think it would be sufficient licence. I think it would be a would be sufficient fiction. I think it would be a very difficult thing to group, and almost impossible, You should pose an Act of Parliament to stop people from covering mares with a house that was not floorand; just the same as you do with a public-house or anything else. Valees you bring it under house or anything else. Unless you bring it under the law, that nobody shall have an unlicensed stallice, the same as he could not have a public-house, you could not do it. With the present system of regis twitce extended and well done, it will ultimately prevent the men who have unscand stallions from and we had syveral Irish breeders there looking out When they saw a bers they came to for stallions. for stallions. When they saw a neess they : me and said: "Will this horse be registered?" do not buy any horses that works not be recistared showing that the registration system has done good already. We will find the unsumai boyes dying out. There are many unsound homes that are not on the register, and are getting very good horses, and they will be employed. I know two reacters at present who are breeding very well, and people go and breed from them. They are not registered; but men are able to

sell their produce, and they go on breeding from 8764. On the matter of wind, do you think there is anything in it—that if a borns leaves the tarf cound and eventually turns into a rearer, would you take

point. There is rearing from accident and resting from hereditory tendency. If you have an accidental There is rearing from accident and recine from hereditory consumey. It you nove an acceptable roarer, as many stallions I know have gone, results rearer, as many stations 2 know have gone, reachly they will get sound stock; if hereditary, it invariably follows their produce if they eatch a disease—they become roarers. At the same time it very chies happens that berne that have left the tarf sond with a family thint or a hereditary pre-disposition to roaring, when they are put to the stud they become in two or three years, rank roovers thoroughyo sincle from the family taint. These horses would have all the distributions of producing running stock, while a sound family who gets a severe attack of percencels. and becomes a rosser during his stud life-that horse

will probably never get a rearer.

8765. Conformation has a good deal to do with it? -Yes, and the hereditary taint. We have certain lines of family in the stud book that are tained with roseing, the same as converention or any other disease in the luman subject, and whenever they get the slightest exciting cause, strangles, pacuments, or pulmonary discuss, these develop themselves. 8765. Although their formation may be against it!

—Although their formation may be against it; but

most reasons have a formation tending towards it. 8767. Mr. Frygwillian .- I did not exactly gather your ideas as to the class of stallion you ecommend for general purposes of breeding in Ireland. Firstly, I understood you to say you preferred the thoroughbeed 1—I consider there are only two classes of horses you can breed in Ireland, or rather the tenant farmer can breed. In my remarks I refer porticularly to the tenant farmers. The two classes lunters and utility horses. In breeding hunters it is, as far as possible, necessary they should be got by thoroughbred horses. When I say thoroughbred I do not mean weeds, which the country is full of. I mean a sound, about legged, true made, thereughbed second class, the utility horse, are becaus sold for tecopers, carriage becaus, or general purposes, and those can be bred very aucoestably from hali-bred hornes. By a half-broof horne I mean a horne set by a thoroughbred herse out of a cart mare. The best claus of eart mares are clean-legged Irish mare. There is no doubt we had a breed of care horse before the introduction of the Clydrodale; or before the country was poisoned by other breeds coming in, we had a broad of over houses in Trained-no distinction breed, but an enlarged Connemars pony. Almost every county in Ireland bad its own appears breed of cart horse according to the requirements. If it was an agricultural country they were of a howeier class on other lands they were of a lighter class, and little in the same way it has gone down along till you come to the Wast of Ireland and Connemara, where the peny steelf has gone down there. I might refer to a breed of horses which were in Carlow salied Kepple horses, they were called the Birds, they were originally the descendants of an old blind station in Carlow, a son of Eird-entcher. They were crossed with these clean-lagged more, and produced some of the very best quility horses we had in the country horses that can plengle, go in harness, or do anything A loose number of these become most into the sense

and were first-rate troopers; they had size, boos, and were quick, sinery borren.
S168. The groundwork of their blood was
thoroughbred 1—Ob, yes, the tap root was Eird-\$769. In your opinion could the required class of half-bred stallion be promised now !-- You; I think at the present time you could not set quite the actual class coming from that clean-lapped draught been but there is no doubt that half-bred house, good that as hereditary, and likely to pass down to his produce!—The point of roaring is a very difficult hunting horses could be picked up, horses with sur and that were good hunters themselves and with hone, they could be bought and sent to districts where size and bone is needed. 8779. You told me about the mures, should you pentries the service where there are unbeidied or registered stallions to good or sound mares, or should you allow any mare to go !—I should make every care that claimed a subscription to a subsidised stallion produce a certificate of scenyfacus from some entering surgeon that she was free from hereditary disease. It could be very easily done, and it would

be a pretection to the home, as well as to the men 8771. Do you think that breeding from a two war old in any year demonts her in after-life !--- ! think it prevents their growth for the time being. It

growth to a certain extent for a year, but if they do not continue to brend from her she possibly pulls in up again as soon as the strain on the system is taken. 8773. So that, on the whole, you would not advo-cate breeding from a two-year-old 1—No.

5773 Not one foal from a two year-old !-- No : I have seen some very good effects from it, but I think it detracts. I should not breed from them till they are three year old. 8774. On the matter of those Hackney stallions which have been introduced within the last few years have you seen a good deal of them !- Yes : I and the pleasure of seeing last weak the Congested

Districts Board stallions and going over them. Pre-vises to that, I was down in Koussere in May, 1895, and now a house there that was need by the Board I went to see him specially, and I think he was perhaps one of the greatest brutes I over saw. Of course he had gone through a very heavy season, had covered perhaps nearly a hundred marcs, and there were only the two ends of him left. The bond and neck and tail and constant were there but there wan no centre pince, and he looked like the horse King William rides in College Green. I have a lotter here I wrote to Captain Taylor, of Kenmare, some bine ago. It touches on the point about which Mr. Fitzwilliam has solved me. I wanted to find out about these horses, and I wrote to him. This is

"The young Hackney horser here are not a had lot to look at, but, of course, I mean this comparatively, as for years we had nothing but the very worst type of stallions in this part. In fact I think some law should be passed prohibiting such horsen entaminating the blood of any of our old source that see left. The feals of the Hackness must be looked on see left. The roast of the grantesy stars or roases on as better than the offspring of the local stallions I alleds to, but I feel sure that if a thoroughbred stood here the foals would be infinitely better. Everyour who knows saything of horses can testify to the staying powers of thosesujabreds. There are great differences of opinion as to the staying power of Hackneys. I am of the same opinion as one of the gentlemen examined lately in Dublin that the Suroughbeed can do anything the Hackney can do; but I can go further, the acreer can do what the latter cannot, therefore why spoll the true blood that

eranch be questioned by importing here horses that a scroun question asies as to their staying powers." 8775. That is from Osquain Taylor, a level man b I wanted to find out about the produce of that horse

8776. What district is that 1-Kenmare ; I saw the bornes at the Congested Districts Board and last week, and was greatly struck with the secoliest management and beautiful arrangements, and the horses thanselves seemed, I thought, a very good olass of bones, a fair class, very good of sher class and estosilessity eared. In fact I thought it a most perfect establishment, with perfect arrangements, and eweit is due to those connected with it, but, as I mid on leaving, if the same amount of trouble and pains

horses or suitable hurses, it would have done more good than could possibly be done in years. It is not now, but in years to come we have to look at this Hackney breed; the contamination it will bring into overy county in Ireland. It will perceise into every county. As an old breeder of thirty years enperiones I tell you, you have it in evidence that no dealer or henting man will have anything to do with a bores with a Hackney taint if he can got any other sort. b The result is that, as the papers collected by the Horse Breeders' Association tentify, the large horse dealers in England are of our origins, and will ultimately skun the districts where the produce of these horses

lave been. Our bost industry is imperified to the greatest extent, and it is irreparable. That is my opinion. It will percolate beyond the districts where they stand at percents ocyana and deserve where they stand at prevent. They will go into Meath, Corlow, Kiblace and other counties. It is in two or there guarations we will find their artificial action : want of power, want of stancing, and their delicate constitutions coming out in those good horses which

bave made our name famous 8717. You think them Hackney stallions, even though they may be calculated to get good looking bosses in this first generation will do great damage to the greating of the Trials broad of bosses in Surse generations !- Thus in thereaghly my idea; I consider it is not in this generation, but the poison they are producing, and will product, is extending and will extend all over Irainal

8178. Have you seen assolt of the produce of the Board's stallion 1-Yes, several. I leave seen it in England too. I have not seen many of the produce of the Congrested Districts Board's horses, but I layer seen the houses thereselves

8779. Havoyou secu other stallions, Welsh and Barbel -Yes, and I think past to bunting stalling you could not make a better selection than the Welsh card horse. He is a hardy borse, a horse with a constitution, and at the Conrected Districts Beard's stud I asw two or three very good borses, which I think certainly are most saitable to the wants of the smaller farmers in the poorer districts. I had considerable experience on the Purchasing Committee in 1878, in Wales, and we parchased a large number of Welsh horses for ambalance purposes, and now three a large number of these Welsh stallions of which the produce were most excellent. I bought a large number for ambulance work; there legged Welsh lorses; and I am sure these Welsh stellions would be found a most useful bered to cross with our Connersus ponies, because they are sempthing of the same tribe themselves. You know, one of the most mistaken ideas-and it seems to me the idea of the Congarted Districts Board—the here that went to Kensace last year, I saw him hat week; he seems to be a horse about 16.1. The idea seems to be that if you put a sixteen hands became to a twolve hands pony you must breed a home four teen hands high. That is a most fatal idea. The result is you breed herses with the head of a Hackney, which is not handsome, with the body probably of a pony, and the lags of its grandfather or grandmother, That is practically the result.

8780. As to the Arabs and Barbs, have you say sinion !—I have had an Arab for two or three years. I think they are really very useful, and would be very suitable in districts where ponies are wanted. Their hardihood is the great thing,

8781. Would you like to see the Welsh berse and the Arab or Barb introduced into many of these districts !- Yes ; and placed within the reach of these 8782. Amongst Connessura posice too t-Yes; I

should think you could select excellent Barbs that have played polo in the ownery, and that are very aften soid. They would make excellent stallions of placed at the disposal of these people 8783. You put great value on the present prestign

of the Irish brul horse !-- I think we are admitted to Jan. 8 carr. be the best hone-breeding country in the world. We Mr. William Policy You wish to keep it up. If we do we must beed the very The only way to make breeding pay, if we bread harses, dogs, sheep, or snything else, is to bread the very best of its clave. You must not breed anything that will detectorate it. It is exactly the same in breeding Connemara ponies. To improve them will be to produce a horse that will be the best of their own class, which will be the Wolsh horse. You do not want to put them to a thoroughtred stallion, or a cart horse stallion, or any other stallion three times their own size. You immediately get an un-

evenly bred animal. 5784. You think that the loss of the prestige that the Irish beed home ban at the present time would be a great loss to the frish farmer !-- I think it is our

strongest Irish indestry. STSS. You believe that may experiments as regards the introduction of new broads, whatever they might be, might be discouring to the prestige of the Irish here i-I quite agree with you. My idea is that when we have been so successful I do not see why it

should be readered doubtful.

you do not appeare of in districts such as the congested districts would oventoally filter through into other home-brooding districts of Ireland t-I am quite sure they will. I am quite sure the result will be this: the desires won't buy these Hackney horses, and they will ultimately find their way into fairs and horse marte and places; and percente into other parts of the country, to be used by farmers for breeding purposes, and perhaps in sea or diffeen years' time the mistake will be found out.

8767. Lord Assrown,-Do you think half-tred sizes would be wanted in some parts of the country? -Yes ; in connection with the completed sizes, are parts of Iceland where good strong half-level sizes world by the greatest henefit,

should recognise these sires !- You. \$750. Has you would not recrister them 1-I would have them on a register, but would not register these in the same way as a thoroughboud.

8780. Not on the same footing !-- No. 5791. But you would not object to their recepmining these borses in certain districts !- No : I should recommend he should have a licence if he passed the

8792. Or a recognition !- Yes, or a recognition from the Boyal Dublin Society. I reem to say that the danger of registering a helf-bred horse is so great. It w just like betting a half-bred horse into Weatherlyva stral book. Over and over again there are instances of heroes which we know are thoroughbeed borses, like Mayboy, but Westburloys say "No, we extend take these in." We recognize that.

5793. The Royal Dublin Society does not at present register means; don't you think they might give and recognise them in that way 1.—That is the way I would do it. I would give certain selected mares free nominations to these houses, or help them to pay in a certain way. But I would not call a horse fit for registration that had not three distinct crosses of thoroughteed, that was got by a thoroughbred her-e, his dam got by a thoroughtered and her dam, after

that I would not so back. 8794. Colonel Sr. Quirrin.-I wish to sak you about a subject that has been very lightly touched on up to the prosent; a few precious questions, with regard to the production of military become in Ireland. Lord Rathdonnell spoke of re-mounts; you have laid a great deal of experience of government borses, and the government to a certain extent feels itself mixed up in this question of horse-breeding in Ireland. It is to a very small extent, and the question is—I am apeaking of the military department—whether they

could come forward with any scheme that would assisthem in their purchase of military horses. Of course. you have to take into consideration the cost of production, but with regard to the question of Hackney, I should like to know what your idea is as to the first essential point in the conformation of a house from a military point of view b-I have hought five hundred troopers for my regiment, and the first canonical in the formation of every trooper is less shoulders. Without shoulders it is impossible to early a military saddle; it goes over his boad. I have never seen a Hackney yet with abreiders to carry a man; that is an admitted face. On this ground I think Hackneys are quite unswited to produce horses

spitable for riding purposes for military use. 8795. Well then, independent of the riding horses, we have to buy a great number of what you may call different drought horses, which are for the various posttions in the teams of artiflery and transport. They require a certain amount of weight with activity Do you think the introduction of the Hadroev blood with the mares at present in Ireland, will give us the staron of unitian horse we recuire for this purpose !do not, because I think the Hackney action is an 8756. You think that the heeping of stallions that to go twenty miles you want him to he able to get over that twenty miles with the least amount exection to himself, and the least loss of material. a horse takes up his fireleg and brouge it up to his oble, and puts it down sgain in the same place, it is an absolute waste of power. Therefore a horse with that close of action would be absolutely unsetted for your transport. I do not mean to say that you might not possibly find a horse got by a Haskney horse artificial action, I should say they would not be suited

for the work for which you require them 5716. Well there is also another question with regard to the possibility of forming Government stude in the country for the purpose of assisting the uniltary horses. I must tell you beforeband there is a mis-8768. Don't you think the Boyal Dablin Sockety taken potion as to the influence military horses have on the breeding in Ireland, because a great many people think it has a very large unduston whereas it has a small one. The number that is required by our assist in any way they could the industry of the country, and the question is whether it would be advisable in any way to form depots to buy more directly from the farmers, and to keep the young stock, and se to whether it could be done in an committed way. I don't know whether you have thought this out; is might require consuderation !-have thought it out. I think the present system has worked very well. I do not think Government study or places to buy young horses, and keep them over for lovernment use will be supposeful for this reason, that you may buy a horse as a yearling or a two-yearold, and when he comes to be a three-year-old, when he is needed he may be a different animal altogether. You will have in that once a large number of mixtle and unsuitable houses, and I think the present system of the purchasing officers attending at the different places, the large fairs, and selecting the horses themselves every three or four months in the year, and sending them on to the regiment, is fur the most economical course, and the winest and most practical that can be adopted. Government breeding stude will never pay. Exceeding stads will pay best when memaged by private enterprise, and if that private managed my activate softeniuse, and if that privite enterprise is satisfied by Government it is the way to enable it to do so. When a man't own money is a stake is make him more enterple and receippended in his selection. I think there is only one way I could say this the Government ovaid give this Commission on the horse breeding of Treland sostituces, and that

would be to make some arrangement, or that the parties should come to some decision with reference to placing the east trooper mares, say under disperse them about the country for breeding pur-poses. I am sure each regiment has assumally poset. I am sure each represent has assuming from ten to twelve or fourtrees. I know they are sold at Newhridge for nominal arms, and go to backner cars and for other purposes. If a cortain number of these were placed at £5 each or £3, or at a nearly al een at the disposal of those interested in promoting a schome of Ivish horse-breeding, to give them about in these districts where they are needed, not in the where the Compressed Districts Board in doing good, I think it would be a great benefit, and one of the never in which the authorities could sorre Irish horsebroking considerably. There are a large number of breaking constronately. Itsere are a targe number of dents perhaps, or something of that sort, that would done persaps, or sometting or that sort, that would make excellent brood mares. These men in remote districts have no exportunity of socing or imposing

about these mares. 8797. Do you think a farmer would take a maco of that description—broken down, so as to be incanable of work-to breed from !- I think they would get sufficient work out of their to pay for their keep. do not think they would keep them to do poshing Every one of their would plough and care and do something; and I are sure, if recommended by this Commission, it would have a very beneficial effect commerce, it would have a very accorded effect breafter in dispersing pechaps a hondred or two hundred marss a year, which would be the very greatest benefit to the poorer farmers in the country. Let them pay for thorn at so worth a month or a half year, or in some way or other. That, of course, is an idea which would have to be worked out under

a proper scheme or system. It is an idea which has often been put forward, and I think something neight possibly be done with it. 8718. You said that in beenline house does or soything else, you wanted to bertil the best you could be Ves. 8719. To breed up and not down?—You. 8860. And you say that at the porsont recement

there is a particular class of well-brost stock that Iteland resource which has been but in provicountries by the introduction of mixed blood-that Irriand stands almost aloof, both as far as the Sritish islands are concerned and as far as foreign countries sen concerned, with that particular class of stock, and that the degree of our mixed blood is to be depweated i-Those are my opinions. I think the introduction of any mongrel blood into the country is a tendency in the wrong direction.

8501. Mr. La Topone......Do you think it so absobutally assential that the stallions should be about I.-I think the moves should also be seemd. I think it

8002. As a matter of fact, I was reading the ovidense that Achieval Ross gave before the Consarinien in 1873, and one recearly in main was that there is bandly any old stallion of twenty years eld that does not become a yearen. They become recurre from our puleacy, and fat as a rule. They are not rearres in the same some as other become; it is the result of the lift they live. Of course if you leave a horse in the stable and feed him up, his respiration becomes im-

8803. Colonel Sr. Quintin,....That is not what you call absolutely a practical roover!-No; there is much 8804. Mr. La Topone.-Woold you forbid him to cover !-- He covers and does no harm.

cover — He covers and does no harm.

8800. I say would you facibile him to cover 1—No.

8800. But he would be forbidden to serve if vessound. Suppose I bought a house in Ruginal to
cover in Ireland, why, the Veterinary Econd wealth ounderen him as a rower !-- If you sent me to examine

him. I would pass him practicelly sound for breading the, I would pass have practicely sound for proming the a ser-corposes. I think we should be able to detect these Mr. William horses that are reares from disease and rearers from sorrely halds—atable management. I quite agree surely halds—stable management. I quite agree with Admiral Rem's remarks that it would be very difficult to find a twenty-year-old stelling whom reparation was not more or less impaired from his

8807. Admiral Ross goes in the opposite direction. in another case. He speaks of the house named "Tourus," belonging to the Duke of Bodfred. He was a reaser, his never got a reaser, and in all human probability, he says, it was haredizary !---Well, we know loss of horses that are reasers that did not get more. I know lets of house that one known to be confirmed reacers that did not, in a number of years at the shift, get ressure. That rearing is very different from the other kind. In fact, Lord Statisformell, you know that horse "Harkaway;" he was a despirate recess, and his produce are particularly sound; I have 8808. Then there was the "Melbourne" sire, of a

year celebrated family: Admiral Ross and Lord Pak mouth agree that he was a rourer. But don't you think these instances turn to prove that there are great difficulties in the registration of stallions for soundness !-- That is the very point I wish to suggest upon. I suggest the advisability of having a conupon. I suggest the advisability of having a com-rittee to approve of them harnes, and also three von-tieary surgeons—ast one. It is a most invidious position to put one man in, to select him above to nearmine. It should be done by a committee that would be able to see in these cases the very pelate you teach on which are most important, especially the cint on the odvisability of admitting the horse. 8809. Even though he might be a roarer !-- Even though he might be a roarer, if it was not likely to interfere with his pregery, or interfere with the results in the place he was going to be used for. \$810. As regards the countiness of the mures. That weren to be another even still greater difficulty !-Piduss-Don't you thick my suggestion with regard to each more that would be entitled to the service of

these house if froe from hereditary disease would do I The certificate would be a subsected to an extent 8811. That she had not verying, spevin, or earlied-8819. How are you going to examine a broad mare 1.—The possibility is that she would be extended before site was heavy as foal to know that she was not a rank mures.

8913. I can't see the possibility of being able to sive savidentes to broad marca for accretions. For instance, you may got a perfectly sound more at two years old who as five years would be perfectly useon I-I would not have her examined every You gat your certificate when two years old, and that is very exential also to have the mane sound as well as the stallion. It is all the better to have then both autitles how afterwards.

\$814. She may be sound at two years old before she deer may work, but as soon as she does any work ahe herowen unround. On the other hand you may are occurred uniousis. On the other half you may have a mase ten years old who does eight acanum' excellent work, and then becomes minoral with a sprung hock l—You would not reject her for spring hock. You would get a certificate with the mare, and that would early her through wherever she want to stad to be east to these Government horses. There would be always a great dail of difficulty about this overtion of soundness and prescribers. It is one of the most difficult and must troublesome points, and

all that could be done is to lessen the risks of it as all that could be done in to leasen the risks of 5t as much as possible.

8815. As regards our county yets are aware, or al-feast it has cosee to my knowledge rather since this Ceremission has been sixting, that there are a very considerable number of so-called half-break better to advaration used there banks, there are,

8816. I suppose you agree with me that the use of these horses does not tend to improve the breed !--

They don't improve the breed, but unfortunately there Ann. 5, 1997. Mr. Willem

are formers who will breed from them. Many owners of three half-beds have a large circle of relations who all patronise them. But those houses will Pallio, LA gradually die out as the registration increases, and as the better became are placed at the disposal of the breeders this class of became will gradually fird its 8817. Don't you think these horses are generally

used from the fact that they cover at much lower from !- That's the fact. They cover at anything they

SHIR. Is it nowthin these barren would be quite put out of the market if really suitable sires were placed at the disposal of the small farmers at the same fece that these herees cover at t-Quite so. But to do so they should be subsidized

1810 It would be absolutely necessary 1... Ves : it. , would not pay without a subsidy 8530. It would not pay any private enterprise!-It would not you any private enterprise to do it. 8831. For the breeding of borses in our country

von think the thoroughbred horse is certainly the most suitable !-- Certainly the most suitable. 8622. You say the Harkney stallions of the Consouted Districts Board lately 1-Last week. gested Districts Search intery to Leas ween.

5813. Have you seen any of the stock get by
these horses to have not, except what I maw at the
Committed Districts Board's faces. They were

stream.
SB24. Were they bred at the farm 1—Some of them were bought, I think, and some were bred there. Ther were only a very few of them, so that you could hearonly form an opinion about them. They seemed useful energh. The horses themselves were very good

8825. Have you had any experience of the Hackney here !---Yes, I had personal experience of them in England, driving them. I have also seen a great deal of those in Kurkind. I never bought one for the regiment because I was always strongly prejudiced against admitting one in. I have used them in coacies, but I avoided, as far as possible, ever having a horse with a Hagdingy strain in him. They don't They are the worst-constitutioned borses in the world, and I may tell you as a professional man that whenever they get sick they dia. It is a very extraordinary thing they have no recuperative newer. you take two horses, one a Hackupy and the other a thoroughbred, and they both get an attack of in-figuranties of the longs and have the same symptoms, the Hackney borse is sure to die and the other to well through, because the Hackney has not require

power be has no stamina. 8804. In India had you anything to do with the Government breeding?—I was not in India, but in Africa. I went through a good deal of the bone-breeding in Africa. There are some very large study

8827. You heard some of the witnesses tooley. shife that the mares of the country were too had to put to a thoroughked horse. Do you think the fact of a many being your had is sufficient reason for sending her to a werso home than a thoroughbred boss !-No: on the contrary, I think that these very had mores should have an opportunity of getting a meres about have an opportunity of gitting a thoroughboul borm, a short-legged borse that would be suitable to the district. If a pony district I would not aim at breeding a great hig horse, but put a pour sire to them. A little horse called "Watchaping" has done wonderful benefit. The moduce of this house with small pony mares are all useful, sharp, quick animals, and sending a small boyes to these districts where even the mares are had would improve them

8818, I was talking of the county Donegal!should send them a good strong coarse thoroughbred

bad the 1 ares were.

8819. You don't agree with the witnesses who say that the marcs are too had to send to a thoroughbest horse !- I don't agree with them at all. The sizuals reason that they breed from a bad herse is because the Irish farmers in these districts looks at the price the first thung, and the price is what guides them and not the borso. If they get a horse for Sa and another for 10s., they will send to the Su horse, nomatter what he is. 8830. A gentlemen ligre this morning said that if

thoroughbred horse was sent to his district is a the county Londonderry, to stand at equal fees with another sort of horse, the thereughbred home would got nothing to do 1—Wall, if he was a good street three others borse I am perfectly certain he week!if placed at the same fee. 8651. You think he would t-I think if he didn't,

if they dish't do it one year they would send when Of course you cannot make these sweeping changes in a moment.
8832. Mr. Whintin.—You said you would not

approve of Government atusts, but would of aid being ven by Government to private study !-- Not to private study, but to subsidising horses belonging to 8833. Take your own instance. Say you had eight thoroughbred stallions, in what way would you let

morrogoneed staticon in wint way would yet let. Government assist you I-1 don't won't any assistance for my stud, but I mean, to subsidise Lorses that would be sent to those districts. If you wanted to send a borne to a certain district, and the enumenture selected one and the owner of the stud wished to come it is mostly and to the contribution. send it, it would not now him to send a horse whose cost was up to 4500 to a district like Denegal to cover mares at ten shillings each ; so that the bosse should be subvidised. 8834. That is, something on the former plan of the

Royal Dublin Society I. Somewhat on the some plan 8335. On what around do you form your opinion that each county med to have a separate breed !--From thirty years living in Iroland. 8836. From experience during the last thirty

years !- From experience during the last thirty 8837. You have not been able to texes that up or to find documentary evidence of it !-- I have followed the thing year carefully, and I know from experience that you can go to almost any county in Ireland, and like the resple that live in the county, the horses

belonging to it have their poculiarities.
8818. Derived from one or two special sizes !--Derived from our or two special breeds of siees that 8609. At what period do you think the furely: to come largely into Ireland !-During the last thirteen or fourteen years there has have a large introduction of Clydesdales and other breeds.

8840. And you don't think that before there was any cart horse blood beaucht into the country !-- I am well aware that there was, but not in the same quantities as there has been since. S841. Fifty years ago there was very little cort horse blood 5—Very little, I think. Fifty years ago the horse were emittely bred in the districts in which

they were med they were used.

5945. They were prostleadly of the pure Irish
freed —Of the pure Irish breed, but the facilities
for experting them out of the country and indicate
for experting them out of the country and indicate
them navy iddn's exist than that exist now.

8445. Do you know the outgasted districts—I ver.
I have been through Kerry and Commerce.

8345. And Bellmulate —I have not been to

horse and that would improve them, no matter how 8845. Or Achill t—Nn; not to Achill. 8846. Do yon know Leuisburgh t—No. 8848. And Oughterard |-Yes.

yerr meful ones.

8347. Or Cliftlen 1-I have been as far as Cliftlen.

referred to, namely, a horse of three crosses of shoroughbred; and Weish colo, similar to the Wolsh cole you have at present, on the same lines as the Committed Districts Board's cobs, which I think are 5851. Would you have any Ambs or Barks 1—I might have them occasionally in some districts. But

they don't do so well, I find. I have had an Arab and a Barb peay standing at my stud, crossed with proise, and I am disappointed in their produce, patter. There is a want of bone in them. 8552. Is it always the case that a small thoroughbrail horse will also breed small produce !- Not at all; but still it is more likely to breed an animal ffrom tin small mores) with an equalised conformation. 8553. On what grounds have you formed your opinion that Hackmays are so delicate of constitution !-- From the experience that I have had amongst then-a lengthened practical experience.

8354. You have been called in professionally to attend to Hackneys,-Yes, 8835, Where !—In England. 8855. In what part !— When I was questered in England; I have seen quantities of them.
8807. Where b.-In Leesly, Manchester, --and not

only from my own opinion, but also from the solution of several year eminent veterinary surgeous who have been largely called to attend on then \$853. It is the general opinion of the profession?

8853. CHAIRMAN.—From what you said, I take it you think a good scheme could be made out of the old scheme of the Royal Dublin Society and the one at present in force !- Yes. 8660. Between the two you could make a good

scheme !—Yes. I have written a few suggestions, which, if you allow me, I shall read. They prehaps might be of use.

8861. Would it be well to hand them in !-- I will if you wish, but pechaps it would be better for me to read them. My first suggestion is—"To encourage by subsidizing good, someo, suitable stallions to stand in certain counties which are not now sufficiently rapplied."—That is, referring to districts which are local socioties and really the best judges of what they want in the districts, but they should not ontirely under the Royal Dublin Society, and I believe they should have the power of distributing a certain sum of meany. "Third Subsidized stallions to construction of the state of th for brood source at local above," which I think is the way of keeping the mares in the country. 8th. The registration of stallions by the Royal " Fifth. Deblin Society, but to be done for the future by committees appointed for each district, with veteri-

ferred to that. My sixth suggestion is one which the

members of the Commission will think a strong one.

Sixth. The elimination from Iroland of the horse

known as the Hackney stallion, excepting those kept

"Second. The distribution of the grant, so far as

possible, to local societies and committees, to work under the Royal Dubba Society. I am quite erre

by private study."
Sid2 Mr. Prittillian.—You object to having half-bred stallions registored, but don't you think the registration of the half-bred stalliess would be valuable in so much as it would give confidence to the farmer or the public that the perferee of a stallion was exactly what it professed to be -I quite agree with you; I onite think that, as I already said, the half-beed stal-fions that would be saleidized abould be recognized by the Royal Dublin Society in some way that would give a guarantee to those that breed from them that they were bred in this way and were sound and had the approval of being discerving of a great of the sub-8863. That would be almost registration?—Yes; it would be, but it simply would not let them into

register it will be an almost impassible thing to draw the line afterwards, and it will be very dangerous. But if you have a stallion with three courses of thoroughbred in him by a thoroughbred horse himself, and with the make and shape of a hunter likely to breed the class of home that is required in the districe, and then have him subsidised by the Royal Dablia Society, I think he would be a most methal Witness subsequently solded-Pertuga in reference to registration you will permit use to say that if the half-treds were registered in a suparate

the list on the some footing. It is simply that I am afraid that if you put half-bred stallions on the

saw not supplied with stallions, because I think it is quite unnecessary and would be absurd to subsidies register it might meet the wants.

8864, CHAIRMAN,-You are a land agent, believe, and you live near Roundstone, which is almost the extreme point of the west of Galway !- You, my lord. 2845. You are well acquainted, I presume, with the computed districts, and the horses which are break

in the county Galway !- Yes, my lord, I know them 8866. Will you describe the horses bred in your seighbourhood !-Do you mean the houses belonging to the district, or the stallions the Congested Districts

Board have sout there ! 8807. The hurse native to the place !- The stallions

are very bad, indeed: the mares are fairly good. The see Il country furmers, as a rule, sell the buls at six moretise, they are sold in the fairs of Chilen and Oughterard, and go away. Some of the mares are very good, and have good bone. They are small,

about 14 or 14.2 hands—hardly any higher than that.

Mr. H. A. Remeson, Rosentstone, Galway, examined. 8868. Are there many houses bred there !-- Yet; a large number. \$503. What sort of stallions use there principally used there !- The native stallions are very bad indeed a nothing could be worse.

8870. A bad elemat... Very bad. 8871. What sort are they t... Just saything as all in 8872. Are they haves or ponies shielly 1-Ponics, S873. Have the pusies deteriorated much in Con-nomian, latterly 5.—The price has deteriorated very

much. I would not say there is much change in the poniss. The fosh that used to go at £5 a few years ago are now only going at from £2 to £3. I saw them on the I'th December last in the foir of Clifden. -plenty of them selling under £3. 8874. At the present moment there is less given for the fools than there used to be !- Yee; much less.

Mr R A

290

But I don't know what the drop in value is-that the foal is seach women or is navthing women, but the srices for these popies have come down very much. I suppose the demand for them is not so great now. 8875. When did you notice this first take piace? ... For the last two or three years, certainly for the

land two years. 8876, Have you been able to form may opinion as to the stock got by the Congested Districts Beard's Hackneys now in your prightenthood !-Yes, I have seen a great many of there, lest 1 myself don't care about the Hackney. thoroughbred stallions myself, and I like them much I had "Watchspring" in Connenara, and I also had mother thoroughined home called "Gold diagree"; he was by "Halfe." I had "Watchapeing" for three years under the Royal Dublin Society's acheme. 8377. What sort of atock did be get 1—Very nice

stock indeed. I have a great many of them myself. 8878. Did many of them go out of the district as foah !-- Yes, a good many. Some have been kept, and a good many have been sold as two-year-olds and yourings. Some gentlemen went down and bought a good many. He bought some from Mr. Bernings the other day, and he would not have anything but "Watchsprings" with a view to make polo pumes of

8879. Have you got the horse now !-- No, he is in Connemara. I sold him to Mr. Berridge, a large propriotor there. 8880. Have there been any other thoroughbred stallions down there except these two |-- Golddigger and "Watchspring" are the only thoroughined

8881. Are there say other sect of stallions down there !- No others, except the horses of the Congreted Davirieta Beard. 8832. No stongrel stellions 5-Oh ! there are ; but

none that I think of any use in the world. 8883. What sort are they 1-Mougreis of the very weest description. Principally ponies, there is one out at Errissore. In some pure of Commerce they just turn a stallion out loose on the mountain with

8884. One of their own trite !-- Yes 8485. And just leave it to chance !- Yes; there is a commin Corne does that largely. He has a lot of mares, that is Martin Mouran of Carns. I think he waste now to the Congested Districts herse. had a lacre number of foals in the last fair of Clifden he would have sold them for £3 a piece, but he could not get that and he brought them home.

8486. Is the labit there to round them up tike a flock of sheep and collect the young animals and send then away i—Yes. They used to go away in droves, but we have got a milway now and they go away in

8887. Do people come down to buy them !-Yes; there was a large number of small jobbers-gypsiesthe small class of buyers there, and there was great

demand for the posites at low prices. 8888. Were there any of the foals of the Congested District Board horses sold there 1-They were mixed np with the other feels. They don't seem to make any difference in the price free the others. 8839. What price do they renge at 1—From about

50s, up to £3. £3 was a good price this year for the ordisory foul. Lots of them wern at £2. I naw them selling at Cloubur; Mr. Joyca hought fools at 8890. Do the horse breeden appreciate the Hasknev stallions down there !-- I really could not say.

think they appreciate anything they ges for fiveshillince or under it. I don't think they are judges really down there-most of these. S891. You think the peice has meen to do with them than anything she 1—Much more. You used not get a ten shillings fee for a horse now if you had

"Kendal" down there.

8812. Do you think that horse-breeding ma be made to pay down there !- I think you can certainly make breeding for polo posies pay; that would be

certain to pay I think. 8813. You think by that some money would so into the district b-Yes, I had one myself by " Gold-digger," a four-year-old. He was on a mountain and I only had him in six months and I got £15 is; him at the last Hollymount show. That pailine very well. He was on a rough mountain that was

not worth a half-a-crown an acre.

8894. Do you think the Hackney stallion is libity to produce that ches of animal down there !- Not a

8815. You think not?-I don't think it, my ked: but I am quite cure of it. He may precince a temp per; but he won't produce a polo pour, as far as my

experience goes.

SSi6. What sort of stallion do you think now
would be the lest to have down there!—A small. throughbred—he may be even up to 15 hands— with plenty of hone. "Watchspring" was a busqiful horse; but it is not easy to get a horse like him. He was 14.3; he was beautifully bred, by "Spring field." You could not best him If you could not get a thoroughtend with rhough bone I would not object to a slight stain; but I would scener have a

8697. Have you any suggestions to make to the Commission with a view to improve the breed of horses in your district? Certainly; to send down a theoryghbred stallion.

8898. Mr. Frrewitzzam .- Do you think that these Connenzza ponies are shie to be revestitated-for the breed has gone down a good deal !-- Oh, yes. I think they can.

SSSS. The CHAIRMAN.—Did I understand you to may the number have deteriorated or not !-- We have often heard a great deal about the Comemors pony; but I have been in Conneman for the lest forty years and there are some very good mares in it; and, of , course, there are a let of very had ones. The graces! peck some very good marre in it now with good bore. 8900. Mr. Fyrawmanam.—I think you said they deteriorated. In your opinion the best way to keep

the breed up to its greatest excellence would be to une these small thoroughbreds, and as you describe Watchmring " to be -Yes. 8901. Should you object to an Arab or a Back word. The Barb that was down in Comemara that

the Board had-"Awfully Jolly"-was, I think, a very good herse, indeed; but not hig enough for the 8101a. What size was he !-- "Awfully Jolly" was

about 14 hands. 8502. If you could have a larger one of the same class 1—Yes, I would not object. From what I hear; I have no experience of breeding from the Barb my self. I have from the other.

8508. "Watchspring" is not there now !--- Yes, at Earlynabinch Corte. Mr. Berridge has him to a fee slop's know whether he wears to give him at a fre that can be resolved by the small men, because he has a good many mates himself. I don't know what his

6104. But you think the introduction of Hackney blood among the ponies would be a mistake .—I think it is a mistake even if it produce a small trapper. there are so few of these wanting now

8905. Are there Hackney stellions in that district!

—Yes, and Weish cohe. Weish cohe and Haskney stallings are at different piaces through the district. 8905. And is your opinion of the Hackney the opinion generally among your neighbours who are cal-culated to give an opinion on horse-breeding i-I could not say that. I am sorry to say that in Oce-nemars I think they know very little about horsebreeding.

291

To shift and tell you that. Sign. How you say experience in Hackrope years $d_{H} = N_{\rm F} + 1$ Ind a generated Contention must be $d_{H} = N_{\rm F} + 1$ Ind a generated Contention must be supported to the sign of the result can be to an to-completed Handrage, and ther small can be to an exception of the sign of the

COMMISSION ON HORSE BREEDING

Aug. 6, 1897 SEVENTERNTH DAY .- WEDNESDAY, JANUARY 678, 1897. Present :- RIGHT HON. EARL OF DUNBAVEN, E.P., in the Chair; LORD ABBYOWN, HON. HENRY Mr. F. S. WRENCH. Mr. Grozon L. Torrennan, Glenade, County Leitrin, examined. 8943. CHARMAN.-Mr. Tottenham, you live in the as a great many necole do, that the Congested County Leitrim, do you not 1-Yes.

8914. A very short time !-- I dich't say the feals

sey or me a reed post potant.

8934. Did you get a fair manber of mares to "Watch-seing" 1—I did , about forty each year.

8937. You charged £1, I think :- It was 10s. under £20 valuation ; £1 over that 8938. Do you know that most of the heres that have been sent into Comeman by the Board have leen Welch 5—Yea; I know "Sunbeam" is Walsh,

that stood at Letterfrack, and "Prince Llevellyn

were by the Heckney 8935. Do you find that people would send to a thoroughbred !- I rhink they would if they thought they could breed polo ponies

Au. 5, 2027

8944. You are a deputy lightenent and magistrate of that county ?-Yea. 8945. Are you a member of the Horse Breeding of the original members. 8016. Have you any experience personally in broading horses i-No, I am not interested personally in horse-breeding , the reason I say on the Committee of the Horse Breeding Association is that we have a common ground of interest -the people who princt-

pally started that and I—in potting a stop, if possible, to the action of the Congested Districts Board and their horse-breeding achienes.

8947. Do you object to their herse-breeding scheme !-- I object to their horse-breeding scheme on other grounds, because I say it is a misapplication of the money of which they are treateen. 8948. That is a question that scarcely affects not— Well, I suppose in this way it would affect the Commission, that I say there is practically no horse-broadure in those districts at all. 8949. I see, but the question of the application of the money entructed to them is not one that comes into our purview at all. As far as burse-breeding is concerned, are you acquainted with the congested districts in the County Leiteins-Yes: quainted not only with the County Leitrim but all the west of the congested districts. 8030. Well, and what have you got to say as to the question of benchronding in the districts you are acquainted with !-- Well, I have a good deal to say in one way or another. 3951. I should like to get what you want to put before us in your own way !-! am really bere as the representative of the Horse Breeding Association, and to advocate their view, which is to have a stop put to this importation of inferior Hackmey blood; and also to show that if any State aggistance is given to horse-breeding at all in Ireland, it should be to the particular blood that does good to every other breed and does haven to none, and that is, of course, the thoroughbred blood. There are two public bodies spending what is supposed to be public money on borse-breeding in Ireland; it is a metake to suppose,

—the year before last. He was the baggest of them. 8943. CHARMAN.—Have you anything further you wish to say!-The only angestion I wish to make in that I would be most anxious to get a thoroughbred horse-I don't mean a weedy thorough bred-sinto Connenzza, Lecause no private individual can bring one in. He example compete with the Board's homes at 5s as the price of his fee, others as would try and got a horse myself, but I could not afford to keep him and compete with that price. If the Ecard would send us one or two theroughbred horses I think is would be a very good thing indeed. Adjourned. W. FITZWILLIAM LORD RATHDONNELL COL. St. QUINTIN, MR. PERCY LA TOUCHE. MR. HUGH NEVILLE. Socretary.

Hackneys. There was a Hackney at Cashel. "Zeas," I think, was a Hackney.

"Zeus," I think, was a risconny. 8041. Was not his stock pood —I wish then jay of "Zeus." The best, I think, I saw there was a by

Districts Board's money is public money, except as to a very small proportion of it, which I propose to show presently. The Royal Dublin Society's money is, of course, public money, for it is a distinct great of £5,000 a year, notice the Local Toxation Act, which has been going on for the last six or sives vescs. And of those two public bodies, it seems to me one is doing as much harm as the other—the Royal chesp Hackneys about the country. 8952. You don't approve of the system of the Royal Dublin Society !- No; I don't at all, and I think they make a great mistake in thinking that the country 8953. Well, hut let us have your own reasons for dis approving of it i—The money is simply being pitched away, I think. In the first place, I object to second sate stallions being registered and subsidised. I this they should have spent their money in buying five or six good borses every year, and planting them out through the country, in the same way that, I think, the Horse Breeding Commission in England does—the

out through the country; instead of that the Roral Dublin Society-their first scheme was to subsidied to pay £2, I think, for each service by every stallion that they registered, and their standard is such a low afford to pay for good stallions, that anyionly who buys a stallion and gives £100 or £150 for him gets a Stnd Book practically they are all registered-half of them are not fit to breed from. 8954. But they have to be sound, have they not! -Yes 8955. And they are inferior 1-Yes; you hear the same complaint all over the country that what is wunted is a good strong borse, they don't always my a thereogebred, but what they want is a good strong horse, that is what the farmers and for; in many

districts they like a thoroughbred horse, but what

they don't want is those leggy animals. 8956. I understand you object to the Royal Dublis

get a certain grans every year, which they expend on what they call premium stallions, and plant then

notice registering borses which ought not to be peristered !- I thenk they ought to have spent their money in another way; if they register thoroughbred house they must take the best they can get. 8807. What do you propose they should do 1-Buy for or five every year for a good parce like the English borression, and plane them one through the country.

\$55s. Mr. Frewitzsan.—Do you think that is enerly what is being done in England !—I famey it is, at all events that is what I would suggest here. At present through the country there are what they all Government bowes, people don't knew what the Delim Scriety is at all through the provinces. The Bayal Dublin Society is really a Leinster Society, the Registration Committee are all Leinster men, and the other provinces, Ulater, Communist, and Menster, gally have very little to say in their proceedings at all, and the fact is that the people who manage the Daldin Society don't know much about the other provinces; they don't know what we want their houses all round the country are known as the Covernment

S109, CHARRAS,-What, the Dublin Society's projected became -Yes, they are known as the Government horses, and the recole at first seemed to think that they were something superior, but they frand it is not so at all.

8960. As I said before, you object to the Doblin. Society because they register stallous which are not good enough !- I take it for granted that we are going to have an Agricultural Board next year, and I presume that Board will want to have something to do 896). That is rather problematical, is it not 1-We are told we are going to have it

8963. Our object is not to take evidence as to what the Agricultural Board is to do when it is formed !--No. exerpt, suppose the Royal Dublia Society chooses to do what I suppose the Board would do, to have some representation of the other provinces, instead of the had Government korses which are scattered through the country we might have money ment on good ones.

If the money which we have had spent during the last seven or eight years had been spent as I say in hoyseven or eight years had been speak as I say in my-ing good horses, avery county now would have a good have instead of 531 lead ones. 5963. You think the Dublin Society ought to buy

horse themselves, and allocate them alone the senity i—Yes, they do that to a certain extent. 806. You think they ought to do it to a larger extent — I think their money would be much better spent if they did it that way. Perhaps I may read a lecter from the Chairman of the Committee of my county on that sprient, the Committee that manages

the Boyal Dublin Society's home acheme. 8016. In Leitrim !-- In Leitrim. He says :-- "My view of the Royal Dublin Society's home-breeding scheme as far as Leitrim is concerned in that it is a sheer waste of money, we have neither bowes nor mares to breed from and are prevented from recommend: the only depend maxies, narpely the shonkerpery, who

consistally have a good mare for the cart, sail the Sanday oar, by the existing rules." The existing raise are simply giving very small prime, which is in not worth their while to go in for, for mares stinted to a registered stallion. I know two or three cases not only in Leitrice, but in Tyrone and other countles, where people have specially bought a thoroughbred herse, or did under the old scheme of the Dublin Society, where £3 was paid by the Society for each service to nominated mures. People used to bring their mares to wisat was supposed to be a good Govern treat horse, but since that was changed in 1894 they have got no mares at all, they have sold their become, because they may the people now go to a common horse for 10s.; and then those shows where £2 or £3 are given for mares do not make it worth their while to pay

altogether, the Sceretary there. Cantain Knoz. took a

now altogether. The Leitrim Chatrasu goes or Mr. Goog may —"We recomment going back to the first plan of Terrahan going commissions." The movit of that plan was not so much in giving maninations, it was in subsidising but when a stallion was substitued be get £2, he was supposed to serve at £3, and the Royal Dublin Society paid £2 out of the £3. He probably never get the third pound at all, at all events he was sure of £3 and the mares were practically served for nothing, and it was worth a man's while to huy a moderate stallion, at all events very few could afford to buy a good one, but it was better than the present system. He recommends was better than the present system. He recommends going besk to the former system. What he mays is "we found the people would not pay the two guineas fee, as you say, on the chance of a £2 prize." I consider the whole scheme wrong, and be recommendathe Hungarian and Anatrialian sale me, which I don't acree "It would be better to give a good lump sum down for an improved scheme than go on year after your spending thousands uselessly. In Fernamagh this year they got a special dispensation to give sub-stantial price for mores.

896%. Are you saying this yourself or quoting some-body t-No, I know it of my own knowledge, they last great trouble in getting that dispensation from the Dublin Society, into it worked much better, I have here the number of mares shown in Leitrice, there were two only at Carricle-on-Shannon-this is the return

8947. Scoretary of what !-- Of the Leitrim committee of the Royal Dublin Society's horse-location relicion. Only £36 out of the £60 that was allotted was given in prices, and the committee objected, as I think I said before, that they have to give prize to mores that are really not worth giving priors to.

5965. You say the committee object to that 1—Yes, 8969. Who says they object to that 1—I say it of my own knowledge from what the Chairman has told

8970. You can scarcely speak authoritatively for the committee !--He says "we have neither horses nor mores to breed from S971. This is all secondhand evidence, it would be

grach better to give us your own colsica about it !-ritten evidence I have. 8972. I have no objection to your reading snything. but if you say the committee thought so and so, it is

a different matter !-- I am not a member of the committee myself. 8978. Quite so, and I don't see what authority you have to steak for the committee !- Except from the

Cinirman. 8974. Well, you can quote from the Chairman what he says in his letter !- Well; but I know from con-

8975. We can correly take that in evidence from saying there were only two mares presented at Carrick-8976. You are quite at liberty to tell us anything

on gather from any conversation or your own person. knowledge, but we can scarcely take it from you that the Secretary of the committee thought so and no!— It was from what I guthered in conversation I was giving my last evidence. Then I can give it as my own knowledge of what they do object to. In the same way I know that there is considerable objection to sending back this money to the Royal Dubin Society. sensing over the miney to the regal bubble Scority. Supposing there is £50 or £100 allotted to each county, and they only spend £30 or £40, they have to send hade the balance, instead of teing allowed to accumulate it to buy a good horee for that county. It is all put into a common fund for the Royal Dublin AS on the chance of getting a S3 or A3 prize for their marss. And in Donegal the scheme has follow through Society, and a borse is bought and sent down to Clommel for instance, where a borne is not wanted.

Sec. 5, 1907 Mr. George L. 991

SUT That is where you think a horse is not wanted !-Well, Cinamel is in the centre of a horsebrooding country where all the best house me and surely they don't want a stallien there. The gelevators is that the maney sent back from each county is not allowed to accumulate for each county to buy a good

\$978. I should eather from what you say that you Deblin Society's solicine, the local commutees should have a voice b-I certainly say that the other pro-vinces, Ulster Musster, and Commughe should lisve more representation on the registration committee. for instance the registration committee is entirely conposed of Lemoste men. I thick these are all Leinster men -Major Borrowes, Major Everand, Lord Longfort, Joseph O'Really, Level Ratisformell, S. U. Belowers and Frederick Wronels. I have beard the objection made, in Ulster purticularly, that the Royal Dublin Society is a Dublin society and managed Dublin men and Leinstey men. I don't know whether is is relevant to the present impairy, but I have amother objection to make to their exceediture on the hora-investing, that there is only \$5,000 to be expended altegrather on borses and eattle, and the cortic-breeling industry being so much the larger industry

of the two, instead of spending £3,500 at horses and 1979. We have poshing to do with cuttle, but you

think they spend too much up hoose i-They spend too much on borses in unoportion 8960. Then we may take at that as far as the Dublin Society goes you think they spend too large a proportion of their grant on heron, and that they don't portion of tear grant on necess, and that they derit

3581. Now so to the Congested Districts' Board?

subsign weats to gritician what I have sold? 1832. I will sive the members of the Commission an opportunity to note any quantous they want?-There was another point about registering by the Hevel Dublin Society. There is a great deal of tells about registering, I don't myself see what the advantage of all this regutering in; the Royal Dublin Society is publishing a register of all these stallsons that they have had on their books for the last six or secon waves which are observed to Westberber's stud book, and the register which they are preparing and publishing is singuly a register of certificates of soundnees, and they attach great importance to that. Per-lays I should have mentioned that I don't associate Hyper with the Horse-breeding Association in their reply to the Bacustory of this Conscionies. I was not there when the reply was drafted, it was patier a grade production. and I should accordly agree with anything that was stated in it, pursualarly as to the importance of registration by the Royal Dublin Society. don't think that recontration to im-

poetant !-- I don't see what the use of it is myself. perion? I—I don't see what the use of it is mysen.

SOSA. Have you saything further to my about the
Reyal Dublin Seciety!—No, I think not.

SOSO, The only other body that I think you object to it the Compated Districts Board L. Von

first thing I have to say about the Congested Districts Board in that we have had no report or information; the public has had no information of what they have been doing or how they have been spending their money since the 31st March, 1895, and under the Act which appointed them they are bound to report

ereally.

5981. To whom i—To Parliament. In the 41st sec. of the Act it is provided "The Congested Districts
Board shall, once in every year after the year 1891,
make a report to the Lord Lioutenant of their proceed-

avenuated to Parliament." Well, I wrote at the cold of November to the Chief Secretary, as Chairman of the Beard to ask him if he could kindly say when we should have any information later than the 31st March, 1895, and he reglied, or his secretary renlied, that the last annual report of the Conrespond Districts Board was almost in type, and that it was pretty certain to be issued to the public during the next menth—this was on the 27th November —well, this is the 6th of January, and still we have

SRoT. Do you know when the reports ought to be " within the year after that. The last report was seven months late. They report to the 31st of March of each you, and the report to the Stat March, (201), was not sent to the Lord Lieutenant until 21-c October, 1885. Now there is a report due to the Slat March, 1896, and this is the 5th January, 1811, three months over the time within which, according to the Act of Parliament, the report should have

SSSS. It should have been issued within the year therefore it would be some few days after the time? No , the last report was the 25th October, 1835. 8989. I sea : it should have been presented before that date in October, 1896, what do you dednes from that !- It places me at a disadvantage dealing with their figures, because in any calculations I make I am S000. Quite so !-- I am also placed at a disadvantage in making any remarks I have to make, because I look upon the Congested Districts Board us being in the duck in this trouver, and the member

who is principally incriminated, perhaps, is a member of this Commission, so I am not in a positive, perhaps, to make all the agreeable remarks I might otherwise have liked to SUIL. I think you may look upon all the members

of this Commission as being perfectly impersonal !— If that he so surrecable as I can but it is, perham-8992. As for as the Commission in ecocorned you must understand that we do not at all agree with yon that the Congested Districts Board is in the We have to deal with the horse-hreeding of the whole comiry, and we have to deal with the Congested Districts Board only as far as it is con-cerned with boun-breeding —I think the origin of the Commission was an application by Captain M'Caliston, in the House of Commons, to have a committee appointed early in the war, in March; that was refused at the time, and afterwards a departation went to the Lord Lieutenant upon the suitest principally of what the Congreted Districts Board had done in the introduction of that perticular

strain of blood, and then this Commission, I think, was created as a sort of after-thought to inquire into that question into test question.

8983. I beg your parden, our reference does not sutherine us to imquire particularly into anybody or anything, but into the home-hereding; in what you have to say about the Congrested Districts Board. you should confine yourself to what they have to do with home-breeding !- It is of course on the methods

that should be adopted in the encouragement and insure the breeding of horses. 8934. We have nothing to do with whether they send in their reports in time, except in so far as they may inconvenience you in any deduction you may make as to the breeding of horses I—I quite understand that. I was going to read a portion of Leed

Congant's reply to the deputation which writed upon him, in which he informed them that this Commission would be appointed, merely to show that the origin of it was the aution of the Congusted Districts Board. 8)95. I don't think that that in necessary, we all know ings under this Act, and every such report shall be that the Congested Districts Board is engaged in house teretize, and if you have anything to my on that mert of the subject, we shall be gird to have it !--Burham some of the Commission have nover been Perhaps some of the Community have never teen in these congreted districts, and perhaps I might read a description of them. you mean the consented districts

generally 1-Yes. serally !-- Xee. And the pasture of the country in which this particular

spine of news in terms of names, and the about the sainte of the country, and the class of horses there is in a 1-1 think it would come with more authority if I just read a few paragraphs from an article in the Fartugiskly Rovkew," written by Mr. T. W. Russell, describing it. This article was written in 1890.

#890. I have no objection to your reading it, but I don't see what it has to do with our imquiry !—I am sere many of the Commission have never been in these districts, and don't understand the people that these

houses have been neavided for. \$000. What we want to know is the kind of mares that these houses are provided for !- Yes, but it is the

kind of people who keep the mares that the Congreted Datricts Board is providing for ; the people who have those marcs, it is only very short, the Conservative Coursement was in as the time, and one of the world Conservative Land Bills was in the air 2001. I think it is rather inconvenious your quoting

this article, it would be much better if you told us what you know yourself. You say you know these congreted districts well, can you not tell us what you know, may about their geographical position, for the of the Commission cannot cross-exemine rumbers of the Commission cannot cross-examine
Mr. P. W. Russell L. Can I wond the Board's description of there is, their own report !

\$002. It would be much better if you gave us your

1003. What we want to gather is your own erminat if want to put it as vividly and graphically as possible.

1604. We would somer have it in your own words !-- The people of the congested area that the Board was associated to deal with-they are growled erees with a swarming population, few ce any of whom are in a position to heep a mare at all. For izatance, the late Lord George Hill's property about Owendow is sen of the principal congested districts. There are \$36 temports there at an average read of 18s. a piece, that is what is really a computed area and a empeted population. And those wretched people

Who, very few of there, for instance, can know a horse of Mary kind, as a supposed to be bessed and cheered by having a high class coverings stallion placed within their reach. That is the point that I wanted to show. Of course, they are not farmers at all, it is only a bit of accommodation land they have. Most of them live by what their some and daughters earn in service, principally in Derry, Sectland or America. They sees home with a few shillings and poy the rents to that kind of way. There is no question about their being furgers at all. They have a patch of

their being farmers at all. They have a patch of mountain land, potato ground, and a patch of turf, and tast is the style of thing all down Donegal, and Mayn, and Communara, and Kerry, too, and all through 9000. Of severe the converted districts extend

practically over the whole west of Ireland, so, I spees, they vary a good deal in the circumstan and the condition of the people, do they not 1-A omgested district under the Act was supposed to be where 20 her cont. of the normatica of the county

2006. Well, we seed not mind what constitutes a computed district; but as a matter of fact portions of living from north to senth are in computed districts. are they not !- Yes ; the portions are shown there (referring to map).

dition of the people and the geographical condition of the Google these congested districts. You can searcely speak of Termhan. the Games L. these congested universes. I on our servery speak or these in one lump?—Some parts are very much more for instance, and the west count of Depend and Mayo. The population there are very much closer together than they are in the inland sections. But the people are rust as poor, in fact they are rather poorer in the inland sections than along the cost. 2008. Then do you mean as for an the horses are

concerned the people of these districts are not capable of breeding horses at all 1—Quôte so. It is only in one or two spots about the coast of Denegal and Conusmars, and, perhaps Ashill, where thry keep routes at all. In Lettrin, for instance, it is all donkeys they keep, and it is donkeys they ought to keep. They keep them for half the freeling, and all they want them for is for bringing home warf. They feed them on rotten pointees in their houses in winter and lurn them those are the people these high-class stallions are

9009. Are we to take it from you that it is a wrate of money to encourage people breading horses at all in these districts !-- Entirely, the money should be seeplayed in other wave. \$010. Then there would be no use in asking you

amentions as to what smooth he the best way to enquestions as to write women to the next way to ex-courage horse-bacoling in those districts become you think it ought not to be encouraged at all !— Coroninly use. Over two-thirds of Iroland there is no each thing as horse-broading.

9011. Then you think encouragement ought not to be given to people to breed horses t-Certainly Denegal where it is a matter of pride with the people

0012. But as a senoul rule you think it is a waste of money to encourage them to breed heeves 1-Quite : is a demand for high-days carriage horses in Enghand, 2013. You don't think those districts are capable

of producing a borne that would sell !- I am quite 2014. Then we may take it that on far as the Con-Districts Board is concerned you think the expenditure of any public menty on the encouragemost of hese-breeding is a waste and unders I-

what meany has been actually spend.
CHARMAN —I don't think that is necessary for us, and we have got that report already. 9015. Leed RATHDONNHA .- I think you said that the Royal Dublin Society in your opinion, so far as the bosse-breeding part of it is concerned, is consti-

2015. Are there not local asymptoses of think yes ar referred to your own-in the different operation of Ireland, whose business at is to report on their own served districts !-- Yes.

9017. And to aid the Society in drawing up their schones 1-Yes. 9018. De your own local committee in Leitrim worst L. I don't know bow they report, whether they

send in recommendations every year, do they i 9019. They do. The reason I ask you the question. is because you supposted that there was no report from any local district to the Seciety, so I sathered from your evidence !- I don't know how they report, and whether the Royal Dutlin Society's scheme is

founded on such reports. don't know. As far as my own county is concerned the scheme in practice there is not what they recon-mended or approve. I don't know what they have remences or approve. 4 don't know wh

San. 8, 1997.

5021 Von don't knew that the local committees can choose winther thay will work the old scheme through the stallion or the later one through the unco |- I don't think they understand that they can 9019. You referred to the money returned from the different counties, do you know what becomes of that money !-- Yes, I understand that goes not a

common ford and that heres are bought with it. 9013. Is not that what you recommend, is it your bles, that the best way of incroving the broad of 9034. And you don't abject to the money being spent in that way !- Only in this way that it is

rather hard on the county to send back money every year and not to get it back aren in the chape of a 9035. Do you know what would happen if the many was not expended at the end of the financial

year !... I know if it is not corporated it would go took 9196, I also understand you to say that would prefer not to have any registration of stallions whatever !-- I don't see the use of it except as a cortificate of soundness.

2027. That is nothing in your eye, you don't care about the nonphases of the stellars t. It is desirable, but most of the stalhous serving through the country put at the bottom of their kills the veterimery surgean's covidence. them windsorver by any person seat down by the

fit horse to serve mares 5-Any ordinary stallon or thoroughbred stellion; you mean the stallions generally in the district ! 2020. Any thoroughbred stallies i-Well, if he had a certificate from a competent vetering

surroon of the district I don't see why that should not 9030. You would not have him inspected to see if he was likely to improve the breed of horses t-Yes, I would, certainly; but then I think the standard in so low at present that the inspection is not of much

\$031. Are you aware that our borner were rejected from registration 1—Yes, I believe there were scare, but I am not aware whether 6 was on the ground that they were unsuitable or unsugad 9022. In fact you are not aware of how the matter of recisionation works at all !-- Yes, I suppose I

of registration werea at all 1—Xee, a suppose a harwall about it and how it is done. I know that the Laspector goes down from the Reyal Dubin Sadate and reports on the horre, and there is a veterinary surgious certificate given when a man arules to have his horse registered.

applies to have his necessive registered.

1053. And yen would do away with that, you say
it is no use I—I don't see that it prevents an inferior burse, an indifferent horse from serving through the

9034. You have not beard then of any house having been put on one side on account of unsuita-bility 1-No.

this year and only 234 were registered. 9036. You are speaking of a subject that you are not therearthy acquainted with I faper !- Yes, as far so the coughty sommented with a mary ... an as the dotain of the working, I suppose I am. 9037. Are there many horses heel in your country?

About Manachamilton there are. There was a

-About Masorhamilton there are thoroughlired stallion there the year before last under the old scheme.

9038. That was when the stallion was subsidised? -Yes, and then when the subsidy was taken away the owner sold him. He got very few manus and it was not worth his while to keep him.

9030. Mr. Warren,—I think, Mr. Tottenham you are one of the centlemen who recommended

nate instead of horses for the congested district t -Yes, I think the money would be much become spent in that way or in getting calves, 9040. And I think you said there was no bosse 9010. And a transe you said there was no here-breeding in the district at all !-- No, I don't say there is no home-breeding in the district at all, because in all these districts there are green sucts have and there where the larger formers do beend house, and 9041. You have referred to Gereelore, do wee lease

what Union Gweelere is !- Yes. Dunfamehr. m what Useda Oweelers is t— Fes, Dunkanaghy, 9042. Do you know as a motier of fart that in Dan-fanaghy 66 per cent, of the number of families in that Trains been horses t...No. I do not at all 9045. That would be news to you !-- It would

certainly 9044. Do you know the Union of Innishawes t-9045. How many families do you think keep hooses

in that distinct !- I don't know, but that is not nearly so congested as Gweedow \$0.16. No. but you say you know all the concerted districts. I want to test your knowledge !- I could sell you about Daugles.

you atom Dangoo.

1047. I want to test you first about your know-ledge, do you know that in Innishowen 54 per cent. ledge, do you know that in Intiahawen to per cent of the number of families keep homes, and do you know that in Milford 98 per cent of the number of families keep herses there i—But I have no way of clocking these figures. You are asseming that those figures are correct.

9046. They are compiled from figures furnished by the Registrar-General. I think you said you know the Registrar-General, A. S. Yes, all the conjected districts !—Yes, all the conjected districts !— Do you visit Doneyal constantly !- I have been there two or three times.

\$050. And you live in Donegal, do you !-- No , I live in Leitrue, close to Donami. 9051 Have you been in Mayo t-Ver \$050. How often have you been in Mayot-Tye or three times.

9053. Do you know whether you have been two, or three times there !—Yes, I have. 9054. Been three times all through Mayo !- Not House Love sales all through Mayo.

9003, When part of Mayo have you been these times in 1—To the Westport district.

9036. I am speaking of the converted districts of Mayo. Have you been in all the congested districts of Mayo three times !-- No; I don't suppose I 9007. How often have you been in the congested districts of Galway !-- Two or three times, too.

9056. De you renumber how many times assetly?

—All through? Well, I have been about Leanure. and all round about there, I suppose, three 5059. Have you been in the consented districts of

Galway or Mayo before the formation of the Corgroted Districts Board I ... Ob. we-9060. Have you been there since the formation of

the Reard I - Yea. 9061. And in Kerrt-No. but I have been in 9035 Or on account of their produce not turning Coek, about Schull, ous wall !-No, I know there were 264 applications 9062. You have not been in Kerry's-Not since the formation of the Congressed Districts Board; I

have been as for as Bantry, all round by Schull Skibberren and that way; that would be in Cork. 9061. You have not been in Kerry 1—No. 9064. Chairman.—Not since the formation of the

Board. You have been before and know the country? Oh, yee. 8050. Mr. Where E.—You referred particularly to Danelse I think your correspondence with the Compated Districts Board has dated back for some time !-No; I have had no correspondence with them for the last two or three years.

9066. Did it not begin in November, 1891, when

they were formed !-Yes, quite likely.

· 9067. And went on in January, 1893. Did it not 1 -I during it did. I cannot say. 2018, After that correspondence did you write a 900X. Assure that correspondence one you write a gest many letters with reference to the proceedings of the Congested Districts Board 1—Yes; I dis. 265. Well, you have referred in one, I think, to

Denrice !- Yes ; I don't know that I said anything particularly about Dangloo 9070. Did you say in a letter that out of a popu-lation of 12,000 at Dungloo, who were fortunate

cough to be the possessors of some kind of pony mare, there were not mere than 30 !- Served by the Congested Districts Board's house.

9071. You did not state that. T am referring to
some latter of 18th October, 1895 t-West that a

muhlished letter ? 2002. Yes !- What did I say! 9773. That cost of a population of 12,000 there were 50 who were fortunate enough to be the personner of ages kind of pony more!—There were 30 manuscread

by the Board's borses ; that I have from the District 2074. You did not put it that way !-- Would you kindly read the context. 9075. "The Beard's money must go in prizes for heep good mares to got good feels, or for keeping a local at first cost for purchase of perhaps £300, and at an arnual cost for keep of £250 for the 30, for

instance this year, out of a population of 12,000 at Dunglos, who are fertunate enough to be possessors of some kind of pany mars?"—Exactly; 30 people cely posited by the Board's expenditure there.

1076. Do you know that there are in that district generated manusch... No. I do not. Theonly other stalling. when I was round there I went to see him, I wan told he had had twenty-seven mores, that was fiftyseren altorether served in the district this year. I wrote to the Registrar-Genoral to know if there was my return of manus for these districts, because Mr. Micks rat in a return of 49,000 borner as being in Milits pat in a recount or so, over notice as song as the congested districts from some returns which he mid were not yet published, and I wrote to the Engis-ters General to know where I could get those statistics and whether he could give the figures of the

nearlier of merce in those districts, which seemed to se the important thing to know, but be said he had ne statistics of the kind, and that the numbers Mr. Micks had stated of homes generally in the district and the return had been cont in to the Commission and therefore belonged to the Commission and I could not have it. 2017. But when you say there is no burns-breeding is the district you don't know the number of mares

is the district?-I know the number of mares that ware rerved in Danglee. \$078. You don't know the number of wares in the district!—You can pretty well judge from that.

9079. You think that is a test !- Oh, I think so,

2000. Do you think most of the mures that were served beloaged to what you call fat shookeeners !-In that district, no, because that is one of the excryticoal districts where there are a lot of small youise 1061. Do you call the Dungles district an excep-

tional districts - Yes, in that respect, in respect of there being a number of ponies, but in the districts about me only gentlemen and shopkerpers have profited 9082. In what Union !- Ballyshaunon, and various

R63. Has there been any horse stationed at Bully-shannon 1...No, Donegal.

\$034. Not there now !-- No. \$035. Taken away !-- Because there is another usen

who has a Suffelk Punch which is preferred.

1004. That is the reason, you know that is the reason that influenced the Board — I imagine so, I ave got a letter from the gentleman, he maps the Board's barne has been getting nothing to do.

9037. That is what you imagine !-- That is what 9088. CHARGAS.-Well, I may take it. Mr. Tottenhave, from you, that you think on the whole with the exception of a few favoured spots that there is no use in trying to breed horses in these congested districts ! 1089. Therefore, as a whole, that the money is wasted !- Nobody there keeps a horse for breeding, not

even the largest farmer, he comply takes a fast from his mare just to belp her to pay her way, it is a hyproduct 9010. You think it is more or less wasting money to

spend it in trying to encourage here-breeding in these districts !- I think it is a memorous thing that £20,000 should have been spent in that way. 2021. Can you not my yes or no to what I saked

m. Do wa think it is a waste of money !- Decidedly 9052. But beside that fact, assuming the money is to be spent there, do you think it is spent in the best way, assuming a certain amount of money is to be

spent in the congested districts for encouraging horse-breeding, do you think it is spent to the best advantage !—Desidedly not. I object to the kind of horses ; the only kind of borne that is suited for that ortizaler part where there are a lot of ponissus some kind of a cob; of course different parts of the congested districts are different. In Insistowen, for instance, they had a cot and a Hackney this year, and they objected to both as being too light; what they have to do there is a certain amount of phosphing, and a good deal of very heavy outing to berry, twenty miles of a bad read, and they want a larger kind of hous. I believe it was intended to send a thereophined up there, a thoroughbred that has been serving at the stod farm at Peay this summer; this would be atterly ridiculous; the people would have nothing to do with him; he would not would have nothing to do with sum; he would have said any more than a light Hackney or each. Then again, along the cost there are other phoses, for mintance, near local Listinia, shifffied. The old Lord Leitnin used to keep a Suffell Pench twenty years mgs, and the people there my that was the most serviceable horse for the district, and afterwords when the young Lord Leitrim case in (the late Lord), he kept a Clydaelale, and then an Arab and a

again we now common runes. Cases we within 6000 and a half miles, the Board loss had a light Hackney and the mures too light for the Suffolk Funch they used to stard to this light Hackney of the Board. There they don't keep punies in the same kind of way as they do about Dingios. They me much lorger aguin short Dunfanighy. It is different too in other shoon where there is heavy carting to do, for instance com Gweedorn or anywhere about there, where they eart from Derry, forty miles, there they want a large breed of horses, but now there is less want for horses. owing to these new light sailways. There used to be a lot of carring from Swinford to Bellinghulserous and also to Cliffico; all those herses are now knecked off the road. The small occupions used to keep a horse

thoroughbred, and this year they have gone book

nosin to the Saffolk Pasch. Close to, within one

secrely for casting purposes.

900d. You don't think that the money that is apent by the Congested Districts Board in encouraging the breeding of borses is spent in the best way? No; I object of course, to the expenditure on horses at all, and also to the way in which it is being expended. The number of fools that they my they have got is about 5,000, and the feels have been selling

this your at 50s, and calves have been selling at from £3 to £5, and if the same money had been sport on CHARRAN,-We have nothing to do with that, does

9036. Mt. Wansen.—Yea take then Denglie as a specimen sister for your breeding!—You posies being required, yes, Dongles and Connectors. 1080. That is in the Universe of Glenties !—Yes,

Me. William Roberto \$100. Courseas..... I think you represent the Cork Agricultural Society !- Yes, sir ; I was caked to come

Jan. 1, 1911.

Mr. George L.

9000. Are you forming your own opinion as to the best class of horse to send to these districts, or is it the Board of Guardians to send a Welch cob?-No; but I know there was a petition from the Board of Guardana to send a Suffolk Punch. from information received !-- From what I see and hear, both, Mr. WHATAN ROUDER, Birwinic, Bullishassiq, Cook, examined,

houses but our principal thing is for hunters. This year we had 274 entries for our show, and in that only 95 for all the other classes combined.

9100. How long has your toolog been in the habit of giving prime to this value, or something like this value!—We are about five years increased to this much; this year, I am sorry to any, we had frightful weather, and lost all our gate money, and I am afraid we will have to reduce our prince post ver

unless something turns up. 9110. What has been the effect, in your opinion of the efforts of your Society during the last five years? -I not as steward every year of the horse classes, and I find as far as I am a justice, that the horses are improving, and since we have increased the money the entries have increased likewise, and we have very good sales at our Show. I could give you the entries in each class. In the aged horses we don't have as summy entries as in young horses, which shows that the horses are sold out of the country. We have

always good entries in light-weight four-year-olds, nearly always our best entries; we had twenty-seen in that class this year. 9111. Is there snything objectionable in that, it amounts to this that the hopers are sold !- The housers

are taken out of the country when four or five years 9112. Are many horses heed in your country for purely agricultural purposes !-- There are. Besides being connected with the County Cork Agricultural Society I am working on the Royal Dublin Society's robence, on the committee, since the first year it was storted. I was inspecting mares at a lot of their shows in Co. Cork, and this year, I mest say,

and less your, the way the scheme is working is a 9113. Putting aside agricultural horses what do you consider is the most profitable kind of horse to read !-In the County Cork there are two classes of farmers. But the principal horse we want for the County Cork is the thoroughbred horse, to breed lunters. In some parts of the country there are

small farmore that sell their portings, and in the local fairs the colts got by eart house sell better than the huntres. But for the general thing for the im-provement of house there the thoroughbred humo would be required more than anything else.

9116. I don't quite understand you !- For the general run of the country we want to breed from thoroughlood stallions.

9115. Your object would be to breed hunters!

For; I am a tenant farmer myself, and breed horses,

Improvement Society of England, and they sak us to put I have to loved them to make the reat, and I take an interest in them all over the country.

9116. How is your part of the country off for thoroughbred street-In some parts of the Cornty Cork we have plenty of borses, but then there is a district from Bandon, along to Cleuskilty and West Cork, and the Macroom district, where there are very had horses. This year, I am glod to say, Sir John Arnott in getting in some stalliness for his tenants, but they may be confined to only one district When the Royal Dublin Sciety's first attent came in they leasted a horse in West Cock, and J. think that did more good than all their schemes since; as far as I could see, the farmers took at

interest in it and showed their maron.

9101. Can you tell us when that society was formed and what its objects are?—Wall, the society is a very old society; I don't know the exact date it was formed

but it is a very old society. As to its objects, one of them is to encourage horse-breading in the county, and then we take up cattle and all agricultural purposes, 9103. But among its other elects, can is to en-

courage the beneding of horses 1—Yes, mr, that is its principal object I think.

1(G) What means does it take towards that ead?

—We hold an annual show and we give a good lee of prizes. We give amenally about £4.00 in prizes at our prisos. We give annually about £430 in prisos at our show. Some ten years ago we were giving about £170. summally in prison, and we increased that, and this year we gave £430. We have different classes for all seets of

houses, but our principal thing is for hunter; we try to encourage the hunter breeding as far as we can 9104. Could you tell us to what classes you give thees !—I can. We give, first of all, a prize for seconglitered stallions. The last thoroughbred prizes !—I can. We give, first of all, a prize for Chorcoglibred stallions. The best thoroughbred stallion in the Stul Book, calculated to get weightcerrying hunters, and they must stend in the province of Museur for the coming year. Then we give a

prize for the best gelding or more, not less than fiveyear-old, said calculated to carry lifteen stone and na-9105. In the hunter class !- Yes ; and then for the best gelding or mare, not less than free-pear-aid, for the less 137 to 10 stons. Light huntre clear spain, for the same age, from 13 stons to 137; we give that at aged homes—409 in prices. Then we commence in four-year-olds, and we give, for the best four year-

old galding or filly, to easily thirtoon stone and up-wards, first reits, \$25; we see to concerns this class as well as we can in Cock; in that class we give £33 in prime. We also give a class for light weight fouryear-olds, that is from twelve stone to thirteen stone seven; and we give prizes for three-year olds, £37 in that class. For builting perposes all these are. And then for two-year-olds, the same ; and we give a price for yearlings 9106. Any price for thoroughbrod stock !-- I am just coming to that. And then for brood mares we bave two cluster, one an even clust. I will just read the heading we put to it-"For the best brood mare in feal to, or with feel as foot by a thoroughbord home or a registered hunter sire, which in the column of the

Improvements commy on negative, such they are us to pro-in that the mare neight be in feel to a registered harder size. We have none of them in Cork, and it does not make neach difference then. Then we give, for transifarmers, prices under the same heading for brood mores. 9107. What age are the brood mores I—Wo don't limit them. The only thoroughbrod class we give for Hunt there. Are only increspined clear we give nor the produce of time-orighbred stallions is for yearlings, e give a prim for thoroughbood yearlings.

9108. What is the prize for breed mares !—We

judges is hest calculated to produce high-closs weight-

carrying hunters." We get a medal from the Hunter

give £97 for the two classes, £17 and £10, and besides we get a gold medal from the Hanters Im-provement Society. This year I believe the Hunters Improvement Society offered silver medals also for lasses. Then we give classes for cobaund portes, and a driving class, and we have a class for agricultural

3137. Do you find his young same bought up very mash in your country—Any good two or these year-cleis, whether gridings or mans, any picked up; in fact, they go to the houses to pick these up.

1158. Are there makes in the district where you are they are no stellines; I dislay quite make out.

where that was that you referred to f-Bandon and Jan. 8 1805. Mr. William in the West Cork District. Magroom is one place ;

there are hardly any stallions there. 9139. Are there good mures in that district!—
There are some good mures; plenty of mares to breed good hunters in that district and Glonakility, around the Denmanway district. There was a stallion

the Demmateway district. There was a stalling located in Dummanway under the Dublin Society's achieve, that was "York."

9140. How do you account for it that the stallings don't go down there if there are a sufficient resulter. of good mores b-No gentlemen there over for some of gove neares be no government there is a good stallion and there are to Banden; but he is for the teamnts of the district—"Reyal Meath." I believe also near Skibberson Mr. Townsbend has get some

stallions very lately. 9141. Thereoughtendt-Yes. I think he gave evidence before you 9149 Mr. WHENCH Clentrevener." In it not !--He was there. I am not sure los he left it. Mr.

Townshoud payo evidence before you. Towastesia give evidence house you.

9143. Lord Ravellouxers. —Are there my half-freel
stallings in that part t—Well, you could not cell them
half-freel. They are breel some way; you don't know
what way they are breel. They call them half-freel.
The cluss may be what you like; they are got by thoroughbred horses. There are none with three or

9144. But they are objecty got by a thoroughbred home 1.—There we seem of them out by a threspethead hoese; and then if they have a good-lecking cold out of a common more some of the fermers loses them

-There is some of the Clydesdalo in her, and thou got back again to the thoroughbred horse. 9146. Are there may Civientale bornes or Claveland three There are some Shires and that sort in our district and in serve of the districts between Denden and Skibbereen. They like the Shires there. They sell their colts at the frim as yearlings, and they sell

9147. I take it that you think the old solume of the Dublin Society worked botter than the reward one—that is, sending the stallions down and sub-sidisting them 1—You, six, it certainly did. 9148. Do you think the present solume is good also if there was inflicient mency to give priors to moves with an eye to keeping the younger once in the would be a good local show going on and give more

the money that is given the farmers don't show the aviditing the same mures. You don't get any stran-9149. But if a scheme could be worked, an omalesmation of the two subsmen together, you think it would be good?-- Yeu; if a stallion was sent to the part of the district le was wanted in, and there were Government shows of mares in the other parts of the district; but then the stallion owners should be subsidized to reduce the fee for farners. They cannot

afford to pay for good stalliess at the peice ther are charging.

9150. That would be somewhat in the old form. the mores were sent to the different stallions, and a operation of the service for was paid by the Royal Dublin Society I... You and when the common of the mares poid their share of it down when the more was passed, because I heard some of the stallion owners saying they never got their share; they got their share from the Deblin Society, but not from the mare owners. I never found it hard to get the money from the favorers at shares the farmers at stores.

9151. Did you ever hear of a stallion owner paying semething to the owner of the nurse to being ber to his

stallion 1-I have heard of at too, siz. I think if the

grant that is given for the county was given many through the Agricultural Society or worked through a committee. I think with such a large conjety, more thing between 500 and 600 members, they could alloonto it themselves, get their grant from the country direct not from the Dullin Society. 9152. Colonel Sr. Quinvin -- Yours in perhaps, one of the largest districts in the county for breeding

of the largest districts in the county for orteding riding horses, in it not !—Yes, sir. 9153. And from your country a great many of the houses that go to our Government and other Govern ments no as trooperst. There are a great many of then sold as troopers 9154. With regard to any alteration of them, do on think that the introduction of the Hackney in

likely to improve or enhance the value of the hunter class, out of weigh the remounts co or !- Well, sir, I am not going to speak of borses I know nothing of don't know vory much of Hackneys, but frees gentlemon breeding houses and owning Rackners in the county, and hearing them talking of them, I think the Hackney would disimpreve the keeping of house all over the county. This is the general equator, but I den't know anything about Hacknoys 9155. I only asked you the question because there is another question. With regard to the horse which

you say is used a great deal down three, the Shire horse be got a wredy clear of horsest. Yes vi-With some of the small mares he breeds a useful surt of you house, which sells well as young horses at foirs, 9156. You have not som any of the predice of the Hackney round that country !—There is none of it in our district yet; there might be some in from West Cork, near Bentry, hat I did not see these; lest I veight say the present equinion of farmers and of 9145. How is the common mare usually lend !heorders of horses in the county Cork is against Hash nevs, and of course some of them know nothing of them, but the dealers that how their horses and are in the habit of attending their fairs are always preaching against them, so I think the formers will not try them

> 10 con help it. 9107. Mr. La Teneren.—Your syidence is that if a man wents to sell his colt as a yearling, he is more bred borns, and if he knows it to three years old it is more valuable if got by a thoroughired home !- That cannot afford to keep their colts more than a year, and faire than if get ler a thoroughtred home 9158. Then, in the opinion of the formers, the foult or yearlings got by a part-borns fill the are, seel are more presentable animals than foals or yearlines on hy a thoroughteed house !- That is a few of the small farmers, but any farmers that have laude who are

able to keen their colts on hardly averaged their knoter foals at that age ; is pays to keep them on. 2109. Of course in these districts west of Benden, with which I am perfectly acquainted up to Cloushilly, the firmers are, as a rule, poor, with small holdings !— Not exactly between Bassion and Clouditity. There are some good heislings there, but in the Denmenway district and round that way where it is a lot more

mountainous they are not as well off. 9160. Up all that valley, Innorhannon and the Bandon river, there is good home-buseding land!-

Nes, siz.

9161. Which is at present entirely ensured hyany
thoroughtred stallion i... Yes; we have none at all is

that district. 9162 Since "York" was down then he" York" was in Danmanway, and we had "Baron tractings" there the next year after "York." 9163. But the farmen down there would not pay a beavy fee for a thoroughbred hereat—No, sir, they won't pay the fee that is charged when they are a Pellows will be coming to them and saying "You need not be to the trouble of sending your more away; we will broug a stabbon into the yard to you."

9161. But the £1 2s. 6d they paid under the 6rst Eoral Dublin Scolety's scheme was the utmost they could pay 1—You, and they paid that to me very freely as accretary with Mr. Henrock for West Cork at the Moore.

as secretary with Mr. Herrick for West Cork at the Shows. 2165. Therefore it would be quite impracticable for any private individual to attempt to supply that district with good and suitable herrics. You would not

district with good and antecody fortics. I are would not get a throughhold better of the chas of "York" for less than two or three hundred pounds. It would not you man to keep that harve oull let him out at £11 its could not afford to do it at all.

his centre rapt marror to do to to min.

4166. In fact, if that county is to be severed by
thoroughteed sizes it must be done by some subsidy by
a public body i—Tex, unless we get more landlards
the Sir John Armett to turn up there,
3147. In North Cook there are a lot of good

stallines I—Yes, etc.

0168. There are a certain number of hilf-bred
stallines there that breed very useful hunters 5—Yes,

9160. There is "Gerrott," for instance; I don't know whether be is living!—Yes, and there was a hear called "Old Rockingians" in South Ceek, and call by hiss out of some of the old mores up to 20

gets ay him out or scree of the out marks up to 70 years old are withhold yet, they are such very good hereus.

1770. I think thore are some some of "Garrett" covering too!—I believe there are.

2171. I has been pointed out to us by some of the

9171. It has been pointed out to us by some of the vitamess that it would be extremely difficult to get half-brid sires, the seet of half-bree sires represented by "Garrett" and "Old Reskingham." Do you like it would be nowable by the seet of the section.

by "Grreett" and "Old Reskingham." Do you think it would be possible in the county Cock to get some? Do you see these out beasing I—To get some stallions get by them? \$172. Book stallions as "Gerrett," or nees of "Garrett," or "Old Reskingham?"—You would get

recording to them of course, but "Old Rockinglay," I believe, has gone; but the marea are there got by him.

912. I mean stallines. Do yau, as a matter of fast, see well-bred hunter-like stablious like him in Octs —There are none like him near Gerk. There within a few in the Dakalidov country, but that I

We have a lot of geutlesses from England that come
to our show and buy business.

9105. Main they have a few or they are, sin.

1015. What olsses of more hay agricultural horses?

—We have dealers in the small towns, thippers.

m — We have deelers in the small twoms, shippers, while state of the control o

de est o years ago --a coma nos tell you o de es d'o years ago. There are e godo many. Since of t. the people sidek to them year after year in their breating. Lord Bavtmosevar.—There is one question d. Fallou to sale year. De you know why the Royal Dublin Society wanted to have second two or there year old Bline sidered to registered stallous 1.—They wanted to announce former to have free year.

Id I wanted in early year. Do you know why the Bergal Dublin Steeley wasted to have seemed two or three years of dilities estated to registered stablous I—They wanted to an extra fewn year parties on et that they could sell them at times or flew years all more I, a having those besed from two or three years all more I, a having those besed from two or three years all more I, a first that, and they would have one good cold kept.

I thin't that wo it.

Jon. 6, 1542, Mr. William

56. W. E.

a three year old with a foal at foot, to take out of the country !- That is it, that when a faster had his more stinted be should keep her. 9200. CHARMAN.-Anything also yen would like to say to the Commission !- Well, the only thing is that on I sold you before about our mainty, that we are

afraid we will have to reduce our prizes this year up. 9190. Partly that. Is it probable a dealer would not buy a two-year-old filly if ahe was stinted, or has we get some share of the Government great to improve the breeding of house in the district. We do all we can, but the weather was awail on us the year, and we lost nearly £500 on the three days' show. \$201. You think your local effects would be attended with more surcess if you had larger manual -I do, indeed.

Mr. W. E. RUTLEBOR, Corra Vella, Hollymount Co. Maye, examined.

9202. CHATEMAN .-- You measurestary of the Hollymount Agnoultered Society, are you not I - Yes, I 9503. Do yen live at Hollymount 1-Yes, in the - neighbourheod. 9104. I presume that society is like the Cork Society just mentioned, that it is concerned with agricultural motters generally, and devotes its atten-

tion also averag them to home bevoiling?-You tion even arrived term to hecon-tevering :— I to.

2205. Now, in year part of the country have you
get any specimens of the old I ish more !—Y es, said the
Hollymount Society are very saxious to do everything in their power to trues back the old Irish basel, for we know by experience that wherever such a more turns up that there is no better nothed of getting a mare and the thoroughboud stallion, and, therefore, we are taking steps to trace back and revive the old breed if we possibly can, and we believe that it is not

at all impossible to do it.

9300. Have you any idea how the animal you speak of was originated or land!—Wall, you so in years gone by the old Irish mure, it was a necessity to hive her a good hardy active mimal. Before rallways ware established the trade of the country was carried on from the city of Dablin to provincial towns by carting shop goods, and an animal to live on the reads from day to day descring 20 to 25 cwt. from Dahlin to Sign or from Dahlin to Castlebar or Wontport should with eggs or something else. When we opened a class for little agricultural horsen in became my duty as secretary for the Hollymount Society to make all the inguity I possibly could about the breed, and those men who know it, the oldest and most intelligent I could refer to, pure me a good deal of information. At that time they lad not ears, and this Irish mare was often obliged to carry two, the head of the home and has better half had often to set on the back of the old Irish more, a soldle and pillion behind. It took a good animal to earry two twenty miles. She was a bordy milest, had there are some tences of that heard to be found. That continued until after the famine and then the Clydesinks were introduced to the neighbourhood unfortunately, but in the days I speak of it was processory to get up strongth, and the cely way they had to do that was from the hunger stallions kept by resident gentlesson; it was import-ant for the men engaged in this carting hasiness to have strength, and they kept in those days some of the good filling, and to get additional strength they had to go to the benter stallion. A good many of them were kept through the ecuatry, and there was a dash of good blood in the old mara but then when the South farmers came over soil took farms in my prighteerhood they introduced the Clydesialo, and the Irish keed was found so valuable that all the high-class desions followed the celt and gave a high price for it, so that the farmer could not regist taking it, and in that way they have been wed out of the country, and then for more strength they had to fall hack on the Clydeschie. The Clydeschie was introdroed by Mr. Laurie and Mr. Simpson, here Scotch

that were introduced they are not good for green inc-

hunters. They will have size but emissish they see And another class I bred from myself was the Cleveland Bay, and I was very sorry for it. That was a house that was intoduced by Mr. Pollock and bought from him by Mr Simpson, a grand looking horse to see, like a hunter , he was a dark buy stand ing on black logs with pirety of bone under the knee, and well topped, the cell was also good and would took a fair price on account of his size and appearance, but when you came to work him he was a sleg. The more who bought him from me came bank and said he was very spray ever to have had anything to do with him. You see in a district breeding branters that strain is injurious, for if a celt looks wall and you get a good price the come man won't come back to you again for

another. Those three eleanor, I believe, were injurious to the hunter breeding districts. \$207. Well, the old Irish mare, Mr. Rutledge, you speak of, originated in the necessity for a barely animal with some breeding and sodowners, becarse all the work of the country had to be done by parting, and people rode about a good deal; now that state of

and posterved !-- You I think there is 9208. The natural necessity does not exist for it, as it did formerly !-- No, but in districts where hunters are head I think it would be well worth the while of any society to do everything in their power to revive that breed, and there are some strains to be found that I think we should follow. I would sale your lockhip to look at our prior list for 1894, I have it here. We have three classes, first, the thoroughbred alone, for the best thoroughbred sire, first prim, silver model and £10; second prim, £5; third prim, £3. The second olone is for the holf-bred sire calculated to get hunters or harmens herees—first prize, illust medial and £4; second prize, £2; third, £1; entrance foe, 10s. Here is the class I with perlicularly to draw arms attention to class 3 for the hest Irish agricultural stallion measuring not less than 15.3, and under the knee 9 inches, calculated to get strong, active, clean-logged Irish form houses or weight-carrying huntern. Any stallion entered in Class 1 or 2 not eligible. First Price, silver melal and £5; record, £3; third, £1. En-turnes fee, 2s. 6s. In that class we intentionally charge a very low for, to encourage the mea who keep them to take them out to be exhibited, in order to pick out the old study. You see there are three to pink our use out stance. I on see there are three classes, and we believe that you might as well try to do away with the Sectory if you falled to maintain any one of the three classes on which the Sectory rests. We want the aristocrasy, we want the middle classes, and we want the possantry, and we want the corresponding classes in honorfosh. The farmers say, "If you send us light thorough books they are no use to us, they won't be suitable for our work," and if they go the first year well the feed by that crop will be tolerably greed. Well, if they keep the feel bred by a thoroughbred home—and the farmers in my district don't buy, they year their own foals or buy from each other—if he sends that filly back again to another threenghbeed horse it becames lighter and lighter, and The Suffelk Punch was introduced by the the result will be that the snimal won't be suitable for the formers' purposes. If the Irish agricultural horse rish broad got crossed in that way, and these brends

could be bred out of the old strain, and bred pure, if you

and pri a mass out of the same steary, and to loved, so they you would save bless as a finalistic to full back upper, and if you just consider the number of lower liberal terms are all 700 stabilists certify in form; I believe there are 7,000 stabilists certify in term! stallines, I think, would be only about 550 of the 500. The blushness than would be brown. Hotelton of the 100 stabilists, and the 100 stabilists of the greatest and the residue stabilists. Then the 5,000 one 500 which previous a large number of Stabilists the 500 which previous a large number of Stabilists the 500 which previous a large number of Stabilists the 500 stabilists of the 100 stabilists of the 100 stabilists of the 500 forms. Of this clear I trust two that

have the first the second of t

pickel on.

9110. Do you know how these herees were beed !—
This heres of Levi was bird by another horse that should the neighbourhood, salled "Gild Heeraless," this here's near is "Hercales II." "Old Hercales" was get by—I think it have his politices in the entalogon. 2911. Do you know what that datas were "—The skil

9311. Do you know what the datas were t—The old litch trave. 9212. Have you ever seen them t—No; but I have seen "Recoales." 9113. Tell me shoot the datat—There is no Clyder-

tale blood in there. These better some, a propose, about eighty mazes in the concor. 2214. Have you any idea how this breed of Irish wares, originated — Well I believe, as far as I know, there is some of the breed in the country, and they have been crossed by these hunter stallions that were got by a thereaghbred. There were not so many thereough hyede in the country then as there are now, There were some good care. I believe the old Marquis of Sligo brenght a good home into Mayo, called "Wedge," Some of the gentlemen bred brunter atablicus from this, and the farmers that had an eld Trish mays sent them to get size and substrace to the Aunter stallions Lent by the centlemen. who owned them on those days, and who used to have were then at the end of the season. But as the old men tell me a race new is not to be compared with a hoese is done you will see his tail wagging up and down as if his life was dropping out of him. Then they had so so three miles round, and three beats;

they had to have some staying power.

2115. You have proben gracerly shout the improtance of the circs. Do you stirch much more formation of the circs. Do you stirch much more formation to the brooking of the sizes has to be brooking of the dams.—I althout good importance to both. But with regard to clear, you have easily the hall-fred class, I wish to draw attaction to their I than it is very important; we want, if possible, so have that a hunter class, and I bolive it would be a good billing if that hall-now like could be get if de-

so the state of th

Sir,-I beg to inform you that the proposals in regard to the Irish section in the record were favourably something by the Council yesterday, when the following resolutions were covied 'The Compution recommend that provided fifty entries of hunter stallions and mores, Irish bred and Irish owned, are received for vol. 7 of the Record a serverate section of the book will be reserved for the regulary of soch salmols under the designation of Irish benters with a county index, so suggested. Sud. To sasist the scheme of registration in Ireland the committee would excentrated that the Council do issue to any essociated Irish society a negrination book contribute fifty certificates for distribution to their respective subscribers enabling them to register their hunter mores members rate I hollers will be a cheap rate, the rate to non-members, I understand, will be 10s. and to any provincial society that wished to take it up it would be Da. We believe is would be more eco-venient to register in this Henter Stud. Book that is venimi to regressor in this limiter true are a laready established; that it would be an additional advantage, provided it is separate, to have them in the heak in Lepton, where beyon would see them mandiately and know what class of busiess were to he had and how they were bred in the different distriets. That is our principal reason for making this the other Irish societies in a circular letter, and as the Council have striven to most your views, I hope that you will and covery to obtain the co-mercifor of all I wish modelies, so that the section proposed may he well supported. Nomination forms will be proposed and seat out to you." I believe they will be sent to other provincial societies as well, 9231. To that your society agreed !—Yes.

2921. And that is the arrangement you have made!

—Yes. We are anoisus to have these hunter we bare in the Sind Rock, because we are anxious to have from them, and if we can haved gure-bred Irish hunters to stamp them in the course of a few years as

an Frith breed.

9233. What steps do you propose to take to do so?

—That is just when I want to capitin. Here is one:
I would hand this in that you may look as the pedigroe, a here colled "Leckinvar," You will see his

Mr. W. E.

for as it is all the good colts are taken away out of the country by cloalers, and of course the woost once left and that is the great cause of the inferior class of house is the eventur. If there is a seed one the dealer offers such a logh price that the owner won't We want leacy him, and then be goes as a golding. We want to keep some of the best Irish beed colts for this purpose to have a jupe level hunter class. 9295. You want to establish it as a distinct class?

-Yes. We want to keep up a mero of equal breeding and equal size to the horse of that class in order to breed from them. Then if the different reversarial assisties would do that surrouse we open a class for yourling colts and unother class for two-yearold colts at world be necessary in order to induce men to keep good leanting colds to be able to give high prizes. It is a truntisesome thing to keep a colt. You have to give him special care, and if there is not some inducement held out the keender won't keep then for breeding purposes, tie will take a high price from a dealer, and then the ariend becomes useless for stud purposes. If other provincial societies would do the same thing, surposing they had these two clauses established, in each class there would be then would open corresponding clauses and get all the prize winners up to the show at Ballsbridge to compete, and the prize winners there to be bouchs for give them out on the three years' system. We are anxious to not these 2,000 correspon stallions replaced

hy younger hunting stallions that would be selected in that way, proved to be properly bred and qualified to he catered in the Stud Book. That is what we utu arraines to work out if we could possibly do it. We believe by that means the breeding of hunters would D220. You still appear to me to attach great im-

\$227. Well, I call your attention to the fact that ron have said nothing throughout as to the design distr of keeping filles i-Oh, yes, to is a mest important

thing.

1238. Well, you have said nothing about it!—If you have only patience with me. I am afraid, per-

hape, I am tiring you 9229. Not at all, I only want to know what you say shout these things !- Well, it is a surprising thing that there are so many good kunters to be found in Trelved, for take them as fools, the very best fools are bourist up and taken out of the country, then year are left weeds as rearlings, the best are taken bosseld an country fairs, and then you have left the I week of the voorlings, the more modies to two-yearsids and so on. How to induce the facutes to keep a better close of maron is a very important thing, and I think it is onfee mornible to do it if we had control. Of ocurse if there was planty of money it would be on excellent thing to continue these reign that the Royal Dublin Society gives, but surpose we are obliged to work with the account we have, and we can get no new, I think it could be turned to better secured. P330. In what way i—Suppose we get £100 for the Crossty Mayo, I would not give one possity of that in relate under existing elementance. If that could be

turned to account in this way : if a lew farmers could be get to co-operate, and some gentlemen of the distriot as well, my twenty, if they would pay \$5 each, or guarantee the payment of £5, that would bey £5 cash, or guarantee the payment of £5, that would be amounter£100 a year; if we could use that and borrow acone farst, and to one us stud farm and to have un the fouls that these men sell. For take it in this way. who hee a taste for a good seare will soud it to a thereughhred borse, the men I sax ellufing to must sell their foals. He sends in his well-bred foal, and will not get more than a man who smale to a Civilea. dale. A Civilesdale looks planny and fet se a feel, and

a mean who does not care about breeding, and doe's understand it, won't give for the well-bred fool -much. That man is discouraged, and won't go back be a society established in this woy to buy up and raise the price of the well-heed fool, and to been that feal until it would some of age or to give the farmer menue to keep it and to take good over of it. As a rule firmers don't take proper care of their foals, and they them when these small farmers are forced to sell. \$231. What would you do with them when you had hought them i-I would then you then, I would have also washines if we had means, and two-year-old when the farmer would be obliged to sell, I would keep them until four-year-old, and then if the give the same price to this society that they would

give to the dealer, it would enable the society to give would be a far better encouragement to the farmers to hered well-lived feels by giving them good prices, than by giving a few pounds in prices at lead shows, 9232. You would like to got up a society to give because, I believe the well-bred feel is going for last because, I believe the well-bred feel is going in,

than its value, I would like to increase the price of the well-hard foal to indoor the farmer to price rate the value of it, and I believe it would be a great 9233. That would have no effect upon keeping them or the country, would it t—Oh, yes, I am just coming to that, I think it would be the real thing to induce them. There must be a good filly, perhaps, among

those foals, and if she gow up to be a good three year-old I would then say to the furmer that wanted one "Here is a filly, and if you take her, say at £20," ortance, almost exclusive importunes, to the size !a farmer won't give more for a filly than £20. I would then lesse that filly. I would not allow the former to part with her, because if he has power to do so he will take the high price and it will go out of the country, but the filly should remain the property of the Society, and the farner should get her paying £3 a year. I would slap have a shaplard on to buisfet, I would have no mare under 16.5, with corresponding bene and action, if you had that then, to those farmers that would have a taste for them, and would be anxious would have a cases for them, and would be annount to get the possession of a good mare I would say "yes, I will give you this mare, you pay it back to the Society at £3 a year, you will have a lease, but if you get into dold, this mare is not your property, she must not be sold." In that way the favorer would feel it was his interest to keep a good mare, sadin the course of too years he would have a number of good foals, and the Society could help him out in selling there, I would register those mares and how they were hred. If the former himself could year the

> 9234. Has your Society tried to get up an associa mentioned !- No, it is what we would do if we could horrow success that in the scheme we would wish to corry out, and we believe it would have a green

for! I would encourage him to do it.

tendency to improve the level of horses in the dis-0335 I take it that you think generally that the introduction of Clydeschle and other blood has been more or less detrimental to the country har Very mode

in the line of breeding hunters. 9:36. And was think the best thing wen could dosoon, and you think the cest targe yea could de-is to try to get back to the old Irish strain 1—Yea. 0237. I would just like to sak you again about the position of marres because I think when you look at your evidence you will see that you continually keep talking about the importance of the stallion which noholy denies, but you say nothing about the in-portance of the mare, or very little !... I say that we would be saying to lease to farmers muitable filler.

4430. Do you think the old Irish mure sent to a eritable stallon would moduce the kind of knater con require?—Yes, and that is the experience to of you require :- I co, and that is the experience too or found by experience that when they continued to send

the filler got by thoroughbrois back to a therough-brol that is two or three generations they got weeds. had nothing to fall back upon. gett Ware there many house syldined in class 2 at your show, half-bred sizes 1-No, there were not gamy in class 2, but there was a considerable number

9240. But I asked you shout class 2 !- There were only three, but last year we had a larger number.

(64). I was asking you shout last year !—I was referring to 1834 when we opened the class 6242. Ferhaps you will give us the numbers for 1894-93-66 1-Class 2, there were eight last year.

6943 That is a considerable increase to A years considerable increase \$214. Then as to class 3, has there been an increase

is that !-- Yes, there were five in class 3 lost year. \$245, How many in 1894 !-- Ten. \$244. Then there has been a decrease !-- There has been a decrease, they have not come up, but they are in

sty of stalltons in the country, known as common stal lices, there is a very large amount of them, and if they are not improved bases breeding won't be improved.
2047. How is your part of the country off for therearthred stalliens i...Well, we have only one

registered stallian, "Fife," in the whole county. is a mice little house. 9248. Have you many that are not registered !-hereare a few that are not registered, not you vessey.

Tarre is one good borne in Fallina, that belongs to Men Krox Gore, called "North Mays," he is not swistered, he is a year fine one I understood. 9349. Have you any experience of the introduction of Hackney blood 1—Nat myself; but they are very

useful. I believe, in the Congestud Districts, they would not suit for breeding hunters, they are certainly "could not suit for breeding hunders, itsey we corrusny perferable to Citydendales; if you get the large size, if you get a Hackney up to 18.3, a hence unfer that does not suit us in my district, but the Mackacy in a numeter locus than the Citydendale, and, I believe, would be a better horse than the Clydesdale or Euffall Punch ; but, I believe, we could have better if we had then bustess.

9250. Mr. Firgwilassa.—Your idea in breeding those hunters. I understand, was to breed up a breed of avisuals to use an occupary stallices !-- Yes; we believe it would be very important and a great encouragement if some of these colts could be brought from the breeder for the army, or a society that would

breed them up. 9251. CHAIRCEAY,-Anything else you would like to tell the Commission. I might parkage mak you a question, if you amooseded in establishing or re-establishing this hered of old Irish marca, would you propose to keep a stud book of them, or to register them in any war t...Oh, was, we wonld propose to keep a stud book, we would proyous to leave the registration of the higher class bunder to the Hunters' Just ment Sonety, but to keep a stid book for the Irish agricultural stallion. We want to improve that cleas lists a beavy class brander that would not be qualified. for entry into the Hunters' Improvement Society's book, but we would like if the Hoyal Dublin Society would take that book up. It is a troublesome thing to keep a stud book, and although we started it in Holly-

Royal Duhlin Society took that up and got other pro-

vincial societies to trace out that breed and get up a

stard book. What we proposed deing was to take the sea a new prize winners in class 6, that was for farmer's mores, as w. r. and send them to selected stallers, and to try to have Excisive. a pure breed, the rire and dam to be equal in size and spectranes and colour. We attack great suportance to

9252. Anything else you wish to say to the Coramission !- The cause of the large number of these inferior animals to be met with at the country fairs is this selecting and purchase by dealers of all the good ones. If you bred steep or anything che and yest sold out the best of the flock, and kent the culls, they will dwindle away, and the same we believe applies to mases, and we don't see any way of inductor the

leasing marcs to them.

\$253. That you have already described to us!-You except you have some means of keeping the good mures in the country, we look on it as impossible to inshave in the country, we have on no improve the stalkings prove the breed. No matter how good the stalkings are they cannot do the whole thoug they can only do half. We believe—I and that believe—that there

should be a standard for testing the height and appearsace of mares. Under the Royal Dublin Society's scheme, the old noheme the mures were selected. under the old scheme when nominations were given we penecully separated the marcs, the marcs up to 15 bands and upwards if they were suitable they got a perference; if we had not enough of those we put some of the best under 15 hands on the other side, and if the veterinary surgeon than in examining thou 15 bands and upwards disqualified any on account of unsoundness, then we would fall back on the mures under 15 hands and get a few of those; but in the present schools there is no selection whatever, every man can go himself and bring his mare whether sound or unsound to the stelling, so the older system. I think,

was the better cretery. 9294. Lord RATEDONNEL.—Do you say that under the recent scheme of the Dublic Society, any man can take a mare to the show !- To the stallies, there-

is no relection 9035. Under the Dahlin Society's scheme !-- Yes 9350. Are you not aware that the mares are relected by the committees in each county!—They are not.

2357. Then that is the first time that I ever heard is !-- Not selected at all under the new scheme. Any man our send his more, under the new scheme, to the

registered stallion 2258. Any man outside the scheme can send his recents whateverstallion he likes !- No, but our mon under the scheme can send it too, there is no selection it is only when he comes to seek for the price, he cannot get the prize without selection.

\$250. How is he under the scheme if he does not get a prize !--He may send to the registered sire.

9250. Is he under the scheme!---Yes, cartainly, any year under the £150 valuation is under the scheme. 9261. But the mures are selected \$-.. Not before they go to the sire.

9102. I slways understood they were selected, and had to pass a veterinary surgeon !—That was the old scheme, but not at all mader the new scheme wattl they corne to neek for a price. 9263. That is the first time I heard it !- That is the

fact for the last two years, but they cannot get a price without being examined by a veterious surrect. 9164. CHARMAN.—Anything else you would wish to say to the Commission I.—I would say that supposing that acciety were formed, and that the prize winners at the provincial shows were sent up for competition to the Dublin show, and corresponding classes were opered there; but that could hardly be carried out, except the rulway companies gave some facilities. I think it would be very important if carried out, became it is mount, we found there was a good deal of labour, and a local society has not the means for that; but if the an expensive thing to keep these colts. 9265. That is rather a matter of detail 1-Yes. It

Jan. 7, 1897

would be a year immortant thing if the local society could be helped to got a good sire into the district, there is only the one resistered size in the wiscle county; we would like a good strong thoroughtend if we \$250. Anything clas, Mr. Retledge?-Yes: sup-pering we had that stud firm, and that we had those three classes of horses. I believe it would be well to

have a scale of fees, and that to farmers octaids, that would be tasty and keep good maren, there might be a few free nominations given. If they get a nomination at a low rate, or a free nomination, they combler it is a great feather in their cap, and they are proud of that sort of thing, and they would, I think, value nominaa larger number, whereas, if a few have two or three good marcs they will come back two or three years in accession to win prizes. Then, with regard to the young colts in the district where that stud farm would

be established, supposing it was established that they the estimates, supposing or man account kept of low time were bred, and what size they were, so that any more coming to the district to buy would at smee find the vefevence, and ascertain all about them, and where they could be seen, supposing the farence threselves reared them, and supposing the society were established if farmer wished to go himself to a country fair and select his own mores \$267. Those are details and rules for this matte

matical society !- Yes, but don't you consider then triportana.

13185. I don't say they are not; but until there is a society, perhaps it is rather pressure to go into great I think we have got wery fieldy your general. opinion, but if you have got anything further to my !--No, I have nothing also.

horses, but any man of good to dement and experience would easily know the difference between a Yankee horse and an Irish horse.

\$277. What class do you generally deal in, carriage borner b. I deal in the best horses of different classes. hay hunton, harness horses, and transway heren

myself and my some buy in the counties of Core, Waterford, Westford, Limerick, and all the principal

9278. You have had a long experience, Mr. Johnson; do you think, generally speaking, the prices are about the same as formerly i... I think a good hunter

is worth as much money as ever. In fact if you meet a good horse like a hunter, a young horse in a fair, nov experience at the present time is if he is a good herse you must hay hies or you will never pet the chance again. I remember thirty or thirty-dre

years ago if you new a good borse at Cabirmes or some of the big fairs and a man asking an extract-

gant price you might let him run perhaps a day sed buy him the second or third day, but at the present

time in all the large fairs there is such competition for

a good heres that if you meet a good heres, a really good horse, you must buy at once or you will serer get the chance again.

9379. The commetition then for a really good herse

9230. Is the reason of the great keepness of our-

is keener than it was !- A good horse we can sell as

well and better than ever, a bunter,

The Commission affourned to next member.

EIGHTEENTH DAY ... THURSDAY JANUARY 779. 1897.

Present :- THE RECEIP HOW, THE EARL OF DUNBAYER, R.P., in the Chalr: LORD ASSISTED. HON. H. W. FITZWILLIAM. LORD RATEDGENERAL COLONIA ST. QUINTIN Mr. Wasser

Mr. HUGH NEVILLE, Secretary.

places throughout the south.

Mr. R. Jonysov, Fountainville, Belfast, examined.

9269. CHAIRMAN.—You live near Bolfast!—You. 9210. You are engaged in dealing in horses!—I am, I might say since I was a child. I have been thirty-seven years, ever since 1810, trading on my own account, and I was with my father for rears 9371. To you think the immediation of American horses has look any effect upon the trade in hunters in alightest on hunters, but they have reduced the price of barness horses very much. I may tell you if they had not Arreckean horses eccelar ever it would be very difficult to get horners horses in Ireland at all ; spread of them at all, Once they go have you on several errors them at all, liable to take sheepatism \$272. You don't like then !--- Until they are acclimatised they are not very much use. liable to pains in their shoulders and their feet.

are not used to our magazined roads. Very often a horse is not shad in America. They are never shed matil they come over here. 9373. Are they presed off as Irish horsest—Very selfow ; any man of judgment would know an Ameri-on horse. They are not the same formation as the Trish horse at all, and none, at least very few, that I have ever seen would make a hunton 9174. Hunters spart, see there many of them in-orted into the North of Ireland !-- There have been ported into the North of Ireland 1—There have been I think a dozen askes by persons who brought over American becase, int. I doz't think they tring the best over here. They have sales in Liverpool and Gosgov and other cities, and I think they outly bring over the havings of what they cannot sell. I don't

think the best beeses come over hers. 9275. What becomes of the American bores after they have been imported into the North of Ireland ? —I think they go generally for trades people's wans and such like, and some gentlemen buy them for \$276. You don't shink that one would so Taish horses 1-They may dock them and sell them as Irish

vatition that the arealy of good horses is less and the demand greater !-- I think the supply is a very great hunters breef as formerly L. There are not travelled all the best fairs and we cannot get them. You can get them at the age of three or four years!

deniand greater — I time to apply in the po-deal less. It is very difficult to get a good barse. 9181. That is speaking of honton — Te-p182. Throughout the country generally these are not so many of what would be called finiteless organization of the state of th

Printed many dispused by the University of Southempton Library Distriction Unit Printed impra distinged by the University of Southernston Library Distinguism Unit

and to be 1-They are. and Com were account for that in any ward I such second for it that they don't broad the right banns, from the right horons or the right mares in the principle of course. If you so to the Munuter fully at serbace, you could not take one in a hundred that persons, you would not take use as a married take Mr great objection to the farmers is that they are not are great operation and the breeding off mures of great bur incked weak-backed mores that they can't sail. For feetance, if a farmer has two mares he will bring them cut to a fair to sell them. If he has a really god mure with a good short back, and good shoulder and quarters, that mare will make a good sale; and if he has an unsound one with a long back she is hought home and bred from. Then the majority of the throughbord stallions are weak and turisty to their less, tood in or tood the other way, and very chiesticouble in their settion; and unless that home

cuts a mase with straight, good session and a social back and strong limbs, the produce in of no earthly s to be seen an any prove.

9287. Have you considered any practical means wherehe the farmers can be induced to bened from My idea in that you should give them inducements by priors to keep their best mayor and breed from My idea is-and from my experience I know they did it formerly in the county Month and in Westmenth, and frommi that country, the flavours used to serve their two-year-old fillies. They took their heat filler and served there and they would have a feel at time-year-old and perhaps another at four-year-old. and perhaps another at five-year-old, and then when the mare was coming on six-year-old, she wints miss : then that mare own very entity be trained or may have hom trained in the mountime, and then they brought her cut and they would get as good a price as if size her cut and they would get as good a price on it see sever had a feel at all. A three-year-old is not be years to have a feel. This was before they get so swell into the cattle trade through Menth sail Wentmean that they beed principally the best horses comstrong about-legged nice mares with quality, good head and usek, and shoulders, and good hack and loins, and the tail wall up, and got by the very best thorough-leed horses produced. They got a very good price for the stock of these young mores

A street of these years are to the close of the street of the support of the contract of the c

young and kept up in the North 3—Oh I year. There is not a fair in the South that there are not dozenn or young heren benght in it, taken down to the North, fed and kept there for perhaps the months or turbes months. To what kind of york we they not the Links.

not and nope there not permaps at a snorths or twelves 1919. To what kind of work are they put 1—The majority of them serve were it all, that is the worns of the property of the stall del bollocks. The farmous the property of the stall del bollocks. The farmous the property of the stall del bollocks. The farmous out to Moy fish and they are good herein spoiled for want of work and exceeds, hardly one of these sproperty mandeths! A three-war-dol bare in the

Scoth has a month a hardy as a temperabil, but if you have one of these produced in the North they have weither measures nor meath.

2012. Do you key bores in England at all 5—No.

9292. Do you key horses in Enginal at all 5—No.
I never bought a horse in England in my life. I often
sold them there.
1915. It is immaterial to you whother horses turn
out hunters or carriage horses 1—16 is a wonderful

parts. At an annatural to you whether moves there is not hunders or carriage baries 1—14, is a wenderful difference. They are worth a lot succe as innates. You often buy a harmes house and be eften duras out a good hunder.

1294. And the opposite takes place 1—I suppose

very eften.

2270. Do you think anything should be done to
try to induse the facuces to breed more for harmen
berses rather than for hunters !—I think not. If you
got a good half-brod Irish more and a really good
thereoughized brees with straight action you will have

either a buries or a buriess berse.

1915. Do mray foreign buyers buy here 5.—The
principal consecure I have are foreigness—Germans,
Swin, and Hallans.

1917. What do they buy for 5.—I have sold these a

1937. What do they buy for 1—I have sold them a lot of horess for both the Swins and Ilalian armin. The German produce their own horses. The German ment there buy directly from the famours. I cold a lit of good marst to go to Germany. The hear marses go out of Ireland to England, and the fereigness key them.

to trans.

2008. More so of late years than they used to do l

46. — Yes.

46. — 9209. I suppose they give a higger price for them?

26. — I think they do. A buyer named Opposibein

constant from Hanorer said be buye more travers with an any man I ever news. He obtok seedly a behalferd it that the same of the said of the seedly a behalferd it were to not these or four times a year, and he saidout to the face over time these or four times a year, and he saidout to the said of the said

seal of 101. Do you bay hereas at all on the western and sealoard, in the congented districts 1—No, I never buy give there. I don't care for Comments at all. I keep as fee mear to the summy south as possible.

9100. May I take it then had you can give us no interest of the control of the co

think that would improve the hreed very neach.

1930. Have you in your dealings come secondary
cases of humers heed out of Commensor pusich—No.

1934. Not perhaps the dan int the gread don t—
No. I don't think I ever hal any.

m. No, I don't think I ever had any.

1930. Do you go to any extent into the pedigree of we have seen tony the horses you buy the horse so an especially rely on the 5000. Do you think you can generally rely on the

a toe sorees you try 1—168.

7 SOEL Do you think you can generally rely on the
g posigrees you get 5—1 think the farmers through this
south of Ireland are very truthful that way. I very
sealoun or ever get a wrong peciagree. Some peciple,
an odenth, would give a wrong posigree, but I think
they are very few. The people I generally hay off
are needed I tells with continually.

Jan. 7, 1807. 9307. Have you any opinion as to the effect of be introduction of Hackney blood or the Civdentale Johnson.

blood into Ireland !-- I don't like the Hackney myself. I have had several animals got by a Hackney stalling, and they have no staying powers. They will not stay a journey, and I don't think they are very good to year hunters off 9208. As carriage horses, do you object to the Hackney blood 5... Well, I don't know. I could not

recommend it. I would suther have a good half-bred Irish horse to breed from than from them. 9203. Do you think there is any danger of the Hackney hood that you object to gradually perceining all through the country and deteriorating the , breed of breators, or do you think it could be confined I would not recommend them at all. I have a case in point that I knew that proved to me that they are a very injurious breed. I brught once in Mullinpar about as good a more as ever I owned, a good halfbred mere, and I sold her to a mon who hunted her for four or five years, she was a very fast trotter, would do a mile in three minutes, she was the fastest that was ever in our country until the American bases came, and for bye that she was a good huntress and no day too long to ride or drive her. And this man was induced to take her to Lord Charlemont's horse "Econd Arrow," and no doubt, she heed a great looking horse, a trongendous fast horse, I have never seen better ection and I have never seen a much fester horse, has that horse could not stay two miles. They tried to bring him up to see if he could not be made to ctay. end even sent him to the Mane under a good trainer, but they never could not him to stay for two miles.

this thing owne from the burse. I have seen horses hard from "Excelsive," the best looking Hackney I ever now. He was in the county Derry and belonged to the Newtownlimavady Stud Company. I bought several animals got by him at Moy, and there was never ope of these worth anything, They were rotten bad beasts. 9310. I would pather from you that you think the old Irish more is the best class of more to breed from ? 9311. And you would mate her with a suitable thoroughbred are !- That is the sert. 9312. You would prefer that to any other !-- I

and the mure being a very good stayer it must be that

would prefer that to any other breed of horse you can 9313. Mr. FITSWILLIAM.-I think you said you generally bought from the brooder !-- Yes. 9314. If you go to the same breeder from your to year I suppose you get the produce very often of the same mare t—Very often.

9315. And you are also to note pretty necessarily the effect produced by particular stallions !-- I don't often go to the people's houses, I generally buy in the open market or fair so I really cannot tell what the produce are like when they are young as I den't often

have an opportunity of social them. 9316. It would I suppose he an easy thing to make a note of the effect of different crosses upon the produce of the mares, and if you buy the produce of any mare from year to year it would be easy to notice how

the mate is affected by different house !--Yes.

9317. Do you find a good deal of difference between the produce according to the horse the man is mated with !- There is no doubt there is a lot. If a man breeds from a really good mare and a thoroughbred home he soldom or ever fails to get good produce. There are horses for the service of the mares of the poor unfortunate farmers in parts of the country and they should not be allowed to mere at all There should not be in the country. These house I assure you are not worth one food of corn. I remember once down at Bandon, a place where they used to breed a lot of good horses, I mw a lot of stallions thore

and, I aspere you, there was not a home in the les-

worth £1; erocked, twisted and had legged seinals and the poor man who bred from them was callosing his mare's time as they were unfit to mere at

all.

9318. Can you suggest any remedy for getting sid
of this state of things?—The only thing is to take them away from the people and give them better

9319. CHARRAN.—In the cheapmen of the See the indocement to send the mares to these stalling !... That is it, and a great many of the farmers who bread actually would not know a good horse from a but one, except that he would fill his eye or the like of the but as for action and good formstion they have not the slightest idea, and I believe they should be protected by the Government in some way \$350. Lord Astrows. - The lorses that are lead in

the South and brought to the North, where do they go to, and who boys them !- The malcrity of them that are brought into the North see bought by Ess lish and Scotch people at the different local farm and principality at the May fair. It has monthly fairs. one of the largest fairs in the country, and there are some other local fairs. Then there are a lot bought up by dealers about the country, and taken to the English fairs.

\$321. Lord BATHDONNELL.-The people anual Balfast are very fond of trotting horses !- Yes, 9323. They have rather a fancy for a tretting track and for tretting races !-- Yes, they have get up a nice teack now on the new North-east Society grounds. \$323. I believe you are fond of the truck vocash't -No. I never kept a trotter except for my own

2024. Here you ever yourself driven a Hackney at 9325. You always go in for thoroughbred breeding as much as possible !—The best home ever I had keet him for four or five years for my own driving-I hought in Cork city, and he was a harnest horse and a knutor. I think there is no Yankre house would go

twenty miles with him. I have had some Yanton houses myself for my own driving, and they are seely good; if you got a sound American horse you will have so good a liceso for horseen as one be, but they are at sea when you put a middle on their back. 9316. They are not good for riding !-No. 9537. Mr. Whench. -- " Broad Arrow"

"Excelsior" are the only two Hackneys of which you had any negronal experience b. Well, those was a suifrom "Broad Arrow" called "Broad Acre. 9318. He was not a puro-bred Hackney t-I think

9329. I think he was only out of a cross-beed mare helonging to Mr. Johnston, of Rechiell !- That is the horse, I think.
9330. These were the only two thoroughbred

Hackneys you have seen i-You They were both Norfolk Heckneys, were they not !- I can't tell. I assure you. \$352. You say it is very difficult to get harsen horses in Ireland 1—Very.

9333. Have you any suggestion as to how it would become easier !-- If they would breed from better would breed from better mures and from a strong thoroughbred here, or from a good half-bred hove. In the North of Ireland its "Harkaway" inred are both useful and saleshin

They are principally dark chestnut. 9334. Does "Harkaway" got horses with good

action !- Yes, all.

9335. It is necessary, I suppose, to have action for a good harness horse !—Yes; a harness horse is no use except he has action.
9336. Where do you get the tramway horses !--All 9337. In any one part of the country more than another !-- My cons were in Cloums! yesterley, and Thurles the day before, and in Mallow on New Year's day. They buy a good horse wherever they can get it.

Over the country.

9328. Do you know how they are heed?-They are principally bred from Sootoh borses, from Clydesciales. 3319. You think that most of them have Clydentale blood in them I They have. There is a great surgity of them at the present time, and in those places where poor farmers require to take work out of them for two or three years, it would now them well to breed that class of working home, and when show are come four yours off to sell them as transway

9340. Do you know whether many of the east gagyway horses are sold to farmers as brood mayor? ... I don't know. I have beard that plenty of them ...I don't know. I have menys that piccoy or them on sold. I think there are picuty of the marce would make good broad mores

\$541. Would you improve the breed in that way ! I don't know how they are herd. The masses I have sold to the trassway company, I have known a great those mores had more quality than the majority of territory houses. The tromway horses penerally are heiry-legged, but a good many of them are clear-legged animals with back-hone, and mures of that

class, with good backs and loins, turn out good broad 2242. The trumy have a limit of price just the same as troopers !-- Yes ; they used to have .435, but they

have reduced it to £27 now. \$343. What are would they take there at !-At all 1514. Will they take them under four years old?

-No, but any age over it. 1045. Will they take them at four 1-No, not until 1046. In the Belfint Farming Society taking steps to any extent to improve the baceding of harness

bores, to encourage harmen horses at their shows!— Tary never did much yet. I think the thing is altogether new since the new Morth-Eut Society—Iden't know what is the new name-started, but they have not taken yeary ranch interest in the broading of

\$547. But they have made great strides in the last eur !-Yos : I think ther are likely to be second to

9318. Do you know where the his Lendon jobmaters, like East and Windscal, get their horses? Do they got their horses through dealers, or from the private breeders !- The majority of the Londan lebprivate areaters t—The importity of the London pro-umsters used to get their colts in Ireland, laying them at three-year-old or less; but I don't think they got as many as they went now, and they are obliged to bry American horses. I know myself one of the remainst interesting to Leveley, and he have reported oil his horses from my see-to-law in Edinburgh, and he is the largest importer from Asperies in the three Kingdoms. He seldom brings over less than 300 or 400 at a time, and he serves the johnnesters in London. I don't think he has bought an Irish horse for the last two or three years, and he used to be a very big borge

9349. He would have there in Teeland if he emblished Well, he could get pleaty, but he could not sell them. 1 dan's know. If you get good American home you

bure to pay a good price for them.

9351. Then, if these borses have to be brought from stread, Ireland to losing a trade by not being able to readure there have been to Certainly. I have repeatedly guas to a fair prepared to give a reasonable price for a hunter or other uneful been of any class, and I have repeatedly to leave huying vary few, or perhaps none

at all. I am often prepared to give more than they are worth, and could not get them.

9152. Do yes hey may horses in America your-self! No; my son has been in America buying, not for me hat for my con-in-law. I have never bought ony in America myself, but I have bought several in time and their money is lost, both as regards the Scotland that have come direct from America.

\$3.53. Do you think the immediation of American bornes into Scotland is increasing! How many are brought over in a month!-I could not give you the most remote idea. They are shipping them now all round the whole winter \$354. Do you think the importation is falling off. or the reverse i-I think there are more horses coming now than formerly

\$353. Admittally a larger number is bought in Chicago 1-Yes. 931G. There is a large weekly market there?-

Thurs in.

9357. In addition to the London jobmusters the

\$3.58. The Germans have been having their massa here for a good many reaco!-- They have

9350; For twenty-five years 1—They have. 9350; They buy them for envolvy purposes and breed from them siterwards 1—I don't know. The majority of three are sold to officers for their own private use. They are principally bought to be said

os privato people.

9361 Do you sell to Swiss, or German, or Italian
dealers, or to the Government agents! — To the
dealers. In fact I sold a lot the year before last. Thry were better than the trooper class, and I seld

then at the price of hunters, for the Italian Govern-ment. They were intended for the Italian Govern-ment. The Government officials cause over here, the colonel and veterinary sargton and an interpretor, and they bregit a lot of really good horses. They have been here several times, these same people.

9362. They were mostly bought for troopers !--Either chargest or troopers, but they were more than

drouble the price usually paid for horses for such (U.G. What price round they have to pay for three h-Up to £40 or £40 each

iG64. They were all bought for the Government !--9365. Yes were talking of Mr. Oppenheim. He is one of the higgest dealers in the world!-

0.101. What class of horses does he hey, riding or

horses, in his own country's breed of horses. He woods a los of them to London to different intmaniers had be deen not here any harvers become letter-9357. Do you know what he does with these mares? ... His principal trade is with private quatoriers, who

generally hay for their own mo.

1238. You have heard it orggested, for one thing, that all owners of stallions should be obliged to dies that all owners of stallions should be obliged to date out a licence to insure the soundness of their sydmals. Do you epprove of that !- It is a thing I never

all.

9369. Would you try to manuality stallions from
serving that were manuald i-Corcanity. I would
not have a roster at a vice at all, nor a horse unsound in any way. and in any way.

10.10. Do yea, senis the conquires as to the pedigrees. Do you think they dock into pedigrees L-Union with a shoroughbed, they are not particular. They have not perfectly the pedigrees 25.71. CRAINCRAY.—What do you suggest abouid

be done to protect the farmers, and to prevent them from marking their mares to infector stall bons!--I would suggest that some people should be appointed who would go round to the farmers broad, and sivise them not to breed from the had mores that they breed from, because their

many and the sires. I would be as particular Mr. R. . about the one so the other 8372, I would gather from you that you think that the average furner is not a good enough judge to know the sire that is likely to be best suited for his mare !-- A great many furnism do not know what is

the right class of mure, or the right class of horse to \$373. And in that ones it would not be refficient that there should he a suitable stallion standing at a unitable, price, for you think they would still go to the inferior stallion as it would be chaper !-- Well, I believe if they did not know, they would have neighbourn

9374. As a matter of feet it is the relative price that guides them in the matter!-I think so; to poor vectorie who have not recent, the rotes in the event inducement, and if there were a good house at \$3 and a very hof one at &I. I think they would take the

chuapyr korse.

\$375. Do you sell many houses to the Government for renounts .-- No. I don't. I have sold to the Government at times, but these were times when there was talk about war. I have sold to the commissaries and for artiflery remounts as well, but I have never and he artisery removable as well, and I have move had a commission from the Government to supply removate, although I could have got it I timb # 2

apolied. \$376. Colonel St. Quarter .-- Could you sorth Categot Sr. QDDFFE. --Coald you give as any information as to foreign buyers t-Well, there was an immemme amount taken to Switzewined within the last ten years and a great many taken by Italy also. The Germans buy their own irred of homes disest from the farmers. They have no agents. 5377. I am speaking of the export from this

country, you could not give us any uses us to the munual export !-- I could not 9378. Orangan.-Mr. Johnson, you told us that a great number of hower were bought by the Italian

Government, hat of a superior days to the ordinary remounts, say a horse that would fend from \$100 to 280 L. I think to 9379. Colonel Sr. Quincin,-That is above the

elses I am donling with, a lower class of house. They were chiefly good colts !- Certain'y in thirdy good costs !-- Certainly, 1380. A seed many of the best mares so to feed an hovers at prices from £60 to £1001 -Yes. These are all tropped bernes that I mean

\$381. You don't refer to young colts four your alis of a high class t—I should key a good colt at any time.

\$250. Where so they got—To foreign dealers.

You few foreign dealers key untrained colts. The best harness like solts are brought and taken to Lon-

don for the jobmesters there 0383. Mr. Whence,....Do you know, Mr. Johnson, whether some of the fterign Covernments are now baving, as an experiment, troopers in Canada!—Well,

brying, as an experiment, troopers in Canaca :—wer, I heard they were. They tried it but they don't like it. I know the Swisz people broght a let, and the Italians too, but they did not like them. 9384. Was that from the States or was it from Constn !-- I can't tell you.

Canada 1—I can't tell you.

1980b. You have not heard recently that a good
many home were bought as an experiment from
Canada 1—I deritknow whether they were bought as
an experiment. The party I seld trouper to for the
Swim Government used to buy from use for a considerable time, but there was one year, instead of buying Irish horses, he went to America, and he is now getting a supply of Irish horses, as they did not

like the American horses. 2386. Do you think the American export of her is affecting the foreign trade as well as the trade with the London johnnaters — I know several foreigness

who used to any houses here, and they are now living in Chicago, and they are regularly stationed there and buy horses for these people. I know one Belgian and one Frenchman who used to huy a lot of hurses in Ireland, and they are now living in America.

9387. Living in America and having there in Yes, 9385. When you talk about selling the Italian horses at £00 or £50 each, were they existly moreous guldings !-- They were not particular, \$389. They took either !-- Bither

\$390. Colonel Sr. Quintin.—Do the German make

any distinction hotwoon marcs and geldings1-Ye; they would rather buy marcs. They buy no horse they would ranter any mares. They may no acre except nice thoroughbreds or very well brod house. 939). I think it was the Swine Government that you said one man was insying for. Was he buying as a dealer, or for the Government on their orders

Was he buying on his own responsibility and restling to the Government !—He bought on his own responsibility and resold to the Government. \$100. What was his name 1... Rively of Brate

9393. He is not a Government agent !-- He has an cottor from the Government, and he buys for them,

and of occors runs the risk as to whether they will 9324. He knys as a desley would by Yes.

9395 CHAIRMAN .-- I think you said your son-inlaw deals very logarly in American larges !- Yes. 9306. And your non buys for him in America !-

9397. Can you tell us how those herses are head. generally speaking?—I don't know scally. Some are beautiful looking horses, and some are beautifully herd horses, but out of a bundred perhaps you would

not get one that would make a riding home.

9216. They are all horsess homes!—They are the heat trained because in the world for horness must be got by a thoroughbred home, for they show a lot of quality. The majority of them have long thighs

made with fine long fronts, and they are so will mostled that immodistely you put a pair together they go right oil, and you have no trouble to train them at all.

9319, Mr. Wanvon.-Would it be possible to accretain their breeding when they are put ap for sale in Chicago f—It might be possible. They have the very host blood in England both for mores and horses out there. 9400. CHARMAN .- Has your son in-law persons to

buy for him !-- He had two or three aprets, but did get on well with them; hat now he has about a half dozen men who hav harnes, and they bring them coary and he have the let the same as we would have sheep. He selects as well us he can the good horses for wideh he could get a good price, and the sabitting

9401. He makes no incrities as to the breeding !-Never: I don't think he would think of such a thing. 9402. Colorel Sr. Questin,-Have you noticed saything in the make or shape of the American horse

that you would take exception to !-As a rule they have peculiar hips, a very peculiar form have sendiar hips, a very promes norm.

9403. In there anything about then that you would object to! Do you notice anything in the general ran of them 1—Yes; the majority of them are not deep of their heart, and they have long bere thight

and centley books. 9404. Fernilar hips, and wanting in power in their 9105. CMARRIAN.—Where are they landed!— Three I am speaking of are landed at Glergow, but

every weak horses are landed in Liverpool and Lor-don. There is hardly a sesport of any consecutator

don. There is hardly a susport of any consequence where they are not harding American hereis.

Free of the control of the cont and not first prize for him in the four-year-old class.

Mr. Thorns

He sold him to a man that shows horses all record the country in England, and in every place he was shown he get first price. No one could know that he was not an Irish horse. I don't know, but perhaps he was shown as an Irish burse,

2407. Mr. Wanzen,-You never heard his rediress after he was shown !- No. after his was screen r-roc.

9408. CHAIRMAN.—What have you to my as to
the cost of transportation from Chicago to England ! -We pay from the county Cork to Belfast axactly double what it used to be ton years ago, and I know

that from New York and Citiesgo it is half what it used to be at that time. 0400. The mice has gone up at home for carriage, and it has some down alread built has. Then I know the railway companies are bound to clean and disin-feet their warrens for cuttle, but I don't know here it

is they are not bound to clearne their boxes for homes. and it is very selden a horse gets out of any of their boxes without some infection 9410. Mr. Warners.—Do you mean in Ireland t— os; they never think of cleaning or disinfecting

their boxes for horses. I have last over £1,000 through orses taking influents and point wrong of their wind. We bring our middling berses in wagons, and they are for after and counder than the better class of horses. who are put in the boxes, as they do not take influence. or some cold or discuss.

to Belfast !-- If you take a single horse in a bax, £5 ; and if we being six in a wagon it is £3 a horse, 941%. And supposing you had to take a horse.

941% And supposing you had to take a horse from
Cork to Gisagow i.—In the boot from Cork to Gisagow. it would be £1, and 2s. 8sl. more pays harbour dass

9413. CRAIRMAN.—Is there any other suggestion that you have to make to the Commission!—The only suggestion that I would think of making would be to try and induce the formers to breed from a better class of mares, and to keep them from taking the service of a had here. If they would be set from a good heree out of a good mare, they would be sure to get good predom. That is a thing that everyons known. And

if we could induce them to keep their mares by giving there a fee or an inducement, I think it would be a 9416. I think you said that you yourself rather arcseved of brooding from two-rear-ski fillion 1-The

reason I would suggest that is that the searc is not too young to have a foal at three year old, and it does not certail their growth or make them less their value; and when they are six year old, supposing she has had two fools, and missed from five to six, she is worth as much as if she never had a foal, and the farmer in the menatime has the produce, which I consider is a great benefit and profit to him.

Mr. Twoses Dorovey, Cork, exemined. 9415. CHAMMAN.-You live in the county Cork ?-9416. And wen are expound in dealing in horses !--

anality. 9417. Have you been copyaged in that business for a langth of time !- Yes, as long as I can recollect. colts are brught by East and Witsbeak. colts are brought by Eest and Wimbrah. East comes frequently to Ireinsi, and Wimbush always in the summer. He will only boy three-year olds nabrokes. \$418. What class of horses do you concrolly deal

chargers. I hay a good harmon horse occasionally, but 9419. How do you key your horses; in the film, re from the breeders personally, or how!—Formerly I tought principally at four; but insteady I find I cannot get wirst I want at the fairs. The unsperity sell now at their own houses. Railway travelling has

considerably improved lately, and people can come from England; in fact, I bolieve I get as much opposition new from a man living in London as from a most living in Ireland. Yen can leave Lendon at 8.20 and co to sor part of Iveland and out hack again the next day. 2420. Do you sell your beases principally in fre-land or in England !--Principally in England. All more or less to go to England. I would be glad to

wil them at home to m to England; but I have to take them over 9431. Do you renerally buy made kunters !- Yes ; but I am always anxious to buy a young one that would grow to a limiter. I take a great frary in breading a good those manod that would get a first

9432. Do you find the price you have to pay for this class of boyes about the some or are they becoming more expansive!--High-class horses see just as valuable now as ever they were.

9423. You pay the same and get the same!—I am sorry to say I don't get as much as I did. 9424. You have to pay as smed though 9—Yes, and I find they are desert in Iroland then in Enrised; but the influx of burses into England from all parts in so great that when you go into an anotion—and there are succious every day—while you only see an odd toe you want in Ireland, you see twenty in Eng-land to shoose from. The present customer finis it hard to buy a horse in Ireland. 194 to buy a horse in Iretand.
3425. You kuy all over the South 1—I do.
9425. And in the North 1—No; I never go beyond.

Mellingar or Ballinasion.

9427 Do you think the Scoth produces as many ood hunters as firmerly !-- Yes, and more 9428. And of as good quality!—Quite as good sality. The worst of it is the majority of the good

and he large respections of cost. The worst of his cults will make a hunter.

9419. Where does he buy!—In Limerick, CLov,
and Cork principally. He hays from design who
collect them for him, and a great many from graniers. in Litteriols, who buy them in the county Keers

year olds and sell to him as three year olds. Ha hove at an average price of £100, and they find that may them and get half the money.

2450. What does Wimbush hay for !-- For

erryion horses. 945). The same class as you buy for hunters !-

9433. Do you think the farmers about you, and in the South senerally, pay on much attention as formorly to horse-breeding 1-Farners in the South pay e great deal more attention to house-breeding than formers themphout Iwland renerally. They are your fond of it, but unfortunately in West Cork, whether they obtained it or not their offcets are useless, because

9433. No dres 1... They have plenty, but they are site enough to poison the district. Gandon for some time, though it is only twenty miles from Cork, until the 4th of August last, and it was declarable to see the house there. It would be a great been to held the access there. It would be a great been to their owners if they were all dastroyed. able horse

2424. Is it true so has been said here that, though the price of carriage borses and hunters has keret up. the price of the inferior horse has gone down !- The medigm class harness bosse is counderably lower in property of the infux of furnishers, hot they have consequence of the innux or strengment, hot they he in no way interfered with the value of hunters. was in Lebester during the mouth of December, and I think I am safe in saying there were not ten beree in any hunting field I attended except Irish horses. 9455. Are you particular as to the pedigree when

Printed image dientised by the University of Southanniton Library Digitisation Unit Provided impray distributed by the University of Southermoton Library Distribution Lind

Jan 7, 1875. We Thomas

baying a horse or are you content to judge by the appearance and shape?—The first question is the pedigree of the horse you are having. pengree of the norm yea are mying.

\$436. Can you rely on the pedigrous given you t—I
am very gind to say I seldom gut a false perligron. I
may tell you I have get wrong pedigrous, but it is the

\$437 Ven have maken shout the had enality of the sires in one particular district. Generally speaking, do you think the county is well suspired with smitable sizes 1.—The district from Limerick Junction smitable steen in-The district from Limeters Junction to Carle is well supplied, but when you get from Cook to the West it is in a deviceable state. I think the Government and one horse that was worth scaling for one tearen -a house called "Yesk"; by stood, I think, at Denmanway; at the persont regreent, Sir John Arnott, who has purchased the Doke of Devonshire's property, is starting a sind for his tenants; there is no part of Ireland so builty off

for sizes as the west of Cork, and the same remark sight apply to the eastern portion of the county Cock, the Youghal and Waterford side. Cook, the Youghal and Waterford side.

9438. What shout the quality of mares they bread from !-- My opinion is that, if possible, you would want to effect a great improvement in the mares, but the difficulty is how to do it. I, for one, think the way the mam shows are beld is a mountry; the system is a total failure. I attended a few in Cork, and I must say if there were only mores of the description I naw in the south of Iroland we could not produce heaters at all; it is ridiculous giving a lot of arisesable prizes; I would only give these prizes, and then any mare exhibiting will exhibit in the hope of getting the first prize. I would give a first prize of E30: a record wine of £20: and £10 to the third. that is, if I had sufficient means to give it, and then the farmers inertail of seiling their good mares would be looking ferward to this first prize.

the good lack or the minfortune of reling them award I found they were very far from being as good as those that never had a fast. I have beard it stated that it doesn't do them have, but I am convinced it does; even in selling the naimals if they have the sign of having hern at stud it detructs from their 0440 Have you sold to any foreign government?

-I cannot say, I have sold a great many horses to 9441. Do ven know at all whether of late years there has been a great demand on the part of foreign

governments for Irish muses!—I don't think it is one-fixed to lase years at all; as long as I can recollect they are always anxious for buying good mares and age yet

are yes.

\$442. Here you may opinion about breeding from
balf-fred sires—I mean herees with two or three
strains of thoroughbred?—I have a strong epinion on the subject, but at the same time I would be slow in doing away with all half-bred harnes. I corneinly would not give one premy of government funds towards subsidizing them. 9443. You payfer the thoroughbred !-- Yes; though

been very useful—these half-freels that are little short of thoroughbreds—I think I get a home from you, Loul Rathdennell, got by "Hackaway," be won the Famiroke Cup in 1894; a very good home e Pamirroke Cup in 1090; a very good norms 9444. Lord RATHBONNELL.—Yes, you are right Wissans.—But it is the exception that proves the rule ; he was as coud a horse as a man mored want to

9445. CHARMAN.-Do you know the western po tion of the county of Cork in the congested districts ! -I know a good deal of the west of Cork, but I could not define which part ormet under the bead of con-gested. I think it is all congerned.

9446. Do you know saything of the effect that the seeds. Do you know anymans of the close that the action of the Gougasted Districts Board atheas has had in those parts of the country on the boad of horses t—I cannot say that I do. I think they have taken no setien in the county Cork. I am not aware

9-147. Do you ever come across horses out of 2-147. Do you ever come acress acress out of Connemara poniss by thoroughbreds or horses with a sider the Connentars and Kerry pury are very nearly the same pattern, and I have seen an extensedinary good branker got by a house called "Appliance," out a

Kerry pony, and he was well up to sixteen stone.

9448. What size was he t.—Sixteen hands. I have seen a great many extraordinary good bunters got out of very small masses by thereughbrods, 9449. Have you any knowledge of the Kerry onics, have you dealt in them at all !- No ; but ! ave seen some very good polo ponies haed in Keery

9450. Do they come from Connemen or Keeve to your part of the country 1.—No; I saw a large drove your part of the country 1.—No; I saw a large drove yesterday in Gionnal. There was a fair there, and they were driven together like a flock of sherr 9451. Where did they come from ?-I would not say they come from Countriers. I was curious to know and looked at them particularly, but I could not tall whose they came from ; they were a mondecript not worth their travelling expenses. These unfortunate fallows who deal in them find them slows unfortunate fellows who dear in them seed them seed the road, and drive them from place to place until sold, the lower laying his eleties out of the drora.

Whatever district they come from you never will be able to meant them ; it is waste of meany to be trying to bread houses like that 9452. We had it in evidence that the breed of Kerry pour had deteriorated !- I would not be anpriced. I am some whoever stated that was accurate. frequently visited Kerry and bought some of the 9439. Do you approve of leveling from a two-yearbest buntees I ever bought in my life there. A borre old filly 1-I do not: I have frequently bought bunters beed in Kerry won the Notional two years remove that had fools when they were young and when I had and was placed fourth another year, a horse called "Liberator," bred in the extreme west. There were some very good sired in Kerry, and their produce was purchased in Castleishaui, and needs at the age of three years to Whabush generally. I length a good many that were beed in Kerny, very good ones. 0453. My. Frynystram - You said that in these

dense you would advocate an alteration in the price High, and give only three substantial urious in ure ference to a great number 1—Yes.

9454, That would help the larger farner, but would it, in your opinion, total to belo the number former b. I are certain it would. I foul that the ernaller the ferroer is the more time he has to devote to horse-breeding | the larger farmer stocks his farm with cottle, the smaller farmer taken a learn interest

9455. You think it would work better than apending the some amount of money over a larger number of prizes that are not so competitive!-The present prizes are about \$2 cosh, for a larger number. It looks like doing out-deer relief to a pasper instead of giving bim semething be could call his own; it is given broadcast, and as I am on the subject, I may say, baving given there prizes, I would advocate having proper indeed a macricular I have seen surrolf a macri I bave known some good helf-bred sires that have that produced the first yearly prise at the Cork Show that didn't even got one of these service premiumsdon't think it is fair to appoint local guntlemen as judges, because you will find probably that their tenants have produced some of the animals—I would

have independent indoor. 9456. You mentioned that East and Wimbush bought a large number of horses between Limerics and Cork ever year !-Yea.

9457. And that they give a good price for them !--9458. How are those bosses bred 1-All by

thoropolihoed sires.

has theroughboul sires if you were able to manage it?Yes, if the Government would only give sufficient menty, my suggestion would be not to subsidise the present sires, but to buy the best they could get, and give them to the formers at a nominal fee say five skellings each. At the present moment, I expect they will do something: they would not think of troubling
you gentlemm, for the pality am they are giving now
—1 think £3,400 a year for house: If they are inclined to give no more, it would be better if they expitalised it for ten years. It would amount to about £30,000, and with that they could buy a certain number of valuable sires, which would do more good than all the agitation they are going on with for the last ten

9419. Therefore you would advocate having nothing

9403. Have you seen any or had any experience of the horses taken down to the congested districts by the Congested Districts Board 1-No. 1461. But from what you hear of them are they heres that you think will be a permanent broaft :— From what I hear of them and what everybody says must be true, they are a curse to the country—the unfecturate people will not find out the real grisvence

until they try to realize cash for them.

9462. You think they will destroy the prestige the limb henter now holds !-- I would not like to say that -I cameally bops they will not-I am in bopes they will be done away with; it is the only thing we can held our own in. I have already stated that borons are much dearer in Ireland than in England, but at the same time it is owing to the high observoier of the Irish bonter that we can get more for him than any

9463. If you alter that you lose that prestige !-Yes, you kee the whole thing. 9464. And if you continue to use even in the congested districts the stallions brought over at present will you lose that !-- No doubt they will do been, because they won't be saleable, and they will have to suread, fellows won't elect them, and some enfortunate fellow is bound to breed from those

9465. Lord Assrows.-- You would like the Government to buy sires and station them about the country !-Yes. 9464.—Do you mean the Government should keep them in their own passession !-- I covisinly think they should have them kept in their own prosession

9467. You mean to form Government steds !--Well, that is a matter of detail; yea could not well form a Government stud, became you would have to distribute the stallions in various districts, they could the present horses that are registered.

9401. You think they are not good enough !—
They might be better. "Red Prince II.," for in-

stune, is a horse that would be worth buying; he is 9410. Lord BATHTONNELL.—Do you think there are more good sires in Iroland at the present moment thus before, or do you think they are wome than they were I—I think they are considerably increased; I know in our district and all over Yipperary—I have great experience in the South, from Dublin on there are more good thereugh heed sires than there were

9470. You say the class of thoroughbrod horses you rould like to me should be better than at present!-

Yes, if possible. weak not go so far, there are a great many I would sprove of, but a great many others I would have the notwithstanding that they are registered by the Royal Dublin Somety.

9472. Do you think the sires have deterio-rated 1-I would rather not name any horse, but I could no se some exceptions, good ones, and score very bear use. There was a great temptation a few years ag, when you were giving so much a year for thoroughbreds, lots of fellows run off to Newnearbot and other places, and thought anything good enough so long as it was in the stad book; some of these begans should never have been see

9473. Do you think people have found that out !--The farmers of Ireland are clour but they find it out when they come to realise the produce.

9474. Then they won't send to those sires sgrin t-If you are living in a remote district and have only one home near you, because our hardly he chooses.

9474a. You see a mamber of the Cock Agricultural Society !-- Yes. 9475. Did that reciety pass a strong resolution against the introduction of the Harkusy !- Yes.

9476. Did you approve of that !- I approved of

9477. Colonel St. Quiners-You told us that there are as many high-class hunters lived now as formerly, is the demand equal, or is it as great or less !-- The demand is as great as ever for high class

hunters, that is my eninten. 9475. More or less, could you sell more now if you could get then !—My calos generally average the same number every year. 9479. Can you tell no anything about a subject I

an saxion to find out something about—where do all the block horses go to. You say East and Wimbush buy as three-year-olds high-class borses for harrons—are they not anxious to got hold of the blacks !—They prefer, what we all prefer, I expect, A black born is not at all as attrac-

9480. Where do the blook horses go to !- If you can only tell me where they come from first.

000000: 9481. You are quite right, but there are a few about that are above supprice, and I am sold they are bought by hig dealers in England at potent from £70 to £1001—I would not say that. Whenever I see a black heres I buy it myself. I sell a great many black chargest to the Gunzia, and I find they are very hard to get, just as difficult as a white magnic 9489. What ago do you buy at !- Four years and 9483. You don't key at three!-No, a man who

has a good colt scarcely shows him at three, that is if by is a high-class colt. The only people who trade in three-year-alds are those scopic who train them, such as Eastand Windrasi. If sley have been at all tampered with sley dea't like them. Englishmen are better drivers than Irishman. 9484. Is it not a fact that the heat bred horses now never find their way to the fairs, that they are

now never that their way to the talls, that they are marked down by yourself and other dealers 1—1 am glad you mentioned that subject. The last witness atted they are very hard to find in Ireland. Certainly they are when a men only goes to false, be- . . cause a man that has a good bress need not send him cutside his own place, except to a slow. Lore Bathdornell referred to the Cork Agricultural Society am glad to say we have a show only second to Dublic, and three were some good four year old houses shown there. It may seen like a proud hour to my that the houses that won in Cosk, and some that dain't win, cleared the board in Dublin. I had a hoese that got first price in Cork and get first price here, and he was the only thoroughland home that over obtained first price in the four-year-old class in over obtained first prize in the Sour-year-cox case in Dublis. The besset that got third prize in Ceck goo the champion prize in Dublin. In fact werey horse that was commended in Cerk get first, ce something like it, in Dublin. Mr. Johnston stated that horses were scarrer. They are if a man down't go where

Mr. Thomas

As \$ 1977. Show are. They same to the Dublin Show, I retray mrs. Aloy octors to the Lintum Show. I re-cellent when there were short 400 because shown, now it in up to 1,800, and last year one man bought forly-one out of the Show, Mr. Hannen, of Ledcemen. But even if a farmer domath get rid of a horse at his ewn house, and brings it to the file, he never brings it to the fair ground, he brings it to the stable. You will have to buy a house the day the stable. You will have to buy a horse the day before the fair. All the good horses are picked up

the day before, even if it is a Sunday.

9455. You go about the fairs a good deal, and do
you find that if there are a large number of highlyyou find that if there are a surge warner to break and substance bred small animals wanting in bone and substance there are quite a reflecent remover of bone and relastance, but so underlied and mis-shapen that they are practically unclose for anything but the commensat

ork !- Yes; some are well represented in quantity and deficient in quality \$486. Through you don't touch the trooper, you may know comething about them. In these fairs there is a great amount of unsoundness. A great many snimals sold at much higher prices a month or two before and cast for wind, are efficed for troopers Henry the increase in the uncoundress!—I had seem experience in troopers; I mounted several regiments. and I found I get some good-looking sives and their wind went wrong. Take the last days of those big fairs, like Cabirmes or Ballinanics, and you see 200 or 400 horses, and there is hardly a sound horse amongst them. They are gree-looking snimals, and if they had been passed by a veterinary enryeon would have brought £300 or £400 shedutely. It has been mid that the last days at Ballinselce and Cabirmen were made for reterinary enrocess. They see these horses, quite good-looking, take them to a veterinary sargeon, pay a guinea, and the partacethip is dissolved at once. I heard a veterinary empton say he got

as once. I heard a veterinary eargion may an got nine gainess out of one house during the fair. 9487. Which would you prefer for troopers—a wellhead Hobs agricularly beens, or a large bound loss well-bred clumsier animal !-- I would not have an underhead for a trooper at all. He has a lot of work tesce force. Our you say make the grey horses one front 1—A greet many from the South. Thus was no old breed of horses there. They are descended from a boses called "Arthur," and some of the descendants are still there. The fact is, they call every grey borse a descendant of "Arthur,"

9400. Is it more difficult to buy a good grey home now than it used to be !-- I cannot say it is ; it is a solver that is never someht for

9490. I was thinking of the Sects Grayet-They see workerfully well ascented, and by some more the greys seem to last for a lifetime.

9401. There are said all to come from Ireland t....I sold a very good grey to Major Hippenby, the Adiotant, and he was bred near Connect.

9492. Your teads is chiefly in hunters and charges ! 9493. Nearly altogether in riding hernes !... Yes.

9494. And you generally buy the hest hoese you on Ind 1-Yes 9410. What class of man do you buy from-what eits are their farmet. I cannot state, like the lest witness, that I buy direct from the herofer. I neser ber young houses. I buy them from men who have them a noncom or so.

9496. What age do you generally buy at 1-Gener-9497. Do you buy them younger than four !-- Very seldere

9493. You don't sell under five !-- I sell them at

9459. This time of the year 1... At any tires. 9500. Do you find it easy to sell hunters at four east - No: very hard. They won't buy them in

Enrisad.

9501. They only law five year olds In-Thus is an 2001. The majority of the farmers who have as opportunity of breaking them sell then out of the opportunity of areasting them sell them but of the balter, and, as the lost witness said, they go to the North and are fed like occust—When they are brought out they are unders for six months were than condition wastes off; in the South they are kept and

SAGE. You find a great disadvantage is a mare brei from st two years old !-- I do. 2004. Have you had any experience of a years that had not been not to a horse until these years old; does it make the same difference with her!-I can hardly define whether the animals I refer to were much at two or three years; but if they had a fuel I have had nearly on much experience in hunting as dealing. I find they were not at such animals as others in the long ren.

9504a. I think you said you would not give ago Government money to encourage half-bent sirest. I would not

would age.

9505. You would except "Mackintoch" or "May
Boy "I—Yea. Any horse that claimed to be a the
roughbred. "May Boy" is an good a size as you reoghbred. 9500. But below that class of horse you would not go !-I would not. 9507. What would you do for the farmers who ounot breed horses—these horses that you say are rubbish-what eire would you give thom-would you so conrage any sire hat the thoroughtred!-I would not

unless you want to perpetuate that rubbiels. If you want to get rid of it you must get rid of the sires, and the only way of doing that is you connect cornel a man to send be mare to any one home instead of snother, but he in sure to send him to the best when he gots it at a small fee, 9308. Would you approve of encouraging the

Civilandale 1-No. 0500. Or a cart bosse 1-Except for cart purposes 9510. If they are encouraged in a relighbourhood

how are you going to keep out the Mood?-You outnot keep it out if you fouch it in. 9511. In there a clear for ourt homes in the Carlo Show?-Just at present there is; but the print is so small that only two azimals were shown less year 9512. Do you know there are a good many Civiesdale and half-bred Clydesdale stallions standing in

Cork !-- There are some -- a few -- not half so many as twelve years ago. When the trade was brick, there was a rush reads for them and they got sick of ithance the great growd of had horses in the Bandse 9513. Would you be surprised if there were receive a third of the stalliens on Cork cart horses or balf-bord eart houses ! - I would be surreised.

9514. But suppose that people are breeding from their mores and find they are breeding too fine from: thoroughbred horse, how would you correct that !nancognative Dire, how would you correct that building you as ease in point which might attends you. I brught a heese from Mr. O'Cornell, of Feiland, by "Regalator" out of an Arthur more two years ago; and three years ago I beaght a here cut of the same more by "Reliable." This horse is

out of the came mare by "Reinble." This home to in Leicester. I put him among a lot with a reserve eguirst him of 4350, which I get on the following Monday. I hold that beedling from infusior borns doesn't give more bone, but gives an anyearance of more bone

9515. You think theregibeeds can be found to soit any mores I—If you are willing to pay. 9516. And I think you suggested a fittle way of making a nest-agg of 253,000—If what the Govern ment give was capitalized for ten years that would make up a respectable amount. 2017. How many horses do you think you could buy for £35,0001—You could not got more then 10 of the burses I mean. The burse I spoke of world on the shousand pounds to begin with 2018. You manot tell how many houses there are in Televid like "Red Prince"; Thorn is a horse

called "Spaha," a good horse. 4819 There are not many of them !- No : if there were they would not be no dear. \$680. You would not get "Red Prince" for £5001

_No; I say that would not get " ned remee" for £5001 _No; I say that would cost £1,000. g521. Have you thought at all how you coold help these men who breed the rubbish of the fairs to breed better marca bell van cive a show of marca to corre district, and have judges - not local judges, but combine palete sent there, these formers, instead of adling

judges—sent there, these inviners, instead of siding their mores at £50 and £60, would be looking forward to this price. I would like to have a class with a foal at foot, and I would give three prices ware a rose at rose, and I would give three priess of £30, £30, and £10.

3522. That won't go very fac!—Nearly as far as your present miscrable prisss, and the man that

be last would want to be first. 9523. Would you lot the some mare win a first prize two years running i—No: I would let the second roise more show next year; it is not often

an animal wins twice. 9524. Do you think stallion owners ought to be

3515. You approve of that 1-I do. 2506. CHARRAN .- Do you know at all whether the small formers breed many of this class of borso

you have been talking about in Cork !-- You a great \$507. And do you see any reason why a man, become he is a small former should not breed mod house l... Nothing in the world to prevent him, as I mid already. Some of the best hunters I ever bought

were bred by small formers. I know one man who has thirty acres of lead. 9823. You told us what you think raight be done in the way of encouraging them to keep their mores, and you told us that if the Government did anything in the way of supplying stallions, that they could to

would have the effect of elearing away this superfluity of rubbish you see at present in every fair

\$529. Do you think the average farmer espable of selection the most suitable stalling !-- I have bound for of meeting are they are not, but my origina is that they know too knoch; whenever I am buying from thom, they never sak less than the value. I am certain they are expelle of protesting themselves. If you produce the material they will avail themselves of it.

9531. Lord Astrows.-You my there is no reason. why the small farmer should not bread a most home would you qualify that by saying be ought to have a mitable more to kneed from h...Ver 9532. Do Mesure, East & Wimbosh boy fillies on well as calls 1... Not one

9533. Colonel St. Quarter.—Con you tell me where most of the good mares go to—they are solden found in the hanting stables of England; the goldings seem

to be chiefy taken as housess !-- You see onite right. 1654. And there is a great export of the high chuz hunter marus from here !- I really think the mulority -well, I would not say the majority-go to Germany, but all the foreigness are most anxious to buy the mates. As you wirely researched, you will see very few busting marse in England.

9520 Don't you know a great portion go to Gar-

1000: Lion's you have a gross passon go to many !—I really think so. 1000. Mr. Weitsen,...When you talk of a small farmer you allude to a man who would have 30 acres! —I consider a man under 100 noves is a great farmer

I have bought beyon from men who had under 30 9637. Due the chief men who breed houses haven than 30 acres 1-Yes, and 300 acres. I this the farmers in the South average between 100 and

9638. That is in the districts where they broad good between 1-Yen. 9531. But when you go to the West it is different ! Ob, yes; the farmers hold smaller boldings. like to say about the fairs-about the accommodation I They are not held in proper fields; in a great many ,

They are not held in proper fields; in a great many , districts you have no finise at all.

thing about that is that if these fairs are hald in the siceets it is almost impossible to get the inhabitants to agree to have then shifted to a proper field, because they drive a better trade in the way of whiskey. Limerick there is a great row going on for three They connelled the horses to leave the streets and go into the fair field. In my orinion that has The fair field is a male out of the roined the fair. town. You don't like going out too early lost you town. You don't like going out too early ins you might miss something in the stables, and the police are so mighty particular in that respect they will summon you if they see you walk a heres in the street—the owner, not the larger. It has absolutely ruined the fair. Something similar has occurred in Easts with regard to the Spanoil Hill fair. They started a fair in Euris, and it ruined Scaneil Hill.

9530. The fees being equal, they are quite espable It was worth going to at one time.

2542. Crarryay.--- You are a Divisional Comvoid: Charlesan, — you are a Divisional Com-missioner of Police at present, are you not !— Yes. 2048. What districts are under your supervision! —The whole of Ulster, and the counties of Mosth and Louth eleves counties

\$544. You are residing in Dundalk !-Dundalk is 9545. You have had a large experience in herse breeding throughout Ireland generally 1-Xen; I have

had a good deal of experience. For about eighteen years I lived in the South of Ireland after I left the service, and I used to keep a great number of horses then and herd a certain number. I always took a very great interest in the subject, for the last six what they do in the counties with which I am con-9546. Would it be convenient to you to divide yo experience !-- My latter experience is what I would

prefer to speak to ven about and what I am connected

Sir Owen B. Statur, c.r., examined, with now, though I am quite willing to answer any questions you may put to me regarding the South.

9547. Take the North. What is your experience of it new la. The counties under me differ very con-

of it now-lather contains under on differ very conficiently in the manner in which they bread their distribution by the manner in which they bread their distribution of the conficient to the property. They have been proposed. They have been proposed to the property of the prope judges of horses, and they make a regular business of it. In the part of the county Louth adjoining Month they also breed pretty well, but in the county Louth e as you go nearer to the county Armagh you get into

th Own B Nistle, 68 July 7, 1987. 62 Own R.

316

a kind of horses which are more for farm purposes, and for harness and general utility. 9548. And as to these harness bornes and general

utility borses I gather from you that that part of the country is not suitable to produce the higher when of hunter and corrisor home !-- I think that parts of the country are suitable for breeding, but that the people do not go in for it: they don't understand breeding: they have not got the trude for the some class of horses that they have in Month or in the South of Ireland. Of course it is a great agricultural country, sad a turner men in preatly for the breeding of house for form purposes, and if he does not want them for that he can always dispuse of a big horse on a dray horse for a browny. They breed an issuesse number of that description in the North. I should say in Louth, August, parts of Down, about Brifast specially, and in parts of Antrim they breed a great deal of that kind of horse. In other counties, like Monaghan and Cavon, they haved a small and an inferior kind-generally

underbred borses, but very few hunters. 9549. How are those dray burses tord !-The dray horses are generally head from Clydesdale or Shire

9500. From what chast of mores 1-From very much the same class of muro with Chulestale or Shire hisod. They are a very different sort from what used to be bool from in the South-a large and ruther common looking

9551. Are you commisted with the western secboard at all !-Dunegal-yes, very well. 9552. What do they produce there!-I think they breed more for their own me than anything else, the work there is very light. It is reperally light eart work and their borns are used to earry people on their backs to fairs and markets; their selling is mostly among themselves. There are whole parishes in Dungal where there is not such a thing at plough, and of course they don't want horses very much in these districts, except for cart work, and that is all light cart work. That is in Donegal as it is along the ees-const—the congested districts past. Of course there are parts of Donagal where there are very large farms, and very good land, and there they go in much for the agriculture horse.

utility horse—is there as much departed for that as formarly! Is it a profitable kind of heres to breed !— Well, no; I don't think it is a profitable kind of horse. They generally sell among theseaslyss, but of overse They see all local mere—the smaller people that bu beeses quite young as foals before they are a year old,

9354. What becomes of them !- I think they are bought and taken out of the country as increase knoirs; come larger farmers buy there and train them, and keep then, and sell them as harness lucks, but I don't

think there is a very great tends in that 9555. Are there not a very considerable unmber of horses heed in the North and sold out of the country as harnon burns that great number. I suppose our of the largest fairs in Iroland—the largest monthly fair is beld in the North of Ireland, in Moy, all classes of house are bought; but the huntero yes all change of houses are scugar; may the season you will find in the North all come from the South of Iroland and the West. A great number of housest horses are sold there. It is very much the earton of a certain class of dealers—and there are a great ormber and bring up two-year olds and let them out or sell them to the farmers who keep them for a year and work

them on their facuse, and then make them up and sell them on t. Moy. There is a great trade in than, \$055. Buying these two year olds !—Yes; and they sell them as three or four year olds at Hoy.

1037. For mostly harmon purpose 1—Harness
purpose. They sell some as hunters; but their ea-

perioace as hunters cannot be very great considering them is no hunting in that country. 9558. Our business being to impaire into the question of horse-breeding with a possible view to its inprovement, what would you suggest as regards the North-Do you mean as regards the North mounts 9559, Or divide it into any portions you find our venient !--Of course, I think in all breeding the first thing to do in to get at the stallions, became it is the had stalliens that produce bad mares; and I think the first consideration would be to put a check upon but

stollions being allowed to ply through the country for hire. Do you mean the kind of besse? 2580. I mean would you wither tern their stien-tion to improve the breed of carriage horses or trying to induce them to breed hunterst-I would alwers try to incince the former to breed as well bred a been as possible, because they certainly pay the less.
Taking my experience in the South, they were used;
always local in the former days in the South free theroughteed sizes for every purpose, and, toking it all round, they certainly answered the best. would rather see thosomethized sires imported into the country and used in the country than any others. 2561. Even in the North !- Even in the North That is, providing that they are the right seet. At the same time I think that for purely agricultural

purposes you would require a heavy class of hous, the same as they use in England. I think you would require horses like Shires or Clysleadalss or something of that sort for agricultural purposes. But I think that that is a perfectly distinct thing, and that anyone who is dealing in horses, can see what it is they are haying, that the stamp is there. I don't think you could get-at least it would be very comptional if you could get a dray horse—and there is a great trade in this kind of horse—by a thoroughbred house. They are two distinct things. For harnest horses of a superior class in any part of the country I would prefer a thoroughbrod sire, hat for agricultural purposes and heavy work I think you could not do better than have a Shire hores. I think you would require them in these 9569. As regards thoroughbood sizes, is the country

9553. And the smaller class of horse-the experal pretty well supplied with them !- Yes, it is. get returns from the counties that are under me \$563. Giving the stallions 1-Giving the stellions I have a nominal return of them. I find that in the aleven counties which constitute my bullwick that there are 161 thoroughbred sires. (I can give them by counties which perhaps would be rather interesting afterwards to show the different counties in which they other wache to show the different counties in which they are located.) There are 150 hildword, 89 Hackerys (walneire of the five belonging to the Comparido Diritist Board), 28 Sitter, 139 Orthodolish, and 84 of other breeds, that is, generally rough drough howes that people sourcely know how they are leed at all cough that they are stallings. There are s

od number of these in the country. 9564. Except the thoroughbrods and the half breds, the Clysosiales are the largest !-- I'be thoroughbred is the largest. There are 161 throughbreds. Then taking these again by counties. In Autrin there are eighteen thoroughlyers and ten half-bresk. con give you a copy of this return if it is any use.

8065. You can put it in afterwards. (Fitness).—
I gave a copy to Mr. Neville, this is only a rough copy that I have myself. In Meath there are forty-one

thoroughbred horses; the next largest county is Down with twenty-six thoroughbreds 9561. Do you suppose the supply of stallions has naturally suited itself to the local demand. I mean the kind of stalling bred !- You; I think that they are, but I should rather like to see an improvement By the "kind" I suppose you mean thoroughbrid or a half-bred 8567. Thoroughbrods, half-brods, Clydeniales, or whatever they may be 1—Yes; I think that in some

Printed image digitised by the University of Southampton Library Digitisation Unit Printed image digitised by the University of Southempton Library Digitisation Unit

Jan. 7, 1807. Sir Owen R, Sinche, c.m.

at the scenarios they are pretty well multied; but I mix that in all the countries there is a given number of addition, and it would be a great deal better it tages or an attribute to ply for hire. It will be observed that there are a great sumitee of half-ired became here. I chink that seems of these, when a I have been able to be a seem of the seems of

you understand what I mean.

500. Quite so !- (Witson).—It is more useful to
the farmer class than some of the weeky theroughbreds

can on in the sensing.

Billy Now in to some in these districts he has Dilly Now in to some in the control of the sensitive field of the sensitive field was easily the sensitive field was found they begin to best. On place of a more than they begin to best. On place of a more than they begin to best. On the sensitive of a best of the sensitive of the se

at an engistered in Massin where the total is believe unfactored and forty-one throughly-like few properties of the state of the state of the registeries because it is the only restort we have of how the Dublin Selectify is vector. In I Tyrance there are only two sites registered out of elevers. I gather from that the it is a great number of those other outside there is no person to week it my, to bring whether the people the advantages of registering that for the people the advantages of registering that ISTA. Do you think the system of registration for

1973. Do you thinks the system of registration 1973. Do you thinks the system of registration should be earned further—to the extent that stalling explain to be licensed 1—Yes, I so were strongly of spinion about that, I so men the suggestions I should make it shot all saidliness that are last out for politic hire about he calleged to have a license. I should make it so complainer,

NOTE and in the compressory.

NOTA So as to weed out the unsured and utsuitable stir ule 1—Yes; the licence to be greated after proper imposition, and the animal passed free from 26 servitory disease by an appeared veterinary surgers. Whether that should be done under the Royal Bubble Society or whether it should be done under 20, other schools that might be brought forward.

1. In faton, would be a matter of detail. The coart ing the have alread be, I thick, compulsor, and the complete of the comple

that it would increase the service for and make it dearer than the smaller fermers could offsed; but I think that might be met in smather way by scholding ing in occiain districts arms of the superved stallions to approved mores. But I am quite satisfied if you want to improve and keep up the breed of horses in and to wood them out of the country, by degrees, of everse. It is the had stallions that produce the had mares; and if you have good stallions by degrees you will have a better chass of mares. If you cannot make that compulsory, I would encourage the registration of sires, first of theroughbreds, and I would also of kind, life and harvage and half-levels. I do not think that in Ireland you could by it down as, I believe, they have in England under the Hinters' Improvement Society, that they are to have so many crosses of theroughireds, became I think in some of the best half-had horses in Ireland it would Booth of the host helf-lored horse is that the dams are way. You may be told, but it is very chancy how they are bred. Of course a balf-bred should be not by a thecoughized sire and out of a well-head hunting mare. The farther you can trace her pedigres the better, but I would not have it a give our mon that she should

9978. That is whis I was to get at I—I thick it is agt to stop the grewth of the near, and that is one case in which it might succeed it would fill in toward pollurs. The people we capit to encourage in my opinion, at shows, are the small farmers wowl best better great to the same and farmer served best from a two-peaced, and short feel it properly, you ennote expect that the problems would be write and a succeeding the same and it is not a succeeding the same and in the same and t

hrose mores at all. I would begin with three.

9579. Three 1—I would bread from throughout for
for they are more developed than——

9580. Not theregened by with a feel 1—Ob 1 no.
Became then you mean they would bread from a twopear-old. I would not do anything to encourage
breeding from two-prescribin.

9581. You think a three-presciding not too early 1—

breeding from two-prescubil.

9531. You take it a three-prescubil inset too early 1—
No. 1 don't, it have seen them breed good stock from
the stock of the stock

necessary.

9582. To turn for a moment to these largers borses
that are largely produced in the North, what is your
continue about the introduction of Hayland North.

Well. I don't like Harkeny blood. \$583. Confine it to harness horses !-- Confine it to the harness horse. In the first place I think that it is soft, and in the second place I think that Hackneys are depositive, if I may say so; that they make a very good appearance on young horses, but that the history that we read about them is that they don't turn out to be very good stayers. I think it is only fair to my very much; but I made inquiries about then from men that I knew to be ecceptent judges. I have asked a great many in England about there, and I don't think that any person who studies the subject can ignere the existence of men like the large dealers. over to this country frequently to buy, and man with great experience, and others, have proved the Hackney are deleterious in the countries where they have been tried, and therefore we must scope that as not good to There are other instances. I was in the head from. There are other instance. A real I saked a sentleman there shout them, in Northumberland, and gentleman there shout them, in Decremmorano, and he told me they always got their harness bears, the hasks, from Ledson, became they didn't want any kind of Haricroy blood-thry thought it on impure blood. Another reason, and perturn my chief reason of all applies Hardways, is thing, I think that blood

and an in any obsery spit that it actions based, the local of Harken's believed in an impare liked. Another reason, and retain or spill reason to the property of the spit of the study as impart to that the bore case of the protest inductives in the excuty. Men from all pure lower inductives in the excuty. Spit of the regards better, that is level as a noisel good jumple, regards better, that is level as a noisel good jumple, the spit of the spit of the spit of the spit of the two contact, if extract is void less a raper of the the inducty, and I think at word less very great the inducty, and I think at word less very great the inductive of the spit of the the inductive of the spit of the the spit of the s

I have seek a green numeric or owners 1 were not an all, they are too showy, with an up and down settion. I consider they are deceptive, soft, here no outdernow, are showy in action, and that they would do material injury to the industry of the country. Seek. 10 you chink the production is fulling off in Drahand, speaking generally, of huntren and high-class carriage borness 1-1 think that is a thing their differs

very much. Taking Ireland as a whole, I take is me chan of boss has rather improved. It comes buck wore much to what I was saying about the stalling. In counties where the breeding is not looked after at all it deteriorates ; in places where it is looked aborit is investing very much. I was down in the court Kilkenny last September, and judged at a show them that I used to judge at ten or lifteen years ago, or that I used to judge at the or litteen years ago, or that I always attended if I were not a judge, and I think the class of boxes has very much interval This I not down to the interest being taken in the cution and by the furners understanding it better. The class was altogether superior to what it used to be. First of all, I attribute that to the Dabin Show, because its effect, permenter through the whole of Irebred, and I think that the class of horses, and the quality of berson at the Dahlin Show is irrecoving every year. But it must be remembered that in the Doldin Show the horses are only sent up by gentlemen, large farmers, and by braining people that can afford is. The Dublin Slave woo't get at the mail forwers, therefore I think that everything englet to be done to increase and increase all the country shows and to get the small formers to come in and show at them. These mean cannot go into the Bublin Slew, they cannot afford it, and they don't understand it. In places where loud shows are held there is a decided in process where some shows are not trave is a necessarian

breeding is described.

core, de, there is not the same densor's fee lacks or learness because the flow must be self-controlled 100°, There is also more competition from the 100°, There is also more competition from the Lacks of the self-controlled the self-controlled part Lacks of the self-controlled the self-controlled part of the way of breading could be put on these Armeton horses. A green number course into Editat and selften North of Tubedai, and I am told on very self-

authority that these larees are most up and soils they fair one does a Irish horses. When fair was does at Irish horses. We have a Irish horse with the Irish horses and Irish horses and Irish horses have because I have seen some, best I shink they are pided a first I shink that there are pided a first I have been some, best I shink they are pided as Irish horses horses are e.g., we share upon a first Irish horses horse may be said as Irish horses, in spit to green a bod near many that I shink horses horses the Irish horses horses are in the Irish horses horses and Irish in Irish horses horses are in Irish and Irish horses horses are in Irish and Irish horses horses are in Irish and Irish horses horse may be not a Irish horse horse from the Irish horses horses are in Irish and Irish horses horses are in Irish and Irish horses horses horses are in Irish horses Irish and Irish horses horses horses have a Irish horses Irish horses

these pool onto just out as much as the similar herein Irriand.

550. When you say the demand for the scenarious
ditaind clauses is falling off through various comme. So
at you move you think the most profibility kind of here
to breed in Irriand would be a high claus carriage.

d, thank clauses in falling off through various cosmo. On you more, you built the rose specificable kind of here is breed in Ireland would be a high class carriery at the control of the

a themselves?-I think that if you establish a system of registration, and making the thoroughbred and good helf-bred horses very pronounced, that the others will think that the Clydesdale horses bear a storep. I have never seen a horse got by a Clydesialo you could mistake for a hunter.

9593. For that reason you would like to see the arricultural hoese bred from heiry-heeled horses, such as Clydenhales or Shires in preference to an animal as an equally noft kind who didn't show his want of an equality not know with drift allow the wage of if a farmer can get what he wants from a thorough-bred horse I would rather have it; and I have seen into of very good cort borsenin the South of Ireland got from a good thoroughterd home out of common mores. But I can quite understand the accessity for having big bravy animals for certain lands. I would let them drift into a class of their

own by doing everything I could to bring the others 9594. Do you think you could get enough thoroughbred or good half-hred stallious if the demand was created !-- I think there would be great difficulty at first but by degrees, when size owners become aware of what unly would pass as a covering stallon in a country, they would buy the stamp that would suit; and the cleak that I would provok to puton them would prevent men baying cheap horses

for the purpose of making a covering stalling in the country to make memory, as I have seen door over and 9516. Lord Astrown.-About licensing stallions do you propose to license all stallians ar only inspected and sound stallious?—I would liceuse all stallious that are to be let out for public hies. If you choose to keep a stallion for your own use or for the use of

your friends you see perfectly free to do so.

9397. Do you meen if I bought a stallion, no netter what it was, I should pay my licence !-- If you were going to let it out for public hire.

9318, Is it to be submitted to an examination?-Yes; to be free from hereditary disease. If the system of Beensing were considered too arbitrary the next

thing I would come to would be veterimer inspection and registration, then the Royal Dablin Society would step in, for they would not register a home defective in other respects, though he might he sound technically as regards hereditary dosesse 9319, Every stallion before being let for hire should

be suitable to the district and sound !-- Yes. 9600, And no other stallions should be allowed to serve any but his own mares !-- Yes. I would put a

check on them. \$601. Colonel St. Quintin.-You sold with regard to the veterinary experimation of these stallions you would have them pessed by an appeared veterinary suspece. Would you leave it to a single voterinary surgeon or have a board of veterinary surgeons !- I said

if the party felt aggrioved either by the impecter or the veterinery sorgeon, I would have an appeal to a beard -whatever board reight be considered suitable. Of errors, I have not drawn out ascheme to my what it would be hut some board. But I would particularly would be had seen board. But a worm parter of grand against a man sending up a certificate from a veterinary surgeon in the country and then demanding registration. I think that in that way perhaps through ignorance lots of very unsound horses would be paired off in the country.

1602. In fact you would safe-guard the individual opinion !- I would.

1603. Have you been through many fairs in Ireland of late years !- A. great number. 9604. And there has been a great discussion as to

the weedy useless animals there are in the frire and this is attributed a greatdeal to the thorough bred horse. But have you noticed that in addition to these woods there are a lot of horses of substance and boss that are very underlived and misshapen, and practically

useless for any purposes !-- Yes; but in the first place to guard against getting this kind of animals you meetics, first I would put a restriction on the stallions. State, and 9505 Do you attribute that to the thoroughbrod so much as to the mondescript stalling in the conserv ! -I would attribute it to both together-breeding

freen a bad woody sire, olthough thoraughbrod, or from a numbercript animal.

9000, Mr. Warsvar.—I think you say in your

paper, Sir Owen, that the had weedy thoroughtreds have done more horm than anything 1—Yee, I do ; I think that there is nothing worse than a useless weedy thoroughtred bought simply because the owner thinks be can make a little profit in the country. 9507. With regard to the vetures that you put in,

do you mind telling us how you had these preposed?

— Certainly; you are aware that in avery county there are returns of these things for statistical purposes, and I got these from the different counties checked up

9608. We will toke the county Londonderry. You have not checked those seven stallions returned in Londonderry, as thoroughtred, with the Wetherby's Stud-book to see whether they ero right or not !- I

9600. So that they may not be absolutely accurate? -No, I really got it originally for my own information. I only offer it to you as it is; I have a detailed return of any of those house that I can give yon for your information. I can have every out of these houses in Londonderry, but I have not com-

9610. But is not the whole of the country divided into police districts !- Yes, certainly 9611. And do you think it would be possible to abtain any returns more accurate than these of the police, each imspector being respensible for the reterm of his district !-- I think it would be the most accurate

way you could obtain it.

9612. You think it would be !- You; in the same way that agricultural statistics are prepared now.
9613 And you think a return has been obtained for 1895, though not yet published, in that manner !--I should think so : I don't know it as a fact, it does

not go through me 2614. There could be un more accurate obtaining a return b-I don't think so. This being a nee official one, there may be inaccuration in it. I really got this for my own information.

2615. In the district which you are speaking af now, by what classes are the best breed must be kept?

-Whoch district

9616. I am talking of Ulater generally, omitting the corgonal districts 1—By gentlemen, and by what you cold grantlessen formers, and large formers.

2617. What da you call a large former 1—Men such as there are ploofy of in Twone, Arusegh, and other

counties, with 200 or 300 seres. SGIS. Do these men breed the best borne!—I think they hreed the best bose for their own purposes. They don't go in very much for hunters, but they breed the best stamp of governl utility and farm heres I may say that it is very exceptional to see a good colt or a filly with a small farmer. 9519. Their marce ure of a very low class 1—Yes; the large farmers have the heet marce, and what is

more they can afford to give a higher fee than a small farmer; and what decides the small farmers more than anything else is the price they have to pay for the service. I wasn't asked about fees or else I would have told you.

CRAIRMAN,-Don't wait to be asked anything you want to say 9520. Mr. Wamers.-Did you want to say as thing more about fees !- I was going to say that the fees vary considerably. For instance, one have in ness vary commencesory. For meaning des finite in Meath is standing at £50, "Brown Primes"; "Ancetic" in £40. Then you come down to £10 for thoroughbreds, but the ordinary service for through

Printed image digitised by the University of Southampton Library Digitisation Unit Printed image digitised by the University of Southempton Library Digitisation Unit

Jan. T. 1887. Sir Over B. Stacks, G.S. the country for thoroughbool horses is £3 to the furnous and £4 to pentionen. Why they should farmers and £4 to gentlemen. Why the charge them more I don't know, but they do. 9631. There are a good many so-called thorough-bred horses through Ireland that serve at lower rates!—Yes; often some down so £1, and what they call "the right of a feel," and it is a very tory one -the right or a next, ann it is a very common thing through the whole of Ireland that a man will go to a friend and agree for the sight of a feel; if there is no feel he pays nothing; you can get a thoroughbred horse down to 10s. In the return I have I have got the fee of each lorse,

but of course there is no use troubling you with \$622. I think you mid you thought the Irish blood was very pure. Did you mean from that there had been no importation into Ireland of eart-horse blood 1-No, I mean what you call the original Irish brood mare or horse was considered to be of more blood and good sound staying blood.

2023. Have you any idea when first of all foreign
blood began to come in t—No; but I remember that about twenty years ago when Lord Licence brought a Harlyney stallion over to the county Troperary there was the greatest outery amongst all horse-tending people in the country, that he was going to rein the

9624. That was about twenty yours ugo 1—I should think so; it might have been fifteen.
9525. Did you ever bear of any Clydesisis blood bring imported into Iroland 1—Very often; and I have hered it confermed very frequently, smoog people in the North of Ireland especially.

9676. You dislike Clydesdale blood in a hunter 1-No. certainly not. 9627. CHAIRMAN .- The question was, do you distinc Civilentale blood in a hunter !- I said. "Yes,

ocrisialy.

9628. You said the reverse !-- Oh, thank you for the correction; it was the way it was part. Oh, certainly I dislike it. \$629. Mr. Whiteen .- You haven't looked up or taken the trouble to find out when Civdendale blood and curt-howe blood was imported into Ireland !-- I ean't say. I know it has been tere a very complete of the paid I had a hour of the I said I had a hour I said I had I had I said I said

no practical experience, but I gave is from the epinton of mm whom I believe to be computer, judges, and I gave you one or two instances of men 9631. But you have not had any personal operation of Hackneys t—I have never had a

9532. You don't know how they were bred !-- I don't, but I said also that my greatest objection is

that I comider it does harm to the great industry of horse-brooting in Ireland. 2633. Do you think that any of those small mores of Doncgal would be likely to breed hunters. Is

there any danger of their becoming honcer brood marres ?- No, certainly not. 9614. No people would dream of breeding hunters . from the mares that come out of Donegali-No, and going further than that, I say, though I don't like Hackneys, I think they have done less larm and a certain amount of good in Donegal—I have seen nearly all their sires there—because they were better than what they had before in Donegal. It does not join in any way upon a hunting country, but then, at the same time, if I were asked the question I would much rather see a good stort, small, long, low thoroughboul home, if you could get him, or a half-heed home there than the Hackneys, boosuss of the · prejudice against the blood. 9835. Do you think the produce of the thorough-

at the produce of a Hackney !- I think it would,

.Well, yes .. Of course, the experience of the Hackneys

is only a few years in Donogal. But remember that there are eleven Hackneys in the county Donogal, besides the five of the Congressed Districts Board, so that all the Hackneys in Doneyd wast not be put down to the Congested Districts Board. I day the drag to the congress in; I don't knew whether the Congreted Districts Board encounged the others to get them or not, has there they are Colonel St. Quintin was speaking about the procure and I see it has been suggested several times about Government stude. If you like my opinion on that-

\$637. CHARREN-We should like your opinion about anything connected with the snigert t-I my it was proposed by one or two witnesses that there should be Government study. I should be very much against unything of the sort. I think that it would interfere a great deal with private enterprise. I money, and that the money would be a great deal more profitably used by heing distributed through the country in the encouragement of shows such as I have recommended-local shows; and I think, lock ing at it from a financial point of view, the Govern ment stode would have an enormous amount of miefts. And what would become of them ! The Government would sell them, and that would be distributing

on the part of the Government bad stock through \$638. Of course there is a system of licensing !-Oh, still with all lecensing you must have mistin.

9639. Still a system of licensing would be interfering with private enterprise 1—Not to the more extent. Every one that put out his horse for hire would be obliged to have a licence, the same as in a great number of other trades-for keeping covering stallions is a trade-so that they would be all in the 9640. I suppose one of the practical effects of that

would be to put an end to this class of thoroughbed horse now serving t—That are bought for a few sovereigns for a man to make profit through the 9541. To that extent it would interfere with private enterprise !- Yes. There is mostler excetion that has arisen very often, and that is buying borses direct from breeders. I have seen a great deal about it. Troopers, I believe, it is impossible to buy through the country hasiness. With small farmers, if a gentleman, or any person who is respectable or is a stranger, comes to them to huy a horse, they immediately think they have get a treasure, and you can't bay the animal. I

don't think you ean boy a horse, as a role, from a

small farmer at all until he has had a try at a fair, or teachers two 9649. Colonel Sc. Quirrirs,-With reference to that, it has been suggested that Government should take up some land and form a depôt, not for breeding. but for buying direct from breeders-buying at three years and keeping the horses for a year or eighton months outil they are fit to go into the service. Do you think that would be a good financial speculation for Government to carry out 1-1 think you could get the houses, but not direct from the breeders. As to the financial question, one would have so work it out to see what the cost would be helicer I could give an answer. I should not think it would do. I don't see anything to hetter the present system.

9643. You don't think it would be advisable for the

Government, having a topply at their doors, as they have now, and having all they can take when they require them, to go to the expense of a large estabhistorest to buy young stock, and to take all the risk that must necessarily be incurred until they are enabled to send them into the service t-Certainly bred home would live and theire as well in Donegal not; I think they would be very foolish—that the Government will nearesty ever be sale to buy direct from the breeders. I think that a farmer—in fact I 9426. You are now speaking without experience !-

have that a farinte—will still a borne to a dealer that he would not sell to you or to now. I have been to fair with the late obstead of my regiment, when regiments used to mapply themselves with homes, and print it would be £50; and we had so read a disher it key because we could not. I meatin that houses a post data has been and and written about Government beying direct from benefits. I think it is no very good blant; to do if they can, and when the on improved to so, and here are greatly house the

an inspection of the control of the

district to subsidies approved barses for approved mares.

76/d. You mean subsidiesd by the Government—
Saladiased by the Government, which would be a great
deal a better way of spending uneary than exhibiting large stude—I don't say lineoling stude, but large
subdishingent bile Colonel St. Oufstick assort have been

suggested.

3616. You den't object to the Government placing paper stallisms shout the country at low fees 1—1 would rather use the existing stallions through the country then send stallions to the country. I think in the one case yan encourage private exterprise; in

In the one case yan encourage private enterprise; in the other you are rather up to interfere with it. 1647. I think you said you were at Kilkerny the other day!—In September. 9448. You compared it with the period of fitness territories and With the vertical of the

or security years ago!... With the profess of accessing years ago!... With the profess of ten years go... I five the first country then.

\$409. You throught that the close of marses were solder improved to—Yea. I make no engagestion to them which I think to a very impression on. I don't have that that it to place to mention it. It there show that that it to place to mention it. In there were the profess of t

name; but I don't think a brood mate that wins in too show should were 2s allowed to escape to again in that thew. I have nown irratances of where this natio meet has went at two, three, and four shows resuming. And farmers think it is of no use to compete against And farmers think it is of no use to compete against Royal Dodds; Society prices. This against no suffice the transfer of the contract of the contract of the shawps in classes of different against the others are shawps in classes of different against

1600. Taking your experience all over Ireland, do you think that the manue that people bessed from you think that the manue that people bessed from you that they had some follows or very large besselves, manually that they had some of them to the some was deforming power only, aways assort very large besselves, manually that the some of the some was described, and the some of the some of

Ruti have bead slower.

951. Are you interested at all in the posies in Wat Karry ee in the Connensus posies 1-1 dor't know man the same and a hard Connensus every. I have bean to factor them, a the same to speak of them. I was glad to see the Connensus Extery; but I dor't know sufficient of the posies there to speak of them. I was glad to see the Connensus Exterior them. I was glad to see the Connensus Exterior the Rute and a Webb pony down to Drough! I think that will do got Drough! I think that will do got.

9402. Have you in your experience come across sees of hanges que of Connensus positis 1-pre-

quently, and me better cone could be had. I have some strengenstry met the componently met the set that this though the produce a good server, and the server of the control of the contro

to get, or he always drove horses as much like hinters and of the stanp of hanters as he could get. \$505. You are not owned of the nutter was referred to hint—I am not sware. I think if the nutter was referred to him one would naturally think the Secretory could produce his reply. He nover spoke to see hoost that; you do I show his opinion made to be

be against Harkorys.

9637. Do you know anything about the freelyn
Governments buying noon than they used to do, or
as buying noon must thin they used to do They on

uses for service perposes?

Selfs. Well, for any purposes!—I den't quite
to understant.

10 052. We have but it in evidence that the best ranses are going out of the country chiefly to foreign of contries — I don't see how you are ever to prevent, in the former selling his man whether the it wood

to 9500. We should not mind if they were had 1—Tile only wer. I think its fraceuse the good mares in the secondary is no get rid of the had stallines. In the year, a 1873, I failin it was, I was excursined before Lord or flow was recy strengly into the question of a decision of the secondary is the secondary in the secondary is the secondary in the secondary in the secondary is the secondary in the secondary in the secondary is the secondary in the secondary in the secondary in the secondary is the secondary in this his because good allo be better. Then I

which was not I think this Committee us, a term of the committee of the co

9631. Lord Amerous.—They give 25 or medials—I am quite ours which they would take in Ireland—it would be the £5. With reference to the Hunters Improvement Society I am told by a preminent interior title they registered but Breds as well as thoroughbreds, and mance too, I chain.

962. Mr. Wasson.—The Hunters' Improvement.

96.02. Mr. Wanson.—The Hunters' Improvement Society b—They register half-breds as well a theroughbreds. 96.05. Lord Austrona.—Under certain conditions! —Yes; they are obliged to have four eccases, I think.

Am 1, 3897 Sir Owen E.

\$164. The CHAIGMAN .- It has been suggested before the Commission that in the case of half-head sires before they are registered it should be ascertained what kind of stock they have got, in addition to the inspection of the stallions themselves !-Well, I think a very good half-bred stallion, and he would have to keep him e year before he got him registered, and if wan want to make recistration a great point, without not discourage the horse from the outset. I would register him from the appearance and soundness to

begin with. 9665. It has been given in evidence that some districts are without a stalling, notably West Cork.

1016 Pacerne I believe, some time ago the Governmore did sand a house down i—I am talking of a different thing from what you are, you are talking

1617. No. no; this in West Cork—the district they sent "York" to nome years ago t—Yes; I believe that if the country requires them, stallions will turn un: they may be ruther scarce for a veer or two. but in any country that wants them, they will turn

2648, Mr. Wanxun.-Then you would register

half-bred stallions got by a thoroughteed horse out of e good looking mare 1.—Out of a well-bred more. would rether have the eross. 9469. But you would register that t—I would. 9470. I don't quite understand you as to the manner in which you would have the serres registered. mores would you have registered and how would you

have it done!-I would have it done under the Royal Dublic Society if possible, became I think they have an organisation ready that if you started you our put into weeking order. \$471. Would you leave it optional for people to register their marest—Yes; but as I said at the beginning, I think that the Bayal Dablin Society, or whatever society works the horse-brooding in Ireland. ought to have more agents through the country, etherwise it would be impossible in countries where there are good sensible farmers, so there are in the North, to receive the advantages of the scheme and to regator their horses. I think it would be absolutely us cornery to establish some system and I den't think was craid do it better then under the Royal Deblin Society-to have sounts theoreh the country to show the private

the shows where the pounds, shillings, and pence eccess in, and where they will see the paint they And you would rather do that through the Royal Dablin Society than through a county committee |- Through the Royal Dablin Society-do. conjunction with a county committee. I think all sounty committees would require a central authority. otherwise they would be fighting amount they calve

9673. Did you hear it suggested here by a gentle man from Limerick that all houses should be registered like dom through the petty sessions elector, and show wanted a certificate of the breeding should be able to get it by paying a shilling for or something of the kind!—I don't son the object of it. 9674. To keep a record of the way in which serve

animal was heed. Dovon think it renoticed by Neither procised nor useful. 9673. It is quite unficient to enable people to

modular reason of was wish to meristar those of Man only to recister but to encourage the resistation of do wen meen 1 9670. How exactly would you encourage it beyond given prime to local shows for the product I... Thereselve the Royal Dublia Society having local committees or

agenta, and letting the farmers know what half of them don't know. 9677. But the way would be giving prices at load shows !-- Yes ; and ventilating the advantages of

9678. And do you think that the produce of them registered marus would nell for a higher price than the endinary once t—I do; of course you will have mistis

\$679. But there would be a roosey advantage !-Yes, with the general breading 9180. The CHATHMAN.—Do you think one statistical

information as wegan house-breeding as an industry in Ireland is sufficient b-I normaly know what it is and the exports and imports i-You mean the public

one. I think you mean what was before your own 9632. No; I mean the public one!—Yes; I think it is. I don't see that any further information on got that would increase the horse-leveding in Ireland. I don't see any object in it, looking at it

1633. In these mything she you een suggest to us new 1-I don't think there is. May I refer to my memorandum which I sent up. 2634. Mr. Warnen,...I don't think you have left

anything out. Dituess There is one thing that I have a note of here I see. That is that in may country where there is for barting, it does a great deal to improve and maintain the breed of horses in Iroland; and that is of Dablin-ros baye a much better class of home than you have in the North, where you have no fine

\$655. Mr. Werrors ... Do you not say way to make tages of registration, and to lot it be demonstrated at the Government to establish fox bunts in the North ! -No; but I think all these things come out. I evid there was a sweat number of dislove in the North of Irelead who hay an immense number of kunters,

but I find that all their hunters come from the Socta 9464. There are dealers all over the North !-- & tremensions lot of dealers eve in the North, and generally their house are bought from the South. I

thank these are all the points. . The Commission ediourned to next day,

Mr. James

NINETEENTH DAY FRIDAY JANUARY 878, 1897.

Present :-- THE REGRY HON THE EARL OF DUNRAVES, E.P., in the Chair; LORD ASSISTENCE, HON. HENRY W. FITEWILLIAM, Mr. P. LA TOUCHE, COLONEL ST. QUINTIN, LORD RATEDONNELL Mr. F. S. WOUNCE Mr. HUGH NEVILLE Secretary.

Mr. Janes Daty, Liffey Benk, Dublin, examined.

\$687. CHARRAN.-Mr. Daly, you live at Liffer

9688 And you have been evened in here based ing for a consideratio number of years 1 -- You \$680. You have a stud farm of your own, have you not i-Yes

Buck !- Yes, six

of i-X cs.

9690. What class of horses penerally do you deal in. Mr. Daly !-Well, I hay hunters, chargers, harness horses, troopers, and remount horses. 9691. Taking the hunture first-do you full the 9601. Taking the hunture first—do you find the apply of hunture to be as good as it used to be?—

supply or manner to be an good, as if meet to be i— [Wed, I don't know that it is quite an good, but I think it is quite equal to the demand. The demand is good, and there is a fair rangely, not of very highclass hovers, because they are never very electiful. 9693. In the demand increasing, do you think?-The demand always has been increasing for a good hose, and is steadily going on 1 9693. Have the prices kept shout the same !- They

certainly have been no worse, if not better. I should 2024. And do the same remarks apply to highclass carriage horses 1... Cortainly.

\$695. And do you find that the rapply is about the some !-- Well, the supply is not quite equal to the decend. I could sell more good horses if they were \$696. Do wer think the ramply could be largely increased without affecting the price !- Yes. \$607. What parts of the country surely yes chiefly

with these high-close hunters and high-class carrings heres 1.—Well, I hay most horse in Tipperary, Cork, Meath, Wostmenth, Well then those are several other gounties, such as Limerick, F 96974. I surpose you buy all over Tooland 1-Ven.

my lord, with very few exceptions.

1 9893. In the South meetly !-- In the South. I used to go a good deal to the North of Ireland years ago, hat I do not go there now. I have bought some very

good horses in the North of Ireland.

9 8498. Why have you left off going three !—Ba-suase they have ceased to breed good horses. They have not the thoroughked horses there now that they used to have formerly. h 1700. Do you attribute that to the absence of good thoroughlyed stalliens in the North 1-I do. \$701. And the removate you get in the same dis-

trict, mainly !- In the South principally .- South and 9702. Do you key at all in the congested districts, or anywhere in the neighbornhood !-- Wall I don't know about the congreted districts. But I have

hought serveral high-priced horses, good horses, in Mayo said in Londouderry. I have hought some horses there from Donegal. That was when I went to the North of Ireland. 9703. Do you buy generally at the fairs or from threeders -- Well, I attend all the fairs, but I buy

principally from the breeders 9704. Do you think that the supply of good houses at the false has fallen off 1—Oh, yes.

9705. They are bought before they get to the fairs?
—Very often, Then the Royal Dublin Society's Show has taken a great many of the horses that did attend fairs. A good many come to Dublin in August.

9708. Are you able to give us any opinion, Mr. Daly, as to whether good houses are bred on small farms, or whether they principally come from the larger skins of farms !-- I would say that scentionally good herees may be bred by small farmers, but as a rain, the better lower is bred by the better class. When I are a small farmer I meen a view of twenty arres. I have often hought a good heem even from three woods. As a rule the others board the bestthey are in a better position to broad them

2707. I think you said that in your opinion the Keeth, speaking broadly, is not well supplied with mitable thereoglibred stallismal—No, my land. 2708. Is the South and West—Lin the South and West there are thoroughtred homes. They may be

9700. We have heard a good deal of systems before ns to the offices that is some parts of the country thereughteed sires are of an exceedingly inferior description, is that your opinion I—Wall, my opinion is that they outfil to improved a great deal. The great want here is a good theroughleed house—a good

9710. Throughout the country generally 5—Oh, no. Kildore and Meath, I think, are very well supplied, and Dablin, and there are some good lovere in country Cork, Literature, and Waterford. I decimon any

of those places.

971). You say that in some parts of the country there is great need of a letter class of thereoghtered stallion !---Xes, certainly. I think it is no good attempting to do saything without a really good

horse to start with. \$712. In those parts of the eventry that you have to your mind do you think that the farmers mald pay nor the service of a good horses—I chain they ought not to be asked to pay, my level, unless a very zonatral sum. That is the way to induce them, according to my opinion. Give them a very good horse at a very rounded fee if you want them to

9713. Have you say idea at all in your mind as to

9714. I mean by what machinery-by what means t -Send a good herse into the districts that he is re-3715. Do you think that the Royal Dublin Society

9715. Do you think that the Keyal Dublin Security or some such body should undertake that work?—I shink the Royal Doblin Security could do it very well. 9716. Well, now, for the lunters and the highthat the theroughbred sire is the meet suitable sire tant the theroughered ere is the most immade are to produce that class of horn t-Certainly; in feet

9717. Have you may objection to a half-head size!

—I have to their being subsidized by the Government. I do not see that a half-hred sire has got say pull, if a thoroughtred size with the same qualities can be remined, and they are a most advantageous

produce very often in a good horse. If you cross her with a half-bred horse my opinion is that it is a

very doubtful case.

0 T 9

Jun. 5, 1657. Mr. Aumes Daler

9719. But in regard to the small, weedy, very light mares that we hear of in some parts of Ireland mares uses see hear of in some parts of Ireland, would you in thric case also prefer a thoroughland sire, provided that he had sufficient hone and substance f—Certainly, my lord. I think the house ought to be a thoroughland, and of sufficient strength and substance. In fact I trees a good horse 9720. Weuld it be difficult to find that kind of

stallion !- No, my kerd, if you pay for him. There is a difficulty always about finding a good one, but it is wenderful what an effect mercy his. I have a few of them mayedf, but I have had to jey for

5721. Now, as to harness horses, is not action one

my lord. 9722. Do you think that the thoroughbord sire is as likely to give notion us, say, the Hackney size !-

9723. Have you any experience of the produce of Hackney sires, have any peaced through your hands ? -Well, I have only seen them examily. I have

certainly not taken much notice of them. \$724. Have you get any opinion of your own as to the effect likely to be produced by the introduction of Hackney blood !- I think if it was the object of the Government to ruin the horse-breeding industry in Ireland they could not go about it in a more effectual manney 9755, Do you think that the Hackney blood is

Easy to spread through the country from the con-gested districts, or could it be confined to the congested districts !- I certainly think it would spend : in fact. I am sure it would.

9735. And do you think that the strain of the Hackney blood would be more difficult to detect after a generation or two than the strain of, say, the Clydosdale?—There is no difficulty in detecting the steen of the Hackney to any man who known any-thing sheat a berse. I don't see any difficulty about it at all. 9127. Then, if there is no difficulty in detecting the Hackney strain, what danger is there of the Hackney strain raining the industry thropshoot the country

pearally 1-A may tell you that the people who some because they are strendy flooded with them, Every man in Ireland who breeds a borne breeds haus to sail. Therefore he ought to breed what the customer words 9728. Should we not go on breeding what the customer wants in spits of the Hackney blood, if as you think, anybody our detect the Hackney bloods—

I don't think so, my lord. There are only two classes. according to my opinion, to breed-one is the cart horse and the other is the thoroughbred horse; but les that thoroughired sire be of the proper class 9729. As to what I may call the second

harness horse, the general utility horse, and such like, is the price as good as it used to be for them.—It is not, my lord—mothing like it. You as we are fleeded with American bosses. Forty thousand American with American lorses. Forty thousand American horses come into Great Butsin and Ireland every

9730. Do many of them come to Ireland !-- Yes, good many of them, my lord. There is a cutting I pool out of the Manahester Chronicle [indicating].
9731. You took the figures out of this, did you, Mr.
Dely !—That is so. I read another second hat

night, where they said between forty and forty-six thousand come in 9752. Well, of course, I can't discuss the absolute accuracy of the figures, because we have no way of getting at it, but I assume that there is a vary larve importation !- There is, my lord. If we send horses

to America-I send many horses to America-they

and know what they are, and there is no use in our breeding horses if we have not oustomers to buy them.

then look out for the pedigree. I would not buy a 9743. Do youthink you generally pet reetly securate pedigrees !- I should say so. I think the men as a 9744. Have you at all considered, Mr. Daly, the advisability or the practicability of licensing stallions, or baving a more stringent system of registering stallion ? -Well, I think that registration or focusing stallons would be a very good thing, my lord; hat if they followed it up by a system of sending their good houses into the cenatry and charging a low fee for these, it

charge us 30 per cent, on all horses going out unless

they are thoroughlyed. On any helf-load horses going

to America they charge 30 per cent. on them and 9133. Do you buy those American horses yourself!
-No, my lord, I have mover lought an American

9734. They are very good, some of them-are they not 1-I have never beard of any of them being ters

9735. Do you think that American bornes are in-have heard of such a thing occurring. I think all

these losses coming from America ought to be branded. or something done to them.

9736. You think they should be marked in some

the fast that the trade in the general utility here of

that kind is very swoch falling off !- Yes; I should

9738. What, in your opinion, is the most profitable kind of horse for a farmer to bread 1—Tos predace of

the best thoroughfred sizes to get hunteer and horses

horses. If the Government encouraged that they would seen see a good improvement. There is no

other way of doing it. There is no use in breeding

common harses, because you can get nothing for them. You may breed them to do farming work, but they

9739. Do you know anything of the Kerry posies or the Communers posies 1—I have only had use Con-

teman pony. I had a vary god one one—a cob—and I sold it for £200 to Mr. Fox, and he told me often he would not take twice £200 for it. I have lought

homes from Communara ponies—at least I have been told as. Personally I don't known.

9741. They would be by a thoroughleed !-Oh,

9742. Do you attach souch importance yourself in buying to pedigree 1—Well, I always try a horse sad

told so. Personally I don't store.

9740. They were very good f—They were.

harse off the back.

way !- I do, most decidedly. 9737. And to this importation you largely attribute

would seen put the bad ones out 9745. And as to the mazes generally throughout the parts of the country that breed hunters and high-class

carriage busses, and so on, are they suitable 5-Yes; I would say there is a very fair supply of mares, not see many, but quite enough. 9746. And an good quality as they used to be !-

Well, I think so; they must be, for they breed horses just as well if not better. 9747. And do they keep up any of the special characteristics that we hear of of what we call the old Irish mayo !- Well, I have heard a good deal about

the old Irish mare, and I think there are a good many of them left. 9748. It would be rather a difficult suimal to define accurately !-- Well, I would say it would, say lord. 9749. And we have had before ue that there is a

reater tendency now than there used to be formerly among farmers to sell their best mares to foreignershave you any opinion about that !-- Well, if a farmet has a good mare and wants to dispose of her, I don't see why he should not. 9750. The question is, does he do so more than formerly-is these more demand from abroad |-The

Printed mage digitised by the University of Southampton Library Digitisation Unit Printed image digitised by the University of Southempton Library Digitisetion Unit

fareigness as a rule buy all the marca; in fact they would buy 90 per cent, marca. 9731. Do you know are they buying more than buy used to—are there mare going abroad than formerly 1-I should say there were ; I should say they

foreign — a sizonessy view were a harmon my may go at the rule of about 5,000 a year.

9733, Mostly marcel—Mostly marcel—at, certainly, 9735, Bought for the foreign government—A great deal for the foreign governments. A great many private foreign buyers come here too; nearly all the critiserals armies are reconsised from Lephand.

criticatist sensite are mounted from Iroland, greatgraft Do you know what prices the foreign governments give-are they far beyond the prices our Government gives—Inversaries do thus, but Teleires they give swee than our Government dops at least Have board so. I don't know. 9755. And they much profess maryst—Yes, I

9713. And they much prefer marra 1—Yes, I believe so. 9735. I gather, Mr. Daly, that you think that the best thing that could be possibly dens to improve horse breeding in Irokand would be the introduction of a better close of stalling 1—There is no other way of doing it, my leted. There is no other way it can be

dost.

3137. Do you think it would be a good thing to ty to induce the farmers to keep their mores at home inited of selling the best of them I—If you produce a good stallion the farmers will keep the marcs. The investment once to their own interests, and they know

wall what suits them best.

9788. Mr. Frywri LLAW.—You resting object, Mr.
Bully, to half-first stallines—do you think you could
get the required number of three optioned stalliens to
satisfy the wants of the country 1—1 de, sir.
5789. That is at a reasonable sum 1—170; well, I

derk know what you would call a reasonable sure, what private people are prepared to pay for them. \$100. Yes. Do you think you could get quite mough of them !—I don't think you could get quite mough of them !—I don't think you could get them is a great burry. They would not be in the marked to start white mmy large quantity, but you could

get them.

19761. I gather the way that you would like to
hip the heres breeding interest would be by allocating
good stallions and subvisiting them, and obliging them
for that subsidy to serve farmers' mares at a low for!

—Yes.

982. What do you think the large fermers are the to pay I—Well, I don't know what they are able to pay. Those men will go when the but herie is, independent of the sharpy. I don't mean that the laws should be sent into a district of that kind. I dought you wanted to send then into districts where

FIG. Yes, one would. What do you talk the sealle father can high yet—I day thick any farmer only to pay more than a poural fire a good class of horse, if you want to held out an inflacement to him to kreed, he he poor or rich. The rish man went talk £1 at it to some in more than to poor out. The rish man went talk £1 at it to some in more than to poor out. The rish man went talk £1 at it to some in more than the poor out. The point is to the first thin a some in the foremental in point is to it. They give a couple of the yound pounds for a horse south more all him afterwards to someholy fire £100 or £500, and lish him out to foremes.

Fig. Talking shout Hackneys, you add that you tooght that say layer could dister the Hackney was, or the creas of any of those brooth—Well, I don't blank a dealer would have smed difficulty about it. 9790. Do you think the general buyer would i—I would include the stay speak for myself.

9780. In a generation or two 1—I cannot narwer with the property of the stay of the stay

Fig. 1. A generating or two 1. Common saves and the question.

Mr. Inces

and a spitable horse !--Welf, I was laying out Daly's money as carefully as I could, and I wanted to get the best snimal, and I fairly succeeded. ages. When you have been looking for the Dablin. Society's stallions, sometimes it has taken you a long time to find the right hove !-- The Dablin Society

want a very good univeal for £300. If they say - Daly, find the horse and we will find the money. I could do it. cours do no.

a horse that would do any good in the country for g3001-I certainly do not.

\$890. Do you object to the Clydeschale cross in banters !— I do. 1831. Do you think you could detect it in the anirasis you buy 1-Yes.

8622. Do you know there are a great many Circles-\$633. Do you know there are a great many Clyrice-cals and eart hove stallings in some of the districts in which you buy !- I suppose there are. \$833. Do you know that in Westmenth, Month. and Cork there are more cart borses und half-bred

know, but it may be possible. \$634. I think you said you had taken the feures. as far as you could, from the foreign governments as to what their purchases in Iroland are !—It was

perely what I got from other people who dal business in them. 1635. What governments do you albuis to 1—Swiss, Eslan, and other Certinental people.

1636. Datch's—Yes, I believe to. I sent, myself, herees to Germany I sent eight to Berlin the other day, but they ware not troopers. 1637. The Greeness government do not buy troop-

on now from Ireland 1—I never sold a trooper to any greenment but the one. 9838. Are the Dutch the Impost buyers !-- I really could not tell you.

6632. Thoseare then the governments you slitude to, the Swiss, Italian, and the Datch !-- I believe so, 9840. Do you know that all those governmentsthat the Swim government and the Italien govern ment buy a considerable number of Heckney stal-I know that all the people long!-- I don't know from those countries that I have smales to the gavernment officials all condemand them. 9841. But you don't know that they still buy

tions !- I do not 9849. Do you know that the Dotch mysymment have been purchasing acres toroners from Canada !-! do not, but I know the English government went there and could not get any, and came back again. 2545. You don't know that the Butch recognized have recently made an importation as an experiment

9844. Do you think that the importation of American horses lessens the price of Irish horses !--Certainly, of a certain class.

#845. When you refer to buying in Mayo and Kerry, have you ever some further west then Traine 1

9846. Have you ever some further west in Maro than Westpurt and Ballina !- No. \$846. That was the district you alladed to to

talking of those counties!--Yes ; but I have bright furthert part I have been myself 9347. And with record to the class of people who

resistant the horses that you buy, do you Mr. Roberts in his division of closees. He said that there were a certain los of small farmers, those below \$100 valuation, and that they bred worthless saimals ; that there were a class from £100 to £200, that heed a fair kind of azimal; but that the people who heed the horses for which Ireland had acquired such a high character were the gentlemen and the farmers above £310 valuation. He gave that as a rough classification !-- I am very bad at figures I den't know anything about that part of the subject.

9848. What class generally breed good bressel——It is difficult to define them. You might get a very good horse from a very poor man. Very often I \$849. Do you think it is impossible to make any

elastification of that sort 1-I think wherever a cond stallion is standing poor or rich may produce a good home from him. I have seen rich may with the worst korses I ever saw as well as poor rien. 5850. Charman .- How many thoroughbrod stal-

Hone have you got 1-Six, my lord 9851. Do you breed yourself; have you any marce? I have four at my own sted and ten lessed.

9852. Thoroughlord marcs I—Yes. 8853. What you breed you welf are thoroughlord stock i-Therough keed stock. I bought a good deal 1854. How many mares do you say !-- I said I had aix horses. I thought you were speaking of liceres

1855. Have you any mares of your own !- Yes. 1658. Well, then, these horses of your own, what are they used for, breeding—thoroughlived stock?— And half-bred stock. I bought stock the other day

man £110 for a two-year-old by him.

0857. This class of threveglibred that you think might be bought by the Government and scut about to the power parts of the country, I presume, you

would not require such an expensive valuable home as you would if your object was to breed thoroughas you would it your capets was to secon tamorage-hand stock !... No. The heros you want is a house likely to get high-lass hunters and harness houses. and useful horses of everything description. Of course, racing people will take care of themselves; they don't want any looking after at all sy con't want any booking after at all.
9058. And if there was a demand for that kind

of stallies, do you think that houses that are not coits fast enough for raciny might be bought at a fairly reasonable price !- I do, my lord. Of course that in the sure of home you would require to hay -a horse with a certain assessat of power, quality,

1852 Now, supposing the Government or some horses and locate them about the country as a very low fee, according to the condition of the people, my anything from fig. to £1, would you not have some kind of selection or supervision over the class of mores that were sent to them, or would you let any man send any mare to them?---Well, I would leave it on open exection, because I have seen so many more that you might reject that night be the tery best brood mares. I have a mare myself that I am almost sure up wan would breed from, because of an

accident she had. I gave £500 for her, and she has never beed a deformed aximal. She beed an animal I refused £5,000 for but unfortunately when I sold him I only got £500 for him. I think I would leave it an open question about the marve, my

9860 How would you regulate the fee-would it be according to a man's valuation or how !- Well, I really think I would make it one charge altegether. I do not see why may man would be taxed more than another. If a torse is there, sent by the Government another. If a form is there, sent by the covernments at a low fee I do not see if I was rated at a high rate why I would not avail myself of the low fee as well

9841. Then you would have them all stand at the lower fee, if it was for 1-- I don't think you would get so low as for, my lord.

2662. Do you not think that the Government in making a present of the service of the horses should have a chice as to the marse sent to them first should have a chice as to the marse sent to them first think I would so, of course, that the borses that were sent should be sound. But, I think, in the case many good mares, are a little bit tenched in the wind, from old age, or things of Jan. 8, 1622. Mr. frame that kind, I don't think I would have them searcined. It would create a lot of bother, and I don't think it would do any good, old do any good. 1853. Well, there would be a tremendom stramble in all those districts for the service of these horses?

-Well, I would expect that there would be regulations tions, 9864. That is what I want to try to get at. How do you think it would be regulated !- I really do not

1805. Are your borses registered under the Dublin 3808. Do you approve of the week that the Deblin Society are doing through the country !-- I do, my load.

9557. Have you may suggestions to make as to whether their spates a could be improved in any way !--I inst made a few potes here, my lord. I would encourses local shows for mures and vering stock, giving

1668. You don't disapprove of hereding from twoyear olds !-- I don't disapprove of sending a more two years old to the agree. Home of the next means a very last were the product of two-year-old fillies. I would advocate the sending of the best suitable thoroughbred bornes into the districts where they were required at a nominal charge; the continuation of registering stallions by the Royal Dublin Society; no Hankney or half-head stallions to be subuidised by the Government. I would brand or tax American horses. It is the only country in the world where they charge a tax on our horses. If I send a half-bred horse they will oharge 30 per cent. I don't see why thay should

onne in here and try to wipe us out.

9800. You don't think it would be sufficient to mark there !- I do not know whather you can do that or not, my lord. I would certainly do it if I could. 9670. Mr. Warsch.-You would needer the hot from to anything else !- If I oun'd not apply the other

9871. Chamuan.—Do you think there is any blottheed that the prices for the recond-class horses will recover !- Cortainly not, my lord, because as long as the Americans come in they will regulate that, 5872. You told no that they have, to a large extent, given un keering good mitable thaspushkent sizes in the North !- Well, I believe they have, my lord. do not know much of the North now.

been there for years, and I don't know. 1973. You don't know that the came is that they found it more profitable to broad some other kind of

encuter at all. NOTe. I take it from you that you put into two very broad outcories the homes that Ireland may produce-first, the heavy cart-horse for heavy cart work; and for all other persons becam not be thoroughbred sires !-- Certainly, my level. \$675. And you don't object to a borne nominally a half-hred beese provided by it really a thoroughbred?

they obcome. What I say is that the Government ought not to have half-deed horses. If a farmer or anyone else within to got a half-bred horse I have no objection to him doing so, hut I den't think they should be subsidized. ould be summer. 9876. But, on the whole, you prefer a thoroughbred sire to any other i... There can be cally one orinion : in

there is only cun. 5677. Lord Bathrousena,—At former sittings of the Commission, Mr. Daly, there was evidence about the action of Hackneys. Do you care for that action the commission, acr. Many, more was evenues about the action of Hackneys. Do you care for that action at all !—No, my lord, I don't; they have only got

notion at one and 9878. Have you seen many high-class Hackneys at shows and elsewhere !- No; I have not. The best class of Hackney I saw was a black heree shown here from the North of Ireland. I do not know where he

9879. You have not seen many of them; won have not looked for that class of horse !- No ; I have not a horse that you were buying !-Well, I don't think you can find a theroughbred horse with too much action, because he will carry it along with him, No matter what distance you go with him he won't less

9881. You mesu shoulder action !—Yes. 9882. With fair knee action !—Yes.

9883. And going straight 1-Yes. 2384. Colonel Sr. QUINTIE.—Do you think that

the conformation of the Hackney shoulder would not that he wight got, and that it would never some into a riding shoulder !- I certainly say so. I don't believe anyone proposes the Hackney for a riding hous.

1985. It is what he may get eventually 1-Net what he might get, Colonel. \$385. Lead HATHDRINKELL.—I was going to ask Mr. Daly that very question-whether he ever say a Hackney with a good shoulder action !- What we want to breed here is a better that can be disposed of and the people who come here to buy them are cool

judges. They don't grumble at prices, but they want Hackney borses will not produce that. 9887. Colonel St. QUINTIN.—You say you have got very good horses from two-year-old fillies, het your horses, of course, have been well done and well suntured. We see told that in many places the young stock is very builty cared for, and therdau the two year olds are practically half starred thenselves. In those conditions do you think she would throw a good fool unless the filly herself had been exceedingly well done, would it be advisable to breed from her !- I think the furneer is the man who should indos that. The man who wants to breed the animal. if he won't feed it it is his look out. I think it is very hard to manage him there

\$533. Mr. Warren,....In the class for mareness faals recommended for local shows, world you recaire those foals and the precises of those mares to be gut hy registered sires !-- I would cartainly. 187 registeres sires :—I would certainly.

2850. Would you adopt the same principle as in
now adopted by the Dablin Society!—I think sa if. 9890. You said that you think that the American

herees are the chief came of the depression in second rate horses in Ireland. Do you think if we could tax would go up !- Decidedly.

9591. You are not very much afterial of motor cars? 9892. You don't think they made a good start!— They may do some little harm; but I don't think they would affect us a hit. I think if something could be done with American borses—feety or fifty

thousand a year running into this country and Dag land vakes a vest difference nd makes a vest difference.

9893, Lord Assrows.—What would you call the average price of American horses !- I would be only growing at it. I should say about £10. There are but there are recrises borses which sell at 430.

have heard so; I have not seen them. With good tiloroughteed horses here they would breek good carriage horses. I have seen carriage increts sel as high as £300 a piece.

9815. Mr. Freewitzsaw ... How were ther bred!--By thoroughbred horses. I sold a pair of horses the other day for £500, has they were hunters broken to the harmen. I broke them to harmen. 9896. CHAIRMAN.—Anything else you would like to my to the Commission, Mr. Daly t-Nothing I know of, unless you like to ask me any questions 9897. Have you any suggrestions to make !- These are the only suggestions that I have. 9898. What you read out just now !-- Yes my lerd. 0933 Chargery - You live in Limerick 1- f do

my lord. 9900 And you are arrowed in been declined... eact. What clear of horses do you mostly deal to b

-Huntors and high class carriage horses. 2903. Chiefly hunters and high class harness house1-Yes; principally hunters and high class

carriage borses. Where do you hay your burgest-We 1903. stiend fairs, but buy most of our horses in districts

950 in what parts of the country do you hay gostly!— In the counties of Clare, Limerick, Taperary, Cork, and Wexford. We also not a good pany out of Meath and Mullinger district many out of ferant and muninger dutries.

1903. Do most of your bosses go to England, or
what becomes of them !—They mostly go to England.

9006. Which do you deal most largely in, huaters restringe horses 1-About an equal number of each I think we buy as many of one as of the other.

9007. Where do you sell your carriage houses !—
We used to sell the majority to Wimbush of London. Baring the last four or five years we sold a large manuity to Messa, East, who are large inhunators

9916. Do they take as large a number as you esa powids t—They would take twice as many if we sould find them for them, but we find it very difficult get the class of herso.

9909. How in the class of horse they require beed ! -They are by thoroughbreds with few exceptions, and those borses, not a thoroughbred, are practically speaking thoroughbred, because through some accident they don't appear in the stud book, such horses as "Mayboy" and "Mankintosh" that Mr. Duly

afered to 9910. The hunters are produced to the same way ! -Yes. 981). The same class of animal only more adapted to harmon then bunting h... Exactly

9912. Has the quality of horses you see at fairs deteriorated?—I should say they are a very fair everage, but I don't on any particular improvement 9913. Do you see saything the other way !- Any borses as a rule got by thoroughtend horses of good class with bone and substance, are niways saleable and a pool class of horse; we have a sooil many horses the country would be well without, so many inferior thoroughbred horses.

9914. You think some parts are served by inferior Sught to relatitate them horses with high-class open. 2015. How about the manus L. They are fairly

9916. As good as they used to bet-Well, I wrald soarcely say so. soccuraged sufficiently by the Government to retain their good mares and cannot afford to pay the fees denanted, owing to the depression, and also to the competition of American homos; berses have deterioreted were succh to reten owing to the American

\$917. Horses of a certain class !- Principally barness because and utility horses. 9918. Would that American competition affect the price of the high-class burness horses 1... No. I think set, they cannot compete with the high-class home, they are not the same class of horse. I am in a position to voice the dealers. A short time ago I ad an interview with them to England, and such and all condenn most emphatically the introduction of Hackney sires; they have been the ruin of bundrah in Xorkshira.

Jen. 8, 1987. 9919. That is their opinion t-Yes, and the opinion Mr. Thomas of breeders in Yorkshire whom I am acquainted with

and deal with.

1930. You don't object to sires that by accident One best thoroughbreds-do you object to the half-heed horse

with two or three strains of the threambhead !-Certainly, I have a decided objection to him-what you call the Civilendale. 992). Oh, no; a horse that is not in the stud book. districts we have heree, practically speaking, thoroughbred, and the farmers and gentlemen who

bread from them know by experience they are valuable, because their produce econsands a price and

9921a. Do you give any pedigrees with your horses?

—I always give the pedigree I got from the breeder or the party I purchase from 9932. Do they attach much importance to the podigree 1-Yes, great importance

1923. And do you attach much importance to it in haying!—I do. If a horse is get by a horse in the stad book, or a horse that escaped the stud book accidentally, I look on him as being 50 per cent. more valuable than if got by a horse not thoroughbred, but I attach no importance to a thoroughbred because he is in the stod book-I look on him as a horse first, and then if he is in the stad book all the

1924. Which part of the country do you know best b... I know every inch of Linerick, Core, Tappercey, Clara, and Wexford. I had seems good heren cut of Wexford, and twenty years ago the hest herees that used to come to nor establishment cause out of Kerry. That is a county in a notorious had state as regards sives.

9725. Don's you got the same class of horse there now h-No; all the good sizes and the good class of horses that were there for stud purposes are all dead and gone out of it, and have been replaced by a close of Civinniales, and I believe, I am not so certain about Hackmay sires; but the sires introduced by landlords and others who bought as a speculation

have relead the breed of horses in Kerry. 9920. Have they not found that out for themselves?I should say they could to 9927. But they have not altered in 1-No. it has not been altered.

1918. You have more competition from the foreigners than you used to have !-- Well, yes, more come to Ireland now; they used to come to England before, but now a great many come here to have 9029. And we have been told that they buy prin-

ipally mares !-- Yes; principally mares.

9830. And what do you think would be the best method of improving home-breeding generally. Do any society supplied the country with suitable any accesty supplied the country with suitable stabilions at emitable feet, or do you think it mecessary also to do something to induce the farmers to keep their best mares |...| certainly think the farmers of Treland require protection. Take them as a whole they are bad judges. I have seen mares occue to my and wouthless westehrs not worth the ovocra's fren. They require protection and to be educated in the class of meres to breed from. They are influenced by friendship. If a gantleman is popular and well liked, and keeps a sire, they send mares to him; and secondly, if the fee is low they will send. If there is

a horse standing at thirty shillings they go to him,

and pass by a really higher class size at forty shilling-9931. Do you know any of the congested districts in any of the counties you deal in 1—Not intimately ensure to form any coision of the boss-breeding

. 17

Apr. 5, 1881. Mr. Thomas Offician.

330 9932. Have you seen the produce of any of the Hackneys in the congested districts t. I have seen

some Hackneys in Ireland and a good many in England. 1932. What is your opinion !— I think if distributed to any extent in Iroland it would mean the rein of a great national industry; it is a thing that has to be fostered if Irishmen are to make horse-breeding

1934. You think high class hunters and carriage burses are the most profitchle to breed !- I think they we the only two classes worth bleeding in Ireland, and there is no doubt you will get a very large percentage of utility because from that class of sim-Breeders aim at a high class of house, then if they don't succeed in producing a high class borse they will get ammals suitable for remounts and various other pur-

posts at fairly remanerative prices 1915. And for this purpose you think a thorough bred is best !- No other is suitable certainly. I think there can be no second question about it. 9936. I gather from you that if the Hackney blood was to penetrate through the country there is a danger

that such buyers as come to you would not come to Ireland 1—Certainly they would come coming. They come to Ireland as an absolute processity, because they cannot find what they want elsewhere. 9137. Do you know any of the districts in England where they breed Hackneys largely !—I know a good many farmers and dealers in Yorkshire and Lincoln and other counties which I have been speaking of and they condemn in the most combatic manner the Hackneys, and say they have rained these counties to such an extent that horse rearing has been discon-tinued almost altogether. It would appear from information I received that thirty years ago the large jobsonsters had no occasion to come here, because they could buy in Yorkshire and in Lincoln:

then they haved from thoroughbred sires something einitar to ourselves. The Hackneys were afterwards introduced and then the horse-breeding was completely ruined. 9038. In your opinion do you think that Ireland has any natural advantages over England in producing the hunter and the high-class corriage horse !-Certainly, the olimate has a good deal to do with it, and the limestone, the land ; it is a well known fact

that men bought two-year-old colts in Reland and tried the experiment of leaving them there, and they grew on proportionally in size and bone, whereas they did not grow in the same way in England. 1939. Do you think there is any danger of the Hackney blood spreading throughout the country !-I think there is every danger. It is quite possible these Rickneys would find their way out of the con-

gested district to the various countries where good horses are bred. 9940. The produce of them 1-Certainly. 9941. Have you any thoroughbood horses of your own!-I have

9942. Are they registered under the Royal Dublin Society's scheme !— One of them is: one is an old horse: I am really only keeping him because he is am old friend of mine; he is a horse called "Sheldrake," he is twenty-seven years old. "Mackintosh cannot be registered because they call him a half-bred. He is by "Magregor" out of "Isabelle" by "Hehhis Nohle, "that ought to be good enough. I have a horse I bought from the Dules of Fortland, called "Walma-: ha is registered.

9643. Do you think the Royal Dublin Somety's scheme has done good in Ireland t—Yes, I think so. 9944. And you approve of it ?-I do to an extent, although there were a good many mistakes made when they were giving premiums to sires; there was a class of unsound wrotches distributed through the country. A great many of those horses are still in the county and are patronised by ignorant, stupid people that don't know a horse from an ass.

9915. Mr. PYTEWILLIAM - You say you supply a good many horses to Mesers East and Windows Yes.

1946. East principally!—Yes; we supplied Win-hush with a great many borses, but for some years we have been supplying a good many to East.

1947. Both are men who deal in high-class carriage

9948. Have you served with the borner than require, and that you have found from them that the action that is accessary is able to be produced by thoroughireds !—The best actioned horses I ever may were got by thoroughlouds, and I would not orseet to see a horse with superior action got by anythme

9949. And have Messrs. East ever told you that they don't like for their purposes the produce of the Hackney blood !- They would not have them at all sir. Furthermore, the American bosses they find are no use ; they don't stand on the stones of London ; that

can only get a year's work out of these; and avonelly can only ges a year -they are not high-class horses. 9950. In brooking in Ireland you would employ almost entirely thoroughbred horses !- Certainly, as a

9951. What fee do you think the average farmer in Ireland could give und would give !- I consider the farmer in Ireland ought to be supplied with these sizes at a small fee. I would agree with Mr. Daly; I think a sovereign would be sufficient. Owing to the deposition, times are not very gay with them, and they cannot afford to pay much.

9952. Would you have one fee only, or would you graduate it 1—I think the better class people ought to pay more. Valuation ought to have a good deal to do with it, but certainly the tenant farmers ought to

tonh," of yours gets some of the most beautiful stock in Ireland, and you probably take an interest is watching them at fairs !- You

9954. I have seen great fine sixteen hands thro year-old colts by him, and they disappear—is that the class of horse that is bought by East and Wimbush?

9905. They give large prices !- They give larg prices when you take into account that they buy the raw material, and that it takes twelve months below they are turned into a carriage horse.

9956. What age do they buy at 1-Three year olds off, four and five. They like four-year-olds; three years is rather far away from the market 9957. Mr. La Topouz.-I take it, Mr. O'Brise, that you would approve of Mr. Daly's suggestion that

the Government should buy really valuable stalling and place them about the country at the service of farmers !-- Under cortain circumstances I would approve of that—that is, provided the Government would depute men to hey sires that are thoroughly competent judges. There are a great many things to he looked into in the selection of sires.

9968. If the Government were to take that come don't you think it would interfere with private stallin owners — As regards that, that is a thing I would not personally object to. You must take the interests

of the country all round. It is one of the most renumerative industries we have now, the rearing of high-alass colts. 9858. You think that if owners like yourself and Mr. Daly are prepared to run this risk, that owner

elsewhere ought to be equally prepared for the beself of the country 1-Of course, private individuals can keep sires if they choose, then it will be open com-

petition.

9380. It would not be exactly open competition; if the Government introduce a better class of sire, and if a private individual wants to buy a size to gain profit by him he will have to be more particular in the selection !—Naturally he will have to be.

An A Her.

994). Yos, yourself, see prepared to run the risk of having the income derived from your stallien; reduced—5.9 at all an one-consensed, Tauver derived great from them—the proofs to never ionavely pay me piems in only one way in which if ever derived predict, and that is by haying the predice. I got a good all of mensy from the predicts of some of my

when. 2012. Mr. FYERVILLIM.—As well as having Generacest stabilizes standing throughout the centry, would you are above privately owned tables; in a subsidier of the deveragement —Yes, threads my their part of the control of the co

descrits, and the Government might subsidise him with advantage. 1963. That is a half-bred horse b—I would not say a half-bred horse, he is more than half-bred. 1964. I mean a horse that is not in the stud-book i

--Yes.
Fig. You would subsidies any thoroughbred horse glue was a good one !--If he was a good one, had there are a great many thoroughbred horses which the deverament ought to make an effect to lay up and shoot; they are ruining the districts in which there stand.

1993. Mr., Waswen.—"Madzintosh" happens to be aknot a typich horse for getting carriage liseens he has been very often quoted as an example.— That is an advanted question for not to asswer. 1907. As a master of fact would you not get men the Teats to give you a few pounds more fix every loon got by "Maddintosh"—"Yee, carrianly, man defined by anywer that quotess as a sein 1—I amat define to graver that quotess as a sein 1—I

not octation to invive trait queries.

990. Weedly you be in furear of licensing all
stations I—I lithic it would be a good idea.

970. Xou have little it would be a minimally good for
the purplet to get over the disequent-licens I—I would
be interested to get the state of the purplet to get over the disequent-licens I—I would

ay its posigree. He decen's tring of his pesigree when heying; not until be has him bought, or fairly lought. 973. You sell a large number of horses to Mosset. East 1—Yes. 1974. About what height do they buy them at t—

At all hights; I have cold then horses 15 hands up to 17 hands. 1975. But the majority, at what height do they by then 1—As a rule they like horses 16 hands; 80x 18-3 to 16 hands is the highest they buy no

Wife. They only buy a small one when he happens to be exceptionally good I—Yes. 1977. Have you say objection to say how many bress you sail to Mesers. East in a year I—A good many.
Wife. Up to 100 t—Sometimes 100, and sometimes

im, but we could sell them 500 a year if we could find them.

979. Do you know the total number they buy at present in the year.—I should say 500 or 600 in the five in Justice.

present the year — I should say 000 or 600 in the 1900. You would be surprised if it was a good deal 1801. You say you think the Hackneys have been 681. You say you think the Hackneys have been 6a rein of Lineshahire and Yorkulire. Do you

know Yorkhire well i.—Fairly well.

1982. You know the Yorkshiremen well !—Yes.

863. Can you explain why it is they go on breed-

ing Hackneys when they do so much harm i—I think they have descentined to a great extent; principally the people who did breed have discontinued. Of course there are new people springing up every day who may try to experiment, very much to their own disadvantage.

measurantage.

9964. Your opinion is that they don't breed in Yorkalize so much from Hacknoys as they used further, but it is based on the statements of Yorkalize dealers and farmers.

9983. And when you refer to Kerry you mass the district about Traine oblight "Lyes (Castleinland and

district about Trains shirtly 1... Yes; Casticilland and back as far as Dingle and Castionaine and Millown. 1968. You have longht as far back as Dingle 1... Yes; my father bought heress there for forty years, and I have a distinct recollection of good horses coming out of Kerry. For ten years I have not seen to really some horses cover or of Marrow.

coming out of Kerry. For ten years I have not seen ten really good hereas come out of Kerry. 9467, You know there have been a large number of cert horses introduced there !—A great many. 9468. You don't like the Chydrashie blood at all'\$

9608. You don't like the Clydesshie blood at all to-Certainly not.

9801. You would rather have it kept out of Kerry and Linerick 1—Yea.

and Limerick!—Yea.

9190. You shired about the limits of valuation. If
these tallians were looght you would make a
fullyment to people of different valuation—has a you
fullyment to people of different valuation—has a you
There are farmers. farming as little as for acres, and
you can go lower skill. Thesefold say that farmers of
120 some down should got encouragement, and should

ay subsidies stallions they ought to sharps a fee based
in same way so other on the valuation—that is the

in some way or other on the valuation—that is to say, charge a low fee to a poor man and a higher fee to a man better able so pay it—That wends be my so opinion.

1986. At person, we have been told, there are a great many unwishabe theroughbreds throughout the country, meanual, worthless estimate, services at leve openion.

ine—for that would not pay any previous owns.

That is a take of duting rew would like to an all the second of the

AGE RISE. Sfily sovereigns by men to bring them over here and Mr. Thomas get a Government premium of £200 for them, horses

Mr. Icha

with neither character or soundness. 10000. You think the present system is better !-Yes; I should say in the distribution of premiums I would spend the money on mares. You cannot put pressure on a farmer to keep a good more. If he bas worthless brood mere that is not suitable he will rotain her, and sell a good mare for 40 or 50 sovereigns that might be worth a gold mine to him if

10001. Would you let the same mare win a prize two years running, or do you think it would be wise to routrict that !- I think it would be hard to stamp her out after one year.

10002. After two years you would draw a limit !-I think so; it might so hoppen that a more might be led into the show yard four or five years in succession,

and she might win 10003. CHAIRMAN.—Have you any knowledge of the Kerry ponies!—A slight knowledge, my lerd; as a rule they are very good.

10004. We have been told they have deteriorated of late years !- I think that is so. 10005. Here you ever bought horses out of Commons or Kerry ponies by thoroughbreds - Wa

had some out of Castleisland, ponies by thoroughbreis. turned out very good horses. 10006. Were they sincable horses!...Yes, there 10007. In there saything she you would wish to say to the Commission !—No, the only interest I

would have is if the Government would see their way to introduce good horses.

10003. Leed Asstrows.-Don't you think there is as much have done by had mares as bul sizes !-- Yes, but there is no way of preventing the farmer selling his mass. We called a meeting of the Agricultural Society in Limerick on the 3rd of October; it was numerously attended; it was one of the largest meetings I ever attended, and they were all unanimous in stamping out the Hackney sires. This is a copy of the resolution. (Resolution handed in.)

Mr. Jone Widges examined.

10000. CHARRAN.-You live in Waterford !--Yes. 10032. Do you think there is any danger of the 10010. Are you extensively engaged in dealing in borons i—Xes. apply axomaling the demand !-- No. 10033. And as to the inferior style of borse, its general utility horse, we have been told that the 10011. You buy all over the country 5-Yes, bar

the North. prices have gone down very much !-- Yes, for a certain 10012. And what class of burnes do you deal in generally !--Hunters, barness burses, remounts and 10034. Have you any experience of the American horses imported into the country i—1 have not. 10035. Does their introduction interfere with you 10013. You beard what the last two witnesses have

said, do you agree with them, generally speaking !at all 1-In the horness borses it does.

10036. Do you sell your berness borses to any 10014. You think that the country generally is not particular firm 1...No. 10037. Heve you any knowledge or opinion as to sufficiently supplied with the proper stallions, and

that the Government ought to stop in and remedy that the effect upon home-treeding likely to be produced by the introduction of Hankmey blood or any blood state of things !- I think to. 10015. And do you agree also that for the classes of borses you deal in, hunter, high class carriage but thoroughbred !-- I think Hackney blood would be burnes, and remounts, the most suitable sire is the 10038. What makes you think so !-- Say 100 men

go to a fair, ninety want bunters, and they can thoroughbred !- Yes. 10016. And would you approve of a half-bred sire, provided be was suitable and sound !—Yes. turn their hunters into harness borses; only ten of them will buy such borses as Hackney borses 10017. Which do you suppose you sell most of harness borses or banters !-- Mostly for bunting, to 10039. And in your opinion is the quality of the mare, as good as it used to be 1-Not et all as good

England. 10018 England and feesign countries 1-Drich 10040. How do you account for that !- The researce. If a farmer has got a good mare be will 10019. Do you send many abroad 1-Yes. 10030. To what countries 1-Dutch and Ralians. sell ber 10041. Was he not always inclined to sell her !-

10021. For stray purposes !--Yes. 10022. I mean to the Governments or privately ! Not years ago, my lord. 10042. How do you think that could be remedied! -To the Governments; we sell about 500 a year I think if a premium was given for more it would be a remedy. Farmers would keep their more. 10043. You consider it of just as much importance. to the Dutch Government, and 350 or 400 to the

10023. For remounts for troopers 1-The Italian. to consider a means of improving the mares as the stallions !-- I think so. officers' berses; the Dutch remounts, 10034. What ago do they buy them at 1-Three to 10044. You understand the Boyal Deblin Society's achieve !-- Yes. five years old. 10025. Do you know how the price the Dutch 10041. Do you approve of it !-- I do. 10042. And you think that if there was a larg

10013. Do you know how the price the Datch preventions by for resonants compares with what the Dogland pay — About the area.

I have been a price of the price of the price in kights — Various prices from 250 in £100.

10017. What do they profer — Principally meses. 10013. And the kind of horse their you deal in de you think the supply is as good as forestly—do you find it so early to get them——Not to easy as sum of money at the disposal of the Royal Dubba Society that it should be expended according to the present scheme !-- I do. 10043. Is there no suggestion you would like to

make as to how the system could be improved in say

way 1—No.

10044. Do you estach much importance to getting a pedigree with the horses you buy 1—Ob, certainly, 10045. And you found abose who buy from you years ago. 10029. You think there is a larger demand than ever !- I think so. require a pecigres f—Yes.

1004d. Do you appeare of any kind of registration of mares, or do you think it would be practicable.—I think it would be practicable. 10030. And the supply is not larger 5—No smaller. 10031. Do you think if the supply was considerably

Printed image digitised by the University of Southampton Fibrary Digitisation Unit

increased that the price would keep up !- I think m.

Printed image digitized by the University of Southempton Library Digitization Unit

10047. Do you think it would be useful!-I do 10148 Do you know any of the congrated districts the western snaboard !-- No, the south. 10149. Do you know the congested districts in Corle

and Kerry !- Yes. 10350. Do you ever buy any horses there 5—Yes. 10351. Have you seen any of the produce of the Hickory sires!—No, my lord, I have not. 10016 Have you sure hought berres out of Know

10055 What class 1... I have brooks broom that new into hunters, out of a Kerry pony by thorough-

10054. Do you know what therearhbard is standing is Kerry new!-" Reveller." 10000. Is the county properly supplied !- Not with thorough breeds.

arough oress.

10035. What has taken their place!—I don't know.

10037. It is not as well supplied as it used to be! 10058. Do you agree with Mr. O'Brien that it is difficult to get as many horses out of Kerry now as trustrivi-You caunch get them.

10059. Mr. Fitzwilliam.—Do you think you can trace any of the old strain of Irish mares in Wexfeed or Waterford !— Yes. 10060. Marcs you can trace back 1-Yes, for four

or five generations.
10061. Any number of them?—Yes.
10062. What are they like? Could you describe them 1-A working more; legs like a working harness

mare; a hunting mure. 10063. Any pacticular characteristics !-- No. nothing particular 10084. Lord RAYMBONNELL.-Did you ever bay a horse in the North at all 1-No.

10055. You do not go northward 1-No. 10016. Colonal Sr. Quintus.—What would you emissier a sufficient premium to offer for mares to

induce formers to keep them !- I think £20 10047. Do you think that would be sufficient !-- I think so. ink so. 10058. You would advocate local shows all over

the country !- I would. 10049. For small farmers 1-Yes 10070. I wanted to ask you with regard to the sarction of the remanuts—you sarctive this Govern-

ment and foreign Governments with a good many !--10071. You have your representatives in every fair almost in the South of Ireland !- Yes. 10072. Whopever you see a likely borse you buy

it 1. Yes 10073. And you keep for that purpose a large area of ground on which you store these horses until they 10074. Would that be a remunerative business un)ons it was carried on on a very large scale, with the

difficunt classes of horses you buy-because you do too buy all of the one class; you buy higher priced bones and various classes !—Yes. 10075. Without you did that would it pay you to keep that ground, that large area as a farmer would keep it for bullooks! You keep your horses there on the same plan as a farmer boys and fattens his bullooks; would that pay you unless you did it ou a very large scale, and bought various classes of berses, and had various gotiese for them i...No; it would

not pay me. 10076. You don't know anything about the fereign countries beyond these two, the Dutch and Italians,

Monreply Tourself 1...No. 10077. Do you know snything about the Germans ! - 27 10078. We are told they take a let of mares out of the country !- Yes, for private use; more for the

Government that I am aware.

dealers; they are private !- Yes.

10080. Do not they to a certain extent sell a nurs. ber of these to the Gennau Government!-I have 10081. They take chiefly the mares 1—Yes. 10082. We are told that if the Hackney is intro-

duced, that is the course of one or two crosses it " will be difficult to tell him 1-I don't think so

fill be difficult to stu mm :—1 don't theme so. 10083. Mr. Daly says not, but a great many suttemm say that it would !—I do not think so. 10084. You have no practical knowledge of the Horkney!-I bought a few in my time. 1083. What is your objection to the Hackney !--

My objection is that they are not bunting made; Bo shookires 10084. With regard to their action !-- I could not stoud their action at any reice.

10057. You consider you could got a sufficiency of action practically for show as well as for useful pur-poses with a thoroughteed house!—I think so. 1083. You think for the trooper trade is would be great mintake to get any of the Hackney blood into -Ob. outsinly In Tourse.-You are a stallion

10050. Do you agree with Mr. Duly and Mr. O'Erien in advocating the purchase of high class stallions by the Government !- Certainly, 10091. Although that might to some extent affect

10039, Mr.

cour private interest as a stallion owner !-- It may nd it may not. 10092. To any ours you would advocate it !-- Ves. 10093. Mr. WRENCH .- I think you said you sold

500 horses on an average to the Datch !- Yes 10094. All remounts 1—Yes. 10095. What are their particular requirements, what size - From 15.1½ to 15.3. 16095. Do they mind whether they are goldings or mores 1-They don't mind.

10097. They hay them either way !--Yes. 10093. Would you be in favour of registering maren 1-Yes.

100 93. What do you mean by that exactly 1—To give premiums to every good mare that would come in belonging to the farmers; advertise, and have all these mares shown, and give premiums to the best. 10100. Selected mases at local shows !-- Yes.

10101. And those mares considered qualified by a competent committee or by judges you would have registered as to their brooking i-Yes. 10102. That registration you would have carried

out in the county 1-Yes. 10103. What half-bred stallions would you also sgister!—Such horses as "Reliable," " After Dark," Mayboy, and that cless.

ven 1-No. 10105. I thought you owned a horse called "Morton"!-Not now; a couple of years ago-

10107. He got good stock, did be not \$-No, that 10108. You did not like him !—No. 10109. How many years did you keep him !—Two

years.

10110. Did you sell any of the stock got by him to the Italians 1—No.

10111. You did not sell him because his dam hapneard to be in the Harkney Stud-book !-- I saw some his yearlings, that is why I sold him.

10112. Where is he now !-- He has gone into the county Cork 10113. Did you buy him from Mr. Barling !-

Yes.

10114. He was by a thoroughbred home!—Yes
10118. Dam thoroughbred!—No, half-bred.
10116. You said you bought in the congested districts of Cock. Where did you buy!—All through Cork.
10117. What part of the congested districts, 10079 The German dealers are not Government

334

10118. That is not congested. Did you go no further than Midleton t-I travelled all over Cork. 10119. Did you so as far as Schull !-- I go to Randon.

10120. And in Kerry bow far do you buy; de you go beyond Traise i-No, not beyond Traise. 10121. CHARMAN. -- Do you find you can get the horses you require for about the same price now as formerly, or are they dearer or cheaper !- About

10122. The price keeps up i-Yes.

10123. Is there any suggestion you would like to make to the Commission !- The only thing I have to

say is that they should tax American beeses coming to England 10124. LORD RATEDOWNELL.-With regard to the

After the adjournment, Lord Barmpeneggs in the chair. THOMAS MELEADY, Mountuireet, Dublin, exemined. Melesdy.

10150. CHAIRMAN,-You are a horse dealer, and live in Dehlin, I believe !- Yea, sir. live in Dehlin, I between Yea, ser.

10131. In what part of Ireland do you key your
breass generally?—The principal part of my horses
that I hav is in the South, but I travel all parts unless the North-I don't travel much in the North. 10132. In your opinion, is it harder to get a bigh

class hereo than it was in former yearst-It is far harder, sir; I find it a great deal harder—they are very searce to what they used to be long ago 10133. To what do you attribute that i ... My opinion is this, there are so many foreign dealers come that

are judges, and buy them when they are young, and if men have a good beast now they will keep it for a foreign dealer, and send it away to such as Wimhush, or those men that hav these good class mares and hunters, and send them away when they are young

10134. By foreign dealers, you mean English and foreign |- I mean that. 10135. Do you think the price of high class horses is higher than it used to be in former years !-- I think . the price of a high class hunter is higher than ever

10136. Do you consider the mares throughout the centry generally are as good as they used to be !-They are not, nor near air. 10137. How do you account for that 1-I will tell you, the poverty of the country, sir. Wasn a poor man that had a good mare was going into a fair to sell his yearling, or two-year old, or three-year old, he sell his yearling, or two-year old, or three-year old, he bed in the mother along with the colt, and the dealer not him, or the man that was a judge, and said, "I won't hay your cole, I will buy your name." The poor non wanted the money, he said, "I will give you £50 or £50," as the case might bo. "I will sake it, nod I will keep my colt." Then some other man

reight come and buy the colt, and the owner would bealed, as the case might be. He bought something cheap to take home to do his work and to hove and all our good outtle went away-all the best of them that poor men evald keep; of course, rich men would not sell their good eatthe 10158. Then, I suppose, we may take it that yo consider the sound more have been sold out of the

ocunity to a great extent, and the unsound ones kept to breed from !-- A great many; anything was good exough to hrood. 10139. That applies to the farming class 1-I count

that is why there are so many bad horses and poor mares in the country. 10140. Have you had much experience

respect to the Army remount boxes 1—These last awanty years I had; part of my time I bought 100 a regular price with yon; if they like a lot of horses

local shows of marce that have been held under the Royal Dublin Society, you approve of them 1-1 do 10125 At those shows of mares would you give a few large prizes, or spread the money over a greater number of mares, which of course means smaller prizes 1—I would prefer spreading the money over.

10126. You mentioned a sum of £20 at a per-

mium 1—I would say £20, £10 and £5.

10127. That would be three prizes 1—Yes.

10127. You would not advocate spreading the money over in smaller sums !- No. 10128. You would prefer to have three or four

large prises 1-Yes. 10129. Colonel Sr. Quarres.—De you think £20 would be enough to induce the general run of farmers who had a good mare to keep her, on the chance of

getting this £20 1-I think so.

to go away to the Dutchmon-400 horses a year I was the man that principally bought for "French George," and when he died I bought for them; after

that I got an order from the British Government, and I am supplying them since.

10141. Were many of the horses that you have
bought taken away out of the country by fereign. Governments !-- A great many, but not so much these

last few years. 10142. Could you tell us how the price give by foreign dealers compares with that given by our even Government for horses!—I can tell you; when I commenced to buy for them first, when French George died, they gave me £45 for strong ones, and

£44 for light cavalry. 10143. Mr. WRENCE .- That is the Dutch, is it!-Yes, the foreign men; that was my price when I commeaced first-£46 and £48.

10145. CHAIRMAN.—Porty-sight pounds for the strong horses, and £44 for the lighter 1—Yes, what they call riding artillery borses. 10145. How does that compare with the price our own Government gives !- Wall, our own Government

gives £41 15s, and you have to deliver them; for the foreign Governments we have not to stir them out of the place, they even pay the men that brings them

10146. Colonel Sr. Quintin.—You don't get £41 15e. to deliver in Iroland !—Not quits so much. 10147. Sixteen shiftings to deliver in Ireland !-From you, air; we have to deliver them, that is the reason the £1 15s, comes in.

10148. That is in England 1—Yes, sir. 10149. But it is only 16s. in Ireland 1—That is all. 10150. The fereigners buy from you in the yard, and you have no further responsibility !- We have no more to do with them; once they take them in

buy a cheap mare—let it be spayined, curbed, hollowthe yard and brand them, we are done with themthey pay the man to bring them to the beat.
1015). CHAIRMAN.—How do the prices of the pri sent day compare with the prices in former days, that is, as regards the expect to foreign Governments !- I have nothing at all to do with that-mothing to de with it now; I have never paid for a horse to go a yard unless I sell them to the British, and then I must

deliver them, but when a foreign man boys them we never have to pay a percey.

10152. You told us just now that you got £48 and £44 for the horses that you expected to foreign Governments some years ago, how does that compare with the present prices you can get from foreign Govern-manus — Well, they don't give us quite as much now, £42 and £45, if they like the horses, they don't make was may ask them a price and they won't refuse you. they won't make a deal with you at all, they will say, "Very well, I will have them." 10153. You mean that formerly there was a set price given !- That was the price they commenced

10154. And now they hay independently of that? -They hay averywhere now. 10155. They make their own bargein !-They make their own bargain in this way, that if they don't like the home they won't give you as much now. "I will my you a severalps," or half a severalps, as the case my be, and our expenses are as great—generally \$-13 and £43 the small open, and the large open you gan

sharge £45 or £50 for them if they him them. 10155. What has esused that decrease in the price? ...I think reyself the reason of that is, I am not sure, but my opinion is that there are men who have taken up the supplying of the foreign armies; they want to hav them as comep as they can for themselves the to my them as comey so may see not become of that, may they will have profit—that is my opinion of that, 10357. Then you mean to say that there are some individuals between you and the foreign government? -Of course there is-don't you know there is very well; what will pay their expenses, or how will then come and hav horses here and deliver them there? I

10158. Colonel St. Quistis.-If you will forgive me he dose not understand what you mean-there are men between him and the foreign dealers !- There are men get contracts there and most cont here to fill their contract, and they have to come to me and the like of me to help them to get them 10159. CHARRIMAN.—Do you put that down to any deterioration in the horse flesh i—I do not; but you asked me the question, and I am answering it as well

10100. Do the foreign dealers take mores in pre-ference to geldings t-They do; money won't stop then if they get a mice many that goes well and wears her tail, and carries horself well, and has good shoulders—money won't stop them. Many a one he Colonel took from me that you would get £80 or 230 for frees a foreign dealer in a fair. 16161. Have you had any experience of the American horses that have been imported here!—

Hever, sir.

10062. Nover seen them 1—I saw some of them.

1 and I are them 1—I could be 1003. What do you think of them !- I could not give my opinion of them, for I had no dealings with I would not key them at all.

19164. Are they likely to affect the breeding of boxes in Froland in any way 1—They have affected the price of hereon, that is, the middling class of hereon. 1905. In what way 1—They don't want them so much where they are bringing them to Scotland and London every older day; they don't want cabbers or hussen not half as much as they used-that is my

spinion going about the fairs.

10066, What part of Reland do you travel in chiefly leohing for house! -- Well, there is forty years am going through the county Galway, county Mayo. as Skibbercen; there is not a county or a place that

you could assotion but I was in-I am all my lifetime going in trains. 0167. You know all the West !- I do, sir, well. 10168. Have you any experience with regard to the homes imported by the Congressed Districts Board?

-The Hackney borses, sir! 10169. Yes, and others !- Not so mech ; I never bought many of them, not more than two or three in my life; they had not age enough for me during my time there. The posses I bay in that country much be eig or seven years old—I don't think there are many of those there yet, there may be now 10170. Can you buy many horses in that district? Sometimes you could, but, of course, not good

ber the time you could go down to a fair there and bring ten or eleven out of the fair. Every mouth I went into Balmullet for these twenty-five years, and we nover came bone with less than ten or el

10171. And you say you example got them out of it now h-No, not in that country; I left notes a good one in it that ever I seen.

10172. Do you teavel down there now !- Not so : much; we don't want so many pole posies, and now they want a different class of pole peny. At that time it was 14 knots and now 26 is 14.2. Now it is a little thoroughbred home we want like "Watchspring "long ago, or these little horses that win races for goatlemen and officers, so the case might he, when for goalitemen and officers, so the case wight he, when the scance is over. A 14.2 pany down there is neither a puny or a horse now. If you get a 14.2 pony now wound Widelow or Westerd you want that, but you don't want a half-bred one now—they are no use, those usual half-bred ponce—you must have a throughlived pony now. When I went down there first there was a breed of posies in it that you could get up on and ride them off the gram 30 miles seroes the mountains, as I often did from Pelmyllet into Ballina, and they would never tire, without a

feed of outs, nor did not know what the taste of outs 10173. Have you any plan in your mind by which you could revive that stamp of pony !- I have not; wherever they wout to-I took the weight of them out of it; they had heads, necks, and shoulders like thoroughbred laceses, the best shape you ever saw, with poverty, the greatest poverty you ever saw, last they are gone out of that country altogether. I often spent a week or a fortraight looking for pole potties there, and you would get good one, and the moment! I came here some of the gestlemen I used to sell them to would say, "Zou, there is a Behraller pour!" They used to call them Anhill posits—liber

came in from a place called Achill. 10174. You have no idea then of how to revive this head of ponies there with an eye to getting the sort of pony you require !- I could insiesd, sir.

10175. Well, we would like to hear it !- The mixture of penies with Scotch horses that got into the county Galway and county Mayo related that country, and they are neither poster for horses, senitry, and tony are neater poons an access, and there is a great many through every county as well, for they sell them as foult, and they went to Wicklow and Wexford and ruined that country. The Scotch bornes came here when I was a very roung boy : they were very easy to tire, hairy-legged borner, the farmers got them cheen and gave them to mares, and then the foels were soft hely-larged bits of youing and no use, not the old Irish class of pony I am meaking of those I used to get in Achili and Beingelet. Get a good-shaped mother, for without a good mould you won't have a good horse, and thus give them a good small thoroughtered heres and you will get a good peary. Don't give them a crooked one with spavins, with a had back and leius, but one with good tolour and good fish logs, with good head, neck and shoulder, and you will surely have a good How is it that in every place I ever got a

10176. I take it you think that a small thorough here home is the sort of article that orgit to be mated with the mare of that district -In the county Mayo sir, yes; but there is a great deal of mares that should not be allowed near a home at all, ruining the country and half the people in that country does not know the differ; they think any thing is good amough to have a feel. In a great many counties there should be a regular system to register marcs and to get good half-bred marcs—I don't mean thoroughhed—half-bred marcs with good legs, and good colours, and good backs, and do away horses. Now, if you wanted a nice polo pour, I remem-

"Watchspring" peny I bought it ?

Thomas should Melecty differ.

Pro. 8 1898. - with all the rubbish that is eating what good horses should get, and the poor man does not know the differ. Then you might go into a fair and get a remeant, where you will have to go to five or six now before you will get two, and some that you think is good they won't take from you.

10177. Have you much experience of high-class harness horses—have you exported much of them from

Ireland 1-I never did, but my opinion is this, if you give a good more a good horse, if you have not a bunter you have a harness horse. 10175. With regard to the Royal Dublin Society's.

spheres, do you think that that has had any honeficial effect or the reversal-I senset exactly answer you that question; I don't really understand what you

10179. Well, under the Royal Dahlin Society's horse-breeding scheme, do you think that the lar-eflosh in Ireland has improved at all 1-Well, in parts they have; you know you cannot expect a good horse to get a good feel unless he gets a good mare. Re-member, I am telling you, sir, that if you had the beat horse that ever walked and gave it to a bad more you won't get a good foal; you might get one good one

end ten bud onto-you must have the dam you must have the mould. 10180. We would like to hear your ideas as to how you would improve the horses in Ireland-can you give us any !- Begor ! my opinion is that I would register the mares end the horses, and I would take the bad care from the yoor people and allow them a little for them as the case might be, and give them a good mare and make them keep it, and a good one is an easy to feed as a bud one, and unless you do that you will never change it, because they will be cticking to what they have and they connot help it, they have not judgment. Some of them are too poor to keep a good mure, and more of them would rether food casale. Unless there is something done that way to register the macva and foals and make them been them, it is thoughly way that I regions, sir, for I know

poor people who are not able to keep a more and fool and have very big tracts of land. I do, indeed, sir. 10161. You think there ought to be some inducement held out to make the farmers in Iroland keep their sound good mares, and that is the way you mggest! Yes, by giving them to them. I would not want you to give them for nothing. Allow them searching for the bud once, and send those away to week cake or momething, and whatever was over give it to there, for these are some of their really would to

those things if they knew how or had judgment enough, and then they would see the differ. 10182. Do you think the class of stallions in the country is fair !- Well, there are a greet many of them very good. The class of stallion you must set is a good thoroughless stallion with good bone, not woody lade that goes this way and that. You much get them to go straight and well. If you want to improve the hunters end harmon burses, as the case may be, you must get that close of a horse or mare; but

as long as I remember any mace was good enough to give a horse, and that is what reined the country. 10183. And you think the thoroughbrol horse is the right etamp of horse !-- I see a power of these

the might etemp of horses—A see a provey good in my opinion.

10184. Would you be in favour or not of breeding from a half-herd!—I would, sir. Well, you know, that is for its class. We cannot do without a big draft horse. That is another clean, but for a big draft horse. That is attender caree, not be bunter or harness horse a good, hig, strong half-beed more that has good points about it, and goes well, and gets an entire, you cannot miss. But the poor people cannot get those things unless they are helped. They are getting nothing for the corn or anything, not so much as would pay the mer 10185. Mr. FITZWILLIAM .- Mr. Meleady, from your being the most important of the two !-- I do, sir.

10186. Then, if any public money is to be used a horse-breeding, you would rather spend it on the mare-on keeping good meres in the country-thance keeping a good stallion t-I would not my the exactly, eit; but I say there is no use in giving a good stallion to a had mare. Without the marm you will never improve.

10187. Then the improving of the mares, would not that entail a good deal of expense; would not that require a large amount of money i—I think it would, but of the end it would pay; and I will tell you the

reason why, for my experience is that the poor countrymen is robbed feeding cattle that are no good and that they connot got sale for, and a great deal of that comes from the American and foreign horses that are coming into this country now.

10188. Colonel St. Quarter..... By estile you mean

borses !- I mean horses. 10189. Lord Augrows .- When you say cettle year mean horses ?-I do, sit; I mean the bad cattle 10190, Mr. Perswittens.-What would you say gest with regard to keeping mares in the country; how would you suggest to do it !— I would make that

men keen them; if they had a good mare to register her and make them keep her. 10191. How would you do that !-- If she was re gistered they would have to keep her, unless she died, or sell hos. There are people in the country that would breed a lovely foal and keep a good more if they were able and had pleasty of means of feeding they were note and load; but they are not able to afford to keep one. If you compel him to bey one oud make him keep it that would not be fair,

for I don't think the poor man is able to do it; hat if he is helped to buy one, why would it not be registered, and make him keep it, and give him the produce of it? 10192. You would be obliged to pay him to keep this mare!...You were asking me my opinion to in-

prove the horses that I see, and that is the way you would improve them. 10193. By spending money and keeping the mores in the country !- Yes, and not let them so aven where all our good mares and howes have good 10194. Do you advocate entirely thoroughland harms in the country, or would you advocate any

others !- I would like no other but a good thoroughbred and half-bred mare, a good one; and if you do that you will have planty of good horsen-of source I don't mean farmery horses. If you want a high-clea been that is how you want to get him. I don't want the mether to be thoroughbrod at all. 10195. Now, as regards the Hockney blood that we' ..

have beaul a great deal about, do you believe that if these Hackneys are kept in the congested districts that their blood will not in time permeate the country; it will come through-it will do have throughout the country !- You sak my quinlon and I will give it. I

don't think it will improve the country 10195. Do you think the ordinary buyer in two or three generations will be able to detect the Hackney strain or not !- A buise will 10197. The desice will, you think 1-Yes. 10198. But you think the ordinary hayer will not? -Well, there are ordinary buyers that want only one

horse in a year or two as good judges as anyone; hub I would know those horses. They have not the same shoulders, the same neck, or the same way; they have only a harnessy head, neck, and shoulders. The shoulders are not put on them right; they have not the same back rib as our own good thoroughhed

10199. And so you think that no Government money sught to be spent on the Heckmy blood in I won't say much about that. That is not my business; hat I am only telling you what I know. 10200. Would you like it to be done or would you eridence I rather gather that you look on the morean not?-To tell you the truth, I would not care much

10:101. You would cuther they were not used in the country !- I would, sir-I sees't deny my mind. 10202, Lord Antrows.—You say the foreign horse 1—The power of our good mures are away 10213. You seentioned Menra. East and both !-- You those are very good horses. 1090.1 Do they hav marent ... Anothing that

10305. Marcs or goldings?-Auything that steps and has good neck, head, and shoulders, they have

10206. You would hardly call them foreign !- No. but they key for fereign people.

10207. They buy to sell again !-Yes; I am only soliter you tilto records to large great cone

10208. You say you bought a lot of Bolmullet posies for pulo posies f-I did. 10209. You don't buy any new?-Not quite so much; that country is wed out of them. 10210. What specked them 1-I suppose the breed

10210. What spectrd throm 1—1 suppose the breed ma out; I bought all the good ones I saw in it. 10211. You mean you bought all the good coas and spoiled the breed 1—I took tru or differs a week. ponies out of the country

10212. In fact you smoiled the broad vanguelf !- A 10213. You think the Scotch horses injured them t go into a fair and buy bountiful marce and heres, ten

ad fifteen in every fair; new you consist got ten or fiftern in ten fairs of the name wood class. 10214. In that district !- In other districts ne well

10715. I am talking specially of the prey district? ...The pony district is outlied; they are not near as good as they were 19210. Now I don't want you to my what price you give, but in olden times before the bread was spaind about what price would the average pasy so

for antenined... I suppose you bought them untrained ! row a post one, but in these times I would not. As fast as we bengirt them we could reli these,

16217. They were broken than 1-Yos. 16218. Now you buy these mabrulous 1-I do if I mw a good case, but I relicen do. 10719. I think you said a had mure could not beend

a good heem !-I did not. 10210. I understood you to say so t-I think not. 10221. I understood you to say if a man last a bad more !- I did not, sir, excure me.

10222 Cuantum - I think you sold it was not much man patting a lead mare to a good horset.—Yes, siz. 10223. Leed Assrows,-You said that people that had a big truct of land sometimes could not keep a good more-why was that !- I will tell you: they have a bir trust of lord, and assertimes the yest is a little too beavy, and when they come to not the wages and rates and the support of their houses they find that they have not enough to most the landled, and

they must make it some year; they must sell their 10224. But you think if a fellow kept a good more and a hig farm, that the better the mare the better the promay !- That is all right, sir : what you say is troe, but a drowning man will grab at a steam; when he wants his rest be must sell something, and if he

had a maze and that he had to keep her because shewas respicteded by should been her-10225. I see what you mean now; you mean if a man has a good mare he will be tempted to sell her

to pay the reat !--He would. 10125. Colonel Sr. Quirens.--The foreign dealers prefer the mares to the geldings !—Thry do. 10227. And take a great many out of the country Do you know which country they chiefly go to-in there are correter that taken there were largely than others !- I could not suggest that to you, sir.

10253. If the same class of punies were bred in Relevablet more exceld you afford to more a bigger price

a bit more. 10:55. You would not give more than on an average £16 to £18 1-£16 or £18, and being them up here and feed them for a while, for they would be poor. 10250. It would take six months to get them into emplitien!—It would not—it would take three at least, 10257. You have seen many of the mares in Bel-mullet—do you think it would be possible to breed

10228. Do you know anything about the Swiss buying !- No, sir : I don't know them at all, 10229. Mr. Preswitatan.—Do you say that there were a great many posies bought in Wicklew?—I buy them any place I see a good one. 10230. Are these good ones those 1-If you see one it is a good one, but it is very seldom you would see

10231. I thought you said you did buy them there has I do, any place I meet them I buy them. 10232. Colonel Sv. Quarrie.—Do you think any home except a thoroughbred home is a fit arinal to

brood a trooper or riding beene for any country or under any condition!-You will see half-lead borses got good feals sometimes. 10235. What do you mean by a half-bred horse—a burse that is not actually thoroughbred i-Yes 10034. Dat I mean with a gross of the Clydesials

and Hackney and various other crosses !- Oh, no, no ; I would not think of that at all ; you are asking mo my opinion and I will give it, I may be wrong. 19235. But the treepen that you buy, what are they almost invariably by 1—The weight of them would be thoroughtened horses.

10236. Well, the foreign dealers I suppose would

not take them unless they get quality and right action, would they be a family per five bare a condmore, will give you £70 or £80 for her, or £100 if

she it a good mare.
10237. But then he would not call been good mare noless she had quality and right, nice action, would he's—lie would not, our would I have her if also had

)0238. You can only get that from the thorough-brod strain!—Yes, siz. 10239. Mr. WHENCE .- Are the Dutch the largest furnish however !- To me they are

10240. Do you know whether they have born. buying tempers from Cannin lately !—I do not. 10241. You know Capain Foot !—I do well. 10242. Would be know !—He would.

19243. Is he the chief man for the Dutch Gavernment leaving horn-done he chiefly hay from you !--10214. Have you ever bought any peales in Done-gd !—I never did, but I bought pouns in Ennishelen. 10215. From Sign !—Yes.

16-21d. You have not been further parth then that ! -No; I was sace in Derry.

10247. You did not bey many pories there 1.-No;
I was badly off for recounts, and went there once,

I was bally on for remounts, and were successful that I bought none of them.

10245. What price used you give in the old days for Edmulist posses, roughly speaking!—From £16 to £18, or may be £30, if I could get a gool one. 10249. But an average price of £16 or £187-Year but the expense was drealful out of it-27 for a

wagger bome and bringing them 30 miles across a mountain.
10200. What did it not on per head bringing them en to Dablin !-- 30s. 10251. Did you key them under 3 or 4 year old ! No. I would not hav 4 year old posies, they would Jan. 8, 1997.

from the mores left there now the class of pole peries that is now wanted b-M you met a good one in it you could breed a good pole peny off them; if you met the good old sort and gave her a thoroughbard Thomas Melesdy. horse you could beend a Grand National one from then 10258. Do you think there are many of those good

ears left !- Not to my knowledge. 10259. And you had an opportunity of seeing them all in Behandlet fair f—I had. My son and I are going there thirty years, the loth of every month; until the has two or three years we did not go at all. 10950. And did you go up to the Mullst and through the country !-- We old, every place--Com-

Newtorngore, Ardnares, and Sligo, and I should be there to-day 10161. You are in favour of registering mures!-You; if you got a good mare I would make them keep 10262. And you think it is important that a mer should be a good goer !- A straight goer; I would

uct want her to be a high goer. 10213. And you think that a good half-bred more is the right more to look for for a broad more to cross with a thoroughbed home t—I do, sir, for a hunter or for a huntest home; I don't mean for a draught. 10254. Yes, we are talking of hunter and hurness horses now?—Yes, or for a ressount.

10265. How would you broad those mares !-- I will tell you very easy. If I had the ways of doing it I would send a comple of men that would be a judge, and I would buy a good mure averywhere I could seher, and register and give her to a farmer, and tell him he should keep her. You give him the produce of her and let him work her as he liked, but keep

her in a proper manner.

10055. You would buy a good more and station her in the country with a former who would keep her?—Yes, but good big mares, no small once. 10367. Would there be any east horse blood in them or Clydendale !-- Very little; of course you may

huy them with that if you like, but you need not if 10568. You think you could get good mares with-ent any Clydenials blood !-- If you like good half-bred

10269. Would you be in favour of registering Clydesdales !-- What occasion would you have of

10270. I am saking you would you t-I would not, 10271. You think there is no occasion for them in this country !-- Yes, for farmers, ton compay :-- i.e., for incomes.

10372. What would you do for the farmers who
want to brood work horses!-- I don't see who would

be going to run away with them, with the blood; there is no foreigner comes here to ran away with 10273. But you would not help them to breed better come !-- I don't know where you would get

better ones than a good draught mure and draught horse for the work, 10274. You think the draught horses in Ireland are as good as they can be !-- I have not much

experience of them, any I see are good enough.

10275 You don't think they want any improve ment!—They may be improved, but I don't beed much of them 10376. I want to know what you would do for

farmers who want to haved that class 1-A farmer knows his own mind; the best working here is the best he can keep. 10077. You would not like to advise except about

Printed image digitised by the University of Southempton Library Digitisation Unit

hunters and harness beeses !-- That is it what I went myself and remounts, TOTIS CRAIMMES.—I think I understood you to may that in years gone by you had found peoples that had originally occus from the West, you found them in Weaford and Wickhow!—I did not, sir; bus I

said that they sent the feals out of that country 10198. About Haskney blood-do you deal only in yearlings and two year olds and six mouths old feels riding posites? Do you deal in harness posites at all, Printed image digitised by the University of Southampton Library Digitisation Unit

all through Wicklow and Wexford and the country, 10279. Was that from the West?-From the course Galway and the county Mayo; how many thousands lings and two-year-olds-that is what I said. 10280. I think that was the question I asked you

whether they came from the West !- They did siranywhere that they bought a poor little thing; they brought is up there and sold there, sold some as two and three-year-olds and they only six months old. 10381. That was after they introduced all nots of Clydesiale and mongrel blood in the West i-I am telling you myopinion. What destroyed the pomentage in that country was the Clyclesdale mixed up through them; of course they have found the differ new and they are not in it at all, for they would not have

10382. I take it that it was the produce of these 10282. I take is that it was the produce or three stallions that came to Wicklow and Wexford and destroyed the posites i—That is the very thing. 10283. Then you think that the young horses from the West are likely to perconate through all the other burse-breeding districts in Ireland 1-Well, they did

as long as I remember; they are corring up and poing to Enrived too. 10283. Do I understand you to say that you do not appears of Hackney sires !-- I did, sir. I said of not approve or macking sires :-- a cite, for. A seem of course that I had no experience of them whatsoever, that I would rather have a good theroughbred here

than the Hackneys, because you can breed as good a harness one off a thoroughbred house as you can off a Hockney. A good thoroughbred beese if you have bin will stay and go where the other will throw up the sponge when they go a pace, and you would not like to be left on the road yourself on a dark night. 10285. Have you seen any of the Congested Districts sizes in the West 1-I did.

10256. What is your opinion of them !-They are very nice borses, carries themselves well and goes well, and what any man would buy, that is if he wants to show off, such as to so through a town or sten and go; their action is too high to stay; I would rather have one that would skittle on the ground lower. 10387. What do you think causes that !-- Some-thing in their blood, I suppose, makes them step

10258. Good shoulders?-No, if they had they could not step; you never new a good shouldered one stepping high yet.—hardly. 1028). Then are you afraid of the produce of those horses percolating through the other parts of Ireland and doing damage to burse-breeding i-No, I think

10390. Have you found ponies in Wicklow !-- I did, skr ; but what harm will they do ! 10291. You do not like the Clydesdale cross in the punies?—I did not, nor I would not have them at all.

10293. But you don't think the Hackney blood will do any harm coming Wexford way in the posited

—I don't know, sir; I did not prove that yet.

10293. Would you like it?—I would not.

10394. Lord Amrows,-About the cross of the thoroughbrod borse and the half-bred mare, you

you are in favour of the thoroughbred stallion 1-Yes, 10235. If you keep on crossing with a thorough-

10118. If you keep on erossing with a therespined stallow, wen't you in the end get to a therespined have to keep substance up.—Ludsed you will, you will have to keep substance up.
10296. World you not be in favour of a balf-bred horse now and then 1—Ludsed, they will run into

very close blood after some years. 10227. How would you remedy that 1-I could not suggest that. If I could tell you I would, but I don't

know how you sould manage that,

tooular notice!-Yes, I would like a good strening 10222. Don't they sell very well !- As well as onyeat; but I would like they would star 10000. You would not mind buying a stepping pony!-I would not if I could get a few pounds

10301. Colonel Sr. QUINTIE.—Talking about the breeding of polo posites, it has been brought up here cery often, you as a pole pony salesman and I as a pole peny bayer, may possibly have two different days, but do you think you can in any way easers the breeding of pole pones. —The only way that I could suggest is a small thoroughbred horse. 10302. What is the first constitut in these days for

a rele year -- an absolute reconsity !- The first thing a peto pony — an according to the state as a hunter, is von must have a pole pony, the state as a hunter, ctuyoy guiliy boog has weldsook been dire 10343. I don's mean the formation, but in his blood in the game 1-You must have him handy. 10304. You can make him handy afterwards, but 10505. If a tolo none in these days exceed called

10105. If you go, the Hackney in do you think the Hackney could breed anything that could galloy !--Hackney cours treed anything of the nort. I thus not the ways of keeping back the girth of the saidle in the right place. 10307. Do you think it could breed a pour that could gallop !- It might. 1010s. How-it would gallop all clambering in the sir!-Yes 10103. Then it could not gallep!—I told you so

10510. You my that you don't object to the Hackney blood getting into the country where you propose the pelo puny should be bred. Do you congroups the perception of the Hackney is likely to get a galleping pole pony !—I told you twice, Colonal, that I did not like them. 10312. CHARRIAN......YOU are Veterinory Surgeon to the 10th Hussags, new stationed as Newbridge !-

before

of these. I would know them by their near, seen, and shouldon. If you go to cross-quistion zee, Colonel, you will make me very corns. I told you I had an objection to these, and I say it still. You have no one cles to examine, and you are asking my too WEAT QUESTIONS 10312. Now, Melendy, maswer me. Do you think that the Hackney barre would be conducted to the breeding of polo ponces !-- I would not have them 10313. I only want one answer--yes or not---I would not have them at all

10314. Mr. WRENCH,-Now, Mr. Melendy, I am not going to bother you much. I am just going to ask you two questions. When you say that the Hackney won't stay have you formed that opinion from your own experience or merely from what you heart - I know it; I can prove it.
10815. From what Hackney !- Saveral that friends of my own had. 10316. You are sure they were herd from Hackneys ! -Yes, sir. They might be bud Hackneys. They were lively for a while, but could not sta

10317. But you cannot my that of all Hackneys !-I see only telling you, sir, what I know. You don't want me to swear to it. 10315. Were they Hackneys in Ireland 1-I don't know whether they were or not, they were called Harkney horses. I was only told that. 10319. Do you think now it would pay a breeder in the West to soll his produce at five year old for £16 or £18, would it pay the small farmer!—If would pay thom better if they got more, but when they could not gut any more what could they do! 10333. Is that an industry that is worth going on with !-- I don't think it is. 10321. CHAIRMAN.—Have you saything further you wish to may !- Not a la'p'orth more, sir. I will saawer any question you ask ros.

therearblerd than with the Hackney, and thee as the produce grew up they were certainly better for military purposes, the better-bred ones, that is the therconficed cose, then the Hackneys. For instance,

after leaving the horse breeding department I was in

a regiment mointed on country brods, and the better

Veterinary-Lieutenart Deage, 10th Hussars, exemined, them. Dat you got fewer mission, I think with the

10313. You have had considerable experience in India, I think. To what extent does the Government carry on home breeding there !- They get sires freen bome and Australia; I cannot say the rumber of sires they have there now. In the North Panjanh they had about 100; in the South Peniarb then had not so many, eighty, I suppose; in the North-west Provinces they had some, I don't know the number, and some in Bembay, and one or two in Central Provinces...thoroughbreds, Hackneys, Norfolk tretters, thoroughbred Australians, and Arabs. They were put out in the various districts of India under the reperintendents of home-breeding. I was in the

North Punianh. We travelled the districts brazdlog approved mares for heres breeding, and eath stallion was allowed fifty mares. That is the extent to which it was going on when I left. 10324. Can you give us any idea as to the charac-

ter of the different sort of houses, that is Australians, Hackneys, and so on, which were the best adapted to suit the country! In my mind, undoubtedly the strong therwashbood Ruelish horse or the strong Austrolian here are infinitely better adapted to the mares of the occurry then the Hackney. 10325. What purt of mores are they 1-They vary

all over India. In Beleechists the marss were quite as good as the meres you will see in England or Ireland. The mares in the Pindi district were very good indeed, but as you get further south, they were weedy marge, marcs without any conformation about

a regiment imposited on overary tirous, and the other bred horses at field days were very easily distinguished. Fewer came to the sick lines, fewer were lasts, you got fewer bone diseases, such as splints, side-bone, rischooms, and, especials, with the better bred 10226. That is with the thoroughbred and Australian 1 — Yes, and the Arab. The only findt 1 could find with the Arab stock was that first did not grow large enough. The best Arabs arves rec, I think, over 14.2, or squastling like that, the Arab sires, and they did not get the stock quite large neight to carry the weights.

10027. Then did they put these houses set in the different districts with an eye to the mares of the districts so as to correct any faults there might be in the mares !- We had to do that, but they varied in

the mares I—We had to do that, but they varied in themselves, even. We were told to gut the Hackneys where the small mares were. We indented for many more thoroughbreds than we got. Annually we had to send an indent to England to Sir John Watson to purchase, but he could never buy a sufficient number of theroughbreds, and he made up the deficiency with Hackneys, so we had to utilise them, and put them somewhere, and we put them in those districts where

10318. We should like to hear your experience of the

Pet-Linet.

Drage.

the smaller mares wern. Printed image dientised by the University of Southempton Labrary Direct station Unit Printed image distinct by the Linearsity of Southernston Library Duritication Limit

Jes 8, 1607, Vot.-Lieut, Draga pendines of the Hackmeys b.—I don't think the produce was nearly so good as the produce of the thoroughbred. Each district has its own show, or the neighbre of the districts minual horse shows; and thore the theoretibred always came out, taking the priss. The better class of animal was by a thoroughbred, the pris-

winner as a rule.

10590. In the conformation of the produce sould
you as any difference!—The produce of the Hackney
had the Hackney characteristics—more of the crested
needs, not unto fine shoulders as the thoroughbred.
The quality and the substance was not so youd. More action, for more notice than the

thereugabered.

100.30. You think that the Tackmay stalling panel.

100.30. You think that the Tackmay stalling panel.

100.30. You to the preview - Tackmay that you excited nature; but we found the strong throughbred horse to the country-level masses.

Failing these the Waless were, I think in each go agood as the Exglish thereighbred, and then the Anshay, that the pipes the Tackmay them, and then the Anshay, that the pipes the Tackmay them and the think that the stalling with the think that the think the think that the think that the think that the think the think that the think that the think the think that the think that the think that the think the think that the think the

In 1034,6 Cutton 18. Querryr—Tell Lind Rathsizated on what principle it was carried case—the whole thing wo by vivil and unforce oritisms—in which thing wo by vivil and unforce oritisms—the

Each district had its own money allosted to it by the Government to manual in various mostly and things in the district. A cortein portion of that mency was given for horse-breeding in the district. It varied according to the effected, whether it was a rich district or a poor district. The Ravul Pindi district was a or a poor district. Into reavel I was unwersely rich district, and the prizes were very big, indeed; and also these they had many private individuals who and also there they not many private individual wife were interested in horse-breeding, and they themselves would give large prises and aliver medals to the farmers—and out there a medal is thought a lot of by farmer; and all those private prizes were always given in the brood mare class. That was the way we encouraged them to keep their brood mares. We encouraged them to scep user urous maters would never give an extra prize in the golding class or saything. They might be sold; in fact, the scener or anything. They migne be sold; in race, the moment they were sold the better, and the bigger prices they got the more it encouraged the people to breed.

10335. CRAIRMAN.—How were those shows man. aged; under what superintendence!--Under the Denote Commissioner of the District and the Superintendent of the Horse-breeding Department. I don't

think there is anything in Iritand or England that

"Mr. LA. Torouze—I understood that the Government of Ludin were the properties of the

1035. How did the private owners of authors likely the provided with the private owners of the surpose likely the provided within the toto 1. Yes, wretched animals.

1037. Did they show any trenthess 1.—Yes, try to the provided within the provide

number of these uncound or inferior animals out of the district i—Oh, wadouhtedly. 10399. They disappeared i—Yes, they were very few: I don't think I had more than ten in the Nach

Serial Agest thank I had more than ten in the North Panjach. 10340. Ten, the property of private individualst.— Yes. 10341. But there were, I suppose, considerably

more before the Government horson ware past down! —
Oh, you, sufficient to get all the between of India.
15912. When these Government horses were placed
in these districts was any composation given to
private owners of stallines! —None at all—none whatever. What was recommended soveral times was to
put a tax or the private a following its way
put a tax or the private a following it was suggested

you as the times to encourage the families to loop an approved becoff mare by leiting Mm off so much land tax.

10043. Did the owners of mares pay any fees at all to the Government stallings.—Note whatever, approved mores; anyme was allowed to put a more that was not branched to a loope on payment of 90 mines.

was net transpare to a source on payment of to rupes, but no one ever eld, one or two a year, they all get their mares branched. 10344. And they were covered free 1—They were envered free. 10345. And the relitters authorities or the flaure-

ment had no claim upon the product—None whatever.

10344. The farmer could sell the product to whoever he librot 1—Yes; except in Irofic is in possiblely disabled, the buyer always happens to be a Government official, the remembridation of the Begal anxieve cavality; that they could sell their product to

1647. You have had considerable approximation of peding at Tribin houses and Tribin ansem-do you conader that it would be possible to draw any stategor between the ordinary Tribin head many and the commety brief marse of Beloschitsten is a marse quite size good as the Tribin among at the Hores Blowe, at good as the Tribin among at the Hores Blowe, as the called David Ghash Khina, the heard marse class there there was basing a bad one in the slasse,

10348. Colonel St. Quintum.—Did not run quite an high, a little lower, but very much the same class? —Yes, a little lower, well-bred marts of substance and carrying weight. 10348. Mr. L. Tormer.—You said one of the

10345. Mr. La Teorenx.—Yeo said can of the principal objects at those load shows was to enourage farmers to keep their masses !—Yea. 10360. Was there any special densead for mrees in India, was there any special densead for mrees in India, was there any making, any reason to believe markers in Telling for them.—Calcutta, Britishay, and Midden; in all those places you test sell them. The Labore desletes would buy them to send to the

place—they are the biggest dealers in the world.

1801. Is a mare as a matter of fact up there more
valuable than a gelting l—In certain parts of India
they are; in Belooslastan they are; menny would set
buy them, they would not sell them there.

10452. Then you don't require to give them prime
to induce them to keep them t—Not in that part;

Printed image digitised by the University of Southsmoton Library Digitisation Unit

thing as a four year old solt up in the North-West thing as a noist year our com up in use North-West promates in the fairs, because when I left there was hardly such a thing to be fromd. They were all taken down to the South of India at one and a half taken down to the course or thomas as one abid a failt years old and filtered away into the native states to Yes, you could find them, but not a very good sort, The Bengal cavalry now buy their own. For a year or two the Remount took them un, and now they hav the four year old geldings, and I am scery to say many many marcs as well. Branding was chiefly for the purpose of preventing the Bengul cavalry buying mace. That was the only restriction on the sale, that Government oficials were not allowed to buy B I mares. Directly I put a hrend on a mare the owner

could not cell that more to a Government official. 10254. Mr. La Touche.—Since you have been in Ireland you have bought a certain number of horses in the country !-- You. 16155. And you have visited many of the local sives and the Dublin show, and have had some exshows and the Dunces move, and mave an once we periance I believe of seeing the way in which house are beed in Ireland. Could you make any suggestion as to the way in which—perhaps I ought to say that a charge has been miscuitted to us by a greeral officer,

end other witnesses have suggested similar things. that mores chould be taken from the cavalry regiments and artiflery regiments and distributed among the farmers for beeeding purposes in Ireland? Colonel Sy. QUINTIN .- Cast mares t Mr. La Toucuz.-No, selected mares.

Witness.-They must be over ago, over fifteen 10356. Mr. La Tovenn.—No, I beg your pardon The scheme I alluded to was suggested by a general offer and submitted to this Commission that the

mares were to be between six and ten years old, selected more from regiments not in the First Army Corps. Do you think that that would be calculated to improve the howed of bornes in this country !- These band to keep them !

1035. They are not allowed to sell them 1—Suppose

they could not keep them properly.

10358. Well, that is a detect, they would be under a certain inspection from I suppose, Government officials, and the idea is that they pay from Me, to E3 a piece for the use of the mares, the produce to be the property of the tenant and be disposed of at his will !

-I don't think if the mare was over ten she would be any use as a brood mare after that time. It is very sketchy whether they would hold or not. 10359. Do you think such a toggestion as that in the first instance would possibly most with the approval of the colonels of cavalry regiments !-- It tertainly would not, after they have trained their merer and everything to have them taken away to

be given to the farmers. 10340. At the same time if it could be carried into execution is would certainly place a number of metal marm at the disposal of the farmers 1—Ob, I think it would, but I think the disadvantage to the regiment

would be great.

10561. What do you think of the broad marse of Ireland from what you have seen of them !-- I think they are useful mares. I think the great thing is to get sound stellious to mate them with, and I think more mucht be done to excourage farmers, something the same way as they did in India to keep the brood mares. The prime now in the brood mare class are shourdly small, £10 and that sort of thing. The prime ought to be £50 or something like that. You

will get bigger prizes than that in England at some 10162. Do you think, on the whole, supposing there was a sum of money at the disposal of persons interested in horse-breeding in Ireland, do you think it would be better that a large proportion of that sum of money abould be devoted to the purpose of the stallion or the mace !- I think it is most essential that you should have a sound stallion to begin with

16063. And given a sound stalling, you would spend the money on the mores !- Yes, I should spend the money certainly on the marcs, and the stallions ought to be registered and ought to be sound. There 10364. Mr. Watner .- How long were you in

adia !--Six years 10305. All that time were you coguged in this erse-breeding !- Three years

10310. And part of that time in the North Purjust 1.—Always in the Ponjush, for part of the time I had the whole of the Punjush, and for part of the time I had the North Punjanh, it was found to be too big for one.

16317. During part of that time were you partly under Colonel Queripel and partly under Colonel 10008. When you speak of thoroughbred Austra-

lians, you mean thoroughbrod horses beed in Australia I 10209. They were practically of the same breed as our own thoroughland —I suppose so, if you trace their pedigree back

10370. Does Sir John Watson buy for the Indian Government in England 1-Yes. 10371. And is there a regular requisition sent to him each year, telling him what stallions to huy!-

10372. As a matter of fact, I think they don't take thoroughbred stallions for India over 15:35-I had

10373. But I mean for the last three years 1-1 could not say for the last two years; certainly the could not say for the man two years; versum, we hast year I sent in my indent I did not restrict them to 15°2; it was never mentioned. 10876. You don't know that at present they don't buy them over 15-21-No; in fact I always, in my annual report, asked for hig stallicus, and the big

stallions I had I know got better produce than the 10375. And you thought the Arab stock too small ! That was the only objection I had to them 10376. Are not the Hackneys at present imported into India, chiefly Norfolk trotters!—There were some Norfalk trotters and some Hackneys; they came out in the descriptive roll as Hackneys or Norfalk trot-

ters, and some as roudstern, and I could see very little ofference in any of them. 10377. They were largely bought from Norfolk! I could not say; they were all of the some stamp. 10378. Do you know what price they are paying for thoroughbreds—what the limit is at present 1—1

think it was £200 10379. You don't know now that it goes up to 350 guiness I—No; I bope it does; it was not enough in those days. There was no limit for the Arab stal-

10395. Do you know what the numbers were last ear perchased of each breed, theroughtred and Hackney !- I have no idea since I left the Department what they are doing. 10381. You don't know that Sir John Watson had been out there lately?—I had a letter saving he was

out there lately inspecting the stads. 10352. Did you ever see any good native-bred stallicus !-A very few; we were ordered to purchase them if we could; I purchased one or two in the

10353. Did you see any special native breed that would be worth preserving or tering to improve !-- I think the Belcochistan breed if we could get stalling there, but they won't keep stallions; they insist on having them costrated. 10364. Are there not stallions of the same class as these mares !- The Boloosh stallions are of the same

brood as the mares. 1035. It has never been tried breeding them pure with stallions of their own breed t-They did it them selves before the Government interfered.

induced them to bring the mares in to the show!-10400. Where do thuy import them from t From The prizes, and you see they bring their young stock Arabia; it is quite a sight in Bombay, the Arab in to sell to the remount department, or to the Bougal 10401. Colonel Sy. Quintin.—I should like to ask

COMMISSION ON HORSE ERREDING.

the little paltry prizes they give now I would some

rive it is increased money for remounts, I think you

want to give more money me tread marcs.

10397. CHAIRMAN.—Have you anything else you would like to say!—Here in hunting districts you

want the beg thoroughbred stallion; in Connegara, want the big association wants; in comezan, and those places, you want the very small thorough

bood stallion to mate with the mares; I am not speak ing from experience, but I should imagine that would

16398. Well, you would stick to the thempshout! I would stick to the thorough bred for the pole norr.

names from the Bombay market, and place them all over the electrical to interpret the breed of position in

16309. Where do these Avalue come from \$-- From

Bombay market: from Arabia thomands are imported

you one question touching on the truster question.

necessary was should have quality and staying name and light even action !- I think it is absolutely neces

sary; I think it is essential for a troop horse to be well bred to be a good one.

vagant !-- I think so, that was what I always frond

with the 5th Lancers in India; some had the Norbile

trotter, and some the thoroughbrad, and the thoroughtends always were down the half-heads.

10403. You would advecate nothing but the

oroughbrod !- For troopers, certainly,

large way. The soil is not good for it.

The Commissioners adjourned.

10402. And he wants light even action, not extra-

want to give more money for broad marre.

TWENTIETH DAY-WEDNESDAY, MARCH 3ap. 1897. Sitting at 12, Hanney Savare, W., London, Present :- THE RIGHY HOS. THE EARL OF DUNRAVES, R.P., in the Chair; THE RIGHY HOS,

Hackneys, more particularly.

10924 And have the Government by interfering

10387. They were not by the original Belouch !-- .

improved the broad !-- I think they have; the majority

of this enormous brood mare class were by English

10388. But no attempt has been made, except by supplying an exceptionally seed stallien, to keep the brood i.—No, in no part of India.

the shows in India !- You 10,000. How for have the furmers to bring in their marcs and foals !- Many miles, I could not say how many; all over the district, and the district is an

10380. Chamman .- I think you said that you saw

energion area.

10391. They travel un immense distrace!-An

mascare distance; the same as if they brought mares

eavalry, or to private buyers. 16303. And you select their mares, too, I suppose,

for next year !- I brand on that occasion two or three hundred young mares; it was like an imperse four

or heres show-it was in India like the Dublin Hosso

10394. I take it that your method for improving the breed of horses would be to use a big, sound

thereughbred stallion, and to encourage farmers to

keep their arand brood marm by subsidising tham !-

That is so,

10376. Mr. La Toucour.-Awd a very substantial

substily!-Yes, I think the present is absolutely assless;

10392. It was the prices that were given that

LORD ASSTOWN; THE MOST NOBLE THE MANQUESS OF LONDONDERRY, R.G.; Mr. J. L. CAPRY, M.P.; RIGHT HON. LORD RATHDONNELL; HON. H. W. FITSWILLIAM; COLONEL St. QUINTIN : Mr. PERCY LA TOUCHE: Mr. F. S. WRENCH. Mr. HUGH NEVILLE, Secretary. The Loan Temporar examined. 10404. CHARRARY.—You live in Monmouthshire, do / 10410. What class of mores do you put them to? Annual anything that course to them. All of my tenants have the use of them, and all the facusar over whose lands my bounds hunt, so they have as much as they can do. I find a Hackney in a very rest not 1-Yes 10405. And you have been for a long time interested in the subject of horse-breeding !---Yes, I have.
10406. Could you tell us what classes of horses
you breed and what classes of stallings you keep !---

useful animal that way, keep three classes, thoroughbreds, Shire borses, and . 10411. Lord Lowpownessay .- What kind of a mass Hackneys do they send, as a rule, to them 1-Small mare, 15 soluteys. 10407. Would you tell the Commission your exhands, used for light plough work and light trap prionce in breeding from these three classes of stalperions in breaming from tesse three classes of nea-lions 1—Do you mean experience of breeding generally work into the markets. 10412. Do you keep good Hackney mores your-self !-- I have only one. I don't keep any mares as a heart-breaking sort of operation, do you mean that ! really to breed from them ; I have so much to do with 10408. I rather wanted to know the results 1.... the tenants who send their mares to the farm I have suppose I am hore morely with a helef for the no room really for it, and I do not consider my country suitable for a stud of that description. I I suppose I am sere movey with a timer for the Hackney people because I am on the Council of the Hackney Society, and have been now for three years. and therefore I have taken a great interest in the don't think it is suitable for breeding horses in any

10413. CRAIRMAN.—Do you know the computed districts in Ireland at all !—No, I don't at all ! keep !—Two. Printed image digitized by the University of Southwardon Library Digitization Unit Printed image distinged by the Limiterary of Southampton Library Distingtion Line

don't know that I ever was there, it is a long time ago since I was in Ireland. I don't think I was ever is what may be called a congressed district, but I im-

agine they are rather similar to our mountain districts 10414. I date say you have heard that the cedimary class of mores in the congressed districts is a very

10:15. Would you think that the Hackney stallion would be the best class of stallion to be not to such a more in order to breed a useful animal !- I should or so decidedly, looking at my own district, a great part of it in Brecknockshire, where I own mountain say's, where the ponies are reared on the mountains. Welsh ponies. I think the strain likely to impreve then is as a rule good Hackneys, pure-bred Hackney

10416. Do you think the Hashney crosses well with the Welsh pony!—I think so. I am very strongly iggented that way myself. Some five or six your ago a large district came into my possovsim, about 25,000 seros of moor, disafferented lend in Brecknock-shire, which adjoins my muzor, where Welsh ponies grow, and I did mend to have gone in largely for importing the bread by buying four or five of the very best Hackney stallions I could, and putting then there. It so happened that some dispute arous and I gave it up. But I was so impressed with the idea of how unoful it would be to import Hackney

stalling into pony rearing countries that I was fully intending to have gone in for it there. 10417. Could you tell us at all about the produce of the Hackney sire and the Weich pony !--It breeds the nort of original so marketable now for ladies driving in Balli carts, victories and broughars, small steppers. I had a Norfelk stallion called "Young Otllives," five or six years up, an extmortinary fise goes, with hind action, and all round me all the

farmers have little stepping horses by him that they dries to market now, and which they can sell quite easily to dealers. 10419. What age can they sell them at 1-Ahout three years old, as soon as they can; too soon indeed a

great deal, they want to make money as soon as they on nowadays, as I darenay you know.
19819. What do they get for them 1-240 or 250 for three-year-olds, they can sell them if they step at

19420. Do you know where they go to !-Mostly to Louden and the other hig towns. 19421. Do they sell direct to dealers to Direct to daslers, I think; they diese them off so soon that very often I don't sen them.

19422. Do they sell them in fairs, or do the desires sense round?—I think the dealers come round. I thick it would be absolutely useless to send a thoroughbred stallism into that part of Brecom I first slinded to, the thoroughbred stallion would be absolutely useless unless he was very small, and a very small thoroughbred stallion is a sort of thing you

can only pick up by observe. 10423. You would prefer the Hackney sire to the thereaghbred circ at equal prices !-- Cortainly ; but there are districts like Carnersonbire, Pembroke-ative, and Cardigombire, where they breed hig board butters. I should never think of sending a Hackney stelline into that district, they have got really good

throughbred horses there, and breed very good busies. I imagine I am here to say what I think would be useful for the congested districts of Iroland. 10424. Our inquiry is not confined to the congested

10142. Our inquiry is not confined to the congested districts, we are dealing with the whole of freshool. I should gather from what you have said that you would countrie a smithale thereughbard size would be the best size in the country capable of breeding high-thou hunters in Tee, for countries which are, in the habit of breeding hunters I should should be the second of the countries of the second of the second which are, in the habit of breeding hunters I should see sick to the thoroughbred stallion.

10425. And from your experience of Wales, you Meral me sould think that in the congested districts the The Last Harkney sire would be the most suitable !- A good ?relegat. Hackney sire would certainly be the host, carcainly for producing animals that would enable the farmers to sell readily; I don't see what you can do with the thoroughbred horse and a small pony, except to get racing posits, which of course are marketable to a certain extent, if they can race like a raceborn, but where you breed one that our rups you breed frety that

10426. Have you say idea of how the Welsh pory was originally produced !- No, I cannot say, I think they have been there from time immemorial in the Welch hills, they run wild and loose, not looked after

as they ought to be, the stallions particularly. 10437. How about the Welsh cob1-It would be very difficult to define the Welsh coh. I gave a print at my show for pury stallions, I never get more than one or two shown there, and those are certainly not animals I should care to use to improve the breed; that is more the reason why I am so foul of the Hackney stallions for improving it, for I think the breed itself is neglected, bred so in and in, by running loose on the mountains, that they want some fresh strain, and it should be a strain that has got not only knee setting, but hind soting and rising

10428. The congested districts, as you know, extend all over the western scaboard of Ireland, from north to south, and assuming that the Hackney sie would be the most useful class of sire in that part of the country, and assuming, broadly, that the greater part of the rest of the country is adapted for producing hunters, would you, from your experience, think that there would be any danger to the rest of the country from introducing Hackney blood into the congested districts !- I should think not, certainly not, if you mean that the breed would get aprend about it; it

would be a better breed than is there now.

10429. You think if the Hackney strain permested through the districts devoted to breeding high-class hunters it would do no harm?—No, I think not, it would do good, you would have better mares from them agreed about the country than you have

10490. Have your local shows been beneficial, do you think !—Tredeger Show was originally started in a fat stock show, or fat eattle show, it had very little to do with horses until lately. I give prime for colts, sived by one of my horses, it is beld at a very bad time of the year, just hefore Christman, farmen

don't show very many, I don't look upon it as much use in the horse-breeding line, it is more for cattle. 10481. Do you do anything to try and indnos-farmers to hreed from their best mores i-Of course, I reserve the right of refusing any mures that count

to my stallica, that is all. 10482. I mean in the show, in the way of prizes?
-There are prizes for brood mares; but I find the same animal generally wins every year. There are not many shown -- two or three. The farmers have

moi many shown—two or three. The intraces Davis
main an objection to showing, they sivelyn asy,
"three is seens rich man or hig farmer that is sure to
kake it." That is my experience of local shows.
10433. Lord LOSCOMMENT.—But you yourself
keep them stallings at Treedogs i—Yes.
10435. That is where you heart !—Yes.
10435. That is where you heart !—Yes.

rule !-- No, not many of them. Very few farmers

10436. They don't breed hunting marce—they have not hunting marca of their own i—No; except just now they have a few of them since I got these

10437. Are they a large class of farmer !- No, small. Most of them work on the farm. 10438. And they have these posites you have been speaking of —Yes; a sert of light eart mars. They prefer the Hackney a great deal to the thoroughbred. The Lord Trodegan. 244

10439, Marca of 15 hazzis I—Yea.
 10440. Well-bred marca I—No, not well-heed, because they are used as leaders in the plough in the hilly parts.
 10441. What do you suppose they have been got

hilly parts.

10441. What do you suppose they have been get
by originally—by aughting they can get. Have they
taken any care in breeding them 1—No; they are
get by may stalling that came around.

10442. Do they send thus to the Hackney1—Yee,

10443. And the result you say, the produce of these marre, is sent up to the Lendon dealers!—Yes, that is where they go, 10444. Have you over seen the result of these marre by your Hackneys created with a theroughheed

I have in my own hunting stables now two of my bods, nervante horses which are by one of my 19-46, but of what kind of mass—Out of the very consciousness marss—one that came to the kennels 19-46, Of corres, you know that in Redand the great fear of the huntar-breeding people is that the result of those Hackneys will got out of the districts

great fear of the brinter-breeding people is that the result of thee Blackneys will go not of the divistic in whith three Blackneys are found, and will be the means of retinging beaters in the burster-breeding that the blackneys are found, and will be the Hackneys and heaters do you think they are justfied in cutextioning there fears 1—That is not to be faced I think myouf; but I cannot still about a particular district. I famely the complaint in freshold in you have got on few good mores.

1041. Do you limit you heast all the data mun-

how, I beyon than you need at an to an number of marce, or does he cover so many, as as south — I should be obliged to limit them, otherwise there would be to many. I don't limit these until my men says he cannot do any more. We have another stellion now.

10440. In fact, they are extremely popular in that

10 do) and the state of the

10400. Mr. FITEWILLIAN.—What, as a rule, are the marce about you 1—0b, mostly about 15 hards, light trappers. I believe originally from a Welsh

10451. And there is no great around of hunterbreeding there 1—No.

10452. You say you think that if you introduced a Hatkney station the bleed would not permente the offcialing county where there was hunter-breading 1—No. 1 don't think as I den't think is would

the infloating corms; waters there was measurement to the "Money from the land of any green harm if it did. The really good factory is absential nervies. It was said that a first cross between, that if you Welsh and Eingheit hound was theyware, has if you Welsh and Eingheit hound was the wave, has if you Welsh and Eingheit hound was the wave has if you will got a very useful.

arimal, but if you besed from that egain they till no the produce is undest— Koo rebully treed a nandescript, I don't see why it should be undess unless it in a heaver, fact that it is. 10102. Do your Hackung stallinan cover at the serve feen as the three-upliched street—Yan, they have all covered for nothing, I may say. 10403. Lond Autroover. Do you find the Madeurer—

1 10463. Lord Astrroirs.—Do you find the Hadeay when he is croased with the posty increases the size, the creat—Ob, you, most certainly. 10464. Does to rank any other necision-ble difference! —Of course a Hackney is higger than a pony to start with.

with.

1046. You can got a small Hackney, but a big one do you find it gives substance i—0b, yas, that is one of the principal advantages they have, such splendid feedegs and fost; of course the sire most be a good Hackney, a bad Hackney is about as had a thing as you can have.

10466. You say you have two horses in your own stable by your own Elackney stallies 1—Yes. 10467, Are they good serviceable hereos—Most sorviceable, hard and spleudid fences, they have gijump ten or twelve first out of a tred just as easy so much lowers can do say of a gallop.

10443. De a day's work and stayt—Yes, and all day too, and den't look like deing it, they den't look a like being great powerful borons. 10449. Mr. Cannw.—What is the average extent of the holdings in your district!—About 80 acres 10

1 of the holdings in your district!—About 80 acres to 8 100 acres. 10470. Then they are pretty well of 1—They don't any so. 10471. To they use the produce of this Harkety

cross for farming purposes—for drawing surposes t— Oh, yes, and for light-thain week and light trap work into market, and they are sold about three years old to the Lendon market t—Yes.

the 10473. You don't think they are entitable then for beavy farms work such as ploughing and card—No. I don't think so.

10474. Mr. Warston.—When you talk of eighty control of the card in the card

to 10474. Mr. Warricks.—When yot take or opposite over holdings, about what read per some are they, what shace of land, is it very poor.—No, it is read to good grass land, but lit is mostly a clay soil, and his is mostly a clay soil, and his is not usuable for breeding bornes.

1 10478. Have they monotain run with the agricultural land, any rough land with it.—The monatable the read and the read to got their sinks on the read to got the read to got their sinks on the read to got their sinks on the read to got their sinks of the read to got the read to got

sacts. Then they don't winter them on the bills t -Oh, no, they all come down from the balls. 10477. But they leave the young stock out all the violer !- Yes, entirely. visiter 1-104, controly.

10478. And do you find the produce of these the large are very hardy 1-Yes, I think so ; consti-

oriosally hardy you meant 10:75. Yes 1-Yes, I think so, just as hardy as my other.

y ottor. 10180. Have you been able to see if there is any difference between the produce of the threeughbend and the produce of the Harkmey in the way of hardinon S-Oh, yes, certainly, the produce of the cocumbhred cannot cland out in the winter like the 10181. Then in those cases where the horses would

be liable to great hardships do you think a Hackney be Eable to great narcanipa you containly would be the best cross !-- Oh, yes, certainly 19483. I think Mr. Le Toucho asked you if you thought the excellence of Irish hunters was due theregal the excellence of Iruin insters was quote the fact that nothing but thereughbred blood was in their pelligrees. Do you know, as a matter of fact, that one-third of the stallions in Ireland are inch, that one-third of the stantons in freisns are

10483. You don't know that for a great many years eart-horses have been introduced into Ireland and been all over the hunting districts !-- No, I don't know anything about Ireland that way.

10484. Have you beed many hunters yourself from thereashbeed horses b-Yes, a mood many, but not with much success. I have never been very particolar in the mazen; I have used mores that were 10485. Is it your experience that a misst hunter nakes a good harmess horse, a horse not good enough

for a hunter !- It depends upon what you call a good 10486. Does he make a salcable horness horse !---

A useful slave, but not a valuable harvess horse, 10487. Do you think action is a great thing !-Tes, everything in a harmess hores.

10488. Do you think action is one of the most missión things that a small farmer can try for i-1

10489. You think a horse with action will sell much better than any other heres !-- I think so un-4 whitedly.

10410. How many years have you had these Eschier stallings in Wales 1-Pourseen or officen part now. 10491. Did the farmers use them much at first!-I don't think they did

10402. What has made them so popular now!— Bearso they found that they can sell their produce I think. When a herse gets a name you will find a sale for the smirnals by that herse. 10493. Do you think: it would pay them at all as well to try and hreed pole puties 1-No, I don't think so, I don't think my country is suitship for

10494. But I suppose there are the mares, are there not t-No. not suitable for breeding pole 10465. There have been very good polo ponies bed from Welsh ponies, have there not 1-Well, I an talking about my own district mer me; there

are no mountain ponies heed near me at all, that is tope way off.

10494. They are rather a larger size, but still the

Mr. Brunser-Course, N.F., exemined.

16013. Charman.—You have had a large ex-perione in breeding horses, have you not 1.—Very. 10014. Particularly from Hackneys 1.—Particularly from Hackmers. If you will permit me I will explain just for a moment why I supplied the Commission with the scheme of a rideuce which is before them.

Printed image digitised by the University of Southampton Library Digitisation Unit

mountain pony blood comes into it a good deal !-- I Mayan, 1897. suppose it does down there. 10497. We have heard a great deel about the soft Tradegue. blood in Hackneys, can you toll us where the soft blood in Hackneys come in 1-No, I don't know at all about that.

10496. Is it your experience that Hackneys are soft or not 1-No, certainly not. I key nearly all my carriage horses, driving horses and team horses from Norfolk, and I find they can tect on as long as

any other horse. y other norse. 10499. And do n good journey !--Oh yes. There are of course awful bad brutes of Norfolk Haskneys. 10520. I suppose you have seen a great many thoroughbred horsus !- Yes. 10501. Do you think there are as many had

horses in proportion among thoroughbreds as there we among Hackmays 1—I cloudd say mere.

10102. Have you been able to form an origina as to their soundness, whether the Hackney is a sound heree or not !- I think they are very sound. I

should say as sound as any breed, racehorses or eart-10103. And their produce generally sound!— Generally sound. I think they have very good feet

Generally sound. I think they have very good sees and limbs, which so many other breeds don't have. 10504. CHARMAN—Have you any preference for the locality as regards Hackneys, Norfolk or Yorkshire !—Yorkshire I prefer to the Norfolk. I think they are more riding horses, the Norfelk see more driving

10500. Yours come from Yorkshire do they !-I have one now from Yorkshire. The ones I had before were from Norfolk, but I think they are more ridius-looking houses in Yorkshire than in Norfolk. 10006. And how many generations of the produce of the Hackney stallions have you had experience of, you have kept Hackney stallions a great number of years !- About fourtom or fifteen years, it has been

going on new for that time.

10507. And putting the progony of the Hackney. to the Harkney again, I suppose !- Yes, I think so Do you mean putting a mare by a Hackney to the same Hockney again or to a Hackney.

10508. To a Hackney 5.--Oh, yes, I think so, and with a good Hackney they go on getting just the 10508. I think won said was considered that the Hackney was a hardstr spinoil than the theroughbred

and could stand more violatizades of elimate L. Ves. stand more elimate, more bad weather, out-of-doors. I den't think a threeughtred one stand any; you carried leave a thoroughlyed out in the fields all through the winter, he would fall away to nothing.

10510. But the eross between a thoroughbred and a half-lived mare for instance in Ireland. I am not talking of the stallien, either Hackney or thoroughtacking of the station, miler Racking or thorough-hred stallion, but the produce 1—Oh, I should think he would be sefter than the produce of the Hackney because the Hackney comes from a hardler strain, a courser elean like the care house. 10511. Can you say that from practical experience, your own experience 1—You, I think so, I have seen things on my own farm, that I have left out, fulling

away, while your curt-horse and Hackners were doing well.
10512. Is there any other information you can

ive us or anything you would like to say !- No, I den't think so.

te Trestati

From this large experience I aresmed that I would understand and know many of the points which were vertinent to the inquiry, and it seemed to me as my experience was so extensive that it might possibly be for the convenience of the Commission if I classified the noints on which I felt qualified to speak with the Printed image digitized by the Hurseignty of Southampton Library Digitization Huit

Mr. Bardetz-Cours, x.r. sols idea of saving time, and beeping the matter clear.

10013. I think it would be convenient if you give up your information societing to the order of subjects which you put down in this decement. You were consulted, were you not, by the Congreted Desiries Board as to what these of in this decement. He was Board as to what these of in Land. I have the letter in which I was consulted, and my reply is been. I don't know whather you weall cause to bess in. My confyrence for benduiting in it that the better which

don't know whather you went once to hear it. My only remon for submitting it is that the letter which I wrote before my hour of impection might just as well have been written after in. 16016. Charmana, We have had your reply b-Yes. Mr. La Touren.—We have not had the letter Mr.

10517. CRIERARY.—I am not sure; I think we bave. Mr. Neville (Secretary.).—No; we have not got it. Witness.—It was the first communication I ever received on the subject from Mr. Wrench. If van :—

"The Description of the Company of t

" Believe me, truly yours, " FREDERICK WRENCH." 10518. Perhaps you better read your reply !--! will read pertinent points of my reply which you will find in full in the printed document. little difficult for me to advise you definitely withont being acquainted with the word type of posies from which it is desired to bread, and without knowing what class of seimals will find the best market in the special districts. Assuming, however, on these two points-(1.) That the matrix will consist of undersized atoek, short of both quality and action, and in addition weedy and light of bone; and (2.) That it is desired to raise the standard of excellence, that while the stock produced will be more serviceable for the and there a house want this section and employment would fetch good prices from the harness dealer, and so gradually draw a better class of dealers into the districts.—I have no hisitation in strongly advising the use of the Hackney stalling. I do not believe in the Arab; nor do I think the result just mentioned would be in any way advanced by the use of a small thoroughbred. The thoroughbred is not the borse to get harness stock, because in 99 owers out of 100, his produce is deficient in action, which now raises the price of the harness herse all over the world; and further, because his tendency is to get them high on the leg and light of bone. The Hackney corrects the latter deficiencies, gives width, strough, weight-carrying and draught power; and in addition gives setton. It goes without saying that you must

get the right part of Hackney, breaugn there are a

grost many of the wrong sort. There are very

many important considerations in choosing a Hackrey, such as back-blood, reliability for endurance, ris, which must be added to those you mention of action and shares."

(301). Xuu subsoquantly mode a report. Tay, the meaning affirm and a many and a fine of the fine of th

"I proceed briefly to explain the principles which have guided see in the opinions I have placed before the Board. It would, I think, have been unwise to attempt to make any violent change in the kind of heese produced in these wild districts, where there exists a common type of pony or little horse, greatly deteriorated in some respects, but still possessed of many valuable points which can be handed on, in conjunction with new and improved features to be nequired by the use of a superior class of stallion. To attempt to produce heavy eart or draught house from these posies, whose small size is fixed by loan heredity, or (by tise use of the ordinary thoroughbred sire) to look for a supply of the high priced bunters for which other parts of Ireland are justly funed, would be at once foolish and hopeless. attract would result in the less of most of all the valuable features of the existing breed, while none of the attributes simed at would be secured. Mureover neither the land, ner the means of the former, nor the conditions under which horses are at present reared, would support hig horses. The object somed at therefore has been to improve the existing type by the introduction of quality, substance, and action; that while the horses produced will be as good, if not better, for the work they have to do in the country, they will also include many specimens which will bring to the breeders a higher price than that at present obtained. In addition to good-looking cols and purion for barness and saddle, the production of the special article known as the pole your will in certain districts and by providing enitable stallions be encouraged. In my opinion there is no reason why Connemara and Mayo should not in a few years time become the recognised breeding ground of the best pole penies, but that that supply had ceased.

cobs and pole posites to be found in Ireland."

Well, I found in a portion of the district which I visited that there had been constantly a supply of not consider the Hackney stallion suitable for the production of pole ponies, and I therefore advised Araba or very small thoroughbreds, or, what was much better in my opinion, actual getters of pelo ponies however they were bred. I am given to understand that this was done, but that geneally where such a stalling and a Hackney were both within reach the farmers preferred the Hackney. Of course cannot speak of that for a certainty. if I may explain a little further my advice with regard I found in these districts what I call a "fixed type," and it maybe taken as an axiomin horse-breeding that wherever you have a fixed type you can predicate with tolerable accuracy the results of crossing that type with another fixed type. What I mean by a fixed type is a horse whose characteristics of shape, substance, action, quality, and so on, have come to him by virtue of heredity, have been repeated over and over again in his accestors on both sides until they have become fixed; and by reason of his having

chained them by heredity he is preprient que those characteristics, and he is able to hard them or to his

stock. I found certain deficiencies in that fixed type, since my harness department has grown in imperiance and I believe that those deficiencies vorall to be supported by the use of the Hackings dealines. The first type in the Word is a small pear with good correspond and steading, and here and there were sugar supported to the control of the district such wis agreement to have been out of the district such wis agreement to have been control of the district such wis agreement to have been control of the district such wis agreement to have been control of the district such as a support of the control of the district such as a support of the control of the district such as a support of the control of the district such as a support of the control of the district such as a support of the district such as a suppor

massent advantage to the country side if the whole of the latter had been earted off and tumbled into the see. But the best I could do was to apply my second. sziem which was that where you have a promiscoom type of horse produced by weavstematic breeding from every kind of sire. If you got a fixed type upon that promisenous type, the fixed type having a preoctoner with removed to its characteristics will improve the reunisusges type and to a certain extent engree the prominences type and to a certain critical conquer the prominences type. I advised the Hackney stalliers again for this district, but in that case I solvined a full sized Hackney stalling. I think it will be christon from the description I have given of the nairie stock in the districts I visited, that my advice to introduce Hookney stallions applied to material from which there was no possibility of producing a on which there was no positivity or producing a micr. That is all I have to my about my teer. 10520. Before gaing to another subject perhaps it would be convenient for the Commissioners to you some questions upon those points. I should like to ask you one or two questions myself. The fixed type you speak of I understand, to be the posiest—Yes. 10531. That is, the shoriginal horse, or the abriginal house improved by means we don't know of h. By symposens I should think the fixed type of proy had been very little crossed with anything that could improve it for a very long period back. Where

Law this areas which I constantly did of a theoroughted beam spon the post is was what I have described, manely, a 16 hands haves without any taken army action. I summer insigns not what purpose such a form could be priv.

348

orcesed with thoroughbreds that you consider such a very poor stamp of creature — Yes. 10542. Were you able to gather at all what kind of a thoroughlyred horse it was that had covered those marcs 1-Lord Denraven has already put that question to me ; my view on that point was rather limited. think we saw three or four thursushbred stallions, I didn't like them 10543. Were they animals broken down in train-

ing or were they animals that you ever heard anything about !- No ; I had not beard anything of those specifio missels. 10544. They were owned by whom-by small pecule in the district !- I think they were ewordrather as a speculation, I fancy-by local projectors.

I don't want to go into any oridence beyond my own actual experience, although I may submit opinions. I think probably, if I may may so with all respect,

that this might be got from other sources with greater accuracy than from me. 10545. Well, I was only asking you shout the animals you said you thought had been a failure with the thoroughbood cross—have you any idea of what the theroughbred was t. I think I would rather express my opinion about the stock which I saw than about the sire which I did not see. I only know the stock I am speaking of were by a thoroughbod. 10346. They are very hardy, I supposed -The small pegies are very hardy; yes, the fixed type were very hardy.
10547. I suppose that really they would, as a rule, be crossed with any other pony that happened to be there !- As far as I could make out they were crossed

selt with a little more bone, perhaps, and a little more size, he would keep him as a stallion. I now some of them. They were kept in hovels there—miscubic looking antuals, and certainly some of them were notound. I tould not imagine them being used as siren, or ever having produced even this fixed true of herse. 10348. They are a very small class of farmers up there that own these samuels !-- Vory small and very 10549. And I suppose would gather send their pomes to any eleo they could get for nothing, or as chesnly as possible !- They would be willing to try 10550. Did they hold out any idea that if stallings

with stellions of their own type. If a man bred a

of the stemp they described were sent, they would gladly send their ponies to them at a fee, or was it merely in their imagination !-- I think the prospect of having stollions of the churacter that were afterwards put there was received with the grantest enthudson. It created a great deal of interest, and those people can be great distances from the mountains to us. I talked to them; some of them could hardly understand me. 10551. Levi Raymows ust. —I think I understood you to say it would be feelish and useless to use a

have gathered borse in the west of Iruland. I may have gatesunderesteed you !—No; I den't think I said that. I described the houses I saw, I divided them into two closes; one a fixed type of pony, and the other a promisouous, small, shapeless borns, thought it would be useless and horseless to attempt

to breed profitable barees by the use of a thoroughlored sire upon that type.

10552. Upon which type 1—Upon the promiscours 10553. Was the promisenous type in greater numbers than the fixed type !- Well, that I can't say because when my tenr over the puny districts was sompleted that was all really I had to do, and when I went on to the "borderland" between the pury districts and the interior, I only covered a small

amount of ground, and I only speak exactly of what

3 10554. Have you ever heard that poules in the west of Ireland when around with a theroughled have frequently produced good hunters t. Shortly after my tour I had a letter which I have been trying to find, but cannot, from someone in the North of England, saying that he had had one of the had bunters he ever rode by a threeughbred house set of a West of Ireland pony; that is the only intrace that I have ever heard. My inquiries in the dissiple did not lead me to the same conclusion. 10565. Do you keep any thoroughhred stellions !--

Not now; I have done so. I am not speaking of my stud at Newmarket. I have a thoroughbred sted at 10556. Have you sold any Hackney stellions to the Congressed Districts !- Not one; I felt that having given the savice I did, my connection with the Board was closed. 1055Y. Mr. Fittermanam.-Can you divide locally where what you call the fixed type and the po-miscoons type exist -I could do so, but I con't

say that I am prepared to do so to-day. I must make the excess to the Commission that I have had a gount deal else to de, and this evidence has taken me a great deal of time. It would require use to go over—which I should be very happy to do and to send a statement on that subject to the Commission-a number of manuscript pencil notes which I made during my tour. 10558. You can't say whether you consider the fixed type to exist, purhaps, in Communes or in any particular placet—Derisinly. The fixed type exists on the sea-board and towards the West; it was when I came inland to the "borderland" that I found the promiscoous type of animals. Roughly speaking, I should imagine that the fixed type exists rather to the west of the bloe line on the man 10359. Do you remember where you any what you call the customer !- Certainly : I remember the two places where we saw what I call the melouge. They were Poxfeed and Swinford. 10560. Does your remark apply to Doneyal!-I

either !-- No, I didn't go to the South 10503. Mr. La Toronn.-You bad expressed so pinion in favour of the Hackney sire before you made this tour!—I had expressed an opinion on the Hackmry sire to energy out the objects explained to me in 10561. And the result of your tour was to core herate you in this previously-expressed opinion!-10364. And you were indusped to some extent, I conclude, by the descriptions that the farmers gave of the horse they wanted !- No: I don't think I was influenced by that at all. I mentioned that only at

didn't go to Donegal.

1056]. CHARMAN.—You didn't go to the South

a fact. I was asked to form an opinion, and I formed it independently of all considerations except what I thought was to the advantage of the country.

10145. Had you taken into consideration the post bility of breeding by a stallion that was got by a theroughbred home out of a mare that was got by a thoroughbred home !- Twelve years and I expressed a very strong opinion upon that subject with regard to hunter-breeding—in favour of st. I may perhaps to anticipating, but at the end of the Scheme while I rapply I state that, "from the point of view si

true hunter-breeding only, I have another suggestion to make if it is asked for by the Commission. I do not uround to be a bunter-breeder." 10516. I take it that for these districts you would consider the Hackney sire would be a more suitable animal than the horse bred as I have described !- Yes. 10567. Why!-Because I think the stock would be more easily saleshie.

10588. You mean on account of the action !—Yes.

10589. You found the marse there very deficient.

a action !- The mares were deficient in action. 10510. Do you think the action of the Hackney which some people would charesterize as extravagant

Mr. Burdett-

since true action in your Hackney. Of course there are Hackneys that have bad action; I am precoved as deal with the question of Hackney action from that 10071. I was only asking a question with reference to the existence you have given as regards your tour is these comprosed districts. The horse required for

the work done in the congested districts is not a very high-class one I take it!-I should think not for the local week. 10572. Do you think that high action is at all cucutial for an animal that has got to go along moun-

ton paths and earry oreels on his back and draw see-CRAIRMAN.-Mr. Burdett Contts goes into all those questions a little later on

Figure.—May I be permitted to answer that question, because it deals with certain propositions which I should like to submit to the Commission as regards profit in horse-breeding, and the most importage of them is that no effort to make horse-breeding pay can be successful unless the production of the highest type of home for any particular purpose is sized at. I think you will see the bearing of that

proposition upon your question. CHATTOMAY. -- I am only surrious to keep the questions as far as possible within the various beadings Fitness.—My object in the advice I gave was to easily the people in these districts to broad a horse

which would do their quantry work, but at the same time give them an opportunity of breeding-and the more often the better-more valuable specimens which ther could sell well.

10573. Mr. FITEWILLIAM .- Do you think the ordinary mare you saw in your tour was espable of breeding the highest type of any sort of borses !-- I think the mares were capable of breeding very largely a better type than they do now. You cannot of course jump to the highest place at once in the horse-

10574. Lord Assrows.—The type you proposed to broad there was the stepping puny !- Yes, the step-

ping pray or stopping col.
10075. Trusting as much as anything to the sotion to sell !-- Yes; and improving the substance of the zative stock. 10576. Mr. Canzw.-You say that the Hackney is only fit for getting harness produce? I think that is

use of the condusions you give in this abstract !-- I should like to explain that a some greater learth when I come to that part. 10577. Mr. Wannes.—Might not the fixed typ that you allude to in the mures that you naw largely tries from the conditions under which those naturals have lived for years ?-I should think the defects in the type might arise, and probably they may have dwindled in size from their treatment, but I don't

think the type arose from that 10078. You think that the type arose from some soial brood or some special cross originally !-- I think so. 10579. And you think that the best results would be obtained from these mares by crossing them with

a prepotent sire !- Yet; I think that is very im-10550. Do you think that a Hackney or such a bunder size as you described would be the most pre-

potent !-A Hackney decidedly. 10081. Have you had any experience of hreeling from hunter sires I—Yes, I have. I have a very claborate analysis of all the crossing that I have done in my stud. I am perfectly willing to answer of course any question that is asked me. 10682. Supposing that a really good thoroughbred was stationed in the districts you saw what do you think would be the result !-- I am inclined to think How & 1885. that it would be very much the result I did see from the bad tharoughlands with some slight improvement Country, M.P. perhaps and with more soundness, but I still think that you would get a 15 hands horse without much bons and certainly with no setion, and without what 10683. Do you think that it would pay those small

farmers to try breeding polo penies as well as it would pay them to breed the animal you have described from a Hackney t.—That I am not able to say. I imagine that the value of a pole pony depends very largely, like the value of a hunter, upon his character, that is upon his performances; whereas there is a very marked difference from the market point of view between that and a stepping cob. In order to sell a stepping on you need known othing about him except his shapes and his action.

10584. And do you think there is a demand for the class of oah which could be bred from the mares you saw !-Yes. I think there is always a demand for a good cob, I should like to say that wiss I call the best specimens—the plums—from such breeds would sell well in England, whereas the reak and also would do the local work as they do it now.

10585. You think that the produce of the Hackney with the marce you saw would be quite competent to do any work that would be re uired on the farms in these districts?—I should think so. 10586. Would crossing the native mores with th

Hackney produce marce from which more valuable animals could be beed afterwards !-- Yes, Decidedly you can boild a breed up. 10537. So that in addition to producing saleship animals a latter breed of horses would be built up in

time !-- I should think that the stoopd crop would he better than the first 10588. And the third time you would cross again. with a Haskney !- Decidedly

10182. And you think that that would produce a still more valuable animal?—Yes; I think the npeovement would be progressive.

10350. Charman.—Have you ever visited these districts since your tent !- Nover. 10591. You know nothing about the actual results?

Nothing, except from hours 10592. You have a stud at Brookfield !-- Yes; and I also have a large farm of about a thousand acres in Hertfordshire and a large farm in Yorkshire 10553. Can you give us some information about

these stude !- I perhaps may be permitted to mention very briefly the origin of my stad. I falt the truth of the two propositions which I have inhmitted to the Commission. In the first place, that in a horsebreeding country it is economically wrong to exclude from the purview of breeders the production of the harmens horse, and secondly, that to confine the sires of a home-breeding country to thoroughhreds is tautamount to excluding the profitable production of the barness borse. Side by side with that, I found that foreign governments had for thirty or forty years been experting our stallions of the harriess breeds, and that, whereas thirty years before I had founded my stod, England or Ireland used to supply itself with

harmon boroes, that at that time a wast number of good harness horses-I am not speaking of the tram good harmens necess-at me not speaking or as was not committee houses were coming over from abroad, that we had been exporting the raw material and were taking it back in the shape of a not shape of a not be taking it has been perposen. I found manufactured article for harmone purposes. I found that some of these breeds were in changer absorb of being depleted, and at first without any idea of what the stud would grow to, and certainly without any commercial object or any idea that it would turn into a husiness, I started it, being dewould varm life a mission, a season it, build ob-termined to preserve a ruelless of each of these irrech-and try apperiments in crossing. The whole subjec-citatined a good deal of publicity, and the value of these breeds as breeds as subil breeds so to speak,

with hereditary characteristics of their own, because

Ment I, 1581. Mr. Burdett. Causta, sc.r.

to important that I rather shandowed the blass of creening five comp years in order to get a storing motive of each of the process of the comp of the composition of each bit and the composition of the co

world to purchase stallions and muce for beenling purposes; and that I am generally end-ted with obtaining the highest prices for my horsess horses. onnining one rappest prices for my shall have been the The fundamental basis of my shall have been the Hackney stallion, and at least 90 per cost of the beauty I have sold have been by a Hackney. Now 10524. That is at Brookfield !- It is all the same. bred stad which I have at Nowmarket. I have some thecoughbred mores in my Brookheld stad. Since its franchition, roughly spenking, 1,500 bornes have passed through my hands, including those now in my stud. My stud now consists of 207 houses which for the information of the Commission I have closelfed according to the brents of the sires. Of Hackneys according to the hereals of the sizes. Of Harkmays purelynd these are 375, by Harksacy stablines out of coording mores 20, by Harksacy stablines out of coording mores 20, by Harksacy stabliness out of chiefer more is, b, total for the Markmay stabliness of 13. Of coords hereos pure bred 1 here 54, of thoroughbreds pure bred 8, of horse by the coughlessed seat of other mores 1, of porces pure heed herein seat of other mores 1, of porces pure heed 15; of American trotters, that is the only foreign animal I have in my steel, I have 3 marss which annual lave m my seed, I have 3 mares when I have kept for use, but I am beginning to breel, from thru; and of animals of unknown breeding I have 7. Now as to prices, I whinit the average of prices obtained at my sales by public suction. These prices obtained to any state by practic section. Income rather are manual and are composed already entirely of humans braces. There have been three—via, 1994, 1885, and 1960. As those three ables 179 boares were sold for a fetal of £52,124 4s, reaking an arvenue of £105 for each heres. Of these 179 horses average of £100 for each horse. Of these 179 horses eleven were by thoroughbred sires; their average was £102—while the general average was £185. Eight were by coaching stalliers; their average was strenge by containing maintent; then the read—vis., 1600—were by Haedeney stallings. I also submit a statement of the value of pure Haekeney, if it is any use to the Commission, the average of grices obtained use to the Commission, the average of prices obtained for stock by my leading Harkney stallion as extracted from my stallion book for 1897. Monry realised by the stock is after all the safest criterion of the value of a rire. Of Candidate's stook sold from the Brooks feld stud up to the present date for breeding purposes the stallions have averaged £1,071 Se. each stallion, and the mares £173 12s, 6st each mare. The total average for all the horses of scots sived by Cambidate and sold from this stud has been £322 Gs. 10s, such arroyal. The harcess beenes included in this average an analysis of the larger than I have been average which I have carefully prepared for the informasubtracting the full thoroughbrees which are not subtlewing are run interpretation of the previous to the inquiry there remain 403 burses hard by myself, of which 373 have been by Hackney stallions, 305 pare Hackney; 130 cet. 5 centricip macra, 5 out of throughberd macra, 33 out of half-bred mares, 9 out of pony mares; sixty-nine bave been by concluing stallion, (58 pure concluers, 8 cut of hardensy mares, 3 cut of half-bred mares); eleven have been by pony stallions (nine pure pones, two out of backney mares); and ten have been by thoroughbred stallions (excluding pure thoroughbreds, 2 out of hackney mores, 6 out of half-bred mares, 2 out of pony meres). I only give the analysis in order to above the extent and variety of my home-

breeding operations. These do not include about 500 mares in my stud served by my stalliens in 1895 and due to feel this year.

10505. Mr. Warsen.-When you allude to the grage of a purificular horse what beene are you refeering to 1-I was referring to "Candidate will now deal with the two proporitions upon which will now deal with the two proposences upon which I have stated my stud was founded. The fest is that in a herse-breeding country is is non-casically wrong to exclude the prediction of the harmen house. This I support by the fact that the demand for harness horses is certain and universal It may be so for hunters, that I cannot say; but the harness horses they are wanted all over the weld, and there is a constantly increasing demand for the best harness horses of all souts in England. I surpose it secondly by this, that lummers horses are brought to saleable ago and condition with the geninery of risk to the faccour. The horness horse has simply to be taken up from grave at three of, fed will for a few weeks in a loose box, then sun out on a halter, and if he has good action and these there will be plenty of dealers to buy him. The breader has not to make him into harmers or anything else; whereas my experience is that you don't give a know whether he can limit or not namely, that the levedor has first, as a rule, to stand the risks of making him a hunter, which are very scripes risks. I support the proposition thirdly by the position of Of course home beending is coursed on under government departments thore, and they have all the help of systematized experience and government money, and so on, and I believe the mostice of meet countries has been to emisaveur to improve their barness horses or general purpose barnes. When I was in Italy I found to my averyrise that there were 269 was in Italy I found to my integrate that the system Hacktory stallions sorving there. Then the system which I have always thoughs the right system to apply to this country or to any other country, the system of the foreign horon, of supplying a waviety of stallions in costor to enable the breaker to make a choice, is to my much a better practice than to attempt to eralls him to may particular bound. For they and harly I may port the proposition by reference to the value of harmen horse-tereding to the Eastern Counties and in Youldire-with respect to value I don't know if the Commission has had evidence. Of that I have a very long and exhaustive experience, and I should say that there is no part of England where the reterns of the horse location have been in any way comparable to those derived by the firmers of Yorkshies and the Eastern counties dem bred stallions have been located there. They have, to a large extent, disappeared under the slace free of the dunant for harness barren. I read in a nonwhite, which I believe has been believe the Corrette sion, a statement from a hunter dealer to the following effect :-- "Men who buy the highest class of harness becase for the London market do not go-into Hackney hreeting countries of England to find them." No statement could be where from find them." No statement could be waser inva-the treth. In my opinion and experience, putting axide what is called the "baroushs" heree in Louita, at least 80 per cent. of the highest priced horses in London from 15 to 15.3 hands come from Yorkshire or the Eastern Counties. In these districts the harness horse-breeder knows that it would spell rain to use the thoroughtred stallion. But he has always had his choice of doing so. That is all I have to say open my first proposition, via, that of the value of harness harse-breeding to a country.

1059d. Chainman.—Have you any figures on that point?-It would be impossible for me to give any except from my own stad. The whole of the brooding operations of my stud have been entirely under int operations of my stud have been entirely under my own hand. No mare has ever been put to a stallich in my stud except at my discretion. In the same way I had never bought a horse up to two or three

years are except by seeing it myself; of late years

I have to leave the purchase of harness horses to a I have to leave the purchase of harness norses to a great extent to my manager. This experience of the surrous in appetion has enabled me to know, apart Economy own purchases, what horses were bourns, the prices paid for them, and the class to which they belonged. And I have no besitation in saying that if pugan take as a class the highest priced harness horses, that it from 10-1 or 10 hands to 10-3, the horses you see is the Sois, and in Hyde Park in planetons or Victorian starried harges, leaders in teams, do. 20 year out of

then are from those districts which are confined to harness barre, heresting. My second perposition was that the Harkney is contially the breed for producing harness her

I argue that point with a very long and extensive experience of the Hackney. 10397. You say that to confine the sires of a home-baseding county to thereughbreds in tantameum to embufing the profitshie production of the horness house!—That is my opinion. With much respect I will place this evidence in the hands of the Commisrice. There is a great deal of is a necessary by the which we. There is a point about the Hackney type which I should like to make, and that is that the Hackney type is the correct one in relation to the drught of carriages. There are two forces by which drught seriogo. There are two forces by which dringht cas be effected. The first is the application of wight as weight. Of these an obvious instance is the cort hass. A cart horse by simply learning the greater part of his weights in the front of his centre of gravity will draw an ordinary which. The accord is nevera Of this we used to see pleaty of or messender energy. interces in the streets of London when omnibrate were drawn by tall, weedy hunter mis-fits by thorough-leed stallions; and it is found all over the auth of Europe, where light, shally horses are seen struggling and fighting with the weight behind them. A very datressing spectacle it is. The only proper method of demarks, and that which is least exertion to the

of designs, also contained of these two forces, or the borse, is the containation of these two forces, or the mean between them. That you have in the Hackeny when applied to harness work. He has solutance exerch not to not an under steale upon his evenular energy, and he has energy enough to make full use of his substance. There is a point with regard to action 10503, Mr. La Toucers,-Yee, as regards the

which I was notedprobable result of a gross between an animal with should like to state, in the first place, with regard to a point that was made by Lord Tredegur about hind scion. I mysolf carrot belp thinking that the fixing of the back which is commonly a hevalitary property of the Hackney and which no other bread passesses in anything like the same degree in the teet, would be a very valuable attribute in the buster. It would enable the hunter to jump off his bind long and to collect himself better in a cramped ame togs and to collect himsel better in a cramped place. I myself have ridden several horses that I can remember, threeughbred hunters, and nearly thoroughbred hunters, grout galloying horses, very leal jumpers, but if you got them into a carasped place it was extremely clifficult to collect them on their books. If you could give some more of this flaxing of the hook to hunters it would be better and advantageous. I was going to speak on the question avvisingerus. I was going to speak on the question of the utility of this high action, and, in my coinion, high action sithough not artificial in the Hackney has been developed by his treatment. He was origi-nally a trotting bosse. He was a horse that was put to long fast work, and undoubtedly be always had -you can see it from the old prints, and from what you hear from the oldest men in the country-great freeting action : that is to say, a natural propensity to throw his foot forward a great distance, and to a certain extent to raise his knees, certainly a great deal more than the American trotter does. When the necessity for this long work disappeared, and the value of the show properties of the Hackney increased, or whip. His natural properaity to throw his foreleg. Monax. INC. out had to expend itself accology, and gradually more. Mr. Surjeteat had to expend ment account, and governor his from his Coom, and more as he was put to a slower pass he throw his Coom, and knee up to satisfy his superfinous energy. That was only the development of a natural property. Now, if you take the reverse; if you start from a horse with high action and you drive him for a long distance the natural result will be; it won't make him any the less a read horse, it will simply lower his knee and lengthen his stride. The atlantic value of this high action has been found out in America. The American

trotter unfouhtedly has a large admixture of Hackney blood in my opinion to start with; the kirk action has been for the purpose of excessive speed heed out of him, but now, when they are the selectile value of high solice, they are able by what they call "checking and gaiting the lurse to be a knee actor," to profuse high action. I don't think that this explanation leads me to the conclusion that high notion is detrimental in any way to work, but that if you put a horse to long work you will lower the know action. It is, therefore, suitable for fast and for slow work in the trot. It is a heroditary property; there is no question about that. If you turn a Hackney more and feel out of their box the first time you will find that the foal will test and stees high alcognide its dam, while a thoroughbred foal will emter. It is a one, while a three agreement on will exercise the reversal parameter were valuable proportion of soundness I believe the flexibility to be the soundness brond that scalars in these listones. That is my experience, but I will submit submit to the Commission a letter from a man who is one of the leading veterinary esegeous in Yorkshire, whom is may peasibly be your province to call—giving his opinion of the Hackney breed, based on a very full experience of 42 years. 10503, Mr. Firstitlian.-What is his name!-Jeban. I consider him one of the best waterisory

expresses and one of the best authorities on borses in England.

10500. CHARGERY.-What is the letter !-- I will read it if you like :--"Posklington, Yorks.,

"February 27th, 1807.

"Drau Sin .- In answer to your letter asking me for my opinion of the Hackney, based on my long experience of the breed, I beg to say that I have been in practice as a veterinary surmon for fests teen practice as a veterinary surgeon for forty-two irs, and have always had three horses going, and years, note nore strays and tarre sorress going, and five for the last fifteer years. During that time I have tried all hreeds—thoroughbred, helf-bred, Arab, eaching, and blood-recond—but have not found any aximal so pleasers, either for saddle or harmess work, as the Hackney, and for style and endurance much ean equal them. I have found blood horses to do better in winter than in summer; they cannot stand the hard roads during the summer months, come the need reeds during the swimer months, con-quently not able to do half the work. The best animal for all purposes, in my opinion, is size and dem Hackery, gardson by a thoroughbred. I have known some of the best of hunders with a cross of anova some or one cess of frinters with a cross of Hadrony, the latter giving them more back not build, greatly improving their staying powers. I have also known some upleasied barness houses by a hig bold Hadrony from half-bred mares. Taylor's old 'Sir Charles got some very valuable horses from light, active out mares (travelling the same district for nearly twenty years); the same might be said of many other Hackmys. Then as to soundness, we have far more blood sorews then we have Hackneys have far more blood screws that we have macusys. A ringbone is very rarely found on a Haskney, and so often found on the blood harm. Then as to their A ringtone is very rancip found on a Haskeney, sind so often found on the blood heres. Then no to their wind, whetling and rearing, yet have amonged the hood and construing few to coo of the Haskeney. Thus the Motomy is more have go the Haskeney. Thus the Motomy is more have a second to the their sec-tion of the second to the second to the second and the second to the second to the second to the second they are either roady for sale at three off, or the fourth year they can folly the voir to a form, the horse was reined in by the hit, and urged on by spur

Mr. Buscett-/ County, W.P.

earning their food and at the same time getting startine, and stability for their work in effect years. The demand also for the Hackney is greater than any other animal, being segnally suitable for both saddie and harmes, having taken the place of the oldfashioned coach-borne for driving purposes."

On the question of tractability I think the Hickney breed is the most tractable of all. Then there is the section of andunnee. I should like to preface what have to say upon the question of the endurance of the Hackney with this chierration.—that of course a rent many of the figest harness horses are lesst all their lives for show purposes. Not for the show ring ; but I mean, if a mun has got a beautiful stepner he likes to keep it as such, and he does not ride or drive it long distances for the very reason I mentioned, that to de so would be to lower the knes action. To sak a horse so kept and used to do a long journey is obviously units, if he consent do it, it is no argument against him. In my ordaion you wight fust as well ask an untrained hunter, not conditioned or galloped or trained at all, to live with the Belvoir bitches from Coston Covert to Woodwell Head and Incit arein, as to sak show Washesen which had been used every day for fawn work to go thirty miles at ton miles an hone. It has become quite un imputation upon n Hackney that he is not a horse of endurance because people take him entirely unconditioned for long work and put him to it without thinking that a long distance sometimes requires special condition. Endurance is nonposition. requires special committon. Ensurance is uniquestion-ably an old property in the Harkney breed. They were the horses, of operar, that used to perferm all the road take the tests by which the great horses were tried in thosedays you will find them tested endurance attrely. Three miles trotted by nine minutes, and seventeen miles in fifty-six minutes corrying thirteen stone this was "Marshland Shales," one of the great emily sires of the Hadragy sixteen miles in en-hour carrying sixteen stone—this was Wroots "Pre-tender," in the carly part of the crutary. "sen give ou others, and these are perfectly authentic cases. you others, and these are persecut accurate the Very often they went thirty miles to market and thirty miles back, and I can give you hundreds of specific instances of endurance in the Harkneys in former

instances of endurance in the Hockneys in former and in recent times. 10601. Lord Harmneystra.—Was that any parti-

rainy breed of Hackney or the Hackney conceally !-I have taken three noted Hackney circs, just as you would take the theresuphbord. Mr. Canrw.-Three strains !- Three different strains. All more or less about the same time. Now, the accessity for all that long work disappeared after the introduction of railways. I would undertake in many cases of individuals amount my own Hackneys—certainly after two generations of train-ing and practice—to train and condition them to do any work and go any pace that could reasonably be saly work and go say pass that could reasonately be saked of a horse. I want to give a specific instance of my own symptoms. I have driven Hashnane and high stepping Hackneys, for the past seventeen years. I have constantly driven a pair out to my firm in Hertfurlshire, which is seventeen miles from my town home and twelve miles from my stud, and driven them back the same day at over ten miles an hour And these same horses after a day's rest I could bring out in Pionadilly or the Park, and put them on the middle bar and they would be the show brenes of Last summer I taok with me on a taur of the town. Less summer a toor wan one on a near or visits in the North of England a team of what I call postes, all bred by myrelf. The leaders were 14.14, and were by my first pany stallion, "Tenny"; the wheelers are 14.24, and are pure bred Hackneys, both in the book. After driving them for some 600 miles, generally from twenty-live to thirty miles a day, I finished up with a journey to which I call the attention of the Commission. It was made in

the Lake district, which, as everyone knows, is hilly,

The whole distance companied in the day by the trans The whole dissence companion in one day by the team was forty-eight and a half miles. I take of three and a half miles of slow work going to the station. The remaining forty-five miles were done with two step pages of an hour such at a decimal point over ten and a quarter miles an hour. The last five miles were done in twenty-two minutes, and the horses were in and well the next day. These are showy Harkneys. and well the hercary. If the are throw Harkseyhorses with high action; horses I can sell at a very
high price. Finally, I say that a few Harksey
strains are undersheely soft. The same thus
exists with thoroughlords and with most other exists with theregneress and ware more com-breeds. In the Hackney breed there have been strains where eart blood has been taken in to get greater size. This can be detected in the shape, and where it exists, it is, in my opinion, e total like for breeding purposes. What I say about the for breeding purposes. What I may about the Hackney is that he is not in his general type a riding horse. My opinion on this point differs no doubt from that of so-called Hackney men. The riding type has been greatly developed in recent years, and in my own stud I have paid special attention to quality and shoulders. If you get a Hackney with fine shoulda good home to canter; he is morely good in the gallop. As a road hack, where the chief gait is the trot, he is safer than the thoroughbred, but his action although more showy, is not so smooth or clusic. The articulation of both the fatherk and the shoulder is stiffer. I can show many specimens which do not deserve this criticism, but in the main I believe it to be correct. I prefer in the riding home to have blood on the top; at the same time it must be remembered that from the excitent times one of the shird use of the Hackney was as a weight-correlar hack, and in that espacify some specimens fetch very lvng prices in the present day. I have added a re-neura about the classification and judging of Hackneys as hacks at English shows. I consider it deserves the strongest possible centure. Unless a lasci is corrections else than a riding borne, three-downths of the houses in such clauses have no husiness to be there at all; they are simply harness borses shown in the at all; they are singly hardess norses shown in the endille, and the first price is given to the highest stepper. That is all I have to my about the Hackney.

The Continues — These hours per agent even when the world in Handway is taken and the wide final per agent and the per agent a

school-1-1 and bell 1862.

Leef Assrowers—I think withom 18 is just of, that would make it 1863.

Leef Assrowers—I think withom 18 is just of, that would make it 1863.

The state of the s

tow Harkneys, at any rate as I want them to decity. The question of one is a very important on, and unfaciltedly the Yorkshire Hackney was bigger than the Norfolk Hockney, and I am afaild is some cases cart-blood in the Enstern countries was takes into the Hackney in order to insprove size 10407. Can you tell the Commission bow the Harle

ner has developed from the beginning of the century ; asy has developed from the tegraning or the commy; haw far the breed has been kept up; how far it is no initiant breed, and so on 1—Upon that point my spirion is very clear that the breed has been very spinion is very clear that the breed has been very unrially kept up, as carefully an it could be kept up without a stud book. I have spent a great deal of my time talking with the oldest Hackney. breden, and long before the improved Stad Book ame in amongst Hackney brenders. Some of them ame men of eighty years of age, who wou't even now are their horses in the Hackney Stud Book; but they have told me the cure with which they have ixlowed certain straura, and the records that they knot which are wather oral records than written records.

of the strains of their own horses, and they un-souhtedly had a distinct type and a distinct line of stock too, which was kept clear I should my for the whole of this contary—perhaps not the whole, but for the part fifty or early years—which has been kept close of theorogbired blood and ground with

Escil.

10608, Mr. La Teucens.—Kept clear of thorough-bred blood!—Yes, undoubtedly; but there was a great deal of thereughbreel blood in the beginning, more in the Yorkshire than in the Norfolk Hackney. deal with that when I come to the question of grosse. I consider if it is nationally dome and a

benefit from the first eross is not booked for, that the introduction of thereughbred blood into the Hazkmay blood would improve it. 10609. CHAHOLEY,-And the chance sa records action has taken place from the change in the reorderments I.-Exactly.

10610. And if necessary yes could revert to the farmer action b. I think so must decidedly. You see these are very extraordinary instances, sixteen miles thes are very assencedinary instances, sixteen miles whose correpts sixteen extent. I don't think any think good the could not contain a sixteen of the could test outleaness and weight-earrying power better than that. When I had a pisson in Norrish, 2 was fourteen nation from the shall-don't by Norwich station, and it was a last read, and I had then the highest which I have over and over again driven. one or two soluntes within the hour, that fourteen niles with revuelf, my luggary, groom and servent I consider that an admirable performance for a horse.

for when you hear popule speak of feuries miles as how, they generally mean "at the rate of." 1801. You lay it down as an exists that in a home-breeding country it is economically wrong to coclude from the purview of breeders the production of the harmes horse; may I take it that you mean that the country should endeavour to produce the class of large, whatever it may be, which it appears naturally to be been suited to renduce 1... I think that a natural law would lead a country to do so, and if a country stick to hunter airea. My argument is that it is wrong to ecufus magisterially and draconically the breating operations of any country in a particular direction that may seem well to you—of course I are not speaking of you personally—that you ought to give scope to the hreader. If it speils his stock, and give scope to the hreader. If it spects me stoom, were if he does not breed profitable heroes from the Heaksee, he won't yest his reaces to there. If he gets more money by breeding hunters be will put his mares to

10312. If he can get them !—If he can get them. I timk it would be a very great mistake to try to change the supply, if it is a fixed supply in a country and the chass of homes produced in an valuable as you con make it. But I cannot imagine any district in any part of the British Islands where there would not be

would winhte breed harmest borses, and, thurefore, in my Merch 2 1897.
opinion it is treating a farmer like a child, and giving Mr. Barlethim no freedom of judgment, if you don't give him the Coun, s.r. opportunity of doing what he likes in the matter. If opportunity or comp what he miss in the masser. If I may flavorate it by the special instance of Ireland, I think the Hackney stallions in the puny districts were right. I think in the promisesors districts him Hackneys were right, but there I should place equal Hackneys and equal theroughbreds. I think in the

I should place a Hackney stallion alongside perhans half a down hunter stallions 10G13. And you lar down also, that to confine the

sires of a home-breeding country to thoroughbook is tantamount to excluding she profitable production of the breed for producing barness borses i-Yes, those 10514. I don't know whether you are aware that we have had some oridence that many of the London

southing else !- Yes, they are job masters. hat is that compatible with your axion that unfining the sires to thoroughbed bosons would be to exclude the profitable production of harmon, horses !-- May I make my answer with special reference to Ireland make my answer with special reserves to arctime. The harasse become produced now in Ireland are of two chance—the little words that go in an Irini car, very excellent little horses, but horses from which there is no chance for a fareer-whatever he makes out of them—there is no chance of his producing a high-class borse that will bring a good price; the other than are what I call job-borses, the large harmon borse, which is generally hunter-bred, often a mist, and

always by a bunter size. You have had evidence about these latter bosons. I don't know whether you have had any evidence as to the young homes that are imperiod into Ireland, grand there for a year or two and then nod as Irish horses. These larger Irish houses are in the main job-master's horses, they are tell leggy barens, and they have not much setton, and if I were to put them in my sale, which I consider a good took of the market, I could not sell them at all, Naw I have twice such for manager over to Ireland, and he is one of the heat judges of a horse that I know; the first time he travelled all over, and seme norm; use of the take no traveled an over, and earns bank without a single losso, and the second time be brought back four 16 hands hoves. I made a profit on one horse, but on the other three houses I made a large loss, samply because though they showed some action when run in hand, when put in harmess the action disappeared, and I had not a house in my stud that would equal them for want of action. These two classes predeced in Ireland leave out the whole middle place in the market. All the fine

horses from 15 to 15.3, all the horses for Variotics, noness need to be 18.3, an ten corress our Varioties, brougheaux, and Teuris, Ralli carts, and other close of vehicles that people drive themselves; this class of horse absolutely does not crist in Terland and the size capable of preducing him does not coint there. To my mind, Ireland with its great advantages for horse-breeding might add to its horse-breeding operanorm-pressing might soil to me norse-preeding operaa profitable horse for the breeder 10616. All I want to print out in that we have bad

[0616, All I want to point out is that we nave bad in evidence that it is profitable to breef hances because by thoroughberd sires, because three is a considerable demand for them, a larger demand in food than the copyly is the breefer give a good price fee Blackery, it was walt I call a builded sub-loves in the grantation of metric of the horner I real, he was taken to I related and wen eight dest prices in horners at the three there. My opinion in that the high-drock harmes incere, the profitable haures here does here here. See profit in the case of the constraint of the constrai not exist in Ireland; the partirular type which the job master uses does exist there. 19617. You told us that to make breeding pay the past of the British Islands where were with they farmen who would have some mans from which they

March S, 1887. Mr. Bardett-

production of the highest type of some kind must be nimed at 1-Yes. 10518. To return to the western districts of Ireland. do you think it is possible to produce anything of a

very high type of animal in these congested districts ! I should think it would be a long and difficult task. but I think you could improve the type 10619. In your spinion would it not be likely that the highest type that you could successfully produce

would be something in the nature of the type of the aboriginal most that is there !--Ob, no: I think you result ements improve that and breed sterning cohe with quality from a great many of these ponies. 10620. An animal that would fitted a good price?

—Oh, yes; over there. If he would fetch a good price here he ought to make a price over there. This Commemor pony was an animal that sold as a

fool for £4 10s. 10521. I am not talking of the commercial value but that class of animal having developed itself there naturally, I should have thought, that to endeavour to tupprove it and get a superior breed of penies might purhaus, have enabled you to arrive at the highest type of animal that the district can produce; not looking at it from a commercial point of view !...... don't like to argue the question on a basis that does not look at it from a communical point of view.

10622. When you talk of the highest type don't mean the animal that would sell for the highest money 1-I think the two are identical. I think the animal which sells for the most money is the best 10623. Onite en : of its type !-- I don't want to after the type.

10624. But not an relecting the one type against another, were don't mean that the true suitable for any

country or district is the type of horse that would prodore the most money for the time being !- Oh, no; I den't meso that, of course not, 10525. What do you think would become of the midlts resulting from the Harleney blood in Ireland we have had a good deal of swidence that is the best herse-broeding part of the country. I am not talking of the converted districts, the result of the bell-boar mare crossed with the thoronghard stallies was either to profuce a high-class hunter or a high-olass

and valuable carriage horse, or failing that, a good remount, always worth money, the might fetches maney as a general utility horse or ressount; what would become of the minit between the Hackney sire and the half-heed mare !- They would fatch as much as 10525. For what surross would they be used ! -The low draught purposes of sewns.

10527. To Ireland L. You: well I suppose reserv

house gravitates to England if it is good enough, 10628. Do you think they would fetch a consider-able price to England 1...No. I don't think minits of best and make a profit out of your best, you make a loss on your mistits in all breeds.

10629. You think so !- Unwestionably 10630. Do you know what price they give for cavalry remounts in Iroland!—I suppose they give 10631. Level Lowscommunt.—£35 for the light and £40 for the heavier!—I don't think I have ever brad horses by a Hackney stallion that I could not

sell or get from £30 to £40 for. soil or get from acou to acouser. 10432. Chairman,—I am not talking of you or your stud. I am talking of the small farmers t—I was not at the moment talking of pure-bred Hackmeys either. I was talking of heros that came out with. ent any action out of half-brod mares, and I think the small farmers could get about that for his Hackney missits. I should think so. Of course you are speaking, I believe, of hunter-breeding districts where the mares have size, and where the minfits

I0633. Of course what I want to get from you is

your spinion as to what the effect of the introduction of this Hackney blood would be smong the small futurers and heredere in Ireland. I gather from you that you think the best of their produce would talk a good price, and the mindte would at any rate be about the same value as the mistis from a thorough tell use or if anybody can tell me that in Ireland there is a district where there are nothing but hunter mores, and mores throughly capable of arcelacing good hunters, why then I should my here the Hackney stalliers out of those districts has I do not imagine there is any such district, and in survey district wherever you were to draw a circumference you would find a certain amount of farmers who had you would and a corona amount of favview who had mayor that would not mate well with thoroughbroks 10634. It appears to be the fact that over a very large portion of Ireland the country from some natural cause or other sooms to be particularly adapted to breeding hunters, at any rate they have moveded in producing a very superior class of animal of that sind, and I guther from you that that being so you think it would be economically cornect that is there narts of the country they should continue to direct their attention to the producing of the kind of animal I would not compel them to breed one class of laces exchairely 10635. No, certainly not t-By confining the

stallions to thoroughbreds-you do so compel them. You would like them to have their choice! -I would like them to have their choice. 10537. Then you do not think that the introduction

of the Hackney blood would have any had affect upon the experiority which Ireland has attained in the production of high-dass hunters !-- I manot say that I am prepared to say that. I should be very chary of saving that without personal experience. I have of saying that without personal expension. I have, as I shall show you, in eight speciale orcoses, brof filles from hunter mores by Hackney stallion, which filles I consider in their shapes and action and size look swited to produce hunters. I cannot my that they would produce hunters. I cannot my how the hunters would gallop, or jump, or less, but I do find in the Hackneys cartain properties of great value to the hunter, whatever properties they may possess which could deteriorate the hunter 10038. Are there not many hunters had in England by Hackney sires !-- I myself don't contile

the Hackney a hunter sire; but there is no doubt of Lies Tredgags, and there is no doubt about it that "Old Fireaway," a great Hackney stallist, get sees very good bunters, long low horses that had con-siderable staying power. This latter of Jetmon's to which I referred, states also that he has known capital hunters......"I have known some of the best of bunters with a cross of Hackney." I should imagine that meant by theroughhred stallions ont of a mere by a Hackney, "the latter giving them more back and build and greatly improving their staring

10539. Are there do you know as a matter of fast many handers bred in the same parts of the country where Hackneys are largely bred !-- I think not;

not by Hackneys. 10540. I mean head at all—are at many hunters bred for instance in Yorkshire as formerly !- The Hackney district in Yorkshire is rather circumscribed

in that district there are a certain number of hunters beed and all over Yorkshire. 10641. As many in that district as there were Hackney had pushed the hunter-breeding out, in the Eastern Counties and in parts of Yorkshire, octainly. 10642. Do you think its introduction into the hunter-breeding parts of Ireland would be likely to be followed by the same results, or I will put it in this way, if it did produce the same results would yet think it was from natural economic causes and was quarter consensity sound—IR did II though it was come, let I dor't believe it would, assent believe you hove, way which settin in some of the property of the

the Intelligent into a pair amount a second to the factor should be a good thrilling on any you think the factors should have a choice you make that they should have an opportunity of sensing shoir marks to a good theorem; belief size or a good likehough size at equal fixes it—I've. 1064. Of course you are sware that at persent morty all the Haskway sizes in Reland see Government of the Reland se

much sizes 1—Ver.

10454. And that therefore the question of choice has never been put before the farmers, for instance in the congested distincts there are no thoroughbent since as at its been compared with the Hardmay wires standing at the same find 1—Wall, the blegded condension of any at the same find 1—Wall, the blegded condension of the property of the same find 1—Wall, the blegded condension of the same find 1—Wall, the blegded condension of the same find the same fi

[5646]. Do you know at all whether buyers for keeping Government havy many Hadacoys or Hoshings been borses for reasonate in Barghand 1—L believe they he may not of their remainst horses in Breland, and I have afteredly stated that is far as action goes I considered that the special control of the properties as forwards a satisfact controlly does not extra in the formerphical in a better sim for a fixing have them the former better than the state of the properties in the state of crossing.

If Lee covered in gracing from your assewer but, you consider in pure hundre breeding districts to Westensath, Cerk, Tipperary, it would be remain; a considerable risk to have a Hackeny stalline status in gracing these with the change of farrance preferring these with the change of farrance preferring the stilling to the hunter stalling for their names!—I think these might be a risk, a very great risk of the breader using the hackeny.

10648. It would militate very much against the bunter-breeding !- Upon that I rather reserve my 10149. What I meant is you thought there would be s risk with the two put together that the Harkney might appear the more attractive from his action and showingss than the thoroughbred home for hum ter setting, and consequently the mare that had age brod good hunters to a thoroughbred hore would be transferred to the Hackney stallies —I think very likely that the Hackney stallien would be tried and my whole remarks upon this subject-it is a differs)t subject to express a final opinion on-would lead me to this conclusion, that where you have a pure bunter district I should put six thoroughbred lorses and one Hackney. Where you have a district from which hunters cannot be bred or our only be very sparsely lized, as I believe to be the one in the congested districts I should get one hunter size and six Hackneys, but I think it is entirely in secondance with the intelligence of the breeder and his self-reliance now-a-days to give him some choice. 10550. CHARMAN .- You may that you think that

the farmer should have a choice as to the sire!— Yes, 10651, And that, speaking broadly, in districts

som Heckelyr Lewes, and that in other chinests on the statement of the sta

you think the dismunicating intelligence of the average farmer in Ireland our be sufficiently trusted in that matter. You see we have had a certain amount of ovidence before us that the farmer, especially the small farmer, is influenced by all kinds of motives in choosing the sire; the popularity of the owner and sire, and a variety of things of that kind come into play. And we have had a large hody of evidence to the effect that Lieland somehow or other has achieved a sort of pro-eminence in producing the class of horse that makes a hunter, and if it does not happen to make a hunter it makes a corriage horse, peactically equally valuable, and that if it does not turn into a ling-class bunder or a first-class carriage horse of that kind, it has a payable value to small farner as an army remount or sessoral additive borse, and that is attributed by a good many witnesses to the fact that this class of animal is nee duced by thoroughland sires, or stallions which are thoroughtred, and by secident not in the Stud Book or he sizes which have a great many thoroughheed steales in those, very nearly thoroughbood; and some witnesses look with a good deal of apprehension to the introduction of the Hackney strain as likely to interfore with that amount of pre-eminence that the country generally has gained in producing that class of borse. There are two questions I should like to ask you, first of all whether, as far as your experience goes, you think that the average farmer in Ireland one bebest for the general interests of the country; and, whather if the Hackners were introduced in the way you suggest, granting that they might be very valuable in certain districts of the country, whether the Rackney, when spread through the country conerally, might not be detrimental to the general undustry of horse-breeding !-With regard to the first openion, I think that the Hasknor has extans external house which the beeder sold well it would be a

institution of his use, and of his being supplied, and I do not think that the supply of a unificate number of such Hoskury stations to a house distinct would nesterably insteries with the number sized as a breeding stock. I think it possible that the state-distant or capitals—I think it possible that the interdestate of the Hoskury blood might improve the breeding stock for insteries of the instead of the possible that has been in the first error of the branches publicate.

March & Mills. that the Harlengy stallion wight be introduced with the result of greatly improving the harness stock, and without materially injuring the hauter stock. From the noint of view of pure hunter-breeding it is not what I would suggest.

356

Mr. Budwt-

Course, M.P.

10655. Well, there is another question arises out of that. I don't know whether you or anylody could give a very definite openion about it, and that is whether there is anything in the climate or soil natural cause in Ireland which enables Ireland to compete very successfully, say with England, in the production of lunters, and whather the same career would operate to the same direction in the production of larrness lucies,; that is to say, whether Ireland naturally has any advantage over England in producing harness horses that it has over England in vendosire huntery i-That, of course, would be very difficult to give an opinion about ; my own opinion is that there can be nothing in the climate or the soil of Iroland which would interfece with the seedaction of the best harness horses, but what you want in the hunter is jumping power, speed, boos, and substance, be uporluoni in other countries if the stock exists there. I believe the real explanation of Ireland being a hunter-brendlag country in that they have always bred hunters and they have the hunter stock. believe also that the tendency of the thoroughbred stallien is towards certain deficiencies, wille it stained is towerds cortain demonstrate, while it poncesses the essential properties of the hunter there are certain deficiencies which it encourages, cortain defects which ought to be remedied. Now whether they could be remedied by the introduction of the Haskney stallien I am not pressend to give a fective

10056. Well, assuming that Ireland has achieved a certain perminence in producing hunters, the question is whather she by some natural custon is peculiarly favourably situated to produce that particular type of horse!-I should think the only course was because she had the lumber stock and kept ft. 10157. By accident i-I would not any by accident,

could not say how, but there it is 10635. It would be rather natural to suppose the as regards the industry of home-horsellar it had developed in that direction because it direction of least resistance, or the most favourable direction that it could develop in i-Wall, what does Ireland give to hunters that it could not give to other horses, what does the climate and soil of Ireland give to hunters that it could not give to harness borses, what does the climate and soil of Ireland give to shoroughbreds that it could not give to other breeds at horses. It gives to them beon, quality, endurance and those things are or value to other breeds. I surveil believe that the character of Ireland as a

bruter-breeding country is owing to the fact that bunters have always been bred there. 10659. You think if equal attention had been paid to breeding good harmon horses she would have sonal advantages over England 1-Oh, certainly 10650. I am assuming that experience shows the in able to produce a better class of hunter as a rule than England !—Yes, I think the operation of the same forces under the same circumstances would enable her to produce better harmen horses. I think so, I can imagine no reason why not. You have asked me— perhaps it is going back a little—or you put to me acree questions about the value of harmen become bred in Ireland, and I answered that you will remember by stating that the whole of what I call the widdle of the truck was left out of the purview of Irish breadbred in Ireland, the Irish car-horse and the jobmester's ored in Areland, the Arian car-dorse and the jobias have are, of course, by thoronebbend stallions reason why, in my opinion, the thoroughbred stallion reason why, in my opinion, and incorregences measure our never be a safe or profitable size of a harness horse is not only deduced from my own experience

but from the fact that you have lovel the thorough

bred borne for 150 years or more with the view of

producing one thing; speed in the callon. Now..... don't want speed in the gollep, you don't want the don't want speed in the growsp, you sen't want the gailop at all for a harmost horse. If a thoroughbred borne has action you don't like him, you say he gallops "round," he does not get over the ground. charefore your whole movement with recard to the thoroughbred has been to breed action out of him. and action being essentially the property of profitable harness horses and action being essentially absent from the thoroughbred, that is the reason why I am you cannot in the long run breed harness hereprofitable harness horses, from the thoroughbred Now the thecoughired man answers that the endorance of the thoroughlord is of great value to the lagness horses. I roply to that. The endurance of the Hackney, which has the hereditary property of action. that while I admit frankly the courage of the thoroughbecome and about races have resulted in reducing that courage, so to speak, for the purpose I am speaking of courage, so to speak, for the purpose I am speaking of sixonly to an exhibition of the createst monthle veryour or mneedlar energy in a very short space of time and over a very short distance. If hy recetion which would have made it hereditary, the thorough bond had been trained to distribute his persons energy over a lauger space of time and a langer dis the French call resistance and would have been upon valuable than it is now for the purpose of harress bucuss. If that he so, that the effect of racing has been to aim at producing great speed for a compossitively abort distance it would be equally for to say that the effect of the sim of the Hackney breeder is to produce action in an excessive degree and for a short distance possibly. I think that both peculiarities might be modified when you come to erous the two together with murnal herefit, that is to say that if you want to get a harnow horse that will go a very long distance as a great speed, for two generations I would train the Hackpay to speed and distance and so modify the height of his action. If you wanted to gross with the Hackney a thoroughtred

that would improve him and produce great sudurance and speed I would train two or three generations of thoroughbreds to very long distance races. 10661. To revert for a memorat to the questions I saked yee, may I assume that if it was desirable to breed more extensively for harness purposes in Ireland and from Hackney sires, it would be necessary in order to be successful that it should be done somewhat on the same scale and manner as it has been in England, that is to my you would require a Hackney maces !- I think not; that would be simply Interest instead the pure Hackway, that would be simply lifting the Park Hackway broad into Iroland and you would still have to start your process whenever you erossed him out on to the hunter stock. My remarks have been directed to the value of

Hackney in crossing. I have very carefully kept out of the solid Hackney excent in one or two cases 1 cuote. 16612. May I take it from you that you think that if anything should be done by the Government terrards encouraging horse-breading in Ireland, that in the districts proved to be specially suitable for producing hunters they ought to put a certain amount of spitable thoroughbred stallions at the same price as Hackvey stallions; and that in the districts which at present have been assisted by the Government and the Congested Districts Board you think that a certain number of suitable thoroughbred stallions should stand alconside of a larger number of Hackney stallions and that in view of general interest of the industry in Iroland the which zire he would send his mure to !- I think

- minerale would be to give a pertain amount of choice to the breeder, but give the preference to the chiefe to the creamen, and give the presence to the stock of the particular locality, in the form of porting down as I say, in the pure hunter-breeding districts sig lympter stallacus to one Hackney, and pier persy is other districts where hunters could not be con-I believe as a sire upon a premiscroup undersized. I believe as a vire upon a pressuccion under-sized light-honed type a good Hackney is a very

valuable sire incircal.

10663. You think he would produce a saleshie arimal b-I think he would produce a saleshie harness horne. 10664. Mr. Frezwitatan.-Talking of the race-

home, you say it has been for a number of yours bred for speed alone. You do attach I understand great surplusis to the high courage which racing has energiared in the breed ?-Yes, 10665. I mean for the purpose of crossing 1—Yes, I conflict the form in which the courses accepted I continue see seem as with the corresponding appeared by saying that the coursege which had been there through long generations of training has more recently been contracted, so to speak, mit the shape

of a milden effort over a short distance, a great effort if it had been distributed into the form of orderance. 10046. Do you think you can contract high courage into a Firsted space of time, if a horse is everageous for five minutes I proxime he is courageous all his life 1—No. I don't think that I agree with you. I think you can have a horse that could win a short race and could not win a long race; you out have a man that could scall a short race and erald not small a long race, and you can have a man who could run a short race and could not run a long rice, although the fundamental principle of courage excuts in each it has not been developed in the same 10007. It has not been trained, but still the high courage exists there !- The high courage exists, but

that a habit constantly trained and developed in a tary, and that the animal can be made propotential with regard to the property implied by that habit.

10038. Don't you think that perhaps you are confising country and endurance in what you say l—I think that endurance depends upon courage. I don't think myssif you out have endurance without courses; but you can have compan, i.e., the property which mables a horse to win a short mos, without endamance I think that endurance is a prolonged and distributed

development of sources. 10939. A nion distinction !—I don't know. 10970. Apart from that, before we adjourned we were speaking about the bread of horses in Yerkahire, especially in the cost of Yorkshire. I think you said that you looked upon the best carriage horses as spinals of a size from 15 to 15-3 t. I soul that wat ting mide the beroughe heres, which is an animal of 16 or 16:1, that the range of animal from 15 to 15:3

contained all the highest-prized harness horse Diamed all the highest-prized harness horses. 10571. Putting axide the larger horses 1—Yes. 10572. In the East Riding of Yorkshire some years

ago there were a large number of those barusche berses heed 1—Yes, quite so. 10973. We have heard in ordence that to a great extent they are not bred there now !-- Yes. 10174. And that is the result of the large breeding of Hackneys that goes on in that part of the country ! -Do you wish to see me if that is so! I think simply it is the result of the natural operation of the narbot, that the Haskney has produced a higher-priced horse, and people who used to turn their eitention to broading the coach horse, as they are peculiarly called—that means, of course, the lareache bere-have stopped breeding them, because they saw heir neighbours outsing very high prices for the Hackneys,

10675. That also in the East Riding applies to the are-a & me. uniter, which used to be largely bred there !- Yes, I Mr. Barden. believe it door neve is noon. 10576. And is now practically extinct t... Very

little heed. 10577. And you think that the produce that is head there now is and is likely to restain as valuable

as the older breeds, that is the larger coveage-horse, the hig brown corriege-hove that we used to see in the country, and the weight-carrying hunter !-- Oh, yes; I should think the Hackneys would be always very valuable, 10678, More valuable !- Very much more. May I

explain that I think the system of jobbing has had a good deal to do with it. The class of house you are speaking of is called in Yorkshire coachers. I am not spenking of the coach horse that is driven in a team: at was more an aniroal of the class of your

harouche horse 10679. But the coach horse is the baconche loose!--Well, you; it is something more, the highest type of the haroscale here, if you get it with action, I think, in the trade. If I were to show you half a I turns, in the trade. If I were to show you hair a done, which I could at my stud, of pure-bed coach horses, you would call them at once barrouche horses in the trade. But I was going to say that the growth of the system of jobbing has led to the decadence of of the system of jobting has led to the decommon or costs have breeding. As a general thing that was the type of home that the jobspatter hought, and the type of force that the job-master hought, and the hreeder did not find the prices that he gave sufficiently tempting to induce him to continue breeding houses when he naw alongside hire those high-stepping Haskneys of rather a waller sire, which also suited the gradually lightening of the build of earringer which fetched high prices for private use. not feel tempted to go on lineeding coach horns because he simply had the job master as a quatomer, and not the private hayer. I think this has operated very strongly against the hunding of the coach horse, must also be remembered what I think I said before when the Churman selest me about the history of the Hackney that the conditor or Yorkshire

my whole theory with regard to horse-breeding is Huskinsy was a lorse in his best specimens of 18-24, and even 15-3, therefore he had sice. 10490. CHATRIMAN,-Do you happen to know the height of the three stallions you parentioned t-These were at the beginning of the century, and I should broading that they were not more than 15 bands. I think, or 151. There is a famous description of one of the horses I mentioned....Marshland Shakes...-in one of those old books. I believe that in Yorkshire a great deal of thoroughbred blood was teken in at first-big blood horses, with, perhaps, a certain amount of action; and the height of some of the famous horses

of the generation preceding that which we know was greater than the four teaching Hackney sizes of recon-days. When I first poid stellership to Healescyn there were four green bereas—one in Nactolis—or were Trillities "Firsowny," "Lord Detty," and Demmerk." None of these betrees were 10.2. "Er Charles" (the size of "Denmark"), "Rajivat "Performer (the size of "Denmark"), "Rajivat "Performer" (the size of "Sir Charles"), "Achilles" (the size of "Fireavay"), Extrasion's "Parsonenon" —a much carlier horse—and others I could mention were 15.24 or 15.3. With resurd to the original were 15.24 or 15.3. With regard to the original formation of the stud-book, it is only some fourtoen our namely we health. At its freewlation it each work be relied upon an an earloads against beiler of poligrees-as, for instance, the general thoroughbrod stud-book could be relied upon at that time-but the information and the pedigrees in it were collected with information and the pedigrees in it were collected with great care from authorite sources, particularly from stallion cavid. (I shrold think that they were the real foundation of the book part of the starblock) and also from the local knowledge which I have already

stated was very carefully kept by the older breeders; there had been during the whole of the century an

ond sted-book, so to speak; but to pretend that the

Month 5 1927 Mr. Bandart-

of the general send-book would of course, to abserd 16481. Then no mores were introduced into it as what you may call impected mares 1-That was a system on which I am hardly qualified to speak, very latter fight appliest the practice of invection. and by the help of the Yorishiiesasu who came upold mrn who had never been to London in their lives book. What I felt was this those old farmers who had brod those horses in Yorkshire and the Eastern Countles deserved great credit for having stuck to the breed and kers it more or less pare, that it was upon their horses that the stud-book was founded; and that there was attached to entry or registry in the studbook a very great value in other countries-they attuded more value to it than I think it really you nonest. Then there cano along a class of people—a number of people—who said, "Oh! but we have horses that look like Hackneys, and we think beam to they look like Harkneys, they could to be admitted to the similarch," and of course that would inco been to greatly water the capital of the old Harkney breaches, and it was hitterly opposed by myself and Levil Londovicerough. Its great advocate was a member of this Commission who is not here to-day, whom I expected to see here. We won the day. and that niturely irrational system of impection has never been scorrised again. There were I admit during the period when it obtained-I think two years a great unsuber of mures admitted to the stud-book by ingression which pover had the alightest gradnews to be there; they remained in the sind-back and have been level from, and by the operation of the reles of the society it is possible to miss as animal starting from an inspected more to a so-called yore Hackney-a full-registered Hackney; theyefree while I think-I don't want to be misunderstood about this -the movement with regard to stud-backs has been of encreases value to the breeden of those house, and that the value of the animal is increasing every year that the stud-book lasts, at the same time I should be very acryy to say that became an animal is in the

Warlenge studiesis has anything like the authority

stud-book it is a good Hackney or a nofe Hackney to 10052. There is one other thing quite apart from that, you mentioned before we adjourned, which was as to long distances. You say that long distances now-

a days are not required on account of the vailways Lan-10686. That is the case in England I great, but looking at the few railways that there are in Ireland. and the long distunces that back care for instance. have to travel, and often do travel, on business, do you think that quite applies as much to Krelaud as it does to England !- My whole arranged was that the Elsekney sid not do long distances because he was not asked to, but you usual train him with the greatest case to do long distances.

10584. I thought you said they were not re-quired !—Yes, but that does not imply that they can-

200 to h.

10685. No, I was not suggesting that, but the long
distances you will allow in Yeland are still required?—Oh, yes, and could be performed by the Hackney.
10086. Lord BARRESTERL.—There is a question I was take action into consideration before the eccioryou have action into economeration before the occipe-mation of the animal itself 1... I should say that action is the very first thing. I must add this remark, that the sotion of the Hackney, and the conformation of the Hackney, which feeling and the market prove to be the best combination for harness, seems to go together.

y carefully, when you kneed, to the abcoliere
the Hackney?—I have stated myself that I

have paid great attention to shoulders and many think that they are extremely valuable, to b the harness horse and the ridiar have I think they are valuable for the harness have because I think good shoulders mean less banging of the ferelogs, mean easier action in front, and may definition of good action in the Hackney in my definition or poor across in the America in that the long should be raised as high as you like, tha higher the letter, but the shoulder should carry he there and the foot follow out. Then you get elegant. aution, that nort of action if you drive the home slow produces a heartiful effect, because he pours oface a high value indeed on shoulder action in the

10658. I believe it is rather hard to tall shoulder action unless you got on the back of the animal. In action to a certain extent. How can you test it in the harness horse !-- By the eye, and as an element in the whole of the front action. I think you can so pretty well when you see a horse run whether his shouther is really working on its gives. A small many Hockneys have, I won't say tool shoulders but the point of the shoulder is fixed, so to speak. they don't raise it enough; they raise the lose without working the shoulders, and that produces the pumping action, which is a very had feature to my mind. But I think the most beautiful salice you can have in a house is that of the Hackney with good shoulder action.

10688. As a rule do you think they have god shoulders, taking the whole of the Hackney level of homes —If you sak me whether they have good riding shophlers I should say no. I should say that very often, more often there not, their shoulders see very well placed. But I make a very great difference bewell pisced. But I make a very great difference oc-tween a well placed shoulder and a riding shoulder. For riding the shoulder of the Hackney westi probably to too thick on the top and perhaps a little too lauded at the point; but the place of the bracking in relation to the Assertus is cood in the Hackney. 10630. Nome worsk: Judge shoulders wretty much by the height of the withers, do you think withers have anything to say to the shoulders I Yes, I confee I do, I may be ignorest, but I am very feed of a good

10091 Wish without... Not on absorption bird wither for the Hankney, because that would make him awkward to look at, but I very much distins a born that is fat on the wither.

16020. Do you find in Hackneys a tendency to be light of the forearm 1—I should say not, not as a characteristic. 10593. Do you think that so a rule they stand stand on their knees or back t-Admirably, they stand on their knees. There is a certain breed of horses, the most fashionable and from a market year of view, one of the most profitable breeds in the Eastern Counties that had a nessificate, they were not exactly back of their knees, I distinguish between

that and having home out away a little underneath the borns. These bornes had the bone cut away a little but it never interfered with their more. I should say Hackneys stand very well on their knccs, perhaps it is one of their strongest points. There is one famous family of Hackneys which you would say is back of their kness and another famous family that

stands over on their knees, but they only represent two strains of the whole Hackney blood 10694. Do you think as a rule they have strong second thighes - Their thighs run down well into second things - last inight rail down are splandilly breeched horses, I should not like a specimen that had not got good second thagts, I should not say thay One associates the Hackney type with fine action.

10637. With regard to action, do you look were week in that respect, certainly not. 10495. I think you said with regard to born-breeding in Iroland that you would give the farmers a choice of stallions, that is a choice of the Hackrey man general base benddiguescot the storoughbred and Mee's a

and thorough) red, and in the long run the farmers would first out whether they were breeding right or women now is there not a certain amount of exportmenwrong now is there not a certain amount of exposimen-tal breeding in that !-- Undoubtedly, there would be. 10496. Take some time before they found out whether they were going right or wrong !- Yes. 10697. With report to the formation of the Hadrage

Stud book, did not a cortain gootleman furnish a rreat deal of the information !- I believe that there was an etter of an old paper, or he had acceptaine to do with an old paper, and he had a great deal of the records; but I am bound to say that there was a great deal of local, and accurate, and reliable knowledge brought to hear in the formation of the stud book, it was not serfed, it was impossible wasley the conditions that it could be perfect, but those who are in the knowner could speak, and are familiar with the district could speak, and are manillar with the district where each perticular Hackney was bred, know exactly how to discriminate and how to value the accourance of the horse in the start book 10098. Colonel St. QUINTIN.-I should like to ask

you, you suggested just now that you did not think you you suggested just now trist you did not thouse that the Hackney had a riding shoulder or was a that the Huckney had a riding shoulder or was a ryday faces 1—I very carefully generated that, that was a personal opinion of my own, and I very carefully quarted it by saying that remay good riding horses were partitioned by the bread. But as a type I admitted I do not think the Hackney is a riding horse myself, simply because I am a besting man and always like to ride a been with

10523. Quite so, but what I wanted to arrive at useful and pleasant riding hove around with the codingry type of more they have in Ireland i—Yes; I should say the nearer to a hunter with quality the riace, the better the riding properties of the produce would be better than the true Hackney; if you get

a tree Sunter stallies to an Irish hunter more with quality you get a better riding horse than you would if you put the Hackney stallion to the Eschney are, 10700. Quite so, but would you get as good a riding horse if you put that same same to the thoroughbred horse !-- No; not from a pure riding point of view : If you wanted weight-carrying rower

posses of view; it you wanted weight-carrying power and substance you may improve it in that respect by patting it to the Hackney. 10701. One point that has been rather pressed on us is the action of the Hackney; you do not require that action in the ridling home!—You do not. 10702. And if you had the extreme action of the Hackney it really physically would almost necessitate waste of power and possibly of endurance !- No; I

directed a great many of my remarks to that point.

I don't think it would; to put it briefly, I think if
you have a Haskney with big action and ride him for a long distance the culy effect is his knee comm down; he does not raise it so high.

he does not raise it so high.

100 May be used to be seen as the secons of the Haskney with the breed of mare they consily have in Ireland would produce a weighty desight horse that would be useful for artillery and cavely proposes with the heavy artillery they require at present 1—I have no doubt they would produce that, but I should be very corry to encourage any effort directed to producing those bornes. My cardiaal proposition has been that to make heres-brooding pay you must airs at brooding the highest type of any particular class, and to suggest a principle, or to trouble yourself over a system which would produce because for the away is simply ruining the boredor; that is my

10704. But a great deal of the horse interest of Treland is concentrated in the trooper class, not for the British army, but fer various other Governments, and a great cotlet for the farmer is the snime! that does not quite come up to the standard that he house for, and if the Hookney type was introduced into that, do you think that the produce of that would be

the cedinary mans of the country as it is now !- That Mr. Sustan. notion was also put to me by Lord Dunraven, and Cours, M.R. snawcrel it, sad I on answer it again by saying that I think there would be very little difference in the price of the two. I might say that the improve ment of the military horse has been one of the great objects which fursing overcomes uses the same grown objects which fursing Governments in prosering Hackney stellions have set before thereefver. As I said before, in Italy I found 250 Hackney stallings, 10705. CHARMAN.—Belonging to the Government

-Belonging to the Government, yes. They lad —Helotiquing to the Government, yes. They had introduced them heres partly because they felt it would improve the profits of the breeder, but they would not have introduced that close of here rules. they had been governed by the object of producing good beeses for the army. Now, what they have found good beeses for the army. How, when may have seeing is that these Hackneys do produce from all sorts of mores very valuable horses for the artillery; they produce more substance than they have not there. but for their light cavelry—to tell you all I know on the subject—for their light cavalry they are going back to Sardinia and other parts of Italy where the Arab has been a great deal used

19706. But don't you think that as far as the riding horse of Ireland is concerned for military perposes I am only touching on military pur por-poses—I am only touching on massary pur-poses—it would be difficult to got a sufficiently powerful artillory house from the Hackney and the ware of the country !-- I think he would give you a better artillory horse than the thoroughbred horse

10707. Ah. gronted. I am not thinking of that, my for artiflery purposes. You say they breed in the North of Ireland a different type to what they brood in the South, and they get a heavier home in the North; but he is not get from the Hackney bleed as a rule!--What is he get from? 10706. The Shire borns and Yorkshire coach horse

the North; the riding horse comes from the South, and I think we may fairly say that the riding horse almost necessitates the use of the thoroughbood

10700. The question is whether it would be ad-visable to introduce a different strain of blood into the areanst bread of horses as useful to the different Governments for their riding purposes and the service !- That may be the question of a gentleman who is interested in the matter from a military point of view; but, from a breeder's point of view, I should say that the introduction of the hig Hackney in such a case would enable the breeder to produce as good artillery burses, and would give him the chance of constantly producing a high-stepping harness house

10710. Do you think there would be a sufficient could for these herees that dea't quite come up to the standard of high prices — I think they would have the same cottet for military purposes as the horse you are describing.

10711. Put the ten state clearable distinct. the riding

house and the draught house. I am touching now on the riding house to breed cavalry horses, for which there is a great outlet. Of the animals that do not some up to the breeder's expectation the outlet for come up to the present Governments as riding horses for treasure and for our and only locuse in Leaster. Supposing you were to introduce another strain of bleed which deteriorated the qualities of the riding been and the light driving born, which is so well known, do you think that there would be an outlet for a producerint animal, that is, neither one thing or the other 1-If we introduce a class of borse that deteriorates the quality I suppose the outlet would be somewhat narrowed : best I dee's know exactly what class of borro you suggest has deteriorated the quality.

10712. The riding horse requires a certain shoulder!—Yes; but it requires a great many other ings. 10713. That is a very great necessity 1—Of course it is a great necessity.

Merca 2, 1881. 1071 Mer. Bardere. would Contro. 11.0. and me but I which

10714. You say you are a busting man. You would not got not no marmad wide in his shoulders and moving with that knees action, would you I—No 10 hours of the control of th

meeted—Your at tillery uses is not so particular.

1071.6. I am speaking of the carwing relievly 7—there seem a great rance beween in the early that and not very good shoulders and more in the suffery. My point is this, that for the earliky you much have shown that the carwing the control of the carwing the carwing that the carwing the carwing that the carwing the carwing the carwing the carwing the carwing the carwing that the carwing that the carwing the carw

perfect shouldin, and as a great many Hoskneys here good shoulders there is no reason at all why the use of the Hackney stallner should necessitate had shoulders—you have done well. 1017: But you think the Hackney stallion has a better back and lein than the good thereughbred hopes—For weight-acraving I should think by fix.

hores i— For weight-currying I should think by far. 1718. Bu you think he is a botter bened horse than the therosphired i— He is very much shorter betwom his joints. 19719. His canson may be a little shorter as a rule?

10718. His careon may be a little shorter as a rule?

—I think he has good bone.

10720. He does not measure as much round he has not good bone!—This I will say, that many horses with the house consensed by the combined stalloun.

of which you see itembreds serving in England and Ireland, would be absolutely rejected in Hackney stallmen. 10732. I quite spees with you, but I am speaking of the high-class shoroughlired, if you can get him, and the high-class thoroughlired, if you can get him, and the high-class thankney!—But I don't sainst that the high-slass thencombleved necessarily has pool home.

My argument has been with regard to the thereughbred that he has been bred for care thing, speed in the galden. 10732 That is correct, but if you take the highelase heres that you would brend from to get the hanter type do you get at thescophicles with so much home so any asimal in the world 1—1 deet's think you cet him with zore bone than this Hatchery.

get am with more bone than the Hackeny.

10723. No more bone, but if you can get the
thoroughbed bone is as good or better bone 1—07
for quality it is better been, became it is denser in
unbianes, but it is a long way between the jointa, and
puts the horee is long way between the jointa, and
puts the horee is long way by in the air, and the body
is abelly.

10734. Unanous.—As reports the bone itself, if

the horse were equal the throughined bons would be better—Yes; and then next come the Hankney, then the carebone. The most privas bons of course is that of the German coach-horse. 10735. Celenti Sr. Qersynn.—You apoke of the beautiful action of the Hadmey, can you have more

NOTSO. Colonal Sr. Quinting—You apoke of the beautiful action of the Hucking, can you have more beautiful action since that of the theroughbred homewho moves #—Onl 1 which so. 10726. Mr. Privantana.—The best thoroughback # —You | the driving purposes. 10727. Olicole Br. Quinting—For any purpose !—

10157. Colonel Sr. Generin.—For any purpose !— Alt I but wais. I must have a definition of this action. When I speak of action I must what is commoily called knes solice, that is action which shows so well in harmas. If you ask me about riding action, can you have better riding action than in the through

so well in harmen. If you ask me about riding ention, can you have better riding action than in the thoroughbred? I should say not. 10728. Do you prefer have action to that beautiful action of the thoroughbred who moves and beautiful

10728. By you profer knee action to that beautiful, action of the theoroghized who moves and bends his knee?—Xou very rarely see it. If you see it it is accidental.

10729. I have seen it very often 1—I should be very glast to see a thoroughbred stallion who can get

Yeary glats no see a incorregance measure, who can gre it, whereas every Hackney statissism can get this action, 10750. You may a hight shoulder gives light notice, and prevents the borns from hammering in high part—exdification of the control of the control of the countries where I have absolute action, that prevented in his absonaing the his parties foreigner will alway

legs: but the thereoghbord, while he hardly pair his feet on the ground, does not raise his most. 1973. Oh! he does 1-Well, hi is a glorist of experience. I have given my experience. 1973. But not in the same extra-again masses, 1 1973. But not in the same extra-again masses, internal 1-II we are alking allowing the first between I have given my unanger courte felseels to buy home with the first seatom, and the presilt has born that one

of the 179 house sold at my three sales only ben were by theocoghitecks, and whereas the general average was £185, the owneage of the houses by theoretheels was £109. Now that is a direct appeal to the rapket, which I believe after all is one of the safest guides ultimately.

10733. Quite so, if you can breed that class of, hores, but can the poer Trich farmer who has a very indifferent mare, on he improve that breed by putting as indifferent, well, I don't like to say that, putting a few high stem of blood than the theoregibered to it—For what purpose, hunting.

10734. To got rid of in the nurbat!—There is no

10734. To got rid of in the market!—There is no question about it that the introduction of the Hackmay into any district in Ireland would enable a mato based horses he can get rid of in the market I have measured the question about the introduction of the Hadrony into the bunter districts with a gena-

deal of reserve.

10733. Mr. Canzw.—Your main reason for recommending the introduction of the Hackney blood is to

improve the bessel of hitmess benear in Irelandi-Yea.

10738. That is that the produce would become satelable hourse satirals 1—Yea.

10737. Don't yea think if would be a deagenous expensions to limit the breed to the particular type when in Ireland now they unseer-shilly keed from the thoroughbod several different type, they get the harnter, they get the harness, and they get the trooper-I am all agistat limitation, mod I confirm

trooper I—I am all against limitation, and I consider \$ Clust confining sizes to the throughland is a grader limitation than adding to throughland in a grader 10138. Your contention is that the Hackney will produce only a hances against I—I never constraint

that, I think the Hashiney might produce extraordy of valuable mores which, if you put them to thereughheed sizes, would produce better hunters than the original mores would, and I OTJO. You speke of the introduction of Hashines by into Ruby, are you aware the Italian Government

bays reasonate largely in Ireland 1—Oh, yes, certainly, 10740. That has been given in critisine before the Commission—Oh, I know that very well, the fast remains that when they wanted—they are green hereo loring people—and when they wanted to improve their matter stock they longth, as I have said.

horse foring people—and when they wentled to improve their native stock they brought, as I have said, gradually, 250 Heckiney stelliers, and they predeminate encounts over any theeoughbred stalliers. 16741. When was this introduction under —They were there and serving two years ago, and I sheeft think they have been interedenced gendually from the

them they have been interestreet guideauty rich untime of King Victor Rammal, he was extremely feat of Rogish horses, he interdeced a certain manusation of the state of the state of the state of the the present king have bought their own citing borned in Irahand. The present King of Daly has the flows stand of weight-carrying hundre that has ever existing in the world, you could see nothing like it is decountry. He does not hand, both has becopit that first prine weight-carrying hundres at the Dellin Slow or Edyal, and is on, for riching horses. 20°-

the fast gries weigh-learning hunters at the Dullis-Riew or Ewel, and so on, for rising herees. The would prolinely recognise that Ireshod was a capital junc to get them from, but when it forms to biproving taker native kreed they do not introduce the thoroughheed stalling but the Hackery stalling, and such information as I have, and each experience as I have gizzed in travelling alread, which is not very extensive, but I have gone thereughly into the house of the countries where I have been, in that whereas. for his hunters, he will never take part in any effort is improve hunter breeding in his own country infar. Onarreau.-Tury don't bunt, do they h-Way then do they buy hunters ! 10743. They hunt here !- I kee your pardon, an learnes number of hunters are taken abroad.

10744. Lord Asstrown,—Riding larges would be the name!—Well, they call them hunters, they hunt m Austria, and Fowner, and in Italy to a certain

10745, Mr. WEENER .- Do you know that all the propers in Ireland now are chiefly brught by dealers, the breeder does not got the twope price at all, there is a profit between him and the army !- I believe

that is the own. 10746. I don't know whether you have read in the Press may of the evidence that has been given before at 1-No, I have not. I should have been ver is have reed it, but I could not get it, and I have been extremely busy, otherwise I could perhaps give more useful rebutting evidence 10047. You don't know that the people who are

credited with producing the best hunters hardly form | per cent. of the population, have you got these satisfies at all !—No, I don't exactly know what that

Mr. La Toucan.-I should like to know how Mr. Wrench arrives at these statistics CRAIRMAN.-I don't think Mr. Burdett-Coutte can

be in a position to answer that question. Witness.-I am extremely anxious to give all the information to the Commission that I can, 10748. Mr. Wanten.—Do you think, from what yo have said to Lord Dungaven, that Ireland is

penally adapted to produce every kind of horse !-I should think so. 10749. And do you think that the trade in hurners bornes or the tende in hunters is the most certain to the breeder !-- I have already pointed out that there is far less risk to the breeder of the harness bone than there is in the hunter. The buyer of the harness

naking bim, and keeping bim sound during the most critical part of his existence. Whereas—I am not critical part of his existence. Whereas-I am not sure of the practice in Ireland, so I speak with diffidense—but certainly in England, the man who breeds a hunter as a role has to make him, ride him, and show him as a bunter, and possibly give a trial of him as a bunter before he can make a profitable price of

10750. Mr. Firzwitanau.-May I sak when you are comparing the two whether "hunter" applies to the riding borse and not exclusively to the made

resition, that I do think it is a matter for somewhat grave consideration whether you are wise in confining or doing anything to confine the horse-breeding of and must always exist, the demand for hunters depends tron conditions which have already once or twice been seriously interfered with, and which may have after be interfered with again, and it is possible that busting might be either stopped or greatly distinished

in Eighand. Then you would have committed year country—you would have confined your country—to a class of heres, the hunter, which if hunting disappeared it would be extremely difficult to make a profit out of. 10752, Mr. La Toucine.—What about the motor eneral —I don't mind them.
10753. Mr. WERNOR —You are not alarmed about the motor cars t-I am not, and I certainly hope that

bunning will never be interfered with, but at the same time the hunter is a more perilous basis for trade than the barness barne 19754. Do you know that there is a good demand

mand at all supplied by foreigners now t.—Five years Mr. Burdet-age a veterinary surgeon of the greatest experience Courts, w.v. in Lendon told me that of the horses over 15.3 in London dealers' stables, eighty per cont. same from ledge of feerign horses and of the English tends with foreign countries, and I should be inclined to believe that was the case.

19755 Do you know snything about the American tends, whether roany horses come over from America?---Iden's know frempersonal koowledge very much about it. I think you might find someone who knew a great deal more. I have seen notices in the papers, and so

on, which are economic property, about large shipments of borses coming over.

10756 I wanted to ascertain if you thought there as any trude which the foreigners lave now that Ireland could get held of in the way of producing -harmes borner !- I think there is a very large trade that Ireland could get held of, granting I am right in what would be the result of crossing a good Hackney stallion on a good-shaped houser mure of size, any sixteen hands. I think that probably the result would be to produce a harness heree which would be biggue than the Huckney, and therefore also to compete with the great most of feetign corrisgs harses, which now come over here. I am not distinctly advising it, because I always reserve the question of the effect of the Hashney upon a pure hunter district, but that would be the result, I have no doubt, that we should produce a class of home which is now supplied to a

great extent by foreigners. 19756s. We have but it suggested to un overest times that all the horses that come in from America, especially from America, but all the houses that come in from abroad, should be branded or marked in some way to distinguish them as foreign borses, do you think that

would be a practical apprement !- I think it would be extremely unpopular with the dealers. 10737. As far as the breeders are concerned what here has to take all the risk of breaking him, and effect would it have on them !- I have no doubt they would like it, at the same time it may work both ways, if these horses were very good horses, and they had a brand, everybody might look for that brand. 10758. Then it is not one of the remedien year would suggest i-No. In Italy they are practically

buring these stallions for the last twenty-five or irty years. 10750. To breed carely borses !—Yes, I should say that was their main object, at the same time they give very high prices, and for some of the very best

horses they did not care what they gave.

10760. Cwarman.—I should like to sak you, to 10751, Mr. WEINCH,-I am talking of hunters make me understand a little more clearly, if you can, alone !-- I should also like to say, as bearing on that That is in Ireland the trade which lies between the two extremes, the horse used in the Irish car, and that reperier engrisgs horse or bunter. You say, which may be true, that there is very little market for all that lim between these extremes t—No, that most of the market lies between the extremes. 10761. And there is no great domand for that, no

great sale at a fair price. I understood you to say that although there is a demand and consequently a certain reice for the animal that will do for the car-driver and so co, and of course a demand for the bunters and high-class carriage horses, yet that betwirt and between there is not any demand !- I am afraid I must have explained myself budly if you have got that impression. My two extremes were extremes of type or size, namely, the little car hows, which would not go above 15 hands, and the hig borse, which I have called the barcoche or job borse, with respect to which you have had swidence. Those are two types praduced in Ireland by the use of the thoroughbred, I say that the whole of the horses which lie between those two are the most valuable portion by far of the harness trade.

10762. Do you mean that they are actually or ought to bet-Oh, no, that they are. They are not

COMMISSION ON HORSE BREEDING.

produced in Ireland, there are none, they don't exist, that was my whole argument. I mentioned a case where I sent a third class horse in that middle range who won cight first-class price. 10763. That is vacant's—That is weant in Iraland a middle that like he is the year which havened.

10788. I think you have not told as about your apprisents in crossing 1—Of source these questions have brought out a good deal of what I wanted to say generally on the subject of crossing. to make one or two explicit reservations with remord to the Hackmey stallion used for growing on other You should be certain that his blood is old. an tell is from local knowledge—and that it comes of a line in which his characteristics—that is to say, these which you wish to reproduce—have been con-stantly repeated. That is the first thing, poligros , the second is quality. It is essential that he should have quality. The Hackney has greatly improved is late years in this respect, and an environment of horn has been done to the regulation of the Hackboy by a certain class which was pushed in the trade when the breed first came posted in the trace when the account of the tests into prominence, the house with "stocky" shapes, short neck, and early quarters. You might see at the first Hackney show the type of horse that was shown, and won prices the first two years, did a great lejury, and I think reducted great discredit upon the Hackney breed. Yorkshire becses were hardly Hackney brood. Yorkshire borses were harmy shawn. Then the Yorkshire horse came to be shown, type which won the prices. And then the Eastern conties worked up to that type and produced a horse which they thought mear to it. Size—he must been its. It is a mistake to suppose that Hackneys are measurably little horses, 15.1 or 15.2 bards. I have already spoken about the size of these older horses, the generation before last. I have devoted myself with some success to raising the size in the pure breed; but it can only be done by the most pure breed; out it can only be done by me inter-careful selection and the most systematic and patient growing. I make this reservation with regard t tiss for the general purposes of horse-breeding. owne general purposes of horse-breeding. Of owne you may have, as in the case of the Con-gested Districts, small mares which it would be feelight by put to big houses. My occubation with rened to the Hackney stallion as a gotter of saleable harmenatock from half-bred mares is that—given good pedigree, good quality, and good size, the Hackney is infinitely more valuable for that purpose than the theroughbred stallion—that is from half-bred more. Well, now, I will just give you some rather interest-ing specific instances of creating in my own stud. I already gave, at the beginning of this pamphet, an stalpts of the crosses, and I now deal with them particularly. When I first begon horse-breeding I sepan as other people breed. I bought four marre, ween as other people hreed. I bought four mares, more or less hunter mares, two of them I knew wors bunter mares, and I chose them for their looks as Site brood mares for their death, and hore and

disappointing that I put them to Hackneys and gave Course we up breeding from a thoroughbred stallist. I had a very beautiful theroughbred stallion, a horse that had every requisite that a weight-carrying hunter can have, a horse called "Tructh." He got a good many yery fire huster, but he never get weight carriers.

I used him a few times; them, as I explained before, there came in the demand for pure breeds, people aware to my sted and wanted uses breeds, and I rather gave up oressing and stack to the pure breeds. I have now rather begun it again, because I have a sufficient number of each pure breed. I will seein fest with the Hackney and thoroughbed stallions on half-bred meros, that is meros of unknown breedingend without what I have called action. I did not know the breeding of the mares. I take a mare, one of the grandest hunters any mon ever rode. I rode her five years in Leicenterphire. She could improroots fore mer years in Leicesterraire. She could jump anything and gallop as long as hounds could run, and was up to weight. I put her wrice to a thorough-bred. The first foad I not at air years old for £73. This mare was not put to "Truefft." The second I sold for £7. She did not breed for three vears, but last year had a foal to a Hackney which is worth at

least double what I got for the two horses by thoroughbroin; it was a very fine feel.

1078). What horse did you got her to t... The two thoroughlynd horses. One was a horse which I think would rether not mention, became he is living now, the other was a horse called "Lord Maklen," who was

serving. He was a very good looking burne; his fee was a very good looking burne; his fee was a wood 10790. Mr. Frrzwiszaw.—A first foel out of an old mass would not be likely to be a very good one in any case!-Here I had two foels-the first sold for

10791. Lord BATHTONNELL.-What age were three when you sold them 1-They were full age. Of course they were not successful herees. I don't want to lay too much stress on these instances I am giving, it is only inductive legic, but I promised to place all the information I omid at the disposal of the Commission. Hore is another hunter mare, breeding unknown; the Here is another hunter mare, breeding unknown; sine was made to harman and driven. I put her to a theroughleed, I think that was "Truefi." Her colt was sold at five years of age for \$28. The same mare was soot at the years of age for Mon. The same mare was soot to a Hackney, the colt was a good harness here. but he had a bed blemish, and sold as a fouryear-old at Tattersalls for £50. Now, I take a big rown mare, 16 hands, still in my stud, which I bought at Tattercalle, breading unstated, in a lumber lot from Irelend. She is a fair type of an Irish hunter, but without the best of shoulders and no action. I don't mean that Irish hunters have not good shoulders, but I mean that this one did not happen to have the best of shoulders. I first bred from her by a Hackney. a fine, great harness horse, upstanding, and with plenty of action and big bone, which was sold as a four-year-Her past foal, also by a Hackney, was old for £175. a his bases with equally good action and a rare worker a log morse with equality good action and a rare worker. He was sold as a vix-year-old, after two years hard work, for £125. Then she was not to "Truefit," and the feel was a good-looking mare. There got her now-without the substance of a hunter and without the action of a harmess borse. I should say I could not get more than £50 for her. Since then the old more has been put to Hackneys continuously, and there is a three-year-old mare out of her hy a "Fireavay stallice which is one of the best in my stud. I take a rether smaller mare housest on the same day at Tattersells, with rather better shoulders, breeding unknown. If found out hy subsequent inquiry that she was a bunter, and a very good one. I have her to a Hackney, and the foal was a very fine barness horse, 15.3; sold for £185. The mare stopped breeding and I sold her. I take a very hig mare, sensithing between a hunter and a harmes have, 16 l, big frame and fair action. shouldors, and so on; they were mares that any judge

Merch 2: 1805. Mr. Burdett-Contto, N.A.

I put her to Hackney stallions, and she has beed me two of the finest mares in my stud-great slashing mares with big been, roomy frames, and were fine action. I should images that if you were to see these mares, you would say they would I take the thoroughbred and the Hackney on the Irish hunter more of known breeding. This was an Irish mare, which I rode in Leicestevilies, by "The Fenian," her dam by "M.D." She was a very beautiful bunter, rather under my weight. I gut her to a good thoroughbord, still living, whose name I will not therefore mention, whose fee was \$25. And I chose a thoroughhred with good bone. She bred a miserable horse, which was sold as a four-year-old for £15 That was her first fool, and there is that legitimate objection. I then put her to my own Hashney stellian, "Cardidate," and she bood me a bouriful user, 15.2, with good shapes, clean bone, and fair action—a perfect type of a park hack. I put this mure that was by the Hackney out of the newly thoroughbeed hunter again to a Hackney stallier and she has beed me a very fine home, with more action than the dam, and with all the original quality of the grand-dam. This is a case where we start with a hunter mare with quality, of which many are to be found in Ireland, and breed to the second generation with a Hackney stalifor with successful results. Now, I take a cross, which is perhaps not so very pertinent to this impulsy. It is that of the Hackney stallien on the thoroughbred more. I take three theroughbred mases feet:—"Arminella," a three thereughhed masses firsts—"Arminells," a mare by Massiniss out of Featulis by Chrasilier and by Massiniss out of Featulis by Chrasilier all and statistics of the feature for Massinis of the Empires, winner of the Gasan Massinisa in 1990, by King Tao. Arminella is a typical steepbelase same up to features atoms. She wou the Open Hundred' roce at Kempton Park. I haven purches to my Bischery stathus ille Peters, and the has produced a destraing a station ille Peters, and the has produced a disturbing of the Massinish and Mass out of Rosebud by Ellarton out of Contraction by Emilius. She beed me in the first instance a filly to a horse whose fee was lifty guesses, which was sold for thirty guiness. To Truest she bred a pony, of which I will speak afterwards. Again, to another thoroughbred sho hred a gelding of no value. To a Harirney stallion she hered me a beautiful mare, which is entered in the Hariney Sted Book; a which is enhanced in the Handmay Stard Hook; a perfect park hack, with the shapes and quality of a thoroughbred, and a great deal more action, easy and from the shapeler. You will renember you asked me about the action that Handmay would get out of mares with quality. This last more I put again to a big Handmay studies, and she has bred me a really magnificent more with great size, long steping-back aboulders, big flat bone, and high swinging artion, calculated I should think to make one of the finest breed mares in my stad. With regard to the pony above mentioned by the thoroughbred stallion out of the thoroughtred mare, I put her to a Hackney peny stalling, and she has bred me a charming stepping pany with great quality. The third thoroughbeed more that I take is "Start," bred in America by Glensky. She was succed in 1878 in the Conservation to "Jestor," and third in the New-market Josker Club Cun to "Silvia" and "Lean-Harries dolley the out of the first types of a big the roughkeed mare I ever saw, with great sice and depth, clean flat bore, and a certain amount of action. She bred to a bores whose fee was a bundred guiness a thoroughlind feel which was sold as a statement of the thoroughberd stallions. I then put her to one of my Heshmay stallions. She herd me a fee foal, now a yearling somewhat too light of bone for my purpose, but with fine action in both the trot and gullop.
The more beneal had very good bone; the Hackney
of course had, but the thoroughbred blood throws

back to some lighter hone in spite of her own and the generally speaking that the bone is an energous doncultr in dealing with the thoroughbred blood, whether pure or whether seven-eighths or whatever it may be. would have crossed the thoroughteed with the Hackney over and over again, years ago, if every time I tried it is had not diminished the hors and lengthened the leg. That is my general experience of crossing with the therengthered. These are three instances, which are perhaps hardly to the point, of the Hackney stallion on harvess mores with action but of mares, but they have got sotion. There is unw a case which I particularly want to call your attention to, the Hackney stellton on the pury mare with quality. This was a beautiful more; she is dead now, but if you saw her I think you would say she was a mare, that it was not impossible to find the type ofalthough you might not find anything quite so hand some as hee—in Ireland. You could either call he a pony more or a very small thoroughlend more, her hreeding was quito unknown to me, she had great enality, rather light of bone and very little action. I post her always to Hackneys. She hard me a stallion, which after serving for a year at my stud was sold for 600 gainess. That was in the days of the Hackney boom, at the same time ho was a womierfully valuable born, he served for any at my stud. This stalled had great quality and action. I put him to a strong Yorkshire mare, a Hackney, a Fireaway mare with the closet and purest Hackney blood I could get, and he bred me a far better stallion than himself, which again has hed some beautiful stopping boxes with great quality. This mare is of a type not unfrequently great quality. This mure is of a type not unfrequently to be seen in Ireland. Whether you could call be a pony with quality or a small thoroughlied, she is an admirable instance of the value of the Hackney cross mon small mares with quality. During the last eight years from 200 to 300 mores have been sent annually to my Hackney stallions 10712. CRAIMAN.—Horkopy mares !—My stud is located outside the recognized Hackney districts, and

roughly speaking, 80 per cent, of the mazes sent to my Hackney stallion have been non-Hackney mares, han ters, harmes mares, beeks, &c., old favourites of people that live about London. Year after year I have seen their faals at my stud by my own stallions, and these have comprised a great number of beautiful and valuable animals with good size and quality, and action unning through them as the predominant feature Most of the dams have been devoid of action. Time is only one more thane with regard to crossing. I should like to call the attention of the Commission, and I will explain why, to the cross of the Haskney callion and the coaching mare; the mare Mr. Fitzwilliam was mentioning. In my breeding open tions I have looked about for some method of supplying the demand for harness burses of 16 hands. more or less with fine thapse and action; a demand; now very largely supplied to the dealers by harmes borses from abroad. I find the pure Hackney as a rule not hig enough to supply in any numbers the type of home from ordinary-sized maces; the coach horse, except in the case of my own horse Sultan, has not sufficient action. In this class of horse you have to connecte with the French couch horse (corrussie) that has a good deal of action and fair shapes, and the German coach borns which has shocking bed shapes, soft bone, bad feet, no action behind, but who "it up in front. Again, the hayers of this class of borse, which is chiefly used in the landar, are very often people who do not know anything about horses, and their eye is taken by this action in front. I believed from the first that the best cross to produce the required type was the Hackney stallion on the conding mars, and I have used that eross with great success. The produce have, as I have state! above, more size than the Hackney, and more action

than in a court norms. I may have your trace extra learth of thopes and quality which are necessary when you raise a Harkney to 16 hands, to reveent him being a valour harnon horse. Now I call the attention of the Commission to this cross, because the couch home in marer the big harness homes now heed in Ireland from the thoroughbred stallion than any other breed or type, except hunturs, in England. Moreover, they are used for the same purpose, and Moreover, they are used for the same purpose, and supply a finer type for that purpose, their lines being many uniform and alarent, and their notice being more uniform and engine, and their notion better for barness work. They are the true Recibil "baronche"

thin the seach horse. They have just that extra.

harcess work. They are the true Neglish "tarcache" heres, and an old and haratful hered. Formerly, as I have already exted, the great London jobusators got most of their baress from this breed in Yorkshite. Their cantom could not have been professive to the basedon and the class of house they board toold not stand alcorate of the Hackney, with 1/a higher action and his greater maney valve. Consequently coach home heading dwindled. They were originally produced by eccasing big thoroughbred stallions on produced by grossing stg thoroughured stallions on Cleveland murss. That is the origin of the Yarkshire coach horse, and the thoroughbard blood was often them as bunters, hat I could show the Commission half-a-dozen of these mares, with respect to which I think any index of hunter-breeding would say "Pat that more to a quick, short legged hunter stallion with the laid-back shoulders, and she would breed a fine pointed in not absolutely close; but I feel sure it is a

sufficient guide to enable one to predicate that many of the Irish hunter mores would breed very good harness horses to the Hackney stalling. That is all I want to may about crossing, the relation between the breeding from the Hackney stalling and the broading successful, could, in my opinion, be carried into Ireland with perhaps not such nilestrable effect, but with vary good effect in the production of 16 hands

barness hereon.

10793. You spoke just now about the quality of the Hadronys having been much improved of late, how, by what meant-The only means by which I have been able to improve it has been hy careful selection. 10794. Among Hackneys 1—Among Hackneys

16795. Thave a vacue idea of what quality means as regards a thoroughteed horse, but I am not sure what it means as regards a Hackney !-- it is a somewhat subtle property residing in the neck and head,

10708, And produced by careful selection t— Produced by careful selection. Undoubtedly my principle has been with regard to the produce that
you are bound to ettek to the breed in order to form a firmhed stud, and the closer you stick to the bread, the more you will be able to predicate the result of erossing in other breeds.

10797, Lord Raymonssau.—Have you ever seen

any of the stalifons that were purchased by the Con-gosted Districts Board in Ireland 1—Between the letter which I wrote and my tour three months elapsed, and when I was coming back from my tour I saw. I think, sowen or civit stallings wheth had been 19798. Do you know the names of any of them!-

I don't know that I could quite remember their names now, but I know there were some very nice beeses amongst them, and there were one or two. I think very had horson—only one had horse. I have a list of them, and made very careful notes on them. 10799. Generally you approved at the horsest.—Of

these I saw. 10800. Did you find many of them salf-kneed—in at the knees, back of the knees t—I don't remember inding a caltifered horse—no. I don't remember. There was one had horse-I think he had every feelt almost that he could have

he standing more on his back tendons than if he were Mr Baster, properly formed at the knees !—Yes, I think he would. Cours, MR. I don't know quite whether you mean "calif-kneed," or simply the bone cut in under the knee, which is sometimes lossely called "back of the kneen": I have seen a lot of good working horses made like that. seen a tot or good working mores mees mee men, but I don't like it—it is an eye-sove I think it is far less objectionable than a calf kneed borne, a horne winne kases in reality bad. The howe I mean does not to the knee, and the knee in relation to the shoulder, as if he had good brose, but there is, so to speak, a hitle of the home scooped out in front—it is a great eyescer, and I always try to avoid it. There was one famous strain, perhaps more than one, amongst the 10902. Did you notice that at all in the Congested

Districts Board's horses !-- I don't remember that I did. If I tern to my notes I should find out, because is is a thing I am always on the look out for ; I have 10803. Do you object to a horse having long pasterns and standing back on them t-Personally I

am rather find of long pasters, that is, I would rather have a pastern too long than toe shoet. 10801. You would rather stand hark on the pasters than have them steadight 1—A great deal, you mean having the pasterns too slowing, rather than having them too upright. I would rather have them too sloping. I hate upright pasterns, particularly for riding 10903. Mr. Wravers.—Do you know whether there

one time !-- Well, there has been a great teads in everything in America, they are the most extra-ordinary people for rushing at a breed, almost senseleasily, then they get very had specimens of that breed and get sick of it. There was at one time a very conand get sick of it. There was at one siderable expert of those coast-horses

10506. But since that great export to America, there has not been much trude in coach-house in America 1—I think not 10807. Why were they given up 1—Because only jobmasters bought them, the use of that class of horses has some so enormously into the hands of the job-

mastees, and out of the hands of private persons. A great proportion of the people in London that have great proportion of the people in Lendon take have only a landau and brougham, job their horses, and they are the jobranaton' horses essentially. IGOOS, You have been about Yorkstone a great

10809. And has not horse-breeding there been of great use to the farmers, have not lots of the farmers made a great deal of money by it !- Yes; I have already stated there are no countles in England in my experience where house-breeding has been anything like the profit to the breeder that it has been to the Hackmay breeders of Yorkshire and the Eastern Counties.

10810. And they are a fairly intelligent lot of ment—Very much to, particularly the Yerkshire men, sharp as a needle.

breeding unless it poid them t-No. Yorkshire Hackney breeders, are they the same people who head the Shoetherns in Yorkshire some years

ago 1-Oh, I should think not. 10813. The same cow that fetched £1,000 twenty years ago is now sold for \$20, we might draw an analogy about the Hackney 1—Yes; and as bern was a solidon boom in the Hackney breed so those has neems great drop from that been down to more neems price. That been letted—and I think I was responsible for it to a great extent—it leated for three or four years, and brought a tremendous let of morey into the Eastern Counties and Yorkshire, and I think it did some harm to the breed. I think it may people the idea that if they bred anything they could get it

ation of the thoroughlued cross with regard to ausort of thing would level itself down in the end, and Mr. Tembersstance, while they have retained these properties it was for that reason I turned my attention to the necessary to the limiter which the thoroughless sions possesses. This shows that they must have a strong parmens department of my stud, because I felt I must have an outlet for my horset, an cutlet depending on the normal course of trade. And shredore when I speak on this subject, I speak not only as a breeder furee of prepotency with respect to the properties also ossential to the hunter which the thoroughtend does but us a person who has lad to foce the market. I not possess, and which you want to ingrain into huster stock. Keep some of these horses as stallings. Make have certain advantages, of course sure before you use them that they like jumping and 10814. Mr. Freevansan,-Den't you think the have poor and endurance. That will enable you "boom" was accountable in a great measure for the also to decide if they are sound in the wind, and free from any other transmissible weakness. Take the large way in which the zero of the East Biding of Yeekshire anddenly went in for Hackneys !- I think a great many more men went in for Hackneys, but cross in wherever or whenever the native steel the Hackney had always been located in the districts heccess light and woody, and while keeping to the true nunter you will greatly improve his type. This, about Hull and Driffield. 10315. Yes, but to a compensively limited ex-tent l-No doubt, there has been an increase in of course, would have to be the work either of a public-spirited individual or of a system and by public-spirited individual or of a system and by Go erument. Had I been a hunter-breeder I should have adopted this method twelve years ago, when Hankney breeding. 10816. A very large inserance A very large I suggested it, and should have patiently worked 10817. And don't you think the hoom in Hackne it out. Like the other theories which I put forward with regard to the breeding of barrens horses and have carried out in practice with a few years ago was greatly accountable for that !- I surpose it was, when the degrand increase of course the supply will increase.

10818. Do you know that a great number of farmers in that district would be very glad to get normal and never current one in practice with microsoful results, this one, I believe, would have attained its object. That is my suggestion, and I believe it is better than the introduction of the Hackney stallion, better infinitely than the constant back senin, if they could now, to hunter-breeding !-I did not know that. successive, sole use of the thoroughbred staffice, and 10819. That is what they tell me, I live in the iddle of the district!—I think, as I my, that a suggestion which if carried out would cause a great middle of aprovement in the breed of weight carrying hunters. the boom did this harm, it gave people the idea that Now there is only one other thing I wast to say, that is, I myself, consider—although I have talled a great deal and written a great deal on these no matter what Hackneys they heed, good or bad, they could always sell then, and they did no in techer foolishly, but so a staple industry in that subjects-I myself consider one cance of experience district. I think the old readsters always remained. worth twenty tens of theory, and one minute of sight-soning worth a week of talking, and if it would 10820. Chargean.—In there saything electyon would like to tell the Commission !- There is nothing be within your scope, and would be possible for you else I have to say myself, unless I may submit to see my stad, I would endeavour to arrange for a view of it with the special object of illustrating my suggestion with regard to heater-breeding in such of these crosses and questions as have arisen in Ireland. It applies to the points in which I believe that constant and appearance use of the thoroughbrod the course of my evidence as remain in my stud. I

deteriorates hunter stock. There are to he found in may state that it is divided into three parts, many Ireland weight-carrying hunters, with every property of the horses which would illustrate these points are essential to the term—tips, substance, good shoulders, short legs, hig clean flat home, quality, pace, and ataying power, cound all over, and with hard open frot. Some of these are seven-eighths bred, and from true away in Yorkshire, and if you did like to see the horses I should so arrange the show that it would be useful to filestrate the evidence. CRAIRMAN.-It is very kind of you to suggest hunter stock known for generations in the country. Some are even nearer the thoroughbred. These horses The Commission adjourned to next day, TWENTY-FIRST DAY .- THURSDAY, MARCH 478, 1897.

Mersh 4, 1006. Sitting at 12 Happyer Spram Lenden, W.

Present :- THE EARL OF DUNEAURS, K.P., in the Chair; LORD ASSTOWN, MARQUESS OF LONDONDERRY, K.G., HON. H. W. FITZWILLIAM, LORD RATEDONNELL, SIR WALTER GILBEY, COLONEL ST. QUINTIN Mr. PERCY LA TOUCHE, Mr. F. S. WRENCH Mr HUGH NEVILLE, Secretary

General Sir Jours Warson, V.C., E.C.B., examined. General Sir John Watron. by half-breds, but if I meet with a stallier, not a

10802. CHAIRMAN.—What position do you hold under the Government, Sir John 1.—My duties are to pure Hackney, not a pure thoroughbred, but who has no trace of cart blood in his poligree, that is what I purchase stellions in England, and soud them out to take to be a half-bred horse indexted for by the the Indian stude. 10804. And how long have you been engaged in Indian Government, and send him accordingly, but doing that !- Four yours very few are saked for.

10805. Could you tell the Commission what class 10807. That is a cross between the thoroughbred and the pure-bred Hackney !- Either that or a home of stallions you send out?—I send out stallions mak as are indented for by the Indian Government, somebred by a thoroughbeed out of a mare that is not in times thoroughbreds, Harkneys in different propor-tions, eccasionally half-breds. the thoroughbred Stad Book.

10008. And you send it 1—In the prepartices saked for sunnelly by the Indian Government. 10806. What do you mean by half-breds.t-It is

difficult to know what the Indian Government means 10809, Could you tell us what proportion of Printed image digitised by the University of Southernoton Library Digitisation Unit

Printed image digitized by the University of Southernation Library Digitization Unit

theroughbreds, half-hreds and pure-bred horses, Hackneys or other breeds, you send out 1—In the last from years I have send out 123 stallions, skrip of these were theroughbred, skrip-free Hackneys, and seven halfhed.

18610. Are you limited to price 1—I am hunted to 350 guinness, but \$12.00 as heres of a higher price

heed.

10e10. Are you limited to price !—I am limited to 350 guiness, but if I so a borse of a higher price that I think worth buying, I have to make special application to the Secretary of State for India, which is usually granted.

as usually granted.

19611. And what are the principal objects of the
Government establishment in India 1—The Government of Iodia samintum 400 to 370 what are called
Lauperia stablisms assimitum 400 to 370 what are called
Lauperia stablisms assimitum 400 to 370 what are called
Lauperia stablisms are proposed to the constant of the
Varianary Directions to sit to protons a resonant
can obtain the secrees of that Empirical stalling free.

The local governments also maintain what are called

Duries Board stallions, but they are usually essall a Arabe for breeding ponies and small animals. 10613. Then as for a to be Imperial stallions are temperated, and I right in supposing that the main object is to score a sufficient supply of subtable animals per remounts I—Entirely, the only object as remounts to

for the acrors.

10813. And for that purpose both thoroughbed, gure bred Hackners, and shalf bred stallices have been cried to-Yes. Arabs are also used, and a few thorough-

hred Anstealian herees have been used intely, 1984 I rappose the class of mace varies a good deal in different parts of India 1—Very much indeed, 19815. Are those different classes of stabless placed in localities where it is supposed they weed particularly unit the class of marsel—They are distrihend by the Imapostar-General of the Civil Vetenrary Department to such districts as by thinks

best, with regard to the class of mars in the district. 10816. Can you tell the Commission at all where the Hackney stallions are placed, and the kind of mores they are put to 1—No, bocases they are moved about at the discretion of the Stand officers. 10611- Have you formed any epition as to whether the produce of the Hackney stallion with the native

10617. Have you formed any opinion as to whether the produce of the Hackney shallise with this mative narras has been uncoessful and presed useful as renovants 1—1 which the produce of the Hackney stallien has been very successful. 10818. And how about the thereugh breaks — When I was in India hast winter I endeavoured to come to a decision as to which class of size we at the next use-

fail, but I was mable to give the preference to misher one or the other. The produce of the Hackary approach to me to be quite as good as the specialise of the thoroughness, but I had one specialists from some part of the thoroughness, but I had one specialists from some got versions was not as leading, sithough it was larger than the bone and leg of the thoroughness produce, but still that evidence was not very desains, and I seem bone with the convidence that there was nown bone with the convidence that there was nown bone with the convidence that there was one bone, with the convidence that there was nown bone, with the convidence that there was nown bone, with one conviction of the conviction there is not the conviction of the convictio

10619. You think the produce of the Hackenry is equal to the produce of the thoroughbred in endursance and starning.—I could not answer that question, because it can only be decided on a campaign, and the practice campa that we have in India are not sufficient test for a point of endurance.

10850 Cha you tell us when Haskneys were first introduced into India; how long have they because there to be the there to be a second of the tell of the there to be the there to be the there to be the there there is not being the to describe the tell of the there has be been plant of concertually

I bhink a few were sent thirty-five years ago. 10831. Then there has been placity of opportunity of swing the result!—No., 10837. What is your opinion about that !—My cylmion is that the introduction of the Hackany state.

lies upon the Indian mure has been attended with great advantage.

16623. Improved the mares, the race in fact 1—I should not say that it bad permanently improved the

rece stallion are very good looking.

Looking Looking to the state of the state of

swoon. How have you formed that opinion I—That is my private opinion only. I don't think I am ouplosses the property of the

confine are there is a conference of the Histories, which is that they could from them the best remounts, the that they could find the that they could be that they could be that they could be the that they could be that to be recentful to our breeding of remeants in claim we require and in our breeding of remeants in claim we require and the pure said ancient Indian mean, many of which these are in India now.

10087. Are the owners of such animals could be required that the proposering their poligracia. No; far of them have

written politically and the factor of the familiar variety of the variety of the familiar variety of the variety of the

ment in the way of encouraging good mares — Yes; that is all, with the exception of prizes given at horse shows. Here shows are hald all over the country, and prizes are distributed to mares end produce. 10830. Has that been found to answer well — Yes, undentited;

undeabtedly.

19831. Level Loussemman,—You have seen, I suppose, the second cross of these Hawkneys pot to Indian marca. Here you ever seen the produce of this again.—The third cross?

10652. Yes !—I may or may not have seen them, but I have no record of having seen them.

10833. I think you said that you thought there was no permanent improvement by means of crossing the Hashneys with the Teelinn maves. Does that mean that you think that the third cross would not be so advantageous as crossing that with a different class of horse 1—I apply that idea to all English blood whether Hashney or thoroughbout another than the production of the production of the period of the perio

1033. Chamana — Antendina also — Essaely the same. There is no difference in that point. We have used theoreachined stallings for 100 years, and I think they have left an personant trace of improvement in India. The Hackmays we have used for twenty-drive or delay years. I don't think they have left any personant improvement us to herend of I folia. The best and handworker represents I are in India have your were the proches of Hackmay shallows not of 1033. Left Deveropment — what we may be made to the proches of Hackmay shallows not of 1033. Left Deveropment — what we made more than the proches of Hackmay shallows to the proches of Hackmay shallows the proches of Hackmay shallows the proches of the proches of Hackmay shallows the proches of the proches of the proches of the proches of Hackmay shallows the proches of the proches of the proches of Hackmay shallows the proches of the proche

or what size are those marss by unperfed Araba !
Detween 14.2 and 15 hands, as a general role.

10356. And what is the height required for remounts, what in the smallest yet table !- For European

troops, 15 hands the minimum; for antire saviley,

10637. And I suppose a great many animals are bred considerably smaller than that that are no use to you for remounts 1—Yes, there are many animals under 14.2, and as I was saying just now the District Breach variation 180 vallations and their needons from

United 18-2, and as a was saying lists into one of south of the produce from said being produce from said marce is not much more than 14 bands.

10333. If there a march for that does of animal or what becomes of them 1—There is a constant models. 10333. Do they looks anything like resumentative prices 1—Ob, they foods anything like resumentative prices 1—Ob, they foods are good prices. The prices of all the bosees in India have much increased in the

10840. And you attribute that to the importation of these Huckney and thoroughbred horses!-I can hardly say that, because we have imported thoroughbred stallions for 100 years, but the price of horses has only risen for the last 20 years 10841. Of course you see a good many Hackneys in England when you are making your selection before 10842. Do you see a great deal of difference be-

Monk 6, 1805

General Sir John Wetsun,

tween them, some very good ours and some very bull ones, that you came across personally or do the dealers submit to you a certain stamp of home that they know you will buy !- There are good und bad of course, but I see a very great sameler, a very much larger proportion of good Hackney stallings than I acc of good thoroughbred stallings, that is to say, I could ensire select 30 or 30 good Hackney stallings

than I could select ten good thoroughland stallions, 10843. Mr. Properatable.—At the price you are 10844, Lord LONDONDERRY,-Which would you think-if you were limited to one or the other, either Rackney or thoroughland-would breed the best class of horse for your purpose in India, if you were

limited, and therefore I have never considered the 10845. You think the results are equally good from both, you have no fault to find with sither !- Used in districts to which they are most suited, I think

they are equally good. 19846. You have not, I suppose, seen any of these rough mores, and pony mares in the concested districts !-No, I have not seen them. 10847. Mr. Frezwittian.-I suppose from the number of years that the Hackney has been in India that there are now a certain number of penerations existing there half-bred I-Oh, yes. 103-6. But I gather that you think that the second and third and fourth generations have not improved that there is no great improvement !- I think there

made either by the Hackney or the thoroughbeed. 16849. Then should you like in breeding to go back with these half-bred mures to the Indian horse as a stallion i-No. I should like to been more bred mares, pure Indian mares of pure breeds, and breed remounts from them by English horses. 10810. Then what you prefer is the first cross !-The first cross. 10851. Pure Indian mores and pure English stallions !-- Yes, for recognite, first cross.

10852. What size of Hackney do you prefer for India 1-From 15 to 15.1. 10852 Lord RATHDONNELL .- I think you mentioued Arabe and Hackness and thoroughlyeds as being stallions caledy unci in India; is there not snother, the Waler i-There are a few. I believe that Veterinary-Colonel Hallen is coming here. He is rovided with all the statistics as to the numbers of horses in India, in their proportions 10854. Have you ever seen any of the Walers !-Yes, I have. I now ten last year, Australian stellions with thoroughbred Roglish pedigrees, that is to any

descended from thoroughbred horses imported into Australia.

10856. Is that what you call the Walte !-- That is what they call the Waler. 10816. How do they compare with other stallions? The English thoroughbred stallion to 10857. Yes, and the Haskneys 1—You cannot conpare them with the Hacking, but comparing them with the English thoroughbred they have larger bone and better fret, the Australian denomined of the English thursughbred has much better boue and much

Printed image digitised by the University of Southampton Library Digitisation Unit

Printed image digitised by the University of Southampton Library Digitisation Unit

Walers -- No.

10859, Sir Waxeen Gillery,-Are those Wales. that you alluse to prove theoroughtend on both sides stre and dam from English stock i-You 10860. But the Walter that is known in India for 10561. The hove commonly termed the Waler is not a thoroughtered heree?—No, he is a house less on the great runs of Australia from any sort of ware. but they are all descendants of Eughah horses

10862. But not from the registered thoroughbred horse i-There is an enormous mixture of them. 10503. It is rather important in the evidence that you should define the difference between the Walson you are allooking to when you used they were the pro-duce of the thoroughbool horse. I want to know see the sire and dam thoroughbred!—Yes, those imported to India for stallions are. The question I shirk was regarding Waler stallions, the Government have lately imported a few from Australia, thososphired Australian stallions with as pure pedigree as any thoroughbred home in this country; the pedigree is maintained in Australia in their stud book, there is an Australian Stud Book 10854. It is recessary that the horses that are bred there should be for enderance in India in case they should be wanted for an contratney, for war, therefore

you have bad no experience as to how these different growen with the native more from different stalling. turn out !- You, as I have said, we have been breeding for one hundred years, and in many of our Indian wars, the stud-bred horse, as they call him, has been well tested. There has been diversity of opinion as to their endurance, but I think the evidence prevails that the Australian bose does not surjust the stud-keed bose in codurance. You will find one commanding officer of a regiment say: "Give me the Australian Wales," and matthey say, "Give me the stad-breds," but there has been no distinct and decided prevulence of ordinion in favour of one over the other. 10805. There have been remorts nublished every year from India on the secolt of the breeding in the various districts, I think you said Mr. Hallen wealth produce them, it would be very neeful that we should be famished with these reports 1-- The anutal report of the Civil Veterinary Department of India gives all the statistics every year, most minute particulars. Mr. Hallen, no doubt, will have the book with him 10816. Colouel Sr. Quistus.-Are you able, Sir John, to get the number of thoroughlyeds, as a rule, that are indented for by the Indian Government :-Hithorto I have, but I have never been asked for more than twenty; I think that if I was asked for more than twenty I should have great difficulty in procuring them. When Lord Mayo was Vicercy of India he took a great interest in the study, and he said he was perfectly certain that ten thoroughbredstalliess, suitable to the Indian stude, equid not be found in one ear in England and Ireland. I think I might find

and limb, and book which in required for the Indian stude is very rarely found among the thoroughbrois at the present day, except in large borses and very expensive horses. 10887. Were you in favour, from what you may of the Azetralisa home, when you were out there lust, I mean, of the Australian stallion !- I saw eight or ten very good oues. They were all of thoroughbred English 10848. blood 1-Yes 10869. Speaking of endurance and the test of endurance, did you ever hear that, according to the statistics of the Afghan War and of the Boundary

twenty but not more, because the perfection of buse,

Commission, where they had every class of borse, the stud-bred, the Barb, the Waler, and the Arah, that they came to the conclusion that it was the age more than the breed of the horses that determined how they stood the hardships t-I have not board that. 10870. That the horse between six and ten stood 10858. Did you see any of the produce of these it best !-- I have not heard that.

1047) Mr. Warsen, - Before yea had the amoint. eart of buying stallions for the Indian Government, as a carnity officer, been always very much interested

10:572. And were you many years in India !-That weight. tosta. So you lead great opportunities of sociar

all the study of native horses there !- Yes. 10:574. To what do you attribute the reversion of all the borses to the rative type in India !—I won't all the norms to the mative type in 1931s :- I won't ay that they revert to the instive type, but my beheft is—a helief which I am not supported in by many people—my belief is that the eres between the European blood and the Asiatic blood always deteriseates in the third and fourth governtion. I conclude that this is the reason why, although we have

been breesling from English horses for a burshed cars, yet we have (as far as I can see) hitherto mode re sermanent improvement in the Indian houses. 16175. Were you recently in India inspection cite's !- Yes, last winter.

10376. Did you inspect many of the study there. and many of the stations where the Government stol lians are located !-- Yes : n good number of them, and

amonded neveral fairs. 10517. At the fairs do they give prises, or see the 10517. At the thire on they give prizes, or see the fairs markets for sale !-- Very considerable prizes are given, and soles are also effected.

10378. Can you say what horses won most of the prises, or if you wore able to distinguish whether one lessed more them another won primes !- No, but Veterinary-Colonel Hallen can give you the exact 10579. Did you make any experiment to try whether you could test the appearance, whether you could tell what stallions the different horses were get by!-I did try once, in company with the Inspector-General of Remounts. We ordered the dends officer to take out ten free-weer-old recovered head Hackneys, ten by theremebbooks and ten by Aralia. and mix them all togother, and then we went to the

stuland relected what we thought the tea lest rewounts, and then sent for their pedigrees, and I think five were by Hackneys, four by Araba, and one by a thoroughbred; but I should not camidae that a very reliable test, though I think it is quite sufficient proof that the Hackney used in the proper districts gets quite an good remembre as the thoroughlood.

That tool showed, of course, a great appropriate last I dan't think it is a test you can rely upon altogether, because we had no record of the mayer that they come 1080. In purchasing stallions, you have tried to

1081. Have von looked at many of these half-bred stallions, or is it hard to find them !-- I never found one that I eased to send out to India, but because ther were asked for I have sent get three or frue. 10882. But you have looked at a great number !-No. I den't find a great number.

10883. They don't coist, as far as you are assure? -I dea't think they exist; I never find them. Occathercoghized set of Hackney marcs; I don't think that they were an good as the pure Hackney or the more theremaking 10884. Do you know at all what the result has

been t-No, I don't; they have not been there long 10555. In the occurs of boying burses have you sees over most of the Hackney stude in England !-

Been over a great many, not all ; it would be a long 10186. Have you seen the horses belonging to the Congested Districts Board in Treiand, the stallions

-I have. 10887. Did you form any opinion of them gene allyt-I thought they were n wenderfully good

10588. You looked over them enrefully !-Yes 10839. CHAISMAN.—I suppose, Sir John, in buying General Str. these Harkney stelligns you would be ruisled in your John Wetson. shrice as to shape and action and so on by the know- v.o., s.c.s. ledge that they were intended to get herees suitable for ridge the Cortainly. I slower select if I can a Harkney stallion that looks likely to produce a riding hove, rather than a driving horse.

10090. And I take it that your graeral epinion is that from natural reasons the Western horse, the European horse, preduces no permanent effect upon the native breed in India, but I gather as you did not mention it in the same category that the other Eastern.

horses would. Has the Arab produced any permanent effect !- I am not sure whether he has or not 1689). And you consider the most suitable animal for remount purposes is the first oross between the autive mare and the pure-bred or usually pure-bred Eaglish losse, whether thoroughbeed or Hackney !--

10892. Is granting free services in this way to branded mares do the Government retain any right over the 10813. Name whatever !-- Name; the only restriction is that recognic officers are not to buy branched

1089s. Do the Government keep any mares of their own to brood from !-No, they used to, but they have entirely given it up.

18355. Since when t. Colonel Hellon can mention the exact date when stud breeding was given un 1000G. All that the Government does is to provide there Imperial and district stallion !-That is all, 16897. Do they toyed the somer L-No they have fixed stands, and the remount officers attend the fairs, buy the young ones, and turn them out in large runs until they are four year old, when they take them up and stable them and mount them, and make them

1000s. What is the price they give for remounts ! Por vesmo ones ? 10508. What are do they generally buy them !-At eighteen months 10100. That would not tell us very much-but what price de they give then 3-Between 300 or 400

supers, I think, according to the value of the animal. 10901. Do they buy any three or four year olds !-We the savelor officers buy the three and four your alds. formed any oriniba or can give us now existen on the subject of the most spitable animal for beens, in England and Ireland, whether the cross with the Heckney is likely to be perful or not 1-No.

10004. Mr. Preswantan - Do I understand you to say that in the case of breeding you would like to rut an English stallion to a pure-bred Indian more !tioning the breed 10915. But to a half-berd more you would under

to put to an Arab. I thought you had said that. I was not onite sure. I thrown t very had said that to Van Don quine sure. I throught yen and said that to Lord Londonderry in answer to a question t—No, I Am't thick I said that. I said that the best reeden't think I save test. I save test are over a reaces siend by Arabs. 10905. CHARMAN,-Is there say other information

you would like to give us !- I think not; if my epinion upon any general subject was saked I might, best net otherwin 10907. I don't know whether you have formed any

definite evinion as to the Stress of the Hackner sire for getting an animal suited for harness purcosus. mean at logge in this country !- I have no doubt he is a particularly fit animal to do so, and I think he is a very fit animal to get riding horses too, and I think ren can set ten sound and useful Hackney stallions to one sound and useful thereughbred stallion at the same price, of course.

Merch 4, 1971. dr. Clowest

10908. CHAIRMAN. -- You live at Newcontlean-10000. Where you practice as a Veterinary Sur-geon 1-I do. I am not in general practice now. I gave up general posetion in October, 1880. I only do work of a sposial kind now. Consultations and ex-

eminations and entile inspection work. I am Chief Inspector for Northumberland and also for the city of Novemble on Time.

10910. And you know that part of the country pretty well !-- Yes; pretty well; I do.

10011. I mean pactly well as regards borsen!—Yes. 10012. Are there many become local in that part of the country !- No, sir, it is not a great breading country; it is a large manufacturing district 10013. Have you got any opinion as to the general character of the mores that are bred from there !-- Wo have not a good class of brood marcs, that is the great trouble and the great cause of all the disappointment there to the ordinary factor who just has a non-pedi-

greed sears, and breeds from a half-beed cast mare or a little harness more. 10914. Are you speaking of the country generally? Generally, it refers to the whole of the Kingdom,

I believe that, 10915. Has not the Duke of Fortland a scheme for the breeding of half-beed horses !-- He has 10916. Do you know anything about that !-- Yes, I took a little interest in it. I was at the Duke's show at Welbeck had summer, and I was also at Bothal, mar Morpeth, shows that he gets up at which by gives prizes for the benefit of the tenantty. They larve to show horsen that are sired by the Duke's horses. The Duke finds the very best sizes. And at the lenchese at Welheck he said that the great trouble was the want of good mares and to recordy that he bought a Yorkshire Hackney stadion with a view of

the filler got by the Yorkshire Hackney stallion being kept to breed from. 10917. What is the character of the marce 9-I 10918. I mean the mares complained of !-- I think want of size, want of character, being weeds small

animals and not good enough to put thereoghbreds , to. II may say in connection with that that when I saw the Duke's solvense in the papers some two or three months ago, that he was baying mares to lend to his tenantry to breed from, I wrote to Mr. Turner. the agent at Welbedt, and saked him what was the result of the buying of the Hackney stallion, and he

replied. That is his letter. 10919. Will you read it ! Piteum reading. "Duar Siz, Referring to your letter of the 56th ult, the Yorkshire Hackney stallion, . the Dake of Fortland bought last year, served between thirty and forty of his tenants' mores, and we hope that the fillies, the process of these mores, will in time be put to one of his Grace's thoroughbred hones. course it will be several years yet before we would be able to see the effect, but I will not fail to let you know about it. In the meantime you may be inter-ested to read the croilcost which is rather a hold scheme on the Dube's behalf. That is this scheme, who privacy you have seen, that was sent out to all the treastry. "He is determined if possible to make

the tenante breed good animals, and now we are purchaoing mares for them, we are roing in for Yorkshire coaching mures and I think they should do very u cil with the thoroughbend house." Upon the receipt of this letter I wrote back to Mr. Turner and told him that I had been asked to give evidence before the Commission, that perhaps he had also been solved I said, "If you are not asked may I quote this letter." He replies, "I have not the slightest objection to your quoting any part of my letter to you, if you think it will be of service to your evidence. I

do not think the Commission are Blody to call upon upt." You see his Grace is buying coarbing mass. 10320. I was going to ask you, up to the femaline of this acheme from what class of animal dai the tea 10921. And that is still the object eventually t-

10013. The introduction of the Hackney being I are

pose to give bone and substance !- Substance and

10933. In there saything more you would like to my on that point !- No, except that you will observe that they are buying coaching mares, and of corns you profestly understand there is a difference between the Yorkshire coaching horse and the Chreinel horse; the Yorkshire coaching borse has a cross of thereographed blood in him, he is much lighter with

finer action, steps up high, a very valuable hursess 10924. Have you formed any general opinion as to the soundness of the Hackney as a breed !-- I thisk as a breed they are remarkably free free unsoundness. 10025. And as to their endumnes and startes I-

I have not much experience of the endowerse of the Hashney except this, I have observed for about these years three herses coming into Newcastle, one in single harness and a pair, certainly the three test horses that come into Newcastle driving, pure-bred Hacknoys. I wrote about a fortnight ago to the owner and asked how they were bred, knowing I was to come here and I found they were all pun-tend Harkesys and all by "Withfire." They step ligh, go fast and keep on going, certainly the three best learness homes I know of, and show a great deal of

10916. Have you had much experience of half-level

Hadineys 1—No, I have not; there are very for hed in my country. You were asking me about the soundness of the Hadineys, well, I have examined for these Hadineys for a long time, I have examined for the Royal Agrandound Society of England certain time. The fact the Royal Commission, I am other times, also for the Royal Commission; I am acting for them again next week. I have also examined at the great Yorkshire Show for the last three years, along with Mr. Cope, Chief Veterinory Officer of the Board of Agriculture. Well, in examining horse at the shows we examine by number, I don't know on of them, therefore, I keep no record, but I know that Mr. Cope did keep a record of the Yorkshire exuminatiom, and I wrote to him asking if he would give me the record of the Haskneys for the last three years and I got this from him :—In 1894 we exerting 15 Hankney stallions and rejected 2; in 1893 we co-

sminod 13 and rejected 2; and in 1896 we exacted 14 and none were rejected, that is we exacted 43 Hashney stallings, and rejected 6, and it is only fair to say that one of these horses rejected was afterwards passed sound at other above 10937. Lord LOSDONDURRY.-Who writes that !-I got that information from Mr. Cope, of the Board of Agriculture, he has acted for a long time for the

Yorkshire Society, and for three years I have senited 10528, CHAIRMAN.-I don't know whether put have any knowledge of Iteland !-- I have been two or

three times there. Some years ago I used to go over there to examine hours.

10929. Lord Louresuzuars.—These would be

hunters !—Yes, and thoroughbreds. 10930. Gramman.—Have you sufficient knowledge to form an opinion as to what bread of stallions should be encouraged in Irritard in order to gaperally in-prove house-breeding in the country I. I think the first thing to settle upon in what sort of mases here you to put the stallices to, is in hitle consequent what stallices you send if the mases are not adapted

For instance, I saw a great number of small mores lately, blood mares, and those put to a thereighteed, I think, would be a failure. I think the light blood mare of the country would be imthe light moon mans of the country would be imthe march you are going to breed from.

of the Duke of Portland's, the idea is to henry in the Harkury gross ours and go back again to the threeuchined i-Precisely ma, that is the present scheme to not the thorough level upon the You'rehire mase. \$6532. Is that your idea as regards these light 16002. Is that your time as regards these light blood marres you speak of in Ireland, that there should be an introduction of the Haskney blood, and that would sive sufficient storming to make these suitable for the thoroughbred !- Yes, I think you would get substance, straighter legs and feet, and action, and

schelarce, streighter legs date area, and access, and the goldings would soil well, better sellers than if by a thoroughteed. They would be sold for harmon bross and orners willby horses, and the mores byed 10333. Would you consider Hackney action dute. she in a hunter t-Cortainly not.

10034. And the mare would be improved by the Backney !- Yes, and it would be taken out arms by the thoroughbred. H0035. You don't think that action would go on for governtions ?—Not if the horse had struight action and was uniform—one piece like another. I think that he would stamp his progeny. We must always resember in breeding, whether herres, cattle, dogs,

resembler in Receiving.

To blink the sale gives the external appearance to the program. You get colour, shape, the, and makings from the size—all the external chause ocidies. I believe that applies to breeding nearly everything you breed-positry, and hirds, and every-

1038. I don't know whether you formed any opinion as to the quality of the thoroughbred sizes in Inland !- I cannot do that. I don't know there.
1027. For this chan of light mane you would prefer sound suitable Hasknay stallion to an equally sound sound suitable thoroughbred i—I would. I think there is where the control is a small, went there is calling as little value as a small, wenty throughbred. These kittle thoroughbreds generally turn their toss oil, and are ill-shapen, and only make a small price.

and become slaves in cars and cabs.

10038. Mr. La Toyonn.—You have been at the Deblin Horse Show !- Yes, sir 10939. And seen a number of very valuable hunters

10940. Would you think the sweeter and value of the bunters in any way enhanced by the fact that there is so admixture of Hackney blood in them!— Backusy stellion. 10941. I did not mean to bread a breater from

1094). I did not mean to breed a bunster from a Eachusy stallion, but to breed a bunster cut of a face got by a Hackney stallion 1—Certainly, sir. 10942. We breed very good hunters without having that -- No doubt of it.

10943. You den't think that the hunters are es banced in value by the fact of their not having this west. If he has substance and is up to weight with quality, and all you require he is better without 19944. You think he is better without it if you

un get the substance in some other way !- Yes, if can get the substance and shape; but I am king of the little maces I saw in Dublin and Staking of the little maces I now in Leanne shoot Sildare—small, light, weedy mares. I think there is made recent for all kinds of boress in Itsland, and there is nothing still so well as action. Nothing 10945. The fact remains that Ireland has got a great character for one particular breed, and you shall that that breed is better without an admixture

10946. I take it that you would consider that it is ' Mové & int. dangerous experiment introducing blood that you Mr. Chrose think might have a deleterious effect upon the hunter Sosphenes. breeding -You must perfectly understand that I sacva, would never think of introducing a Hackney open a mare that is well adapted to breed a hunter. It is the great many missit mores that would be improved by a Hackney. If I had a more that I thought good by a Hackney. If I had a mure that I moregue peco-encount, with substance and shupe and soundness, to breed a hunter. I should run her to a thoroughboad if the mare was right. 10347. But this misfit mure you speak of. You

think that if the way put to the Hackney she might produce a mayo that would be expeble of producing a harness horse. You are certain to get a valuable

10948. Do you think that hunter would be as good as the ones we hered now !-- It might not be an fact but it would be u valuable saimal. I am sure of

10040. You say the sire is apt to mark its personal accourance on the produce !- That is so, 10550. Do you think the head of the Hackney is calculated to enhance the value of a bunter !-- I have

seen Hackneys with very beautiful heads and thoroughbreds with very common boads. 10851. Did you see the Hackney stallions that are the property of the Congested Districts Board !- No.
10052. You speak of the soundness of Harkneys.

I suppose one of the principal causes of announdness in horses is undue exertion !- Severe exertion, that will account for a great many unsoundnesses, breaks down and such like.

GOVER Abo were man.

10003. I mean to say not only sovere exertion on
the part of the animal itself, but on the part of its
properitors!—No, I think you're going a step further than I can follow you there. 19954. Take the case of a sire and dam who have as to become ungound. I suppose you would think that rould depend on the character of the ansonainess. would depend on the engagement of the management.

If it was simply a breakdown, or a split pastern, or
anything like that I would not expect that to be
transmitted; but the hereditary unacondness, there

is no doubt about that 10185. But as receptly the individual animal himself, of course the life of a thoroughbred barne that is got in training as a yearling, and has to submit to the greatest possible exertion of which he is careble, is more calculated to try his uncoundness than the life of a Hackney horse !-- You will find out the soft places scener. It is an unfortunate thing that most of the thoroughbords are done before four or five years

 It is outto possible if a Harkney was submitted to the same test he probably would be un-seend!—He is not fit to galley, and not meant for

that purpose, he is a roudster.

10057. He is not fit for very great exertion, in fact!—Yes, at his pace, but certainly not fit to gallop like a receipting any recre than a carthorne 10958. As a matter of fact he is not submitted to

trotting at his more at the are of one war I-Well. they are beginning to get trained new very suriv. they are beginning to got trained now very early.

10059. Lord Asstrown.—Have you had any exterimon in examining half-bred Hackneys i—I could

not tell you how they are bred. I had a very large examining practice when I was in practice, and my work was routly connected with light homes, hunters, and harness horses. 10160. And you did not know how they were bred t-No, I did not inquire. 10061. Mr. Warsen. But you have examined at shown a good deal in addition t-Ob, yet.

10962, And you have a large experience all over the country !... I have. 10163. Now, we have had it given before us in Ireland that the bous of the Hackney differs very of Hackney blood if you can got it as we have got it?

much from the bone of the thorosophwed that ont seems quite porous and light, and the other like long and hord, and weight more. I should very much like and bero, and weight more. A meeting say have examined the bone of the various breeds?-Only in an that it is a fact.

pedinary way, with the naked eye and hand. I have heard that theory years ago, but I have yet to know 1996). Is it possible, without a microscopic ex-amination to detect the bones of different houses !--They are so near allied that if you ask say man a-customed to anatomy he would say there is no dif-

ference in the bone; but it would only settle that gravation to employ a very good microscopist to make spretton to employ a very good microscopes to more sections and examine them under the microscope, and erewing them as to the absent of earthy matter in

10955. You don't think any man who was not an expert could give an opinion on that matter that was worth having !- Certainly not, 10066. That it could only be ascertained by a

10817. Do you know whether these has ever been a test of that kind made !- I cannot find out that it 10008. Have you consulted any special authority on that point?—I have, and I can unther find out in knoks or from the hest anatomists or obvaiologists I

sould convelt 16069. Therefore any expression of that kind is not of much value 1-I should say none at all. 10170. We have been also told that Hackneys are very liable to curbs and curby books i-That is not The congristmen. I comment women her sour having soon a Hackney with curb 10971. Do you think they are sound generally in

16972. And we have also been told that they have delicate constitutions, that they don't recover lifaces as easily as thoroughbred horses i-Well, I cannot speak very much as to their recovery from illuses. I have not been in general practice now since 1890, but I have no reason to think he is slower 10373. Is his constitution hardy !-- What I have

seen of them have been hardy, the three beeses I know of in my district, are the three heat house I ever asw on the road.

1097). Do you know personally saything as to the origin of the Harkman !- I know that they are a very old break 10975. If you were breeding a bunter do you think Clyderdale or Hackney blood would be most estimated. The Chalendale by all mores there is far more danger in Iroland of petting a maxime of sart-here bleed than three is of the Hackmay. It is

more than twenty-five years since I saw danger in reland from the number of cart-cares I saw canger in Ireland from the number of cart-cares I saw there. 10978. Do you think Clydesials blood would produce much more softmess and non-staying power than the Hackner I - Ven 10077. And do you know that seathird of the stallions in Itelansi are Clyclescials or half-bred eart-

horses I I am year sorey to hose you say so. 10078. Dealing with small farmers who have not the mores to breed hunters, do you think it would pay them best to breed horses with action, se to try to breed hunters!—I should try to breed Hackpers and useful roadsters, ride and drive horses.

10979. Do you think that would pay them better !-- I am sure it would, particularly if they had action, nothing enhances the value of a borne more then superior action all round, and that you would est from the Hackney. 10380. There is one question we have had debated at the Royal Dublin Society lately, with record to at the Royal Dates couldness of lacres, and that is on the anestica of granting; do you think granting is

a heredstary unsoundness or not !-- I think is to .--10081. Is it transmitted, in your printer to Those no doubt that grunting is very closely allied to rearing, and we do know that rouring in hereditary, and therefore it follows that grunting must also be

beroditary, they are closely allied.

10081. Perhaps if you were asked your opinion
you would say it was hereditary unwandarus |-Certainly, and I would never pass a borns thay
guntai, I lave known a reserve that you could no that did not make u noise in his pallop, but my

opinion is that n horse that grants takes the first opportunity to become a reason 10183. And you would not breed from a construct -I would not breed from such an aronal.

I would not breed from such an arimal. of the hous, he some indication of the density t. To would be one of the tests, 10935. Would not the difference between the erific genrity of the lone of the thoroughlied and the bone of the Clydeschie, give one a rough and

ready notion of the relative densities !- Before was compense this test you would have to have correpending bones of the different borses; if you take the common bone or the femur, you would have to have the corresponding bone from another home. years old, because as they got older they get more brittle. If you took a five year old been against a fifteen your old the apalysis would come differently. 10506 We have had it in exidence from wrtesinary

surgeous and a good many people that, as a matter of fact, the bose of the three-aghlered is draser than the bose of any other horse!—I have beard it said so. I don't disagree. I only say I am not aware of the fact. I have bunted we all the authorities I sould, and I omesited one of the very best anatomists in the North of England, Professor Hewdon, of the Durham Callege of Medicine. I put it to him and he could not say is. It is a question you will have to get settled by a microscopist. My own epinion is that there is

10087. You think, for instance, that the Belgiss horse that was mentioned to un yesterday as having a loops serfectly porons and light, that probably it is just as deuse and heavy as the thoroughhed!—There you have gone to the other extreme. I was not thinking of the eart house or the Beigian house. I taining of the east norse or the Beigian brine. It was thinking of the Hankiney bone and the thorough-bred bone. I get two bons sent from Newmarket, but they were bones of a two year old, that were no earthly use to compare with the bones I had, she bones, of ididn's go any further.

10088. It was sensested by Mr. Wenneth that.

scores, so I utida" go any further.

10908. It was suggested by Mr. Wreash that
u large proportion of the sizes in Ireland were
Clydesdalais or a cross of a Clydesdala
You have no knowledge of that yourself—
No. siz. I hope it is not so, because if yet have go

No. sir. I hope it is not so, because if yet have go-any Clydeodale blood in your hunting mares it is all up with the character of the Irish hunter. 1098). But still the Litch hunter somehow main-10990. But still it has not lost its character, sad you would define from that that there are not so many of the Clydendale blood I—I cannot think it

10991 Mr. Porswilliam ... The majority of the earty stallions. I think, are more or less in our locality ! -They are kept away from the hunter brood-mare

at any rate. 10993. CHAIRMAN.—Do you think the Hackney is a suitable sire to get a riding borse !-- If I could get 10993. I mean in the first cross!-There is no man in the world so fond of a bit of blood as I am. If I in the worst so fond of a bit of blood as I am, if a could get the shapes I like combined with thorough-head blood. That is the animal I would like, hal-

the shapes

it is so difficult to get a thoroughbred one that is sound to begin with, and with good share and sood 10004. I think you suggested as regards Ireland une for a certain close of more, you thought the best thing that could be done would be to put her to the

Hackney, and then put the result, the filles, back to the thoroughbred!—Pretty nearly carrying out his Grace the Duke of Portland's scheme. 10995. What I wanted to sait you is, would the first cross of the Hackney make a riding horse !- It might and might not, the probability is the dam was

full of thoroughbred blood, and you would got a certain amount of nervous energy and vigour from the dam. sad if the shoulders were right you would get a very mice animal oe animae. 10996. Mr. La Toucen.—You don't held that a mixture of eart blood is any advantage to the hunter?

-Quite the opposite 10097. You don't hold that any mixture of Harkney blood is any advantage !- Except for size

10098. If you got aim without it!-Yes; but I cannot; that is where the trouble comes in. 10939. Which do you think is the most discernable to the ordinary closerver, an admixture of eart blood or Hackney blood 1-The cart blood, certainly. 11000. Mr. Westen - Have you formed any opinion about breeding from half-bred sires i-I don't holieve in using a half-bred sire of any kind. I don't care what you are trying to breed you must have a pure sire on the top. Your sire must be pure if you

WARL & SUCCESS

11001. You think it would not be a safe experiment to bread from borses with three or four thecourtsbred crosses !-- The probability is that she mare he would get would be last-lived too, and you never The first erom is generally a good answal, and is the best. After that I think it is all a lottery. I think

the size should always be pure. 11003, Lord RATHROSHULL-How long has the Hackney been a pure broad !- I cannot tell. There is a nicture I say downstains of the Duke of Hamilton

riding a back, that is a long time ago. 11003. Was that a pure-bred one !-- I believe so.

I always understood sa 1004. Did they call them Hackneys in those days ! -You are going too far back for me. They might call them roadstors.

11005. When did the Hackneys become a trure breed, you mentioned you would only use a pure-treed sire; when did the Hackney sire become pure i-I could not tell you, but if you get the date of the formation of the Hackney Stud-book

11406. That was in 1884, I think !- Bet they go back a long time, and are very closely inbred. 11007. Mr. La Topons.—Mares were selected from their personal appearance and not in the stud-book, and their progeny classed as pure-leed Hackways within thirteen yours !- I cannot tell you the time,

but they can be traced a long way back, no doubt, and they are very closely in bred, many of them. 11005, Lord RATURGENELL-Have they mores

11009. Does that constitute them pure!—I cannot Suplement. tell you, I am not a Haskiney breeder or a member of Facuta 11010 Mr. WERKER.—Do you think inhresting makes a bosts more perpotent!—Cestainly: if you want as instance of that look at Christopher Wilson's "Sir George" pony, that was very touch inbred and

you see the penies now all over the country, and you see what very good pouiss they are. 11011. Lord Asstrowy.-It fixes the type !- Yes. 11013. Chairman.—Is there soything else you would like to say i—Yes. I would like to plead with the Committee to do all they can to prevent the

closing of feels, I think it is greet to dock a poor little fool and leave him to the mercy of the flies 11013 Mr. La Tovenz.—We never do it in Ireland, it is proctically unknown?—Then I say no move. It is done in England, and there is many an animal spoiled by it, an animal neght not to be dorked until he was matured, the probability is he is worth more with his tail on them with it off. I had a table with the statistics of the York Christman Fair, the number of horses that came from Recland to York. This was in reference to the scarcity of good broad mares, which is an acknowledged fact all over the country, formerly we had very large fairs, and the business of buying and selling hower was nearly all done at the large fairs. Now spents so about contimously buying horses for the continent, and there is a continual stresm sping across to the continuat. At the last Yorkshire Christmas Fair I got this from the North Eastern Railway Company, the number of horses that went from York, forwarded to Horwick was 51; the number sent to Crimsler was 25; and the number sent to Hull was 23; that is 98 bores went from York Christmas Pair to the continent, the probability is that they were all mares of the very best type, good-looking and sound, the foreigner always buye a sound horse and never bers a cribliber. The number of horses received at York from

Iroland was 170, and we sent 98 to the continent, three being in all probability all mures, that partly passormin for the sparcity of good moves. 11014. CHARRAN.—Have you any suggestion as to any possible remedy for that state of things 1—No. my lord; let the farmer breed the best be can and self them for the most money he oza. Many of our best marm are bought by the foreigners, those kept at heme are sold for a good price as hunters an harmen mares, and only come back to breed when they are ween out 11015, Lead BATHDONNAL-You have no idea

how many mores there were in the 170 I-No. One of the officials of the N. E. Company, Mr. Imman, was saying how large a number of horses were sent to the Continent, and I wrote to him and got him to give me this return officially.

11016. Were the 170 chiefly brought by dealers from Ireland into York !- They were in the hands of Irish dealers, brought from Ireland to York to sell.

Voterinary Licetenant-Colonel J. R. H. HALZEN, C.L.E., Stratford-on-Avon, examined.

11017. CHARMAN.—You were Importor-General of the horse-breeding in India 5—Yes. 11018. Are you now !- No, I am retired. 11019. How long did you fill that appointment!-

I beld that appointment as Inspector-General of brooding in the Civil Veterinary Department eighteen

TOME 11010. Did you bear the cridence of Sir John Watern I-I did. 11031. There were some figures and statistics asked

roadstors, half-bred, Australian and steel-breds, those from Sir John Watson, which heastd you might perlen be able to supply. Purhaps the simplest plan would be horses that were beed in the old Stud Department

that you should give us the figures you have?-I can give you the statistics of the prims that have been earned by the produce of the different breeds of stallions. I left the paper yesterday at the India Office, and it will be filled up by about two o'clock to day, filled up for eight or ten years. They are received to the Civil Veterinary Department. The stallion were thorough-bred and the half-bred; under the head of half-bred

we include these that have been sent out as trotters,

March I, 1887. which breed cas I. R. M. cas T Hallon, cas. The cas T faculty cas., the last cas.

which was abclished in the year 1876, when the Horszending Dopartment was farmed; and there was also and Turconian horse, from North of Arghanattan. The Turconian horse is a very expeditional to the property of the Arab type. The Turconians are president and two in the supplie, men like the Arisbo, and zends here good horses that go a long distance and here good of the property o

11022. Can you tell us how these various classes of stallions are distributed about India; do they endeavour to suit the peculiarities of the mares in dif-ferent localities b-Yas, the officers of the Civil Vatcrimey Department and Hose-brooking Department make importions at centres of all mares that are brought up by owners who wish them to receive a hread, with a view of heing eligible for the service of Government stallions. When a mare is certified ofter exercipation from from hereditary disease, and army horses alone, we breed for the general improvenext of the home stock of India, but of course as those is a great demand in the army we try if possible to bread is a great demond in the sumy we key if possible to kevel a brase blocky to soit the saws—them we allote each mare in the book, in the register, according to her shape, make, and breed, for they have several coal forced, to the particular diase of bosses. We cannot say which horse, we either any to the thoroughbred, or the half-fred Kaghish, or the Arab, or stud-bred, secording so the class of horse that is available in that district, we cannot unfortunately, as the mure belongs to private owners, direcmatery, as the mare nerongs to private owners, espect, we can enly recommend or success that they should be sent, and se a rule with a little pains, they generally listen to reason, and they will send their mores to the large you indicate. When the more is sent to that laces there is a certificate given to the owner that his mare, registered number so and so, if she has a poligree, said yowa-days she often has a nothicee, has been covered by such a horse at this date, that is his credential. When he goes to a show he will tuke a certificate that his mure is in foal by that bores. Liberian when the mare feels another arriffents is given to the effect that the more gave birth to this foal by such a horse on such a date, with the markings on him, star or whatever it may be, and colour also. on him, star or whatever it may be, and coorir also.

And having tho two certificates, as a rule there is not ruch forgrey, we have the covering certificate and the

whether they always got the house indicated, they don't always.

11025. What I mean is whether a particular class of home, say the thoroughbred or the Hackney, is sent to particular localities in India, because that particular breed is thought to sait specially the particu-lar class of mare found there i....We tried that. We have done it in part, not entirely because some breeders won't not their mares to a thoroughbood, some won't won't put their mores to a moroaganno, some won't put them to a Hackney, and some won't put them to an Arab. The old Indian horse-breeder sometimes has an enjoying of his own and likes to have his shoise of stallions, and so in order to see that mare into the of stallibors, and so in order to gue teat mare and are ranks of broof mares and prevent the owner petting her to a worthless country stalline, full of disease of all corts; ye have to humour them and pisce herees as their convenience. So you will understand that as rule we have more than one breed in one locality, We would like very much to keep to cas breed in one locality, but we should lose a lot of mares if we did. 11024. Do you agree with what Sir John Watson mid that fittle impression, or no impression has been made on the matter horses in India by the impertation of tion of kingspean stallines — Impart, but slightly was in India about 44 years, and my bothly was horse-breeding, and I lived more or less in the saddle. and was always about the country and know a great

deal about the old Stud Department. Had the old Stud Department been only working in a favourable soil and climate suited for conino benefing we should on the home stock of the country, but unfortunately in the daws when the stud first originated, 1794, or It was a climate mult humid, with a few hillocks about, and the stor efficers of that day selected the best ground they could in this moreovy country and tried to band horses, but it was impossible, the climate was deal against them, though they did get a certain amount of stock. Now I sures with General Watson. stock was of use for a generation; it did work but as a rule the stock from horses so bond in this had atmosphere and climate was not got. small stud was formed further north in 1816, but the really good stact was named about 1840, and I will by-and-bye with your permission hand you over a paper I wrote on the subject, upon which the precise securate dates are recorded, and I will leave is for the perunal of the members of the Commission. This gives a brief history of the Sted Department and the reasons are hinted at why it failed. It was not from a due support of stallions, but simply because trum a due support of scanning, not suspay because it was out of the horse-breeding mose altogether. So I agree with General Watson that in three localities they have made no impression. The fact of tha matter is that horses of any kind are not to be found there. They bring them there and breed from them. and they do not continue. Evon the deskeys in the country are poor weetched kinds, they can hardly walk, they have crocked legs and very little caseous tissue in their lags; they are worked young and get melformations and distinish in size, and even that hardy animal cannot live in that part of the country. Now to go back to General Watson's question. Had the squine race not been writed to the climate of Northern India, the local herees found there would have been wined out. There ha is a remarkable animal, extremely hardy, made hardy by the soil and climate and the management, sometimes very bad from the ignorance, not intentional, of the horses owner, from tropical heat of the sun and frosty nights owner, from tropical heat of the sun and trouty legen-of winter, very often half starved. That horse has survived all that treatment and remains a very hardy hard as steel, but we ground little assemble for work, hard as steel, tak we unfortunately had not our study up in those districts in early days. Now we are working those districts with our stallions, and I feel assured that during my time-I can go back for nearly half a century-I do see an improvement.

time—I on gr black for easily bulk occurry—I on 1103. The improvement you think, "I will be presented by the present of the pr

go un taking cure of that heree on the same itself halt he had been improved on.

1105b. Have you may defined to quintien as to which is the hest dass of skillion, the thereughbred here. At the commonstant of my services in the first Department in 1805, I was put in charge of the Department for 1805, I was put in charge of the Department of the Commonstant of the August of the Department, and was all gas all adverse of the Ood. It have been in my time a particular, of of the Ood. It have been in my time a particular, of of the Ood. It have been in my time a particular, the of the Department of the August 2000.

on Araba : and so, when I superintended the sted in sa Araba ; and so, when I superintended are seen in Bombay, I would not have thought of the half-bred, or what we call Hackneys now. But after ten years I was sent up to the North of India for duty. I was I was sent up to the North of Joua for duly. I was an a commission to report on the Bengal Stad Denartment, and I had then a grand opportunity of owing what were the respite of the use of different house. In is alluded to in either that paper or this; and I found that the best horses in the Stud Department were those that had a death of what we call Hackney blood, which was called in those days half-bond. Those horses were supplied by a contractor called Shaw. He sent out a espaint by a consecutor came cage. As one one on a there, were two or three leading horses, very good-

really, I believe, pedigree heres, for their stock remained very good, and I found had the best been and many of their stock turned out very good stallions, and their progray again was very good; so that after three or four years on Stud Commission draw, looking at these herees, at different area, day after day, as case never, at disserts ages, ony after day, imposting them—and then during that thus seeing them grow up and watching them, and impecting regiments and batteries which had there. I same to the conclusion that the thoroughbred and the Arab, although everything in the way of blood, could not out of the mare of the country or the half-bred mare get a remount up to the weight of British cavalry; and it was the desire of Government to breed borses with that in view, if possible to mount the covalry, 11037. You think the Haskney sire is preferable

to the thoroughbred sire for the purpose of getting resounts !—Xes, provided he is of the perper stamp and of the proper shape (I would not advise one with a bad shoulder), and not too extravagant action-we den't want extravagant action in remounts and reden't want extravagant action in remounts—the result efficient for British envalry and native cavelry, may mention that the Inspector-General of eavalry, General Luck, ont in Luis, reported on the borous, we found in one regiment of Dritish Lancers, in the fellowing words. I may recution that he had a large eavalry camp at Allourt for the purpose of drilling many comp at Aligure to: the purpose of drilling many regiments together, and finding out what they were worth both as to men and bosses, and this went on for a month or six weeks, and then he rebuilted a

report on the borses and me 11035. We don't want to know about the men !--In his second he says to tiThe small, correct horses in his report he mays :—"Ins mand, compart forces lasted far botter than the big ones. Most of the Australians ever 15.3 were much pulled down at the slose of the management. The country bred horses of the 5th Langers did well. The regiment is now almost entirely magnitud on this class of house; they compare most favourably with the Anstralians, and

11029. That is comparing native-beed bosses with Australian-bred houses !- And also there were some

11030. He does not mean borses by Australian houses out of a native mare!—No; imported Walers. 11051. I wanted to get at your column of the reistive meets of the theremebleed and Harkney to rut to the native mares !- These are some of the results that be speaks well of as having proved good burren and at the end of the long trial they were better than the Australians, did their work well, and were in the sees condition at the emi-11052. But it does not tell us bow these countr

bred horses were got !- No, it does not; but the statistics I am going to give you will show you pre clerly how they were got by the different clames of

11033. I gather from you that you are of the same minion as Sir John Watson, that the thoroughbred and the Hackney produce equally good results, or presty much the sense; not very much to choose betwom the two 1... There is only one thing about the thoroughbred when he is put to the light-limbed more in Northern India. He, as a rule, note very light-

not deep enough in girth; but if you were to put that Vet, Lieu same mars to the Hackney you would have shorter Ca.J. H. H. legs and more bone, and therefore better able to Halis, can segs and more some, and traceous better acts to corry weight. And, mereover, the communicate of matire cavalry regiments find the stock of half-freeds are enduring. They do very well on the shirt common. They never give them more than necessary in native cavalry. They do well and keen their conin native cavalry. They do well and keep their con-dition, and, therefore, they are favourites with the owners of the burses. Every man owns his own hone in the native cavalry; it does not belong to the

11034. Lord BATHTHOUSELL-What class of horses did you compare in the cavulry regiment, you menrescount that Green! Tack invested ... You want to know which horses were the better of the country to mose which horses were the better of the country breads. He compared them only with the Am-tralians; not with each other. He said they were generally in good condition. He only compared then with the Australians.

11025. Mr. Freewittian.—That is India-beed become serving Australian !—Yes. I may mention that as the well beed horse is an Eastern animal he is only going book to his own country and he will do well there; but I know many people form the opinion about the howe that ha is like our deg. If you take Burgean dogs out there they go to the had—there while see worth nothing; but then those dogs are foreign to India. They are not the Eastern dog. They go is to a new climate quite unsuited to them, and ful

to continue their breed 11000. Mr. La Tettern.—Do you think if a borse going out to India was fed in the pormal condition that a native home is fed, and treated in the same way—de you think be would gradually assume the native type?—That is to say, if a theroughbred went there in how many generations do you expect him to

deteriorate into the native horse! Is that the question's 11037. Yes, something of that sort. You would expect that he would tend to deteriorate !-- Yes. If expect that he would tend to determine \— 15c. If he were got of a hardy constitution in a few genera-tions he would be wiped out in breed. They must have blood just it is placing the thoroughbord in a very hard position. If you meanted, any a regi-ment of cowdry on nothing her throughbord in the think they would go through the campaign well on 11038. We have it is evidence from the veterinary

surgeon who was attached to that regiment you speak of, the 5th Lancers, at some of those managerees that the cross of the thoroughtend was much better tone ton cross of the thoroughteed was much better for military purposes. This gentlemen said he was in a regiment, the 5th Lancers, which was mounted on country-bred borses ; that it was very easy to distinevials the difference between the country-bred ones got by Hackneys and those got by thoroughbreis; lines, fewer were lame. You got fewer bone diseases with a hetter breed of troop horses. Does that arree

with your personal experience !- No. 11633. You are pring to hand us in a return of the prices which were given to mand us in a return of animals in the Government stude—will this return show the ages of the animals !- No, it will not; only the reises and breeds.

n prizon mire teeson. 11040. I understood from Sir John Watson that 11040. I understood from Sir John Watson that the horses see generally bength for removes purposes at the age of eighteen menthal—For the British coralty and actility, with a view of putting them ultimately when fare year old in their ranks. Sometimes they get bold of a good here at three or four year old and buy him.

11041, Would some of these prim-winners be found.

among the borses purchased at the age of eighteen months for the British army!—Yes, as a rule. The houses that get the prize are the best, and are young horses and purchasable by the resonant department. March 4, 1801.

They generally get them, because they give the highest price as a rule. The only exception is where a native chief may come in with a big perse, and give anything for a horse be likes ; but as a rele the British

11042. Would the returns show what prices were for brood mages and what for times or four year old ! -No, but there are returns in home show reports which show the different ages and the prices of the

11043. Chammax.-What return would they be Department; then there is snother report, an appen-

fairs, and I think you might get a copy of this from the India Office, and you will be able to get exactly the information you wast.

11044. Mr. La Topenn.—It is very important we should have the ages of the homes when the prizes are awarded to three !- I can tell you that they are

awarded to feals, yearlings, two year old, three year avanog to seas, yearings, we year on, three year old, fore year old; all different ages get prize. 11045. Do you find as a matter of coperience that the animal that gots prises as a foul often gets prizes as a four year old b—ft depends a good deal on how he has been fed in the meantime, if he has not changed hands, if he has been cared for he has got a good chance; but if he gets strangles or worses a feel may fell of and become worth nothing, though it may have

been the best at a year or eighteen mouths old. 11046, Col. St. QUINTE, ... Before the present system of breeding was inaugurated the Indian Gover ment had a system of Anres-of breeding establishments of their own f.—Yes.

11047. And they beed their own horses—can yes tell or what cless of mace and stallious were chastly used in those-do you remember the besetiful old

stud-bred before the study were broken up 1-Yes 11018. How were they broil-Chiefly out of tho stod-bred mares, but now and then mores were imported ; some mores were imported from England and - some from Australia, but as a rule the stud-beed mases were the revoluce of the stud thecoroless. 11049. What were the stallions chiefly!-Thorough breds and Aralis, stud-breds, half-breds (English

introduced about thirty to forty years ago), and occasionally an Australian thoroughbred. 11000. They were chicaly thoroughbood!-About alf and half, half Arab and half thoroughbood. 11051. When you indented for these Hackneys for the stud did yet do so with the view of gotting cavalry or artillery horses, or for both 1-The aim was for the general improvement of houses in the country, the feeling of the self-tary people was that we were getting stods up solely to mount them; well, we

hoped to mount them, out we also wished to improve the breeding of horsen in India. We hoped that the military people would get the best of the stock; we weat in for getting both riding and driving horses. 11639. Do you agree with Sir John Wators that the Hockney is equally good for breeding for eavaire as for artillery purposes t—It depends on the shape of the Hackney, if he has good shoulders and shape, good action, action that will take a horse over the

roul well, and not too high knee action.

11058. You consider that he can get a good riding horse?-I have seen some excellent riding horses by 11054. The first erees !- I on going to qualify that

by raving I deem it a great mistake that there is not more ours taken with regard to shoulders in the breeding of Haskneys. I must tell you my opinion about shoulders; the shoulder of the thoroughbred is a grand chundler as a rule, and there are some very poor shoulder in thoroughbreis, but look how that shoulder has been made, he has been going at a walk or a gallop over the most lovely ground, a billiard table recooners, for how many generations, how many years, and therefore he has got into a most beautiful shape as far as shoulders and extraore powers, and becomes well fitted to go over turi and level ground at a tremendous pace with a light weight on his back. That is his work at the present day, and that is really what he is saited for. Now a Hackney has to do different work altogether, and I will put the Arab in with the Hackney as far as abgulden are concerned. The Arab, what does he shouldnes are concerned. The Arab, what does be do ! In his mative country he has to go through deep sand, and to have a very powerful shoulder to pall himself along and pick his fost out of the sand his pastorn gets long as a rele from the weight dweller in the mind, and his shoulder gots very thick and shabby because he has to use it in that perticular At the same time when a raid corres or he has to go as a very fair page to selse the property, the booty, and his shoulder is fair, not agood shoulder, but well smited for his work. Now, a Hackney has not a riding shoulder, because he is generally used for drawing purposes. I am not an admirer of facey horan. I heard Mr. Burdett-Coutin describe yesper-day the fashionable action for a Harkury, but for a general utility horse we do not require that kind of

action.
11055. Do you think the thoroughbood horses that were sent to India for many years were good of their were sens to insin see many years were good of carrype [—As good as they could be obtained.

11061. For the money !—I must full you that the late Imported-General, General Throuball, and the present one, General Weston, if they saw a good house above 350 guiness, they could always buy kins. General Thornhill told me he had not seen houses fitted for the India stud as a rule above 350 orines; except you get hold of a really grand hove that you would get for £1,000, £1,200, or £1,400, there are exceptions, but as a rule tho thoroughbred obtainable for our district work to be sent out and not always

receive the best treatment in the breeding district was obtainable by General Thornhall, and is by General Watson up to a certain nameber. I think Lord Mayo was quite right. I quite agree with him when he said we could not get annually more than ton or twelve of the perfect horses we want in India, and there are very few perfect horses amongst thoroughloods as regards bore and conformation. I have seen one or two grand thoroughbreds out in India, but we know the most perfect leoking horse does not always get the best stock. 11057. If you could not size of substance in thoroughbreds would you profer them to the Hackney for military purposes, for cavely purposes?

-If you could get a regiment incented on what we —If you could get a regreent moment on white oull a perfect military home, thereughled, up to eighteen or twenty stone, you would be better mounted than you would be on Hackneys, but I say they are not to be had. 11008. You said that the Australian horse, a great many of which same to India, are really from highly

hred English horses, that they were not m good as the country head, according to the Impector General's letter I—No, only the imported once. 1100% You are not talking of the stallings I—No. 11060. Do you know the native cavalry now prefer the small Australian horse to the country bred !- No;

I know one or two regiments did. I know when you were out there they indented on you for Australians, 11061. Mr. Warners.—Had you an opportunity of testing the noundness of the horses got by these different stallions after they had done work, when they were in the regiments, to see how they stood the work after managerres or the work of the regi ment. Did you aver inspect the bosses in the regiment to see how they stood, whether those got by thoroughbresh stood better than those got by Hackneys, or vice person—No, I never imported it with that view.

11062. Have you any knowledge of the results in

that way !-No; in this report I have before not, one of the assistants given his opinion on that subject. 11063. But you have not yours !- No.

Mr. HEXRY NEWMAN examined. horses, we never buy horses with much white about

tings Chairman.-You are a partner, are you not, in the firm of Mesars. East and Co. 1-No, I am

manager, my lord. 11065. They are jobmenters !-Yes, my lord. 11065. Can you give the Commission an approxiwhiter 1-Well. I could not may exactly that may

I can tell you the number we buy every year and the number we sell when not fit for our work 11057. Well, how many do you sell !-- It averages 11058. But you let out bosses besides 1-Oh. was.

my lord. 11019. Have you say idea of how many you let. cet !- I should think somewhere about 1.500 to 3,000

11070. Where do you get your horses from !-All parts, chiefly from Ireland 11071. What parts of Ireland L. Scoth of Testand

chiefy, some in the North. 11072. Do you buy them yourself through your own agests 1—Yes.

11073. Do you buy them individually yourself or

medov agents to buy them i-We have needle over there, agents who pick them up at two and three years old and we key them just when they are

coming four years ded.

11074. And you have been in this business for a logs number of years !...I have been in Mr. East's business for the last six years, but I have been in the horse business for the last thirty-five years. 11073. Do you find that you can obtain the class of horse you want as casely in Iroland new as you

used to do, is the supply as good as it used to be !--I don't think it is. 11076. Do you have to give more money for them? No, there is not very much difference in the price.

11077. But you think there is not as large a supply !- Not quite, I think colts have remained the some price, but hunters are dearer than they used to be; I used to huy hunters originally, they are very much deaver than they used to be.

11078. Do you buy leasters now i—No, we only

bry harmon colta. 11079. And you buy principally you say in Tecland 1 -- Ven

11080. And in England also !- Yes, a few in England. 11081. And from shroad!—Yes, we get a few

11082. What is the class of harmous horse you buy in Ireland !—Houses from 15.3 to 16.1 or 16.2. 11053. Do you know at all how they are bred!-They are all by thoroughhred sices as a rule.

length a few by a horse I think called "Excelsion in Ireland, a Hackney stallios, we have bod a few by him, that is the only hope I knew of, of that 11084. Do yes attach much importance to the

pedigree of the horse you buy 1—Oh, yes, my lord.

11083. Do you get pedigrees with them 1—We
like them by thoroughbred horses. 11056. Do you get pediarem with them !- You M a Lale

11087. And you think the pedigrees are generally correct !--Oh, I think so, because we know the bursen that are covering in the different districts of Ireland, they are a first class quality of horse, and they must be by some thoroughbred horse or another. We buy them from the men, as a rule, that keep the

stallions, so they must know nestly mourly what they 11088. Are your horses remerally bought privately or

at the fairs j... They are originally picked up at the fairs by the men we bay them from, we don't go so much to

them and we could not get them by going about to fairs, for they are picked up before the time. The new we get them from buy there as three-year olds and fred them and keep them for us.

11089. And so compared with the American and English borses, do you think the Irish burse snits our purpose as well as the others, or bester !-

Better, I think, they wear better.
11090. What are they used for, the horses you lot

out 1-Oh, carriage work.
11601. In Louisa 1-Yes, a good many of them, 11001. In Leasure, — at a good and the same in the country.

11002. Do you find that there haves got by thereughbeed sires have get sufficiently good action to

Well, that is the difficulty very often, they have not got action enough

11003. But when you do get one with action it is much better then anything else. I think 1... They com do work, they one keep on going

11094. I presume I should be right in saving that it is the same class of heree that is turned into a bunder !- Yes, my lord. 11085. It may not be particularly adapted for making a hunter, and it makes a harness heree.

provided it has got sufficient action !- Yes, my 11096. Do you agree that the action could be obtained from the Hackney blood!—The action might, you might get some action from it, but I don't think you will get the length and breath you want to many harmon. I have never seen any Hackney borse of the size that we require them.

For instance, we use a great many horses for ride and drive work, you must have a horse of good length and size for that kind of work, unless they have got good shoulders, and can ride well they are no use

11097. Then for your purposes you think the thoroughbred in an good so the Hackery sire!--Better, I should say. 11003. The introduction of Hackneys in Ire-

land is comparatively very recent, do you know anything of Hackburys in Yorkshire and other parts of England I—We used years ago to huy a great many more horses in Yorkshire than we do now, we have a great difficulty in having thirty or forty a year, we used to buy a great many more years ago.

1102). Do you sitribute that to the fact that then have turned their estention more to breeding Hack-

nevy bu-Cartainly. 11100. In fact the Harkney does not breed what you want 1-No. 11101. What do you think the Harkney is suitable for 1-I think they are very suitable for renall car-

riance or for people to drive about in huggies, they may do your well, but I have not had very much experience of the Hackney borse myself, I don't think you own make them into carriage horses. 11102. In former days you found it easier to est

the class of horses you require in Yorkshire !-- Years ace you could buy a great many more in Yorkshire than at the present time.

Cleveland bays and those bigger herses, but they are docking them in Yorkshire, that is one of the great drawbarks to our being able to get horses now, you bardly ever see a horse with his tail on.

through ever see a none with his can co.

11104. Then as regards Ireland, in your particular
denand, am I right in supposing that you think that
the thoroughbred sire is the class of sire you prefer?

-Oh, yee, my lord. 11105, Mr. Firawittian.—You talk about wearing action, do you think the action of the Hackner would be a wearing action in harness, as a modul false cornelves, because for the last few years we found we could not get them that way. They are selected harness horse !-Not any that I have seen.

Mervà 5, 1805. extravagant action !- They are extravagant in from fr Burre very often and not so good behind, must of them

11107. Does it last out a long day !-- I don't think it does, I don't think they go any better than the others when they have gone out helf-an-hour.

11108. Where in Iroland used you to get the
majority of your large horses i-Limerick and the South of Ireland.

11109, And you get them there still !--Oh, yes. 11110. But as regards the East Riding of Yorkshire, you have almost given up going thungt-Wo have very nearly given up going there, I think we got twenty horses there last year.

11111. And that is entirely since the introduction of the Hackney blood 1-Yes. 11113. Used you to get a great many !- Not in the set six years since I have been with the Mouse. East, but before that, they used to buy a great many

11113. Mr. La Tonenn.—I suppose you do occa-aloually buy a harmon horse got by a Hackney sire i -Occasionally. 11114. Do you find that be esn do snything that horse got by a thoroughbrod size cannot do !-

11115. And don't you think that a thoroughbood sire eso do things that a Hackney sire cannot do I-They are not always such fine goors, you cannot prilispe get them in such large numbers; but they do the

riding part which a Hackney sire cannot do, and you camps get Hackneys of each a size; they do for a small victoria or brougham, but when you want to put them into a landau or large curriage you cannot get these size enough 11116. I don't wish to sek you a personal question,

but do you give prices for those colts that see reacotat as you give proces for think so,
11117. You say the supply is not as large as it used to be, to what do you attribute that !-- I could not say, except that perhaps the demond is larger, I daresey you know the statistics better than I do, a great many more people go to Ireland now than twenty-five years ago to buy horses. 11110. Why do they go to Ireland!--Because I think they find the best there; thirty years ago we

ecold go and stop in Dublin and buy twenty or thirty hunters in three days within a radius of eighteen or twenty miles of Dealin and buy them at five or six years old, you cannot do it now.

1119. You have to buy four year olds !—I gave up hunter dealing only because I could not buy the borses at a price that would pay to bring them over bore, and make a living out of them. 11120. Do you think a rejectors of Markess blood

would have say effect on hunter-broadlers in Iroland 1 -I think it would 11121. A coul effect in The worst. There (eroduced) is a letter I have this morning from a man in 11132. Do you think the mixture of Haskney blood in the pedigice of the benter world be perceptible to the eye!—I campat say. It may or may not.

to eyo'l—I commit say. It may or may not. 11123. We have a better chance of detecting the mixture of Circlesdale or Shire blood !- Yes ; I should thick you would 11124. Lord Assertows.—When you used to buy in Claveland Bay or coach horse !- Yes.

Yorkshire, what class of horses used you to buy, the 11125. They don't bread as many of those now !---Not half so much 11126. Do you find many horses dooked that would

have been good enough for you if they had not been docked!—You; I rejected twenty or thirty this last year because they were dooked. 11127. The fact of docking besides giving up the breeding of Cleveland Bays also tells against them !--

in the year altomather !- Yes

11131. I don't want you to answer my question that would do your trade any have. World you say the price you give as an average - £00 or £100 11132. Do you know whether any of the beens on heav are American horses brought over and fed in Ireland !-- I should not think they were 11133. You are not aware of having bought any American horses in Ireland !- Not in Ireland 11134. But you do buy them when landed over in

from Ireland 1-I should think 180 to 200.

11130. You buy them chiefly from dealers who how

Did you think they were chiefly

them in the South and North, and they practically feed them and sell them to you as long task at free

is country :-- x es, sir. 11125. When you buy those horses, do you make inquiries se to how they are bred!—Yes.

11136. And do you think you get correct pedigrees. Dun't you find, for invience, that a great many are got by some particular herse noted for getting harmens horses, like "Mackintosh" !-- I don't think so, I think we get them pretty straight as a rule 11137. But you only get the pedigrees from these men who hav them from the farmers !-- Yes. 11138. Do you think the superiority of the Irish horse is from their thoroughbred blood, or the way

they are brought up-the soil and climate of Ireland ! Both 11139. Do you object to eart blood in your horses? 11140. Do you know that there are a great many cart become in Ireland!-No I was not aware of 11141. What is your opinion as to the number of stallions in Ireland.

siallions in Ireland. Did you think they w thoroughbred!—I should have thought so. 11142, And that is why you think buying from there is so safe !-- Yes. 11143. Do you know saything of the trule estable our own touck in Ireland, the lower class tradel-No 11144. You don't know the class of mon who breed these horses you buy!-No; except the men that I have seen at fairs with the horses. 11145. But you don't often so to fairs now. You

chiefe bay from those private people!—Chiefy.

11146. When you come to Ireland you go round
to Purce See of your friends in different marts of the e-santry and leok at the houses they have reared fre you have You sir. 11147. And very often buy twenty or thirty from one man !-- Yes. 11148. Have you any acquaintance with the rest of Ireland i... Not much 11149. The men that you buy from are dealers. Their shief business is in the hunter trade really !--No; I think they buy a great many colts.

11150. At this time of the year they are selling harness horses, but as a rule they sell more hunters than harness horses 1—I don't think so. 11151. Then there is as big a trade in barness horses as in hunters !-- I think so-11152. Do you buy a lighter class of home now

find the carriages getting lighter 1-They were lighter two or three years ago, but now they are getting heavier again. Nearly all the carriages are made to go with C springs, and we find we must get our horses tigger.

11153. Then what size do you wish to buy 1—Not less than 15.3. 11154. You buy them as low as 15.31-Yes 11155. And you never buy denked horses !- Ooth-sionally we do. We might buy a horse that was docked, but he might have a good far tall at the shent-No. I don't know that part of the besiness 11159. Why do you think they have given up beeding the class of horses that you look for in

Verkshire !-- I think because so many of them have taken to breed Hackneys. 11160. Yes, but I mean why do they breed Hackusys! I suppose they think it will pay there better. 11161. Are they a fairly intelligent people in Torbibire!—I should think they are.

11167. Then you think if they have adopted this ther have done it with some good reason !- I should think so, they are the best judges of that, 11163. And I think you said the supply of the home you want is not as good as it used to be, can you explain that !- I caused, except that perhaps the denand is greater. I don't know whether there are as many borses bred in Ireland on twenty years ago,

hat they are harder to get I know. 11164. Have you bought American horses for many years 1-Oh you, for a great many years. One of the Mr. Easts was over there fifteen years ago, and jept lector over. Then they gave them up. 11165. Are American horses coming over in large

sumbers !- Very large numbers. 11166. Do you think the American house is im pured to what he was five years ago i-I could not tell you. I did not see many American horses five

Tesze Ago. 11167. Are there good horses among them now !-Yes, a few. 11148. And you can buy them at an are 1-Yes five or six years old and broke to harness, that is the

advantage 11169. Perfectly trained !- Not perfectly trained, but you can got them into work in four or five

11170. Do you think the American trade is entiting offs good deal of the trade that might be kept in this country !-- Certainly. 11171. It is doing hurm to the home brooders !-

11172. Can you suggest any remedy to help the breeders?—Unless you can stop them coming. 11175. Would you be in favour of marking Ameri-

out horses !- I think if they were branded they would not be so salcable.

11174. Would you yourself object to baying broads hereas I—Yes. 11175. And supposing as a measure of use to

breeders branding was suggested, would you as a large buyer, be against it !—It might prevent us buy-11176. But you would be patrictic enough to

port it for the sake of the home breeder !-- I don't mow about that 11177. CHARRAN.-It would not make any dif-

ference to you as a buyer if all the American horses were besoded, for other hayers would be in the same position !-- It would not matter if they branded them on their feet, but if they branded them on their sides and quarters it would make a difference, because there see a great number of German horses and other borses that game branded, and people would not look

11178. Would it make any difference to you if all the foreign horses were excluded !—It would make the other horses dearer. 11179. You would pay more for them and would sak more for them 1—I suppose that would be the

11160. But it would make no difference to you individually as against any other man in the same business—We would be all the same, I suppose.

11181. You used to buy at one time a good many intere in Ireland 1-Yes. 11182. I think you said you could formerly get

Printed image digitized by the University of Southampton Library Digitization Unit

twenty good bunders within a short distance of Dub- atom 4.000 lin, and that you cannot new !-- No. 11183. How do you secount for that !- They are more sought after. Hundreds more people go to Ireland to buy horses now than twenty five years ago. Ever since the Dublin Show started horses have cone up very much in peice. 1118s. Could you say that the breeding of the

hunters and the carriage burses you buy is an im-portant part of the industry of Ireland 1—I should

think very great.
11185. Would you say it is the most important? -I should think it is.

11186. Would you say that anything that was to be done to keep the industry as an industry in Ireland should be directed to the production of that kind of animail !- You, my lord, certainly. I think the mares are the great thing, if we could only got the farmers to keep the botter marse, that is where the failing is, I think. If you could hold out some induce-ment to got them to keep a better class of marcs, you

would get better horses.

11187. Mr. Preventian. — Do yot suggest any means for doing that i—The only thing is to give them prime at agricultural shows, buy mares for them. let them have them and keep them. I think what

CHAIRMAN .- Would you agree with use that Ireland has sobjeved a certain amount of rosentinence in the production of high class hunters!— Oh, you, my lerd, no doubt about that, I don't know any other country you can go to where you can get the sume

11189. How do you account for that !- There is a great deal in the soil. The country is better adapted for breeding horses than any other I have ever heard 11190. And that would apply equally to breeding my kind of horse?—I think so. What makes bone

for one must make it for another I think 11191. Have you much experience of Hackneys in England 1—No, I have not. I know very little about

11193. And if the production was largely increased in Ireland of the kind of house you buy, do you think there would be still a demand for them? Could you dispose of a great many more if you could get them! ... We should buy more there if we could get them in-stead of having horses from other countries. 11193, Lord Barmonnata.—With regard to marea. It has been stated here to-day that a mare sired by a

Hackney would produce a hunter if put to a thoroughbord. Would you like that crossing !- It would depond a good deal ou the animal bow much action it had. 1119s. Do you think it would produce a hunter?

I don't think so, if it was a very fine goer. I

should not pick out a Hackney mare as a dam for a 11193. Perhaps you don't understand quite what I mean. If you put a Hackney size on to what they call a woody, well-bred mare in Ireland, and cross the reeduce of that with a thoroughbred home again, do you think that would be good crossing for hunting

purposes!—I don't think it would be so good as having a regular hunting mare, three-quarters bred, without the Hackney cross-11195. Perhaps you would be able to tell as some-thing with regard to the ages at which mores are taken out of Ireland. Are not good sound mores taken out at a very early age —I should think four-year-old and three-year-olds, a great many of them. 11197. Do you think it would be likely that a dealer would buy a two-year-old mare that was urner would fully a two-year-one made that was stinted or a three-year-old more that was stinted, or had a feel at feet —I could get tell you, it would just depend apon what his trade was. I should not have thought any ordinary borne-dealer would have mean in value or in number! Have you ever worked out the numbers! Do you know the number of hunters that come here from Lebind every year! branters with a mare put to a Hackney stallion, and then crossed again with a thoroughbood, would you No.
11201. But you think it might produce a good horse of any kind i—You
11202. Therefore there might be a trade to produce consider the Harkney cross the worst, or a earthorse would be the worst cross. I should put the Hackney harness horses which it does not produce now !- Yes. before the cart-borse 11209. You like the Hackney better than the

nave a fool at frost at those ages. You don't think that a dealer would take away one of them !—I should

11199. Do you think that would be a good way of rapaging to keep the sound marcs in the country !-

It might. I could not say. It is not the class of

trade I am nequainted with.

sidered the hunter trade most suportant.

not have thought so at that age.

380

Merch & 1895,

Mr. Berry

Boyal College of Votorisary Surgeous !- Yes, my 11211. Have you a professional experience of Hackneys!—Yes, a very large one. 11212. Have you say information you could give the Commission as to their characteristics, soupdness, formation, and so on !-- My opinion is that they are varticularly sound, compared with thoroughbred horses or east-horses, I think they are sounder, their joints are particularly clear from disease, particularly Of course my experience has of a long marrieder. Of course my expension has been more marriederly with these that have some into the show ring, and been to some extent selected before they came under my notice. Stall I have had experience of them to some considerable extent in

form yards, and that is the supression that I have obtained that they are perfectly free from disea 11213. Would it be correct to say that is both the probability is that the animals you have seen or that have been abourn have gone through any description of work that would tend to make them uncound to a greater degree than the Hackneys !-- With regard to the thoroughbond home there is no question that that would apply because he is put to excessive work were early in life, and the powers of nature are called upon to a very considerable extent, but that does not apply

11214. And to what do you attribute the com-

perative unacundness of the cart-boyse !-- Hereditary 11215. But after all, hereditary disease must have originated in something?-Oh, yet; unquestionably, and I think it has originated in the cast borse from careless breeding, years back. 11216. Have you long experience of Hackneys !--Tweaty-five years. wenty-five years. 11217. And what is called a Hackney now, is it

to the eart-horse

much the same as its progenitors twenty-five years make and shape, and action.

age i-It has been very very much improved upon no doubt. 1191R Issuroved in action or what!-Both in ace and shape, and action. 11119. By careful breeding 5—Yes, selection. 11220. Have you any opinion or any knowledge as to the commercial value of the Hackneys, I don't mean Hackney stallions of course, but an ordinary driving or riding home !—Well, I know this that they day than they did years basic, but beyond that I don't

think I could give you anything definite.

11221. Have you get any opinion as to the relation
of the bone of the thoroughbred and the Hackner.

either as to size or density !-- I have long held an

Chydesdale 1-Yes. opinion that the quality of the bose has as much to do as the quantity in the value of it. I1222. How do they compare as to quality !—The quality of the hope certainly is better in the thoroughbeed than in the Hackney 11223. And so to quantity, the measurement !-- As

vis.res. heress from 15.2 to 15.31-There are a reser

gaber of man was more no seems. 11204. In these any falling off in the demand for

that class of herses !- I don't think so. I think that class or moress :- a use o treat so. I think the there are plenty of those burses about. I think the

smaller horses are easier to get than the bigger ones.

11505. But there is a demand for them, a fair

11306. In these horses is action a desirable navisa-

11205. When you are talking about breeding

manber of that size used no doubt

ality !- No dealt about it. 11207. It is a thing that sells a horse onicker than

tendel I think so.

a rule, I should say, the Hackney would measure more than the thoroughbred. 11224. Do you mean measuring round the home itself or round the legs.—That is the way it is usually measured round the leg, below the knee. 11225. But then that measurement would depend on more than the absolute size of the bone !- I don't think so, my lord.
11216. If the covering of the bone was larger and thicker in one case than the other that would it, you measured the log, skin, and hair!-Quite so, but we don't find the difference in the size of the lipsments and tendons that we fast in the bose, therefore, if the leg measures large it is more to be attributed to the home then to the livements and 11937. I take it that the hone is remerier in size in the Hackney, and the quality is reperfor in the tharprophhend I. That is an 11238. Could you say whether they belance each other in that respect, or is the difference in favour of the Hackney or thoroughbred bull thould say in

ference to fermation, do you think this sound b-If the action is all round, so is commonly expressed, I should urefer that to the formation, but if the action is confined to sirealy fore action than I should revier the formation to the action. 11230. Do you think that, taking the Hackneys all round as a type of horses, that they are apt to be calf-kneed?—I have not noticed that; I should say that is not so.

11231. Have you ever noticed any inclination to short back ribs in the Hackney type !- No, I cannot say that I have. 11252. In general hove they strong thirly !- They have, and good horbe 11253. Mr. La Toppus.—You say the Hackney horse has improved both in conformation and action in twenty-five years. In what points of conforma-tion has he improved !--I think his limbs, his area, and thighs are better than they used to be

11234. Has he improved in his shoulders t.-I senot say that I have noticed that particularly. 11235. I take it that the Harkney horse is des-

conded from an old riding horse that used to exist

favour of the thereughbred.

11219. Level RATHROUGHL.—With regard to

breeding, it has been stated by a breeder of Hackneys that action is the first thing to be considered in pr

. Yorkshire i-He came from Norfolk and York-11236. Chiefy used for saddle purposes !--Yes. 11237. Do you think the modern Hackney is of a addle type I—No, I do not; I think he is more of a

11238. Then it is a matter of question whether he has improved or whether you value a harness horse has improved or wiscour you value a names source ligher than a riding horse !—It is a question which with you want. I think he is a better boking

article you want. I think he is a bette harmon horse than he was a long while ago, harmon norse than no was a song wous ago,

11239. But it is a question whether it is an
improvement to turn a ricing horse into a harmon horse !- It is a matter of opinion.

11250. At any rate his type has changed to some to has improved very much in his arms and thighs. 11241. Not in his shoulders !- Not in his shoulders. but in his quarters he has, 11442 Mr. WHENCH.—We have had it stated in

eridance before us, Professor Pritchard, that Exchange were specially liable to corbs and corby hocks. Is that your experience 1-No, the reverse of 11243. Which would you say had the soundest locks as a rule, a Hackney or a thoroughteed b-

I should say a Hackney. 11244. And his hooks are not of a formation that is more objectionable than curbs !--Predisposition to code costainly not.

11245. You have had a very large experience in examining horses, both at the shows and at horse hunders' own places for a great number of years !-11946. A great number have come under your

morvation !- Yes, many thousands. 11247. Do yon think a Hackney is a borse of a delicate constitution or the roverse !- The reverse, 11240. Have you ever attended. Hackneys in ill-

ness !- Yes; but most frequently when shown under securestances calculated to give rise to filmen. 11249. It has been also stated to no that they are of a deligate constitution, and have not the same or a deligate constitution, and have not the same power to recover from illness as a theroughhred icone, do you agree with that!—I think not. 1120. You think they have the more recuperative

wow t. T thick so 11551. Have the Hackneys been carefully bred for a long period new !-- Unquestionably. 11152. When you first went among the Norfolk and Yorkshire farmers did you find they were work-

could not give an answer to that question; I am not 11253. Have you formed any opinion as to why they are not worked now!-I think they are more kept for show purposes I that probably is the reason. The majority of the best Hackneys are kept for show purposes or for sale, and therefore they would

exercise. I have one myself that I have driven thirteen years now. She is in the Stud Book, and she has never been ill. 11354. Do you find that she is soft or unable to

do a journey L. She is a little too hard for me some-11255. In it your experience that they are a soft blood or the reverse !- The reverse I should say.

wers !-On that point I should like to saypowers?—On that point I should fike to may Pretruse Well, my own experience of them is that they have Pritched stavese powers, but from what I have beard people say there are many of them, after going a distance, 11957. But you have no experience of that !--! have no experience of that

11258. Is that confined to special strains !-- That 11359. Do you know at all why Yorkshire men. have given up breeding coach-horses and taken to

11556. You would say they still possess staying Nova & us:

Hackness in perference bull think it is a watter of pounds, shillings and pence. 11250. Doyou, know as a matter of fact, the Yorkabire men have rando a great deal of money lately by breeding Hackneys !- I think there is no doubt

11961. Then you were asked as to the riding and harmess trade-which trade do you think is the most certain for a farmer to attempt to breed !-- I should select the harness most if I were going to supply the market

11262. And you think that would be the wiscot trade for small farmers to breed who had only indifferent mares !-- I do, indeed. 11563. And their action is the countial point !-11984. Do you know whether the Harkween have

a shorter cannon bone than a thoroughbred t-I should think there is not much difference, taking a number of them, I should not think there is much difference relatively to the height. 11965. And you have never made any experiments to test the length or slope of the Hackmay's shoulders

compared with the thoroughbord i-Only by vision.

11966. CRAINMAK.—When you say you think that
breeding for horness purposes would be the most profitable thing for a farmer to do-what part of the country do you allude to i-London, of course. 11267. But I mean for breaders i-Well, of course, the breader would sell to the dealer who below the home to London. There is always more demand than

supply in London for harness horses.

11273. We are talking of what is the most pro-Stable thing for a factor to turn his attention todo you mean that universally all over the United Kingdom it would be better for him to turn his attention to harness purposes, or are you speaking of a particular locality !--Oh, no ; I am speaking of the

11162. Do you know Ireland at all !-- I cannot say I know Ireland. I have been there meny times, say I know kreisand. I have been there many tunes, but it has always been flying visits. I have been to Dahlin Show officially, and I have been through Ireland for pleasure, but I don't know Ireland. 11270. Are we to understand that, for instance, Month. Limmick. Cook, and other counties, you think Meath, Limerick, Gerk, and other counties, you sumse it would be more profitable for the farmers to turn, their attention to breeding for harness purposes than

whole kingdom throughout

to breeding for hunters !-- I should think if I were in Ireland, certainly. any you would like to my to the 11271. Anvil Commission !- No, my lord, I don's know that there is: but I should rather lay stress on one neaver I gave with regard to the tendency to ourbe in the Hackney's book. I don't think that is so at all ; I sen aree it is not.

Lord REPRESENTED in the chair, in the absence of the Earl of Dermayur.

Printed image distinged by the University of Southernston Library Distingtion Lind

Mr. John Maron examined. Mr. John. 11272. CHATRMAN.—You live at Sledmore Grange, And with your permission, if it is not out of place, I peopose to read my evidence. I must sak, Mr. Chairman, to bese my evidence on the courses, staying Yorkshire, and have beed Hackpers for some years ! -Yes, sir

Merch 4, 1837 Mr. Irka

so I must so back to the time when I first took in band my late father's first Hackney show mare, being then This mare was a a yearth of nineteen or twenty. This mare was a former," and was sold to a nephew in London when 11974. To this a statement of how you have bred by

your Hackneys !-- Yes : this old more was the uncirut 11275. Do you not think it would be better to band that in, or does it refer to anything at the pre-sent day !--We still retain the same breed, and I was

going to show the decability and the staying powers. She came to London when four years old, and he constantly rode and desce her on London stones urtil three months, and made up for showing in both saddle and horsess. The first four years she perer was beaten, and won during that time about sixty first was essent, and won surrous prize, when ascent acts we apprize, when age alone forced her to take a keek seat. It was always easy to hear from the pablic when a risking or driving class had just entered the ring; "Wast till Major's 'Polly' comes on the some, with "Wait till Major's 'Polty' comes on the scene, wan her fourteen year-old legs and feet from the Louisn stones; she'll soos polish the lot," and so she did. This statement can be verified by scores of Yorkshins. breeders still living that witnessed so many of her fine exhibitions, showing style and action in all her paces, as well as a perfect model in shape. She was then put to the stud, and won the Great Yorks at York, in 1806 or 1867, as a Hatkney brood mare with ful at foot; that same fool, three years later, winning the first prize for the best Hackney stallion warring the Brit place for the best Mackiney stalling cultural Hall in London. I also exhibited at the name Yorkshire show, as a three-year-old mare, "Miss Giles," recorded in Vol. L. Site also took first prize in her class, and was sold the spring following to a partner in the Harford and Bristol Brass Com pany, Dovigate, London, when she was rising five.
This gestlieran drove ber, along with a klood one,
from London to York in three days, when the blood more broke down. Mr. Stend, the gentlemen's name, hired a gig and drove "Mim Giles" in single to for a great drove "Miss Gites" in single to floarborough the fourth day, stayed a week, drove her back to York, bought another hunter at Walker's, and reached London again in three more days, when he wrote and told me "Miss Giles" had given him the greatest pleasure in his over 450 miles drive, and was as fresh as point, with logs as clean as glass, after endering her two stable companions perfectly useless. This gentleman afterwards made us a present of the mars, when a good lot worn : and we fortunately stuck to her strain in breeding such horses as Mr. Smith's "Satisfaction," Mr. Mark Pearsure "The Major." and others, which have done more to pay a landford corn-growing put together. I have letters from friends, which I shall be pleased to sabmit, bearing out my own statement as to the enturance of a good-leed Hackney. I don't object at all having a cross of blood in the third or fourth dam, nor do I think Hockney breeding has at all interfered with broater breeding, only in eases where the hunter breeder has noticed the Hackney breeder beating his head off in

noticed the knowney pressure nesting his near on in selling his produce; hence a good many discarded hunter breeding for the Hackney, and I find are sticking to its yet. I don't think for one moment

that all the eyeles and motor cars in the world, after the novelty is gone, will over cause our English

gentry, or their some and daughters, to turn their gentry, or their some and manginess, so turn ment backs on a beautiful typical riding or driving horse,

such as we Yorkshiremen keep trying to produce, not only because we admire them so much but also I

omy because we admire them so much, but also I take them to be a great safety-valve towards keeping at a distance that man who, once he enters your doors, puts his mark on all you have and refuses you to choose your own auctioneer. To save which I

shall go on trying to produce a nice Hackney, and would advise Ireland to do the same.

11276. I take it your experience has been shirtly in connection with pure-bred Hackmays i—We try to keep them as pure as possible. 11277. Do you consider that Hackney stallions and sitable animals to cross with common infector mares

-May I sak what class of muent 11278. The ordinary common mures I-Oh, ver you very often get good hurness horses, very good selling

11379. In your part of Yorkshire has the butter ceding decreased b.—Yes, I believe it has such a superior Hackner now that we find so much more ready a sale for it, not usatured like the brates the kunter has to belong to a gentleman that can ride it and make it before it is remementive. 11281. You get a ressiler sale for your Hackneyt

-I have always found it so. —I neve story town it to 11282. Is there a demand in your country for horses get by a Hackesy stallion t—Yes, sir, 11283. That is from half-bred marse or ordinary mares 1—Yes, where the cross is preducing a good 11284. Do you think that the eccuring of the

Hackney has had any effect on the breed of bunters in your district III scarcely know how to accept that question, I have seen some very beautiful house. by a H-chney aire out of a common mare, but I have no experience of hunter-breeding. 11265. You don't know whether they have proved

themselves good in the field afterwards 1... A road many of our Hackneys at the present day are as good ters as ever went into the field. 1125d. Are there many Cleveland Bays and Yorkshiro coath horses bred in your country !-- Very few indeed, it is very rare I see one 11287. I take it from what you have said that you think the Hackney is a stout good horse !—Yes, I do.

11288. Well, now, as regards his delicacy, do you think he is a delicate horse at all ur the coverse !--The reverse, quite, with the beautiful shapes we have got in our Eackneys now they cannot possibly be 11269. Mr. Fretwitziam,-You say you never did. breed hunters I-Only an odd one now and arvin

11290. Therefore your experience in horse-breeding recurs to be almost entirely confined to Hawkney benefiting of a high days t. Yes, I try to been them as high-class as possible, I breed nothing else except

cart-bosses for my own farm work.

11291. Then you have had no experience of half-bred stallions and Huckneys of a less good type!— Oh, yes, I have.

11992. What have you found with regard to them?

—I found this that it behaved ms to stick as small as

possible to the best class of Hackney I could get be money for it, a commonw bred Hackney generally goes for barness purposes goes for names purposes.

11293. Then the high class Hackney goes only for show purposes I—No, I did not say show purposes, but for riding purposes. We go in to get the pattern thing shoulders, giving beautiful depth of girth and

placing its rider and saidle in the proper position where he can sit without riding on its focalegs and plenty of room for the heart to beat 11294. Do you ride your best Hackneys yourself?

—Oh, yes, and drive them too occasionally. We always take it we can drive a Hackney when we take,

but we cannot always make a Hackney when we have 11295. But as for the worst class of Hackneys do

you find there is a good sale for them too!...Oh, yes, they can be sold favourably with other classes of they can be seed invorming with other cases of heree, not of the best stamp, you know. 11296. They are easy to sell!—Yes. 11297. On your farm do you work Hackneys!— Very often. We are very careful with them; we very orden. We are very careful with them; we often make them perfectly gentle to either ride or drive by light ploughing for three or four laters at a time. We don't go in for killing them.

Printed moves directised by the University of Southempton Library Digitration Unit Printed impre-distinged by the University of Southernston Library Distinguism Lind

11208. Mr. Warson.—Do you know how the Hackneys were originally beed; I mean in the early part of the century did you later from your father and to tax my memory as to whether I ever principbered a horse called Merrylegs, but when I get at the date of Merrylegs I found I was only a little loy two or three years old, so I could not remember him. He wanted me to remember him and fix it in my

when I was going about to buy, to keep that type in my eye so that I should never go far wrong 11599. What were the old mags used for in former days, riding or dairing !- They dad both, but those was a deal more riding than there is at the

11300. Did they do long distances !-- Very long 1130). And are the Huckneys at the present day hed from the animals that did the long distances !--

11202. In a great many of the best strains of Yorkshire Hackneys there are a good many crosses of thereughberd blood 1—Not a great many. I know

several that have a cross of blood in the third and 11303. That is what I mean; that was common in the Yorkshine Hackneys !- Yes, the people rather

11304. Why have the Yorkshire farmers given up breeding the big class of horses that Mesus. Rash look for 1-Well, there is a good many like myself. We have found that the Hackney paid us to much better, and it was a question of pounds, shillings, and pence as well as having a funcy for the Hackney. 11306. Then the real reason that Hackneys are

alvocated it

hred so much in Yorkshire now is because they my ? 11316. And if the Yorkshire men found the quashhorse or hunters paid better they would turn book to

then I.—In a stement.

11397. They have no projudice when their postets are concerned b—Gertainly not.

11303. Mr. Friuwitstau.—Would it be easy to get the control of the the mores now if they desired to turn back to the large well-bood thoroughbred; would it be very easy

for them in East Yorkshire to broad them now !-11302. Where would they go to get them !-- I for one would be harry indeed to not three or four on the market to morrow.

11510. I mean these larger mares that Mr. Newman wan talking about that he says he cannot find now in the East Riding of Yorkshire, you say they do exist !-- I beg your partien, I mean the Hackney

1131). Mr. Wanner.—When you are not breading absolutely pure Hackneys, with what class of mores do you think that a Hackney stallien predices the best result 1—Well I have had very little experience of that class of breeling. I have had a few half-bred marss sometimes that have bred beautiful horses to a

Hackney stallion 11312. But with thereachbred blood in these !-Yes, two crosses of blood pechaps.
11513. Have you tried any experiments, breeding from the same more with a thoroughbred horse and then with a Hackney stallion; have you any coinion se to the different results from the same mare 1-No; I have tried cometimes a thoroughbred stalling with

A Hashing mare.

11314. What was the rould to It soon cored me.

11316. And can you explain at all why it is that

11316. And can you explain at all why it is that rescat day so much as they used to 1-I don't know that I am able to explain it. 11316. Is it because they have become more valable 1—Our best mares, we put rather a great value on them, and we try as much as possible to take our

11317. Then they are so valuable it pays you to the year use them as nothing except broad mares?—Yes, six. 11318. CHARDEX.—I think you said that the Hackneys you have are percebred Hackneys!—Yes, 11319. Are they all entered in the Stud Book ton

You, sir 11330. Can you tell us when that Stud Book was

formed t... I believe it is fourteen or fifteen years ago, I am not certain to the year. I became a member the test year. 11321. Do you know whether the Stud Book is elessed or not !-- It is partly closed.

11322. It is not closed altogether !- I have been on the Hackney Council now for three years, and every time I sat at our meetings we have used the very greatest and utroot care we possibly could that we should have three pedigrees. There is no doubt in the first formation of the Hackney Society there were some very imported pedigrees introduced into the book, that is, at the commencement.

11323. Is there any other way of getting a nominal entry in the Stud Book bendes actual pedigreet-You cannot get an azimal in the Stud Book now unlow its sire and dam are both already regutered, it is so far closed as that.

11324. There is no case of inspection !—There is

no one of inspection now only for puny mann. The book in just closing now allogether for peny sati-lions. The peny marce are left open for inspection, the same as for the last three or four years—that is, the ponies not to exceed 14 bands and not to be under four years old.

11325, What other qualifications have they to have 1-1 suppose nothing but their pedigrees. As far as inspection goes my instructions have been when I was cent to inspect posite to take the type and the age. We look upon a peny having the anne Hashney type as our 15.1 or 15.2 Hackneys. 11216. What amount of paligree must they have

to get in |- I am sure I could not answer you that 11327. But when you go on your tour of inspec-tion for passing these animals don't you send some report with them !-- Yes. I have already said I give the type, the above of the spirmal, its age as correct

and its beight correct, and my inspection is always attended by a veterinary surgeon, inspecting as well as myself. He reports on the general soundness of 11328. As to polipre, how do you enter that in the Stud Book. I believe the inspection is whore you cannot got at the true pedigros of the animal !--

11339. Therefore you enter animals that do not so very far back?-In the pony mare classes. 11330. But the same thing was done, was it not, in the larger classes !-- It was, sir.

11331. Mr. La Toucer.-- Would the produce of

one of these selected pony mares by a registered Hackney stallion be eligible for admission into the Hackney Stad Book!—Xes; in a certain sense. They go in as turpected maren. There are three rades before they get a full register.

11339. As a matter of fact, the mare, se you sa that is put into the Pony Stad Book is practically in the Hackney Stad Book 1—Ten, and called a pony.

11833 Mr. Werner.—But it is in the pony parb of the Stad Book !—Yes. If it should appear in the Hackney Stad Book the owner that is registered in saked if he will write the wed. "pony." 11334 Mr. La Tourne.—These penies are 14 hands. They are not to exceed 14 hands pony mare may be put to a registered Hackney stalling of 15.2. The produce might be

macanity staines of 10.2. The produce might be 15 hands high!—Very casily. 11335. Would that produce be eligible for admis-sion into the Hackney Stud Book!—I believe they of them, and rest them to a little light field work. I

you go on raising a sire that you feel certain will increase the height by overly a hand. I would perfer a Hackney. 11.338. Colonel St. Quirrity.-You said you got some

COMMISSION ON HORSE BREEDING.

Mr. George Mr. Groner Gazz, Atwick Hall, Scaton, Hull, examined. 11341. ORANGAN - You are a large perchaser of horses, and I think have tried various experiments

would take it in and oull it "entered," before that it

in by "inspection."
11335. Charman, ... Then the produce of that again.

-It would get full registry, provided the sires that

had been used in the different crosses were registered

11337. Mr. Prygynanam,-So it is really the fact

that an animal can get into the Stud Book even now through the pony classes through an importion at the

present moment !-- I don't see what is to hinder, if

Morek 4, 1897.

Ke John

Orie.

have you not !-- Yes. 11342. Would you give the Commission an account of the various experiments you made, and the crosses

you tried !-- I think if I commence at the commencement of my eareer as borne hereder, forty-five years ago. I commence from a mare by Philip Ramudale's "Old Phenomenon," out of a blood mare. That was

the first Hackney sire, and the produce of that was

the best hunter I ever crossed in my life. Since then I have beed from that more and from her offsering by a Hackney stallion, and crossed sgain with blood have had some extraordinary good hunters, in fact I

have two now that I am hunting by "Southampton," out of a more by "Tallyho," and they go back to Harkney blood. 11343. I take it from that that you think the

Heckney strain does not damage bunter-breeding! -I think in one gross you could get so much better propelling and jumping power.

11314 Mr. Whinxon.—"Southampton," of course, was a thoroughbred!—Yes; he is by "Hermit."

11345. CRARRAUM.—But I am right in supposing

you think the Hackney cross is not prejudicial to hunters !—I rather prefer the Hackney cross to a out here. I would much rather broad from a Hack-ney mare, and put a blood horse across ber to produce

11346. Are you acquainted with the borses brught in Ireland 1-I cm not. I have ridden an Irish hunter brought over from Ireland.

hante bought over from Ireland.

1144. What sort of breass are beed in your distited childry!—Three is nothing but moraged bred comes by east hereon out of light meres. No one goe in patientality for Irevolling. The old coach herees save existint. When I was a led hince were firster of four formers had the right king* of coaching hered marse, but they are all estation here. Cannot be found.

11648. Mr. PITTERMALES.—You begon, you say, fortylory says are with those Blochmyst—Ton.

11349. In these days, the Hackney, I think, was

a riding horse. He was called, I think, a roadster i -In some cases, ver. 11550. And you yourself have tried to keep up that type of animal, to keep the Hacktory as a rolling

horse f-Quite so, 11351. But you would not quite say that the Hackneys that you see in the shows in the north of England are riding horses now! I consider very many of these are harness herees, and herees I would

11352. You would not like to ride!-You sould not ride them and I would not use them for getting

riding borses 11555. Therefore the type of Hackney of the resent day is not at all the same type as he was when you began to breed forty-five years ago !-The best type, the riding horse, there are a few of them, but these are so grown out, I don't know how it is, that I have always cope in for riding because with good shoulders and good hind action, and that is the way you will get the propelling powers for getting heaters. I may say I rode a mare with those crosses of Hackney blood, one of the finest jumpers I ever crossed in my life, with staying power, a little mare fifteen hands. 11354. I imagine from what you say that there is a considerable difference now between the Haskney that you hard and the type of Hackney that we see

the stamina of the mare.

very good animals on one or two occasions by a Hackney stallien out of a blood mare. What sort were

they !- Chiefly driving. If you got the action and the breeding that way out of a blood many, you never

often have a very saleable animal as a harness horse.

They would get both classes of horses according to

11340. But you prefer a thoroughbred burse in ret

a riding borse out of a well brod mare !-Oh! no, eg,

11339. You would not advocate a Harkney stallion with a blood mare for riding bosses !- They much do.

in the show-yards in Yorksbire, you bred a riding horse !-- I won't use a house that I think is not like petting a riding horse with beautiful even-balanced action, and flexes the hock, I like one that you can ride for fifty miles with ease, and fifty more if you wish, 11355. That would not apply to those extravaguaily high-actioned horses that you one in the shows !-Certainly not.

1356. So that when you advocate the best class of Hackney animals, you are speaking of the class you been yourself, not of the class you see in the show-packs—Not the majority of them, a great member of them are not rising-house; you cannot put a midle on them, it goes on the neck. I had an old Hackney mare, 14.3, I could always tell

her walk if there had been a thousand horses pass, if I could not see her I could tell her by the peculiar sound of her feet 11357. Lonn Asstrows.-This horse you see alking about by "Southampton" would be he in the Hackney Stud Book!-No, I have taken two or three "Tallyb," out of a mere by "Knapp," and "Knapp" was by "Sheppard F. Knapp."

11358, Mr. Frywerzaux.—An American howe, is that more in the Hackney Sted Book 5.--Oh, no, he is not eligible. I rodo a mare by "Kipsea Performer" out of a von mare, and she was as free a hundress as a man could cross, a good jumper with

11348. Col. Se. Quarras.-Do you think the presout Hackney with his conformation is a desirable erons for riding purposes ?—I don't approve of them myself, as an instance of that, I think yesterday in the Champion Cup class one horse was a perfect model of a risking home, and the other if you cut him in two, the hind legs are five years old and the front

is three, the age is the wrong way.

11360, Mr. WHENGE,—You live in a Hackneybreeding district 1-I do. 11351. And you have been a hunting man all your 11993. And hunt a good deal new t—Yes.
11993. Keep hunters and follow brands—do year
think that the Hashiney hard in your district has
done say hern to hunder-beeding t—I don't think
to I don't think it has interfered with it at all.

11354. You think it is possible to keep the twoquite distinct !-- Oh, yes. 11365. Is the Hackney a soft home or a hardy home !—I think the bardiest borse. 11566. Do you think he is a horse that can stay

Printed image digitised by the University of Southampton Fibrary Digitisation Unit Printed image digitised by the University of Southernoton Library Digitisation Unit

March & 1807.

but distancer!-I am quite certain of that. I have tried it in my own case 11267. You have had a good many cases-11257. For mave and a good many cases—you cannot be mistaken :—I have got into the sandis at seven o'clock in the morning, and ridden twenty miles to a meet, and bunted all day, and ridden back in the evening not a hit the worse. I was riding a four-year-old mare the other day, we had a tremendous non-year-we make an ountriesy, we must a tremendous run over a very deep country, she was by a blood hour out of a Hackney mare, the whip asked me what I was riding. I said "a four-year-old mare." "You have not been riding that all day." "Yee, I have."

"Well," said he, "I never saw anything like it; my

"Wat," said no, "I never saw anything face it; my fourteen stone 11568. Do you know what the origin of these 11265. Do you know what the origin of these Hashboys is—were they area from the old roadsters that the Yorkshire farmers used to ride long distaness !-- I have no doubt. 11509. Has much earn been taken in the breeding of Hackneys i-Not until recently, fourteen or lifteen

years ago. I remember the time 11570. And did they ride them long distances then !-- Very long distances; they were noted for their speed and durehility. 11571. Why do you think the Yorkshire farmers have given up breeding coach-horses and taken to Have given up mreening coaco-norses and taken to Harkneys t.—Became the fashion changed, there were no people to buy couch horses twenty years ago, and they because extinct; now three is a demand, but the

supply is not equal to the dozene 11512. Ave there not vicate of good riding Hadepers still to be found in the best study is Yorkshire? 11373. Horoes you would consider of a good riding type !-Yes.

11374. Descended from these old readstern !- Quite 11375. Without any had even in them to spell their riding shape 1—I roust admit the riding shape has been lost of late, because people have gere in for has been lost of late, because people have gone in for big horses to try to supply the faveign market; you eamont very well sell a horse to-day under 15-2, not an entire horse, for expectation, they will have then

big-they are not riding beens.

1)376. You think that the older stallions were smaller breves than that the Ramadale borses!-"Old Phenomenon" was not a very tile horse, they

11577. CHARMAN.—Do you call your own parti-cular horses pure hered Hackneys 1—Yes; I have some se good bred Hackneys as mybody. 11378. Are they entered in the Stud Book !-- Oh. s. 11379. It has been stated here that the first point to be considered in breeding Hackneys is action, and that the conformation is to be considered after that—

that the way you would think right to breed !is that the way you would think right so droud .--You if you had not the riding action, it is no use having the conformation; you must have the action, that is the most essential point—after that get the

11380. How are you going to get the riding shoelders, if you don't breed from an animal with good shoulders 1—If you lose that it is for want of properly crossing. 11381 You think the crossing gives the shapes i-Oh, yes; in every animal-whatever it be, sleep or shorthorn, or whatever it is you want to cross them _if the dam is deficient in one point, try to get the ire good in that point.

11382. Is not that conformation—do you consider that before the action !- I consider the action is prodood by getting the right conferention.

11383. How can action bring conformation, surely

it is the conformation brings the action, unless you brought the action artificially—do you believe in -I think there is a great deal of artificial action 11354. Then if you saw an artificially-actioned burse, so to speak, you would look twice at his shoulders, oreus, so to speak, you would seek twice at his shoulders, if he was a stallion, before you would put a more to him 1—If I was judging one I would tell you what I should do; I would say, "You go four miles an hour and let his head loose, let him walk, and then put him into a slow trot of five miles an hour," That is the into a slow tool of five name an near." That is the way to get at a riding horse's notion. 11385, Without getting on his back 5—Yea, it will tell you his movements; I think it is a great mistake in the show ring that horses are allowed to be shown as they are—it depends entirely on the man; if you have a man that one run fast and make a good shout,

and bustle about, it is taken that the horse has action. 11380. In there anything else you would like to state to the Commission !-- No; I don't think there The Commission adjourned to next morning. TWENTY-SECOND DAY .- FRIDAY MARCH 57E, 1897.

Stitles at 12 Haroversensen London W.

Present :- THE RABL OF DUNKAVEN, E.P. (In the Chris); LORD ASSTOWN; MARQUESS OF LONDONDERRY, E.G.; MR. J. L. CAREW, M.F.; LORD RATHDONNELL; HON. H. W. FITZWILLIAM; COLONEL St. QUINTIN; Mr. PERCT LA TOUCRE; Mr. F. S. WRENCH.

MR. HUGH NEVILLE, Secretary.

Mr. WILLIAM BAIRDRIDGE STREET, and

11387. CHARMAN.-You live in Lancachire, do 11594. Ruring hopes t... Yes. 11395. Do you leave the congested districts of the vantern seaboard?—I was there just once or twice: once TOR BOX 1 Yes, my love. 11388. You are Secretary of the Lancastire Agri-cultural Society 1—Yes. for about a fortnight near Ballingobe and Tourmakendy, and round shout there. 11591. And do you deal in horses 1-No. 11590. But you have experience of horses 1-Yes; 11395. Are you able to give any opinion as to the

I do a large commission business, but I don't get any horses to hav and sell. class of mares that the farmers breed in these western districts 1-Well, I was anxious to see them, and bought a few of their progeny whilst I was out there. 11391. What class of horses 1—Shires, Hackneys, 11392. Both pitting and driving horses !- Yes.

seven or eight foals, one or two two or three-year-old mares; no broken hores. I did not find anything that was broken that I cared about, and I bought a 11393. Are you at all acquainted with Ireland !-I have been there a good deal. fare replacken ones.

11397. How are they bred t-Mostly by Mr. itchell's Hackney, and what were not by him I William don't know how they were bred; it was evidently a local horse and not a three-schired, and, threefore, I

had no idea what the stamp of horse was. I did not sake further inquiries, except that he was not a Hackney or a thoroughbred. 11398. How did those turn out !--Well; I turned them over to a man that was with me at the time. Only one more I know of the was said and did very

Sho is near breeding wes. Can is now breeding.

11399. Was she by the Hackney 1—She was by
the Hackney called "Star of the West," that used

formerly to stand in Tourmakeady. 11400. Do you think generally from what you mov that the class of mores there would be suitable to that the class of mares there would be remaine to mate with a Hackiney i—Quite so. 11401. To produce what i—To produce a good allround saleshie home from 14 to 15 hands. I don't

think the first cross would be likely to produce anything good enough for either harness or riding ; but perhaps a good tradesman's horse 11402. And if the best of the fillies were kept and

crossed again they would probably be according of a botter class ?-- Crossed again with a Hackney, ves. 11403. Would you perfer the Hackney to a sound suitable thoroughlyrd house for that kind of mare !-I think a thoroughbred home would be too much

quality for the mares I saw round about Connenses. and that neighbourhood 11404. You would not expect much from the first 11405. But after a time you would think they would turn into a fairly saleshie valuable description

of horses-I do. 11406. Do you consider those districts espable of producing hunters or high-class horses !- They have

not size at present in the rusce I have seen to produce either size or strength. 11407. Do you know Irriand pretty well generally 1 ... Not the South of Ireland, except just flying visits 11408. Then you probably would not be able to

give us any information as to the question of the me give us any information as to the question or the im-provement of horse-tireeding in Ireland generally h-I have bought a good many borses from the faire in Ireland, but I have not been round about much amongst the farmers. I don't know much of the conditions under which they are valend. I only know the horses when they are raised and brought to a marketable place.

a margetatos piace.

11409. We have had a certain amount of evidence. to the effect that the Hockney is not a suitable sies, to un cases that the Hankery is not a supatro mee, at any rate to get bunders, have you any opinion on that point i—I don't think he will over he used for that purpose, will be?

11410. We have had some evidence also to th effect that the kreeders in those portions of Ireland where the hunters are principally heed are afraid that the use of Hackneys in any part of the country, to a large extent, would result in the Hackney blood permeating gradually through the country and would perturbating granted with the profitetion of high-class hunters for which Ireland is rather colclusted, here you say orinion on that !- I don't think they need fear much.

It descends solely on the selection of the Hackney that goes into Ireland. 1141). Have you seen the Hockneys of the Con-gested Districts Board i-I have. 11412. Have you any opinion about then 1-Yes.

on the whole they are very apitable for the country. and I think some of them would be very likely to get high class salvable bornes.

11413. De you think the demand for what has been called the middle between the high-class ourriage borns or bunter and the class of animal that goes in back earn and things of that kind, do you think the demand for that sort of general utility borne is likely to increase or diminish !-- I don't think there is likely to be any strious alteration to 11414. There is a good demand for that size of assimal now t-Certain

11415. You don't think other means of looms. tion, bicycles and motor cars, are likely to leterious with it I I don't think on 11416. Do we gather from you that to receive

that kind of animal might he profitable?—Yes, 11417. Do you know America at all, have you ever-been there bell was there last your but one.

11418. Are there many Hackney sires in America ! -There are a few, but it is such a large country

that they are considerably acastered, 11410. And do they breed generally pure hed Hardeneys I—I made it my hardness more particularly to visit some of the Hackney study there, and di-

not see much of the outlying districts where been were storoly travelling. 11430. To what one do they put the produce of the Hackney in America, riding or driving t length of time, scarcely to say, except in a few isolated cases. Men like Mr. Cassatt, of the Pezz-sylvania Railway, and Mr. Fuirfax, of Virginia, and

Mr. Webb have used them, hat sport from these Mr. Webb have used them, has sport from those three men, I don't think many people have an oppo-tenity of using them to any great extent, not the full pedigreed Hackney. 11491. Have you seen in Ireland any of the pro-

duce of the Concested Districts Board Hadrarys !-I connot say that I have, except what I have seen at the farm. I have not been in the congested district. I have seen several that were bred from penies from those districts. I understand that they are now at

the Board's form 11422. Have you seen sunch of the reeduce of wi wate Hackney stallious !-- I have som some of "Excelsion's stock, and a great many of "Leri "Excessors" "Excelsion" is in the North, and "Lord-Rattler's." "Excelsion" is in the North, and "Lord-Rattler" in Tournakendy. A good many of the latter stock otens over to England.

11423. To what purpose are they put !-- Harcen 11424. What do you think of the produce which you have seen 1.—I think they are very good indeed. 11425. Do you think the Hackney shufn would be

easily detocted in a mare in a generation or two, accuming, for the sake of orgunest, that it would be injusticions to introduce it into the parts of Ireland that breed hunters generally, do you think the average farmer would be able to desect it in a new -I think probably he would 73.698 Bo if they show they could resortedly

available it 1.—Yes, and if they show they could precessif so on Chairman you pass a good many horses through you bansis every year, I suppose to sell b-Ob, no, I bay on commission, I don't buy any to trade on.

11428. What class of horse of the lot that go through your hands, do you think fetches the residual market 1—A horse with action. 71429. And was think that is contained in the

Heckney more than any other class !—I think so in a greater proportion.

11420. You think they are more salesbie in the

English market than any of the other class of house! 11431. I think you said you bought some mares in

the congested districts !-- Yes, some feels and some 11432. What stamp of more were they !- Just the first cross of the native pony. 11433. Orossed with what !- The Hackney "Star of the West" and "Lord Rattler," "Star of the West" was a Norfolk bred Hackner, "Lord Rattler "was by

"Lord Derby IL"

11434. Was "Star of the West" a good stamp of locus!—Yes, 15.3, a 16-stone horne. Il 435. And it was the results of "Star of the West" eroused with those pory marse you got, what were they like!—Very straight on the legs and very slable suinnels.

eers they like t—Very stealight on the lags and very shable arimath. 11434. So you saw a decided improvement in the first cross t—Yes. 11437. It is the second cross you say you are looking to with interest t—Yes.

ing to with interest i—Yes.

11438. Have you seen any results of that i—X have seen one mare, three years old when I get her, the hat had one foad to "Champion Ganymedia," as she has a very good charce.

114317. It is a decided improvement on the dam i...

You, the more was a commental more, that is the positive. 11440. Then the second one is an improvement on that!—The second one is three years old and went does three railes across country, took the ferrow and

short three mass across octours, was an exrespecting.

11441. Was that well grown i—Yes.

11442. Have you sold that sines i—It was sold immediately to Mr. Tom Mitchell and its sold her saids and the in breeding to "Charmite Garangeis."

gapin, and she is breeding to "Champton Ganymede,"
11443. What acts of price would be give for that
minual I—In that a fair question!
11444. No, take the average I mean i—That more
within air mouths of her coming to Regland just
middle brend, when the was treated and met free

wark she trobled her cost in six mouths.

11445. You have seen masses in the hunting souther in Ireland 1—1 have seen them at fairs.

11446. Have you been in the regular hunter breeding counties, Mesth, Kultare, and Tapperery 1—Yes,

I have been at most of the fairs.

It is 7. You have seen the mares from which most of the good hunters are bred that are bought by English doubter 1—30. I have not seen the mares.

It is 8. But you have seen the result of the mares!

Eagus Dellats 1—305, I have but were the inserse.

Ilidds. But you have some the result of the mance!

-Yes, gazarrally kept one or two and ridden them.

Ilidds. Have you over had one that was got by a

Hadrage from a bunder mare 1—30.

Ilidds. All have been got by thoroughbred bosset!

-That I recall not say.

11(5). Would the appearance of the natural loss pre to bullers it was pily in a good house 1-Ves, but and necessarily by a linercoghilered because it was by a good horse. 11(5). You have not ridden any hereo yearself that was pit by a Hackney call of a bunting more!— I don't know, I am reling a horse myself of Hackney stress but I think has in other too his for a Hackney.

stems, but I think he in subtree too hig for a Hackney-1153. I think Nr. Burdett Ostella and he advocable Hackneys for barness, but not for modific, on second of the privacy station, I think he and, have yor found that I—The Hackney has been trained for the control of the privacy of the control of the decoupling all has here trained for this travelee of presented a good many mora to galling, and I think it would be then of breeding bunders, but I don't history and would not be greatly bunders, but I don't history and would not be greatly bunders, but I don't history and would not be greatly bunders, but I don't history as

wond solver by getting the Hackmay cross into these, because it would give good texting action, and there are many Hackmays who, if they were trained and had filling, would be able to stay as well as hunters. Ill 16-1. Would you buy a lumber if you were told it was from a hunting breed mars by a Backmay 1—1 for the work of the hunter is to the hunter in the

over kinner think I would mittil Land seem it sand mee it side on is—land an sane trial.

1105. It is brooker that you it was either by a same part of the properties of the Hackerop on a bunding mane for a bunder of the Hackerop on a bunding mane for a bunder of the Hackerop on a bunding mane for a bunder of the Hackerop on a bunding mane for a bunder.

Printed image challened by the University of Southermoton Library Divilegation Unit

11417. Then, if the Hackmays got out of the congested districts and got into the hunting districts of a freshoad they might be detrimented to the breed of intunters say over to England 1-1 don't believe to. I think the Hackmay cross in the more will do no harm. I would not advise the Hackmay as the top cross on to the more. 11450. Mr. FITEWILLIAM.—What is the objection

I would not surrise the Hackney as the top cross on to the mare.

11456. Mr. FYTZWILLAUK.—What is the objection to the three-parts-breed heres!—Because I don't know how he is bred; but we do know that the Hackney cross of a good strain—he comes from "Plying Châbiars." You may have a Clydradale or Gieveland in the three-parts-beed hore.

in this three parties occur into a 11450. You may, but may you not also in the Hackmay 1—I don't think so. We have a pedigece which perces it is an gruer-berd as any other breed. 11400. In not the Hackmay stud-book very recent!—You have been the had the high of Wetherbey's stud book to back it—northy all the lost arimals can true back to be an extra parties.

to Wetherby's in the direct male line.

11661. It is to of the case that you can introduce more into towe I—No, except pooles under 14 hands.

11462. But overstally they go into the hook I—If they breed good stock, but they are not likely to have any over-horse blood is them.

any ser-horse mood in them.

11468. I don't think a three-parts-heed Lorse bred in Irektod is likely to have much cart-horse blood by You have go a good many cart-horse in Irektand, and they are the very kind likely to produce more bona. You meet have a certain alloy in three-parts-heed horses, and I don't think they have used Hashnaya

you must have a content aloy in three-partnerses borren, and I don't blink they have used Hackneys long cough to produce a three-partnersed stallings with Hackneys bood; therefore you must have carb-bree blood—as Arab would not give strength corugh.

11464, World not so Arab be a useful bling amongst the position of the country!—I don't think may think plitter in build would be likely to be a re-

a saything lighter in thild would be likely to be a repressentire natural to sell likely you saw sense of the Hashing shallions, and likel them more or least— Yes; I know both home before they went to Ireland a 114ft. Did you see any of the thereughted hower that were standing about in the name district to—I away.

to here—I cannot remember his name—at Hollymorent four or five years ago,
i 11467. Belvaging to that Board t—No, I don's
think so,
I 1168. You only naw one t—I only naw one.

11468. You only saw one !—I only saw one. 11469. Leed RAYEDSENIL.—Have you over beard of the old Irish breed of horses that have not been erossed with imported earl-torse blood !—I have not, but I don't doubt it is no.

ey. 11470. You did not see it given in evidence at a conformer stage of the inquiry !... I have not seen any of on the evidence you have taken. ye 11471. Have you ever seen what they call three-

for quarter bred stalliness in Ireland — I have, nour Belthe fast, and also close to Dublie.

11472. Those two places, I suppose, would only all have house crossed with either Clydesials or Shirot ith — I shyali blak not about Dublie. The heres I saw we, there, I deep resumptee what he was, but he was a

one, very good-tooking horse.

11473. Yaw don't know anything about Tipperary

sold 11474. Hyou had a three-quarter hard horse with
two or three crosses of thoroughbeed on both dam.

old it and ire's aid would yst origoners on 600 dmi.

I — If he were a riding type or a horse that had estion I have work out. Take a horse from "Hennis" they would get good jumpers, but take the "Galegia" bleed by a through "its kinner" yee would not have a horse that the elded like a good riding horse.

1 booked like a good riding horse.

should have a good room,

"The three quarter size I am allushing to
may would be of the hunter stamp!—Not necessarily, tocause he had two or three occess of the complished.

the 11470. Certainly not; that if he came free a hunter
of a mars with two or three cooses of becoming in him
more and the size was thorocophired, would you object to
that clear of faces 1—Not dat all.

Morel & 1881.

288 a Hackney of the Congested Districts Board 1-Xes. Willen

at a sale in Yorkshire.

11479. Did they fetch good prices!—They brought profitable returns on the prices I paid for them. 11489. Do you think they would be useful for form work if kept by the haveders i-They were not like

11431. They could not be unful for doing the ordinary work of the farm in the district !- In that district they would, because their mothers were doing stronger animals than their mothers.

farm week, and they were better proportioned and 11482. They were all first cross horses !- Yes, and therefore had no pedigree that admitted them to any stud book and were therefore uselson 11488. Do you know the Congested Districts sizes !

...Yea, I saw them six weeks ago, and I saw several in England before they became the presents of the Congested Districts. 11484. Mr. Wagners.-Hove you been a hunting man most of your life t-Yes, I have ridgen to bounds ever since I was soven years old.

11485. And have you judged at a great many shown in different parts of the United Kingdom 1—Yes. In observed parts of the United Kingdom (- to. 11486, Do you know much about Mr. Mitchell'a farm at Tourmakendy i—I paid a fortnight or three weeks' visit to it as one time. 11487. Do you know whether before he teled the Hackney breeding there he made other experiments to hreed hunters !- Yes, he got a thoroughbred horse

11.688 Tild be broad many animals by that burnting hiere 1-Yes, a good many 11489. Do you know why he gave it up for the Harkeney!—Because they did not pay to bring to England to sell, and he had no use himself for them execut to rell

11490. He heed them for the market !- Yes 11491. And you know they did not pay 1-Yes. 11491. And you know they six not pay :- a.m.
11492. And then he put a Hackney there, do you know with what result 1.—It has done very well. 11493. And he constantly sells animals hred in Ireland in English markets "-Yes, every two years;

he is repulse still. 11494. Do you know do they fotoh paying prices ! -Yes they vay very well, and he brings some of his tenants' foals across the first year to help to sell for 11495. Have you over gone into the question of

statistics at all as to what number of hunters there are brought from Ireland every year 1-Well, I don't know what number of horses would be brought. can only say the Government statistics of the surches of horses that do come from Iroland of all classes. and you may take it from the number of hunts in England the probable number of hunters that are re-

England the probable number of numers that are re-quired every year.

11494. Have you at all made any calculation as to the probable number required — I could not my distinctly. I did go into it come time ago.

11497. Do you know whether it is a large pro-pared to the probable of the country is a superior of the country is a superi setion of the general horses hard in the country iportion of the general nones area — as the general trade of the country. It is a larger proportion than the first-class barness trade, but not nearly so large as the ordinary riding and driving trademen's trade 11498. Then there is a large trade in Ireland

autside the hunter in high-class carriage horses I ... A very large trade. I have some statistics of the Board of Agriculture which gives the number of horse which have come from Ireland. This is taken from the last return we have, 1896—34,500 were exported from Ireland to Engined in 1895; we have not get the 11499. Do you know that in 1896 it has gone un to 40,000; it was in the Times !- No : I have not

horses below the high class hunter and harman horses t—I should know 20,000 so seen, a 11501. Do you think from your knowledge of the trade in England that there is a good trade in that class of horses which can be obtained by the book class of horses which can be contained by the Irish-men if they had any help in that direction 1—1 do. 11502. Do you find the demand for that class of ores increasing or decreasing in the North of noves increasing or overessing in the North of England!—I think it would increase from your country considerably if you could get house will, atmighter action and better and stronger bind atmighter action and better.

quarters which the Hackney will give to ver-11503. Are the Irish hersen deficient in action at present f... They are deficient in that kind of action which really sells well for harmon horses. 11504. You don't find in the North of England

that hicycles and the idea of motor carriages w lemening the trade in that slam of horses I... Not at all 11000. Has that trade increased in late years !-Ob, yes, considerably; more people drive in carriages now than did, I am told by coach builders __nearly 100 per cent. 1150f. You have made inquiries from the coachhuiblers 1-Yes. 11507. And the trade in small corriages is very much larger 1—Yes.

11508, I suppose in that class of houses the onething that sells is action!-Straight setion; it does no neater whether it is high or not, but it must be straight action, and that is a peculiarity of the Harkany have that he has been had with straight limbs and straight action, and I do not think it will do harm if he gets into the hunter in that was 11609. Do you think that any of these large dealers in England, if they saw a house that in appearance suited them, say by a thoroughbard horse, would refuse to huy it because its dam happened to be hy a

Hatkney sire !—Not at all.

11510. You know their trade and know a good none many of the dealers!—Ves. I know good horse hunting at present with the Hatiney steals.

11511. How were they keed! —One was by "Sportsman," not a very well head Haskney and on of a well-head mare. What is he as a hunter !-- Perhaps one of the best that ever looked through a bridle; he was sold for £300 and went to Leloustershire, sold for £400 these and is now back in our constay, accorden at sichteen warn old, bunting regularly and carrying nition stons.

11513. There is no doubt about his breeding!—
Not at all; I hought him myself when three years old.

11514. Mr. Canw.—Not in Ireland:—No heal
in Westmorehand. I know the Master of the

Oxenbolmo Hounds is riding a horse by a Hackney I don't know his dare's breeding 11515 Mr. Wassum.—Is that a good horse!— Very good. He stays all day with the stag becasis, and stars so were flot, and ours is a rough undulating 11516. Are there many instances like that !-- I only know another. Mr. Sawray Cookson's mare, by a

thoroughtred horse out of a registered Hackney man; won at the Yorkshire and other Royal Shows and was a pailing good hunter. 11517. It has been stated to us in Ireland that the Hackney horse is soft !-- I have not been able to ascertain where the softpess comes in. I have goes into the pedigree of several of the leading strains of in the sixth generation to no less than eight crosses of Children," "Fireaway's " dam was by "Skysomper" by "Hightyer," a son of "Flying Children," that was a thereighbred horse, besides a more recent cross of "Tasteh Sam." going back to the "Godelphin Arabian." you could not get much better breeding than that. 11519. Is it a fact that the principal Hockney homes at the present day truck back to the thorough, norms as use present cay trace man to the thorough-hed blood you have mentioned 1—Yes. This horse "Lord Derby II." traces back to "Blaze" on one "Lord Derby 11." traces own to " man on the

"Figures and "Demuse's" -- "Figures y" (142) traces back to Leed Fitzwilliam's "Blacklegs," by "Standard," a lot of thoroughbred blood; whilst "Rufus," who was a champion horse, his grandam was by "Eamworth" by "Outlaw," the sire of his data was by 'Lister's Wentworth" out of a theroughtred mare.

11521. So that practically in their early breeding there was a large admixtore of thoroughbred blood in the best Hackneys !- Decidedly. 11552. I don't know whether you know any of the mediarress of the horses belonging to the Congested Districts Board, but did it come under your

notice that a large amount of that blood is in the 11528. Have you formed any opinion from actual

I have seen a good deal of them, and I have oue or men who have used them.

mass with care used incom-11524. On the particular point of endurances.— Yes. I have a letter here from Mr. Anderton, of Brease Hill Stud Farm, Caclley, Preston.— "I wish to give you the following facts respecting a Hackney mere, sire 'Lord Derhy IL' (417), dam, breeding unknown, which I beoght in 1686. She

was then coming three-years-old and unbroken broke her myself, and in 1888, the Saturday before Whit-Moulay, I drove her from Acerington to Har-rogate, which is just fifty-one miles, in just nine hours, and I stayed to ball at Colne for an hour and house travelling or eight and a-half miles per hous loans traveling or eight and a-sair miles per hour, and she did the last eighteen miles in an hour and fifty minutes. Sunday, Monday, Tuesday, Wednes-day, Thursday, Priday, Saturday, and Sunday again following, the average miles per day driven was just ever thirty, and on the Monday I drove bur back again the fifty-one miles in nine and a-quarter bours,

again the inty-on more in nine and a-quirer cours, belling three hours again, having completed in ten-days just 342 miles. I have now a more (8,935) "DoBy," size 'Charley Menrylogy' (123), does by 'Sir 'Charles' (768), that has been driven sowenty-eight miles between eight o'clock in the morning and eight o'clock at night. These are only two cases out of many I could give. I have a cob by 'Performer'

am were could do thirty to forty miles a day the year Those souther letter from Mr. Green of Welshroel. No man can my that he was a Hackney man, portico-tasts. He was a judge of the Shire Horse Society

hat year, and he keeps one or two. I bought a very good Hackney mare from this guntleman, and understood from Mr. Bobertson that she had been ridden to hounds. He writes:—

"Mr. Robertson missanderstood not. I did not rion 'Modesty' branting, but backed her regularly and found her everything you could wish as a riding Hackney. I may have told him that I fall sure she would carry sayons to houses all day, and I still think so. My reason for not hunting her was that I always had the mare in foal, and did not think is aways had the mare in roat, and on not term to safe to do so. My brother, one of the hardest riders in this neighbourhood, is now riding and hunting regularly a feur-year-old by our Hackney stallion 'Blass II.' (2,376) out of a three-parts-blood mure, and he same he never role a better stayer, and that he is fast enough to ride to any hounds. I sen of

get the best all-round riding horse you can produce."

I have another from Mr. Taylor. "The mare, 'Colling-worth Blue-tocking,' is still in my possession, and ready to do anything. I drove a herse-leving farmer to a train, six miles with her and nearly scared him to death, and yet also is an onice as a sheep, and the easiest in the world to control.

as a sheep, and the cames in the works to control. When we had arrived he conduit speak, only he grouped my head as though he never expected to see me again. The more (5,036) 'Cullingworth Blacetock. me again. The more concept commagnees a successors: ing, was turned out to grass in March last, and until the day before Blackpool Shaw, was not again used and had nothing but grass. She was then ouight, and had nothing the green. One was some causes abod, well groomed and fed, and lay in this night, and at 6.10 the following morning myself and a friend drove her in a rather heavy give to the shows, a discirove her in a rather heavy gig to the shows, a dio-tance of feety-one miles in under four hours. Of

was never unged on. Returning the day following we added three miles (by a datour) to the journey, and were about three hours and forty-five minutes on sivanced in foal, and made the return trip without testing food, the sudden change from grass to dry keep having apparently disarranged her digestive organe. She however, took her meal on arriving hence, and on the morning following denoed out of

11523. Do you know how that mure was bred t-the was bred in Irehard, at Tourmalously. 11526. Have you any other special instance !—Mr.

which he ride, out regularly, and has ridden them to the meets and back again at night. They are by a Hackney of his own breeding from a mare of his own. 11527. He says they can stay !- They can stay all

day, and easyly him hack without ever kicking their tors in the ground or anything.
11528. Chairman.—With the exception of one of the animals you mentioned, you know nothing of them yourself 1—I do not; not in the least.

11576. And the account, especially in the first letter you read, of the distances these saimals travelled, would you think that was a fair average of what an ordinary Hackney can dot—Yes; I think it is a good Hackney. It is rather above the average.

11533. I forget exactly the distance travelled in a day !-345 miles in the nine days. renget. Oh! yes. I don't think that it would be likely that every horse could do it. 11532. You hunt a good deal yourself !--Yes; I

are always hunted. 11513. Have you ever ridden a Hackney yourself banting 1-Never 11354. What kind of hunter do you generally use !

1159. What kind or numer on you generally a thoroughbred one.

11523. Where do you get him from 1... I bought a od many in Ireland.

11036. For your own hunting you prefer an Irish luming by a thermuchbred size b. I don't know if I prefer it, hat it has been slways my pleasure to makes one, and I see not a very great weight, and except for one I san riding now, I think I have always hau-high had ones, and he wen the jumping at Dublic. 11537. I suppose the Harkmay type was particularly well established and distinguished before the institu

was generalized and detringuished out-of-standard tion of the stud-hook to-Decidedly; they had kept a very good record of the male line, but not of the feerale line. 11038. Do you know if there was in Ireland a

fairly distinct type sometimes called the old Irish brater I are not sufficiently sequented with it to 11539. Assuming for the sales of argument there was such a type of animal and crossed frequently with a thoroughbred sire, would you object to the stallion being half bred under those circumstances, precluding

any strain of cart-home blood or Cleveland blood 1-Service 1, 1963. No William Busheldge.

11540. Your objection to the half-bred I gather is that probably the alloy was of the eart-horse strain? 11541. I think you said that of your own horses

you are not quite sure whether one of them had a Hackney strain in him or not !- From his appearance I would think so, but not from his size and substance; I am not quite sure; he won the jumping at Dublin some few years ago. 11542. I think you also said that, in your opinion,

the average Irish farmer would be able to detect after several governtions the strain of Harkury blood !-- Not after several generations 11543. I did not know whether you credit the average Irish farmer with a greater facility for the detection than you possess yourself !-- No, it was in the first cross that he would not have much difficulty; they are a hone with strong powers of typing themselves that I think they would be very likely to show.

11545. You reads an estimate of the total number

of horses imported from Ireland in 1890, as to the proportion that the hunters and high class horses would bear to it, that is from your own general knowledge of the trade, I suppose !-- Yes. 11546. Have you formed any estimate in your own mind of what the relative value would be, in round numbers you say 10,000 would be bunters and high class horse, and 20,000 general utility horse, have you any ities of the relative value of the 10,000

against the 20,000 !-- I have not, become I don't think that many of the horses that are oventually sold for high prices are sold for a lot of money in Ireland; it is a question of education or notting them into the hands of men who can place them 11547. At any rate you cannot give us the relative values !-- I don't think the relative value is very different in Ireland between a fairly moldle-class bunter and an ordinary riding and driving mag; is is the man in England who gots it, or the man who brings them over to English fairs; the breeder does

not reap a large asserant of benefit. 11548. Do you know anything about cavalry re-≃ounts 1—I do noi. 11549. I suppose horses bred in Yorkshire and other parts of England have passed through your hands I—A good many. 11580. Can you form any opinion whether the

breading of Hackneys in Yorkshire has interfered with the breading of hunters !- No, I don't think so. 11551. Not at all 1—I don't think so. 11552. You think as many good hunters come out of Yorkshire as before !- You, there are more men

hunting, there are more horses wanted. 11553. And in your opinion the merical value of the general utility horse keeps up as good as ever i— It does, as good as ever. 11554. Lord LONDONDERRY,-Those 34,000 horses. are they all bred in Ireland !- That I could not my ;

there are no statistics given except that they come from Ireland to England, and that includes also the bories that pass through England to go to France 11550. Lord Asstrows,—It would also include borses that had gone over to Shows in Ireland and come back again !-- Yes.

11556. Mr. Freewitchen,-How dià "Sportsman" was bred!—He was by a Hackney, but very little was known of the breeding of his dam. He was out of an ordinary country-bred more; it might be an Irish mans or anything. We get a great number of Irish horses into Westmoreland and

Cumberland. It might be an ordinary ride and drive mace of the country or an Irish bursa. 11557. Was he by a stud-book Harkney !- Yes 11558. Lord RATHDONNELL.—With reference to the \$6,000 horses, do you know whether with a cavalry regiment moving from Ireland to England the horses of that regiment would be in that number !- Those are burses that are traded in. The cavalry removes would be included, but not the horses of a cavalry 11550 Mr. FITSWILLIAM.—How would they on-

clude thom in the statistics - The Government would 11560. Lord RATHDONNELL-I wanted to know how you got those figures !- From the Board of Agri

culture volume. 11561. Lord Assrows.-Are these horses that have been bought and sold !- They are house that have been bought and sold and shipped. I don't think they would inslade the Government horses. 11562 In Mr. Andertou's letter, the first mare

ou mentioned, I think he said, was by a Harkney i-By a Hackney, dam unknown. 11563. Does that constitute a Haskney1-No: she is not in the stud-book. 11564. Hay I ask you did you lary or hire any sizes for the Congested Districts Board I-None.

11565. Mr. La Touran.—Are you a member of the Hackury Society's Council 1.—No, sir. 11565. But you are nominated by the Hackney Horse Society as an expert in Hackney borses to give evidence to this Commission. I policed that when you

were telling us the pedgree of these Hackney ures descended from thoroughbred borses, why !-- I don't know that I set particular store upon it, but it was a proof that they were bred from a good line of horse.

11507 You asknowledge that the thoroughleed house in a good line !- Decidedly. 11508. If there is any advantage in bring head from

a thoroughhed home, surely the neutry you can get to the thoroughbord home the little !-- I believe that. 11559. I noticed that those thoroughbred horses you referred to in the pedigree of those Hackasy stallious were horses that were about contemporary

11570. By this time you must have pretty nearly effectively crossed out the thursughbred blood from the Hackney !-- I don't think it has been grossed out, because fresh thoroughbred blood has been brought in at other times. I don't know that we are breeding to keep in the thoroughbred blood, but for a

barne of trotting action.

11671. You occasionally bring in therengthred
blood againt—it has been done so.

11572. Way—IT as I don't know.

11573. Way—IT as I don't know.

11673. It is admitted then by the lovers of the
Haskner that theroughbed blood is of advantage to

the Hackney !- Certainly; it gives him quality, and some of them are wanting in slope of shoulder, and are perhaps too strong in their muscular develop rasest—a rough-looking borse, and they are admittedly 11574. It seems to me that if you follow that to a logical conclusion, if you credicate the Hackney and

stick to the thoroughbeed, you would get a better house then you have!—I grant you that for some perposes, but you could not get weight and substance. 11575. I have not seen many Esskney stallions, but I have never seen one half the size of a thorough hred!-You could have seen vesterday tracky stallions shown above 15.2, and many of there up to 16 hands, and many of them are able to take a hig carriage. "Surotoot" is a good hig thoroughbed. Take on the other hand all the little weeds you have. 11576. Mr. Wanson.—Do you know saything about the American teads in houses!—I have seen

a good deal of it 11517. Are they not sending over a large number of horses to England and Jesland now !- Yes. 11578. It has been suggested to un that American horses should be brended in order that they may be known when they come to this country, do you think that would be a good plan or not !-- For what is the purpose of branding, simply for the purpose of

knowing them?

11579. Yes, to distinguish them as American house t-1 would not approve of branding anywhere where it would disfirme the house. 11580. You think there ought to be an opportunity of buring them no matter whether they came from America or Ireland !-- I don't think a man who gets en American home should have him beauted and decree his chance of having a good home hecause was good horses come from America.

11581. Do you know that many American horses have been sold as Irish horses t—Yes, and sold as English horses too, I know you have a good many in Include now I would arguest branding but, not very strongly, not so that it would depreciate the arimal in approximate it should not be in any con-

11582. How would you bread 1-Undermeath his 11583. With aboticon t-Yes, branding his foot in

Mr. Pittewithian.-A hepmane horse would get the worst of it. throughbred horses as opposed to hunters, now put show out of the question and think of the small furmers, what do you think would be the best size for their mares !-- A horse with some Horkeev blood in him, because he will give good action and good shapes sail round strong muscular development, a borse that they will be able to sell. 11585. Have you ever seen the same action from

horses got by a thoroughbred as you have from horses and by Hackness t. Not consistently. I have seen some thoroughbred horses that have got horses with a med deal of action and have been very beautiful eseringo horses, but they don't get them consistently. 11586. And is the middle class horse's setion the

chief selling quality !-- You 11587. CHAIGNAY,-What are those American and ferrise horses used for, mostly harpess !- Yes, many of them are being trained for private work and taking the place in Londou of some of our Yorkshire horses time used to be, and of your Irish horses that are rood goes, but the principal numbers are streeters for lovries. 11558. Looking at the matter, as we are bound to

do from the point of view of the industry in Ireland. would you say, that in breeding for barzens purposes in Ireland, the breeder would be subjected to smooter coupetation than is breeding for hunting purposes? ... I don't know anybody who does breed expecially for trating purposes either in England or Ireland. There are certain districts in Ireland where the object of the breader is to produce a hunter!—Yes. 11590. I am asking you generally what your opi-

eits would be, would be less than in breeding for harness purposes !—I think either would have a good of a high class. 1109). Is not nearly the whole of Great Britain more or less devoted to breeding for harness purposes

and see not the prestor number of those foreign im-portations used for hursess purposes 1—The foreign importations are used only for ecomon work. But with repard to England they are devoting consider hanters, cart-horses especially just at present. 11592. Do you suppose the majority of horses uses for bunting in England are bred in England or bred in Ireland 1—I should my about two thirds of them

are bred in Ireland.
11593. Lord Lostpostprany.—You have bought horses for a good many years in Ireland !- Yes. 11612. That is near Glasrow !- Yes. I should like to read the main evidence I wish to give, and then

Y.

breed of horses taken generally is as good or better or Mr. William wome than it was when you have to have horses !- Buildwide There are not as many horses with one and substance until they know their husiness, if they are good enough for hunters. When I went there first, which is some twenty-two or twenty-three years ago, we could find a good many fine big upstanding horses

1150s. Then you think the breed of horses has steriorated in the last twenty years !- Decidedly, 11505. In specified chases !-- I am taking Eacht house as a class, not the hunters, we don't know very much about the bunters until they are made, but handreds of homes that are hought as hunters never see a bound as long as they live in your country. 11507. Your experience is that the breed of horses as a whole loss deteriorated 5-Decidedly, there is a

want of substance and shapes that was not the case some twenty three years ago. 11508. That is over the whole of Ireland !- No. is is more particularly the northern part.

11509, Mr. Fiftwilliam.—Sloudd you think the had times had anything to do with forcing the farmers don't think had times have done it so much as the extra prices the foreigner gives for a good-looking mare to take obvood, and there is no chance of patting

them back again, we can get get/rage from shroad, 11600. Mr. Cannw .-- It is the had times that have adoed the farmers to sell to the foreigner 5-I don't think so, a man will sell the most saleshle article on his farm whatever the times are, whether he is well off or ill off unless he is keen about it.

off or ill off unless he is zero about it.

11601. Mr. Wherken.—Do you think that has pre-valled in England, have the good marys been sold in England b—Decidedly. 1002. Has the Hunters' Improvement Society not had an effect in England yet !- It has not had that effect that one would expect to see come of it. stallions chosen have in many instances not been

acceptable to the farmers. reprotes to the mariners.

11803. Mr. La Tourss.—I suppose the foreigners offer the same inducements to the farmers in the South of Ireland as in the North 1--Probably, but the foreigner likes a mare with a little action, sed in the North of Ireland the meres have always had a little more sotion than the buster mares in the South.

11604. Then is in the North of Ireland you see
this deterioration of the kores !—Yes.

11605. You doe't think it is in any way due to the great popularity of a horse called "Frond Arrow" that the farmers in the North of Treland tay is the best horse that came in there !- I doe't think one 11000. He got a great many size I understand 1— I cover saw a here by "Broad Arrow," I have ' sace a good ranny "Broad Arrow," I have ' sace a good ranny "Broad Arrow "bases. 11007. And then "Bounding Willow" for in-tance 1—9 beausing Willow." I don't know I think

he is in Scotland, he would not be in Ireland very long. he is in Scotland, he would not be in Iretann very irong.

11606. Mr. WERTCEL.—When you speak of the
North of Iretand, what faire do you mean.1—Moy,
Arnagh, Saintfield, and round short that.

11609. When you are hoping there, what aged
heres do you layst—Feer and five year olds. 11610. And do you know that a great proportion of these horses come from the South of Ireland |--|

am led to understand that a great many are bred there and brought to the North to feed as two and there year olds. Mr. Jawes M'Manaus, Combooth, Busby, examined. shall be glad to answer any questions. I am 11611. CHAIRMAN. - You live at Bushy! sum to gue to answer any questions. I su a factor sed land agent in Glusgow, and a breeder of Hackneys at my home at Cambooth, Bushy, I was one of the judges of Hackneys at the

London Spring Show in 1895, and last November I was one of the judges of Hackneys at ber I was one of the judges or re-York. I wish to state at the outset that I have had no experience in my own stud of crossing Hackmyn, or their produce with other brench. Any subject is necessarily finated to observation of such animals at agricultural shows, and throughout the country generally. I am well segmented with the ordinary ride and drive horses of Scotland, and I can speak very distinctly to a marked improvement in this class of young stock aines the introduction of Hackney stallians in the north. I am a member of the "Soutch Committee" of the Hackney Rosse here - usoner tremmarces" of the Habitary Heren Society which was fermed in 1810 for the purpose of encouraging the breeding of Hackmays in Southook, and the equivation into different classes of Hackmays and hunters at Scotch shows. This Committee tas tal and midtive coll. 2 and a ladinedar ed, years. The money is spent in giving contributions towards the prizes to agricultural societies under contain conditions as to classes, judges, etc. Prior to the existence of the "Scotch Committee," hunto the quistance of the "Scotch Committee," hun-ters and conditions were for the most part chancil and exhibited together at Scotch shows. This practice was a most discouraging one to broaders, both of hunting stock and rossister stock. Now, however, through the effects of the "Scotch Correcttes" such been of become is exhibited in its own class; and breeders can see by comparison what progress thes are making in the improvement of their respective breeds. In place therefore of the introduction of the Hackney into Scotland proving detrimental to the hered of hanting houses there, the very reverse has been the result, as limiting young stock have now separate characterion at most of the principal shows in conoperations of the introduction of the marking and the operations of the "Scotch Committee." In my opinion there is no real ground for supposing that the introduction of the Hackney borne into Ireland will interfree with the breeding of hunting stock there. Hackney stallion has not interfered with the breeding hunting or other thoroughleed stock in Scotland. If all the Queen's premium theroughbond stallions were located round me I world never think of using one of them in my Hackney stud; and I presume the same thing would apply to the owners of thoroughbout stude in regard to Hackney stallmen. In my opinion the one class of animal does not clean with the sales I have observed that observes has been in the least. in the least. I have observed that objection may occu-taken to the Hackney on the allegation that he is a soft blooded animal without staying power; and therefore is not a bread to be encouraged, was true I would agree with objectors, but in my equation the charge is entirely endounded, except as regards perhaps one particular strain of blood. ever. I though it has been clearly proved by Mr. Euron. the Secretary of the Hackney Hovee Society, that one of the proposition of this strain, although registered as of good Hackney blood, is really of foreign descent. of good Markinsy hood, is ready or foreign to The got of this horse some years ago were largely introduced into Sectional by dealers, and they have forcedured into Schanne by opinion, and any artificial done insolubble harm to the true interest of Rackney breeding in Seatland. In my opinion, however, the staying power of such steams of Hoskney bleed as Danagels 174, Demanack 137, Lord. Derby II. 417, and Fireaway 549 counce be disputed. I believe there is no breed of buses in the world so sound and constally surviously to the use of man as the Hackney; and while there is plenty of reem for all classes of horses (evan the pleasure mon horse and all clauses of forcess (evan the pleasure rice home and pleasure hunting hove) there ought in my opinion to be special encouragement given to Haddney sines throughout the sountry, both because of the securities and mility of the inred, left also because the Haddney stallism is the most likely satissis by produce out of the ordinary merce of the country a

valuable class of carriage horses, which at the present

moment this country is much in need of and w moment this country is much in many of, see is largely dependent on America for its supply. When I was in America I had an opportunity of nesing the result of crossing the Hackney horse on American native hard marcs. At the New York show the Hatkney stallion Cadet came into the ring with four of his set out of such mores following him. also an opportunity of seeing a large number of native meres themselves. When I say native meres do not mean their fast-trotting stock, but the edinary ride and drive animals of the overser Those mares are very blood-like, but with very light and puny limbs and small joints and neeks too heavy on the underside. The produce I refer to by Cadet were big strong animals with bir himbs and birds and nicely shaped notice, and appeared to me to be like growing into very handsome and pownful carriage horses. After the show was over I had an opportunity, on the invitation of Mr. Cessett, the President of the Hackney Horse Society of America. of viewing his large stud at Philadelphia. I now there a considerable number of youngster by Cules out of native mares, and a finer les of Hackney shaped animals I have soldon seen. The result of crossing the Hackney stallion on these native mares, so for so I had an coportunity of judging, was a creat improvement on the native animal itself, and I would say as soon as the Americans overcome their unnatural rejudice around things English, and go in generally for the use of the Hackney stallion, they are likely to produce, in my opinion, probably the best carriage horsen in the world for size, quality, and pace. Then with regard to native Scotch puty marca bent to Hackney stallions, I can speak with the greatest confidence. I am decidedly of the opinion that no cross has produced such good results in Scotland as the Hackney stallion on rosh mares. The preparaty of the well-bred Hackney stallion for producing his own type and good qualities out of weedy therough breds, ordinary odd farmer's light-legged mares or mountain ponies, is one of the marked characteristics

11613. Lord Lowncornway,-I notice you state that you yourself if you were surrounded with thoroughland stallions would not cross them with a Hackney; in the same way you would not expect that anybody surrounded with Hadraers would grom thoroughbord or hunter-bred mares with them!--! think so. I limit my remarks entirely to thoroughbreds -I mean the pure-bred thorough breds. Land not include any half-bred azimal in that, I meant those gratiemen who own study that are pure in breed—all Hackrey in such. The same thing applies in America where the 210 and 2.8 trutting horse in These rentlemen would not think of using a Hackrey stallions on these marea, and my remerks there again apply to the ordinary more of the country.

11614. The great fear of the hunter breedere in Ireland is that the smaller farmers might be tempted

Hackney stallions instead of since that have not reed Do you think them would be any danger of that !- I think not ; the price would regulate that and the thore to a large extent; there is no mistaking the Hackney in the first orne

11615. Do you think yourself that is would do harm!—I am not a hunting man, and prefer not is speak about hunteen 11616. But so far as you yourself are concerned you would keep the Hackney distinctly to its own plass of mere i—As far as my own stud is concerned.

11617. And you think that would be constally seported by gentlemen you have talked to about it !-By owners of pure-bord stude. 11018. Mr. Fyrawillian - As far as your remarks are concerned they don't apply to hunter-breeding 11619, Lord BAYHDONNERS.--I think in your

bunters in Soctland had been improved by the imporution of Hackneys !-- Understand me distinctly about that. They have been improved, not by using Hockneys to produce huntors, but by the operation of the Scotch Committee of the Hackney Society in georiding classifications for such horses and enabling those who went in for breeding hunters to see the effect of the operations at these shows. Previous to this Consulttee being formed there was great trouble is exhibiting the hunters and readsters together. a roadster judge went into the ring to judge, or there was a majority of roadster judges, the high-strepping majority of thoroughbred or hunting men went into the ring, the other class went to the ton, and both classes of breedees were discouraged and had no means

of seeing how they progressed in their breeding. To that extent only my remarks apply. 11600. Lord Asurows.-You mean to say that if Esciencys were given superate classes, and horses got by Hackneys distinct from the hunter clean, pass would keep the two breeds more separate !- Yes, I do. fiscinetly; if that was done there would be no danger

whatever in Ireland. 11621. If young horses got by Hackney staffirms were not forced to occupete in the cluster for hunters on think it would encourage the men who use Haricmers not to cross them on marce likely to go

into the hunter classes !-- Craite so. 11682. Mr. Claury Is there much hunter-brood. ing in Scotland !- I would not say there is much : then are very good classes exhibited, probably ten or a dose, young stock come out at most of the principal 11623. Do you know how they are bred!-No. I

don't; but I presume they are got by thoroughbred horses from the look of them 11624, Mr. Wansen,-Do you think that the American trude, to which you referred in your statement when you make of their projudice against English horses, do you think when they correct that, that the American teads will be very formidable to

native breeders here !- I think it will. 11625. You think it will increase very largely !-- I think so.

11626. And their horses will continue to improve? I think so. 11627. Have you thought in any way if there is ar stunedy for the broaders in this country !- Yes ; I think we have the remedy in our own hands, and on compute with America if we are careful in using Harkneys on the ordinary meres of the country.

have a type of ordinary mares in Soutland, and there is suother class in Ireland, different altogether from the hunting or thoroughbred mores that we can improve to an extent-I think we can compute successfully with America if we use a prepotent bread of Hackney, and we have plonty of them in our 11628. Of course the America teads is practically

only up to the present in general utility herses and served when they come; they are not a stylish horse. I think this class of horses meets no branding they are breaded already by the type. But there is another class of horses econes from America, and I have a strong suspicion that these horses I am speaking of because they are more near the type of our Hockney, and those are the animals that we have to fear, not

the other once. 11629. Are they coming in in increasing numbers 2008 1- I think an 11630. Would you appeare of heading houses coming from America !- I should not think so; the best way of branding is to compete with them

have some notes here on that point. There is one M'Meste mare I have noted, owned by Mr. Wm. Scott, of Gil-It was inspected and entered in the Hackney Stud Book, 3,856 "Gillyflower"; the size of the mare was "Donal Grand," and the dam "Kate," a 14.2 pony ook, which I have seen, by the thoroughleed house "Ascetic" by "Hermit." This produce has been a win-ner of many prime, including the champion gold medal at Cardiff against true heed Hackneys. Then there is another one out of the same mare, a very good one. by the same horse, which is now in the stud of the Marquis of Londonderry at Sealant-Harbour. I have also seen that, it is a nice one. The mare was a little more worth about £30, and this maps "Gillyflower," if I was asked to value it at the present moment I would put her at not less than \$500.

11635 Lord Assrows.-Was that mare crossed with a thoroughbred !- No. But I know instances of that. Another instance of a mure belonging to Mr. Wateon Murray, son of the Factor of Montroso ; he owned a mare called "Black Bess," 2,576. She was inspected j. her sire was "Star of the East," dam "Folly" by "Omen," thereoghired, winner of first prize at Cleveland, Dumbarton, Ayr, Glasgow, and Edinburgh. Then I have stother instance, Mr. Adams, a gentleman in our neighbourhood. Bentiew: he berd "Prince Comin our neighbournood, meanww, as serve fidence," 3,819, whosestre was "King Confidence," and data "Trefolis," an Irish mare, 15.1, half-bred. Mr. Adams purchased this more when in feel for £32, and sold her produce, a filly by a thoroughbred horse, when four years old, to the Horo Grands for £30. Her next feel, "Prince Confidence," took third prize at Glasgow when a yearling and was add when two years old to a dealer for £100 for America. He informs so the dealer refused £350 for him. Probubly the best specimens of this crossing that I have seen was a pair of powerful carriage horses owned by Mr. Morton, got by the Hackney stallion "Lord Durby II.," 417, out of light-legged Yorkshire ours mares. Those borses are 15.3, and were sold at a

sale for £450. 11634. Mr. WERKUR.—Then you think that . Hackmays can get high-class carriage horses !- Dis-11635. Have you any experience as to their staying and endurance !- Not personally, except from my own driving. I drive a pair of Hackneys and there is no roftueer about there.

is no ordinare stock them.

11630. Gaussaux.—As to the crossing of the Hashney on the peny mare, have you any experience of that 3—Net in my even study. I have so, it is not that is not have no that is not the major and the have one very scaled instance in Scoolind of this. The celebrated puny stallion "Mary" is about 13.3. hands high, he is now owned by M.R. Michelal, of Pulment, he was got by the Hackney stallion "Derby" He was a winner all along the line and took second at York, when Mr. Christopher Wilson's wonderful pony appeared as his opponent, and he was saldon beaton except when be met bim. 11638. Where is this your!—He is living at Mil-

field, near Edinburgh. 11639. Do you know anything of his produce !--He has made a most marked improvement in the

breed of pours round our district. You can tell a "Mare" peny any place. He can step up to his chin, There is a hit of strength about and go with force. him for pulling machines.

11640. What kind of mares has he been put to \$--All kinds. The rough little mares that come from the Highlands, and all round. Then I have a very the Highlands, and all round. Then I have a ver-extensionless instance of his eron again. Mr. Sydner Brantees i fanous pony "Sasprine." It has goen all round Rogland and taken very many grines. It is 12.3 hands high. It was get by "Mars," oni of a hitch mare 13 hands high by the theorophysed horse "Ex-minator." I have seen the dam of this pony a little of the control of the control of the control of the con-11631. You think that is possible !-- I think it is thereoghly possible.

11632. Have you say instances of the same mare

COMMISSION ON HORSE BREEDING. 394 revolution in the character and style and type of the Morril, 5, 1998. second of a thing, "Surmine" was sold at Mr. animal sent over, and it is in that way that I hold

Mitchell's sale, after a most spirited competition, for 255 gaineau, and I believe it would bring double the money now if put into the market. Lord Assrows.—The dam was a little 11641. Lo 11642. Charges, .- The dam was by a thorough Do you know out of what 1-By "Ex-

James

11643. Are we acquainted with Ireland at all as a horse-breeding country !- No 11644. Are there say districts in Scotland particuharly devoted to preducing hunters !- There are a lot of buniors produced round the district of Ave. for instance, but I don't know that in Scotland there is

any one district specially marked for producing It is cather a ground thing spread all

11545 Would you say that the production of busties was a small or a large part of the whole of horse-breeding as an industry in Sectland 1-I would my it was a fair proportion, judging from the number that appear in the classes at the shows 11646. I gather from you, you think the introduc-tion of the Hackney into Scotland benefited the

hunter in as far as a separate class was given for 11647. But to you think that the use of the Harkney sire is beneficial in producing hunters 1-1

11648. Then may I take it that you consider the Hackney principally as a harness horse !-- Saddle and 11649. Von mean by saddle not instuding hunters ! -Not including hunters. 11650, Mr. Warson,-Do you know whether a large number of horses are taken from the North of

Irchard to Scotland now !-- I believe there are 11601. And do you think that if Hockneys were introduced into the North of Ireland whare they don't brood hunters, that Scotchmen would give more for the regrines than they do for the animals that see now heed there !... I think they would. I believe if a Hackney stallion were used there it would create a

Terra I.-. I da

11652. When you talk of a revolution you are set 11652. When you can on a revolution you are not talking of hunters, but of the bad claim of houses that now come from Ireland 5—Yes. I don't interfers with the thoroughbood. There is room for them all with the thorougnores. . Incre is recon for them all, and I believe that is the lines on which we must m and I believe that is the sines on which we must pe for the breeding of horses in Iroland—keeping on lines separate. We have done that most successfully in Soutland, and I believe in Soutland there has abroady been a marked improvement, and there will

we can compete with America representable

be more from year to year as we go on.

11653. Have you ever considered whether it would be possible to keep a registration of herses in different districts so that the breeding of all the horses mirks he knows-do you think the foreigner would give a bigger price if he could ascertain the true pedigree of a house !- I think be nright. I think he would, in fact. But most men look at the type of the arrival for his pedigroe-I mean for ordinary work; hat for export it would be an improvement if homes could be contified to be bool a certain way, if they had any thought of breeding them senio. I1654. But you think the ordinary buyer deep not

think much about pedigree !- Not for corriage work; for instance for a gelding, I don't think it matters her he comes if he is of the right shape and two-11656. ORAIRMAN.-As for as you see on bred only pure-bred Hackneys 1-The puret greed I can get.

11656. But you approve of crossing these; you have given as some instances where they have been erossed very successfully L. Yea. 11657. What becomes of the misfits in the case, say of the oron of the Hackney stallion with the ordinary mare of the country ; they cannot always be success ful; what are they used for t-They find their way, I prevene, into trams, and busses, and cabs. 11656. Have you any idea what their market value would be !- No; I cannot speak of the value of these ordinary houses; owners get rid of then as soon as they can, if they happen to have any of

from so long as he got it, but I should certainly have a hunter stallion off a branter mare that proved him-

self a good class hunter, because I ecosoder any stallier is more likely to reproduce the features of his mother than saything else.

11671. How many Hackney aires do you keep 1-

11672. How many thoroughbreds !- I have out thoroughbred.

I was taking to a gestlemen the other eight that had one of the name bendderended from the same onare, and he may they are do hardest and bent become he over may, and this larges of mine is absolutely clean cut his lags. 1863. Cranaman.—And you gat ment of your legister marses to him 1—1 you thorn all to him. 1,1083. And have for some time 1—1 have had him

house marse to him !—I put those all to him. ,11683. And have for some time!—I have had him ealy two seasons; this is the third season. 11683. And you are satisfied with the produce!— Perfectly.

Prefectly.

11684. You put make of your bunker marse to the Haskney or thoroughbred—I put one mane to a thoroughbred horse two years ago, but judging from the profine I would not think of esting anything less than this horse now.

11683. Then I tudge, as far as beseding for hout.

11653. Then I judge, as far as beeeding for handing purposes is constraint, you have no objection as if to the half-base horse—Centrally not. 11655. Do you think that type could be sufficiently identify Supposing there was a system of registration to them, could you define what you mean 1—There them, could you define what you mean 1—There

to them could you define what you meen 1—There are a great many people breed hanters, and a lot of people breed pool one. My idea would be to loud a hunter stallion off a first-class bunter many which has been hunted and remained absolutely assets.

11457. Then in a system of registration, as for a thick the third to concerned, to you think it is assumed to the third the second that the second the second that the second

that one preferrs, because I think the necessiplishments of the hunter are undesthedly hereditory.

11658, You have yet hunter mere to Hackney stallions i—Yes. Well, I have loops Hackney stallions in Yes. Well, I have loops Hackney stallions in their produce off hunder mares.

11638, Off your own mares — My own mares, no i

I have only a small pines, and cannot keep a greatist.

11690. What is year opinion of the produce t— Wdl, I have had Hackrey stallions get some very good harders indeed.

11691. Out of what hind of more had once a house

by a Haskery the other day bunting with the Tyutale going recarkthly well. I followed him. These were four of an going pretty sharp, and he kept with in twenty minutes. He is a fast here; has nover given his owner a fall; he is fourteen-years-old, and shockably sound.

to twenty minutes. He is a fast herea; has never given his owner, a fall; he is fourteen-pearwold, and sheekslely sound. 11692. Do you know what his dam was 1—Xe, a buster mass. 11693. What do you mean exactly by a huster 11693. What do you mean exactly by a huster 11694—A may that has been hunted and had been

many—A mare that has been hunted and had been breeding hunters to theorughbre stallows. The "sur-brites should a reconstabily good bunter by the heres of zeine, "Lord Liviuras." I 1894. Taking it generally, do you approve of the Heckery tire for the purpose of getting hunters— Dudschander. I believe the Hacking stalling to in-

Dishabedly. I believe the Hacknay stallion to inpromations every class of horses.

11093. For hunting and fee II paramet.—For 11093. For hunting and fee II paramet.—For this to put a bavoraphterd mare to a. Hacknay stallist of mine two years ago. She is by "Esterling: She had been suct to a finishment's those posterior stallists and bruke. He sum have to me and said——? "T won't year to over her within up here you have." "T won't you to over her within up here you have," which is not not present the province of the parameter of the register to my energity—"I have every reason to be suited with my proaching fill por the your Hacknay.

weight-conveying tenner.

11664. Do you know Ireland at all t—Yee, I have been to the Dublin Show a few times.

11697. You don't know the country generally t—I cannot say that I know the country generally, but I

11997. You don't know the country generally but I have a general what I know the country generally, but I have a general show of the horses that come from it.

11098. Wealt you think that the introduction of Hadroney blood into these districts of the country that

Hadden would yet trans that the introduction of Hadden's blood into these districts of the country that breed hunters principally would be beneficial or prajudicial—I should think it would be beneficial or principal—I should think it would be beneficial or taken. The Hadden's had been been been to 11698. Lord Bayencesen.—You say the cross of

A control of the cont

11701. Why would you advocate Mankers will little at 11701. Why would you advocate Mankers — For the way good to all officiate breast of humbers — For the way good to all officiate breast on the property of the property of

hunter;

11702. Would not a horse such as "Garlshad" be
a better stway to put in Ledand 3—My herse has five
erouse of blood, and I know he is getting first-class
banters off marse with strength, but if you have
more that are shready too light you want sensebbing
stronger.

strongers.

11703. Whose stops is "Caziatad" b—He is a little
11703. Whose stops is 1.1 hands I think it would be
better if the verse as inch lower.

11706. What sore of hone b—Tho host yoo ever get
your hand on, hig bone and marvellous quality; there
is a thin skin, and his tendens are so hig.

11706. Still you think that he would not make

is a thin skin, and his tendons are so hig.

11705. Sull you think that he would not nate
with a small more h—I would rather risk a Hackney
stallion to bread a markstable animal, because he
("Cathold") has five occurse of blood already.

"Carbbad," with pienty of base and assessed the same crossing as been "Carbbad," with pienty of base and assesse, and similar along the a bande-shaped assists, would you use over that have in preference to a Hashmay I—I would use and his in professors to any bares living, because I think a professor to the prof

tallions at your own place 1—They travel.

I 1708. But they travel from your own place 1—

The bendquarters are at home, but they are not all at the home. During the season I have then all over the

the home. Diving the sesson I have them all over the sensity, You have Clydesdales !—I have Clydesdales the II have Clydesdale

representation number of people who will have a laberaghted, it does not matter whether it is a really good one or the control of the contr

help the men to pay his rent.

11719. What I rather wanted to get was—to which mare you would put the Hackney, to which you

Yout 6 1909 M. W.B.

396

would put the half-heed, and to which you would put the thuroughfred !-- If a first-class hunter more was sent to me I should certainly put her to a hunter stellien; but if a mare on the light side was sent to me I would put her to a horse with bone and reb-stance, and you can get a Hackney with good shoulders draw yor so sonatedus bas sand down so you want. 11713. In breading from a thoroughbred you are bound to get some weeds—do you think if that filly was not again to a Hackney the province much he saleable !-- I have had needy mass sent to me, and the owner says :-- "Tell Mr. Trotter to put this mare to anything he likes," then I mate her to a big

Hackney stallion, and the often breeds a first-class feat. 11714. They will breed a saleable animal 1-Yes : it is the words eat the profit up. 11715. There are her coarse heavy mares-woo would not gut a half bred stallion to them !- Oh, no. I have had theroughlied stallions that left very good stock indeed from the coarser mares in the country, such a horse as "King Harold" and "Haphanard," but I never bought a thoroughbred stallion yet unless I knew he was a good entier before I hought him. 11716. A mare that was known to breed well to a theroughbred, you would not change her !-- No ; if the succession in breeding well to one theroughbred

horse, I would keep her at it. I don't believe in changing if you cane his the right nail on the head.

11717. Mr. Carrw.—You said you were in favour of registration of half-breds - Yes : I think regis tration is a very useful thing if you can culy amalgamate individual merit with it. 11718. What do you mean by merit?-I mean, of course, if you had a really first-class hunter mane that you had owned for years, and know she was

sound, although you knew nothing of bur breeding. you would have to adopt either show-yard success on suspection or something of that sort. inspection of soussening or take sort.

[1719. Then you don't mose by merit performance in the branking 64d b—Ob, yes, I said performance. I think you could easily got at the stallion year of it by giving stakes for hunter stallions, or by giving prism for, say, the best two-year-old hunter colt; you should have then from sound parents.

11720. Mr. Western.—What class of farmers use

your Hackney stallions now !- As a rule they are the smaller farmers. You see we get a large member of mares from the North and West of Ireland into Newcastle and the North of England ; there is a lot of them shown with long tails, and the farmers buy up these mares, often young mares, and then after they have been worked in a town awhile they oune back to the farmers and these are the mares that put to Hackney stallions.

11721. You know that there are a large of mures that come from Ireland put to Hackrey atalliana !-- Yes. 11722. What do they produce !- Nearly all of them produce an animal hotter than thomselves.

11723. Do they produce a saleable animal, an animal that pays — You. animal that pays t—xos.

11724. When you talk of a small farmer in your district, what is his rent t—Tyneside, and practically the whole of Northumberland, is a country where there are various classes ; you have the hir farmers

in the valleys, and when you get into the little dalos away from the scaloard, you get amongst the smaller farmers, who are farming on hundred acres, and verham were hill land with to 11725. What would be their rent !- They often have a small grass farm and some hill ground in connection with it ; they get often a little cover bred mare to out their grass and do any carting they may have to do, and often put her to a Hackney stalken. 11795. And those are the men that chiefly use

your Hackney stallion t-No, not necessarily so; there are some large farmers will use them so well. 11727. Are many high-class harmon horses hereful 11728. If you wish to breed for the London they would get the hest results from a Hadrag

market high-class harness horses, what stalling works you use !- I would either use a large-steel Hackary or a Yorkshire coach-horn 11729. Would you use a thoroughbrid L.No.

11729. Would you use a thoroughbred!—No. 11730. Do you keep any Yorkshire coachbaras yourself!—I have used them. 11731. Why would you not use a thereast. hred 1-Because he has not got the action

11732. Do you think it is necessary to have the tion !-- Undoubtedly. 11753. I suppose the farmers you call small on hardly as small as the farmers in Ireland i-No; a lot of the small farmers from the West of Ireland one to us and work all the summer to get some

come to us any work an over summer so get some thing to pay the rent with.

11734. Do you know that seventy-five per crot. of the farmers of Ireland are under £20 valuation to No, I did not know that , that is neve to me.

11735. Putting henter hereding aside altogether

from such men as that, what sire do you think would he most useful to them?—Undoubtedly a Hackney. 11736. Why?—My idea of the small meres kept by these men are that they are mares probably from fourteen to fifteen hands, not extra good-looking er extra good movers ; if you use a Hackney stallies you get the Hackney type and the Hackney action, and

get the Hanney type and the Electricy action, and if you have that yet have a saleshibe ascend, 11737. Then you think for £ a. d. they would make a good deal more breeding from a Hashing or the other home you describe 1—1 have seen once remarkably good results from using a coaching stalling for this very good reason, you have got more size and length and you have a blood hav with four black logs, which is an advantage, and you have almost as 11758. How hig are coaching stallious as a rule!

-I bought a horse the other day that won first price at Leicestey Royal Show, 16.1 bands at three year old, a whole coloured blood bay. 11739. Would you be inclined to put him to four torn hands mares i....When you come down to four toon hands, I should certainly may a Hackney, but for a fifteen hands mare I would prefer a coach here. There is this disadvantage in using a Hackney, you appetimes get a good deal too much white, and if you nse a couch-horse, you often get an animal that is whole-coloured, which is a decided advantage for a

11740. You shink the cross of 16.1 hands and 15 hands is not too great !- Certainly not. 11741. I think you said that you had experience of riding hunters yourself got by Hacksey stallions?

11742. Did you find them deficient in staying powers 1—Certainly not 11743. Do you think there is anything in the allocation that Hackneys are soft !- I think they are

11744. And you have considerable experience; are they hardy in constitution t-Very, and very second. 11745. Have you seen the crosses got by Hackneys living out on these hills you said \$--Oh, yes.

11746. How do they stand the climate there \$--

They do very well; and we have a much worst slimate in the North-east coast of England than you have in Ireland. 11747. And they remain out all the winter t-Oh

11745. Then take these small farmers what do ou think is the safest horse-breeding for them to go in undersized mares

for, for the harness market or the hunting market !-Certainly to cater for the harness muricet from the 11749. I am not referring to the good mares at all 5-Of course I am assuming that my idea of the average mare in your country districts is correct, and that is, that it is an animal from 14 to 15 hands rather plain-looking, without much action. 11750. Asseming such an saimal, do you think station or a horse like "Carlshod" to Octaliny, from a Backrays stallin I think you would get a much begine spiring estimal for this reason—that you can all a first death housess borne with his long tail on give 200 for a horsess horse without being trains give 200 for a horsess horse without being trains Belt fyou brood to hoster you must make his helder, you can sell blin to any advantage. 11751. Do those, London dealers care how an

East if you brook a basicer you must make his before you can sell bith to say advantage.

11951. De those London dashes care borr as 11951. De those London dashes care borr as 11952. They would not object the present year been selled to be the selled to the present year. If the present year to be signed 26,000 of the high close hazarase hower life to signed 26,000 of the high close hazarase hower life to give 26,000 of the high close hazarase hower life of "Carledon". The have not seen any but must of "Carledon". The have not seen any but must of "Carledon".

of "Circitation" 1—I have not seen any but rune.

"Perfection IV," I only travelled that homes a hilden one assoon, I had him there assoon, but I aw a black between golding, by him shown at our showless from very good homes, and I saked one of the fudges how he liked it, and he said "wary well, he agained were fast, he is got by your old home, in a next" "What here so you most it" "Hop-heared." "What here is you most it" "Hop-heared."

Clinax; that is the way he is beed."

11771. Lord Assrowz.—What was the mare by
the Yorkshine oasth-hore out of 1.—Out of a mare by
a theoughbeel horse.

11772. Mr. Wasson.—You say you have been to

the Irish shows and bought frish because on several consistent Irish because on several consistent Irish because on several consistent Irish Would you suggest for the improvement of brutters in Iroland that come horses like "Carlislant" should be registered Irish properly these registered Irish and Irish and Irish Ir

sazza or rightfored 1—Please yourself absolt registrabito, but I should cartainly say the more of them you use the better. 11774. Better than a thoroughbred horset—Un-

11774. Better than a throughbred borns —Undealbedly.

11775. Granzaux.—When you say better than a thoroughbred hores, do you mean better thus any thoroughbred hores, a thoroughbred equal in borns and substance to your hores —The ball of thorough

torocaptured focus, a thoroughbeed spall in boroand substance to your bross—The ball of thoroughbend forems are und of the hinter type, and if you me travelling from satisanks of a distinting type from the satistal you went to bread, the obasces are you died; accord, but if you bread from hinner satisfies which accord, but if you bread from hinner satisfies which accord, but if you bread from thomes and the will increased.

1176. That is to any if you could find a thorough-

1276. 2 mm 3 m may d Yell could find 8 thickness, bend of the season type roval flow will peefer the half-for this reason, that unless I tone who have for this reason, that unless I tone who may the more the thoroughbred horse was not of 9 is a less just the distribution of 90 in the period of 10 in 10 in

11177. Thus to brend a businer out of any sort of years yet prefer a halfbrend to a theorepithered in-Li don't say so; for legitimate hunter threeling, I should brend from a hunter stalling and lumper man, because in both sire and dan yee have arrived genere at the state of perfection you wish to attain, but in going back to the theorephired you are bringing in a class of animal back perhaps you don't want.

y 11773. Then it does come to what I say, that for any class of mase for breeding bunders you would be prefer a half-bred or hauter size to a thoroughbred —I den't mean that; for a course or underbred marray I should pick a nice type of short-backed thorough-speed bred bores.

the second of th

dition and the holdings they have. You were saked

about their rental, you cannot speak authoritatively? -I have talked to these men about the rents they S. W. R. pay, but I have not a good memory for figures. I know they are small farmers, and nearly all knep a

little mare. I have seen the animals that come from the district. I can form a general idea of the stallions that should be put to them. 11781. You say that judging from the class of more they have and the circumstances of these farmers you think that with a Hackney size they can

produce a more saleable animal 1-A much more saleable animal. 11782. You mentioned a first-class barpess horse that would fetch £100. Do you think these small

farmers would, under any circumstances with the mares they have, with any kind of size, be likely to preduce a harmon home worth 21001-Well, I don't

produce a harmest horse worth 21001—Well, I don't new why they should not. I know there was a Frenchrum paid 2300 for a 14.2 hands mare in the Hall yenterday. She in get by a Hashmy stallion out of a mare of unknown breeding. If you get them good enough looking and fine goers you will always

get qualquares 11783. We have had evidence before un from some

people interested in that business that for certain pusposes the highest class carriage houses they can get are got by thoroughbred sires !- I have that to 11784. As far as you know you would prefer to use the Hackney !—I would prefer to use the

Hackney or Yorkshire coach horse, because you have the animal there pretty nearly what you want. 11785, Mr. Pixxwinzam.—With regard to breeding, from all you have said I have gathered that you prefer, or rather you put greater stress on the appear-same of the samual than you do on the blood of the

anisas! !-- The appearance and the performance of the 11786. As a stalliout—Well, I said I would prefer to use a hauter stallion from a really first-class hunting more, assuming he was a first-class horse himself. It is not a more theoretical coinion. It is based upon

my own experience of hunter stallions.

11707. Eut still your preference is for appearance?

—If you leave individual merit out, you leave the principal factor out. 11785. Lord BATHERONNELL.—Are your Hackury

stallices of the hunter type !- All my Hackney stallions have good shoulders and good limbs.

11789. Then do you go in fee very high setting i-

Get as much action as ever you can, because they are sure to bread plenty with too little.

11790. Do you like the pounding?—I like them to go up and go on. 11791. Besides beseding, do you buy and sell many

horses t. A few.

11792. Do you know Ireland well yourselft... Wall I cannot say I know Ireland well myself, but I have been at the Dublin Show many times, and got a facidea of the animals produced there, and also from seeing a lot of horses that come from Ireland 11753. How do you know that the small farmers in Ireland have only small mares 1-Judging from the azimals they sell to us.

11794. That is, from the produce of their animals Mr. Wrench if my idea of the average mare in the Wast of Ireland was correct, a plainish more of 14 to 15 hands, and not a good mover. 11795. That is the West of Ireland. But all our

Ireland do you menu to say the generality of small farmers have small mares !- I understand that most of the small farmers keep a mare, and ther are 11710. How do you form that idea. Why !- Free:

a variety of sources 11767. By hearsay !- I have seen a lot of them myself, and spoken with them-small ferrous 11798. From henray !-- I don't know whether it.

is correct to say from hoarsay, because it is not strictly speaking from hearsny. I see two or three hundred horses that come from Ireland every year, and can form my own idea. 11799. Do you see many brood mages !- Wall, you

see these underwiced mores that are subsequently put 11800. In England 5—Yes, plenty of them. I have seen men bring forty at a time of these small

11801. Do you believe a prize in a showyard is a proof of a good bunter?—Certainly not. 11802. Lord Assrows.—With reference to this half-bred cross that Mr. Fitzwilliam asked you about, you say skibough you like personal appearance you

you may allicomy you are personne of your new you would be still better pleased if you had personal appearance and hreeding 1—0h, yes, I som not at all an advocate for underbred animals, but the hunter stallions I use have both been first-class performers. I hunted one and the other had won sleven steeplechases, so there was a prepotency to time undoubsedly. 19803 You would prefer that animal to an animal

that was only good looking and of which you did not know his breeding to Undeabtedly, because I am outain of this that the propensity to jump is an hereditary accomplishment 11804. When you say you prefer these half-bred stallions to the thoroughtred you mean from a commercial point of view !- That is the thing, from a 11805. You would breed a better average of pro-

fitable borses !-- Undoubtedly,

11806. Lord RATHED STREET, -- You live ut Darrel, Ayrehire 1—Yes, my lecel. This morning I put my entire on paper and if you will take it I will—it nots my views better than I could give them orally. I am a lace and carpet manufacturer, and coupley about one thousand hands. Since my caritest days I have been a lover of the borse. When a boy of eleven I know every borse in the parish by name and look. For twenty years afterwards I confined myself strictly to my huriness, but after getting a little out of the wood and requiring some relexation, my old love for the home requiring some resusation, my old love for the home-spending up-new. I bought a few half-bred marin or maries bred on the bunter lines by a thoroughboul barin. Following this I bought a thoroughboul stallion from Mr. Tatteresll, memod "Glammen," which I for several years used. The production of these mares by this horse I showed over the West of

Bootland with moderate aucons. As far as I can re-

member I sold them at from forty to sixty pounds at

Mr. ALEXARDEN MORTON, J.P., Darvel, Ayr, examined. four years of age. One resolved seventy younds, but unfortunately when put to work she went wrong in her wind, and I had to give twenty pounds back. About this time there was exhibited at the Highland About this time there was enhibited at the Highlands and Agricultural Show in Glasgow a bias rose more add affectionary Show in Glasgow a bias rose more acided "Lody Patrington," by "Level Deeby II.", with the palloy, sedie, and type of this mare, that I received to trace bee to the hottom, and hotter a week's and I was found at Washlan, Wilhberman, Yorks, impecting "Loed Deeby II." and Collings and purchased in all since young case—both said story that the property of the property of the said purchased in all since young case—both said that the property of the said purchased in all since young case—both said that the said is the property of the said that the said t tion of the Hackney in Southand, which has now grown to over 1,000 for brestling purposes, my own stud being considerably over 200. My yearly increase in foals now runs from Surty to fifty These animals I exhibited over Scotland against

that bred in the country by thoroughbred horses, unior the classes "Boad or Field." This we found very unsatisfactory, as judges that went for hundre took those by the thoroughbred, and those who pred harness horses invariably took my stepping hades, hat in a year or two others followed me in in-porting Hackneys, and on the forming of the Hackneys Committee in Scotland (whereof I am-chairman), we got established the two classes, namely, charmanh, we got estatement the two classes, marrity, the hunter and the Hackney, which have worked very successfully there, often being from tweaty to thirty in each class of yearlings, two year and three year old. Now, the hunting gentlemen confine themselves to those by the throughked, and those intrested in harness and hacks confine them-alves to the Hackney. During these years I carefollo studied the origin of the Hackney, and first started the origin of the Hackbey, and frond that his blood was as pure as that of the theroughbrid, and that both, to the extent the theorogibired, and that both, to the extent of about three-fourths (of their bleed) spranger from the imported Arabian and Harb bosses. I am the author of two or three papers bearing on this point, which I beg to hand in for your co-nitration. I also bed the pleasure of drawing up a geneslogical two from the year 1700, showing the cay, which I also hand in for your perusal. I may say that this paper and tree have been much inspaired for, and that thousands thereof have by special request been reprinted and circulated all over the English speaking metions—so much for the introduction of speaking histories—we must for the in-manuscut-the Harinesy into Scotland. It may, however, ho muse to the present point of consideration to say scentiling about how those Hackneys have done in Scotland and to inculre whether they have paid.

am not proposed to my that I have made money by them indeed I do not know of any hobby that slow yes but I feel empired if I had to make a business of Hackney breeding and watch every item, as busizers must be done, the balance would be on the credit side of the ledger. There is a better market for this azinal, and it can be head with greater safety to ansmac, and it can be here with greater safety to type and size than any horse in our country. I may be allowed in this connection to say that I have sold within these less five years over 200 Haskneys and posise nearly all bred by myself. The posise averaged over fifty guiness such, and the Hackneys over one bundeed guineas each-all ages. I have sold a number of horses out of bunting mares by Hackney stallions at 120 to 150 guineas each, and in several cases I have shinned from 400 to 500 games for matched pairs beed in this way and out of light legged cart mares by a verse Hackney stalling. During these last ten er twelve years I have kept for my own and the dis-trict's use one Hackney pony and three or four large pure-bred Hackney stallions. I sharge from two to fire grinces each mere, and I see very pleased indeed fire princes each mare, and I am very phossed inclose to see the great improvement of the hazarsa horas all over Scotland. Every year I get mares sent to my state from distances of two to three bundred niles, and I can see that in a few years we will supply the growing decound for our car-ings and harness week, and may aren be ships and harness work, and may even be able to sell some to our neighbours, while up till this time nearly all have been imported. I might bere be

excused for referring to horse breeding in Ireland. I have attended the Deblin Horse Show, and was expensely pleased with the lunters I pay there. I felt and said they were the decreest and fasel saids and they were the decreest and fasel selects I had ever seen. I am still of the same option, and I wish them good luck. If the introduction of the Hacksey into Ireland were in any way to interfere with these beantiful hunters I would be at one with those opposed to the Hackney being introduced into the country, as I do not be-lieve the Hackney blood mixed with the bunters would improve their hunting qualities. In Great Britain we have no difficulty in keeping our breeds of horses and cattle ruse and distinct, especially since the establishment of stud books, and I cannot see why the

same should not be usuaged in Ireland. In visiting Monta asset a number of the breeding establishments in the West or treas are of the according establishments in the West Mr. Alexander of Irvitand I found a great many very light blood Mastee, a.s. masses being kept for breeding and still being used with thoroughbred bornes. Most of their stock was established bette be been and the best of the matter deed, and had to be sold for what they could bring, say from £15 to £20, to go into a harson or familiar car. Now I feel sure if these masses were put to a powerful, true-bred, highstepping Haskney they would produce the finest curriage horses in the world, and they would find a ready market amongst our best and highest class London dealers at remunerative prices on account of their quality and action. By Ireland denying itself the use of the Hackmy stallion these mares remain of little or no use for breeding purposes, and it prevents the production of the horse which would find the best and rendient market in this or any other country. I think I am safe in saying that for every bunter used there are at least twenty harness and earriage horses, and why should the best breeding earrings hower, and way stoud the sees recoming country in the world be closed against this large and valuable business, for surely Ireland out do with more of it, and allow good money to go to foreign parts for animals not half so valuable for the perpose. 11807. I take in from this dominant that you have beed chiefly pure-bred Hackneys t-Yes, of recent years I have bred pure-bred Hackneys, but in the earlier part I had not sufficient mares to use and I used some half-bond once then with my Harkney stallions. I have bred both, but these last few years I have head purely with Hackneys. A great many of my friends in the district that have half-bred macro

11808. What class of half-bred mores as a rule !-They are receive wearen that come over force Trained that were mislits for hunters, they might be either wrong in breaking or did not find a high-class market, and were bought for £20 or £30, and sold m 11809. What is the produce like I-My neighbour ithic half a mile of my bean hard two or three out

of one of these mares by a thoroughbod horse and never could make much out of them, because they come out rather light, but he has used these last free years my stepping stallions, and I am pleased to say the first peccase he had he sold for eighty goldron. 11810. Lord Asstrown. What age !- Four years of age. I could instance several cases. I have bought served a good many of these animals round, given ASC and more for them when just coming four. to handle and break and bring them in for my sales, and those that I refer to there as having sold at from \$150 cm to \$400 mere animals that I wally benefit. roung animals, but knew the class of marce they were

11811. Lord Razzrowszak. — Are there any bounds near you !— The Ayrebire bounds come up within three or four miles of my place, it is more 11812. How far are you from Glasgow !—Twenty miles south. I live in Londonn parish; the Eglinton

hounds come up as far as Commock.

11813. Are the Renfrew hounds near roul. They are forther north; I never see them, 11814. You referred to certain breeding study in the West of Ireland, what breeding stude do you refer to 1-I staved a week in that district I went down to be a stayou a week in that district. I went down by Carlow, Linesciek, by Etilizmey, and Cork. I had one or two of my family with me, they were enjoying themselves at the Lakes, but I was going through the country seeing the mare. I condi not give you the names of the farmers, but I just went from farm to farm, one day one place and one day another, and farm, one day one place and one day another, and naw a lot of marea, they were beautiful mares a good

many, but rather light.

11816. You have used the word "stude," I thought you meant large breeding stude!—It was more farmers' manus really, there might be two or three in. encb of these places I visited.

Month & 1801. Mr. Alexander Morros, 3.2.

11810. Did you mention Cork b—Yes, I was not as for down at Cork. I was odown in the district between Linewick and Cork; it is a matter of ton set for the Commond with the Richardeys. I went to Kilder, it is a stenging open village with an old Count to twe where a fire we were told find been harming for 600 or 600 years. Of course tie was not harming for 1500 or 600 years. Of course tie was not harming the count to the course of the count of the course of the count of the count of the count of the county of the cou

ing when I was there.

11817. Did you go to any farmen in the neighbourbood of Kildare !—I went to two or three different
farmers, and I saw two lovely marse, almost like
tharoughbreds; beautiful quality, deep-hearted, for
marrs, but the young took were too light for produc-

ing hunters.

11818. You did not go to any of the raising matahimments at the Curruph — No.; I knew little above the content of the content of the content of the to that with those little facilities being invegalt over your after your and beating me when I was heaveling from any own "Chamman" horse, and I went over to son if I could not be over, and putting by our order out the right strain. I have visited the Dublin fibror can the right strain. I have visited the Dublin fibror

1190b. Out of this manufact A myphol and or seem are may fairned—Not yet source have that.

11617. What do you do with those that are midful a "We sell when the best we can. We don't constrain to be leved from them. We sell that for from 200 to be found to be provided to be a sell of the sell

11822. Where do the minite go to 1—They are used for dictors' position, and ordinary jobbing hastes that do not go to much a high closs. For instance, Genned, in Ayr, laye one or two constionally, and I solds to Giffen, and in would sail them for joiling purposes. 11603. Are they not good for agricultural purposes?

11023. Are they not good for agricultural purposes. —Yes; in light lead. I me argued two or three meres constantly during the winter for light work, haking out measure and ploughing. I keep one lag strong more for very beavy work. But all my occlusary work is done by Moshany mare, "Old Dulay" and "Ledy Derington" are ploughing within a loss of fault.

a day of soung.

11614. Are the Hackneys you use for driving purposes or a riding become—I drive myself Hackneys, some propies cell their nordations—and Machineys, some propies cell their nordations—in all Machineys and Hackneys that I have used for some years are permitted in the sound of the some years are permitted in the sound of the sound years are permitted in the sound of Southard for a forting in all over the South of Southard I theirney——Perm Vorkables.

11616. When steads of Hackneys——Perm Vorkables.

Hothers. I have searchy a thry of Nerfoli: Ideal framework by their action, and a thry of Nerfoli: Ideal saws by their action, and after I get then home I ended not been them, having no noting power or stamina. It is not the stamper of the Norfolki — Yes, I don't see why it thought not in flat the early sard of the swenteeth horder have a first in the early sard of the swenteeth normal power of the Stamper o

11857. You think the Yorkshire Hackery is thought to the control of the control of the control whether he is find in the early next his new thorath should not in their in the control of the control whether has been as peak may Arabine herea for Yorkshire. We commons the sted body with the Yorkshire. We commons the sted body with Fisher. Well. "Blane" was used more that were perhaps and Arabina before that, from the large influence with "Blane" with a well mare that were perhaps and Arabina before that, from the large inther were forty Arabina validines introduced into there were forty Arabina validines introduced into 11868. To compare for more to over these what is

the difference in the quality and conformation of the

Yorkshire Hackney from the Norfolk Hackney !-

I find that the Nerfolt Backmay is very need one more about his shoulke and his last, he is not a, reduling bores, and I don't think he is even a propeble of the state of the state of the state of the best effects on or two and thought shares of the resons of Backmay belonging to them. They are as reason of Backmay belonging to them. They are as reason of Backmay belonging to them, They are as reason of Backmay belonging to them. They are an exact the state of the state of the state of the deal of injury to the name of Haskmay. I find an armyoff that the tree Holkowir is just as pere and general are a covered assumination of the any historic tree of the state of the state of the historic He is from the state frontaints and the same atons, and we have that two Base from and the other ending in a foliage and device

here.

11830. Is there not now a Hackney Stud Bock I.—

11 has been compiled for the last deam years, going back to about the year 140 for our forundation. We had to grapple with several things, and no death one or to have go in which had we known what they were would not have been allowed in.

11850. It has Stud Book school I.—No, every year 11850.

they are still going on, the membership is higher than ever, and the entries are still increasing, it is closed for new animals and has been for a number of years. 11831. The English Haskney Stad Book t—Yes, as far as Haskneys are concerned it has been closed for five or six venus. but they still allow improved

two or the years, the city stat above improved persian.

11832, Still is in not closed if they admit Hackney posite 5—They still admit what may be called positis under a certain sime inspected by comprisent judge, suitable to be heed with Hackney sires.

11833 Seprenting that many was test to a Head.

watering to be need with macrons piece.

1183.3. Supporting that many was put to a Rackney size and fired a larger animal than the limit at the present measure for entry, can that animal get inte the Stud Book 1—I believe that animal would in allowed into the Stud Book as having frontiation from the con-

from the pony,

11834. Then it would come from the pony daes
and go into the actual Stud Book 1—Being admitted
as the production of a certain pury that was impreted.

11845. If would not receive in conceive in coccion to go in 1—

I 11805. Therefore the Stud Dook is not closed to it is not closed in that side way. For several years after it was established we land what was called its proceed mores. We had a countil over Englished and Footband, and I believe Irradead, for imprecing more testing and the several proceeding the proceeding the several proceeding the proceeding the

been killed the day he was born. I have

driven the Yorkshires, on the other band, one by "Lord Darby" out of an old mare that had a smin of the coughland in her by her clean. I have driven her time after time to Leansk and hack, which is the same that the contract of the stage trip. I have also driven that make to Mother will said hack in a day, and to Glasgow and hack life mother was by a thoroughbard hore and her size as a powr Bathony, her make to "Money."

Her mother was by a thoroughbord horse and her aims as now Hashmay, but mane is "Nancy," all 11840. You think a cross of theorephired is either a good thing—I—four think it is an objection either a good thing—I—four think it is an objection that beech, because I am sures to get action if I midde that beech, because I am sures to get action if I midde that the control of the mane that is hy a theroughed to said the produce, not to by the foundation of a few lates of the interest of the Hashmay is the region to said the produce, not to by the foundation of a

stock.

11841. Lord Astrows, — You mean a Hackney put
on a mare by a theroughbeed t— Yes.

11841. Lord Ravmossynta. — Do you think it is a
good shing to go on keeding from the produce of
that i— It does very well, but you would not have
the scourity of getting everycene to come like poss as

I have out of my own Hackney mares.

11843. That is pore-bred, but the cross breeding?

If you have a stud of good mares and don't want to reproduce them again but to sail the produce, they

reproduce them again but to sail the produce, they will pay very well.

11846. But the produce of those t—Only for mares, and use always the pure-bred Hastoney stallion; not to see the stallion that is hall-bred, but a pure bred, and mather indired. I always his to have but a little

inheed, to stamp himself, and give character and give action.

11845. Have you seen the produce of these halfheed marret —I have just said that I have said there

1105. Lave you some ten process of these mainhead marris —I have just said that I have sold thrm for £460 the pair.

11846. That is the produce of the half-bred marcs!
—Of the marris by a thoroughbred horse out of either

Hackney mare or a stronger mare.
11847. And crowed again by a Hackney b—And rensed again by a Hackney. This mare that I dever from Lanark and back, and used as a mare for many rars, is bred in that way ber grand dom was by "OM Widdfre," her mother was by a thoroughbord brees, and the herself was by "Lord Deby," that has

ions the best mare I ever owned for real value. 11848. Have you put her to the stud!—I have bed two out of her. 11849. What is her produce!—One of them is a gibling by "Goldfinder." He has taken to his goand-

giving by "Goldfinder." He has taken to his granddam, and has a little more of the thereughherd in him, and does not bend his lances. 11830. Lord Astrown. — About the stud book, although thims are passed in still as improved, till

may man who looks back in the sted book can trace that they do come from the inspected mares I—Ob, yar; they are always mentioned.

1189.1. So that it is entirely optional with you if you wish to hay the produce of an inspected mare I— Ob, you; there is a branket put on to show that the

have hat a state.

11/103. That would not throw a purmanent state on the Hackway+—I find in reading Joe Oebocus out.

25 dipps, "that here are thirton parts out of they be that they cannot account for even in his brooding. 11/103. Dat still you would not be haying that stain with your eyes have 1—No, they would see there were so many crosses that they could not tell.

11054. You have had experience of resusing Hackarys and posites—Tex. It have done a good deal of that, perhaps more than any man in Souland or Bagistad. I test do some frem our wave positios, the South posities; those were not so good. It wast to Webs, and pictured up a good many Webl posities when the product of the product of the sound of the posities, and I have name of the low-interior posities waving on, in fact I sold one the other day, a galding like bedoes, for good, in the rough I raw yay. I will

much alife. They were all chestents, and the marrie were different colours, however and beys. The color all took to himself in colour and type.

11855. And were there not a good many families in Yorkshire specially eightested for their treools of horses—Type, eld Raischla and Croupton and Smith, si was quite a pleasure to they and heten to them telling of their favouries Hackengs and how they were

hred, away back sixty or seventy years.

March 5, 1927. 11886. Were those enternly that they head from there noted for doing long distances and hard work in those is Alexander days'......They spoke of going to market and doing great journeys, I did not pay so much attention, but they used to breg how they walked with their head and

tail on, and the old man would get up and show you by his walk their sait and style. 11867. Were you able to find out that there was any soft blood in Yorkshire Hackneys !-- I have never seen it or heard of it. I have had a great deal to do with what we sail the leading blood, "Lard Derby's," I have sold 100 horses by him, I have sent them to America and Australia, and I have had nothing but

the best reports. I have had a great many of old.
"Denmarks" and of "Fireaway's," those are the principal arrains that have held the foundations of Hackney. to Vorkshire. I would like to say recording Pracocky's strain in Norfolk, and comparing them with the Harkneys, that while they are big, strong, useful horses for marketable purposes, they are not the horses of commercial value as regards breeding horses to put 11358. Lord Assrows.—You mean non-pedigreed

Hackneys to sell as carriage burses !- But the Hackneys we ere judging in the show ring were nine out of ten come from those three strains, "Lord Derby," "Danmark," and "Fireaway." 11867. Mr. Werners.—Do you know whether there is a large trade between Scotland and Ireland? -There are still a good many bought.

11870. Do you think by the improvement of your breeding in Scotland you would injure that tends in double in fact to the price they would nay for those coming over from the North of Ireland, I have no difficulty in selling them at good prices. 11871. I am referring entirely to half bredst-I are meaning those horses that are brad Hackney sire. I care not what the mure is if the fun

a celding. When I am going to have a sale I cather two or three from my neighbours and am glad enough to hav one from a small farmer here are another from a farmer there because it puts faith in there, and induces them to go on breeding. I can break them better and rut them in better share, and they some and see at my sale that they have yeads 11872. Do you find that there is any prejudi among the Scotch dealers against the Hackney blood think there is one man has notion wretty strongly

against the Hackneys going into Ireland on account of being interested in having the pure hunters; but the same gentleman is very fond of getting a pair of Hackneys when I can still them at his price, and he is always ready when I have a pair to come and see them, and offer me a price. I won't mention his for he is a customer, and will be a customer. 11878. He does not find any fault with you on that account !-- No ; he would give me a much larger price for those than for ordinary carriage horses. either coming from the States or from Iruland, because they have some action.

11874. In the class of animal that a small farmer with a small weedy mare can breed do you think with a small weedy make can breed do you think there is any better stallion than the Hackney !—Car-tainly not. I could tell you several instances wherein this has been most valuable. This mary I am spening of, that I first saw, of Collingson's, was a little grey more by a thoroughbred home not over 15 hands. and the production of that more in three vales was over £1,000. There was £500 realized for this very mare that I saw first shown 11875. That was merely cross-bred?—That was cot of this little blood mure by "Lord Derby II." I gave

Present impro-chatgood by the Lieuwersty of Southernston Library Discussion Link

him a very good price for the twe loget, and within 200 years of the same farm I bought two from Mr. Atkinson, of W——; one I called "Adam Bede" are too leggy, they would not be bought. I had a long talk with a Wost End dealer here; he is a veterinary surgeon and dealer; he goes every fortnight Printed Image dentised by the University of Southernton Library Digitartion Unit

and the other "Leed Lossy." I sold both when two years of age; one for £150 and the other for £130, "Lord Lossy" went to Australia as a stallier, and he notted the gentleman that bought him from me 500 gainess. He got nearly £1,010 for him. He has been used in that country, and has spread a lot of first-class viding and driving horses since then "Adam Boic," strongs to say, in the year following followed him to Australia, but he was kept by the gentleman's brother that bought him from me, and he never went out to be public property. Those were both from a mare by a horse called "Stowdon Hill," a big, strong thereographed horse. The mare Hill," a tig, strong thereogenized horse. The mare was a hintiding type, showing the cless of minosi that could be heed from using a gare Hickney, "They cause each nearly 18.5 hands high, shirtings," They cause each nearly 18.5 hands high, shirtings, and Darby" himself was not over 18.1 hands. 11876. Here you ever hed Hackney from the

roughbred mares or not 1-Not pure theroughload I never had a pere thoroughbeed mare. 11877. Do you think that Hackneys are improving now or the reverse; is more trouble taken with they hreeding or are they going back! I mean the general run of Hackneys i... I think there is a great imposesment, I judged in London four years ago, and I sudged this week again. I have also judged at the Hoyal and the Bayal Lancoshire, and I think there is a great increase in the merit and quality of the Hackney generally. I think our yearling class this year was not as good as I have seen it; but that will happen, the history. The Next year they may come np quite different. The three-year-old stallions over 15 hands was the best young class I ever saw in a show ring

31878. The week know at all whether there has been much trade in the show, whether there is a large demand for Hackneve!—I believe there have been demand for Hackneyet - a senere source and my place, soveral sold; they were in the parade, and my place, stand in the ring. I saked one or as judge, was to stand in the ring. I asked one or two were they sold, and they said. "Yes, I am pleased to say I have get mine seld," "and mine said," and several have been sold since. Lest year about twenty happens to be of the Hackney type and can so if it is of these valuable stallions were sold: I cannot tell what questity this year, but several have been still both to home and foreign hayers. I might say regarding the Americans, if I be allowed, that I was at the New York Show, and I saw several of the study; there are a lot of fine horses in America, but I though from my standpoint they were a little bit light of bone and a little bit leggy, and I am sure in time the Americans will find that nothing can improve the value of their horses so much as using a Hackner stallion. The real troiting men are very jealous of interforing with their fast trotters, the same porings as bunting men would be; but for general value horses, to sell for carriage and harness work, nothing could do them so much good as using one Hackney

stallions on their own bress-mare 11879. Do you think if they do that, they will to a great degree, out out the home trads in harness horses !-- I cannot tell; if they can bread a good bores and sell a good hores, smarkedy will get the benefit of it. I would not object, it is like the case and wheat, I am glad to see the good chesp stuff coming into the counter. I think they will bred some good horses; I met a greet many farmers west of Chicago that made a great tends in

11580. Were you ever at one of the hig sales in Chicago!—No; I did not go there. · 11881. It is one of the largest horse markets in the world!—Yes; I met one of the envicement, and ment a night or two with him-he starpered me with

e statement of the number of horses that passed through their handa. 11883. A number of American horses do come over to Scotland and a fleet the breeders !-- You, they affect a certain class; but they are not approciated, they

to Ireland to buy, and he had made up his mind, he aid, never to key an American horse again ; he had nothing but disappointment, and it affected his posiour with his outsomers. I saw a team in New York of Hackneys by a Hackney horse out of their own mager, I thought they were as fine a toam as ever I now; that was in the New York Show-they were really characters.

[1583] Lord Rarenoversa.—There is one que

sion I would like to ask you-I understood you to my that there is no soft blood in the Yorkship Hackney L. Well, I have not found any myself. If then is any particular strain you would mans, I could tell you whether I had experience of it.

11884. But it is rather a broad statement to make that there is no soft blood in any brend because I appose there is havely any breed of horse, thurwighlevel or navthing else, that has not some soft strain in E 1-I have not found myself in the Yorkshipe many myself, I have driven half a dozen different Mr. Alex mores or horses—as many as I have used—but we Hartes, a.r. break them mostly all in, and know before we get them finabled whether they are soft or not.

11885. Mr. Warson.—Have you had any complaints from the people you sell them to I.—Never a word; these pair of brown house I sold them to a lineleum manufacturer, he is a millionaire. I met him in the show, and he said, "Those horses have

Hackney out blood ; of course. I have not driven so. Moves, use,

given me more pleasure than any I ever had, I would like to have another to make three, so that I could rest one if anything went wrong with it." These two were out of light Yorkshire cart marre by "Lord 11596. Is there anything else you wish to state! -No; I have made my statement on that paper.

The Commissioners adjourned.

TWENTY-THIRD DAY-WEDNESDAY, MARCH 10rg, 1897.

Sitting at 12 Hancon-square, London, W.

Present-THE EARL OF DUNEAUEN, E.P. (in the Chair); Mr. J. L. CAREW, M.P.; HOR. H. W. FITEWILLIAM; MR. PERCY LA TOUCHE; MR. F. S. WRENCE; MARQUESS OF LONDONDERRY, E.G.; LORD RATHDONNELL; COLONEL ST. QUINTIN.

The East of Courses examined

11887. CHARMAN.-You are Master of Horone time when I was a Master of Hounds to attend a great many of the faire in Ireland-Limerick, Cahir-

11906. Were they satisfactory!-No, they were

Mr. Hugh Neville, Socretary.

Majesty's Buckbounds !- Yes. 11858. And for some years you were Master of fex hounds !-- Yes, for many years. mee, Cloumel, Hospital, several of the principal faira.

11502. Do you get poligress of the heren!—
Noarly slways, I always like to have a poligree if I 11889. And you have judged house in shows in lapland and Iroland !--You. 11800. Are you pretty well acquainted with Iro-land generally as far as house-breeding is concerned? 11905. And you think they are reliable !-- Oh, I

think so; speaking generally. -Yes, I am ; I know Cork, Limerick, Tippersay, and 11904. Are you able to form any opinion as to whather the supply is falling off in the fairs 1-No. 11891. And the special parts of the country princi-pally devoted to breeding hunters — I think so. 11893. Have you yourself bought many Irish homes — Yes, I have bought a great many during I have rather given up going to the fairs. I have not been for the last seven or night years. I have

not had to boy so many burses, and in consequence I have abandoned going to the fairs. the part 30 years, almost entirely hunters. 11905. Have you longbt bunters in England with Hackney blood in them 1—I think I can recollect 11893, Have you bought any borses in Ireland for harness purposes !-- I cannot remember having two in my life that I have bought with Hackney bright, perhaps, more than half a dozen for barness. blood in thesa.

11894. In your opinion has the Irish horse an special value as a hunter!—Yes, I think he has; I 11907. We have a good deal of evidence to the think they are the best horses I know. 11595. To what do you attribute that !- Princieffect that the Hackney blood is not only not datrimental to the production of a good hunter, but that a pally to their superior breeding and to the effect of the great many good hunters are the result of the first cross of the Hacktory blood; have you any opinion dinate and soil of the country, which are so well sispted to the raising of horses. 11595. The soil and the climate would be equally about that i-No; I can only judge from the two animals I am speaking of just now that I possessed;

well adapted, I presume, to the mixing of harmon boson or any kind of horses?—That may be so. they were very smart, nice bornes, and jumped very well; as long as bounds run with a cold scent they 11897. Am I right in saying that you attribute the sussess of Ireland in heseding hunters largely to could get on very well, but in a hurst they failed to the blood i-Certainly, yes.
11898. That would be to a very large admixture 11905. You have not had any particular expe

except of those two animals of your own 1-No, I of the thoroughbred blood !- Yes. 11892. Have you bought say house as hunters which had any strain of cart-bores or Hackney in them !—In Ireland, no, I don't know that I have; I 11909. Do you think the introduction of the Harkney blood in Ireland would have a detrimental have in England, but not in Ireland to my knowledge. or benedicial effect upon the production of hunters !-Oh, a most detrimental effect in my opinion. 11900. Am I to infer from that that you would 11910. Do you think the introduction of the Hackney blood would be beneficial in the congreted not buy them in Ireland if to your knowledge they had Hackney blood or cart-horse blood in them 1—Net

If I know it.

11901. You bought homes yourself in Ireland from districts and those parts of the country!-Well, I have had no experience of that part of the country, and I could hardly say; I don't like the Hackney. the breeders !- Generally from the breeders. I used at

Printed image digitised by the University of Southampton Library Digitisation Unit Printed image digitized by the University of Southempton Library Digitization Unit

11911. Assuming that it would be beneficial three, do you think there would be any danger of the blood The Earl of

Marris 13, 1802

gradually permeating through the country and doing damage —I should may there would be great danger of its filtering far and wide. 11912. We have had a good deal of difference in evidence as to the value of the half-bood size (I mean by half-bred sire a sire that is not in the Stud Book, but with many orongs of theremphased blood-as to whether they are suitable or not for getting hunters and high-class carriage burses out of the helf-bred mares; have you got any opinion about that 1--Ob, I have a very strong opinion. I abould be very sorry to use them to got hunters. My own idea of the hunter is if you want to breed a huntur I think you should have a pure strain of blood ou one side, and that remark would apply to the breeding, in my opinion, of cattle or sheep too; but for carriage borees I daresav a half-bred horse would do; I won't say as well, but that he might do

11913. Have you formed any opinion as to the class of thoroughbred stallions in Ireland generally, I am not speaking of Meath and that kind of sounties, but more of the West, and so out—I have not seen many during the last few years : I was so much engaged at the last Dublin Horse Show in my ring that I did not see the thoroughhood stellions scarce of surprise to me that so good a conserve could be got together; I had not thought there were so many good horses in Ireland. 11014. We have had a good deal of evidence to the effect that in the remoter parts of the country

the description of the thoroughbred horse is very inferior indeed, which, perhaps, is not strongs, if they are not able to get more than a 5s fee !-- In the 11915. Yes, all over the north and south and the poorer parts of the country with the small farmers. and the question would be if anything is to be done to try and improve the horse-breeding in those parts of the country, what kind of a sire would be most suitable i—As I have no knowledge of the masse I should hardly like to express a positive chinion, but I am always in favour of the theroughbred stallion. 11916. That is to say, if a sound thoroughbord etallion with enficient hope and intutance could be

obtained, you would needer that to anything also !--11917. Even for those parts of the country where the mares are very small and light and weedy !-11918. I don't know whether you could give the Commission any information as to breeding for har-ness purposes 1—No. I am afraid I cannot.

11919. And we have had a good deal of divergence of opinion also, assuming there was morey to be aid out in the improvement of the industry Ireland, as to how it could be best applied, how the better class of mares generally could be obtained, whether it should be entirely confined to the question of providing superior stallions, or whether anything sould be done to imigon farmers to keen their best mares to breed from or supply them with better mares, or anything of that kind !—It seems to me mares, or anything or that kind 1—1t eseme to me that the best way to improve the bread of hunters in Ireland would be send over a few more superior stallions if we could got them; unquestionably Ireland is worse off for stallions than England. 11920. Then you would not suggest that anything special should be done in respect of the mares, a scheme of registration, or prises, or anything of the kind 1—No; I am afraid I could offer no suggestion except, perhaps, that I should always encourage the giving of prizes for four-year-old marcs with foal

11921. Can you give us any opinion as to the

posites 5—No, I know nothing of posites.

11922. Have you any information as to the Royal

Dublin Bodety's scheme in Iroland as for as borses

Yes; generally all through the shows the young horses have been particularly good. 11938. Comparing the Dublin with the Islinston then but when I have seen them it has been a Show, and the local shows in Iroland with those in source of surprise to me that so good a collection Encland, would you say that the hunters shown in Ireland were superior to the class shown in England

at similar shows !-- Yes, a far superior class ; you see a far larger number of superior borses than you see 11030. When you were judging in England, have you seen superior horses to which you have given prises that you have known to come from Ireland and 11930. And those horses by their appearance were by thorough) and horses !-- Certainly : I should think

are concerned its methods, and so on turks for a P can judge from what I heard it seems to be working

11923. Lord LORDONDERST.—I rather from what

you told the Chairman that you consider the best

bursters was had originally came from Ireland t-

11974. You attribute the modums of those seizes to the soil, and to the climato to a great extent t-T

think to their superior breeding first, and then to the soil and climate which are so well adapted for the raising of young horses. In my experience it seems to me that the Irish horses have always so

gruch more bone than those beed in England and

1182b. Have you had the borses you have had exposience of from any particular district, that you have confined yourself to 1—I used to buy marry all my horses in Cork, Limerisk, and Tipperary.

11926. Have you indeed at any Shows in Ireland besides the Royal Dublin Society's Show t-Yes, I

11927. You were struck there by the superior class of hunter that you have seen shown there !--

have judged at Cloumel and Limerick.

commonly wall

etter quality of bone

11931. And from a superior class of mare !- Yes. 11933. Such as you see in those hunter breeding centres to which you have alluded—Meath, Klidare, Tirperary, and Waterfeed t—Yes. 11938. In your experience of judging horses at shows, you would be able to tell-very likely you

shows, you would be also to best-very many you would notice—probably by shape and action whether there was anything of the Hackney strain in homes shown as hunters—I think I should detect it, the action is so year different. 11934. Would you give a herse of that seet, however well shaped, a prime as against a horse perhaps not so well shaped but showing qualities and action which he could only get by a thoroughbord sire!-I should not; certainly not. I should give the preference to the franting type of horse. To my mind the action of the Hackney is not suited to ret over

11935. You have seen of course a good many of those Hackneys. I don't know whether you have seen any of the Consented Districts Board-700 seen any of the Congested Districts Board—you London and at different places in the country ton 11935. They are to a certain extent very taking in their action when they are walking through the

11937. Do you think that those animals standing above narts of Ireland, and their appearance being more taking than the true hunter sire, might induce the farmers to send their mares to such a type !-Van: the action of the Hackney would be sore to fascinate the farmer; he would like to see him run up and down the street in a market from and he would

send his mare to him in preference to a thoroughbred 11938. And that was think would be dissertons to maintaining the present superior breeding of the hunter which now exists t-Certainly, I do; I don't think you can improve the lines on which the principal hunter broaders are soing now in Ireland.

11038: And if those Hackmers were used in centric parts of Ireland, whether they would be an advantage you would draw a hard and fast line to owwent their getting into those parts of Ireland in which you aimire the present breed of hunters -I should like. to see that done very much.

115039. You have not seen those parts of Ireland is which it is proposed to produce a better class of animal from those poor meres by Hackney stallions ! -No. I have not.

11940. Have you been in South Wales, in Lord Tredepar's part, at all !- Yes, I bave been ther 11941. He told m, I think, that one of the best tenters he or his men had, was by a Hackney. Have you seen the produce by his Hackney stallions from the poorer class of animals that he reared in those poorer districts of South Wales !- Yes, I think

I have. I have seen ponies got by Hackneys in local shows there.

11942. Did they give you the idea that they would be animals that would fetch a certain price in the

oven market !-- I think they would have been useful open interests purposes.

11943. Then, as fas as I gather, your opinion is that if these Hackneys, as far as your experience in Lord Tredegas's district, could be hept perfectly

pure and confined to those poor districts they would be of use, but that if they were allowed to get down to those hunter-breeding counties they would ruin

the breeding of hunters - Quite so. 11944. Mr. Frewnianas. - Talking about stallions ere advocate thorough head stallions, but in the event of yes advocable tearrough new stantons, use he as occass or not being able to get the required number of therough-heed stallions in Ireland, should you object to a well-bred half-bred stallion !—I think! I should on principle. 11946 How would you supply his place!—I think the people who live in the locality ought to meet,

11946. What do you think a thoroughlord borse solishic for the purposes can be obtained for now-a-dars t—I should think a very suitable here night be obtained at from \$100 to \$150. I am mealure of the ordinary run of horses, nothing out of the common. I don't mean a special home such as "Wastington," but home which have broken down. with no particular character on the turf, but who

are yet good-tooking, well-shaped horses. I they might be got at from £100 to £150, have had no experience myself in buying lately. 11947. Do you object at all to breeding early from a mare that is going to be used afterwards for other permonen L. No. I are no objection to St. I think very often a mare taken some time to recover from

it, and that her appearance is not so good for two or three years perbare. 11948. Bet you don't think it would injure her in her growth !- I think not.

besiding, do they apply also to riding horses generally throughout Ireland t—I hardly understand your 11980. To the remarks that wer have made with

repard to the qualities of the hunter apply to horses for general purposes 1—Ob, I think so. It seems to the from my exercising of Ireland, that the horses are generally very well bred. Certainly in the South they are a year well head type.

11951. Lerd RETEROGERED.—From what you have think that the high class borses in Iroland have deteriorated, or the reverse t-I don't think you see toy more good becaus than you did eight or ten years ago. I should think the supply keeps pretty much the same. I do not see any great improvement so far as I can judge in the numbers. 11952. As to quality I-I think I see more under-bred lorses in the show now than I did fifteen or twenty years ago, but all the best horses are still

of the same quality.

11964. You say you would not have a half-bred Greany size in Ireland on principle—do you know how the winner of the last Grand Military at Sandown was bend t-I don't know his name.

"Markintosh" — I have beend the name.

11905. Do you know he is by a horse called "Markintosh" — I have beend the name.

1105. Ha is a half-bred horse i—We speak of him

as a half-bred horse; he is not in the Stud Book.

Mr. Warsen. — He is practically threoughbeed,
but not in the Stud Book. Witness.—Then, he is probably what they call a

cocktail, nearly as thoroughbred as "Echipse," but never registered.
11957. Lord Barmnowersa.—I think he is a half-

Lord Leysconsensy.-The famous "Mrs. Teaffe" Witness.—Yes, and "Hotsper," who ran second in the Darby, but I believe they were as thoroughbool as "Eclipse," only they have never been registered. 11908. Lord HATHDONFELL-Still you would not object to using a berne of that class !- Possibly the

dom of this horse might have been a thoroughbeed mare, and in that case I should not object to it. My contention is that you must have a pure strain of blood 11050 Mr. La Torrenz -T conclude you would have the same objection to a Harlengy stallier as to a

half-bred !-- Cortainly. 11940. Would you or would you not consider that the Hackney strain was a pure strain of blood 1-I

should not consider them a nere struct. 11961. Have you ever judged Hackmeys at local shown in England 1—No, never; I frequently had horses that come before me, got by Hackmeys, no

11962. The leading characteristic of the Hack-ney horse is sotien I suppose t.—I think so. 11963. Do you think that he cohtains merit of there and form busides action 1... Very often they are

well made horses. I don't think they show much anny. 11984. You said you thought you could detect the Harkney blood in a hunter from the Harkney action.

but I suppose it would be quite possible that a Hackney borso might transmit his shape without his sotion to his progeny 5-Ob, I should think so. I should say that three cut of four would have the action more or that three out of four would have the action more or less of the Hackery; but I should not like to speak positively on that point became I have had no experience in breeding them. I 1946. You say that Ireland is badly off in the matter of stallions -did you mean in the number or

quanty or too stallings to I moved say the quantity in the rural districts. I was judging last year in Linewick. There were very nice beenes above, but I don't think there were more than four or five stallings at the slow. These were very nice horses. but not in my coluion a sufficient number for the 11966. It has been represented to un that a great

sany stallions in the country districts are unsound from disease, and that it is possible that the disease would be hereditary—would you approve of practically prohibiting such stallions from serving 1-Oh, I think I should like to see it done but of course it would be a very difficult matter to carry out. woust be a very difficult matter to carry out.

11967. I take it that in your opinion there is
nothing that a Hackney horse can do that a thoroughbred cannot do better except bending his knew i—Yes.

1155E You fully recognise the importance of breeding harases horses—how would you propose that those harmes horses should be bred in Ireland! some natures noises securi to near in restail 1 in don't think they do bread; as for as I can see from my experience I don't think they do go in for breading harness horses in Iroland, do they t—I don't see Merch to 1895. 11969. There are something like 40,000 horses exported from Ireland to England - a very large reported at those must so to be harness horses !-Ves. I think so. I think those are calls as far as I can judge that are bought as two or three year olds at Cahirmee fair, but a great many of those which are taken over to London for berness purposes would

The East of

Covertey.

make very useful hunters no doubt.

11970. You have possibly hard of those mares the property of farmers in the power parts of Ireland, do you think they would be capable of breeding an animal of any utility by a thoroughbred sire-do you think those very indifferent mares would be capable of pro-

during an animal of any value or utility!—I have hed no experience of those, but I am a great believer in the theroughbred blood. I think it is very possible that a theroughbred size might get some very good offspring from those mares, but I have not seen them, 11971. You think they would be just as likely to preduce a useful stock by a thoroughbred sire as any

other sire !-- I should my co. 11972. Mr. Canny --- You know that a great want in Ireland is some inducement to the farmer to retain his mares to bread from !- Yes. I have heard that, 11973. What would you recommend as an indocement to them-I think you said to the Chairman that you would establish price for four year old marcs with foals at fort at the shows !-- Yea. I think that would be a step in the right direction.

11974. Would you have prizes for three-year-olds with foals at foot 1-I don't think so. 11975. You would not object to head from twoesr-olds :—I don't think so. I will give an instance. I bed from a mare who was only two years old, I sent her ton horse called "Petronal" The result was a colt that won a race justerday.

11076. That was "Petronel" the winner of the Two Thousand guineas !-- Yes. Many of my friends

thought the mare was too young to send to the horse, but I did that as an experiment, and it certainly turned out presty well. That is the only time I put a two-year-old to the horse.

11977. You know that the farmers breed from

two-rear-olds, and very successfully, in Ireland !-11978. And if prizes were given to three-year-old mares with foals at foot, it would be a great inducement !-- I think that would be a step in the right

11979. Then your predilection for the Erich hunter is due to the superior breeding !- Yes 11980. And to the absures of Hackney blood t-Certainly. 11981. And if you were a bayer in Ireland you would object to the introduction of the Hackney

blood 1-Certainly. 11982. You think that they would taint the hunter broad to-Certainly; they would destroy, in my opinion, the character of the Irish hunter alto-11983. You have considerable experience yourself in the shows in England and Ireland of the different

qualities of the horses exhibited there !- Yes 11984. And it is in favour of Ireland! Cortainly, 11985. And if Ireland had the same facilities for etting theroughbeed stock she would still maintain the superiority in the breeding of borses !- I think the horses are now greatly superior in Ireland to what

the harvas are now greatly respector in Liveania to be un-they are in England.

11986. Mr. Wassen,—Do you knool harvas very much i—Not very largely. I have always bed three or four mares for the last forty years.

11987. No Hackney mares!—No, noves, 11988. If you had to try to improve the very —1100 minute in the wave toor districts, what

miserable animals in the very poor districts, what class of size would you be inclined to use t—I ham towards the thoroughhead blood. I should like to grees given by farmers at Irish fairs might be fairly relied on 1-I think as try a small thoroughbred sire; I imagine they are of the puny class, the marcs, are they not? 19006. And you think it is tolerably easy to detect Hackney blood in an animal !-- I do.

yon think that a small thoroughbeel would produce the most marketable animal !-- I mennet my that, became generally speaking I do not know what those ponice are. If they have no action the theroughbest horse has very often no action either, and the result would be that perhaps the animals would not be so saleable for that reason. 11991. Do you think that action is a meable commedity for a poor man's horse!—Oh, I think as

for certain purposes ; for harness, I have harness in 11992. Do you think that a thoroughbred horse no matter how good his action would be, is likely to transmit action as a breed of horses that had it bred in them for generations t—Ob, I think so. I think

if the thoroughbred has good action himself he would probably transmit it to his offspring. 11993. As much as the Hackney !- You I do not see why be should not. 11994. Have you any experience of that !-- There was "Q.C.," a thoroughloud horse with the fixest action I ever saw.

11915. You naw him yesterday !-- I did not know that he was at the show. That was a horse with very fine action indeed, and I have understood that he transmits that through his produce, but I have nover seem any of them, so that I cannot speak of my own 11916. And would you object more or equally to the cross of the Suffelk Pench on a hunter as the cross of the Hackney !-- I don't like the Suffolk Punch.

11997. You disides him as much for hunting blood as you do the Hackney !-- Cortainly as sunth as the 11998. And do you dislike the Clydoudale as much t I distille the Clyderdale. I should prefer to beech —I thinks its Cytorian. I issuin year to oreo from a Shire or cart horse and put him with a thereuphbred more than I would from a Hashrey. 1199, But I am talking of half-brad mares—would you object to Chydwidio blood in hunters!—I don't

12000. Do you think it would be easier to detec cars blood in bunters than Hackney blood in hunters? -I think it would be much easier to detect Hackney

bloed than cart blood in the bunter. 12001. Have you known instances of borses with cart blood in them very good hunters !-- Very good, 12(02. And sold at a very big price !-- And sold at a very big price. I know one boos sold for five

hundred gainess, and I have known several sold at four hundred and three hundred, out of cart mares. But the gentleman who bought them I don't think know them to be out of east marca. But I know, because they were bend in my neighbourhood. There was a horse called "Flash in the Pan," who was a very good hunter getter. The local farmers sent their cart mares to him and he was very swoccurred in getting good horses. There was a horse of my own, called "Unspire," I remember his getting three remarkably good hunters out of a cart mero, one found its way into the stable of a very good judge

indeed, it had been bought by a dealer and sold to this sentleman, and the gentleman wrote to me for the pedigree of the mure, and he select me if she was a thoroughbred, be had such a high opinion of the horse, and when I told him the pedigree I could hardly get him to believe it the hume showed as much quality almost as a thoroughbred horse.

12000. He was sold at a very big price!-Four hundred gainess. He was by "Umpire" out of a cart mare.
12014. Mr. Canrw.—Was "Umpire" thorough bred !- Yes. 12005. Mr. Wanness.-You think that the pedi

19007. If there are those two olymprotamore what danger is there of the Hackney blood being used by neggle who do not wish to use it!-Oh well I think the danger would be if the Hackneys found their the danger would be if the Mackneys sound their way into the South of Ireland. I think they would be very largely used possibly.

10000t. Have you over heard that it is suggested shat Hackney stallions should be sent into the hunter. breeding districts !- I have never heard it-no. 19309. My point was that if you ong detect the

Harkney blood, and also if you can ascertain the redirects, what danger is there of azimals with Harkney blood in them being used as hunter brood mares !-- I suppose the farmers would use them 10010 Yes; but then if you are told that there is a Hackney cross in a hunter, if you don't like the

Harkney eroes you would not buy the animal !-Parhana after the second cross is would not be so easy 11011. Would you object to the second gross !--

Oh, certainly. 11012. The cross of the Yorkshire Hackney if bo had thoroughbeed blood in him !- I should not have called the Hackney a thoroughbred myself, but I have

no experience of them. 12013. Have you any preference for the Norfolk or Yorkshim Hashneys !- I have not studied the heed very much. I have seen them, but have never had anything to do with there

11014. Do you think that the Hunter Improve-ment Society has done good in England 1--Oh, I think so. stale so. 12015. Would you like to see a similar Society started in Ireland —I rather think I must qualify that opinion by saying I have not followed the pro-

ceedings of the Hunter Improvement Society very much lately, but I understand that they rather samples the use of ball-lored sizes. I whilest to that very much indeed, to half-bred sires with a certain number of strains of thereachbred blood in them.

11016. Do you object to half-heed sires, limiting then as they limit them I ... I do 12017. You would not have that bloed 5-I would never use them at all violent for three-neitherd marra My contention is that you must have the pure blood on one side to be successful.

11018. Do you know as a matter of fact that in Ireland there are a very large number of east horses best hunter-breeding districts !-- No : I do not. my visits to the South of Ireland I payer see them. Probably I should not be in the way of seeing them horses in Ireland. rees in Irolano. 12019. Has it ever been brought to your attention.

that many of the best hunters in the Dablin Show are by half-beed bornes to-No. 1959). Do you believe the pedigrees given in the Dublin Show Catalogue as well as the pedigrees given by the farmore at fairs !-- I do. I believe they are

19031. Do you think it is a enrious fact that there are a number of borses with pedigrees, and there is a note attached that the breeders are unknown!-No subt a great many mistakes are made, but cenerally I believe the nedirress are correct 120 22. Substantally correct 1—I think so.

15023. And therefore if an attempt was made to etars a Hunter Improvement Society in Ireland it 12024. Do I understand you to say that the

therearbleed been is neactically the only sire you would encourage in Ireland by public money 5-With a view to breeding buntors. 19025. Would you turn the whole country into henter breeders !--Oh, I judice to the hunter more

than to any other class of hirse.
120'95. Would you try and encourage all the horse breeders in Ireland to breed hunters, or do you think

Printed image distinged by the Limstraty of Southampton Library Distingtion Linit

not breed harness horses if they like. I think they Coveries, would find hunters most profitable. 12027. Do you think that the hunter is as readtable to the poor small farmer who caused make them but merely our sell them eately !- I think so; he would probably sell them as colts, yearlings, or two-year-olds.

19028. Do you think it is an profitable as selling arness horses with action !—I think so. I think a hunter of good quality, two or three years old, would fairh much more money than a harness horse rot by a Hackney, that is my opinion.

12019. Do you know the North of Ireland at all 1

No. I dou't. 12030. You don't know what class of horses they reed there !- No. 12011. Then you are not prepared to may that there is no opening for breeding harness borses in

Ireland as well as for breeding hunters !-- No. 12032. Do you consider Ireland the best country in the world for breeding bornes of every kind !-think it is the heat I know of

12013. It has been recruited to us that all stallion ners should be obliged to take out a licence, and that the literous would only be granted to sound stallions, would you appeare of such a personnersia-

tion 1-0b, I think I should, certainly, 11034. Do you think with regard to makes that it is fearible to give any sufficiently large prizes to induce the farmers to keep their best mares, and not

induces the farmers to keep their best mares, and not sell them if they get a good offer — I think so. As I was saying before, I should encourage the two or three year and classes by giving good prass. 12035. What do you call good prizes—I mean the amount !—I hardly know; I think prizes of £30 and that sort of thing.

id that seet or tring. 12036. Criataway.—You attach great importance, absolute importance, to the existence of a pure strain on one side or the other in breeding horses, cattle, and so on !-- Cortainly

id so on I-Certainly.

19017. As research Hackman, do you consider that the pure strain is established by the larger being in the re pure summe is extansioned by the more being in the 12018. How would you define as regards Hackneys and Clevelands and a variety of horses-what do you understand by a pure strain in anything except a thoroughired !-- I should think there were none of

them pure, that is my view. 12039. And practically either the dam or sire should be a thoroughbred !- Yes. 12040. As to the pudigrees, some apprehension has

been expressed before us in evidence that the cross of these Western posses, the animals that Mr. Wreach described as half starved animals, and the Hackney sire would be sold in the parts of the country more are would be seed in the parts of this country inter-or less divoted to hunters, and that they were not suitable for breeding bunters. You said that you think that the pedigrees given to you by the farmers and others from whom you bought might be concrails relied upon, but that would not affect this particular rened upon, one that would not appet this particular case; it would be a question whether the farmer baying a mare to beend from would be sure of its pedigree. Do you think that in the case of say these horses coming from Connaught and the Western districts into the open market, do you suppose the farmer buying a mare to broad from would roaks any particular inquiry as to pedigree, or would pick un the animal he thought best suited to him !-- I should say that he would make inquiries, but I have not sufficient knowledge of your countrymen to my that, but I should think he would ; they always seem to when I have been buying brees I invariably ask for the pedigree, and I generally find that they give me a pedigree that I can trace whenever I try to do it,

and they are correct generally speaking.

1994. You don't disapprove of breeding from
two-year-olds yourself t—No, I think not. As I was saving. I only beed once from a two-year-old mare. Printed mace discussed by the Linnersity of Southwardon Library Discipation Unit

408 COMMISSION ON HORSE BRREDING. 19051. But you don't know any particulars t-No. 12042. The result would depend a good deal upon 12052. And in the fairs that you attended in how the mare was treated !-- Yes, this mare had been to Eucl of Ireland, do you think the preponderance was of cooler bad horsen !--Oh, largely of bad bornen. I should think a great many had once of course. In a fair 12043. And you told us that you thought that, as far as the breeding of hunters was concerned, the present lines on which the breeders were acting in Ireland were actifactory, what do you mean by the present lines !—I think that as to the present lines that they use in the South of Ireland they breed from like Caliernee you see a great many.

19053. Yes, but that is a ploked fair !—Yes, there are two or three thousand horses there. There must be however a very large unmber of had ones well-bred mares and from thoroughired horses. I don't 12054. Do you think that it is the daty of any think they could proceed on better lines then those public body to try and improve the best class or try 15044. And you think that a certain number of sound and suitable theroughbred stallions with, we to help the poor people !- I should try to improve the best class of horses. I should try to improve I think it is the duty of every landlord to do will say, not speed enough for racing, or perhaps what he can to try to improve the brood generally. broken down from some comparatively immaterial eggs, can be had for about £150 1—I should think to. 12055. You think the poor farmers would have so 12045. Do you know what price the Government equal claim at any rate with the big ferrors to be aid on an average for their Hackney stallions !-- I improved 1-Certainly 12056. Do you know that in Ireland the very poor 12045. Assuming it to have been on an average farmers form a large preponderance of the population!

—I have no doubt that they do; yes. 2200, you think a fertiers suitable half-bred stallions could be obtained at the name price !- I should say 19057. CHAIRWAN.-Do you know that prize are but I am taking your figure given by the Hunters Improvement Society for bunter so, tot 1 am taking your name.

12017. Speaking very generally—I do not know
whether you could express any opinion about to—
would you say that the breeding of hunters and high sires, half-bred sires—do you know the conditions !--I think my friend who is going to be examined can probably tell you, Mr. Legard. I think they must class carriage borses, which are bred in some numbers have four eroses of the thoromethered blood but I in Ireland, is probably the most profitable branch of was very sorvy such a rule was ever allowed to pass.

12058. You don't approve of it 1—I den't approve the industry of borse breeding in the country !-- I should think certainly it is. 12059. I only wanted to get from you whether you 12048, And would you think it dangerous to encourage the production of harness borses by say disapprove of it, subject to those rules !- Yes, I disthe introduction of Hackney stallions -do you think approve of it. 12010. Lord RAYHDONNELL - In your trave that would be likely to be followed by any concequences which would deteriorate the hunters !-- I through Ireland, have you ever privately bought bunters from small farmers, breeders!--Ob, frequently. think it would be most dangerous to the interests of the farmers-most dangerou 1906). You think the small farmer is a pretty sharp man as a ruleabout breeding!—I think so, I meel to buy coh huntere, and I found I could buy then from small 12049. Mr. Warmen.-You referred to two horses that you recollected with Hackney blood-do you remember what Hackney stellion they were by I-Oh, farmers better than anyone, generally small horses. no; it was years ago; I don't remember what they 13052. A good class i—A very good class. 13063. Mr. Writner —What do you call a smill farmer!—I could not say. 13054. You did not take the acreage of the farm? 12050. Or whether they were bred in Yorkshire or Norfolk !-- I don't remember ; I know they were by -They were not what you would call strong farmers. Harkney horses. The Rev. Cerus LEGARD examined. 12065. CHARRMAN,-You live at Cottesbrooks Ros-10076. What class was that !-- I thick the class orr. Northampton !-- Yes

12066. You have had a large experience in horses, 12077. Mr. Wasson.-Light-weight hunters !and have acted as a judge at shows for many years !-Yes, as well as I can remember. I darreny twenty-five years.
12067. Have you indued in Iroland at all t... Year 1207E. CHAIRMAN.—Would you appeare of the registration of half-bred sirm under the Boyal Dublin n three or four occasions in Deblin and once in Society's scheme !- Well, I should Limerick; not more than that.

1936k Then your only comparative knowledge would be as regards the Dublin show!—Yes. 12079. How would you define them-in the same manner as they are defined by the Hunters' Improve-12009. Have you formed any opinion as to the utility of the Royal Dublin Society's scheme, and the beseits it has produced, if any t.—I am afraid I do not ment Society !-- I should give, I believe, rather more latitude than they are inclined to give. According to their conditions they are practically thoroughbred. They are race-horses with a cock-tail stain only accordquite understand it : I have not been told what it was ing to the Hunters' Improvement Society 12070. When did you judge first at the Dublin show-do you remember the date 1-Frobably it 12080. And you think that a thoroughfred sire, might be ten years ago, perhaps.
19071. And when last!—Perhaps about three sound and otherwise suitable, is a suitable stallion to use in Ireland for getting hunters !- Yes, undoubtedly, years ago.

11072. Did you attend the show last year 1—No.
12073. You have not been there for the last three years!—Not since I judged about three years ago. 1203). I am not speaking at all, of course, about thoroughbred stock. Do you know Ireland pretty well in the way of horse breeding !- No. I don't. 12074. What opinion did you form during those seven or eight yours as to the improvement or de-12082. You don't know the South at all !- No. with the exception of being in Limerick, and lately terioration of the horses abown, and so on !-- Well, in Kildare, I really know nothing.
12003. You only judged once at Limerick !—No.
That was probably about five or six years ago.
12004. What opinion did you form us to the quality there were a great number that I think coght not to have been shown at all, and were not shown with any size of getting prime. They were sent there with more of the idea of getting customers. of the animals shown in the various classes !- Fall of 12075. The numbers were greater in the last years than in former years!—I am afraid I cannot tell you quality-very good. 12085. I mean quality in the more general sense! I remember the class I judged; there were -Yes, there was not so inferior a class, I should say, 253 horses in one class. as what there was in the Dublin Show.

Printed image digitized by the University of Southampton Library Digitisation Unit

Printed image digitized by the University of Southempton Library Digitization Unit

«tallions 19687. Have you lought many horses yourself in Ireland -In Enghod I have bought house from Ireland-one or two from Capt. Stood, but, as a role. I have not bought horses in Ireland.

12088. We have had in ovidence before us that
the breed of hunters and high class carriage horses.

and mon, are deteriorating in Ireland, and that a good deal coving to the fact that so many of the best reason are aski out of the country and so abroad. Have you any opinion whether that is the case t-I quite agree with that. I think that is at the root of it. 15050. If that he so, our you suggest any mount by which the best stock could be retained in the country !-I am afraid hardly. The only chance

would be to give very good prizes to young marcathat would stop the foreigners

12090. It would not the prices up !- Yes. If a mare won these prizes that would sahanze her value and the foreigner would give an exten price in renand the receipter would give an extra price in pro-portion. I don't think anything would stop them beying the best mares. They buy with public money. My experience is confined to the East Riding of Yorkshire. I know what the mischest has been there from foreigners, from what I recelled and from what I have heard from elder men who are now dead. 12001. Do you think that the system of the registra-

tion of mores is practicable !-- Ob, yes. 12092, Do you think it would be weeful!--It wealth be useful, and, I should say, would enhance their value 19063. In both cases I gather from you the enhancement in the value of the orderal would not be

enficiant to keep it in the country—the foreigness would probably give more for it i—I think as, 1994. It would only benefit the farmer i—Yea. 19095. It would not benefit the industry in the country !- No ; nor would it benefit the breeder in the long run as he would have to sell his good mare. 19705. Do you think that the Irish buuter or high class carriage hoose communds a bester price in the market from the fact that he is an Irish horse !-Well, I think, purhaps, as a hunter he does, because I think neonle buy hunters so much from being better

performers over the country. They are better made than the English bunter 12097. Do you think the greater purity, or mp posed greater parity of blood in Ireland would have performance they would give more money, not from

their being better beed. 1998. Have you a knowledge of the Rackney sire sa a sire.... I don't mean in Ireland but in England? -Yes, I have seen a good deal of them in the East Riding of Yorkshire.

19399. Do you think they are suitable sires to get hunterst...Oh. no : not to get hunters. I have known on horse which was by a Hackney—a very good horse—but that is the only one I can remember. 15100. That would be an exception i-Quite an

exception.
12101. We have had it in evidence that for a certain class of earriges horse the thereughbred size is the best, that a certain number by thoroughbred horses are bought in Ireland, and that they are enperior to anything produced by the Hackney sire. Do you think that that in the case !- Yes. I should say that for a high class carriage herse, but not for the ordimary run—the smaller, what many people drive now in the lower earriages, the 16.1 hands or 16.3 horse; but certainly to be the sire of the bigger, finer, dark

bey or known horse, the thoroughbred would be the tim for them. 12100. But for a smaller class of harmon horses ou think the Hackney would be suitable t-Quite so.

12104. Much more so now than formerly !- Yes. 12100. What effect has it had on the industry of breading horses in the East Riding—has it made it more profitable to the farmer !—Yes; it has brought thousands and thousands of prunds to the East Riding of Yorkshire. 13105. Used more hunters be bred there formerly than now !- Very many more. 12107. In that owing to the introduction of the

Hackney, that decrease t—No. I should say not. I should say that it is not that the Hackney has ometed the hunter breeders. I should say that it is the fact that throkifarmers and horse-loving classes, who have always their good maren, till at last they could not breed anything worth buying and then those men have taken to breeding the Hackney. 12108. And Hackness proved more profitable t-

Well, it has proved profitable.
19109. Your opinion in that they have censed to be able to produce the bunter!—Yes; through having been tempted to sell their best mares 12110. Do you know Ireland well enough and the condition of the horse breeding there to give us any general opinion as to how, in your opinion, the industry of horse breeding could be encouraged, assuming that State money was devoted to that pur-pose [-1] do not know coough of the districts. But if there are districts where they do not profess to breed hunters, where there ere small, Ettle mean

mares, I would not say ponies, but pretty well-bred little shings, there I should say that they would do much better to have Hackney stallions in that district than thoroughbred borses, simply with the idea of breeding raleable animals for harness. They would breed almost hig enough for cavalry remounts and that class of horse 19111. Do vou think the horse got by a Hackney is a suitable cavelry remount !-- I don't, except when out of these little, undersized, very well-bred marce 12113. Would you satisfuse any danger to the breeding of hunters in those parts of the country

which are devoted to beneding hunters, from the Hackney blood gradually filtering into it i—I should be nother alread that it might in the course of time. 12113. You think it would be difficult to keep the two districts represtely distinct !-- I should be a little hit afraid of it 12114. Lord Lorgonnessay.—You have judged a orl deal at Earlish shows as well as at shows in related 1. More in Registed.

Ironard — More in Engineed.

19115. Have you the name admiration for the Irish hunter as Lord Coventry has—would you put them above the English hunter!—Not above the best English buntors I3116. You think you have seen first rate horses from both I... You. 12117. The horses you were chiefly struck with by

their quality were at Limerick more by them than what you saw at Dublin in proportion to their arnt, not with the idea of winning prizes, but to sell, whereas in Limerick those that were next were ex-hibited chiefly with the idea of getting prices. 12118. Do you think the horses which were non-

prim winners in Dublin would fatch prices that would be remmerative to the people who bred them!—Yes. 12119. I think you told the Chairman that you hought one of the reasons of the deterioration in the breed of hunders was the fact that all the best mares went out of Ireland 1-Yes

12120. And if prizes of a substantial character were given they would enhance the value of those mere so that they would fotch higger prices !—Yes. 13151. These meres that would fetch these high

ices must be very well bred !-- Yes. 13132. Supposing that they had a foal, and that foal instead of being by a throughbred horse had The Ray, Cools

been by a Hackney and forced his way into these districts, orpposing that had been a mare, do you think che would be as valuable as a mare by a thoroughbred horse I-No. 12123. Therefore the value of those mares if crossed with a Hackney would decrease !- The produce would nce he so valuable so those by a thoroughbred horse.

12124. Supposing one of those well-bred mores which has had a filly foal, to go on brooding with a Hackney, would you consider that she would be causile by that Hackney trees of breeding a good hunter again in the future 1-Ch she might

back to the thoroughbred horse again, but I think it the bounds were remoing hard you would find out the

tt places. 12125. You would rather not have the Hackney cross -Not for a hunter. eross — Not for a hunter.

1212d. Was I right in gathering that you thought
that the old-fashioned breed of hunters had very wach died out in the East Biding of Yorkshire, and their place had been taken by the Hackneys !-- You 19197. Do you think that was due to the Hackney appearing more attractive !-- No. I think not. I think it was simily because the Yorkshire farmers are naturally lovers of horses, and they took to the

breeding of Hackneys because all the old hunting breating of Hackineys because all the oil number blood had gone; it is not that they prefer a Hackney. 12128. Just where the North Riding adjoins the Bust Riding above Malton they bread a certain number of hunters still i-Yes.

12119. Are there Hackney horses about there as well !- I should say not. I am not living in Yorkshire now, but I should say they are breeding from Hackneys in that part along the anothern boundary of the North 12130. I mean where the North Riding and the

East Riding adjoin, you think there is a hard and fast line that the Hackneys are kept in the East Riding, and they beend more busters in the North Bidley I. T think so 12131. Mr. FITZWILLIAM,-Do you think that there

19159. Do you think that the are for Harlyson. that existed a few years ago is as groat as it was !-think the demand for them does keep on inco

12133. That is for the high class Hackury 1-For carriage horses, for small carriage horses. 12134. But yet from what you know of the East Riding of Yorkshire you believe that a great many of these old farmers, if they had the opportunity and had the means, would be glad to get beek to

their old style of breeding hunters and high class carriage horses !- I think so : I think they would 12135. Lord RATEDENNILL -You said that the Torishire farmers leet their sound and used mares by selling them to foreigners or dealers !- Chiedy

19136. That of course after a time cleared the country of the sound hunting mares !—Yee. 12137. It has been given in evidence before us that something of the same sort is going on in Ira-land—have you heard that !-- I have board it; yes. 12138. That the sound once are taken away and

the unsound ones left !-All the best; all that they will have

12139. I think you stated, just new, that you thought suthing would stop the foreign dealer from taking away the sound fillies i—I don't think that anything will stop him.

13140. You have not no idea of how to stee them? No; except by preventing the exportation of mazes,

which I should like to see done. 12141. Do you think if the fillies were to be in foal at two, three, and four years old, that that would stop the dealer buying them !- Well, very possible it might. Very often they would buy a mare that was not in foal, when they would not buy a mure in foal.

12162. If they were in foel, or had foels at foca they would be less likely to buy them !- It had not occurred to me, but I think that would be so 12143. Therefore, if any scheme could be desired wherehy ron could induce the farmers to put their

mares in foal at two or three years old, it might prevent the dealers taking the sound onest-I think w wight. I do not know that I should quite advocate the breeding from two-year-olds, for the granes that it an depends upon whether the animal is thoroughly well depends upon wastner the animal is taccoughly well kept. If a filly is covered at two-year-old, and then turned into a poor pasture, then, I think, it might injure her for ever. I den't think I should advocate

putting them to a house at two years old. 12144. It was more as to the question of trying to keep them in the country that I was speaking of was speaking of two-year-olds. I think you live in Northamptonships

12145. Do you think almoter, with Hackney blood in his wins, would be likely to gross Northwester. shire in style with bounds running fast !-- Not after the first twenty minutes, I checold say certainly not.

12146. Mr. Warren.—Would you be in favour of 12146. Mr. Whisch.—Would you be in favour of -I believe it has been a creat incontive to breeding

in England. I hardly know exough about the Irish 19147. Do you think that better bunters are being hred in England since the inception of the Husters' Improvement Society !—I think more are bred in dis-

tricts where hardly any were bred before. 12148. You think it has given an impotus to breeding hunters 1—I do, and that it has given an impetes to breading bupters in England

19149. And, good as the Irish horses are now, might they not be made still better if a society were started there !- I am afraid I connot tell you; I have little or no experience in Ireland. 19150. Do you think it would send up the prices of hunters to foreign bayers if they could obtain accurate peligrees !- I think it would, if they could

depend upon these pedigrees.

12151. And de you think if Irish honter sires, such as you appear to be in favour of, each be reeduced, that there would be a foreign demand for them to get cavalry horses !-- I think they, very likely, might pro-

duce good stock out of the small mares, the mares which are not good enough in themselves to breed hunters. I think, very likely, that those stallious, not thoroughbred, but 15 stone horses, I think their prodnce would command better prices from foreign buyers 12152. Do you think that foreign buyers would be kees to buy stallions of the weight-carrying burier type for improving their cavalry 1-I cannot say; they might not be anthorised to have saything that

was not thoroughbred. is not thoroughores. 12153. You have not experience of the foreign breeding stude 1-No. 1918s. Do you think it would be possible to pro-duce a class of weight-carrying benter sires without establishing a stud hook ?—It would naturally follow that you would have a stud book. Stud books have

been started within quite the last few years. Of all these Civicadale and Hackneys, and various breeds. there were no stud books, Limagino, a few years ago

And do you think the establishment of there stud books has set up the value of the broad? -I think it would, among foreigners. 13156. You think the starting of stud books smeng Clydesdalm, Hackneys, and Shires, has set up the value of these various breeds |—I do think so;

cortain's

12157. Therefore, there would be a good charge of the value of Irish hunters as a breed being sent up if a stud book was established 1—Yes, I do think that 12158. Do you object to the cart home cross in

12159. As much as you do to the Hackneys or a Suffolk Punch !—I should not like it.

hunters I-oOh 1 yes

19160. You object to that equally with Harkneys! Ch! more so. Convented - Object to which t 19161. Mr. WRESCH, ... The Suffolk Poscie on object to the Clydordale, more or loss 1-Well, 1 should object to them squally with a Suffolk Punch. 12162. You would object to both more than you

would to a Hackbery !- Cortainly, yes. pre-eminence in hoster-breeding with a large number of these animals in the country, what do you think is the danger of having the Hackney three-iff the hunter men have been able to keep clear of those other broads, what is the danger of the Harkney !-I object to the Hackney also, but not to the same extent that I should to the Surfells or Clydeschile

12164. You think he is less objectionable !-- He is less objectionable. I would not say but what is less objectionable. I would not say his wines eccasionally you might find an azimal that is worth more money which is by a cart horse, simply because it might be hought by a very heavy man who would want a 16-stone horse. He might find occasionally a good horse by a cart horse out of a occasionally a good name by a cars none out or a well-lavel mark—a markly 18-stone horse; whereas the same mare put to a Haskiney would probably breed a 18 or 18-stone borne, which would not

command anything like the same price as that by the Shire horse. 12165. Have you been to uny of the Hackney study in the East Biding t-Yes, I am a native of the I have been among them all my life. 12166. Do you know that a great many of these horses have a horse amount of thursomblered blood in

their pedigrees !-- No; not a large amount. The "Denmark" strain, I think, went back to an old sare that Jobs Scott trained, a mure by " Gladiator." I am not aware that the others do 12167. You have not gone into their pedigrees !-No. I have sirenty hearson that this marticular bread of horses went back to the old chestant more that

12168. Do you say that the East Riding is the best district for broading Hackneys—I mean that the best Hockneys are bred in the East Riding 1-Yea I should say with more quality and better backs and middles then what I see come from other districts.

ilsan those from other places. Suffolk or Norfolk. 12170. You think there is a distinction between the Yorkshire horse and the Norfolk Hackneys !-do : they have better animals in Yorkshire. thire huran have better tiles and backs and middles. and more quality than the Norfolk horses.

12171. Do you think it would pay supposing the Yorkshire farmers could go back to beeeding brantes
-as you think they would like to do-that it would

Iny them as well as does the breeding of Hackneys !

—They can't go back; the mares have gone irrotrior-12172. Would it pay them as well !-- Oh, yes; wen not speaking of more than 25 or 30 years ago, lunter four-year olds commanded #200 a piece. 12173. They got much better prices for two-year-

18173. They get much better prices for two-year-olds and three-year old Hackmays than that now in the East Riding 1.—For a stallion, perhaps, they do. Timow there has been an enormous encount of mony two-pits into the Riding from breeding Hackmays. 12174. Only you find a shree-der lot of people than the first the Unit Patient. Has you seen the farmers in the East Riding! Have you ever come across a shrawder people! Would you not call them a very capable and intelligent people!—Cortime a very capathe and meet intelligent.

12175. Then if they have taken up a particular time of breading they have done so for some good years in Because they like hove breeding and their hunters are gone. They have taken it up on that

Mecrat

-Do you mean assists for harmon 12177. I am talking now of the second-class harness horses, the smaller harness horses I—I think the Hackney would get stock with more action. 12178. He would be more certain to get action i-

Cortainly, unquestionably 12178a. You say you don't know snything as to how the cavalry and artillery houses are beed in some of the foreign countries now?-No.

19179. Do you think that any of these dealers if he saw a fine horse that suited bim would stee howing if he heard his dam was by a Hackney !- As a stallien do you mean.
12180. Simply as a harness borse i—No, it would not stop the dealers buying them for harness purposes.

not stop the dealers traying count for the name per-12181. Your only fear is that it might crosp into the hunters and not be detected I—It might or might not be detected. The dealer might detect it when he bought it, but when the purchaser hought from the dealer be might not detect it 12182. You agree that registration in Iroland or in

any country would be desirable 1... Ver containing 13183. If recistration were adopted what danger would there be of hunter breeders using blood that didn't sunt them 1.—What do you mean by using blood that didn't mit thee ! huntur breeders object to using any animals of Hackney blood and if registration were

adopted to that you could not what blood was in each animal !-- There would not be the danger because they would know how the enimals were head 12185. Then you think that registration might meet any danger of that kind !-I do 12186. CHAIRMAN .- That is registration of mores t -I suppose you mean registering all their readmon if might be a colt one year and a filly the next.

12187. Would you not have to register all the mares, horses, and produce of all the horses in the country!—I think you would have to do that; the

some as in the Stud Book, I think you would not eliminate the colts. 13185. Do you think that would be practicable !-

1210b to your like the control of all the borse in the country like the registration of all the borse in the country like the registration of the country like the registration of the country like the registration of the regist done simply voluntarily, and poises are offered by the Hunter' Improvement Society for the produce of registered marea. 12:90. I merely mention this as an assumption-

assuming that the foreign buyers of renounts would profer to buy an animal that had no Haskingy blood in it : for instance, it would not be probable, would it. that the owners would be voluntarily registering them. Would it not have to be compulsory !-- I would be better to be compulsory, no doubt, but I think you would find in most of the cases they would tents you were mad in most of the cases they would do it voluniarily and be gird to do it. I should not charge them any fee for doing it. In England I think they do charge a fee of 5a or on, but it might he well done without I should say. I would give every industrated to the breeders and small farmers

to register their mares 19101 But in England this is a regular private vester and they voluntarily register in certain societies. If you had a system of registration adopted uni-versally all over the country it would have, would it not, to be undertaken by the State I-It would be better to be done so.

12192. Would it not be the only possible way in which you could ascertain that it was done !— Well, it might be done by the local agricultural societies in the various counties. 19193. Provided the State gave them sufficient

19194. You don't know the West of Ireland salve, you don't know the West of Ireland personally—you don't know the congested districts at all t...I don't Marris St. 1987. 19195. I am going to sak you a varue opention. Have you such a general idea of the climatic cou-The Rev. Cold

ditions and the conditions of soil and the class of farmers that inhabit the country and so on, as to be able to say that there is any corresponding district n Great Britain where, hy the introduction of Elsekney stallions, a profitable class of carriage horses has been produced t—I am afraid I have not very much opinion, in fact I am no believer as to the suitability of soil for breeding horses

13195. I am exceedingly anxious if possible to ascertain the kind of price that these small corriago horses—these rather inferior carriage horses got by Hackness, would fetch to the breeder, and where they all go to, where they are used, and so on. I don't know whether you could give any opinion. We have had a good deal of evidence before us that the introduction of Hackmays into the congested districts might result in producing a saleable class

great demand for them now. You see twenty carriage homes driving through the streets of London that is the very class of here that goes in these carriages. The carrages are also lower and lighter and smaller than they used to be. They drive these little 15 hands, 15.1, and 15.2 animals, bays and

chestants with white legs, while formerly people only drave hig carriages and good become, not Hadeneys at 12197. Have you any kind of idea what this animal is worth to the breeder !-All would depend upon the age at which he sold it.
13198. What age are they generally sold at t_I think the dealers buy them through their agents in the districts. I cannot really tell you that. I should

think they buy them probably as from £30 or £40 and opwards, get these into condition and sell them as pairs and get whetever they like for them.

12199. Buying them as three-year-olds!—I should. think so, probably. 12200. How are they kept 1—They would be well kept in Yorkshire. 12901. You don't know the congested districts wall enough to say whether you think the mares there with Hackney sires could produce that kind of feel—whether they could be sufficiently well kept to

fetch anything like that price. You could not give an opinion about that!—I am afraid not. I believe the prizes at the local shows induce them to keep their voungeters much better. 12502. You have no personal knowledge of that part of the country !--No.

12104. Do you know any part of England or Scotland where they are bred by very small farmers t No; my experience is simply confined to that place.
 120%. Do you think they could be preditably produced in the Highlands of Scotland i—They are good. constitutioned animals. 13206. They can stand the climate1-Certainly : they are good constitutioned sound animals.

13207 Are they used in Yorkshire for farm purposes !-- Ch, no, not for working on the land ; they might drive them a little, they are not heavy enough 19208. Lord RATHDONNEL.-In answer to Mr

Wrench you said in your opinion the East Riding of Yorkshire is about the best district to get Hackney son from 1-Yes 12209. Now, why !-I think they are a better stamp than what I have seen of the Norfolk and

Suffolk horses. They have more quality. They are better animals; they have better hacks and ribs and 19310. Are you talking now of pure-bred Hackneys !-- Yes, the pure-bred Hackneys.

such a district it necessarily makes a horse a good one !-No; I don't mean the mere fact that you can heeed a better horse in one district than in another Is that what you mean?

12212. No, I mean this—because a horse comes from a certain district, does that necessarily make

the horse a good one -H he comes out of good stock he is bound to be a better one than one who same from a district where the stock was inferior, 19318. Regardless of conformation or anything else !--Well, if there is a good breed of house in one country, we will say in the East Biding of

Yorkshire, you will be safer in sending for a stallion from there, in my opinion, than you would if you sent for a stallion from Norfolk. 12214. They are all in the same stud book, are they not !- I don't know the Hackney Stud Book at 19315. Mr. Frezwilliam.-With regard to the

other breeds of horses that there are about in Yorkhave you any experience with regard to these two hroods !- Very little. 12216. Would they be in your opinion suitable or unscitable to be crossed for large harness horses or hunters !-- Much more suitable to cross than with

the large barness mares; you would be disappointed if you crossed them with hunting mares with the idea of getting hunters 12217. But for the large harpers horses—carriage horses !--Ob, ves ; they would be most suitable 12218. Which do you profer, the Cleveland or the conchiorse for breeding the kind of horses you see

driven in Landon !- I think the Bay Cleveland; they have a little more elegance, I think, then what is called the coach horse; but I think there is very little difference in them really. The Cleveland is longer, and has his tall set on higher; he is a brighter bay than the coach horse; although the coach horse, I think, has the hest back and ribs. 12219. You would not like him introduced as a cross into hunter breeding to get weight and size !-

No; I should not like him introduced. I think you would get more valuable animals from them than you advocate it at all. 12520. To get weight and were as hunters you would perhaps prefer them to Hackmys !--Oh, yet; I would prefer them; for where them has been one

horse known by a Hackney or by a thoroughbrd horse out of a Hackney mare, there are numerous intances of very good hunters by thoroughlired horses out of Cleveland mares. 12321. The beadquarters of both the Cleveland and the coach horse are-one in the extreme North Riding of Yerkshire, and the other chiefly in the East Riding !- Yen; there are a few places in the

East Riding where they breed fine hig carriage horses but it is chiefly, I think, confined to the North Riding and further north still.

1933. Mr. Carrw.—You would not recommend the introduction of Hackney blood into a district

where the farmers would be obliged to use the produce for farm purposes !- Well, a good deal depends upon what the land is like that they would have to work. They would not do for ploughing in England, they are not heavy enough, but I could not say on Irish farms

12525. You don't think they would be useful for oughing t-Not in England. 12234. Mr. WRENCH.-Do you know that the horses that do most of the work on the small farms in Ireland now are very small. Has that over come under your notice! You don't know that! I don't

12225. When you talk of the East Riding being a good district or not, of course a district does not make any difference in the horse, but would you think that a Hackney that had a large preconderance

V: Bitor

certain value from his blood t-Certainly I do 12226. That a horse with that strain of blood would be the right strain i—I do. the right south 1-1 co. 19327. Do you think Ireland is one of the best correction for breeding horsen!-It always had that regulation, and I have no doubt that it is an

18078 And do you think therefore that been breeding in Ireland is a sufficiently important industry towarrant a system of State projetration being started ! ...Oh, certainly. In England now, people who key house for hanting rely almost entirely upon Iraland

for their numply: 19919 And therefore was third any stern in that Spection would be warranted by the importance of it i-Most decidedly. 12230. CHARMAN.—There are many farmers in

Yorkshire breeding these light carriage horses by Hardrower who cannot always be specential-what becomes of the missits? What are they used for I Bow are they worked !-- They are still drives. They sull come down to draught purposes of a sort-light

19231. Mr. Wanner .- Don't minits of thorough-1933). Mr. warren — Dor't minuts or sacrengo-hreds sell very hadly, too 1—Oh, yes. 1932). When you get a midt it does not matter what the hreed is 1—No; energy that a midt of a Harkney would be really more arrylecable for liebs. carts and other things, whereas a thoroughbred misfit would be worthless 19313 CHARRAY, We have been told in evidence in Ireland that in breeding barters and bigh-class

carriage horses, the misfits are very serviceshie as remounts. That is why I asked you nerricularly as they might do for remounts; if not, they would have

12234. You don't know whether the Hackney blood is considered suitable for remounts !-- I don't know as 12235. I don't mean as a matter of coinion, but as a matter of fact !-- I can't speak as a matter of fact.

Mr. Honray examined.

15236. CHARRIAN.—You live in the neighbourhood of Holl I-Yes 12237, Are you engoged in breeding horses !-- I am. What kind do you breed !- Almost all I have several pure hred Hackney mares. two or three thoroughteeds, and then I have some half-bred mares that I broad from

12239. Half-bood mares t-Of all olames. 12240. You keep a stallion or stallions of your own !-- I always keep three, a Hackney, a Shire, and a thoroughbred. 12241. And of your own mures, what mores do you ret to the thoroughbard, and what to the Hackney ? -I only breed pure bred Hackneys from the Hackney, but all kinds of marcs I put to the thoroughlyed. The best Hackneys, those that see in the Hackney book they are very expensive, their fees being £15, £20,

and £10, and nothing less than £5; the blood horses cover at less money, 30s. and £2. 12242. You breed only pure-bred Haskneys !-Perchant Hadrans. I may have prosingle less many lead to see what they will bread 19948. And what has been the result of that I ... I

would not give an opinion, because some mares never broad turion alike. The same owns bred mare won't breed twice alike from the same horse 12244. Do you look upon the breeding of the pure

bred Hackney as a profitable part of your business t— If a man has got a good name it is the most profitable, but many men have done very badly by trying to breed the show horse 12345. Would you recommend the Hackney stallion to store with the ordinary reason of the country about

you !- It in every way depends upon what you want the produce to do ; for a working animal the thoroughbred in every sense of the working 12246. What class of mares do you gut to your thoroughbrod sires t.... I have two thoroughbred mares.

and I have mares to show, and for breeding benters. 12247. Do you sell any horse as a carriage horse that is got by a thoroughbred !- Yes, when they misfit for hunters, they generally make useful carriage bures. I breed from sizy many to small class

thereughbred with good action, good coleur, and good limbs, and I find I have generally a useful carriage bree if they misfit for a hunter.

12248. Yorkshire men are devoting themselves a od deal more than they used to breeding Hackneys !- Yea. where they have got show bosses they have done

but with some of them budly. If they are not

fortunate enough to produce show horses, which foreigners and some one clear come to have they get a very poor price indeed.

12250. We have been told that the reason why they have given up to a considerable artent the beceding of hunters in Yorkshire is, that the class of user that of history in xorkimire is, that the thin of intre this they heed the hunters out of has disampeared!...Yes; but I don't altogether agree with Mr. Legard in the way they disappeared. I think when the built times came for the farmers, when corn went down in neice. the little farmer looked to the first thing he could part with to reduce his expenses in any way, or to turn a little money, and he found that the old thoroughbred mare, the old blood mare he had got about the place, could be parted with by him.

there was some one who had a little money left, and be know the more, and saw what she bred, and he went and purchased her. That is the way they went, and he are never been able to get her back. 12251. And then he turned his attention rather to the Hackmay 1—Yes. The furners found that people were setting rather large prices for horses, and they got a filly or fool, and the young men have begun to breed from them and some of the old once have done

very well, and others bedly. 12202. When you produce a high class animal it gots a hig price !— Yes; very well. 12203. You don't consider the price very profitable. if you can only breed a light carriage horse or that

kind of animal 1-Certainly not-12254. You say that in breeding with the object of getting bunters you found a might is likely to become valuable, and sell at a fair price as a carriage

horse!-If he has got the sim. 12255. What becomes of the missits of the Hackneys? I mean not the pure bred but the ordinary !-- There is a very good thing about them; as soon as they are put into work thay are very soon done, we are not troubled with them very long, they don't lead.

12255. Level LONDONDERRY.—You have three stal-Hone I understand a Hackney, Shire, and thoroughhred, do you limit them to a certain number of maren a piece !- They rarely leave home, I cover very few

12357. Which is the more popular !—The Hackney is more popular in Yorkshire than the thorough-12:58. Do you sell the produce of your breeding 12249. What is the effect!-The effect is, that

vogeself !-- Oh, yes. 12259. Direct to dealers, or do you supply ous pretty well-very well indeed-with many of them ; tomers !-- For my hunters I have good oustomers 414

Mr. Blaky.

amongst gentlemen. I "make" them myself and my son "makes" them, and I ride them until they are five or six years of age, and if they are good enough I can get plenty of gentlemen to huy them. Several

gentlemen have come to me six years in succession for weight-currying hunters 12260. You would not yourself think of crossing a hunting more with a Hackney to get a hunter !-- It

would be the worst you could have to ride across

12501. You think Hackneys should be kept entirely to their own class !- Well, I have occasionally bourht—I never breed one from a blood mure by a

Hackney borse—very boastiful riding horses and benetiful lursess horses, and occasionally you can get a very superior animal now from a superior class of Hackner-a blood looking Hackner from a blood

12202. It must be a good mare !-You have a fair chance, but the best mares don't always breed the hest. You find the common mares if well bred breed

the best animals. 12263. Have you been in Ireland at all yourself !

12264. You don't know the class of marce that it is proposed to improve the breed of, in the west, by crossing with these Hackners 1. No: I have bought many Irish borses, but have never been there 12265. Do you think a Hackney crossed with a

poor class of mare is likely to breed an snimel worth money in the market !- I should have very poor faith brooding from a Hackney in that once.

12266. From a poor mountain pony you would not get much !--I am afraid not, but I could not give an opinum because I have never seen the cross. I am afraid you would not get size enough. 12267. What height are your Hackney stallions! I have two of my own, but of course I cannot use my own because they are from my own breed, and I have

own because any see trem my own torte, our a man-to use other people's. I like a Hackney stallion 15.3 hands for selling purposes with good colour and god action, because I must look for the gelding market. I must not look for the little trotting things which would not sell at all. 13368. Do they go out of England, abread† Do the foreigners buy them !—Yes, I have to make geld-ings of them and sell them to desires. I don't know

what they do with them. 12009. Mr. Firstwitcham.—You say that Hackneys

don't wear !- Certainly, they don't last, 15370. And for that reason you think that they don't remain in the country long-in the East Biding? -They don't seem to work

1997). In the main the high class Hackney at the recent moment is a chow animal more or less !- Yes. 12272. Is it the case that second rate Hackneys and the balf-bred ones do not sell now as well as some few years ago !-- I think not, for the reason

that we are petting more of them. A few years ago there were not so many bred, and the consequence was there were not quite so many of the class you peak of. Now you are getting more of them, and they make less money.

12273. And I suppose other people besides you discovered that they didn't wear, and that might affect them!—Yes; but there is a difficulty in getting rid of these at all.

12174. Do you think that the blood of the Hackner will remain in the Bust Riding now it has got a firm hold there, and that will make it very difficult in after years to return again to the high-class hunter breeding or the high-class carriage horse breeding ! -Well, if it is remunerative we shall soon get back again into the other breeds. As soon as ever the crace for the Hackney gives over they will return to brooding other barses, but it will take some time of

12275. Theyen't any doubt you would clear out of

I speak of the Hackensys generally. Do you think as a general rule that the shoulders are good !-- Our them altogether if you found they were not remmera-Printed image digitized by the University of Southernoton Library Digitization Unit

in their blood !- There is no doubt about that 12176. If the public know of the stain, and thought it to be a had one, it would damage the presture and the sale of the East Riding horse !- As hunters, there is no count of it.

12177. You find you can get size enough with the
thoroughbred sizes for what you want in breeding!

—My experience has been that I got mure size with

is no doubt of it

the thoroughlied horse than with any other horse; you get more power and more substance.
12:178. And if you select thoroughbred sine with action you find the produce out of half-beed mayes

tive; but still there are a great many men that would

would go on with the mures they had with this stein

has action enough for all useful purposes, generally speaking !-There are thoroughbred horses to be got with as good action as any Hackney in the world. I have mentioned several with as fine action and more quality of action. The action I speak of is not action up and down, but it is a home with liberty of shoulder

action and hook action. If you can get that in a thoroughlired he is quite as sure as a Hackney to show it in what he gets. 19279. You think that liberty of shoulder action is a valuable thing in harness horses as well as in a hanter !-- In every horse because it makes him able

to work that has action in his walk as well as in his trot, with liberty of aboulder action, will do more work by half than the one who has not got action. 12380. Usually, has the Hackney got that liberty of action. I know he has got very magnificent

knee action, but has he got that shoulder action that you require!—Cortain breeds have. There are two or three sorts of action with the Hakkneyquality of action is the acton I speak of. 15381. Then all the Hackneys that are in the stad book are not of this particular breed, and don't show the same action that you require?-Some

people like one class of action, and some another; it is the shoulder action and liberty of action and quality of action that I want. I don't care whether it is of a thoroughbred or Hackmay or east horse, or any other sort. 12252 Lord Raymponness. What strain of blood are your Hackney sires !-- I have five Hackney mares in foal at the present time. I have one mare I got a

In field at the present time. I have one mare 1 got a second price with a Window: she is of the "Dermark," "Dangelt," and "Firenvay" blood; the is in foal to His Majesty." I have had two fiend from her; one by "Agility", and another by a horse of Mecces, "Refur. I have note in fast to "Rossief," another to "His Majesty," and another be a horse Mr. Mores to "His Majesty," and another to a horse Mr. Mores 141 https://dx.doi.org/10.1006/j.

"Rutten. Lawre, and another to a horse Mr. mea-sold last year, "Clifden," for two or three thousand wonds. Those are pure hed Hackneys. 1283. Do you think the breeding of the pure bred Hackneys pays!—In many instances it is if you go to the pure heed blood you must have fashionable blood

12224. Do you think the breeding of the half-head Hackneys pays!—I should not think ee. 12225. That is the cross of the Hackney with the intry mare !-- I would not like to try it

1298. With the ordinary marcs of the country. Supposing you had a mare that was a little deficient in bone, would you go to the Hackney to get the increase in bone !— I would rather take the through 12287. Taking the Hackneys all round as a general rule—I don't all de marely to the Yorkshire Haskasy

-but taking them as a rule, do you think that they have good shoulders—that is as a breed t-Yorkshire Hackneys have, they are the best type, and they have both more quality and more shoulder than any

other class of Hackney. 12388. All Hackneys are included in one Stud Book, are they not 1—Yes.
12389. Therefore, when I speak of the Hackneys. Ngukaire Hadensya, and the Harkursys from all cibepiene on equils a supresse anima. I have seen level-sup factores the Norfeth and the Norbham to the Norfeth and the Norfeth and the Norbham to the Norfeth and the Norfeth and the Norfeth Norfeth the even did any kenn; it shavey did good. Therefore, The Northite animal has very such most conjugate than the Norfeth Hadensya Pad, the when chapter than the Norfeth animal has been such as the conjugate than the Norfeth Hadensya Pad, the when they have a kenn type of the Norfethere animal which when it is supporting to the spacing of the shouldner,

them it is improving to the quality of their shoulders, and rather them more riding house. If 2500. What objection has a Northifire man then to using a Northifi sire, as the Northifi more use the Topichism size there—It has been tried, and it has done havin. It has been tried insary times. They lose the quality; the Yorkshreuman boses the quality; in

the quality; the Yorkshreuman losis the quality; he girt all the blickness of head and the rough nock which our Hockneys never had before. 12291. Do you find any difference in the shoulders—There are touse classes of our breach have marvellently good shoulders; most of the Yorkshreu Rachneys have, and the Norfolks are a little deficient

Hadmay's mars, and men Jordona are a titue demonst in the shoulders: they are thick across the tops, 1222. Do you find the arms of the Hadmay stong and longs, or apt to be light—I could not say that; they vary so much. One will be light and another work be. As a breed I could not give an optimies. 1220. In to a strong point in the Hadmays as a sole, to have good second thight—I—I exit if think they

role, to have good soonal thight 1—Yes; I think they are fairly good there.

12194 In Yorkshird 1—Yes. I think they are fairly good, when they owne to age, you know.

12105. And in Northick 1—I haven't found fault with them there. It is more with the shoulders and the quality and the head and nexts that I have found.

the quality and the head and necess that I have found duals in the Norfolk, those in the throat, rough undermeth, osumen in their heads. 1239B. From your experience of home breeding and what you have seen in. Yorkshire do you think there

what you have seen in Yorkshire do you think: there is great danger of losing the stand, good marse out of the country 1—Oh, yes.

12197. A great danger of that 1—Yes.

12197. It would be almost immossible to replace

then if you orea ist the good inners out of the constay 1–15 would be very difficult to do, because the factors would not have maken. Very feer farmers one enfinishing for there, and those who do haven't outint to keep them. I 2199. Do you think it any horse-breeding countries they ought to be very careful in not letting the search marked you of the country 1—Certainly: that

such manes go out of the context?——keramary inballs. Mind the Mind the mane is the first that same same with the thoroughberd and the Hackmay I—is more than the was negression of a person who has, well know a horse that life Waleer Gulley Boogle will know a horse that life Waleer Gulley Boogle scaled "Banagail", I suppose he gave the highest price for any Hackway house for this cen.—£5,000. may, but I don't know. 12337. Woold you recommend the cross of a Hackney stallion with such a mare !- Certainly not,

like one gross of blood 19339. Are you an East Riding farmer 1—Yes. 19339a. Mr. LaTopoun.—We have beard that the

remse, proction) men. 12340. Mr. Warsen.-When you talk of cross-bred mares from which you breed harness heres.

12382. Lord RATHDONNILL.-What I was going to ask was, if you breed Hatkneys for something bease than harness, what do you breed them for 1 You

I pover knew it to miss vet.

of mares disappeared that they used to breed hunters out of. You agreed, I think, with Mr. Legard that the class of bunting mare bad disappeared, only you attributed it to a different cause i-Yes. 12324. Is it your opinion that owing to the dis-

appearance of that class of more they cannot breed honorers profitably!—Well, I don't think the people

that are beeeding the Hackneys at present—the beat chain breeds - would exchange to blood once - certainly 12325. Not the pure bend Hackneys, but I am talking of the general run of farmers who breed the Hackney for earriage purposes !—I don't think we scarcely realise how builty our small Hackneys are to

sell. I think we have never been selling for working purposes, or very little up to this present time, but purposes, or very initio up to into protein time, cut we find that the second class are making less monay. 12326 What I wanted to get at from you is, patting aside the breeding of these larger high-class pure-berd Hackneys, whether the Yorkshirecons breeds Hackneys for barness purposes because it is

more profitable than any other kind of breeding, or because he finds it more profitable now he is unable to brand hunters as well as he could before owing to the mares having disappeared—in other words, has the production of hunters been replaced to a

omiderable extent by the production of hisness borses, became the latter was more profitable, or became the buning more have largely disappeared? -None of us try to harned harness horses. to breed something better, and many of them turn out to be harness horses, and we have to make the

best we can of them. 13337, Mr. Freewitzsaw.—Don't you think it is ther the case that they breed these Hackneys and half-bred Harkneys now because there are in the East Riding such a large number of first-class Hackney stallions in the country that they are really obliged

to go to them—the smaller men, I mean !- I think it is to a certain extent the fashion, but we are not breeding many cross-bred Hackneys. Most of the Hatkneys that are bred in Yorkshire are all bred with the idea of getting one to win in the show There are very few cross-head Hackneys bred in Yorkshire. No farmer that I know of is breeding cross-breed Haskmers as all. The mothers and sizes

are all entered in the Hackney book, or they would not have them. Only a very small proportion are by any but pure-bred Hackne 12328. Do you think the reason of that is, to a

certain extent, that, as you say, the cross hred—that is, the produce out of a half-bred mare by a Hackney stalliss—is unreliable. He does not broad true; that 12341. And, it is admitted, that the Hackney does not cross well with cart-horse blood !--Scane of you cannot be sure what you are going to get !- Our-inialy you cannot be sure of what you are going to the best hunters I have ever had in my life have been

from Yorkshire out mares. get; in fact, out of the cross-bred mere you searcely ever are sure. You must have purity of blood on one side certainly to breed with any fair chance of 13542. With thoroughbreds 1-Yes. 19343. These Yorkshire mares have always the eart-blood in them more or less 1—Oh, yes; more or getting a useful animal,

not been very encouraging. 12350. Then you tried the experiment with the two

Printed image digitised by the University of Southampton Fibrary Digitisation Unit

Hackner mares, were they pure-bred 1-Yes, and I put them to the most fishionshie-well I won't an most fushionable—to fashionable sizes of the deand selected the sires to the best of my judgment. I and selected the seres to the best of my judgment. I did not take the first I saw, but I leoked to the can formation of the rives, and compared them with the marcs I proposed to put to them, and then compared the pedigrees, so that I used a fair amount of cauton

the perigrees, so ones I trees a nur attoone or causion in making my marce. 12351. The object being to breed high-class ani-mals !—I did not expect to breed high-class animals at first, because they were not high-class mares, they were not fashionably bred, they had not the confor-

19352. And what was the result i-Nothing mcouraging; they will be what your last witness described, they will soon wear out. I don't know

what will become of them eventually. 12333. Did you discontinue that !-- I have one mare left now, and I don't think I shall breed from

12354. Out of what kind of mares have you bred your hunters !-- The mares I began from first ween mares with at least four crosses of blood, and I have had some very serviceshie animals from them, horses that have carried me well in Holderness, which is a

very heavy country.

12355. With what kind of sire!—Thoroughbred; have used some sires that have not been Ouesn't Premium winners, but I have used a good many of the Queen's Premium winners, notably, "Proper-mins." "Sherberoles," and "Manhawk."

12Md. You have bred them for your own use 1-Yes . I have tried the experiment of putting a hunter mare, a mare with four known crosses of idead that I could positively tence, and there were more behind which I could not really verify, and therefore never gave her cralit for, but from the conformation of the mare herself I should judge she had several more crosses than these four I knew of; she was rether light of hone, and as an experiment I yet her to a strong Hackney in the hopes of getting more bone. It was a theory that I think Mr. Burdett-Counts started a great many years ago now, I thought it was worth trying, that was the idea of putting a thoroughbred or mearly thoroughbred more to a Hackings hors, and in the produce you would get more bone and increased action, so that in case it did not turn out to be a bunter it would prove a very useful and micable burness bores. Well, my first wenture at that was a failure. I put it to a borse called "Docington" by "Demaark," who was at that time thought a coul deal of. After that I went to blood, and used a thoroughbred borse called "Lamb-

12357. What was the result of the Hackney or -A little underlyed thing with no action; well it had a nice trotting action but it had not size, it took after the mare's action; I cold it for a park hads. After that I went to blood and this man had no several vary good feals, the eldest is but years old; I am riding it now. Eve or six years ago the mare bred me rather a smaller feal, but the thoroughbred then I liked, and I thought I would try the experinent again, and this time I picked out a very strong Hackney berse that had a strong carrieton of a carring eress on one side. The result of that cross was even lighter than my "Dorington" one, a very nice presty little mare, but nothing more than a hack, and not more than a twalve stone one at that. The following year I cut her to the throughbred horse again, and she has bred me a very promising ook. I also tried the Harkmey grout, the same strong home I spele of, to a mare by "Peppermint," a there is the burning mare, one I bred, that was out of a ware by "Bass Book," that I had hunted, and the result of that was on to one of the burning home, but I tried to hunt him and found he was so soft he could not go beyond two fields, and I then reduced him to

harmes, in which he did fairly well.

strong suspicion of earthorse blood i-Yes, he was Mr Fernand the strongest horse I could find in the district. One borse was full of the purest Hackney blood and the other home was a home that was in the Hackney Stud Book, but still there are jus and outs of breeding. and there was a strong surpleion that there was a stain of cartherse blood

12359. Was it a suspicion in his appearance?—It was a suspicion in his appearance, and so a matter of fact as well : those things are easily stated, but very

12360. Did you give us the name of the home!-The second house was "Cardeon," the strong horse.

1230]. Mr. William...-Was be not by "Fostor

Fireaway," belonging to a man named Kirby !- That is the horse; he was a very strong horse, and I thought would make an excellent cross with this light Throbald mace. 11362. CHARNAN.-And the result was unsatisfactory, principally on account of the softness !- Yes, there was not a great deal wrong with the conforma-

tion; he had bad shoulders, musty thick shoulders. but it was his softness made me drop him 19363. Then I gather you don't think highly of the Hackney strain as far as riding borses are concerned t-I don't think at all so, they have not

the riding shoulders.

13364 As to harness purposes !—I have often said that for the Hackneys that you see in Lorston up and down Piccadilly and once round the Park is a day's work, and they don't want to do that more than there days a week

13365. And your objection to them as hornces orses would be the same, that they are not !---I think so; I have had either two or three, and when I drove them to the station one and a half miles from and step with their moses up, but when I wanted to go to Beverly, twelve miles off, and when I was three miles on the journey, they would drop their heads and the action was come, and when you got half way you had to get your whip sat. 12365. Do the farmers about you breed much !-

Yes, a great deal, principally Hackneys; that Derifield district is given over to Hackneys now. 12367. What kind of Hankneys do they broad 5-Very nearly all pure, with the large farmers they are all pure heed with a few exceptions. Some of the smaller men, like butchers and pig dealers and so on. when there was this boom in Harkstyn if they had o nice emick-stepper or saything in the shape of a light animal that went in their trade ours, they put it to the Hackney and thought they were going to get something that would be worth perhaps £100.

12368. When you say "thought they were," do

you imply that they did not i-Ob, it was a great asprouguess.
15369. What do you call a small farmer about you?

A small farmer about on would be a man farming from thirty to fifty sures, but there are very few small farmers about Driftield.

12570. Don't you consider that breeding these pure bred Hackneys, high class Hackneys is a profitable business !-- To certain men who have been at the business siege it started but I think men who have come into it later on and had not the mares that have been on the place for yours and years, they will not have found it so profitable an occupation.

have found it so profitable an occupation.

1927). As to breeding barrons bersen from the
ordinary country masses by Hashney stalliums, do you
consider that a paying business 1—I don't think: it
is if they have not a Hoskney more or a mare of
the Hashney type; I am speaking of pure bred
Hashney stallium, become I don't think there are one known half-bred once, but if a man had a mare of the Hashney type and put her to a pure bred Hackney stallien he would expect to get a quick stepping horse. Then if he had a mare of a rather heavier type he would be disposed to put her to a

COMMISSION ON HORSE BREEDING 418 thoroughbred burss. Had I known that I should be feet drug in the market. You don't know where to asked to appear before this Commission I would have place them, and you don't know what price you may brought up some particulars with me, because I had 12382. And have you may experience as one of the the Queen's Premium stallton "Monthawk" with me

for two years, five or six years ago, and I kept a very careful record of the class of marts that were put to

him, and if it would be thought interesting I think I

could look up the papers when I get home and tell

particular to nute down in his brak. I had a book

drawn out for him; he had to note down among

other things the stamp of more put to the burse,

mares I would not like to answer that question, but I may mention that a friend of mine interested in

herse-reising in the North-west of Canada had a light

weedy mare on his reach, and thought to improve the

saleable qualities of the produce by introducing the

Exckney blood. He came uver to the East Riding

of Yorkshire, bought two stallions there, and I have never heard that the experiment was a success; I

19379. And for the reasons that you gave that

calculate what the produce may be.

March 13, 1811

Mr. Beymood

whether hunting mare, backney more, or cart mare; Riding !- I don't know of any. of course if there was no doubt about it he would put 12585. Lord Raympowers. - It has been given in it down, but if there was any doubt I inquired into evidence that Hackney breeders broad solely for action, and that they leave conformation out of the 12373. Do you know Ireland at all !- No; I have question, is that in your opinion a sound method of breeding horses !--Very much the reverse. I should mover been there. 12574. Well, putting on one side for a moment the breed for conformation first. I like a good top pices, question of breeding pure bred Hackneys for show a place for the heart to work in, some hig ribs and a back, and I also am particularly food of shoulders. process and so on, have you any experience at all in Yorkshire of the results of the Hackney sire with the which is a thing you very seldom find in these country mare !-- I know of very few instances where modern Hackneys. I say modern advisedly, because be has been used on anything but thoroughbred, or what I will call book-Hackney-mares. I have only They used to remember him twenty-five years ago. my own experience as to the retalt of the Hackney call them roadsters then at the local shows, and some stallion on anything but book mares. of those readsters had true action, not the extensu-19375. I suppose you could not very well give us an origin as to whether the Hackney stallion-the would be pleasant horses to ride twenty years ago pure-bred stallion-out to a small light class of maros hat these have been improved off the face of the East-Ricking. You don't see them there now. each as exist in the West of Ireland, would be likely to breed a seleable horset. Not having som the 12186. Then you think in beeeding horses, as in

for any one horse. He sent a consignment over one horses that by their conformation would correct the time and I should not like to say without the book weak points in my mares.
1237. Mr. Wangen.—Do I understand you to what he got for them, but the price was disappointing and not remunerative. say in answer to Lord Rathdonnell that the men 12576. But about you in Yorkshire, they do not Driffeld do not take confermation into breed this kind of heres t I have not heard of any: account !- I should not like to googsite as far as that I don't think that eves is rescribed to Hackney breeding now has become a sort of system ; 19577. You carmot any whether there is any great they look to the blood. Certain steams of blood are demand for that class of animal 1-I should my there very successful in the show yard, and men will go to that strain of blood at once in the hopes of getting a 19378. Mr. FITTHULLAM, In your opinion from what you know, should you think that the gross of 12588. About Driffield you have some very good the Hackney would be deleterious on a breed that is examples of Hackney breeders 1-Yes now mainly thereughland crosses, I am meaking of the Irish masses !- From my experience I should be 12389. Do you think Mr. Moorn does not breed wall !-- He does, but he will take conformation and inclined to think so. the breeding, the line of blood into account

they are soft !—Xes, they are noft and they ere not riding borses, and the present crass in brocking these Heakneys is to sacrifice everything to extravpains in mating his mares. 12391. You don't condemn all Hackneys, crast at the present day, do you!...There are some good ones, gant action. They are lesing their backs and ribs, they seem to look to nothing the ration, so what but I take it that they are not riding horses little stamina the Hackney might have they are fast 12332. I meant for barness !- Well, I think they breeding it out of him. are more for show than for work. 19580, And therefore for general purposes you 12393. I am not talking of what the tendency of should object to the cross being introduced on to the Irish mare t—I think so. I think as a general purthe shows is to produce these extravaguest goers, but I mean in the Hackneys in the East Riding.

pose horse the Hackney is not all desirable. you not find horses that are descended from the old 12281. Of course our inquiry does not relate to the roadsters !- Yes, that is what Moore has. The prinhigh class Hackney to any great extent, not to the cipal lines in his stud are from mares that were these pure Hackney, it really relates in the main to what old roadstors. The class of marcs I speak of that had would be the cross breed produced both in the first cross and crosses breedter !—Well, from my own knowledge in the Driffield district Hackney houses good riding shoulders, and you could ride them for ton or twenty miles without your being tired, or their being tired either. Moore is one of the few men who have got those and stuck to them, and then he has that are not quite good enough for show are a pay-Printed image digitised by the University of Southampton Library Digitisation Unit

judiciously crossed out, so I should say you would get as good Harkmeys with Moore as you could find. At the same time I should not like to say that a great many of them were not a bit soft, did not him long journeys, or too many of them. 12394. You think they have bred out the old type !

-Most people have 13310. Do you find that there are many good Hackmay marcs to be given away. You said you had

two given to you!-Oh, yes, under pseuliar circum-stances, but I have seen many sold at a pretty good give-away price.

13376. Do you mean socing how they were bred!

They were Norfolk hred. They are in the look. 12297. Do you know what stallion cither of them was by !- I could tell you in a moment, if you allow

ms to look. 19398. It does not matter. When you say you west out of your way to find good horses, do you tain? you were rather unfortunate in selecting "Decington"

12322. Do you know "Dorington" was sold a short time ago for a very small price t—That was "Doe-ington II.," old "Dorington" is dead. 12400. How long ago was this experiment you

made !- That more was put to "Dorington" in 1880 12401. I thought it was more recently !-- She would be put to "Curdoon" seven or eight years ago. 12402. Now take "Cardoon." You say he bas

some trace of eart blood in bira i-Well, it was strongly suspected. 12403. Do you know that he was not considered

good enough to keep as a stallion !- I don't know about good enough.

1240s. His owner did not keen him?—No, he had not the accommodation for him

12405. He was a common-looking horset-Yes There are plenty commoner. I mean, that is hardly a test. My idea was going to as strong a horse as I could find, 19406. Even though he had a trace of care blood

in him !- Yes. A suspirion, I think, I said. 12407. Have you ever seen the produce of Hacknew stallions with thoroughbred mares? The pr dues of a thoroughbred mare by a Hackney stallion? -No. I cannot call it to mind

12408. Then wise you talk of the country-bred mores Yorkshire, are they not all more or less mixed up with cart-horse blood-the half-bred marse in York shire !- It would be very difficult to say how some of

13409. But there are a good many arimals that really don't show much quality that you find among the small farmers!—They have what I call undersized earthorses, but of the carthorse type-not of the light type at all-probably that have not been big enough to work on these large, strong-land farms, and they are sold for what they will fetch. 12410. Lord Londonneaux.—Have you ever som sorthing of the starm of mure that is in the west

part of Ireland !-- No, I have not. I have never been 12411. Have you seen Hackseys crossed with a poor class of mare i-No, I have not. 12412. You have no idea of what result would be attained by crossing the Hackney with a light mare ! -No, I merely instanced this case of a friend of mine who was in Canada and crossed some of the

mares they had on the ranch—bad shouldered, weaknecked mores, and as far as he has ever told me, the 19413. Charman,—You have not seen them your self!-No, I have not seen them. It is only hear-

12414 I should gather from what you have told to that if you wanted to breed hunters you would not consider Hackney blood advisable!-No, I den't 17415. We have heard-I don't know whether it

is the case about Driffeld-that in Yorkshire sens. Nova 10, 1887 rally the supply of hunters and the highest class of Mr. Reynard, carriage bornes has fallen off. That the hurter cannot get them in Yorkshire any more!- I fancy that is 12416. That has been attributed to various or -to the introduction of the Hackney breed, and to

the fact that the hunter mares have disappeared, and so on. Have you any opinion on those points !-You. I think it is outle true that the hunter mares have disappeared, and then this Hackney beeding industry get such a filip a few years ago, men who had been breeding these Hackneys in a small way got such encouragement, and high prices were given for stallion, and very high prices were given for more.
Then there arese a foreign demand, so everyone
reshed into hveeling Hacknay. Now, the law of
supply and demand comes in. People have got supplied. People who wanted to start stude have got

their foundation stock, and there is not the demand for the inferior arimals for breeding purposes, and, therefore, unless you have got anything quite firstrate—good enough to show—it is a drug on the brecoier's hands. So I fanor, in that Driffeld district there have been some vary great disappointments from the Harkney breeding. It sprang up suddenly and has died away.

12417. It has been suggested to us that the Yorkshiremen in seneral, the farmers, would be clad enough to revert to breeding hunters and that class of animal if they could, but they cannot, because the mores have disappeared. Is that so, do you think at all !-- I am afred it is. And, you see, they have learned a lesson in this way, that in the breeding of Hackneys came so much sooner to profit than the hunter, and there was so much less risk to run. A promising Hackney they old. I am speaking of the good Hackneys, and there is no more risk to be run than to take him to the show and run him up and down in a string, or of they

keen him a little loneyr, be has just to be run in harness. Whereas with the hunter you must keep him to four years old, and do year best to lame him to as to "make" him. That is merely a theory of my own. They find that the Hackney comes so much quicker into profit, and there is so much less risk attending the breeding of him that they would be slow to go back to breeding hunters, and, of course, in that Delfield district from Finnberough Head to Sparse Point, and west as far as Pocklington and York, with very exceptional herefore, there were never very many harrows horses heed. In that Holderness dis

triot there were more hunters bred. 12418. I should gather from you that you think the producing a very valuable Hackney is still a paying business, but does not pay as well as it did because the decased has rather fallen off i—That is so, if you can produce the best article in the Hackney line, you will get a remunerative price for it, although the price is not so resumerative as it used to be, and one thing that points to that is that so many of these men who own these very first-class stallious have reduced their covering fees. A few years ago there was nothing under five guiness, and snything that

had anything of a record was ten guiness. Now you can get them at five guineas and three guineas, which shows the demand has slackened. 12419. As to the inferior Hackney, or the cross of the Hackney with the country mars, you don't think there is much donesed for that !- There is very little demand for the inferior Hackney, and I don't know

any case where the country-bred mare has been mated with a Hackney. 12420. Do you know at all whether these inferior Reduces have been bought as remounts 1—I have never heard of them. I think there is very little remount doing in our part of the century. For two years I gave prime at local shows for three-year-old horses suitable for cavalry rescounts. They brought 3 H 2

COMMISSION ON HORSE BREEDING. 420 March 12, 1987. very few entries-did not take at all, so I gather sound horse at the command of sayone who cares to there is very little army-buying done in our part of use him at a low fre, and, of course, the herse's where,

George Elchanisco. in Leeds.

Mr Berterl

that could be usefully taken to keep good mares in the country, to induce the farmers not to sell them ! -Well, there is the giving of prizes at local shows.

I have often thought shout it, but it would be a diffiralt scheme to work, if it could be done, where a man had a rood mare and was beesting from her every year to give him a bonns on his feat. But all those schemes are so difficult to work out. But I think that baving numerous local above and giving prime there of fair value, and if possible to give several prizes of equal value, would have the effect of rather encourage ing breeding I am sure of one thing, that the Royal Commission on Horse Breeding has given horse breeding suppersing of an impetus, because it has put a

1943). Have you ever considered at all any steps

abouts is well advertised, so anyone who takes any interest in resily producing good borses always knows where he can command the services of at least a 12432. We have had a great deal of evidence before on that Ireland has been considerably denoded of the best mores which are bought to go abroad, and some witnesses think the only symeth is to pervide the country with sound and suitable stallions, and others, that something should be done to keen the mares in the country !-- I am afraid it would have to be a very big scheme to induce men to keep mares in the country. Because when a buyer coars and offices a poor man a very good price for a more it is a very great temptation to him to part with her, and one that very few mes can resist. 12442. I suppose the pure-brod, the best Hackney ss can breed is a valuable one !- But there is no

Grange Barmanness examined 12423. CHARDAN.-You live near Looks !-- I live

12424. Are you eneared in dealing in becaus?-I such thing as a pure-bred Hackney. You can get anything into the book; you can get anything in if 12425. And have been for some time 1-Twentyfive years.

15495. What class of horses do you deal in t-Rusters principally and harness horses, riding horses. 12427. And where do you buy than 5—In Ireland. 12418. Buy all your horses in Ireland i—Yes, I am chilged to go to Ireland. I cannot get them in Yorkshire I used to buy them in Yorkshire. Could get pleaty twelve years ago, but now there are none

12429. Plenty of hunters, and the class of carriage borses you wanted I—Yes.
12430. What kind of carriage bosses I—Sixteen hands to say 15.3 hamsis, 19431. In former days where used you to how them !- From the breeders in Yorkshire. 12432. What age did you buy t-Fours and fives 12433. Have you any objection to tell us at what kind of average priors i—It all depends on the animal; the lowest price we gave was about 460 2434. What would you call a high price !-- Ob £120, that is for barness borses. I give a great deal more for hunters : £500 to £500 very often

12435. And now you say you cannot get them in Yorkshire!—It is impossible to find them. 13436. How do you account for that !- Because they are breeding Hackneys. They have given over breeding hunters, and they have gone in for breeding what they call Hackneys. 13457. Do you suppose they have done that made a great mistake ; it paid just at first ; it was a fashion, everybody wanted Hackneys because they have this action, but it is only forced action for ten minutes that is all ; if you rise or drive them four or five miles they tire, they are worthless, 12438. And in your opinion you think the farmer breeding horses has made a mistake !-- I am sure of it; they have rained all the farmers in Yorkshire,

except a few that have got stallions and stude three

cannot give them away; they cannot breed them with

or four.

19439. Why do they not go back to breeding
hunters !—They have not got the maces; they have
sold their best mares. I remember fifteen or twenty years ago you could buy from ten to fifteen beeses a week in Yorkshise; now you could not buy one good 12440. Where have those mares gone to 1-The have gone abroad; the foreigners have bought them all 19441. And your eninion is that the barne breader has done himself a good doal of harm 1—I am sure of it; they cannot sell these inferior Hackneys; they

it has taken a price at the abow, no matter how he is bred; if he cau step a bit and get a price you can get 12443. The Hackney that would win a price et a above, is that a valuable assistant to breed 1-My exscreege of show horses is very bad, about the worst corner you can find 13444. Would it pay the breeder to produce him? I cannot say it does. If you can get a good goer

it pays him, but how many do they get, not many. 12445. What becomes of all the inferior Hackneys !- They are trailed about the country from fair to fair ; they are very had to sell. 13446. Have the Yorkshire farmers to your knowledge taken any steps to try and get back again to breading hunters !-- I am abuid they are too poor. They have lost their best mares and cannot replace 12447. Can you suggest any means by which if they were able to affect it they could replace them ?

—I don't know, I am sure, the farmers are very poor

in Yorkshire in my experience 13448. But assuming they are not very poor or could be assisted by many could these mores be re-in troduced into the country !- They could be bought in Ireland. There are plenty of good mares in Ireland to be bought. What you want in strong theroughbred mares, se strong as you can get them, and you eannot get them too well bred with strength. There 12449. You have since bought these horses in Ireland — Yes. 12450. Whereabouts !—All parts, principally in

the South and West. 13451. Not much in the North !- There are uc4 many good horses bred in the North. 19452. Have you attended the principal fairs !--All the principal fairs all over Ireland except in the 19453. And you can find what you want there !-Well, they are getting rather difficult to find now remember the time when it was quite easy to find them, but it is not so easy now. Berrybody is going over there to buy, and probably the bunters in York thire are bought in Ireland as young one and brought over and schooled and sold as huster-Nearly all the farmers that can afford in York-shire go over and buy colts. Where one used to go

12454. And the supply in Ireland has not kept up to the demand — I am afraid it has not. 12455. Can you form an opinion as to whether the supply is as good as it was ten years ago !-- I am sure it is not. Printed image digitised by the University of Southempton Library Digitisation Unit

at first a bundred so now

19156. Then not only in relationto the increased demand but absolutely there are not so many good horses !-- I am sure there are not so many. It is a sunt mistake of Ireland to allow the good mares to so out of the country, something night to be done to

19457. You said awhile ago that there were plenty of good mares !- Yes. Semething ought to be done to prevent foreigners getting them. I have often over a former riding a more into the fair and he does not want to sell it and I offer him a good price and

12458. You think it objectionable for the foreigners to take the good mares, but you would not rively it objectionable to take them to Verkshipe !--We should not lose them out of the country. A premum ought to be given at the show to induce a farmer to keep a good mare, and should be sell it he would forfer the money. At present they give prizes

to houses and not to mares, and I think more depends on the dame than on the sires 12459. Assuming anything was done by the

Government in the way of a great of money towards home breeding in Ireland, you think, at any rate, farmers to keep their best mares !-- I think so, eer-You cannot been house without mayer

12400. How do yes think that could be best done practically !-- It would be tather hard to say. The only thing would be to give the farmer a mare to

breed from that he cannot possibly self. 13441. Have you any opinion as to the effect of the introduction of Hackney blood into Ireland !- I think Hackneys are not any good at all. They are useless animals, except for show purposes—just for

about five minutes, and then it is all over, and that action is forced action. They teach them to step and out all sorts of things on their feet, but if you drive them five miles they soon lose their action 12462. You think by is not much use as a light

harness horse i-No; if you drive them three or four niles they hang their leads and hit their hind legs against their fore ones. It is a misery to drive them 12463. Do you know the extreme West of Ireland !

12464. You know the kind of mares the small farmers have on the seaboard I...I. do, quite well.

12165. Would it not be a great advantage if more
bone and substance could be introduced into that class of animal 1-I should be introduced and chart-

logged thoroughbred home with strongth and action. You cannot get too sunth blood, if you only get strength with it. 13466. Don't you think a suitable Hackney would

rive them the substance and bone required 1-Certainly not; they are soft-ingood brates and nothing short of it. They would be breeding back instead of threeding forward with Hackneys. You cannot get a house too well head if you only get strengh with it. You shall put the Hackney and the thoroughbred in barness and drive twenty miles. You will get through with the thoroughbred; you won't get through with the Hackney, or he will never come back if he gets

12487. Talking of the western districts of Ireland, do you think by any means they could breed hunters?

—It would take some time, but they would improve the breed considerably if they had some good disronghized horses. I don't mean woody horses, but strong, shert-legged, that one carry some weight, 15.2

12468. Supposing they turned their attention to breeding for harness purposes what are do you recommend!—Thereughbred. There is no borse in the world, it does not matter whether harness or

riding horse, so good as the thoroughbred. 19469. Here you seen any of the thoroughbred allions standing in remote parts of the country I have seen them travelling about There are some very wordy stalkens in Ireland. I think it would be a

and not allow them to travel nuless they passed a Garren board of impectors for soundness and strength and Ekshedses. suitshilite. A great many of the stallions you see travelling in this country, and also in Ireland, are weedy things; no good at all. Of course the farmer is not sufficiently educated to know which is the best stallion; they are very ignorant on to breeding -- a great many of the western farmers in Irrhand. Of course, they are not all alike. 12470. Would you be content if, in the congested districts, say, the Government put enitable thorough-

great thing in Ireland if they were to licence stallions. Nova saying,

bred sires, and suitable Hackney sires at the same fees!-I should certainly not send the Hackney by any means—the greatest mistake, I think, ever wa made. I told Ma. Jackson so when he was Chief Secretary. He asked me what I thought. I travelled over with him from Ireland one night, and I mid, "It is the greatest mistake ever you made if

you bring Hackneys into the country."

12471. How did you form that opinion !-- I have seen so many of them, and bought a good mury. have had some of the best of Hackneys and shown them. I used to show a great deal years ago.

13472. I take it what you think would be necessary

for Ireland is, perhaps, first of all, to keep good mures in the country i-If you possibly could, 12473. And secondly, the introduction of suitable sound thoroughland sires !- Yes, with plenty of

13474. And that you think for any purpose the introduction of Hackney blood would be led !--Ob.

very had, I think. 12475. Do you consider the Hankney blood to be worse than Cleveland bay or cosching horse !- They are both bad enough, you cannot get anything wome.

13476-7. Have you not ever seen a good hunter out of a thoroughbred more or out of a half-tend more by n Hackney stallion !- Never in my life. If you find a good Hookney, if you drive him, I will guarantee be will trace back to thoroughbord blood.

12478. Don't they all trace back eventually to

thereughbred blood?—A great many of them to our hursen. Ten years ago you could get anything at all into the Hackney Book, if it won a prize at the show you could get it in quite easily. 12479. A great many horses go through your hands that you key in Ireland !- About 300 or 400 a year

12460. And the price you pay is the same as you did some years ago!—I don't think there is much 12681. Do you hav at fairs !-- I buy from dealers and at fairs, anywhere I see one.

19183. Have you agen is over there !- Oh, no, I go there myself. I am there nearly every weak 12483. You have never been in the north !- Oh, yes, but the horses are not so good there; they are not

worked so well as they are in the south, they are kept fat, and se soon as you get them home and east to work them they get ill, you have to get that fat off In the south and west of Ireland the homes are poorer and every day you work them they get better.

12484. Do you think the stallion you recommend for Ireland is to be obtained easily — Quite easily; could buy plenty at £200 apiece. you some say passey as 2,500 squeez.

12485. Where would you get them !—All parts of Ireland. You don't want a horse that could win the Derby or Leger; what you want is a thoroughlesd

borns with strength and true action and sount and 12485. And you think they could be obtained !-

For £200 each, quite easily, plenty of them. 12487. Lord Lemonramur.—I gether that you are not an admirer of Hackneys!—Well, I have had a great many of them, my experience is very bad.
19488. One greatleman stated that he had driven long distances with a Hackney, that they did not tire; you have tried them yourself and found they do !-- I have indiced. The Hackmeys they call now used to

Printed image digitised by the University of Southampton Library Digitisation Unit Printed image digitized by the University of Southernation Library Digitization Unit

good, they used to cross them with thoroughbred horses and they could stay; but those they have at keep the mare. present cannot stay at all, they are no good only just

COMMISSION ON HORSE BREEDING.

for abow, just for about ten minutes and then they are tired. 12489. Then your idea would be that if these Hackney stallions got into the hunter-breeding countries and we crossed with many that beed good hunters, they would rain the bread of hunters there !

goes is, iiw. be called Yorkshire resoluter maron, they were very

and am sure of it. 12490. You would not ours to hay a hunter from one of these well-bood mares by a Hackney stellion!

-Certainly not, you cannot have a hunter too well hred if he has strength. If you felt him tire take a well at him and let him couch his wind. If you take a common horse, the first place he comes to be her

down and you enmot kick him up.

12491. You think a Hackney get would do thin! No earthly use at all. 12492. Have you bought hunters in Ireland !-

12498. I suppose in Leinster, in Kildere and Westmeath, you bought most t.—No, I bought plenty in Cork and Limerick. 12494. Of all sorts and sizes !-- Yes, 153 hands. 12495. And up to varying weights !- Yes 12496. As a rule, do you know anything about edigree?—I don't care much about podiyree, he shows his pedigree kinssif as soon as you look at the

19497. Ret you would not have a horse unless it gave you the idea that it was hy a well-hard home and by a well-bred mare !- Certainly not, it is quite easy to tell a well-bred horse from a had one 12:03. Do you find a large number of people go

over from England !- Yes, a great many 12419. Do you find that they will buy a horse that perhaps you reject?-I cannot say that, 13500. Is the supply there equal to the demand ! It is not, the demand is greater than the supply. I remember, ten years ago when I went to Ireland, is was very easy to hav houses. Now you have to travel

a great deal about Ireland before you got a good You see a great many horses that reject i I see many that are too young for me, that I cannot do with, I must have them four your old at least. I could kny plenty of young horses if I could

afford to knep them, but I have no means of keeping them. I must hur them ready for sale. 2502. Is there a market for these young horses ! Oh, ven, there are plenty of markets for them. 12503. Those are by what, as a rule?-By thorough-

bred horses.

12504. And there is a demand for them !-- A good Augund 12505. And they frith a good price to A very good price. Plenty of farmers in Regland go over there price. I know there I know

farmers in Yorkshire who buy eight or ton at a time. 12106. Would they buy them if they were by hed horses or Hackneys —They would not, they would not bring them to Yorkshire at all.

12507. Therefore, so far as Yorkshire is concerned, there animals would be a drug in the market!-

Certainly, they could not sell them.
12006. You rather lament that there are not the sume number of good meres in Ireland as there used to bet.—Yes, I think the foreigness have taken the

hert mares out of the country, and it would be a good thing to stop them, although I sell a good many to foreigners, but if they are not stopped we shall soon be without berees.

sogin to study, and when I offer a good price they

12009. Why do you think they sell them !-Because they want to got the ready money; many a

sell, but if you offer them a premium that they would 12510 Supposing a better class of stallion were introduced into Ireland, do you think it would be worth the while of the farmer to keep that good many because she might, if she was a good bender, make an annual income by her produce, that he would sell to people like you!—I think so. I think is stallions work to pass a Government inspection by

practical men; a great many of the stalliers that are sold to go to different parts of the country are weeds. Throughbred because were supposed to be leed to improve the breed of horses, but they are simply machines for betting upon. If they were beed with

maceumen for netting upon. If they were need with more strength and substance, if they could not win a mon they would be wurth £100 for a higher or harness horse, but as they are now they are weething, a great many of them, they are little weeds. 12511. I think you said in reply to the Chairman that you could buy any number of stallion that was think would be capable of doing what is wanted in Ireland as £900 a piece t-Bay them in England there are plenty to be hought.

What stomp of horse would you angrest!-A horse of 15.3 hands, to energy 13 stone 7 lbs, in weight, at least, you want them that strength.
13513. How bred!—It does not matter as long as they are thorough bred. 12514. But you insist on their being thorough-

12515. And you would not advocate any other class of horses being introduced !- Certainly not. 12516. You deprecate Clydesdale, Shire horses, and Hackneys !-- I would not have anything but a thoroughbred; if you put a strong thoroughbred and eart home together to plough, the thoroughbred home

would kill the east house if you keep ploughing all 12517. Have you seen any stallions to Ireland !-I have seen a great many, nearly oll 19518. Are they good or had 1-Some are good and some are bad. 12519. In the districts where there are bad stallions,

have you bought some good hunters, aritmals you would like !- I bought some very good hunters all over Ireland, and sometimes you cannot believe how the farmers say a horse is bryd, because if a horse in a district is cetting mod animals, they are sure to say the horse is by that sire. 12520. But still you would not buy a home unless you liked his appearance !-- Unless I liked his appearance and strength.

12531. The Chairman asked you if you had seen some of those mures in the congested districts, which, after all, the Hackney's were intended to benefit !-I have seen a great many of them coming into fairs, they are very poor maron

12532. Do you think they are expedde of being improved !- I san sure if they got thoroughbred etallions it would improve them, they would breed worse burses than there are now to the Hackneys

12523. What would they breed to the thorough-lord stallies !- Riding borses, pole posies, and Hackney horses

12524. The first cross i-Perhaps not the first, the second one.

19526. You think it is a question of time!—Yes.

19526. You don't think is those poor districts they

would get more etamina by being crossed with the Hackney!—I think not; there are plenty of thoroughhred borses with more bone than the Hackney, and the bone is much better. If you drive the Harlmay five or six miles, next morning his legs are filled like mileposts, if you drive a thoroughbred horse his legs are an fine an silk. time I hay a more that a furmer is riding into the 12527. The posites of the poorer classes in the West of Ireland have not much setion !—No; I have fair, he does not want to sell the mare; I say "if you got a good price won't you sell her," and then they not much chance of infring their action, because they

walk into the fairs in carts.

will kill the other. You want horses for usefulness; Man't is all.

12528. You would be eareful in selecting a sheroughbred with action !-- Certainly, I would have a horse that goes straight and well, and goes well off his kind legs, and is well made, with good hack and quarters. In all houses you want himi isg action as such as fore action. If you drive a home that steps in front and does no go behind he soon tires, if you drive a horse that has good hind action he will always get his foreign out of the way. 12019. As far as I gather your opinion from your

experience of Ireland in all parts is that there ought to be nothing imported to improve the blood but thoroughbred horses !- Certainly not; I would not send my bonse but the thoroughbred 12520. Mr. Fryswitzers.—World you really mind

a half-heed horse hved in the country for use in Irehad!-I would comer have a thoroughbeed one. 12531. Suppose you were not able to get the regired number of horses !- I would prefer a thoroughbred; I think there are plenty to be got at an average of £300 each : it is not necessary be should be a

fashionable size as long as he is thoroughbred and has strength and quality.
15512. The Esciptor in Ireland at present is more or less now, and there is no doubt that if you see a home with a great action run up and down a street it is a very taking thing; do you think that the small Irish farmer is likely to be taken with this action and

to use him as a stallion !- They would certainly, but If they once tried him they would not again 12523. But that will take them three or four years before they know the harm that is done !-- Of ourse ; the Hackney stallions as they call them, are very fashy, showy, and taking for the time being, but they are no good; if you want to drive ten miles you cannot get them borne again, if you ride them they are forging their hind feet against their fore ones, and henging their heads, you will have to hold them

15514. You think if the Hackney is intedared into Ireland, it will produce a soft class of spirod which will be detrimental hersafter Containly, and the bone of the Hackney-as they call him-is very soft. If was drive a Hackney two or three miles, next morning his legs are filled and you see them when they are old mazes with gammy legs; if you see a thoroughbred, his legs are as clean as

15535. Colonel St. Quincin,-You are speaking, almost entirely, of the riding class !- I hay a good many harness horses.

12036. Light horses, not draft horses 1—No.
11537. You say you hay very few borns in the
North of Ireland 1—Very few.
11236. Why is that 1—Because they feed them so

bally. They buy the cells in the South and take then to the North, and put them in houses and feed then on boiled food. They bring them out quite fat and fresh, and when you get home and start to work then you have to get all that fat off. They breed a great number of homes in the North of Ireand, but they are different from those in the South !

You because they have not such blood as in the 19539. Any horses, almost, that you see in the North and take your eye and are saleshle in your business came from the Scoth originally !—That is so. 19540. You have travelled about the North of Ire-12541. Don't you think the North of Ireland is spable of producing the same class of horses as the

had a good deal !-- I have been all over it. South if they had the same blood there !- Quite so. 12542. With regard to useful horses for the farmer, do you think the Hackney blood is any value to them for their own purposes !- I think it is 12543. It may be valuable for sale at an early age? Yes; but they never give satisfaction. If you buy one come you won't buy one twice. If you put a Mackagy and a thoroughbred house in harness one

people don't buy them to look at, 13544. You don't think the Hackney is useful Wheelen blood to introduce for the harness horse independent of the riding borse !- Certainly not; they used have the old Yorkshire mares and cross them with thoroughbred sires; but now they are breeding from thereughbred sires; but now easy me simply between a these Hackney stallions—they are simply between a three is a bores, "Star of the East," that used to take a great many prices. He was a Hackney stallion; I believe

he was from a cart mare. 13545. You have seen a great deal of what they call the re-mount class in Ireland !-- I have 12546. You know the class of horses I buy for re-mounts. We have had soveral gratheness who have advocated the Hackney as a neful horse to cross for military purposes-recee for riding than driving-are you of that opinion !- Certainly not. 12547. Do you think that his formation and action

is useful?—I think it would be entirely useless.

13548. Level Harmonwara.—I think you said you bright several maces in Ireland!-Yes; I buy more mares than horses. 19549. Do you buy for the foreign market !-- Yes. I buy for the English market too, but I send a great many abroad, I sent 300 abroad last year

12550. What age do you usually hay them at !-Four-year-old and upwards, nothing younger, unless it is a thoroughlyed that has run-a racehouse. 1955). But you don't hay half-beed ones earlier

12552. Do you ever buy mares that are in foal !--Never; well, I have bought a few theroughbred mazes, but not half-bred mere 12553. But if a half-hred mare happened to have

a foal at foot, would you leave her alone !-- I would not buy her at all. 12554. Did I understand you to say that your orizion was seked reporting the introduction of Hackneys into Ireland !-- Yes, Mr. Jacksun trevelled over with me from Holyhead one night, he lives near

me, and buys his burses from me, he miked me about it, and I told him then—it was a great mistake if he 12555. CHARMAN.—You were not consulted by the Congested Districts Board 1-Ob, no; we were just

speaking as we travelled along. 12556. You gave no opinion in writing t—No; he est asked me for information and I told him what I

12557. Lord Leypoynamay.--Have you spoken to any of the dealers in the South of Ireland and accertained their orinion on the introduction of Hackpevel-I never mentioned it 12538. Mr. La Torcess.-Would you buy horses

with the same confidence in Ireland if you know the Hackney horse had been largely introduced!-- Cor-13559. Have you ever seen any of the produce of these mares, that you bought, by a Hackney stallion?

-I never bought any Hackney maces in Ireland to my knowledge 12560. No, hat you say you bought Irish mares, and probably sold some of them to people who live in

your neighbourhood!—Xer. 18561. Have you core neen them bred from!—I cannot say I have, but the mares I sell they broad from them after they have done for riding purposes. 19562. But you have never seen any of the pro-duce of the Irish mares and the Yorkshire Hackrey stallies !—No, I cannot say I have. Yes, I have, I sold Colonel Charlesworth a grey mare, he rode her for nine or ten statem and put her to a Harkney stallion, but she bred nothing any good, and he gave the mare away to a farmer in the end. 13563. Charman,—What did the farmer do with

her!-I don't know; she was a very good mare, I bought her at Ballinasion

could only go a short way as herd from Hackmen. where you hav hire, so good as the thoroughbred More pa nor were they pure-bred Hackneys !-I don't think there is made a thing as nere-bred. herse if you can only got strength, that is the only 12625. Were they from what we call pure-beed Hackneys !—They were what they call the Hackney 12628. Just to be certain about your opinion on

12405. Those that you drove were what they call pure bred 1—Yes. I gave over £200 a-piece for them, so they early to be some of the best.

19697 CHARRAN-I don't exactly what you said about the stallions in Ireland, but I don't suppose you meant us to understand that you had seen them all !—I could not possibly see them had seen them all !-- I could not possibly see them all, but of what I have some I have seen some very good stallions. I think what you want to do is to to duce the farmer to keep his best mares to breed from, and to license the stallions that are travelling. It does not matter if you don't charge them much for the licence; then it would stop these weeks. The Board would never pass those weeds to travel. I think there is no boyee you can get, it does not matter

Mr. Gener one other point, I gather you think that saything except of thoroughbred blood is rather detrimental

I think there are only two breeds of horses, cart. horars and thoroughbred one:

13529. In seeking to breed hunters I want to know if you think that every strain except the thorough

bred is equally bad, do you think the introduction of the Hackney or Claveland Bay or Yorkshire coachhorse is all equally had 1—The Hackney is the very worst blood of the lot, because any riding man that rides to hounds does not want a borse to step in the 12630. Are there not a considerable number of Hackneys used for riding purposes i—No riding man will ride a Hackney because he is a very aucomfortable animal to ride. He will shake you to death, and

when you have ridden him a mile or two he is tumbling on his head if you don't hold him up.

Mr. SCARTH DIROW examined.

1953). CHARREST .-- You live in Yorkshire !-- Yes. perhaps after two or three generations it throws back. Mr. South I live in York at present, but I lived for most part of my life in the north of Yorkshire. agum, and the breed gets a bad name. But when I was a lad I can remember Mr. Tom Parrington, be 1953). Are you breeding boyen? -- I have not bred and his brothers and friends bred some of the best any horses for the last six or seven years. I bred bunton over seen from Cleveland marcs, old "Lady

for several years. Bennett" was the second cross from a Cleveland, hat 12635. Are you engaged in dealing in horses is the foreigner got that class of more. say way now !- No, I don't deal at all now. I did 12041. Was your principal object to breed hunters t

deal at one time and was a good deal in the horse trade, dealing in all classes of horses, but I have not 12842. If it was not quite good enough for a hunter done any dealing for the last eight years it runde a valuable carriage borse !-- You. 19634. Can you tell the Commission what kind of 12043. Got about the same price for either !-- No, I could get a better price for the hunter, if a bunter horses you bred yourself i-I bred hunters and harness

horses, and of oppres occurionally a cost horse would corry me be was rather wood to sell 12635. Do you keep stallions of your own !-- I have had an odd one or two, but the stallines I kept were 12644. And the facutors generally about you, what did they breed !-- In the north of Yorkshire, they either Coaching stallions or Cleveland stallions bred principally cart borses ; you see the whole thing

12636. And you keep a number of marss 5-Yes, I turned over when the mining was storted. There eep just a nice for mares. was a very his demand for a short-legged powerful cars here for mine work; there are not very many large farmers at Cleveland, and they at once jumped 13637, What class of mares did you breed your hunters from 1...Sometimes from mares I had ridden rayself, and sometimes I bred one from a Gleveland

at this good business. If they could sell a carting gelding at from 50 to 80 guiness, it was good trude, and they started to breed on the Circlesdale line at 12638. What did you put them to !-- A thorough beed always. I preferred a little wide thoroughbred once. I don't think there are half a dozen men in the borse, if I was breeding from a half-bred mare, I district that are breeding light hor

would profer him under 15.3 rather than over 19645. They the production of hunters wrot out 12639. What has been the result of your breeding from a purely tinamial cause!-Yes, the better demand burnters, say from the Cleveland Bas !- When I had was one thing, and then they lost their mare.

the right cless of Cleveland Bay I could not find any 12616 They lest their mares on account of the oat foreign decrand !-- Yes; they sold them to the fault, if I did not get a good hunter, I got a good harmon horse, but unfortunately there are no many 12647. Was there any particular foreign demand to any particular time?—There was always a stoody Cleveland Bays that are not Cleveland Bays, are so many Hackneys that are not the old Yorkshore demand for a good sort of more ever since I can re-

Hackney we used to know, and those might breed all sorts of things. But if you get a good one you can breed a good animal. I had one I rede four seasons number: it increased very much fifteen or sixteen 13648 Are many Hackneys bred in the North !with the York and Ainsty bounds, as good a hunter where Are many amending tree in the Arch as in the East Riding; there are a few bred. When I say the north riding; an most quite correct: I am speak-ing of the Gestland district. I dea't think there are as you could get on, from a coaching mure. I have one that was by "Knight Templar," he is one of the best I over rock

12640. You don't object to the Cloveland Bay or the Yorkshire couch bosse !-- No, I don't object to so many Hackneys bred there. Of seams about the Yorkshire comm norm - - - - - - that I them, but I should be very sorry to say that I Malton there are several hred; it is a very large advocate breeding from those mores and just taking the stud book record. Really the Cleveland Bay was branding district. almost beed out of knowledge when the Cleveland Bax stud book was started. I started that and tried to swt the old breed back, but I found a great deal of

breeding district.

13649. You brink yourself 1—You.

13650. Have you any practical experience of Lish
boson 1—You; I have clides a great many Irish housen.

I have one now, a very good borne. I have always
illust them. I want a big blood borne to carry me; I
must have some blood or I common get there as all.

I must have some blood or I common get there as all. difficulty, as owing to the foreign trade, there was a tremendous demand : you could sell borses for almost 12651. You recraire the blood for the stamina !any price you liked to sak for them and there were

a lot of mares got into the book that had some bad 19452 Have you ridden any half-bred Hackney back breeding, their produce is in the book and

horses hunting i-I have ridden one or two. I cannot Moreh 10, 1687.

Mr. South

my that my recollections of them are very pleasant. They have tired, they have jumped very well until they came to draina, but they are impossible over a wide drain , that is my experience. I have seen and ridden une or two; if you are on a bit of grass they might earry one for a quarter of an hour.

12653. Have you formed any opinion of the effect on horse breeding in Yeckshire generally-of their turning their attention so much to Hotkneyat-I of disappointment in the long run. Men who have gone on in the attempt to breed such a burne as "Rosacier"-to breed a London champion-find themselves loft with a great many borses that they find it

difficult to get a sale for. 12654. Would you say there is a good sale for first-

class pure-bred Hackneys !-- I should say for show purposes and what you may call fashion for very high-class home there is, but I don't think there is very much demand for a second-class horse, and I am afreid it is getting worse and woese from the little I have seen of the repositories. I sometimes go in and see horses sold there.

12655. You think the supply of that kind of horse is quite up to the densard !--Quite up to the densard -in fact there seems to be scarcely any demand 12656. And you don't comider it a profitable huntness !-- No ; I don't, I am sure.

19657. Do von know Ireland at all !-- I have been ever two or three times; I don't really know anything -everybody has been there, more or less-hut I don't know anything of the country much. I went to see some Shire burses once that belonged to someone near 12458. Lord Londonnessy,-I gather that you

believe there is nothing like a thoroughbred home to brood from !- I think there is nothing like a thereughbred horse. My practical experience is that if a wellkred horse earnet every me, the other cannot helieve with old Dick Knight that an ounce of blood is worth pounds of bone. 19659. You prefer to cross any class of mure with

a thoroughbred horse !-- Any class of mure to bread a light borsa; I mean to say for drought work, or show work, or riding work. 12060. Do I gather from you that the Cleveland Bays are dying out !-- The old steals. There are no many of them. You may have three crosses of suppered good Glevaland bland, but three crosses is only as attempted approach at purity-but the old Cleve-

land mare I spoke of as breading good hunters is dying out. One mare I sold to Mr. Alfred Peace, I could truce ber pedigree to 1800. Site had eleven top erosses on, and when you can do that and authenticate it, it is a pretty fair record 12001. But of the present moment they are not in the numbers !- They are not in the numbers I would

12662. And that is because the small cart mares that were keed when the mans were opened have

taken their place !-- You. 12013 How were they hard !- In Cleveland they have gone entirely for the Clydescale type; there was a nort of clean degged cart horse, a cart mure that shoot about 15.3, that would be about an outside sim, not unlike that old extinct breed of the Northemberland Vardy horse, a mare that stepped a hit. From that

class of mars I have seen occasionally a prepotent size like "Perion," or "Homosopathist," size a

Leicentershire hunter, but I think that was simply 19864. Would you eyose a cart mare of that stemp with a Hackney with the expectation of getting anything useful for barness or as a show more b. No. I would not do it. I have seen one or two, and they he would impart a little more courage, and there is always a chance of breeding a polo pony. generally had the bad properties of both parents,

matter of fact, I would not breed from them at all, 11600. Still, I suppose poor seen who had a charge Those mores that are in Cleveland, they have graded them up until they have a very high class of They have all been bred from Cludes. dales, ten or eleven years ago; they got up a cari hause society, and they have always got very good borses. They have got "Lord Wolseley" this year, and are steadily persevering until they get a very good clam of mare in the country. I can remember when them were very few carting mores at the Cleveland shows; there was acarcely one at all.
12057. Then they have got a good class of sairan

19565. What would you cross them with 1--As a

hy taking trouble about it i-Yes. 12648. Do you ride Irish horses when branting !-Certainly, by preference. :12559. You have a great epision of the Irish horses !- Yes, I have a great opinion of the Irish

12670. Do you so over to buy them vocasifi-No ; I have two or three friends in Ireland, men whom I can trust, and they send these over 1967). From any particular parti-I never ask any questions, my briend knows what suits me, and sends me a horse, and I send a cheque. They see

always the best of well-bred horses, be is a head rider 12672. Should you buy from the south or west of Ireland a horse as a hunter if you thought it had about it. I should think when the pinch came it would give out

12673. And you think if Hackneys got into the hunter breeding parts of the country it would stop English people having !—I am sure it would have an injurious offect, 13674. I gather you are disappointed with Haskneys all round!—Disappointed with the Haskneys or cost. The very best of the Haskneys of course is a

very hundsome animal, you cannot be'p admiring him, but I should not like to ride him, they are not riding horses in fast. 12675. Except a man could breed a Hackney that would either fetch a very large sum of money, or win

prises, you don't think it is a perful animal !-- I don't 13676. Do you think erossed with small mountain moves they would breed a useful animal !-- I don't see how they can. I don't know anything about the

ight mountain mares. I have seen a good deal of the Welsh ponies, and I have been about lately both in Wales and Dartmeer and Exmoor, and those places, there is a great difference of opinion as to what is the best eross, but they seem to be gretty unanimous that the Hackney did not suit. They kind the Hackney in Shrophire, at Church Stretton, and on Dartmor. 12677. Did you see any of the results !—Ne, I

simply beard what the ordinary breeder said. It was a mistake, they don't seem to have the bardiheed necessary. The best size in the New Forcat was an Tale of Rhum peny.

12578. You am speaking of the penies, have you had any experience of the hill puny crossed with the Hackney, as to whether that would get an amiral that could draw a trap!-No, I have no experience

of the hill pony. . 12679. Mr. Firswillease.—If you wanted to increase a small breed, such as we are talking about bow would you go about it, by selection of a shortlegged, strong, thoroughbred, or would you introduce e courser breed !-- I see of opinion that if you had a nice short-legged thorquighted home, short of his back, and standing on a short leg, that he would inprove that class of animal better than a coarse cross,

13580. I presume you think he would also improve almost any broad in stamina as well as in courage !--19881. You may you buy the horses you ride in Ireland; I suppose without even asking for the petigree; you rather take it for granted that you are beging a really well herd amined 5-I take is for

granted I am buying a well beed aminal, as a matter of fact one of the horses I have now I don't know his pedigree, I duressy I could get to know it, int I never saked. A gentleman bought him and he canied him very well, there is no doubt he is a well heel horse from his appearance, and the feel he gives rus, and the way he spreads himself when he room through dirt

19682. If the Hackney was introduced into Ireland on a large scale, you would not buy with such confidence if you wanted a countrecom well-hard horse? -If you take a horse in and put him at a nominal or even low fee, my experience is, that the farmers will rush to him at once regardless of consequence. I had a very eurious instance that occurred just lately with respect to the way men will breed, just for an idea and without any forethought. There is a gestlemen I know very well, who wanted to make one of his tenants some little auknowledement and he gave him a hunting brood mane, the is a more that has heed three useful 14-stone hunters that can go very well, earry a man in a good place, with the York, Brambara, or Lord Middleton's, and those countries,

and the first thing the man did, he put it to a Hackney stellier, simply because he had an idea be would get something, 12682. Has she produced anything 1—She has not produced snything yet; we shall look with anxiety to see what it is,

12684. Suppose you have got a soft strain into the country, how many generations do you think it would take to been out that strain again, suppose you found it to be a failure !-- It is your difficult to say, that is a very wade quantion, I should think a good few, I don't think you could beeed it out in those or four, there is always atavism to coptend with, and it coes

back sometimes to a good many generations 12585. Mr. La-Tenonu.-You are accominted with a good many of these farmers who breed these Harkney homes i-Oh, yes, 19186. Do you think, taking it all round, that they have found it remunerative, giving up hunter

breeding and taking to harness hove breeding !—I should hardly think so with the rank and file, quite 19187. It is only the ones who breed the very topundoubted

19988. These horses are of very considerable value I suppose 1—Oh, yes; it is simply a question of supply and demand; people will give extravagent prices for them; if five or six people want a borne there is no difficulty in getting an outrageous price

15689. Would you expect to get a muful stalling for this remunerative trade for a couple of hundred pounds !-- I should not like to have to buy him to 12690. You have not seen any instance of the reduce of an Irish more by a Hackney stallion !--

No; not that I am aware of. 12691. You have seen instances of the cross of the ordinary Yorkshire mare and the Hackney stallion? -I have seen one or two

19892. Did you think that they orosed with favourable results I... No, they had principally loaded shoulders, not mice. light, afry action at all-more butchers' cart horses than anything else. 12613. Mr. Warren .- Am I right in thinking that to wrote this article in the Live Stock Journal !- Yes. 1269 6. Do you adhere to what you stated here that, Hackneys, they show a considerable inferior of

Printed image digitised by the University of Southampton Library Digitisation Unit

thoroughbred blood !-- Yes, cortain lines of Yorkshire Macaus, 1807. 12690. You have studied the pedigrees of York- Dixon shire Hackneys a good deal !-Yen; fairly well. 12010. Were they beed from a staying race !-- Certainly: certain lines of them 12017. We will take Mr. Moore's line, some of the

become in the congested districts have come from Morre's -do you consider his a good breed! -Yes. 12008. A staying line b-Thern is some staying blood in them, but I hold this, that if you don't contime to use your horse you will superficture softness; I way much question now whether there is any Hackmey home that has unything like the staying power or page of his grandfather, for instance, "Ramsdale's Performer" Forty or fifty years ago it was a com-mon thing for the farmers of the East Riding to have

trotting matches home from market with these mores. and there are records of trotting matches with the stallions; that is all done away with, and the Heekmey stalken now has nothing in the world to do but just go round to the shows, and I am afraid there will just go round to the surer, were the a coreiderable amount of softness

1209). Do you think if they were heed up in a more busal manner and used, that would disappear !-It might disuppear in generations by hard work, and recording to something like trotting races.

1370i. Do you know that there have been experi-

ments tried with Hackney stallions in America and other places for long distances !-- I look with great suspicion on American records of time.

12701. You don't think those are true!—I don't say that, but I say I look with a considerable amount

19702. With report to those other strains, Mr. Coolors and "Wikifrit," was that a good staying Cooks's and "WHITE," was true a good storing blood!—Yes, "Wilding" was a very well beed horse 19703. Did not that come from a good strain of

threearbred blood !- That did, but you don't find very many of those houses in the stud book now. 12104. Are there not horses in the stud book with a coost deal of "Wildfirm" blood in them !- There are

a few, certainly 19705. Then the best Yorkshire Hackneys can trace back to some of the best thoroughbred blood 5-There is no doubt about that

12706. A borse like "Waxy"!-Yes; of course on lower the Occupion Stud. through Sir Tatton Syken' horse, a horse called "Conservator"-that goes back to all the hest blood. 12706. A great many of the Hackneys bred about Sir Tatten Syles had inversal crosses of thoroughbred blood |- There is no doubt about that; they con-

timally put the thoroughteed strain on the old York shire rossister, and hard back to theroughteed blood. I are of cointon that the isted book and the stud book breeding has done hariff to the Hackneys; I think people would have used faces thoroughbred blood had a not been for stud book rules, and have got bester horses-they would not have such extravagant action.

12707. You think that Hackneys beed on the lines of "Demante," and "Lord Darby II.," and "Pire-away" were unful horses?—Yes, but I should not know where to find one like "Denmark" now. 12708. Do you know how the Hackneys were bred that you refer to so having ridden yourself !- I cannot

remember just now; one had "Lord Derby" blood-they were Yorkshire-bred, cortainly. 19709. Do you know what mares they were from? That I cannot tell you. 13710. Do you dishbs the cart blood, and Suffile, and Clydedale!—Oh, yes; I should object very much to the Suffolk, what I have seen of the Suffolk—I had

two in my time, and they were both soft borses.

12711. Would you object to them more than to
Hackneys — I should object to the Suffolk very much nitees, as a foundation for any light horse.

12712. And Clyderfals — As a foundation for a light home, I think the Clydesdale is almost hopeless a examining into the poligrees of the old Yorkshire

COMMISSION ON HORSE BREEDING. 428

12713. Do I understand you to object more or in the same degree to the Suffelk or Clydesiale, as con-pared with the Hackney, for hunters ! ... I don't think there is anything to choose among the three; I think they are all equally hopeless.

12714. You don't think the fact of the Hackney having thoroughbeed blood in his back breeding is any advantage! I don't think so; his action is sure

19715. Do you know there was a great demand for Hackneys at the late show for foreign Governments? -I beard that 12716. When you refer to the Church Stretton ponios, are you quite certain a Harkney was tried there !- I would not be certain without my notes; I think it was either there or at Dartmoor

19717. I suppose Mr. John Hill would be a good authority as to anything at Church Stretton !— Yes, I would not stand on that; they tried something at Church Stretton that did not answer. 13718. Are they not very small ponies there?-

13719. Charman .- Have you any opinion, sup-soing there to be a grant for improving the leved of posing there to be a grant for improving the devoted to trying to improve the mares !-- I should certainly do

of the DWO; a series is assertly supplement or expect any very great advantage to be derived from the stallion if you see breesing from a noderate class of marses—it is a very wife and difficult question to know how best to deal with. It is one I have talked over with many practical men. The Duke of Poet-land's scheme is, I think, a very good one in leading marce to his tenantry, but it is a very wide one and costs a good deal of money. There is one thing might be done, and it would tend to encourage horse breeding, and that is, I would give prize for groups

-- fools and yearlings -- by a certain size; let those or four formers join together, give a good prize, and let say from looking at a stallion what sort of sire he is

that, I think the mure is the more important arised

of the two; I think it is utterly hopeless to expect

12720. At any rate, I gother you think it would be very important to do something to try and improve the mores, and to keep the good mores in the country? ... That is of the very greatest importance; I am very sorry to see so many good mares poing away, The Commissioners adjourned.

Mr. Windows.

Meny 8 10, 1801.

(r. South

TWENTY-FOURTH DAY-THURSDAY, MARCH 11vm, 1897. Sitting at 13 Hanever Square, London, W.

Fresent-The Rabl of Dunbaven, R.F. (in the Chair); Mr. J. L. Carew, Mr.; Sin T. H. G. ESMONDS, M.P.; SIR WALTER GILSEY; LOND HATHDONNELL; Mr. F. S. WHENCH; EARL OF ENNISHMEN; HON. H. W. FITZWILLIAM; MR. PERCY LA TOUCHE; COLOREL ST. QUINTIE.

Mr. Winnerst examined.

19721. CHARMAN.—You live in London and are in usiness as a borse jobber, are you not?-Yes, my 12722. Do you sell horses, or only let them out !--12723. Have you any objection to tell the Com-mission about when number of horses go through your

hands in a year !- I thought I would like just to mention to your levelship that I have no objection to tell you, but, I presume, it would not go, mosessarily, very much farther than this room. 12724. Well, you see, the gentlemen of the press are bore. I don't think it is uniterial. I take it for granted a considerable number of horses go through you bands during the year!—Yes. 19725. Can you tell us at all what proportion of these horses you obtain from Ireland I—Yes, my lord, I

can; I think, I may say, we have been buying boress in Ireland since 1871; that was the first time we went there. Of course, when we first went there, we will train. A course we will we filter write noger, we fill report to the property of the party of the property and after a few years, we came to tary meanly half our horses there—that would be about 1890. In 1883 we bought 220 burses altogether, and 101 of them were bought in Ireland; of course the number varied semetimes. I think you may take it that we have been buying nearly half our

horses in Ireland; but, in the last few years, we have

not been buying quite so many, for two reasons one is

we have not required quite so many horses. There has

have found another place where we could meet with borses—that is, in Normandy. I began to go there about ten years ago, and that has rather grown; therefore, we get a certain number from there and do not require so many from Ireland, still we get very nearly quite one-third of our houses from Ireland, and we used to get much more. We should still get more but for this other opportunity, and also not having quite the same demand for them. 12726. What class of horses do you buy !- Only

not been quite so much demand for them, and also I

MR. HUGH NEVILLE, Secretary.

first-class carriage horses; we do not buy anything 12737. Do you go over yourself to Ireland, or any member of your family, or how do you bey your horses — As I say. I went, in 1871, which is a good many years ago. I then went myself, and went

every month for many years to work up a connection among the farmers, and latterly I have not gone quite so much myself, but sent my son; but, up to two years ago, I have been going regularly myself. 1272E And you buy direct from the broeders merally or at fairs! We do not buy at fairs. When generally or at fairs).—We do not buy at fairs. We so I first began to go I used to attend the fairs and go sameng the farmers, and in those years I bought almost invariably off the farmers and occasionally in the fairs. But as time went on I made the acquaint amon of men who were colt buyers, and by degrees it rather dropped into that, one or two men bought

specially for me, at least I was not bound to take

their lacres, but when they got a certain sumber together I week to go over to see them. One man I med to so to see every month; he went continually to false ; he took the houses home, and we used to deal to mann; no tout the normen mone, and we used to dead were largedy with him; but only took what we approved; he bought with a view of selling to us, we had the first show. It has rather dropped into that that we have two or three men, large cold howers. whom we visit periodically, and they do not sell may horses until we have seen their stock.

19729. What age do you buy them at 1-Tipre years old in the summer, and in the series, of course. they are coming four.

13730. I think you said you went to Ireland first 19731. Prior to that where did you get this class of home !-- Yorkshire ; we never went further than

Vodubies or Lincolnships. 19732. Do you losy any there now!--Yes a few ap to within the last year or two; it last got less and less, but I bought a few last year at the York ishow. 19733 Hear do was account for Verkubing falling to received that class of horses I--- Ever since I have been in husiness I noticed how the foreigners knot

beying young sures. If a farmer had a good colt we should key him; if he had a good tilly the foreigners would take it. They have been doing that for the last forty years, buying every good mare, and then the introduction of Hackrey stallices 13734. You think the breeder in Yorkshire has devoted himself to another animal!—Yes; if we go

to the district where we used to hav these solts we use nothing but short-tailed Harkneys. 12720. Are you particular in getting the pedigree of the horses you bay in Ireland — Yes; I always the to know it. I always inquire if I am haying in the south; among the breeders you can always ascertain it, but sometimes these collectors who have the colt brought as a two or three-vescold have not

taken much notice of it, and you don't always get it 11736. How are they generally heed t-Nearly always by a thoroughbred horse.

13737. Have you in your mind any particular

exceptions 1—There was a very good here called "Victor," which, stood in Kilmallock for many years. a thorough beed, a splendid borse for getting butters, and we had many of the stock too; he is dead now, but there is a young "Victor," called by the mans of Spillanch" "Victor." It suppose that was the owner; he is dead a year ago, hest "Victor" is there still; he is a son of old "Victor"; there is a little state in him. He is not in the steel back.

12738. Then the horses you hay are either by thoroughbord stallions or by stallions which are penetically speaking considered to be thoroughbreds? Certainly 13739. What class of houses do you buy in Nor-mundy !—Well, the houses there are not very large— 15.3 or 15.2 hands, and occasionally up to 16 hands,

but they are homes of a heautiful somearance, very the they are norms or a constant symmetry handscore, and spheridi grees.

12740. Do you know how they are beed at all !—
I connot say I so. The great thing in Normsuly for herese to troi in trotting moss, and these young bornes are tried before we key them, indeed they are here as entire becam until they are whether they are likely to make good racers, and if they cannot do six furlougs in a certain time they turn them over and

barn them castrated. 12741. You don't know what kind of sire !-- I cannot tell, but I do not think they are thoroughbred, but those horses have breeding, as far as you can judge by their appearance, indeed that is what we find, if we get them at all strong, they do not do at all, they must thow a good deal of blood.

very highly bred.

12742. Lord. ENUMERIZER.-Find them stay!-Yes; we have no complaint in that respect, then of course they are very earefully selected and apparently

a supply in Ireland as formerly of the class of carriage Mr. Winbest. horses you want?-Ever since I have been there the saying always is there are no horses, and our horse is a very source animal and always has been, but I cannot any that I think there is very such falling

12744. You have to give about the same price !--

12745. The price has not gone up t-It has not gone down for the best lorses, I think it has for the second class horses for I know they are less expensive than they were. I must say I think, if anything, the better class are searcer : people always tell you se 13746. I suppose you have been over a good deal of Ireland !-- I have.

12747. Where have you principally bought !-- The est horses in the county Linserick and county Cork. There are no good houses except in the south, it is no use going porth of the Boyne, but there are some very good horses bred in Month, some of the most valuable and expensive horses; but Cork and Limerick,

these are the good counties 12748. I suppose you tion't know the western seaboard of Ireland !- Sligo ; I have been there, but it is not a good home country

12749. Lord Enginerates.—Did you ever her any horses in Arreach !-- I have : but then must of the horses was meet with in Armagh are bought in the south as colts, and brought up to the north and there

fed very highly.

19700 Grammar.—And you think that the de-mand for lighter carriago horses is falling off!— What I meen rather is that we find that our old valuable customers, the nobility and so on, as they die off, the younger generation do not take horses in the same way their predecessors did. People now are more in the habit of just getting horses for the season. The old quatouer used to have horses all the year round, and that class of customer is rather

dying out 12751. In your business have you any horses, to your knowledge, with any Hackney blood in them? -I don't think so, an occasional one might be bought in Vociohire.

12752. Do you think it is or is not suitable ?-- I an very dead amuret i 19753. And why !- You do not get the size, colour,

body, or blood that you want. 12754. How about the action !-- Well, I have beard it and that these blood horses, bred by thoroughbred horses, are deficient in action, and of course if you were to buy them wholesale without care it probably were to buy them whoosase without care it proteinly is true as a general remark, but I have bought homes in the Seath of Tenland by throwarbland bornes with as much action as you wish to see, and it is a very very high, you may put them to work (there is no greater mistake than buying for action only), and find they have no action. You may hav a beantiful Trish horse who does not appear to have much action, but by the time you have him a faw years and get him seasoned you will be astonished to see him step; if they have not notion and lossa behind they

can never really go in front with weight behind 12756. Mr. FITZWILLAM.—An regards the assists of the Hackney, do you think his lags with his action are mod wearing bars!—I think I could hardly tell without seeing him, every horse differs in that respect, they may have good wearing legs, and no doubt you have to be very careful with these thoroughhred horses, they are rather spt to be deficient in that respect, not very good on their pasterns, and to be

a little defective there, and that is a very great draw buck to a carriage horse.

12758, When you were in Normandy did you see
any of the stallions that the horses you bought were got by !-I do not think I did, the man I went to see took me to the Government Depot, and I saw a good many of these military horses, that is some years ago,

appear to be siding horses; then you disappear of the breed in general !--Well, we would a perturba-12757. Lord Emmiskilling.-Did you ever hay any horse by a horse called "Mackintosb" in Irelandihorse and the Hackney is no good to us. into Yorkshire, I know the district very well, mised 19758. He was half-herd !- Is be. I did not know. and instead of finding a beautiful carriage hose, it He stands at Limerick. You know the home is a short-balled Hackney without the tooks we perbaps t 12773. Have you the same objection to the Cleve-13759. I have never seen him, but I have seen his

quite sure that I understand you.

attended any of the fairs is the North of Ireland at all !- Yee, there is a fair at Armagh and at the Moy animal that is now so source. It was beed from a every month, and I used to go and stay at Armagh Cieveland mare by a thoroughbred horse a good deal in those days partly because one of those men, whose connection had grown up, and whose I 15774. I think there is an actual breed called the Yorkshire coach house with a stud book i-Certainly. had sugaged to buy for me, lived within ten miles of here are a good many couch home sires in Yorkshire Armagh, so when I used to go down to see his horses that are not thoroughbrod I would stay there, and I went to this fair of May 12775. They have established themselves into a too. But I did very little at these fairs. It is a very breed now that, I believe, is considered by the York-

shire couch home breeders to be thoroughbred. They bud piace to buy horses in, for two ressorts, one isthat a good many of the borses there are heed in the have a stud book of their own. Do you like the North, and they are perfectly worthion from my ex-perience of those, and the other reason is shat the Cleveland Bays !-- I do not like a Cleveland Bay, er cortainly not, but I think the Claveland Bay is very men in the North, as a rule, feed their horses on heed blood as well. The Cleveland Bay is too heavy and slow by itself, 12776. A Cleveland Bay mave crossed with a can think of. The first thing a man does who thinks he will have a few horses is to set up a boiling machine, these borses are fearfully fat and soft, and thoroughbard have !- You, and then the stare should

almost certain to die on your hands. not be too heavy, she should have a little bleed as well. 12761. We have had some evidence given of this I do not think she should be pure Cleveland 19777. In fact, you think the thoroughterd sire is feeding system. I rather wanted to see whether you had found it can't. Yes, and this man who lives in the best to cross with saythungt-I do sant the North is well aware of that, and he does not do it; he is perhaps the only man who does not. 12762. Then the class of horses that you could pick 12778. You sot great atore by colour!-Yes, with other things. I would not lony a horse for his colons,

but it is a great thing to have a good horse with up in that part of the country chiefly come from the South, you say!—Yes, they do. In these fain in the Boath which are constantly going on, you will see a contingent of non-fron the North, a carriage full, 13779, Col. St. Quistin,-You say there are as horses that are any good purth of the Bayne that are level there. You have been for some years in Ireeightons or twenty going there regularly and baying land. Was that always the case !-- Of course you see the young horses, and beinging them back and fooling them in the way I say; that is a very correlarable

experience, and I have heard men like Daly, whom tends, therefore a great many of these horses that are shown in the Mey and Arreagh are horses from the you may know, who have for the army a good deal, I have beard him say he would never buy a horse 19763. Mr. La Touche.-You say that many o north of the Boyne. these horses you buy in Nomandy are 15.2 or 15.31 12780. Can you in your own mind, give ony reason 19764. There are plenty of homes with action tion of other blood !- Partly. The South of Ireland is nearly all great—a delightful country for grasing by Hackney stallions of that size t... There may be

but when I my 15.2 I mean better with length and ends, not little short Hackness. horses. They can lie out all the year round with advantage, the temperature is so mild. In the North 19765. You get great store by blood on the sire's it is nearly all amble hard, in little small farms, and side t-I do. it is very much coltivated. In addition to that, the hest thoroughbred sires are in this south. They have very few sires good for moch in the North. 13761. Sir Watersn Grager.—May I sak have you 12766. In your objection to these Hackney horses then their conformation 1-They are not the horses that we want; we want beautiful, superior, lengthy had any experience in breeding sires yourself i—No. 19783. When you buy horses, so long as they are horses, such as you would put into the Royal carriages. 12767. These are horses over 15.2 and 15.31—Yes.

but I say 15.2, from that apwards, the horses we get in Ireland and Yorkshire are generally 16 hands. of the shape and make you want, and spand; you are not so particular as to know how they are bred!-! 19768. I wanted to know in what way you con-sidered the Normanny horses of 15.2 hands were superior to the Hackney houses of 15.2 h-Well, when always like to know, but you are quite right in the view you take. I have been told by my father that besid not like my finding out. He said, "You are apt to say 15.9, for instance, when I was there this time he prejudiced in favour of the blood. You better see the animal you want, and not mind that." But I think we beight twenty horses there, out of those there were perhaps four or fire that were only 15.2. at the same time, no doubt, it is a very important thing, but others were more, 15.3, 15.3\frac{1}{2}; slay run more than

so I like to know how they are herd.

13783. You don't find the same difficulty now in goiting herem for your business that you did, going that, but I find if we get a big one we make a min-take, if he is ever 16 hands we generally find he does back ten or fifteen years ago, at the time of the 12769. The Normandy ones i-Yes, they become France-German War when there was a great searcity of horses throughout the United Kingdom !-- I do not heavy and slow. 19770. You have not really got much personal know that we have found it. About what date wat experience of the Hackney horse !-- No. because we

19784. 1879. I think you said you commenced buy-ng in 18716—Commenced buying Irish houses in 1871. 12771. They are not good enough looking !-- No. they are not carriage horses. We found no difficulty, indeed. We increased our Printed image digitised by the University of Southernoton Library Digitisation Unit

Printed image digitised by the University of Southempton Library Digitisation Unit

stock very much from that date onward, because my scools were still hoying in Yorkshire. These horses I bought in Ireland were extra borses, and I found every year the extra number we bought were let, so we kept on going. Our stock was larger in these

19785, Have you had any experience in Canadian or American or foreign horses generally t.—Very little in Canadian. I have a great horser of American horses. I have had one or two pretty good Canadian,

hat I do not think it is a trade likely to do very 19786. You say you think very invourably of the Normandy horses i-Well, as far as my experience of them goes. Our horse is a scarce animal anywhere : you cannot go and huy them wholesele, either in

Someondy or anywhere else, they require careful assection. The first year I went I hought these; they sake a great deal of finding, and it is only here and there you get one.

19767. Were you inquisitive to know how they
were heed in Normandy I—I did ask the question, and

I generally found they were heed by some tretting 15788. Are you aware that the foundation of the blood of this Normandy horse is the Norfolk Hackney!-No, I cannot say I know anything about how

13789. Well, I have made inquiries in various parts of France where they have feeting races, and you will see at the Asyns there the pedigrees of all these horses; no difficulty in getting them; you see

that they got "Norfolk Phenomenon" over there. Sir Watren Genner,-No! no: 12790, CHARRIMAN,—I think Mr. Wimhush said be

did not know how they were heed?-No, except the man tells mp-be mentions some French horse-I do not know how he is beed 12791. See W. Gillery.—You know nothing of the Yorkshire supply of horses previous to 1871, your experience only goes back to that date !--Oh, yes; a

great deal further back than that, 12792. Up to what date back!-We will see 19793. When you bought horses at that time in

Yorkshire were not many of them got by the very horse you have alimied to ... "Norfolk Phenomenon."! -I do not think so, as for as I could tell 12784, Mr. Wannen. - Your teads, Mr. Wimbush, is rather a special one, you only go in for a big, lengthy, blood-like carriage home —It is special

in this way, we only go in for a very asperior carriage borse, but not necessarily a very hig one. 19795. You don't hay them much under 15.34 5-No; true enough, that is onite so, 15.24 to 16.1

cellectors, I suppose, practically, the neu you buy from see dealers !—Well, they are dealers in a certain sense; for instance, the man that I was most connected with in Ireland, I met him occasionally in the furs, you know, and knew that he was a man who lought cells and took them home, and what he used to do when he got home. He lived near Armagh, and his anighbours used to come round next morning; he would perhaps bring twenty colts home, and say to these men, "That is for you," and "this is for you," and show what he had given for them, and they were to give him £5 more, and they did not pay him until they sold them. Then I made his acquaintance, and got him to promise to give me his colts. I used to visit him, and he would take me round to these farmers, and if I saw a horse I liked I bought him.
When times became bad these farmers became become and falled to pay this man. I told him he would less his money, and then it came to this that I went to see his horses in Dublin before he took them to

the North, and take two or three, or none, as the

Printed image digitized by the University of Southempton Library Digitization Unit

case might be. Afterwards he took them home, and Move II, 1861. I went there and now fifty at a time, but he would me Wieshall not sell them until I saw them 13707. You would not call him a dealer t-Well, you may. What I left he sent to Lincoln or some other fair and sold them.
12786. When you are alluding to that one man

you are alluding to him as the cheft man with when you do business in the North of Ireland !—Yes. 12719. And he lives fairly close to Armagh !- Ten

12500. I darmay you remember being in some of tha fairs in the South of Ireland when "Victor" was

12001. If all the horses that were said to be by "Victor" were really got by him how many mates do you think he must have served in a season !-That say have been so. I know you have to be careful about that, but at the same time I know Harris very well indeed, who owned "Victor," and I knew all these farmers, and indeed I got my information from Mr. Harris. He said "There is a 'Victor' colt so and so has got."

12892. But it is a fact that a large number were said to be by "Victor" !-- Yes, it is extremely 12803. Do you know the poor districts in Ireland, outside the district you mentioned, at all, I mean on

the west coast of Ireland |- I do not know them well. 12006. Have you been in Donegal !- Yes, but not horse-buring. I have been there fishing. 13800. Have you been to Contonara and Ashillit -Yes. I know Contenara very will.

12505. Fishing t—Yes. 12507. But not buying horses t—No, I naver saw

a colt there I would buy 12808. You don't think the meres in that district could produce any animal that would be of use to you !- Certainly not. 19809. Can you give may comion as to what would be the best class of animal to grade up the

pour animals of that district?—It is not a subject I am supposed to know anything about, but considering the nature of the country I should imagine the most useful horse would be a nort of pony. 13810. Would you think it would be necessary that whatever house you introduced there should be

very hardy !- I certainly should. 12811. The conditions are very poor !- Very ; they lie out on the box 12812. Mr. Cansw .- You don't think the Hack-

ney would be suitable there t. I should think not; they want a rough sheltle there. I should think the Hackneys are delicate, but I do not know anything 12815. Mr. Wansen.—You would not say that the Hackney was not suitable from your knowledge?

-If I had to give an opinion I should not go to the 12795. And when you talk of buying from the Hackney. I think a strung or rougher Shetland or Iceland peny would sait the people 13814. If it had been proved that the Hackney stock were partitularly hardy would you still object? -I don't know what the Harkney is good for. They

want semething strong to draw their carts about.

12818. Is not the Hackney a great deal strongs than the animals you have seen in their carts [...] don't know that they are, if you ask me. I am not an authority on such a subject, but I should not think no if you ask me. 12816. You don't think the Hackney is a stro

azimal than the azimal you saw in their carts 1-2 not hardler or stronger or more mitable for their 12817. I did not say hardier, but stronger !-- I

hould not think he is, not to draw weight. 19818. Have you any idea what size their animals are !- Those I have seen are small, thick, strong little things

12819. What size !-- I think about fifteen hands. Printed image digitised by the University of Southampton Library Digitisation Unit

12836. And if they still went on breeding home Merch 11, 1807. 12810. Do you think they are as much as that !-Perhans must of them are less. I should think that 12836. And if they still went on breeding haves you would not give them any help!—They will get

COMMISSION ON HORSE BREEDING

please without any help; there will be please of had

probably the porest men i-But I should imagine the object of this Society or the Government would

road thorozenbred sires; I don't know how you are

to keep the good march in the country, but my one

certainly put good thoroughbred sires there, that in

through the subject of mares, how you are to manage those. The old hunting Irish more is a wonderful animal: they are rather source now. I have seen

beantiful colds from them, and though they are not all very handsome, I have no doubt they have plenty

if you buy none that have not, you must be very

12841. That is what makes your trade com-navatively small, as I understand it, about rielys-

or ninety horses a year 1-Yes, may be so.

there you would prefer to buy them than in No-

12645. You want both!-When you get the good Irish horse there is no better horse in the world; he Irish horse there is no power serve in to come out is very handsome and heat, he begins to come out when other horses are soing off. You may buy a

Yorkshire horse and an Irish horse, both in supersuos

the same, and you will find when you have the Yorkshire house two or three years his legs begin to get gurrary, while your Irish house is only beginning to

me out. 15844. Do you attribute that to the soil and elimate,

or the way he is brought up !- Partly to that; more

especially to the blood.

12845. CHARMAN,—I take it that your visits to

the West of Ireland have been more visite for pleasure

give an eminion on the cornective of that country from

a fishing than a horse breeding point of view !- Yes,

12846. And you think yourself name competent to

12847. I take it you buy your horses wherever

ron can flud thero-Normandy, Yorkshim Kastathatka, or anywhere the!-Though that is so, there are only four places we go at present for them;

we are open to go anywhere we can get the right

12848 You moutioned Yorkshies, Ireland, and

Different businesses have different practices;

four, and we find practically that by the time the Irish

bornes get to be four years old they are gons either to

Normandy, where is the fourth place !- North of

and fishing 1-Yes.

13840. Your experience in buying harness horses in Ireland is that they have action enought-Yes;

of blood; they are very strong with short legs

be to get some good horses into the country 12838. Yes, but how would you do it !-- By having

itself would be an immerse belo. 12859. And there is no other step you would

hovers whatever you do. orses whatever you on.

12837. Those men who have the bul horses are

Mr. Windows. is the cotteids size for them. 19891 Von have no experience of the lower class of harness trade below your own trads !- No, none at

432

19899. Do you think action is a consideration in selling a small barness horse !--Oh, yes : I don't think

any horse is good for carriage purposes unless he has

12823. But a small horse with action will sell at a

very much higher price than a small herse without

section t....I think he would but it is very important that a small horse to be valuable should have a good deal of bone, and a good deal of strength.

12824. Do you dislike the cross of the Suffelk Pauch

or Clydeschale in your horses i-Most decidedly; I abject very strongly to it. Clydeschale blood has been

introduced into the North of Ireland : it is most 12825. Do you know that there is a good deal of

sorry to hear it if it is so, it is very injurious wher-

er to us. 12826. Have you heard anything about American orses being brought over to I reland !-- I know some

Triabmen have been over and bought some You don't know that any horses are sold now as Trish horses that really came from America !.... No: it has not come under my notice.

12838. Do you think that many of the people in your position, dealing in the clear of carriage borner that you buy, have also goes to Normandy and other countries for their sweetles 1—Possle in our business

-there are not very many in our business in an extensive way-but I am aware that one firm has

12823. Gone to Normandy 1—Yes. 12820. When you were attending fains in Ireland was the proportion of good horses so bad horses the largest !—Oh, the had ones, you might go to Mullin-gar fair, the streets would be crowded with horses,

and it was a marvel to use whatever these borner could go to ultimately, with the greatest care and emertion, and knowing people if you got one or two exertion, and knowing perper is judged and generally it would be as much as you could do, and generally not that

12831. Then in any expenditure of State aid do you think the people who breed the bures that you want are those to be encourand first, or the necessithat breed that rubbish which you see in the fair -The people that supply the horses that we want.

12832. You would say "help the rich people" t-Not the rich. I would halp the people to get rich. I would encourage the farmers to keep a pretty good mare, and then if they can breed a colt that is worth

at four year old without any risk to them, it must be more profitable than breeding these little

wretched things that are valueless.

Germany, 12349. What class of action have those horses you 12813. Do you think a thoroughbred home would buy in Normandyl-Very good; good all round. That be the best horse to oross with these marva !- With can not only step well, but go most excellently on a good mere.

their hind legs. 15834. I am not talking of a good mure, but of the 12850. I understood you to any that they are bred for racing purposes !-- I rather believe they wrotched mares !- I think you manot have anything

to do with them.

12835. You would not encourage them at all !-- I 12851. But as to how they are bred you don't should not. know l-No.

Mr. Witness examined.

12852. Charmax.—Are you in the same class of they buy horses, as be has told you, as three years old, and our practice always has been to buy them at

business as Mr. Wimhush!—Yes, my lard.
12853. You have heard Mr. Wimhush's evidence! -I have —I have. 12854. I was going to ask you whether you gene-rally agree with that !—Yes, I generally agree with

Mr Withen

Mr. Wimbush or someone who has bought then all Mr. Winsbush, but if you sak me as to a point or two. In the first place we don't buy to many horses in Irethree years old, and turned them away in their own particular line of bosiness.

Printed impee digitised by the University of Southuracton Library Digitisation Unit Printed impre digitized by the University of Southernston Library Digitization Unit

12805. Where do you get your horse mostly b-We got about a quarter from Ireland; we replace about a counter-we replace in our braining or nearly as possible 200 horses a year. I am speaking now ast of the hinter trade, because we key hutter as well, and three me almost all bought in Ireland. 12856. I will ask you a question or two about that after wards i-We replace about 200 horses a year in our stock-that is, in the ordinary course of things 200 herses get either worn out or incorably have or meet with accidents, and we key about 200 and sell shout 200. The 200 houses sold go to Aldridge's, and are sold as horses without any warmanty or any neserve. We don't sell carriage horses privately; there

may be an ecceptional case where a customer says, "I want to buy that here," then we pat a good, fair price upon him, and get it. 12857. Of those 200 horses you get about a quarter from Ireland !- About a quarter

12858. Where do you get the three-quarters !--- At English fairs—York, Hernessels, Lincoln (that is a large fair), and other English fairs. 12859. Do you require a pedigree, or do you know how those horses are bred that you buy !-- Whenever

I buy a horse I say "How is he beed!" and I make a note of it at the time; but you cannot always get persect pedigrors about homes-people don't then-emloss you buy then from some English former who has level the home bineed. I had a lard week's travel the week before less for instance. I went from London to Hanover, where I hought six horses; from there I went to Brussels, and did not her anything. From Betreels I went to Ghent, where there is a very large dealer—one of the largest dealers in the worldnumed Schmidt, and I bought four horses of him -one a French horse (which was the lost harm I hought al) through nov journey) and there American horses. That man less a buyer in Chicago, and be gets consignments of American lumes; he is very food of American horses. I bought three Americans, and I sau quote satisfied now that they have come bone and the French horse. From there I went to Lille, where there is a very large dealer, named De Longueville

I did not buy anything there. I went to Puris and spent a day there, where I now a large quantity of Numan horses. I boards two horses—one a Ferry's here and the other an American horse. 12950. A good number of American bures find their way there i—In Paris I saw a great number of Irish horses—at Lille I saw strend Irish horses; of Ghent I did not see any. 12501. Do you know at all as a matter of fact how

They are supposed to be-they are as a sule by English theroughbred heesen. 2553. Have you any preference : would you prefer other sire !- No, I don't know that I would. I belong to the Hunter Improvement Society, and we are very

particular about our thoroughbred horses, but if it is a well-bred English borse I would not say I would prefer them then, there are so many good berses in Regiand that are covering that are not quite thorough 12863. How about the Hackneys !-- I have had no

experience of them. I saw some very beautiful Hackmay beenes at the show last week, and I admired them very usuch : but as to their working espabilities I know nothing, and I am not aware that I have over had in my stock a horse that has had Hackney blood in him. If I now a home that was my type of home—a Hack-ney is sure to be a good goer—but if it was my type of horse, if a man told me it had Hackney blood, and I thought his courage was good and his other points were in my favour, I should not heritate though he had got Hackney blood, but at the same time I have no experience of them. I have never seen a Hackney horse that was quite what we call a Loudon carriage

13664. You sell hanters too!-Yes.

12505. Is that a large branch of your business !— Yes; I should think my brother has brought from Isoland 160 hast year, all bought in Iroland at the Dublin Show and other places 2867. Do you hav all your hunters in Iroland!-Yes; that is the number of Irish hunters we buy. 12868 You bay them elsewhere 1—Yes, a few else-

there, but not many 12369. Principally in Ireland !-- We always think that is the house for hunters. 13870 What age do you huy them!-Four, five, and six if the horse has a good character

12871. Direct from the breeders!—No, we hay them at the Dublin Show, perhaps get a few direct from the breeders; but as a rule they are bought from dealers who have bought them from the farmers. 13973. Does your brother 20 over himself, or do

you go over !- My brother always goes; I don't know 12973. Where does be huy them do you know !— From Widger of Waterford; you would know him by

12874. In the South of Ireland 1—Yes. 12875. Have you ever bought in the North 1—I

think not. 1:1876 Do you consider Ireland produces a rather supersor hunter?—Oh, yes.
12877. Me. Fyrnwilliam.—You seem to think that the Hackney would not be likely to breed the type

of carriage home you require !- Well, I think not, if like produces like, and it is supposed to. I should not be at all sorry to see some one try the experiment, but I have had no experience. 12878. You don't want to try it yourself !-- I don't want to try it moved. Before you get a borne to our type, hereding him myself, I think I should have to it is not there, but if like produces like then Hackney is not the horse for my husiness much as I adjaire them and their action. 12879. Do you think that the Irish hunter as he is at present is the best in the world !-- I think so,

that is my opinion. I have been what is called a bracking man more or less all my life, and that is my 12880. If you think that, I suppose you also think that the introduction of any new blood into that hered would be risky !--Oh, certainly, a risk, but I am not going to say it would be a failure. 1288). But it would be a risk?-I think so, as it

would be in changing any type of bone. 12882. Lord Eventualizes.—You say that because most of the burses you buy in Eugland are beed !you have no experience of what work a Hackney can do !-- I have no experience. 12883. Therefore it is merely sarmise !- No ; I am

not cuits sure of that. I only my that I would not like to try the risk.

12834. You would leave well alone !-- It may be some risk to arrive at my purpose. I have only my

12885. But with regard to the Hackney, you have no experience, and therefore it is only your opinion ! -I have no experience.

1988). Lord RATHDONNEL,-Why do you dishke the Hackney type of horse t—I am only saying that I delike him for my business; he is not what I call a London carriage horse, and I here always in my valud what is the London carriage horse.

12887. CHARRIEN.-I think you said you ve neb admired the horse !-- Very much admired the

Hackney as I have seen them at shows 12888: Lord RATHDONNILL-I understood you to say you did not like the type i-Not for my business.

19889. Then you admire his typet—Very much as a horse. I new some beautiful horses the other day at the show, hat I did not admire them so much as the thoroughbred bornes that were there at the

Mr. Wilhers.

horse because he has brought grist to my unit by hreeding good carriago bornes and good hunters.

12810. What do you think the Harkney then is fit for by his type !— For hanness purposes. 12891. Altorether !- I have no experience of their 12873. Did you ever attend any fairs in Ireland !-Yes, I was at a fair once in Laurrick, but my brother goes to Ireland and goes to the different fairs, and he always attends the Dublin Show, and knows a great

number of people in Ireland. 12893. You have no experience of the fairs?-No. 1389; Mr. La Teuent, Have you much ex-perience of the working of the Hunters' Improve-ment Society, Mr. Withorn'-I have not had very much experience. The Society is an improving one of its kind, and more members are

conduct in. It receives a greater amount of support than ever it did. A greater number of members have joined this last year than I think ever attended. in one single year, and I think if it did not give satisfaction in the country—the working of it-that 12895. I gather that one of the parts of the scheme is that they subsidise thirty-two stallions that are allocated to districts in England, and they subsides them to the extent of £150 a year1-Yes

12896. Do you think that is sufficient inducement to hold out to a man to permit his howe to cover it could be done, I should give those another £30 each, and make it £100 instead of £150. 12697. You think you would get a better class of stalling ?—I think you would; I think it would be a greater indocurrent to a mon 12870. Have you formed any idea of a fossible plan for keeping mures in the country !- No, six my first fair was forty years ago, and that was when I was sixteen years of ago and I said to my father,

"Who are these funny-looking men who are at the fair here?" He said "They are foreigners; they have been coming here now for a long time." He said, "You will find that where an Englishman will give £50 for a more—if he can get hold of a good one— the foreigner will give £50," and, as far as my experionce has some, that has been proofscally going on ever since, and a great number of foreigness come 1989). You consider that, possibly, the best way of improving the breed of bornes is to try and improve the stallions as much as possible, and to put good stallions within the much of the furners I-As much

an possible; and as a rule the foreigner burs the best mare; he does not buy the worst ones. They have the money, and only want to find the mares, and are quite ready to give money for them. 13900. It would be very difficult to induce the farmer to keep his best mare!—Yes; it has been each by a great minuter of people, "While the fereigners come, all the better; they disserrimste money in this "There are different ways of looking at it I know they spend as enormous lot of money in Ire land in muses. In two of the places I were to the week hefore had, one man's see was in Ireland and

the other man's partner was in England.
19301. Sir W. Genera.—Your perchases in Treand are principally for bunters, are they not !-12902. You said one-fourth came from Ireland !--About case fourth for carriage horses; but all our

hunters-with two or three exceptions-are bought in Ireland, and they have been bought by my

18903. I think you said 200 horees you purchas in the year, and about one-fourth from Ireland !--12904. One-quarter of extrings horses or hunters ! Printed image digitised by the University of Southampton Library Digitisation Unit

Printed tinase digitised by the University of Southampton Library Digitisation Unit

became I know nothing about them. I like the Hackneys from their action and their type, but that does not happen to be my type for a limiter or corning 12906. My question was whether you had seen suranimals bred by the Hankney out of a thoroughboot more or a hunter maro !- I have not; it has not come 12007. Sir Trionas Esnoran.-What would war definition be of a first-class carriage horse !- Well, a

hunter mare-barouche horses !-- I don't think I have, Sir Walter. I don't deprociate the Hastney,

fact-class carriage herse should be a well-bred hour with a good basel and neck, and good shoulders-not such good shoulders, perhaps, as you want for a saidle, but with good back and loins, and shall fill the burgers 12908. Are many horses of shat description bought in London from Ireland, speaking generally!—

No; I think not. The Irish horses that find their way to London are either bought by people in my own business or by dealers who buy three in Indeed and bring them over here; that is the only war carringe horses come here to be sold. 12900. Then you said there were not very many

horses-is thus what you move !- That are sold in 12910. You mean there are not very many first elass carriage horses imported from Ireland to England i—They are imported, but they don't find their way to be sold in London. They are brought over by Irish dealers who take them to fairs. You cannot go

at is in some very remote district.

12911. What sheet of horse do you think the most likely to be a good carriage horre, must be have a good deal of blood in him !- Yes : blood and selectance. Of course, as a job master, I have to horse different covringer, and if I bought them all one type of covringe house I should only have a certain number of customers for that particular home; you must buy your homes 15.3 to 16.3 or 17 bands, but as a rule they are bought of one type. 12912. And generally a large-circl horsel--Gree-

rally a large-sized large

11913. Sir W. Ginner,-Going back some ten or twelve years, there was a great scarolty in the United Kingdees for your purpose after the Franco-German war, going up to eight or ten years ago; there is not the difficulty now to get the horses you want that you had then !- There is not the difficulty now to huy the horse that there was ten or twelve years ago. 12914. That was previous to the societies that you know are in existence now being established I-Yes 13915. And at that date back you were obliged to go abroad mostly for your horses, to America and Canada, were you not to. We went alread a great deal. and for four or five years we had one buyer to Len

ington, and the other buyer in New York, and we because the supply is better in England and partir because the supply is not so good there—and they are quite as dear there as they are here-we have dropped off buying so many American horses as we did. 19916. And although there is a detrease in the number you buy now in Ireland, you could not get the name number of horses from Ireland at that date

I presume !- I don't think it has varied so much. 12917. But you could not get them in Yorkshire or England!—No; we used to say that if we had hed at that time to have kept our enstorers emplied with English horses we could not have supplied them with English horses; we went to the best market we could

to America. 12918. You will look forward—I hope you will do —to, in future being able to huy your boxes in the Carriago horses only.

15905. You have remarked your appropriation of United Kingdom instead of going to Austria or Hancery L.-We don't wrent to so to America or to so. alread if we could only buy them in England or Irelend, but American becaus at that time town very dear. I remember buying ten horses that just come of the best at Liverpool, and gave £110 a-piece for these. I locarho ten American horses oven at Lella in France, from a man who lad gone over to America and oute us the first refusal after he returned....then cost £110 a piece. 12919. Was there any pedigree with those horses

do were boow how they were bred !- No : was sould egald not tell. 12920. As long an they suit you you are not so portigodar to know how they are bred !- No, we would

on the land the breeding if we could. for that cost you £110 a-piece !-- Carriage hower. 11922. Dan they turn out well!—Yes; the record of our books show it was a very good purchase, the

ten at Liverpool and the ten in France.

12023. Mr. Wincron.—Have you any experience of breeding horses !- So far as our experience of breedmy horses it has been rather disasteous, because it has been from favourite mores that have been in the stock, we use very few mares in our barrons : lest my beother said: "Well, there is old Duley there, let us breed from her before the has got very old," and two or three other mores we breed from live that, but we have been unfortunate with them, and two or three hunting mores I have yielden myself that I heed from

I am one of the unfortunate people in breeding, and so I have given it up. 12524. What close of sires did you use 1. Theroughbred beesen for the hunters, and our carriage bosses were generally by one of the Mr. Burchett-Contis'; I forgot the names of the horses. 13935. But they did not turn out well !- They did not turn out well became we had not got proper

12925. You have been abroad a good deal keying herest -- Not a great deal. 12127. Have you keen alread to more than the places you mentioned; did you hay from Mr. Opper-helmer 1—I hought those six from Mr. Opper-helmer,

but they were not German horses. 12008. He has a very large establishment 1... Yes. 12929. And knows the borse trade of the world i-Well Dorman of New York used to be the largest dealer in the world, but he does not sell so many now; then came De Lengueville of Lills, and next was Opposhetmen; now I think things have changed and Opporbatrace may be considered the greatest dealer in

19900. And he been his horses all over the world? -Yea, from Busa's 12031. Russian horses are very cord indeed, are

they not !- Yes, they are, 12132. Have you ever heard when you have been strond how the French Government brend their horses!—No, I have not; I should like very much to

so to some of their breeding satablishments; I have citize not had the time or not come across them.

12038. You don't know that they breed a good.

Naar artillers and cavalry bores from Hackneys?—

12934. Do you know whether there was a coniderable sale of good Hackney stallions at the show het week !- I did not hear that. and week :—I did not hear that.

12935. You were not haying any yourself!—No.
12936. Do you distile the blood of the Saffalk
Punch or the Clydesdale in your horses!—I am very

first of a good Norfolk home or a good Suffolk home if I think he is a good one; it is not quite the type of the Suffelk Punch, because the Suffelk Punch is a borse with more crest, there are many good horses beed in Noefolk. 15937. But I am talking of the Suffelk Punch, the big chestant eart-horse, do you like the blood of that

in weer horses !- Oh. no.

13989. But if you were buying horses would you profer that they should have a strain of Harkney blood in them to a strain of cart-horse blood for your urpeses?—For my purposes I should say yes, but I have no experience of their from what I have seen of the two types. 12940. When you come to a lower class of harness

horse, but I don't like the blood.

horses than you buy; do you think the Hackney size would be a suitable horse to produce those horses !--Well. I should very much like to see the systems of come becoding before I ventured an opinion on that 12941. Do you think the Hackney borse would get

action !- Yes; and my own opinion would be that Hackney blood in horses not quite of the carriage type, but horses for onlinery purposes, would not be undescrable, but I could not speak without experience. 12042. And in the lower class of harness horses in

action of great importance !- If you get a horse with 19943. I mean recent us a matter of f. a. d. 1... i.e. matter of £ a d. action is most desirable. 13914. In it the thing that pechaps tells most when

or come to dear with the source to access 1—Yes, cortainly.

12945. I think you said you were a member of the Hunter Improvement Society i Yes.

1926. Can you notice at all whether there has

been my improvement in the breeding of heaters in Broken direction the introduction of the Borietz L. Ven. with I had my records in inv own mind, from time to time, seeing how is that home bred and this home, looking at the hearter and the registered maces; I hear accounts of them, but I don't go to farm-houses

12947. But you think it has done good?-I think so; there was a great growd of persons at the Hall resterder, where I was acting as referen judge. great number of farmers and people were there, they come these pretty regularie, and I don't think they 12948. World you suprove of subsidising half-bred stallions heed on not quite each enclusive terms as

the half-beed stallions you admit !- No, I would go for the thoroughland home first, but there are a custom board of bornes that are called resistant 12045. Under what conditions !-- Under our conditions, but then they have to have certain pedigrees. 15950. But would you relax those conditions at

sill—Well, do you know I think I would, for my purpose of borne. 1205L To what degree!—Well, there are many homes that don't get quite near the registered hunter

sire, which in my outnion would be as good for my purpose.

12952. Would you require any certain number of ecomes of thoroughbord blood in such steen b—I would not for my response, but for the Hunter Invervement

Boolety they are very jealous of bleed 1995). But for your purpose you would let in a ower class of horses !-- For my purpose I would nower case of houses to For my purpose I would. 1995. CHARMAN—In what you say about the hunter sires, are you reterring to Ireland or England or both!—I am referring to both.

12955. The remarks you make are equally applieable to both countries 1-Quite.

12956. In your business do you deal at all in what has been called the lower class of harness heroma i No; we find that our horses, hought as good as they can be, got somehow with wear into our lower class; our endeavour is to keep the standard up as much as

12957. I wanted to ask you whether, in the opinion on have given the Commission in reference to the over class of harness horses, those are opinions that have been derived from experience in your business?

3 K. 2

has been no marked change in Ireland as regards the March 11, 1807. quantity or the quality of the horses you have for trade I have seen done with the lower class of Mr. Withers. busting purposes 1-1 think not 13064. Would that apply also to the horses you 12953. In that you have bad no practical er perience !- No practical experience. I never dealt in buy in Ireland for carriage purposed -- My scince. about entringe bornes in that we don't get quite as 12959. Can you tell us at all whether the supply of hunters in Ireland is falling off or increasing !good horses as we used to, that is my firm opinion about carriage hones. 13965. Can you account for that !- No. I carmo. Well, I am not ouite certain about the murber. I should like to have looked up the number of horses enough for it, it has not come within my mystines that were experted from Ireland now and had been. 12966. I suppose motor cars and bicycles do not affect your trade at all !- I am not your that they I believe it is on record somewhere. 13960. I was asking you rather from your own ex-perience as a layer !- You can always go and buy have not. Persons that used to get three larger new only get two. For instance, a lady and to our your hunters, but a first class home is a very difficult manager the other day, "We shall only take two horses into the country this time because my dampitors ride bicycles and go out to ten parties ten thing to meet with and always commands a great deal of meany in lavland or twelve miles, and we will only tuly two horses 12951. But do you think there is as good a supply now as there was ten or lifteen or twenty years upof 13967. Can you form any opinion as to the practi-cal steps to be taken in Ireland for the improvement 1992. And you think the quality is as good!—I can only find very few. You see some beautiful houses come here from Iroland, and you wonder where all ?-You I have thought about it in this way, or they come from I mean that are bought by English Mr. Wimbuch said just now we see a lot of had herees in Irviand and the way to improve the breed dealers, Steken of Market Harborough and other dealers. They are got as a rule from people like Mr. Widger, Mr. Morten of Bellymens, and other large is to keep better mores in the country. I don't think the fault is in the thoroughteed horse, it is the more hayers, who buy them from farmers and under The foreigners have taken them us ay from Ireland then and then they are ready for the English in the same way that they have taken then from England. A great number of horses go from the 12963. Then I toke it that in your opinion there Mr. HAMES consumed. could only find them. The difficulty is in finding Ms. Breses. 12548. CHAIRMAN.-You See in Leicester !- Yes. 12081. There is no likelihood in your coinion. 1206p. And are enpaced in home dealing 1-Yes 12970. What chases of houses !- Nearly all of that if the supply was considerably increased the them hunters. 11971. Where do you buy your houses?-Nearly all of them in Ireland. 12882. I suppose you buy some hunters in England - Very tew, but I am very pequaliced, and these which I do buy, if you could true them, are originally high horses. There are very few English 11972. Do you buy them yourself i-Not for the last few years.

COMMISSION ON HORSE BREEDING.

430

laceses bred 13973. The whole year round! Does he buy for 12083. Are you particular about ascertaining the breeding of what you key in Iroland 1-As for as I ron from the farmers repeally !- Yes, as far as possible I like to save the intermediate profit between can possibly. I never give a poligron unless, really, I buy from the farmer. You know you can trace the 13974. How long have you been buying horses in Ireland !--Well, since I first commenced--1873, but strain if you buy three or four horses by one sire. You can always trace the strain if the horse is my father and brother bought a few before then, but nothing like so many. I resember going to Ballinapredisposed to a curiv book. A great many of the tock will show it. sloe fair-I can't tell you quite what year, but it 12984. How are the horses-by thoroughbreds !would be two or three years before then. Yes. I mean the thoroughbord ones are the good 12075. And previous to that do you know where ones, but still there are some very good horses that ner hunting horses were bought-what part of have a stain in them. There was a very good sire, "Delight," who, perhaps, got as many good horses as any hunter I ever resember, and I believe England !- Our business was nothing like so large, het my father had always a very great liking for the Irish horses, and he always bought them at our fairs. he was not quite thoroughbred. You might remember "MacIntonh." I don't believe he was putte thorough A very much better class of bosses came to our fairs bred, but I would always buy a horse by him, and I 12976. To English faire1-Yes think "Mayboy" was much the same. I had as good 12977. As to Ireland, do you think the horses have a horse by him as a hunter so any horse I ever rode

improved in your experience or deteriorated- I mean Lord Exercentary .- "Mayboy" is almost thuroughthe class of horse you buy t-Well, I think the class is very much the same, but I think it is far more bred, the same as "New Oswestry 12965. CHARRARY.-Do you know snything about scarco. I think that is because of the consumption. the Royal Dublin Soriety's scheme !- No. not because of the production. 1996t. Do you think the introduction of Hackney 15978. The demand is larger !- Certainly blood would be beneficial in any way in the pro-19979. And the supply, purbage, about the same !

—Yes, of course, the really good horse is so very diffi-cult to meet with, but I think that is more because so tion of the class of bunters you require !-- I think it would be very ruinous.
12587. You would not approve of it!--By no many people go to Ireland, knowing what very good means. No worse thing could possibly happen resu there are there. 12950. Then, I take it, in your opinion the supply 12988. Do you equally disapprove of the strain of the Cleveland Bay or the old Yorkshire coaching has not kent up to the demand-that is to my. horse !- Of the two I most certainly would rather have demand for a larger number of these good, high class that. The weight-carrying horse, especially in Yorkhunters is greater than can be easily met with by the shire, in days gone by had a strain of this light-legged

ourt bores.

supply 1—Yes. I could sell a great many more if I

Printed image digitized by the University of Southernation Library Digitization Unit

housing patient. I server buy a real typical humans here. I don't like them. They are not the sort I am able to sell. I always like a himiting hurany horse. 1990. At what age do you buy these hunters in Testand i .- I like to buy five-yourselds, but I have to hey a great number at four, and I keep them out in heland. I never missa good four-year-old.

12391. If you buy them as four year-olds do you locus them in Justand !—Yes, a great number. Heave them with two or three formers—one in Kildare, another in Meath. Then my own buyer is a capital horsenses, and he has stabling for shout sixteen, and hospitance, and be less an opportunity to go to different houts, and then he is able to have a home

that he sees going and knows it is a horse of some character. When they become fit then I have them character. 12003. Do you know whether he buys any in the North of Iroland !-None, very parely. If it is there it is only a very very rare exception. They are all or at casty a very very ture exception. They are all

larges keed in the North, but very few.

19003 Thru we may take it fiven you that you that that the South of Ireland has in some way attained a certain amount of pro-cumboses in preducing hunton b.—Most certainly.

1994. To what do you attribute that b. West of all, I think the blood you get, there are no horses so purely bred as hunting larges, and then I should think whether it is the subsoil or not I don't know but they are able to maker them as young ones with montre home. Then I think whether they are

trained from their youth to jump or not I don't know, but I often said that if I bust a really good English borse I would send him to Ireland to be subscied. because they jump as many as to crity feaces there to one in England, they seem also to use their feet 12005. Mr. Firswilliam. — I pather from you switteness that you require a highly courageous and highly heed horse!—You, they are no use without that.

12996. And you consider that the threoughbred blood is the blood which produces that !- Most un-19907. And therefore you would be averse to the introduction of any blood which did not produce it in the same degree !- Most cortainly

12598. Do you think that if any other broad which dil not produce this highly courageous and blood-like animal was introduced it would damage the prestige. affilia var. the present Irish loved to Oh! very much.

13959. And, in that way, I preume it would damage the farmer binarel! -- Yes, I think it would

be the most rainous thing that could hearen to Ireland in my opinion. 15000 Lord Environment .- Have you been in the West 1-Yes, I have been down to Galway. 1300). Ever buy any horses there !- I bought some, but they are not West of Ireland horses; I have not

bought their further than Hoscommon 13003. You never noticed the class of borses in the

West, in the poorer districts !- No. 13004. You have moved been to Donegal 1—No. 13005. Therefore you have no idea of the class of

amon they have get, or what would be the best among for these 1—No. 13005. Your experience is in the kerse-breeding districts-in the lunting districts 1- Yes; more

13007. Lord RATE DONNEL .- It has been said that

the horses in the fairs in Ireland have rather deteriorated. Can you give any came for that i-No, only that if there is a good here 500 miles from Dublin, my man journeys down the whole way to go and ore to Ballinaslos fair or wherever the fair would be.

amount of quality, and you would my he would be amount or quirty, and you would rallop up-a useful it, and in days gone by I suppose the travelling was very much weeps, and one had to wait until you went a very max norm and women genop up—a useron animal well put together; yet you would find the Irish borne would be galloying on and would go the

journey is of no importance to go and look at it. 13000. We may take it that all the sound animals are bought up before ever seriving at any fair !- Most 13010. And the breeden take amount unreleable

animals into the fair and try to get sid of them be-13011. I think you said that no matter how many good houses are bred in Ireland of the right sort, there

would be just as good a demand for them as at the present time .- I don't think you could produce a supply sufficient for the demand. 13012 Had the supply increased, the demand would -Most certainly.

13013. Mr. La Touche .- Have you over been in 13014. At Moy fair !- I have nover been to Moy

13015. Do you know any reason why there should not be so recal because in the North as in the South is No. I don't; except that I think there is a very greet deal to do with this pershar subsoft—horses are matured better on certain parts. I don't think it runs

through the North quite as much 13016 Have you ever seen a good hunter from the North 4—Thore have been some thoroughteed stallions in the North, Lord Rossnore has some, and Hutton, of Carrickforges. I don't think they have the oppor-tentities of making them, but I have had one or two will-lead becam from that part that were head in the

13017. If the farmers in the North were to devote their attention to breeding horses like the farmers in the Boath from theroughbrod borses, do you think they could do it !- I don't see why they should not, but I don't think they would have the opportunity of reaking them—to finish them off.
13018. Do you think the berehreeiing in the

South is more profitable to the breeder than the show been in the North I-Yen; most certainly 13019. Sig Warran Gunny.—You were at the last Dubin Show. In the middle-weight hunters you

bought the first price horse !- Yes. 13020. He was bred in the North!—Yes. 13021. You don't buy baroushe or park carriage 13021. Ye 10091 Then year touck is exchanged with hunders t

-Yery nearly; entirely for huntern 13033, Colonel St. Quartit, -Did you ever buy any horses formarly out of Yorkshire or Léncolsshire?

13024. Can you get them now !-- No. 13025. Why!--I think the farmers don't breed them; they have lost their marce; I don't think they have the money to keep the mares to knowl from

anve one mostly to keep the marce to most from: 13000. In there the same class of houses hred in a way in Yorkshire and Lincolnshire that were formerly bred there!—I dust think there are. I don't think you can huy as good a horse now

you can may a good a more a one.

13027. In former days, as far as report goes, there was no part of the United Kingdon that proclased better class burners and high-class barners horses than Yorkshire and Lincolnthire?—They had a very great reputation, I know, and in Helderness parties

15028. CHAIRMAN.—But you have never bought much there !- No, I have always found the Irish borne with a little condition and so on has always improved when a more condition, and so on, use aways improved and grown the right way. I have always succibed that simply to the good blood. If you key a York-shire horse they are exceptionally well-herd horses, but as a rule they generally grow exampter. You will see a horse in Yorkshire that shows an immense best and suit far better than this very good looking Yorkshire bosse. I mean, from appearances; one would look comparatively a raceborse, and the other very useful animal; a half-bred sort of a horse. But compare the two and the one is a much faster horse than the other, and a very much better stayer. 13020. Sir Tuestan Essecraps.-You now there is

a difficulty in getting the number of hunters from Ireland now that you used to get formerly !-- Yes, I think there is a far greater difficulty now, but that is not because of the supply, but I think because more scople have found out the goodness of the Irish

heres, and so the people go there. 13/30. There is a greater demand for them, that is the real reason?—Ver. 13031. And there is no difficulty in finding good horses any sacre than there was before as far as the

surpliers of them went: but that the demand is reator now then it was !- I should be inclined to think that that is the reason.

13032. You have no idea, even apreoximately, what worki be the number of Irish horses imported into your country every year-I mean Irish hunters 1-I could not say that. I know how many I have surported during the lest four or five years. I thought I would fast look it up. 13033. Could you give the figures !- For the last five years the smallest number was 233 in one year.

not craite the 200. 13034. Your average would be about 250 every year!-Yes 13035. Mr. Canrw.—You include in the South of Ireland Meath and Hildare!—You, most certainly.

13036. Have you ever been to the West, to Ballina, to buy !-- Never

13017. Or in Kerry !-- Neven. 13018. You have nover bught my horses that were bod to the West or in Karry !-- I bought one horse that I shall for ever remember, that came from Ballina. He was one of the most expensive and the worst animals I ever did hay. I bought him from a very clever gentleman, I remember. I can remember the transaction quite well. I had better not mention

his name. 13039. How was he bred?-I have fregotion. know there was a very good horse stood there, by name Rover, that get some very good stock. I had

perhaps one good horse, and perhaps I may put down

15040. You give very high prices for your hunters? -Well, I try to buy them as well as I can, but I never leave a good one for the names. 13041. You have men all over the country to

select for you from the farmers and keep them !- One becomes pretty well known. We have certain men in neighbourhoods whom we have to give something to when we purchase a horse. They write to my man and tell him, and of course he is well known, and of anybody who has a good horse we are only too glad to secure the refusal, and they are generally too pleased to sell because it is a very ready quick transaction, and we don't give a very great deal of trouble if they

have only got a good sound home.

13042. What do you consider the breed of bone that makes the best barness horse?-Oh, a thoroughbred one, most certainly. If you had to drive one,

herd one, mass certainty. If you had to drive one, I think you would agree with me. 13043. Mr. WEENER.—Practically you haven't been into the impropriated districts in Ireland at

all 5-No. 13044. Wentport 5-No.

13045. Or Denegal at all i—No. 13046. You don't know the general horse trade of the country; you don't know whether there is a trade

outside the hunter trade!-No, I do not, I have no experience of this 13047. Lord Danraven asked you if you would approve of Hackney blood being introduced to approve of Hackney moon being mirror or improve the class of hume you buy, and you said distinctly not. Have you ever heard of any such surgestion. Have you ever board it suggested that Hackney blood should be introduced into Ireland to improve high class hunters?-I don't think I

13046. Nor have I. I thought from your ancrethat you lind. Do you think the condition of Ireland, voil and elemente, and the number of torons and the natural way in which the horses are breasts my has anything to say to the goodness of Irah horses!—Gerbainly; but I think that the breaking is the reals thing. It would not matter about all the other things, unless you had the right blood to been with, I think all the other attributes weekl be

18019. You think it is possible to be fairly certain of the pedieron of the horses you buy from the farmers -I do.

13000. Therefore if these was any blood to which von objected you would be able to find it out !--! should, if there was a Hackney, most certainly 13051. You think there is no difficulty about that :- No; I think they are very murked,
13059. If a lowe had Hackney blood you would be able to detect it !- I think I could, of course : but most certainly if he was sired by a Harkuey, I don't think there would be any difficulty in anybody being

able to say there is Hackney blood.

1305. Do you object to eart-herse blood, or Clydeshile blood or Sullikk Punch i -- I do ; but I den't say Suffolk Punch ; I know nothing shoot it. But I would rather have Clydesdate bised than

Hackney blood. 13004. Why 5-To begin with, it is absent an impossibility to get a Hackney with anything like rising shealders, and I think they would hand it down more quickly. Then they can only go at one and that is the worst end for a hunter 13035. But when you talk of riding shoulders, do

su mean slope or length, or what do you mean !-Houriness of the points of the sheelders. If you were only to ride one once you would not require any executifying of what I moan. 13056. Have you often ridden Hackneys !-- I can't

say I did; but I have seen them ridden and understand what the movements are like 13057. You don't speak from experience1-No. 13058. You judge from what you have seen in

13059. You haven't beed Hackneys !-- No. 13060. CHATEMAN. -- I don't think that the question saked just now was quite accurately repeated put it in a different shape. I asked you I pis it is a different single. I asset you whether you think the inteoduction of Hashrey blood into Ireland is likely to prove beneficial or the reverse to the hunters !—I should say it would

13061. I will simplify that. Do you think it would be possible to confine the Hackney blood to any part of Ireland, and if there are a number of Hackney stallions in the congested districts would you think it probable that the strain would gradually spread about through the country !-- I am afraid it-

13052. You would not object to the Hackney if its blood could be kept away from the part of the country best calculated to breed hunters —I think it would be a very great mistake to introduce it into the country at all.

18063. CHATRICAN. - You are interested in polo

ponies 1 -- Yes. 1306 i. Do you breed them !- I am trying to breed a few now, but they are notold enough to knew very much about them yet. The eldest is these years

13065. Where are you breeding them t-In Ire-13066. In what part of the country to In Wes-13067. And what stallions and what mares have on used t ... I am using a stallion I bought at the

Yardley stud sale, a thoroughbrid stallion 14.1, "Spring Hill" by "Rugby" out of "Ottagon," and "Spring Hill" by "Rugby "out of "Octagon," and the marcs are nearly all old poloposies, either beolem down or once that were not trained or were pression factory in one way or another; they are about 14 to 14.14 hands.

19968. As to their breeding, are you particular !--As far as I can be. Whenever I am buying I always doubt a good deal obsaper than you could do it yourand out anything I can about the breed. 18069. Have you entered into this as a matter of business!- Yes; not the breesing so much as the The breeding is an experiment. I hay

puties kepply in Ireland. 12070. Wherealouts !—In a great many districts, 13070. Wassessiouts !-- In a great many districts, but roothy Wexford and around there, and in Silveid Fermanage. 13971. What kind of ponies are they !-- I find the

Slice penies are the best accordly that I have come screen. They are all practically by three-galanet stallions, and as a rule the pole peny of the present day is a fluko—the hereding of it. It is reliev first find or brought up on bad land or that met of thing. and grown small ; in fact they are miniature hunters. 1807.2. What ago do you hay them at 1—Nearly all four off or five. I hay them in the autum.

15073, And you keep them and train them !-Train there, and sell them at five years old or more. 13/74. I suppose a pulo pony to fetch any price sust be "made" t—Must be tealerd. 13075. Maye you tried and hought any of these Connectors posites !-- No ; not plain Connectors posites.

Consessors strain in them, but afterwards thereaghbred blood was introduced. 13076. Do you know the sengrated districts—the western parts of Iroland yourself!—No. I have never been in Dorogal, but I have been in Sligo.

13577. Ever been in Kerry!—No.

13078. Do you employ anybody to buy !- I employ men to look out for them for me. I have got one men that buys a certain amount, and then I go to

him and salect. 13079. How long have you been buying and selling these posies !- Six years now 13000. And you find it on the whole successful !-

Yes. I got some any segment out of it : there is not much in it 13081. What about breeding porter !- It is difficult to say, because it is so hard to breed a pony, You have to practically breed a pony to an inch or an man and a half, but certainly I think that where it

pays is that men breeding hunters get a lot of pomiss. originally to be bunters, and there is undoubtedly a good market for a good near; if a man gets it he can elways get a price that pays him.

12082. Your experience of breeding of course has

not been long enough to say !- No 13083. What do you expect to do with the pro-

duce that are just too hip or too small-what kind of sale do you expect!--Practically very small. You will aither send them into a fair in Ireland and set for a four-year-old about £15 probably, or £10 possibly, or else you might bring them over and sell then in England as backs for £35.

13084. I gather from you, that for your purpose No. 1 it. inc. in prefer a small thoroughbred sire!—Yet. Nr. Grager 13055. To anything !-- Yes; it need not be a small billed size. I mean my best animals have been by well known sires, such as "Buckshot" and "Loued

13666. Mr. Fivewilliam.—You say the best stal-liest you have used have been "Duckshot" and "Loved One"!—Yes; and "Ratticeash" was a very good polo pony sire; certain stallions seem to get

13087. They have all, I suppose, been thoroughbred stallions 1-Yes. 13058. And for that particular purpose would you like to go to any other hreed 1—No.

13059. Do you think that the small farmer in the West of Ireland would make these pole posies re-munerative breeding—they are able to do it no

neit i...It is very hard to say, because I found, from my experience of breeding, that to broad to the height is the great difficulty. I think as the pole page stud book is now started, we shall find out how to du it; but at present this is more or less a new business, and I don't think that people have discovered yet quite which is the way to do

13090. Dat from what you know, what met of stallions should you send into the congested districts with a view of trying to breed these pole ponies?-I should seed small thoroughbred stallions or a likely should send small troppolyment and a class Arab, not a Barb.

13071. What is your objection to a Barb!—My experience is, that a Barb low not the pluck, has not as roed shoulders...they have generally had shoulders

-and doesn't stay like the Arab. There is as great a difference between an Arab and a Borb me there is between an Knotish thoroughbood, and, I was going to say, a harness loose.

13002. You think that anything that is sent into the West of Ireland it is executial that it should be theroughbook, with a view of getting both courage

13003. Should you be struct if Hartney blood was introduced into the West of Ireland that it would divinge the breed for the pole pury !- Yes. 130f4. And should you think that if it was introduted into one past that it would permente the rest of the country in time !- I don't see how you could belp it, became horses travel very far and travel a

long way to fairs now; they are sold in one part of the country and taken to enother part, and there is so doubt that it would permeate. so doubt that it would persecute.

13095. Have you ever formed any cort of opinion as to what would be the best means of trying to induce farmers to keep their better more in the country 1-11 have not because my workship opinion,

but I think the way would be, to register maren; it would not an environment amount 13096. Then if you only had a limited amount of money should you prefer to spend that mainly on the stallions, and leave the meres to chance!-I think it search take too worsh recent to efferent to been the marks in the country, and that the best thing is to

make sure of keeping good stallions.

13097. Sir Waarsa Ginan, — Your breeding is confined principally to polo ponies 1—Yea.

13993. You have not been breeding 1—I have been breeding polo ponies four years. I have four-year-

ous time time.

13099. You are hopeful of establishing a breed of pole posite?—I won't say I am hopeful, I am experimenting. I should not be satisfied till I tried, and I

am trying to see what I can do. 13100. You are trying now with short-sized thoroughbreds 1-14.1 13101, And the mares !- About 14 to 14.14.

Cereb 13 180

440 13102. Not under that !- I have got two: 13.3 14.37-Yes

The standard of the pole rules is under 13104. Do you think you will be able by that cross to breed animals with any certainty-yea say it is an avveriment 2. No: I think I will not a certain amount I am afraid rather a small proportion to begin with ; it depends so very much on the sire. I wan the first to use him, and one sire gats big stock where another gets small; and if he happens to get small stock—if he gets them like himself—you will probably get out

of most of these mures the right size, but he may throw book to bur stook. 13105. You prefer the thoroughleed and Arab. met the Burh 1-Ves. 13106. But there has been a Barb very moressful

in breeding - Lord Harrington's "Awfully Jolly" bord some road punies, but I don't think he ever bred ponies that were equal to the Irish-bred animal 15107. Equal to the Arab, do you think !-- Well. his ponies were before my time, rather, and I only

knew about two of them and I only rodo one of them, and I wole that when it was rather old. I don't like them as well as Arabs. 13108 Calonel Str. Oursery.—With record to breed ing polo ponies, do you think anybody can breed a polo year with any custainty at all in the bright and the peny with any corrainty at all in the fright and the requisite quality !—I don't think you can yet. I don't think you can say that out of that mare you can

breed a puny 14.1.
13169. You profess to be trying with very gr earn and trouble to bread a rolo nony. Do wa think that in indiscriminate broading that the small masses in the West of Ireland that the farmers have could breed a pony that would be of very great value to thous - I think they would get a certain amount of

then that would be very good ponies if they had the right size. 13110. How do you think they could get rid of those pouces, because a pole puny is not a pole puny until he is made, mul therefore they would only be sold as chance penies at very small prices !-- There are a great many men more all enine over Ireland who will always give a goodish price for a pony that in their opinion would make a good polo perty, and I think that the price that would be given for the raw pony now, which has increased in the last ten years a good deal, would pay for breeding in the poor districts.

1311. You advocate the thoroughired and the Arch. Do you think that the Harkney is earsile of getting the right stamp of pole pony 1—Certainly not. 13112. Why not 1—Because the Hackney, is my reinion, is not made for a riding ariusal—he is entirely

for trotting. I have never seen one that could callo and heavy in the shoulder, which is absolutely unaless 13113. Then woo don't want this high action in the for smeet.

13115. Sir Thomas Esmonds -- Do you say ton ore breeding or buying postes in Wexford 1-I am doing

13116. Do you get many nonice there to beat Yes; a good menty puries come from the exact 13117. Mostly bred in the country!--Mostly in Wexfeed and Carlow.

13118. Which is the district where you get much of voor monies from !-- I should say I get more from Western than anywhere else, housase it is huseler and I know it very well, and I hear of overy good pony in it 13119. What sort is the size of your own!-A small thoroughbred called "Springhill"; he is one of

e Yardley stun. 13190. Mr. Wagson.—If you think the breeding of n pelo pony is more or loss of a fluke, do you think it would be nt all a certain business for formers to

engage in t-No; it can't be.
13121. Would you prefer what we call a dwarfed the best pole pany is what I call the dwarf 14 stees hunter-a miniature Irish blood hunter. 13122. As mearly thoroprished as possible !-- As

pearly thoronghired as possible with substance. 13123. Do you hay many pole perior in Ireland to the year!-You fifty or sixty in the year, 18194. To you think that animals herd for relanamics of they attempted to beend them for pole

ponies would be as medal for the people to work on their farms as animals bood from a stronger breed!-They would not make good plough horses I should of that is what you mean 13155. I mean in places where they have to see their produce to work on the flavor-do you think they would be as useful as stronger unisses !- Then

are as useful as most animals. I are them working but in Ireland they don't use the strong animals in 13126. I don't mean very strong !- But as a role they are using weetly animals about 15 hause or that sort of thing. At least I see a lot of those used, and I think a good well-bred strong peny 14.2 would be

more useful than a weed of 15 hands. 13127. But it reight not be so useful as a stronger built ariged!-No certainly not-13136. Champay.-You don't know the western seaboard yourself personally 1-No.

13129. And from presental experience you don't know what kind of animal is wanted to do the farm work, such as it is !- No ; not in those parts. 13130. I cather from you that the price you on get for a good made polo puny is such that it might

pay as a business, even although of course a considerable number of the produce are not fit for paid panies at all !- Yes 13131. That is your peneral idea. You would not expect to get a very large proportion of polo poment

The Commission adjourned.

Sitting at 12, Hapover-square London, W.

PITEWILLIAM: MR. PRROY LA TOUCHE: COLOSEL ST. OUISVES: EARL OF ENVISEILEN: STR. WALTER GILBEY; LORD RATHDONNELL; Mr. F. S. WRENCH, MR. HOGH NEVILLE, Secretary,

Captain Firm Langton Hall, Northallerton, exemined.

13132. CHARRAN.-You were a Captain in the 9th Lancers !- Yes, my lord. 15133. And you are a member of the Hunters' Improvement Society !---Yes.

13134. You have taken a great interest in horse-

13134. You have taken a great interest in home-breeding for a number of years !—You; in fact all my life I have been interested in it. 13135. You originated the Compton Stud Farm !— 13156 When was the Stud Parm started | In-

1864. We have been soins on ever since 15157. Goald you tell us the general generalics on which it has been founded, and how it has been carried on!—Dursotahtro, I must tell you, was a country in which hunters were not head. Nobody used to besed which numbers were now need. Nothing seed to breed them in that country. The farmers used to buy them from the Irish drovers, ride them, and sell them again. At the time I was interested in the farmers having just given up my yeomanny appointment, and Major Goodien and I said we would get a thoroughbord house for the farmers. We got two, "Master Ned" and "King Grafty." They hold did "Mastic Nol" and "King Grafty." They mon one very well in the country, opecially "Master Nol." We had two stallions that you, the next year we had three, the next year fear; then we got to five and to its stallion. We have generally five thoroughbred stations. We have and one one for breeding neates. We hold an annual above. Our great object was not only to breed kores, but to provide the far-mers with a market, and we settled to hold a show every year for the produce of our own stallions. held our first show in 1858, and we had 189 entries, the next year we had 195, the next we had 169 entries, the next year we had 105, the next we had 164, the next year we had 340, and the next year we had 651 exhibits; next year we had 330, next year, 339, next year, 910. We did not have so many that year because we had no auction for young stock. We only sold aged stock. We came back to colling the young

stock last year, and we had 304 exhibits. Means. Tattereall come down and hold a sale every year; the first year, that is in 1888, we seld 18, next year the first year, that is in 1888, we seld 13, max year we sold 20, the next year 48, the next year 71, the next 81, next 57, next 15, next 65, and has year we sold 50. The first year was realmed 453, and the hast year we realized 453, 179, and our higgest year we realized 44, 100. The total number of nation's that have been exhibited, which the last user years is neve been exhibited within the last mass years is 0.675; the number of snirsely mid is 510; the value a or o ; one number of shifted soul is old; the value of the sales has been £23,600, and the average per bend has been £46. We sell from feals up to aged In 1891 our six-year-olds averaged 70 guineas; in 1893 they averaged 83 guineas; the next year they averaged 101; next year they averaged 65; next year they averaged 60, and last year they averaged

year they awenged 60, and leak year they averaged 40 gainsas. Five-year-chie versego 71 giousness in 1899, ment year 71g hent year 74, ment year 61, next year 63, next year 62, Four-year-chie in 1891 averaged 109 gainson, ment year 74, next year 62, ment year 64, next year 64, next year 64, next year 64, next year 62, ment year 64. The throe-year-chie in 1891 averaged 30 gainson, ment year 64, ment year 6 504, mest year 63, pent year 64, next year 68. The naver say, "No, you are nose to:

guinea 13139. How do you secount for the large furtua-tions in the price !--Of course, where there is a small number of animals sold, if you happen to get a very large price for one it influences considerably the averages, and besides that there has been considerable depreciation in the value of all stock, house in particular are very much chesper now than they med to be ten years ago. I attribute that greatly to the importation of cheap American boron-which has especially depreciated anything in the way of a especially depreciated anything in the way of a harmone better—both high class harmon harmon and the common bus or osh horse have gone down con-siderably in whoe. I whill the best trade we have get is in hunters—that is the only trade in which we

cem to have a monopoly 13140. All your stallions are thoroughbreds 1-All thoroughberd, with the exception of the pony. He is a cross really. He is in the Hackney Stori Book, but he is dead now. He had a good don of thorough-

13141. What kind of mares did you put him to !--Posits of thirteen or fourteen hund 13142. Are there penies in that part of the comtry !- Yes, there are just a few, he would get perhaps tuenty mares, or something of that sort in a season.

13143. What kind of mures are they generally !— They have improved tecuses doubly. They were very had in the country when we compensed were common and they have improved year much, as the mares the produce of our stallions are very much maries—the promote it our automis—are very main better, and now is great many surses outse to the heree than have got perhaps the second or third cross of our own blood. Them make good hrood surses. All our best stock are bred in that way; they are many all those whose pleas were sired to our own

heres.

13144. Are they beed close in 5—Well, they are hred rather in. I have used a good deal of "King Tom" blood, "Hugomot," and the "King Crafty for instance, and the case following the other always

seem to answer.

13145. Can you tell us what kind of fees you charge the farmers !--We charge the farmers have seen as exceptional borse like "Yardarm," we charge five coptional borse like "Yardarm," we charge five

13146. Do you exertise any selection of the mases : do you let any man put any more no one of your burses if he pays the free I—We never prohibit; we naver say, "No, you are not to." We advise them a

costs us a good deal of money 13156. Could you tell us what you give at prices?

COMMISSION ON HORSE BREEDING

first, but they do now. I think they have learned some lessons—and also in the selection of one horse rether than another. We generally have some strong horses suitable for well-bred marrs, and we have some blood like horses that we consider are mitable for

Captalo 200s

courser meres. At first they would not listen to advice. They all went for the big borse and put their course marce to him, but now they ask our advice as 13147. Of the stock of these stallions that v have told us of, what proportion do the hunters bear to the others ... They are all beed for hunters, but of

course the misfits are harness horsen. Where you put a thoroughbred horse with nice action to a course mare you may get a harnest house if he is not a hunter, eveny, perhaps, to his baving modernie shoulders or something of that sort. Some very nice harness horses are kend in this way 13148. The object of the breeder is to breed a hunter !- Yes ; to brood a hunter.

13149. How many classes have you in your shows? -We divide coits and filler, and we divide gentlemen's cinses and farmers' clames. gentlemen have more opportunity of getting their animals up into show form, so that we generally let them show separately, and we follow that right through in finit, yearlings, two-year-olds, and three-year-olds. We have a large class every year of brood mares; we have sometimes had over 100 brood mares exhibited in the show, and we cover ten mares from every year by our best horses—the ten hast mares in the country are covered free. We flud this a great encouragement to the men who would keep a good mare. Some mares have gone on, year after year, position the services from

13150. Are many of these horses hought privately b.-What I have quoted are bought at the sales, or perhaps some of them are longite privately on the sale ground. They give us notice in the office of their being seld. They are either sold the day after or the day before sometimes, but in connection with the abon 13151. Do you know whether many of the mares are bought to go abroad !- No; I don't think we have had any instance of people coming down to buy mares to take abroad. 13152. Could you tell ue say more about the Compton Stud before we go into some general ours-

tions .- As regards financial or any particulars of that nort-well, financially we have always made it over its expenses, but in making this calculation Captain Horaby and myself, who wark it, don't take any pay as directors. If it was done by a Society or by Government you would have to pay the people who look after it—we charge nothing for that and in that way it pays. We have made it clear its expenses by selling horson very often to the foreigners; we always have the best borses we can and purhaps use them for three or four years, and if we have an orrortunity of selling the borse at a good profit be goes, and our district has had the benefit of him for a certain number of years. The farmers very often hav-"We are very story you sold such and such a borse, we were just getting foul of him, and it is a great disappointment to us." I slvsys say... We maver could afford to give the money we have given for our tallions just for your boasts unless we can get it back again." If you give £1,000 for a horse to begin with, and keep him a certain number of years.

he will rapidly depreciate till he is worth only couple of hundred pounds, therefore we try to sell bits before that loss occurs, and in that way make both ends meet, 13153. Do you think it but been a benefit to the country!-A considerable heneft to the country; there were no good hunters beed in the country at all before this boxus, and now there are some firstclass hunters to be brught every year at our shows, with a good many crosses of blood, and those that

have been sold have all done well. I am continually

—The first year we gave £40, then we gave £75, then we gave £101, £100, £115, £128. We have given away £1,075 in the nine years. Then we have been out of pocket for the show £1,400 in nine years; it costs in a little over £150 a year; we have sold altogether £23,600 worth of stock, the property 13156. Have you any mares of your own!-Not that we count in the stud account. I have more of my own, and Captain Hornby has mares, but wa don't enter them on the account at all, we pay for them privately cursolves, and deal with the produce. I only just have enough mares to breed horses for my own riding. I am now breeding thoroughbred stock;

your sale two years ago and he is as good a horse as I could wash." They have always given satisfaction

1815s. And if that advantage could be estimated

in money you would may the whole thing has said very well; it has obsolutely paid its expense, and benides that it is a great advantage to the people in-

Oh, yes. Actually the show is an annual loss, is

I have between thirty and forty thoroughbed maye, and it takes me all my time to look after them without further responsibility. 18157. Mr. La Toucne.-What mores, as a rule, do the farmers in the Compton Stud district breed from, big mares or small mares !- As a rule, to commence with, common, underlired mases, but we have had much more success since we have got more blood in the mares. The mores that are out of the common mares by our thoroughlised borses make very much botter mares than the first lot. 13155. What sort of stock did those mares produce before your stud commenced!-Oh, there were hardly

any horses bred in the country. 13159. They did not try to brend horses of any sort or description !-- No, hardly, I think. Before we commenced at the showe in the neighbourhood there were no classes for young stook, there was so little breeding, and at the Sherborne Show in 1885 probably, or 1887, it was just before our own young stock came out, I proposed that them should be a class for young stock; they said they thought there would not be enough to make a class. I said—"Let us have a class for yearings, two-year-old, and three year-old combined, the best of the three ages," an I think we only had seven or eight entries for the three ages combined.

13160. I take it you charge the farmers 50s.1-

13161. Had you ever any experience of half-level stallions in the Compton sted 1—No, never, 13162. You never bought suything that was not in the stud book 1-Never, except our prey; his stell very from 12.2 to 14.3; I think be was just over 14 13163. Do you see any similarity between the meres of the Counton district and the Irish mares !-The Irish mares have got a good doel more quality, but I must say our present mares that they are breeding from are more timilar to the Irish marce; our present mares have been produced by our own stalliers, and the farmers have come round to the way of thinking; they find that the better bred mares breed better

13154. Was there any resemblance between the Dorestshire mare in ber unimproved condition and the had nort of more you remember in Ireland \$-05, well, perhaps the bad sort, but they were course, commoner, undertreed, mixed with the cart. Where they had a mare kept to ride or drive into market, and that sort of thing, they were in the habit preit often of putting her to a cart etallion, so there was that cross about 13155. Of nondascript ourt blood \$-Oh, yes

13166. Since the operation of your stud these

Causala Fife

in Ireland 1-Yes, I hought him in Ireland, and he went back to Ireland; be has gone back there spain If you ever have a chance of boying a "Master Ned" hunter, he is a good hunter, he never has to be taught 13191. Mr. Wassen,-You think that because there is an absolute certainty about the pedigrees in your sales it has put the price up 1-Oh, yes, cor-13193. I think you mid the ordinary mayor in the clistrict were really the produce of the readster mare

ground with a cart horse !- No, I don't think they had any resister blood in them. 13193. What was the original animal they were bred out of !- I don't know, and I don't suppose the owners knew themselves.

13194. Cartherns blood in them !-- Very often when they got what they call a nag mare, a thing that they could ride and drive. Their tion of bread-

ing was to put her to a cart-home, to get something to go in milk carts.

13195. I suppose those mores were mostly up to 15.2, were they !-Oh, yes.

13.98. Or mora !-Yes, they would be of all sects 13197. You think that the Hunters' Improvement Society in England has effected a considerable

suspectment in the breeding of hunters in England? -I am sure it has. 13198. Would you like to see a Hunters' Improve-13199. CHARRIEN.-Do your horses travel the country !-- We travel through the districts, our own establishment in in the course, and when we send a horse out he goes by texin. We never allow him to

the station and has a stile to go we never allow our uses to try or serve mares at any but the appointed places. We consider there is a great risk of archiests, we consider it leads men into the temptation of getting drunk and all that sort of thing, and also we know that averything is done in a regular manner if the mare is served at a certain place; there is generally a man there responsible for what does happen. go out by train and stop perhaps a couple of nights at one place, and go on by train to another and stop a couple of nights, and they take about three places which are the centres of districts, and we have two horses out in different directions, and then our own four horses stand in the centre and marea are sent 13200. In that way you occupy a considerable range of country!—Yes, I should think we cover

about twenty miles by thirty with our stallions and meres outside that come to meet them. 15201. You live yourself in Yorkshire !- Yes.

13202. Why did you asleet Dorsetshire !-- I had a yeomany appointment, I had the North Someret Yeonany for five years, and I was living there during the time I held my appointment, and having a house there I want on living there until I came up to Yorkshire. 13203. It was not on account of any particular

advantages !-No. 13204. On the contrary, I gather from you that you thought the class of mares were not very suitable for breeding hunters !-- No, we could not have a wome start than we had,

13205. Can you tell us anything about the your allies.—I think you said he got produce from 124 to 13206. What becomes of them !- They drive about in trape, and they are sold at our sales for general 13207. Are any of them turned into polo ponios t

-No, I don't think so , they had not quite quality 13308. You know Ireland well, don't you !-- Yes. 12209. The whole of the country !- No. I carree say the whole of the country; my experience of Ire-land was more in the South. I was quartered at Calur when I first joined my regiment, and my experience of Ireland is more confined to that district and to

Caluruses fair and the Dublin Horse Show, I used to buy horses there a good deal at one time. was buying hunters I always bought my hunters in Iveland before I took to breating my awn. 15310. Toking the parts of the country that no duce these high-class hunters, roughly say the South,

I think you said that the general quality of the mores in superior to that of the mares at any rais that you found in Dornetskire !- Oh, certainly, 13311. Much superior !- Much superior.

13219. And for them would you recommend the same class of stallion as you have got in Dauetshire! -Yes, I should recommend the same class of stallies.

13313. I take it you would recommend the thoroughbred !- Recommend the theroughbred 13714. What is your opinion about the half-bred hapter sire !- When I use the word half-bred I mean the oscilent half bred here, that is by a thorough-

particularly authenticated pedigree. I don't believe in him at all, but I believe strongly in the horse that we have recently approved of in the Hunton' Improvecommencing with a registered mare If that is put on paper at is found that he cannot be less than 31 parts out of 32 thoroughbrod—he is virtually a thoroughbred horse. In introducing a horse of that description you wight get some hones of extra power, which I think is a great newantage. The farmers in try or serve mores on the road; if he is walking from variably complain that where they have well-beed mares in putting them to a small thoroughbred the lose size and get something that is not solechie, and unfortunately in consequence of that they go and pet their mores in some cases to Clevelands, in some cases to Hackneys, and in some cases to these half-bred horses that they don't know how they are bred, and they breed a lot of common useless aximals. I think it would be a great advantage to provide what the Huntors' Improvement Society are now trying to carry out that is those registered sirce with four crosses

> don't mean to say that a thoroughbred horse may not be, and in some cases is, quite as powerful as any horse you will breed in the way we have proposed. For instance, there is no half-tred size we can produce that will have meen power than " Yardarm," and he is clean bred. There is "Royal Mesth" in Ireland, he is another of those rowerful horses. But there is not a meral supply of horses of equal power, and I think is would be a great advantage to the farmers-it is d more importance to the farmers—the introduction of these horses, than it is to the gentlemen, because the gentleman can afford to sand his mare a long distance. As I say, we have mores sent from all parts of England to "Yardarm"; a gentleman can afford that, but a former cannot; he must go to the horse within reason-able reach of him, and then if there is only a small

from registered marse; they would be virtually thoroughbred, and you should get the extra size.

horse at hand he leaves the thoroughbred altogether, and he goes to some breed that was bred not for quality but for either pulling weight, such as a cart horse, or for the purpose of getting harness horses. 13215. How do you define a farmer !—I think the Secretary of your Commission helped me to find a definition of it—that is, a person who farms at a

business and as his sole lusiness. 13215. And if he was engaged in any other business at all !-- He would not be a farmer. 13217. Have you bought any hunters in Ireland lately !-- No, I have not. I always have some of my erra breeding coming on every year. 13218. Have you formed say orining as to whether freland produces as many good hunters as it used to !

-I could hardly give you a grad opinion on that When I have been over at the shows I have been judging thoroughberd stock always for the last few cours so that I have not been so much in the hunter

13219. Could you give us any opinion-have you formed any opinion as to whether the hunter-breed ets of Ireland use properly supplied with stallages 13230. You have attended a good many of the

Dublin Shows !- Yes : I could give you an opinion as to the quality of the thoroughlired stallions. think that they have improved considerably. I think the thoroughbord stallions have improved in Iroland.

but I cannot give you an opinion as to whether the supply is equal to the demand. 13221. The orneral evidence we have had is that prebably the supply is about the same, but the de-mand is greater !- Yes.

13322. Do you know the Western parts of Ireland at all, the congested districts !-- No, I enmost give an opinion as to that

13333. Or the North !- No. 18224. Do you think that Irrland has succeeded somehow in producing a very superior class of hunter !-- I think that it has done so, and not only that but I think the whole of the world admosindges it. I think Ireland has got a well-deserved name on being the best country in the world to pro-

dues hunters, and I think it is of very great importthe country to beerd hunters in. 13:25. Do you attribute that to anything special in the elimate or soil !-- Well, no sloubt both the the fact that hitherto the tiscourhierd has been so largely used in Irrhand but had a good deal to do with it. Years ago there was an absence of earl-borne

blood. I have observed that in nearly all of those coantries where a class of light cart-herse has been used, like in Devonvisire, there have been good hunters had. In Devon these have been good hunters hard which is attributable I think a great deal to the Devomilies pack uses. Where you have that light description of cart-mare you find that good hundres are bred, very often the cross of the thoroughbred on these annuals. Northemberisad had a breed of little light active curt-mares—the black mures—good hunters were bred, descendints from them, and I think that the chi horses of the country in Ireland

that used to do the work of that time had little or no eart blood in them, and I think the suscens of Ireland they have more of the thoroughbowd in them as a rule then they have in other countries where they been get mixed up with the cart blood, and as they have get mixed up with the Hackney is parts of Yorkshire and Necfolk, and in other ports of Yorkshire they have got too much of the Cleveland and coach-horse. All that I think is bad and toude to depreciate the stamins of the hunter.

13226. Do you think it very important in breeding that there should be absolute pority on one side or the other !- Yes, I do; but when I talk of purity of blood I should call "Gowestry," for instance, a thoroughbred horse, although some people would call him a half-Looking at it in that light, the same thing as the Hunters' Improvement Society has suggested in bringing forward four crosses from a registered more ; I look upon him so a thoroughbred horse. But I would rather have a cross of the thoroughbood mare with a borse of that description, either "New Oswestry or the Hunters' Improvement Society's horse, than the

eross of a thoroughbred borse out of a cart more, or

blood in that produce, warrens in the other case you Capula File. have good blood on both sidns 13227. We have had a good deal of evidence to the effect that there is a deterioration going on in Ireland

attributable to a great extent to the fact that the foreigness bought so many of the best mores to go shrowl. Assuming that to be so, could you suggest any way in which that could be stopped !- No. I don't think it could be possible to stop it, and it would be very wrong to attempt to do so, for there is no doubt it is hard enough for nearly to make home breeding pay, and snything you can do to help to make it pay their trade in any way. If we were to say they were their trade in any way. It we were to my may were not to sell their thoroughbood mares, is would damage their trule, and consequently they would brood less

borses. What you would gain by keeping good mares in the country you would have by giving a clock to horse-brooking. And although proude broad from had broad mates to be got if a person really takes the trouble to got them. 13228. Would you try to imbee them by giving

them premises and prizes !- Oh, yes, certainly, by all means. I think that would be the greatest benefit in the world; that would be no check, it would be an enconsegment and would induce them to go and get good usees. I frequently have people conting to me and saying "I have an old brood mars that I would like to sell if I can get a good home for her. I will mores in the country. If I had a commission to her good brood mores I could get them, and at a very

13129. And in Ireland !-- I rather think it would be the same in Ireland, if you like to buy them young. The best time to breed from a broad mare is when she is three year old to make it pay, there are pienty of good three year olds to be hought chean new in Ireland, and if they were put to the borne you may get a fast and your animal, when it had done with the feel, would be one and a half your edder, and

f you sold ber she should pay for her keep. But I think your suggestion of giving premiums or anything go induce them to hered from good mores instead had ones would be of the greatest benefit in the world. 13290. Some of the witnesses have uttacked very creat importance to trying to induce the furnity to keep their good mares, looking upon the mares as almost of vital importance, and others soom rather to have thought that the best thing to do would be to

devote one's attention to providing a better class of stallion !-- If you provide a good more she only breads one foal in the year, if you provide a good stallion he breeds 30 or 40, and by supplying good stallions you produce good brood mares, if you have bad stalions the produce is bad broad mares. Therefore I think the stallions are of the greatest importance to commence with, and the breeder has always at his optare the power of choosing his broad mares, but be has not at his option the stallion unless it is provided for him. Unless he has a good stallion within reach, if he has ever such a good mare he is hadly handicapped; but I think a man, if he really means it, our get a good brood mare, and if he has a good stallion he ought to have a fair chance of success

13231. You don't know the congreted districts in Ireland, personally, I think you said !-No, my lord,

13332. Could you give us any opinion from your general experience as to what class of stallion ought to be put to these small, light, weedy marce in that to be put to these small, aght, weedy mares in that part of the country i—Well, I have had then described to me, that they are under-sized and that they are well bred. What I should think would be the bent cross really would be the thoroughbred with March 12, 1895.

as being at present available, I should think it would be no earthly use sending a thoroughbred down there that had not extremely good action, because if you hreed a small animal, if it has not action it is not worth much as a hack. Theroughbreds with exceedingly good action should get nice harles, nice pole nozon, and mefel stock in that way, and if their blood ver came to cross with hunters it would not be the cause of deterioration. I think, in dealing with the congrated districts you would always have to consider the general good of the whole of Ireland. I mean Ireland has acquired a name as being the hest country in the world for brooding hunters, and I think you have got to consider very carefully about what you do in any particular portion of Ireland, that ven do not injure or do have to the general good of the country, and in introducing the thoroughbred in the form of a stopping thresugniked or otherwise it would not interfece with the percent good of the beeding in the rest of the districts, as it would if the Hackney blood was introduced. But I should like to see in the future-it would take a few years to produce—nouse, say a form Hackney mares, crossed with a bress like "Erskinse," that, perhaps, a good many of you may have seen at the Horse Show this week, a thoroughored horse with very beantiful action, beautiful shoulder, knee, and book action, and if their female produce was kept and crossed again with another thoroughbred horse of similar characteristics and the male produce kept as stallions, I think that that home would be a most useful home to use for the conrested districts, they might be a little breader, and have a little more hulk than the thoroughbreds that would be used in the first instance, and I think they would have just an good notion on the Hackneys have at present-I mean riding action,-and they would breed a class of animal from these mares of the congrested districts that would not only be useful as harness horses, but they would be useful as riding herees, and if ever the produce of these arigads I have

extremely good action, that is the best I could suggest

just recommended was to be crossed with a threcoghbred to breed a hunter, I don't think there would be sufficient Hackner blood in them to do harm. 18333. I gather you think the system of regis-tration is very useful in Eveland !—Yee. 13334. That it would be useful anywhere !-- I don't sito understand what you mean by registration. When we talk in England of registered house, they

we don't register the thoroughbred borses. 15235. Under the Hunters' Improvement Society ! -No, we only register those that have a stain which are admitted under certain rules, which guarantees

their being next door to theroughbrad. 13336. Have you ever considered the question of registration of mures 1-I think it would be a very good thing, we have it in England as much as we possibly out. The Hunters' Improvement Society registers all the best mures in the country; I think is of the greatest importance in the world, as it is an inducement to owners to keep their meres and take a little pride in them. If they are in the book they

don't like to sell them, and they think a good deal of them, it has done good in England, and I think it would do good in Ireland if that was extended. am sure the Hunters' Improvement Society would be very glad indeed to lend any assistance in their power to extend this book to include Ireland as well as England. There are some Irish mures revistes will in that book as it is, but they could be registered either mixed with the English mares, or they could be registered as they are in the general stud book, as an appendix at the end, of Irish mares entirely, which-

horses in Ireland, horses, mares, and their produce,

ever was the wish of the Irish people.

supposing it to be practical, do you think is would be valuable !- I am always ariverse to trying to drive reople; you asked me the question at the very beginning of my examination, as to whether we prohibited certain moves coming to our stallions, I have never done it, I always End I can do more with the people by leading them maker than driving them; I think if you previde them with a book, and give them every inducement to enter, you would do more than by anything compeleury 13238. Would you object to the system of licensian stallions, it has been stated in evidence that in the

corner districts the class of thoroughbred stellions was decidedly inferior and upsound, and that they make to be all licensed and not allowed to exist unless they had a licence !- I prefer to try other ways first, to try subsidising stallions in that particular district where the stallions are very bad, I think if there was a subsidised stallion in that particular district at a manuable fee people would go to that home in pre-Serence to others ; is is so difficult draw to the line, and to be sufficiently fair in working compulsory registration. If you have coungleary posistention, you must have a reterinary suppose executation, it must be subject to that, there are many read betwee that are passed one year and they are rejected the next, we have had instances of this at these shows in London where horses have entured one year and next year they have no cataract; they have spavins one year and no snavins the next, it would be ridiculous that these horses, perhaps the most beautiful houses in the world and perfect in every respect except this, which after all is a quibble, should be wood out altogether; you could not register a korse without a veterioury

surpton's certificate. 13239. Lord Escentizes.-They are all registered now !- But not compulsorily.

13240. No prices are given by the Society 1--Oh. yes, that is the best way to do it, you are getting the thing all in your own bands. The Jockey Clah have got everything in their own hands, so if you won't ren under their rules they will not give you prize. It is the same thing if you like to make rules that you won't have a horse at the Dublin Show unless he is bred on certain lines, and you are at liberty to do so-I should prefer that to compularly regular-

13241. CRATIMAN.—I gather from you generally that you think that Ireland having achieved a conare these borses that have just this strain in them; siderable reputation for producing hunters, it would be wise to keep her attention directed to producing that kind of here!—I think it is of equal importance to Ireland as regards horses as it is to Jersey and Gusensov, which have a celebrated breed of Sangel Island cattle there; and it is equally to the disadvantage of Ireland that our borses and Hackneys and Cleveland stallions should be imported into Irelandas it would be to the dissivantage of Jersey and Guernsey if a shorthorn hull was sent then A lot of people might argue why should we not breed shorthorn cattle in Jersey, or beend what we like, but no doubt for the benefit of the whole country, that have a law that no other cattle is allowed on the island except that which is pure heed, and the whole world knowe that is one of the most valuable cattle that you can get,

13242. And I think you are of opinion that foreign expetition interferes a good deal with the harness horse !-- I think it has tremendously, the has horses, a large quantity of them are bought abroad, they annot sell horses in America new, it costs very little bringing them over here, they cannot get rid of them in their own country, and they are sending them over here as fast as they can, at whatever prices they fetch. They are selling animals at £50 a piece-the same 13237. Some witnesses have gone as far as to say there ought to be a compulsory registration of all class of animal that we used to be buring in England for £10 or £40- and it is raining our trade in the obean horses, and in high-class harpess horses, too, they are getting them from the Continent. We have get a speciality in England and Terland—Treban oppositely—for bereding business: no country can touch us in that as yes. 13443. We have not the same competition in hastess from shread!—No. They would always give mere for an Irthi or English burder than for east that

heaters from alread i—No. They would always give more for an Irish or English hunter than for one that they knew had been bend in America or on the Coninent; but it is not so with a harness horse—they will give as much for a harness horse if be steps, wherever he is bred.

13244. Assuming a Government grant for the improvement of the industry in Ireland, have you any opinion as to how it would be best applied-whether in subsidiving or in the institution of stud farms !--The institution of stud farms is a tremendously costly affair always. If things are done by private enterprise people do them in a much more economical way, and if a man manages it hadly he has to suffer Monetif, therefore it makes him very careful; but it is very difficult to be sure that you have got a capable man, and even if you have got one when he retires or dies that you get a successor that is capable, so that it is a very difficult thing to corry on Government winds assessed all and with economy. I should rather see that experiment tried for these congested districts of the Hackney mares with two crosses of the thoroughbred, the thoroughbred being specially chosen for action. I should like to see their produce used in the congested districts, and I believe that

would do a great deal of good, and I believe it would meet the want that there seems to be. The people in the country seem to want something suitable for eseding backs, and I think it would meet that and I don't think it would injure the prosperts of the country in general as regards breeding hunters. I think it is too large a question to go into that of a Government atud, but if one was kept at all it might be kept for thoroughbred mores particularly thosen for their suitability to produce hunters, and thoroughbred sires chosen for the same reason, and their prodone kept entire; these that were not quite good esough might be sold for steeplechasing, and the be kept as sires. An establishment of that sort might do a good deal of work, and those that were chosen for stallions might be sold in Ireland, with s reserve that they were never to leave the sountry. I think horsen, such as are required, might be bred

a reserve that they were zerow to leave the emistiry. I flids heems, and no are required, might be brief and the server of the s

13945. What would you do with the mares 1—I should bessel from them again, and you would have the two crosses, and when you have bred from them and taken a fual or two you could sell them as steeple-class become.

13946. You would not distribute the mares or cell.

them change—III), no, because they would all be thoroughly-III. It shistly you would give a price for there that would very energy pay for threeding them. 1347. Mr. Fryswitzine—Yor thinks you could raise up a bread of audition one of them threeding them. 1347. from old marce !— I have known them to irred some very good stock. 13106. At what age do you begin breeding !—I have a very good mare that I rode until she saw

twenty, and she has byed me two beautiful finds, but March 12, 1887 of course I would rather brood from young marea. Contain Fide.

13257. Have you formed any idea of the best way of taying to induce the farmer in Ireland to keep his be nothing better than reliablishing the mares and registering them, getting owners to enter them in the book and to give them prizes or free services, we find very bearfinal.

13258. Would not subsidising be rather an exensive way 1-Of course giving them a free service is authoridising them. I think if a man con got a free service it ought to be an inducement to him to keep a rood mare instead of a bad one.

13259. Lord Eversanters.-In what way? Any man who registered his mace would you give him a free service !-- Oh, no, no; we give ten free services every year in my country to the ten best mores; this they think a great deal more of the free service than If you gave them £3 10s, the price of the service;

this they would think nothing of 13260. Charman .- That is what you charge for the service !- Yes, and they think a lot of the free service, and will go to any trouble to send their stares

to competa 13981. Mr. Perzwitanam.—But with limited means would you spend your money on the horse or on the mare 1-I think the stallion is the direct way to do more bunefit to the country, because he leaves more behind him but you can always perclate your exyou can always regulate them the same as we have, you could allow ten free services in the country, or twenty or five according to your means, and that

might be done perhaps at not very great cost, you might do a little of both.
13262. Lord RATHTONNELL-You mentioned a certain class of stallion that, in your opinion, would soft the concested districts in Ireland, that is a stallien with two groves of thoroughliverdrap out of a Hackney mare; how many years would it take you to produce this stalling !-- You would have a two-

the world, in fact you could have it as a two-year old in six years' time.

13363. But keeding from two-year-olds!—Yes. There is nothing against breeding from two-year-olds, I have done it both in half-bred and thoroughbord 13264. I understood that three-year-old was the

year you thought best !- No, I have not been asked the question, I have given no evidence about the 13365. Lord Exemplemann --- You said a three-year-

old mare !-- Yes, you buy a three-year-old mare to commence with, 13266. Lord RATEDONNIL .- That would be a Hackney mare !- Yes, or a two-year-old; if I was managing a stud I should breed from my two-year-

olds; there is one condition you have got to observe about breeding from two-year-olds—if you breed from two-year-olds you must do your mares better, so I very likely have mentioned three year olds; dealing, generally, with the farmers I don't think they ever do their mares well enough to breed from a two-year-old, I don't think they are sufficiently

18267. At the very earliest it would take six years?—Yes.

13258. Would you not have to keep a great num her of maren in order to produce a certain number of

stallious !- To do that in quantity, you would, supposing you started with a dozen marse. 13259. It would be rether a costly business and an

experiment too !- It would be an experiment; and one I only recommend if it is decided to continue the introduction of Hackney blood in Ireland, quainted, and there has been a certain discussion 13270. Mr. FITZWILLIAM.-Do you think a small about them; our is the cavalry horse for the service.

thoroughbred could be bought now for use in the enegested districts !-- I think so; there were strend horses I noticed here, particularly "Chibules." "Erskine," and "First Flight II."—he would be a year mine ligant for that purpose. 13271. Lord Expressions.—Have you ever been in

the congested districts 1-No. 15272. Have you over seen the class of more that is there!--No, I have only taken it from description. 15273. Have you over seen the class of horses they

used there in their carts - No; I have taken it for granted what Lord Daneuven told use, that they were well-bred small marcs. 13274. Pony marcy !- Yes 13275. Do you think that a thoroughfued home

however good his sotton, is likely to impact the same action as he has hauself !- Oh, I think so, 13376. As much as a horse that has been beed for action for years !- No, certainly not; you could selv more on the action in the case you mention 13277. Has it been your experience that if you breed from small half-bred mores, ur nondescript beed

mare, and put a thoroughtend on them-have you ever found that the result is a weedy seet of a seeless description; you cannot use it for any good !-- No I have known some of the best hunture in the world beed from nony mares. 13278. Yes, Wel-h pony usara; but them are little weedy mares. My experience of breeding from a thoroughbred home and these mares in the north-west of Ireland is that you get an animal that is absolutely

useless?-All deprois on the stallion you use; this horse, "First Flight II," took a premium, and he is made like a Mackeyy , but he is a thoroughbred and has got as good action as a Hackney 13279. That is an exceptional borse!--Yes; but

there are exceptional hosses you can pick out of the 1\$280. What sort of a price could that here be beight at \$\ins I\$ don't like to state in public what I think is the valor. There was another here there horse, "Touchwood"; he is just in the form of a Hackney, but he is thereughbrod-these are the horses I should like to soud down now to the con-

gested districts during the time that the others are being built up 15281. Have you ever seen the stock of any of

these !- No 15182. You said you thought that substilining the stallion was a botter thing than subsidising the sames? -Yes; I think the benefit is larger.

19383. Have you any idea of the number of sta-Hous in Ireland I-No. My idea is you would not subsidise every stalling you think suitable, but by giving a certain number of subsidies, it is not only the borse that wins the schaidy that is improved thereby, but it is the number of houses that are bought with a view of winning the mbridy. I see Iriahmen over at Newmarket bying boren; they won't buy an unsound one as long as they think there in a chance of getting a premium. If you give them prizes in districts, it makes them try to buy good beesse with a chance of winning-everybody that buys a horse in that district is buying with a view

of winning £100 or £150 price. The benefit is not confined to the one horse you subsidise in the district. for everybody who buys a horse in that district buys a good one, with the view of winning the subsidy.

13284. Colonel Sr. Quintin. —You say you have not used the Hackney in its present condition; you would require two grouses of the thurseshfred before you would introduce it into Ireland !- I think so, I would much perfer to use the thoroughbred born, specially relected, like the borse that I have used tioned, "First Flight II." 15285. There are two classes with which you are Do we think that the Rhedmey, as it is at present, would be any improvement to that class — I think it would be a very best owners because I think that the Rhedmeyhow of Dood, and Hout Visit, the Rhedmey arcritical prices, I think they are provip homes barges. 1920s. ne experience in breeding Hackneys, but have yet

result would come from a Hackmay size and a the woodblevel mare i-It might, to a certain extent, but the reason I don't suggest it is this, that if you were to commone by getting throughlest more and getting Hackney stablions your stablisms would be serving mores of the country which, I think, would be doing harm. If you take the Hockney maren they will not gross with the mayer of the country-they will do no haven; if you take the mares to Ireland and mate there with a thoroughbook harse he can storn

other mares as well as the Harkster mares he is taken there to serve specially. 13304. You have never taken the trushle to post women'd up as to the breeding of the Hackurys-to see the origin of them, and the properties of blood on

celebrated horse that threws lack to "Kitty."

13303. Mr. Warson...." Raise "1...Yee, it was bred over and over again to "Kitty "-tremeni-in-breeding. "Kitty "is out of a thoroughined. 13366. By "Temworth" !- Exectly, he is a the-13307. Sie Warren Gitzery,-Have von had on experience in buying carriage borner or delving borner

information as to the style of invisals they have, and but I know that they invert a trougen-loss let of becase that fetch very long price- a great quantity 13308. Don't you think there is ulenty of room to breed in England, or in the United Klinghan, breven of that sort without going about; taking the great name we have of being calchested for our breeds, that we we have of being calciumed for our breeds, that we should not keep up the breeding of these heress!— Yes; but the way I should do it would be to improve the Horkscoy; I think the Horkscoy wants more thoroughbout bleed in lime. It is not for me to dictate to the Hackney Society, but I should my that that is what the Hackneys want, more stamins, more

exection to the consider. And I think that that might be produced by infusing a greater quantity of thorough-bred bloof into the Hackneys. I think it would be a great adventage; they would then be a nort of viding borne as well as a better class of driving borne. 18309. You say you have no experience with re-gard to driving is to the suitability of Harkney hunter mare a breed of horses suitable for driving might he bred the Hockneys themselves basing a considerable questity of thoroughbred blood already

quality, and more hightness of action, which would

enable them to go through longer journeys with less

in them 1—I think if you put them to the thoroughhe them h—I timin is you pile three to the thorough-bred mare you might beved some very nice naimals, because you would be desig exactly what I would like to see, mixing the thoroughbred bleed with the Hashney. But I think that putting the Hashrey on course marce you would be breeding clemes soft

15310. From your experience, are borne like "Yardarm" mated with his thurourbhed marea likely to produce a stunted aread of thoroughbrods. and are you aware that the late Lord Glasgow uses with no encouragement to continue on breeding such

Herved not to be witchild for realing purposes !- Yes, he tried it, which shows and proves that a big powerful eless of thoroughbred horses out be treduced but be found exactly what I sold and what I term myself and merhorses you must not bread houses of that despristion too come and durney; you want to based some that the experiment he tried proved that such heres and, more worth se or great water to make to make for laceling hunters, provided they were maked to well-bred makes and not to cause makes. I don't think "Yardama" is a suitable home to put on a curgre a very country cents. Xos want a good mass or thoroughbred mare, and then you will get sometime of size and quality combined.

18311. You have frequently judged at the Dublin. Shows. Do you think any benefit would accree if a little more information could be given of the breeding

of the various originals that are rold there b. Ven mean information phoed on the estalogue, I think sa. I think I noticed on the catalogues at the last show that full information of the posterous was not always given. I think it would be a great improvement that it should be. We have an instance also in the Hunters' Improvement Society this year of the prim horse. The resexus this occurred in our own show was because the breedey of the animal was unknown and we don't scoopt the pedigree of the sainal unless the

that in the Dublin catalogue where the becrete is not given and the pedigree is given. If the breeder is not given you can't know the pedigree. And that really was the case in the class for Trish hunter breed in London, and of learning from the russon declere mures, the particular class in the show last year. I think there were some thirteen at more neares there. and in only a very few instruces, three or four I think could any particulors be obtained at all.
13319. Don't yes block it would be very inner-13313. Don't yer think it would be very imper-tant to know something of their poligrous !-- It is very important to know them if they can broktnined, but there are instances in which they beg terror and of a drown and that earl of thing-instance in which they are madde to obtain information of

who is the breeder, and if they comes obtain the information it is better not to put it in at all than to past at in successy by bearway. Harkpey meest with a thoronyhteed horse do you think Hackney mares in their conformation have any

morial qualification for broad mares built do to make with a theroughbrel horse.

13314. You think they are of the right stomp

and share?-To make with the theroughbred but not with the coarse borns. 13315. If you know that in the Hackneys that have been imported into Ireland there was a good

deal of theremphised blood in the same way as the horse that was alluded to to-day, would thus lessen year objection to them to have several groups of threunghland blood back to No. I mean these horses 13316. I am not talking of these borses. If is

the Hackneys imported into Ireland you know there were several arrans of thoroughbard blood world that at all leasen your objection or would you needs them to be howen with no arms of blood !- Certainly. the succe blood the botter.

12317. You would not object so much to them if on knew they had theroughbrod bleed in them !-My objection would be to want of action. We have got to go through all this catalague here to get som four or five stallions with the narticular action I would

recommend as a cross to mate with a Hackney. If won find a seitable horse he will impart his goodse to iwenty or thirty maps, but if you had to find

Printed image digitized by the University of Southamoton Library Devitsation Unit Printed image skelliged by the University of Southernston Library Digitieston Unit

thirty thoroughland mares with this action, you would reputation. Once you get the cart-house blood, the Mont M. INI.
Hasking blood and the Cleveland blood into the Captal Fig.
country, they will deteriorate your hunters. The have far geneter difficulty in doing it thin by introducing it from a horse. 133 S. I was not quite so much on that question less of these breeds you have in Ireland the better

as on the question as to whether if you found in the Hackneys imported into Ireland there was a large selentates of theorogithered blood year world clipes to them so much as you would on if they had no therocopheed bleed at all 1—It would go better; the more blood there is in the mare the neatur they would approach to a mitable con-

15319. When you talk of taking a thoroughbred herse to mate with Hackney muce do you think he would reproduce action in the same way that a Hackney would reproduce action !- Certainly not 18320. Do you know that the Hockney action is

shoulately natural, and that even the Hackney fould goist a different way to thoroughlared foals? Cestarnly, 13331. Do you think that setion in a small wall sized burness bure is a salesble commodity!-Yes,

13322. Therefore, in a district, say, where they orald only breed that class of home and don't atteto breed lumiters, would notion be one of the things be one of the things, but the coarseness and softness thoroughbred blood with action and splendid confor-nation, where you would get both riding and driving

horses, and would have your animals mitable to sell for both purposes. 18393. Can softness and conveness come in in any way except from eart horse blood !--Certainly, it would come from Hackmoys, I abould think:

13334. Where does the soft blood come in in the Hackneys: take the Yorkshire Hackney. Do you know how they are bred !- I have not gone into that, but I know they are soft. 13825. That is your statement, but where does the act blood come in 5. They were bred from old resolutors, who did long distances t... It may be in the

way they were brought up. If you get bosses to step from one show ring to another, and bettled up so as to step high you soften them. They would lose half of that action if regularly used. 13526. How lung would it take to disappear, do you think !-- It might disappear in a certain number of generations if they were becomit no naturally. But just as the last witness stated, these ponies in

the mountains for years would endure the elimate and hardships; these Hackneys have been brought up so much for show purposes that that may be the came of their softness. 13537. You cannot express any opinion as to the

province of the Heckneys as suited to the hardships of life in the West of Ireland 5—No. 13328. When you talk of breeding houses in Ireland, I think you don't allose to Ulster 1—No;

1532). I think your idea of borse-breeding is that

you, leave the people free to sell their marts without restriction !- Cortainly. 18330. If people in a certain district find it pays them better to breed any particular class of borns, would you stop them doing it. Suppose in Ulster they found it better to based harmes house from

the conditions of the country, and their own consisten, would you say they should be encouraged to bread hunters 1—J think for the benefit of Irriand penceally, it would be better to have the same rule in Ireland as in Chernasy and Jarrey. But that could not be arriver-issued and therefore. I should could not be entertained; and, therefore, I should certainly not interfere, but lot the people brend what

ey like in their own private enterprise. 13331. When you talk of the seneds of Ireland generally, do you mean the greater number of people or the richer people, or who do you mean !-- Ireland has got a name as being the country in the world to breed hunters, and I think it should maintain that

will be the reputation the country will get as being the best country in the world to produce hunter 18332 Excluding Hackneys, do you know that one-third of the stalliest in Irrhard are cart bosse blood or half-eart blood?—I don't know the exact proportion, but I know that there is a certain number of them in Ireland, and I should think that it is very much against the reputation of the country that they are there. I think it would be very much better if hig thoroughbred houses were provided, and

prizes given them. There is no doubt the little thoroughbred horse will get some of the most symmetrical animals out of big well-bred mares, but I shink that we want to excourage big thoroughbeed horses. 13333. You don't know that we have had it in evidence before us that, for 100 years or more, premiums have been given by the Debiin Society for 13334. Not shire horses—plough horses, black Flowish horses originally!—I haven't heard that,

13335. In spite of all that alloy in Irish blood Ireland has maintained its reputation for breeding hunters !-- Ol, yes; it is a regulation that will take a great many years to thalco. Of course it might go down, and down, and down, until it does loss its reputation. 13536. If it pays to breed these good bunters, the people would do so !--Yes; but many people are very ignorant and breed then by chance.

them with a cart horse or a Hackney, and tell them it is a good thing, and they measure him and say, "He last got to wurth bone below the knee," and they are very spt to be misgoided. As a rule, the people who know most about hunters are those who buy them fiven the small breeders—the small breeders in England (in Ireland, they know more) know yers little about it. The fact of a particular horse nucleo the campices of Government being sent round to serve bunter mares makes all the small breeders to the country rush to him; that would not prove it was a good selection or was right. The little breeden thing with what they think is bulk they will go for it. 13437. Do you know what result the permium horses in England are laving? Is the demand for the service of prestima horses in England increasing or

review of presistant across in Engana interesting of falling offi-I cannot tell you have I—yea. 13338. There are statistize to short I—yea. 13339. Published by the Hustern Improvements Society—No; by the Royal Commission. 13340. Would you object, as a chance-cross, more to eart horse bleed in hunters, or to Haskiney bleed

in hunters that had a considerable proportion of thoroughbood erasses!—I would rather have the Harkury with the continuable proportion of

thoroughbred crosses task the cart burns. 1534). Yen know at present all sound therough bred stallions in Ireland have the opportunity of being

13342. And you know that rince that register started there has been a decrease in the number of thereuzhbred stallions !- In there? 13343. Presumably you would think a register of that kind would be good in getting rid of unsound

stallices !- I think it is a very good thing.

1394. You would not be inclined to go further than a register like that !- No, I would not make it compulsory. I would not have taking out licence; would leave it as it is -it is having excellent results.

13345. Do you know a number of American horses 13000. Lo you riow a number of American horses have been sold as Irish housers !- I believe so. 13346. That would be a great detriment to the hunter trade!---Yes

13347. It has been suggested that the American homes should be branded in some way !- Certainly ; it would be a very good thing.

Merch 15, 1805. Captala Fife. 453

13348. You think it would help the breeders!--- I think so, certainly; I think it would prevent impo-13349. When you talk of breeding thoroughbrods auch horses were bred there would be a good demand for them from foreign Governments !-- On, yes; there would be. But then if they were bred by a Govern-

ment stud, of course they would not allow them to go to foreign Governments , they would sell them or let them, on the conditions that they were mover to leave 13350. But still they would be a marketable com-

vardity t... Certainly.

13351. And saleshie at paying prices !—Yes. 13352. Do you think it is possible now to buy borses in any number that would do good to Ireland -thoroughfred lurses at from £150 to £200 each!-Well, I should like a higher limit than that; I might how one to receive for \$50 but I should like a limit

13353. Mr. FITEWILLIAM.-An average 1-No, a lmit. I should be liable to go to £500. T think reg would do more good by hurring one first class

house if you said \$1,000, than if you hought ten you gave £100 a piece for, for these would be no better than there are in Ireland alimity. an energ are in fremand actomy.

13354. Mr. Warsten.—When you talk of some of the mares in the Dublia Show being in foal to a

of the congested districts in different from what I have

been led to understand en ict to understand. 13505. Taese were fina marech....You.

13356. You don't know the stallion 1—No. 13357. Was it more than one mare!—I think there were two. 13556. You reported it to the Dublin Society ! ... T mentioned it in my remort. 18359. When you talk of shoulders, what do you

consider the great vacuisites on a horse's absolder the Slope and the placing of the foreign, which is far 15360. The placing of the forelegs and slope !-And skeps combined 15361. You think that Hackneys are deficient in slope 5... I think they are chiefly in fault in loadedness

of the shoulders which makes these rell in their action. 1336G. You are speaking chiefly from what you see in the shows — Yee; and the placing of the feedags. I mean in measuring length of shoulder; there is no use measuring it from the point to the book, it should he suitled really from where the foreler goes in. If

a borse had a great preminent chest you must not measure it in with the shoulder to show the slove. 13363. The shoulder blade !- Yes, but the shoulder

binds really extends into the breast. You should measure from where his some so in. 18364. You would not object to use in any part of

Ireland where they produce a mercantile animal a barse with, say, Hackney blood with two crosses of thoroughbred blood !-- I don't think is would do much harm, but it would not breed the best huntorn.

13365. I am not talking of hunters !-- I think it would do good : of course the sires that I should secommend, supporting in the first instance you were to send thoroughheed sires, specially chosen, to go down to the congested districts you would shoos rather a different stamp of borns to send down now to what rup would choose to mate with the Hackney mayer to produce a stollion. For instance, the sort of home I should send to the congested districts would be a borron-"First Flicht II.": he is like a Harlmon but is a thoroughbred horse, and has got greater sharpess and quality, the very things the Hackneys want. But to produce these animals to choose a hour to mate on a Hackney mare, I should profee "Ersking

substance.

because he has got more liberty but not so much

these whired home, is it not possible that mares are by a Hacknoy stallion may not also grade up to animals suitable to cross with thoroughland bones 15367. I mean a very well bred mass. If you are a Hughney is the right shape as a broad more year

not a more got by a Hackney be of the right share as a brood grace?—It might, but it won't have sig-13348. I am talking of the country itself. posing you have to deal with a lot of woody.

neys, and may not that grade up these enimals !-You might grade up, but you do a great deal of here, in the mountaine. The Hackney stallings would be infusine their blood into animals that would breed horses for riding purposes

18369. Have you heard it auggested that these should be a general registration of homes in Ireland? —No; I have not heard that.
 13370. That all horses should be registered with the Petry Sessions Clerks!—You mean all sires!

13371. Everything, so that it would be possible for any bayer to trace the pedigree!—I think is would be an excellent thing. It is done here, to a certain extent. It should be done all over the country. 13572. Don't you think Ireland practically is the

best country in the world for producing hereos !-13378. If it is would it not be worth while for the State to spreed some money in preistration of that 13374. If a registration of that kind were adopted

of course it would then be practically possible to trace the realizate of avery horse i-Yes, it result be a very great advantage.

13175. Therefore these people who don't wish Shire Circlesdale, or Hackney blood could avoid laving any -Yes; they could do so, but if you piace heres that are unsuitable before small people who don't study,

and who don't know much about it, they will send to any new toy. There is always a greater run on the new horse, because it is a new horse. 15376. With poor farmers the chief thing is what they can get !- You

18377. So that that will soon ours itself!-Yes, but they don't know till they have tried it. 18376. Would you interfere with their choice then I ... I should never interfree with their choice

13376. You would give thou a choice between !-No; I should only spend public money on the perchan of the thoroughband that we know for cartain does succeed. I have no objection to the two crosses of the thenoughbred being tried on the Hackner mare. I think you would breed an arimal that would get some very good riding and driving animals.

13580. You would not object to house got out of a thoroughbord mare by a Hackney stallion !-- It de pends upon what sort is the thoroughbrod mare, and what you want her fee. 13381. Would you object to use an animal as a

airs that had been bred out of a social thoroughbeed mare by a Hackney stallion, with some thoroughbed 13382. To produce a horse with action t....I should want to know what sort of a thoroughbred guare it

13383. A mace with action !-- Well, if you can get a mare with as good action as " Brekine," and put it to a Harkney stallinn, it would be a very good beginning. Put the produce to a thoroughbred home, and then you would be all right.

1384. Have you formed any opinion as to whether

nation comes most from the size or the dam !- No ; I 13385. You don't know the Hungarian government nt con time tried enbuilding worse and some it up. asionly websites stallines new!—Yes, I am in favore of subsidiaries stallines. I think it you ministine one stalline in provinces 30 or 10 animals every year, while I you subsidiar one man it only produces can 13300. On you think there is anything provided in the aggration of baying mass and distributing them to be propple—I think it would be a costly besison.

and would not produce as much fruit as would giving them. free services.

13387. The game would not be worth the casalle?

I think free services given to those with good marce in the country would have a better effect.

1318S. CRAINMAN.—I think you said you are not

[1338] CHAIRMAN — I think you said you are not in favour of rastricting people as regards selling their mars, but you are in favour of offering them inducments to keep them: 1—Xee.
[1330] As to comprisory registration I understood

from you that you don't appears of compalinery registration [— Well, I rether and entod you to mean your question to refer to compalinery registration of stalliers. 1339. I meant it so apply to everything [— I think that would be an excellent thing if you could get it

1339). You don't know how many cart boxes stellions there are in Iroland, or where they are 1— No. 13392. Or anything about these cart mares and

stallions which were introduced into Irehead 130 years ago I—No.

13393. In your opinion if there are many heavy earth beins sters in Irahand it is a pity I—Ihihi it is a pity; and I should previous that the earth leases that are talled about of a great many years ago were of the lighest and not the heavy closerytion of earth heres, Irehand being a light country to till. I don't know

whether that is 30, but I presume it is likely to have been so. 13294. In some parts of Ireland of course they require heavier because for their agricultural purposes, texas and so on. In it is north for instance would you

team and so on. In the north for instance would you object to the Clydenials size I—I think the less there is of him the tester.

13395. Would you equally object to the old Yorksise cosch horse or the Clyroland —Me; I would

rather have the Cleveland or the couch horse than the ourt horse. There have been tone very good-looking berses and good hunters bred out of the Cleveland mores by the cross with the thoroughbred horse, but at is always considered soft blood, and it is soft blood. 13196. Generally speaking I gather your opinion is that producing hunters in Ireland is profitable and likely to continue so because there is not so much danger to be apprehended from foreign competition in that line; and that as Ireland bas succeeded very well in that direction it would be a jety and probably detrimental to the horse-breeding industry, as a whole if snything was done which might gradually cause a deterioration in the quality and quantity of the hunten produced !-Yes, I think it would ; I think it would be a great thing to keep up the individuality for which the country is celebrated. I think the introduction of the two orones from the Hackney

introduction of the two crosses from the Hackney would perhaps do no heren for beseding posites and hacks and that over of thing. 1330?. That is a suitable thoroughbred size on the suitable. Hackney many 1. You, two crosses of the theroughbred size on the Huskney many for the co-

puted districts. If a few mares did get covered by him is would be no harm; threeparts out of four would be thoroughbred. 18398. Mr. Fitzwilleau.—You say at the present

ISBN. Way be federed got that great most 1— Ge think from the shock, and I think also from the small sholdings in Federed. It is slight country to fill, and the pupils keep to our name out her betweep our and the pupils keep to our name out her three-gour and the pupils keep to our name out her three-gour and the pupils keep the between to our control on no a practice there then between and the sail being suitable to it has the control of the sail that the best way the country and the native of the holdings has been sometime to successfully. Things are cleaper those carried on successfully. Things are cleaper those than to England I has been carried on successfully.

that seet. It is all conductors to breeding hunters. 15:00. Your think the interchetion of any new 15:00. The winter that the interchetion of any new has 1-4 binds as. 13412. And the breed of ponies i-Yes. 13413. Is it a large tract of country in which these Exmoor posies are head t-Well, the true Exmoor portes are only lend by Sir Thomas Adams, but the

Exmoor type of pony is beed in all the Devon and Surperset country, right every to Barnstophe in all the hilly country. In all the hill country there they breed povies which are more or less of the Exmoor type and Exmeer blood. 13414. How have they been kerel!—Anykowat part of them anyhow. Sir Thomas Acland for the last twenty-five years has taken a lot of trouble with his possion; he keeps the brood pure, and takes

the best mares with their suckers down to Kellerton, near Excter, every your and keeps the young once there. They go down there as seen as they can travel with the more, and the sucker will remain there until is it mearly two years old said then it goes back to the hills. In that way he has improved the shape and the size of these positor very serial. There are some farmers round about who do take trouble with their posice and know their pedigreeaned keep up their own

sort, but to a great extent they have been leed in a very haplanard sort of way 13415. You don't exactly know what the alloy con-sists of 1. The Master of the Stag bounds has had for

years past at least one thoroughbred horse, and they cover a certain number of peries; I had a Hackney bores for two years and he had a certain number of noming : Mr. Bassett, who succeeded us, had a Hackney heren for three or four years and he covered a certain number of ponies; I had two Arabs at different times; Sir Frederick Knight less had an Arab for several years past, and many years ago his father had

a Dongola herie. 13410. That is a long way to go for a herie!—It was an experiment. 13417, What does Sir Thomas Adams use i-He

keeps to his own ponie 13418. Export ponies?—Yes) pure Exmost ponies. 13419. You have crossed them with the thoroughbred, the Hackney, and the Ambi-I can't may that I have personally. The only pony I ever lived from was one who had already a cross of thoroughbred

13420. You have experience of the produce !-Ves. 13431. And which do you prefer?—It depends on what you want so much. I have known some extracedinarily good ponies with one cross of therough bred blood , and a scoopd cross of thoroughbred blood very often answers very well. A pony got by my Hackney took first price as an Exmeter pony at Plymouth, Exeter, and other shows although it was

no mere an Exmoor peny than a cah borne, only that it was bred on the borders of Exmoor and was a very smart peny. The Hackseys give them style and action and are apt to improve their shoulders and get some very useful posies. 13432. What kind of prices do the farmers get for the ponies they breed t-I have made inquiries of the two principal suctioneers. A great many ponter are odd every year at Rempton fulr. One austroneer sold 100 suckers and 50 other posies. The suckers on an average realised £2 18s 6sl; 50 yearlings 26 L. cash, and a pair of unbroken four-year-olds 233 10s. Evans, that auctioners, is of opinion that the prices at Bazapton fair are rather low; as a rule the best classes don't go there, and he says they main-tein their value. He has just sent a truck of popies to Maidstone and they averaged £17 18s. Another authonore sold as many as seventy rackers, and they averaged from £6 bias for a let of five belonging to a man on Bameov, to £2 17s. 9d. He sold 220 in all, and his spinion is that the demand is not as strong as

13423. Not so much demand !- No. 13424. What are thry used for !- The suckers are trackers are trackers are trackers are mostly bought by dairymon and tradesmen is a small way, not smuch by gentlemen, and a certain

it was in former years

number of them go across to your country for use in the mines. Older pontes are keught by detlers who take them to Reading and Brighton and Chichester: a few go to Broadmour and a few to the New Poper. 18425. Are any of these turned into pole penies !--The Europe pony is too small for that I the true Exmoor pony is ander twelve hands. He Thomas Acland's rouses don't certainly exceed twelve hands By crossing with the theroughbred you would get them up in size a hit.

13436 You don't know whether they have some

been bred at all specially for the purpose of yele ponies !- A number of pale penies have been bought in North Devon at different times. I know some of them have turned out very well indeed, and at our Hunt Horse Show this year we had an innovation. We had classed penies entirely by height, and this year we had a class for children's ponses and a class for ponies likely to make polo ponies and so on and there was a considerable number of entries for the role

13427. Lord Evensummer.-Were they bred to the country !- You; they had to be the property of farmers living within twenty miles of the Kennels, and we define furners as strootly as we can and keep the show entirely to furnees

18128. Changan.-How long have you had that show !-It has been going on for thirteen years. started it first when I kept stallions as Moster of the Hounds, and I thought I would try and got a better class of more. We began in a very small way offering small prizes to brood mares. Then they got up a subscription in the Hunt and they asked me to get up a senoral sheet, and now we have a very

successful show in the same way every year.

13429. Geniel you give us any particulars of the show!-That is the list of prime we offered lest year (needeced), and I put in the margin the number of entries in each closs. 13430. Read them !- The first class was for the best more with feel at feet calculated for agricultural purposes; there were only six outries, although we offered \$10 in price. The second clear was far bood marres not exceeding 13 hands, with foul at feet

There were seven entries and the prizes amounted to £3 10s. There was a class for breeding mars not exceeding 14.3 bands, and in this there were seren entities, the prime being £7 10s. In the class for meres calculated to breed hunters with fool at foot there were seven entries, prices £16. Then we lad three prizes for our horses which never fill well there; I think partly owing to the time of the year in which they are all at hard week and not in show condition. We give a price for the carter whose horse looks best. A close for the best child's pery not under three years old, not exceeding 13 hands, really quiet, and to be rithen by boys and girls not wer 16 years, and in this there were twenty entries For galdings or mares calculated for riding or driving not exceeding 14.2 there were twenty cotrice. For ponies calculated to make pole ponies there were twenty-fix entries; there was an extra price of £3 given in that for the best pony, the property of a small farmer; this was not very successful. Then

we had prices for pany stellions £5 and £3 10s, in which class we had three entries; we have had that class for the last three years and it has not been a success. We never had more than three or four entries, and they are not very good ponies. don't take the trouble to fotch them up off the hills for the purpose of heinging them in. The proy that wor two years was one I tred myself by a thoroughbad horse out of a very good pony, but the horse was not-a good one and the puny was not of very mosh account. Still the pony was good becogn to win the prime two years ranning. I still him as a two-year old became I didn't like to keep him. We had a class for the best weight-carrying cob not exceeding 15 hands high, thirteen entries. Class for two-yearthus for four-year-olds, 13 catries. All the preceding classes were strictly lurited to farmers. sizees which were open to valveribers to hints for light-weight and honey-weight harses not less than five years old, open both to farmers and subscribes to the bank. There were seven heavy and terrotyfor light-weight houses exhibited. Then there were a couple of jumping prizes. On the whole we gave

\$124 in pairon 13431. Did the elasses with the exception of the stallion classes fill protty well 1-Oh, yes. Some years we had suther more entries then others year we gave £37 for brood mares, and £27 10s for

two, three, and four year olds. 13432. What kind of borse do they use about you

home. But they are hardly to be found in the ferior Shire horses and hig horses of all sorts. They went in to try and breed hig cart horses for which the country is not suitable; and the country is a had country to work hig bornes is, and the eart mores are inferior animals in type.

13433. Mr. Frynwitzann.-Are those small cart pories bred in that country sustable for the agricaltured purposes of the country !--Oh, yes; they do the firmers' work, they are strong enough for that but they are poor shaped things. Not a good class

13434. But they are sufficiently strong to do the work, it is mainly a green country !--Mainly; but they have to till a good deal of turnips for sheep, and

13436. Is that good hand !- Hilly, hight land, you must have a light active eart home. 13636, My, Watsen,-When you alladed to the

were bred!—It is the first time we had a class for weightenrying cole. The first was by a through-bred house, the second I don't know about, the next was by an Arab, not a very good Arab either. was a horse that was bought by Sir Frederick Knight at Tutterralls; he had been on officer's charger in the Egyptian war. He bought him for a charger in the regression with the bodgar room or a way low price, but the house go seems very good stock. Two of the clean-were by this Arab, another was by "Tounkawk," another by a theocophired liters, another by a Hackney, another the same, as

third by a sort of Huckney-between a Hackney and a light ourt home. Three were by the Arab and must of the rest by thoroughbreds. 13437, Lord Evengenzes,-Which won't-Well, I have't got a marked catalogue.

1343 E. Mr. Wannest .- You don't know what kind of mares they were hred out of !-- I should think most of them were heed out of oah mares. 13439. With some cart blood in them !-- Yes, I thould think so; probably some of them were between a light cart horse and a pony. I think one

of the Arab cobs got a prize. 13440. Had you a Hackney stallion yourself long ! For two years. 13441. Yorkshire or Norfolk!-- I can only tell you

"Quiciculver," dam by "Phenomenon" by "Combridge Shalos." 13442. He was a Norfolk house!-A very good borns I need to drive him backwards and forwards between my home and the Kennels, sixteen miles of a bad road, and drove him inndreds of miles. He

was very hard indeed, and used to go there and book in a day 13443. Would be less his action when he went about a male !- No. 13444. Didn't want the whip much 1-No, be had

Printed image digrissed by the University of Southernston Library Digrission Unit

very high courage and pluck

rather difficult to say, becomes they all turned out Throat pretty well, and they were all sold away as three. Ebenzion 134-6 Did they sell as well as the produce of the other missals, or better!-I think so: there are

hardly any mores of his get in the country. 13447 They were sold i-Yes

13448. Became they were marketable !- Yes. 13440. Not because they were bud !- No. I sorry to say they sell the good ones and keep the had ones, and that is one of the difficulties of trying to

introve the breed of the bornes in the poorer districts. They will turn anything into money they nen. 13450. It paid poor breaders !-- I think so ; the horse was very popular. 13:51. Did you over use any of his gots or see them

13452. Or did they always call before they came to a workable age !- I think so: there was one of these

cobs I spake of just now by him. 13453. You don't know anything about his per-formances as a useful animal—the cob by him?—I

don't. I sold thus buckney stallion book to a tenant after I had done with him, and he got some very good 13454. Did he get them with action !---I think so. 13455. Do you think the produce of this borse

with the merce in the districts were big enough to do the farm work required of them if they hade't been sold?-I think the cross between him and the farm searce of the country was a useful animal. strong enough for the agricultural work of that districk and they were marketable for van horses and for trass houses. They made a hotter foundation for the thoroughbred to work on afterwards than the original cart mare.

elses of weight-carrying cobe, do you know how they 13455. You think for grading up the mores of that district to thoroughland harnes the Hackney cross was a good one 1—Yes. 13457. CHARRISH.—Have you taken say steen to

try and induce the farmers not to sell their best mares f-Nothing but in the show offering good prices for mores and for young horses 13458. Do you think it has had much effect !-Is certainly has inserved the horse-breeding in the country; they take more trouble and winter their

young ones better.

13459. Do you think the mares are kept that otherwise would be sold !- I wm not sure about that. The brood mores they exhibit are as a rule pretty old Nowadare a farmer carnet afford to keen anything be

can turn into money. 13460. Anything else you out tell the Commission ! —The only thing I can mention is thin—the congre-ted districts being specially in my mind. I think one of the difficulties in improving a broad in a rough

country is that there is always a doubt if a cross will stand the climate. That is what they found with the Exmoor pony-he will live anywhere and snyhow; if you cross him you improve him in some ways, you get him bigger and he is more marketable and medal but the ward rough it like the original, if his broader is a poor men that word bit. If you breed them cub-akly you probably get a very useful head width a poor constitution, but your cross is not stong corrupt to live out in the winter weather in the morehand dishis pedigree. He was by the "Gentleman" by

tricts. They may find that in the congreted districts. 13461. Mr. Warren.—You have not beard as a matter of fact that the produce of the Hackneys winter out in the hills, and come in in very good condition in Ireland !- I know nothing about that 13462. Lord Ensusztans.—The result you found yourself in crossing snything with the Exmoor was that it did away with the bardness !- That is the

experience of the district; they have good constitutions, but they won't rough it like the original. Printed image digitised by the University of Southempton Library Digitisation Unit

ook 15, 1807. count ringion	13463. Charman.—According to your experience you say that the pure posy stunds the climate and expense better than any cross t—Yea. 13464. And you think—though you don't know the congested districts—it might possibly be the same	there !You can improve the Exmone, and it has been done, and you can gat them bigger, stranger, and more merial, but you have got to take care of the young stock.
	Colonel F. Hunny, Elmstree, Tat	Aury, Goucesterskire, examined.
land F.	13465. CRATRICASYou live in Gloucestershire,	13479. You have heed with the object of getting lumiters 1—Yes.
	de you nest—Yes, my bird. 13466. And you are a member of the Hinster' Improvement Secrety!—I am on the council at the present time. 13467. Have you herd borses yourself at all !— Yes, I have for a candidrable number of years.	1840. What did you do with those that were not good enough for hanters i—They have all been rest and zion becaus. I have good facilities for breaking them is, and have made them handy, and sell these as basks in Lomico.
	1346). Have you say acquimitance with Irelands a harea-breeding ountry — No, further than that I know that three-fourth of the lowers supplied to one heat in Glouesstership come from Ireland, for I have made particular inquiry from lower dealers that unjusty hunters. They tell me that at least	13461. Without going into particulars, can you get a price for them for that particular pus pose that pays: —Yes; I get a good taked of week out of them between four and six years old, ride them myself, and hade them. I break them in as backs and drive them.
	three-fourths of the horses they sell onne from Ire- had, and they consider them superior in every way as hunters to English-bred horses. They have more stansins, and come to the hand more readily. They	13482. And the six years old, they are fit to sell! —I seld a five-year old, only 14.3 hands, for £80 in London, and he had done a good year's work before.
	take less schooling they consider. I have asked three or four of them the question. 13449. Do you know at all whether they can get	13483. Is that a horse suitable for driving and ridling, both 1—Yes.
	as many good knowners in Ireland ager as featurely I- landor thing question particularly, and can usen told me be could gai see many knowne as he filted if he could per for them, and give the help perfor. Amother mon- told me he rever fiscand hernes so access. The heat man does a great deal in the County Wasterland, in some does a great deal in the County Wasterland, in these feet performance in the county wasterland, in these feet perform and he saw thirty-six mares beength to Wisigner to be stringed, and the should not say there	15:64. That is what he is used for I—I believe he is used entirely for riding where he has gone. 13:465. Was that by a thoroughlived size I—Xe is I are were use anything but a thoroughleved lorse. 13:446. Do year think that a system of registerior marse would be boundard to Testural I—Xes, I think I are the state of the system of the
	were more threa three good mares among the thirty- ing 1510. When toldy yea that 1—A man who buys very largely in Technol. 13471. De you think they attach any impostance to the face that the buses was bred in Technol, oring to the more face that is was bred in Technol, oring to the more face that is was bred in Technol, and They the. As seen as they have a luminer is bred brone is worth more seeing that if it was bred in	than a man who has not get its registeric. You take the trouble to go and look in a meries final that you know is endered in the Inneter' pick book and a nav- not seen to the pick of the pick book and a nav- not see. 13407. And about stallious—do you thank regis- tration would be suifficient, or that there engled to be something more starting in the way of incoming manifest and the second of the pick of the pick of a pick of the pick of the pick of the pick of the pick of manifest and the pick of the pick of the pick of the pick of manifest and pick of the pick of the pick of the pick of the pick of the pick of the pick of the pick of the pick of the pick of the pick of the pick of the pick of the pick of the pick of the pick of
	England. I know myself when I am buying horses, if I heard a horse was from Ireland, I should be much more likely to key him. 13472. Do you know Ireland yourself!—I was	13488. Do you know the West of Ireland at all b- No; not at all. 13480. You use nothing but the thoroughbred sint -Nothing.
	quartered there a great many years ago, but I have hat been these of lists years. 18473. Do you attack any importance to laving poligons with the hereas 1—Oh, yes; I do I bough's a birson the other day. A non told me it was by "Anostic ?" he said, "I consider 'Anostic' the less ties examing in Tecksaul." I salook him could be prove	13490. You never tried anything the f—A grad- many years ago I tried what I heard mentional to-day, an Exmor oth, with the old pack hares though in I. I just him on to a thoroughberd marx, and I get a very good animal. 15491. As a bunter f—Yes. But namebody said
	16. He proved it to my satisfaction, and it certainly made a difference in my parchasing the brees. 13474. I suppose you cannot say whether the pedigrees that the breeders give in Ireland are generally accurate or not I-No. 13476. You have not been buying horses yourself in Ireland labely I-No. I I breed meet of what I in Ireland labely I-No. I I breed meet of what I	here to-day that the old pack-tores blood has dissip- peared, but they were great riding houses with extra- ordinarily good feet and lags. This was every good asiroal. This is more than twenty years ago I am talking of. 13192. You have never used Hacktory sires 5—No, but I see an owner of two Hacktory.

COMMISSION ON HORSE BREEDING.

13476. What have you done in the way of breeding

yourself 1.—I have beed, and I have bought suckers at Captain Fife's sale, and beought them on as busiers;

other people say—that the horses got smaller instead of higger. I have always herd from next maces, and been able to sell them well in London as backs.

13477. What kind of horses !-- 15.1 and 15.2

by thoroughbrod horses.

13478. What kind of mares!—Hunting searce;

mares that one would think would bring bigger foals

than they have done.

but I am an owner of two Hackneys.

13493. What kind of Hackneys !-- One was beed

by Sir Walter Gilbey, and the other by Lord Tredegar's
"Young Gentleman." They are beautiful stoppers, and

my wife a very found of them, but I don't like to drive them myself. I happen to have a pair of bosse by a thoroughbed stallion. When I want to go bunking ten ce twelve miles from home I always take the pair

by the thoroughbred borse, and leave the Hackneys at

home. I think they tire in their sotion; they certainly

tire to drive home. I am very fond of driving myself. For parade work, such as in London, I am

certain my Hackneys would fetch the most morey, but for my own comfort and driving long distances _v_

They are absolutely in the same condition, looked after 15404. What horse are the thoroughbred !-- By "The Cob" by "Lord Rounds" out of "The Roe," 13496. What kind of a mare!—It was a more I heed myself by the Kumour cob, and she was out of a thoroughbred mure.

strble

13490. Do you know what by !- By " Chit-Chat," a very old mare, my brother's charger in '54. have three generalises-well the grandmother and mother are slead-but I have had there expensions. The grendeire of the animals we are talking of was an Exmoor cob

13497. The Hackneys, what were they out of !-- I don't think they were pure-bord. The sire was "Young Gentleman," and the mare a harness mare, and the one I bought at Sir Walter Gilber's sale was

by "Voluntoer" out of one of the harness mares, a beautiful actioned more. 13498. They have good action !--Very good action. 13499. But they don't last !--They tire always. You would not find it out unless you netually drawn them yourself. When my man is driving I think they are going beautifully. I catch hold of them and

then I find out what the difference is 13500. Mr. Prinwilliam.—Whatever you bred from thoroughberd horses yourself you have used them both for humoss and riding-do you find they have enough action for tan !-Yes, I do, certainly. 13501. Sir WALTER CHART,-Mield I ask as to the condition-very much depends upon the condition of the horse as to their endurance-is it possible

of going, any twelve usites to a meet, and going as quickly as you want to do !- I think so, because sho is very fixed of going eight or ten males to a golf club. They go there, and my man mys they are always very tired after it, and want a rest. 13502. But your wife does not complain of them?

13503. But you have no experience in breeding Hackneys?-No. 13504. If you were sending a pair to London for driving exhibition, yourself or your conclusion, which

pair would you bring !- The Hackneys 12505. As the most valuable !- As the most shows and valuable, they would fetch most money in London undoubtedly. 13506. I suppose you know that " Volunteer" only

went back one generation to the thoroughboul on the dam side !- No. I did not know that. 13107. Mr. WHENCH .- Do you know that "Young Gentleman " was a Norfolk horset—No; I only know

be belonged to Lord Tredegar. 13508. Crtarguay.-Have you any opinion as to

whether the introduction of Hackney blood into Ire-land would be likely to be prejudicial !—I think it would be prejudicial in this way, that I personally or anybody who wanted to go buying bunters, would make very careful inquiry as to whether the animal had Hackney blood in him. I consider Hackney blood is most saitable for harnon and London work, at fee riding-no. I never was on either of my

Hackneys, and my man has strongly recommended me not to get on them. I did think I would have a ride on them and see what they were like before I came herees from a dealer.

13510. Would you generally agree with that as regards Ireland t-Yes, I should. I particularly soticed that horse, "Erskine," that he spoke of-e 13511. Is there anything you would like to tell us further !- Only, talking about the Hackney, I met a Beckeley facuser at the show, he was showing "British Prince." I said, "How do you think it will pay yea?" He said, "I think it will pay me

13509. Did you hear the evidence of Captain Fife? Herry,

fairly well, but I tell you what does pay me keeping a Hackney stallion." He had seventy mares to that stallion last year. He got sixty-three in foal, and the farmers are outering their mares as fast as possible. saked what size was it—was it a small Hackney. "No," he said, "15.3."

13512. Lord Raymonovata.—Where is this Harkney stalkont-Berkeley Vale. Two men work is on both sides of the river; they are partners. 18513. Have they thoroughbeed stallions near them 1—They had a thoroughbred stallion, but now there is no stallion at Berkeley Chatle. 13514. He finds the Hackney stallion is run after? -Ver

13515. Do you like the Hackney cross in bunters? -No. not in hunters 13516. Then you think there is always some danger of farmers going after Hackney stellions if they see them !- There is a very great danger 13517. So in the hunter breeding districts you

would rather not have a Hackney stallion to entice the former!-No, the strong stallion is the one they always go for. The only helf beed horse they had at Budminton was "Cook Robin." He was a big strong borne, and farmers put after him. 13518. Mr. WRINGE .- Would you in a countr like Ireland confine the farmers to hunter breeding!

-No, I think there is room for harness home breeding. 13519. Harness horses do pay if they have good 13510. Colonel St. Quarint.—Have you any knowlodge of Ireland !-Only that I was quartered there

13531. You are hardly canable of expression an opinion!-Perhaps not. 13522. How long ago is it that this Hackney you make of that was so much run after was standing there i-Only last year 13533. The farmers don't know what the readmon

for two or three years.

was like or what price they would get !—No.
13524. CHALEMAN.—What made this horse so fashionable !- I cannot tell you that. 13526. Do you know what he charges !-- No; he told me that the thoroughbred stallion was two sowereigns. I did not ask him what he charged for this, probably a sovereign. 13025. Sir Walter Grassy.—Have you experienced

any difficulty in buying carriage borses for your use the use of your wife or in London-from the dealers in London; have you been able to get English boccos, because you mentioned having bought at my sale!—I knew where to go I have seldem bought

Mr. R. H. Danyov, Conservative Club, London, W., examined.

13527. CHARRAN.-You are a member of the

13529. And do you generally agree with that i- Mr. R. B. Gonerally. Of course I think Captain Fife speaks Dates. Henters' Improvement Society !- Yes, I am on the Council for his district, with which I am not well acquainted, hat generally speaking I agree with him. 15528. Did you hear the evidence given by Captain Pifet-I did. 13530. On any particular points do you disagree

Berch 15, 1807. with him !-- No. I don't think so. He talked with min t—No, I don't times so, the taken generally about mares and the type of mares down in Donestshire, and I don't know very much about ers. 13531. It is rather with reference to what he said about Trained to increase horse-broading thera : do you generally agree with him in that respect !- Well,

I bardly know that I should agree with what he said Hackney mares. I should hardly perhaps agree with

13532. You think that might be rather risky !-Well, it would be an experiment, would it not!

13533. Mr. Frrewilliam.-Do you know Ireland? -I do not, practically. 13534. Do you breed at all 1-No, I do not. I see

a good deal of other people's breeding. I have taken

a good deal of other pospers oresin a great interest in our Society. I d I have not a suitable place to do it. I don't breed myself; 13535. CHARMAN - You live in Essex 1-Yes 13536. Mr. Pyrzwilliam.—As far as breeding g for senoral purcoses, what blood do you prefer !-- I

should think that the way to improve the breed of hurses is certainly to have lote of suitable cheap travelling stallions thoroughbred. I think the lines of the Hoyal Commission are right, but at the same time there are so few horses that it is a drop in the cosan. When you find three horses to go from a mile and a half of where we stand to the Land's Red it is and a man or wasses, but the principle is right.
15337. But still you think that the fact of having

these one or two good animals in a district is en-couraging, or rather it is an incentive to other people to keep a good class I—Oh, yes; I think it does a great deal of good. I think the Royal Commission and the Hunters' Improvement Society have called attention to horse-breeding, and I am certain there

see many more people drawn to broad : but of occuse there is in some districts a great deficiency of sultable That is so in South Essex particularly. 13538. How would you propose to increase the number !-- I take it it is impossible without more

13539. Mr. La Topeux,-You have heard some witnesses talk about the scaroity of mass and the deterioration of mares. Did your Council consider in any way what would induce farmers to retain useful marcs !—They gave additional prime to local

societies They gave so much if a local agrapultural or home show society gave so much in price for beed mares. We gave them an additional price which makes it better worth winning and so keeping 13540. Has it come under your observation that the propect of winning one of those prizes has induced

a farmer to refuse to sell his mare i-I think it induces them to keep the mares; but if a high price were given, I think most of them would jump at it except in the case of farmers who are so well off to whom the nimble ninepeace is not a matter of much

13541. Are there many of those to Poor t. No. I am corry to may there are not many anywhere I

13542. You cannot speak personally as to farmers refusing to sell their horses by the prospect of winning refusing to sell cour norses or our prospect of wallings a prize 1—No; I should not put it it that it induces farmers to keep brood mares; for it some fellow came along to the show and offered the farmer a high

13544. The stallions have been covering for some years 1-Oh, yes; I think that was the true way to

suppove horse-breeding. We carnot after the ways.

price for his mare be would let it go, and then probably be would go and get another one. I think it indness farmers to keep the mares, but not to refere a bigh price for one 13543. Do you think the class of mares have imreoved owing to the action of the Hunters' Improve-

-Certainly : I don't think the Hackney spirable to 13547. Sir Wattun Granty.—I may take it that 13547. He walras Gilder .-- I may east it that you are in favour of the Queen's money given from the privy purse being divorted from racing, and giving stallions these premiums under the Royal Cometa-sion I.—Most decidedly.

that they should be put to suitable stallion than to 13545. You think the best way of grading up the

mares is to put them to thoroughbred horses !-

Generally, except in the case of light wall band marcs, then I should like to see a good hunter sever

13546. Do you prefer that to a Hackney stallion t

13548. Do you think that any further grant should be given ?-Certainly, if possible, 13549. Has it occurred to you that if a further

grant were mixed for the thoroughbool it would sho be salred for other breeds of homes, and there would be no end to subsidizing breeds of azimals generally! -I don't know about that exnetly, but if the chiest is to improve the breed of horses in this country conseally. I pertainly think the way to do it is to on the lines of the Reyal Commission, and give very many more stallions. Instead of three stallions to ten counties I should like to see three stallions to one

13550. Private enterprise did that entirely before? -Three stallions for a district took in a district where there are numerous horses owned by noblemen and gentlemen that are at the service at low fees for 13551. Which district do you speak of-the Newmarket 1-Yes, but the horses there are at two high

fees, and it is not a hunter-broading district. distribution is wrong. In Bouth Essex there is no stalline, and the farmers breed perfectly wastched animals. Then, sgain, take Leicentershire and North-supplemakire, there are far more stallions there then are needed. If you altogether depend on private

enterprise you get usequal distribution. 1859. Then would you ask it for other breeds of borses besides the thoroughbred b-I personally should

not; I am only interested to bunters. not; I am only interested to tentere.

13503. Have you had occasion to use very many terriage horses, have you found any difficulty in getting them t—I have seen a good many in desire. 13554. Are they Euclish or foreign L. There are a rent many foreigners, but the few best ure herd in

Ireland. I once now a particularly line pair of cer-rings become that come from Dublin, and I asked the dealer who brought them over how he thought they were bred. He said he believed that the people had tried to breed hunters, and those had the action of retrizon bornes, and they were nice blood horres, and

of course they had sold them for earriage horses. 13555. What colour !---Brown. 13556. To that lately !---Five years ago. What colour !- Brown.

were a particularly beautiful pair of horses. 13507. But you have only his state 13557. But you have only his statement that they were Irish houses t—Yes, but I think he know. 13558. Yes, but you have only his statement?

Yea : I naw them in his word, and salved him. 18859. Mr. Wannen,-I think you said you don't breed horses yourself !- No. 13560. And you don't know Ireland !-- I do not

tribution of stallions have been rather in reference to England. Our inquiry is in reference to Ireland There are a great many gentlemen in Ireland, but there are not a great many that have a great deal of money. Is there anything else you would like to tell the Commission I—Except this, that I have seen ment Society !-- I think the marts are what they are some little of horses got by Hackneys out of hunters, and the result has not been favourable. that I have seen was a fairly useful bunter, but he

was a horse that tired after a long day.

shire i-No.

The heat was a very useful hunter by one of Sir 18564. CHARDERS.—You live in the Edgware about half the price I give now, and they were as Mr. Hesheisp. Read !—Yee, my lord.

good. Whather that is right or not I should not use.

one two horses by Hackneys in bunting stables

Mr. HEFRERINGTON, Edgware Road, London, examined.

13565. And are encared in dealing in horses t-12566. Do you deal in any particular breed of boses more than another 1—No; I have had a great

many hunters all my life, and a great many harness horses of course, all my life. 13507. But you are not particularly devoted to bestern 5-I am not devoted to anything especially 13568. What does the hulk of your business consist

of 1-Harness horses. 15568. Where do you buy your houses mostly !-

In Ireland and in England 13570. Do you hav many houses from abroad!—Yes. without any particular reference to where it comes from i-I would not buy a home that conses from Germany on any consideration whatever. I never have, and I was educated there, and I know the country as well as I do England. I bought a great many there to send elsewhere, but I never bought

barren there to send to England 13072. Have you say objection to say why?-12573. How were those kind of horses brod, do you know !- Yes; I know thoroughly. Bred from

the old Meddenburg horse, which is the foundation of the Yorkships couch horse 13574. As a mare or as a stallion 5—As a stallion.
Only in Medicinature where the best of these honce always were lord. They breed from the stallion and

savey of the same breed; they den't min then and bence they get the perpetual action you find in their 13575. What is the matter with those become t-They are so soft. 13576. What were they crossed with in Yorkshire

to make the Yerichire coach horse !- The Monkies to make the Levishine count form: ——The Reason-burg horse must have come here about a bundred years ago into Yorkshire, but you have improved upon him in Yorkshire. I don't know otherwise than that it must have been with a thoroughhead. They have got their blood from our theroughbard been in Yorkshire.....I feel sure of that in my own mind. 15577. How do you know !- I only know from

what I have beard over there in Mecklenburg. 13578. You don't know whether they brought the stallions or the mares over !- I don't know which

they brought over.

13572. You appeave of these borses otherwise, in overy respect, except that they have not got atamina ?

-Vee 13580. They have good astica !- Yes 13190a. And you don't buy them because they have not got stamina !- Yes.

13081. Where do you be Where do you hay your hunters!-In the oth of Ireland of 'course. 13582. Principally 1—Well, principally. 13583. Do yon hay any in England 1— No : very

13584. Have you been haying them long in Itshard !-- Since 1846.

13585. And in that thirty old years do you find supply !-- If my memory is good enough to serve me, I used to think that the horses thirty years ago were sa good as they are to-day; but whether my mannery does serve me sufficiently I can't say. But my im-

like to say. 13586. At to the demand, is the demand bigger than it was 1-The demand is double what it was in

13563. Have you seen any of them in Leicester D

13557. How do you buy them?—I buy them myself, and I on over very often

13588. Have you anytody buying for you!—Yes. 13589. I suppose your buyer collects a certain fairs; otherwise he collects half a dozen and sends them over

13510 De you find that you buy more horses from the breader himself and less in the fairs than formerly? No : there are an many at the fairs now, if you take them as a whole, as there were formerly. England we go to fairs and buy houses, but you hay a great many more privately; you can't in Irelaed run about all over the place. You go to the fair and get what you can, and the total man sepplies you

with what you are deficient of.

13591. Have you bought any houses in the North of Ireland |- Not many-a few 13592. Where have you bought thurst-At Armagh I have bought them from people that have collected

seen from the South; they take them up there to feed. 13593. Can you explain to me how that could them i-Oh, yes; if pays them very well. They hay these bornes at the fairs in the South at £40. £00, up to £00—that is about as much as they give for a three-year-old. They have him with his long tall, and take him up and feed him on pointons, and he is sold to us dealers.

13394, Why does not the man in the South do

that I ... I don't know : but he is a man I look on with great respect—the man in the Scuth—because he exercises his horses. The man in the North does not; he feeds the horse like a pig and gets him fat; that is one of the reasons I never go to the North. When you go to the South you can see what your home is, but when you go to the North you only kuy a fat pig, that you can't tell how it will turn out. and he generally dies in the process of getting him fit. Those follows in the North always hery the best harpess colts, and give more for them than anybody

13535. Did you over huy any hunters in England ! —Not many i I have bought some. Forecety I used to hay more than I do now. If I see one I hay it of course, but I go to Iroland if I want half a dozen or twenty. I know where to find them.

13596. Don't you know where to find them in England !-No; or if you do you only gat an Irishman imported. The heeses in Yorkshire are as goodlooking as they are in Ireland, but they are a different

13597. And as to their harness horses !-- I used to bay a great many herness borses in Ireland, and I continue buying more or less, for my experience told me con more curring more or sea, for my experience took me they are the very best. They are, hewever, better as bunters on account of their blood, but for harness they are not so good. I don't care what anybody says -undertunately I have had to pay for it, and that teaches you a wonderful lesson; the more blood you got into your Irish horse the more likely he is to

canter; hence comes in the Hackney, and the Hackney is the best harness here in the world, take him all round; hat keep him to himself don't mix him more than you can belp.

13598. What has been described to us in evidence recession is that I used to find horses in those days at

want them.

460

Need 18 1907 on a bischooless harness horse. 16 hands, with good the Hetherton produce that 1—The Hackney is worth most mosey. 13599. And can you find him!—I have as succh trouble to find him as the Irish horse, but when I have not him I would rather have him as a harness 13600. Have you much experience in Hackneys!-

A great deal, 19601. Is the bulk of your husiness in harness horses in Hackmers 1-Oh no. I have interested myself in Hackneys since 1874, when I have been ament for the French Gavernment lows, and I bought all their Hackney stallions.

15602. Have they hought mony Hackney stellions? -Yes: I bought all that were at the show the other day that were suitable. 3603. What do they do with them !- They breed artiflery homes with there.

13004. Have you any objection to saying what prices they pay for them 1-Not the slightest. I gave £400 a pseud last week for seventorn. 15606. Have you been haying these for some yours? 13000. Ha Since 1874.

13695. Principally Hackneyst-I buy thoroughhead barren recordings. I brought a few-what you would call country stallions, but not many perhaps forty in the whole time, not more-hat I bought every year about twenty Hackney stallions for them, thirty some years; I bought many Hackneys for

Hungary. 13107. Ever since 18741—Yes, ever since 1876 13608. Have you been in France yourself !-- Oh,

18609. Where do show you them !- We not thron all over France-north, south, and in the middle, in Normanity, and right down to the south to Nice.
13010. What kind of mares do they gut them to? horse—what the light cavairy rides—about 14.3 hands. little hits of things, half Arabs, their produce with-out any shoulders and so him legs; then they have those Haskney stallions, the best little Haskneys that I can got, and gut these in the South to correct the I can got, and put these to the common to the full of fulls of their own mares. In Normandy we send the Hackney stallions as hig as we can get them. They must have the type of the Hackney but we get them as hig as we can. I brught some last week 10.3; it is not an easy matter to get a pure Hackney 15.3; I got two sixteen hands, very good herees that took the first prize last year; they go to Normandy. Then there is another class of horses 15.9, he goes to the East of France about Brest and that country; and three horses cover the farmore mares and they are supposed to get artillery horses. They siways use the thoroughbred house a great deal, but the artillery been they prefer brest from the Hackney, humann he does not want to canter, which is the great fault in

your Irish homes in harness.
13011. What kind are the marce in the East !--Yery useful sort of little marre with short legs, what you see in the post-cars in the North of France; those grey things they call the Boulonnais; they are 15.3 and 15.5, stout horses without courage, and they take the Hackney etallions to improve their 13612. What do you say !-- If they found it not in

pay they would not go on daing it, and they have been doing it since 1863. 13613. And therefore we may reserves that in their opinion it is successful !-- And every year they want more. It proves to a overtain extent Hackney if put in his place is a very neefel brute. 13616. Have you a sufficiently long experience in Wrante to know if the Hackney does give the requisite courage !-- They would not go on if they did not

13615. I am asking you if you know yourself!-I go there, and of course I am an official in the French service, and so I get at the undercurrent of energy

approve of him.

pleased to see Hackneys arrive, and keep saying they brusht of the brooder or cise the breeder would not 13616. I should not blee to press you for your orinion !- Oh, yee; my own opinion, it does not 13617. It might be to the convenience of the breeder but to the inconvenience of the notifier t.

It must be to the

wished they had some more.

What would you use to breed an artiflery horse-to burnous on it-except a horn that has action and

13618. Well, T. don't know: I am asking you b-I squeece they find our howes are better than their own or they would not use them 13619. Have they tried the thoroughbord in that

13619. Have they tried the thereagated in that part of the country 1—Yes, he stends by the ride of the Hackney, and they prefer the Harkney. 13610. I suppose you have seen the results of all these herses in different parts of France 1-Of course

13631. What do you think of them !-- Well. I have seen some horses got by the Hackory—as fine horses as over I saw in Novamidy, but out of coatling

19622. Should you say at all that that is the class of horse that we have had in evaluate as bought in the London market for carriage purposes |- Yes. If the breeder has the opportunity to put his more to a Hackney bees there he has to subscribe his name and he takes the nomination to the blackney here

15693. What is the French tretter t... The animal that is covered from the old Perchange mare and our He was the first man to take the English trotting Hackney blood to France. 13614. For the action b-For the action.

Normandy horse is a very heavy horse a very work looking home, better looking then snything we as: grow in England, but he has not the activity ; he is a dull horse, and our Hackney is supposed to give him life and action. 13525. Do you think he does 1-I think so, 13525. They bread them for trotting and racing in

Normandy !-- I am talking of the ordinary heres.
If you breed a trotter in Normandy you must bree him from a brotter out of a trotting mare; but it is the man who breeds the home to sell that rule him to 13627. How do they manage with these Govern ent stalling, what kind of from do they charge !-

I hought a very good horse hast week at the skew; I gave 2000 for him. As soon as he was bought all the nominations were subscribed for at eight france (eix shillings and eight pence)—that is the fee the people there will not opie there will pay. 13656. Where is he going to 1—To Normand; 13629. Do the Government select the mares 1-No.

but the Government would not allow a large at good as I make about to cover a very inferior marn. man at the station who has charge of the horses has a right to say:-"No; I won't cover your mace,

you can put it to so and so. Your mare is not good 13630. How many marss would that home be limited to b-Forty or fifty-not a hundred like they

13531. Do the Government have any call upon the

produce !- None at all ; they buy them in open 13539. Where did was are their cavalry remoun were bred-in the South 1-Oh, no; they are bred all over; but in the South of France they have a great many light cavalry horses that, according to our ideas of bornes, are very inferior in fact you would

not have thought they could carry the man they have to carry, but they have our horses down there to improve these horses and they find the Hackney does improve more than anything. They have plenty of blood in their horses; what they want is a little more power.

13633. And they think they can get that better toon the Hackney then anything the LaT system.

13633. And they think they can get that better from the Hackney than anything else [...] suppose so; there are about a hundred people who go into the thing and study is from the beginning of January to the end of December; I presume they know what they are about.

18334. Do they have a thoroughbred standing abrogide the Hackney I.—Yes. 1933b. Do they give the farmer his choice I.—Yes, he has bit choice if he likes, but the farmer three sould not use the throughleted any more than he would here. If you have a thoroughleted and as Hackney standing together in a village in England,

you will always find a framer chooses the big one—the coarmen one—united of the shoot house. 13380. Do you think he is wise to do that i—No, of coarse he is not, but a farmer is not vice always. 13637. Do you know anything about he begoing establishments on the Onturent—Oh, yee, my lord formung and Anstria. I know Austra. bloroughly.

I have sent a good many statistics to Harpoty—
Beccamer and "Astrage "I bands many other,
13698. Can you tell me arrything about their systest there—II is almost the same as in France.
They have those horses placed at the different stations,
but they have more stations assembled in one give in Hangary. At the big stock they have more statlines collected at tene states that they have in Fathelines collected at one states that they have in Fathe-

licos collected at one station than they have in Prance. In Prance they are placed in depots a every village has a stallion nearly. 13410. What kind of stallions do they have in Hungary 1—They have the best they can—thereoglibred, they have very few Hackneys. I hought some as for hack as 1870 for them—fifty—and they go on

now every year, but only a small quantity—fifteen; and fifteen Hackney stellines in a country like Hungary would not make much impression. 13940. The Hungarian native horse—what is be like 1—Very good; but he is only about 14.3.

like !—Very good; has he is only about 14.3. 13941. A superior animal to the South of France horse !—I abould think so. 13949. More quality !—No; he is more stuffy.

13043. As to your business at boms, do you find your demand for carriage horses looping up !— Yes.
13044. In all classes!—Yes.
13040. Not only the superior but the common!—Well no thou in otherward at all for the inferior

13640. Not only the superior but the common F-Well, no; there is no dermand at all for the inferior class, you have to push it. It is the superior horse that is some one. The middle class forms has get no value at all. Xou don't know where his value comes in and where it goes not since these Assertions have come in.

13646. Do you attribute it all to that t.—I do. 13647. Is there a very good market for that kind of horse t.—Very had market. 13448. And the American horse that beats no, is

he as good as the native here: that we can profit on here: No; he is not as good; he is better and the profit of the port man, the unlocky farmer who cannot breed all good ones—he is very tooky if he streed one is from. These American brees cannot and they are as good as you can have horse to be. 13446. Since when did that competition become

severe 1—Since short four years.
18505. How do you account for this—has the tride game down 1—No; but they came here to England, and west to Pranco and hought all the here stallician and a certain number of marce; they fool this over there, and now they are giving a took own them over the england with the griding a fool over the contract of the contract for any locus with the same price that he is reported at.

I bicycle has affected that trude at all 1—I suppose is mount use, must have affected it; of course in America they are M. Helbertagusing these motive care and the electrical radiway; if M. Helbertagradies the bicses marical a very bad analyte over these, and they send than have because they really down throw what to do with them. They sell for £15 a.

know what to do with them. They sell for £15 a prece—a very useful hores. We extual produce any sort of horse here for £16.

13653. May I take it that you think that the demand for a good hunter in an good as ever it was?

Better than ever:

13633. And for a very superior carriage been:

A very superior carriage lisase is better than ever;
be is worth more warmy than ever be we had able

A very superior carriage basis is better than ever; be is worth norm surney than ever be was, but when you go below that you are nowhere. 13654. Mr. Fivewnitan.—At the beginning of

your evidence you talked about the German burns which you didn't like, and the Yorkshire horse, and you said they were alike a good deal in appearance? —Yes; vary like.

—Yes; very like. 13655. And you say that you think that the Gernean barse was the origin of the Yorkehire cough horse —Yes, I think the German horse came here when our Royal people came here; that is when he

139/9. Do you know whether that is the accept heal theory of the Norbeium Couldshirms Society and don't know what their absory is I have board so many theories; it is only my opinion; it is my sloss from seeing the two things ride by ride, because modely would know a German conditions stillion from a Narkabine, even in these days. Our much know gone over these or their come over here.

must have gone over these or theirs none over here.

13697. You may you do buy a lot of horses in
Ireland still !—Yes.

13658. The best !—If I one get any good ones

is there; but you cannot get harness hower in Treland

i; like we used to.

13509. There are more people trying to buy them?

—I don't blick that.

to 1040. Whereabouts do you get the best 3—In the South.

1001. All over the South —All over the South.
Take a straight line from Dublin to Westport, and

south of that, d

13692. It suppose if you take the South in the
main the best beens are by the coughined horses 1—
Certainly; we have not seen any other howe that
would be at all likely to get the horses horse proper.

I have seen a great many half bord bennes in the
South of frederic ten years ago—stallates that used,
the South of frederic ten years ago—stallates that used,
to know the bears, they only also as multiply to the hurses
ter—good abordiers and theret questers; it applied to
us the hunter, but it would not apply to the hurses.

1965A. An regards Hacksopy, I think you said you would like to keep them jure—Lorenishy; I have seen them in Yeckshire, and everybody does today. The Hacksopy is used a peat doel in the Board, the second of the peat of the

maces or the remnants of the old conching marcs.

1364. I think you said they were not there!

They have a few of the old concling marcs, because Hackneys have not been used in Yorkshire more than thirty years. Price to that they were always in Norfolk. Well, I will call it twenty years ago

Norfeld. Well, I will call it twenty years ago in 13655. Do they get sime energible for the Louden a carriage betweet.—No, but a great many more smaller barses are required than used to be required, on a account of the smaller earriages that are used now. I think the coach borne is dying out, more from

13651. You don't think the introduction of the , the fact that he is not wanted than snything else.

COMMISSION ON HORSE BREEDING. 469 13566. CHAIRMAN.-Do you think the carriage 13690. Do you ever got any hig up-standing carrange houses out of the Moy 1-Oh, yea. dapted stack to the horse, or the horse to the carriage ! 13981. How are they chiefly broad -I believe they -The borse to the carriage, certainly If a farmer has a big coach horse about 16.3 and takes it to a fair, being these from the South. 1368: But they are the hig up-standing London carriage horses !--Yes; but there are a great many be cannot sell it; if he has a Hackney 15.2 he can sell it at a good price 13567. Mr. Friewiggans.—You don't go in to a great extent for hunters!—I have had a great many horses taken to the Moy that are very consuon 13683. Yes; tut I was asking what you buy-you should not buy them !- No. 13968. Did you buy these in Iroland, too!-Yes; 13684. But you do buy sours of the other class arways.

13609. You think they are the best that exist t—
In my opinion they are, I would not think of heying
hunters anywhere else. If I found a hunter when I
was travelling about in Yesledure I abouth love to
be I never think of booking for one; whereas
in the antenna, dating from July, I was in Irakand
source them we dating from July, I was in Irakand
source them we dated. from the Moy, but they are from the South t... They are from the South and West I don't think they are hred in the North-at least not many of them. 13685. Sir Walran Gilart.—You have winiting France for the last twenty years 1-You. 13080. And you have been buying borner lore since '74, and previous to that time in Prance !- Yes, 13087. From your experience in travelling over every three weeks. 15670. You would not like to introduce the Hack-15087. From your experience in timering over France, do you consider there is a great improvement ney cross in the hunter!-No; I would not think in resonate-I am speaking of the Perchoron house 13671. And therefore you would not like to introan a horse suitable for cavalry perspects 1-Xes, he has duce the Hackney gross in the South of Treland'simproved. The contract horse that is bought as a Certainly not; I would not listen to it in the South remount has improved generally in the last twenty-five years. I think they have some as unful horses Octumny 50; I would not recent or in the second of Ireland. Most unfortwantely up to this year I was very averse to believing a Hackney could gallop; I had a hunter this year got by "Danagelt," and I never rode a stoner heres in my life. in the heavy regiments in France as we have in Engined.

13688. We had one witness yesterday, a Lendon dealer, who has spoken very endawoursally of the Norsandy horse. You have made some mouton of the Norsandy heres. Have you say knowledge of his breeding 1—You, he is bred from the Perulamon 15673. But as a practice, you should not like the cross introduced into the hunter-breeding district!-If the South of Ireland ever wavers in its allegiance to the thoroughbred borse, I centend that all your foreign trade, which is a great thing in Ireland, would unomentionably, because they have the event be lost. The foreigner gives nearly as much for a frunter as an Englishman does, and he always goes to Perchange mare, what they call the poster, a lound, good-locking sminel. Then they have the Prenheron borre, which is a great heavy bulky horse, and he has been crossed with the horse of Normanity of some sort or other. I should innev the theoremited 13673. And he goes there because of the reputation that Ireland has got for breeding the best !-- He does not go on the reputation. He begins by buying English bunters, and after be has been buying then became the race of the Norman large is not above fifty years old. for five or six years, he gradually finds his way to 12089. Well the Norfolk trotter, has he found his Ireland, because he finds he gets better there then in way into Normandy !-- Oh, yes; and he is appreciated Ergland a great deal more there than anywhere elec-13574. Then any alteration in the breed would be a risk, at all events !-- I should think it would be a carriage homes we see in Parist—I don't know, I haven't been able to find out. There were some big horses in Normandy before Napoleon's time, and 13575. Colonel Sr. Quavru.-I should like to ask you what the Percheron mare is ?-I have sales I many Napoleun was the first man to import Hackneys into times and I have seen a great many of them, and the France in any quantities. are very good, but where they decound from I have 13691. Have you been attending many of the local hover been able to find out. Mr. Gretten - you know whom I man breeds from these Peroberon races in the Provinces in France, where they give prime for testion?—Yes.

12692. And they call them the Norfolk tretter! mares, puts them to his thoroughbred horses, and magine, and he won't breed from anything else. 13593. How is that heree heed t-They have been When I am over there I always try to bring him bred for years from the tretter and by a tretting mure. The old home he traced his best colds to a thoroughbred home, "Hele of Lynne." He was inback a mare or two, and I have often tried to find out what was the history of them but I never ear It is a race that has been in France for two hundred ported there thirty years ago, in fact when I was in the Administration as a boy, by Mr. de Talliard. It is a blood animal with beautiful limbs and beautiful neck, and the tall set on well, and its body 13594. The CHAIRMAN.—How long have you noted is as round as a hose barrel, which is a very good for the Administration 1-Since 1869. thing in a barness horse. 1393, Sir Walter Gilser, - You supplied foreigners considerably you said. Previous to that 13676. And good sotion !- And good sotion. 13677. What sort of belebt 1-15.94 up to 16 date which you mentioned, who preceded you in your porticular calling !- Philips. hands, but they have altered the old Porcheron boose. He used to be a sharp bacross here; they used to drive him iswusty-five or thirty miles; but now he has 13696. And he was the introducer of the Norfolk Hackney in Yorkshire !-- In France. 12697. But I am speaking of Yorkshire!-- It was been created into a heavier horre, and what you see Ramadale was the first man. in the Paris omnibus is supposed to be a Percharen. 13498. Did you ever hear from Mr. Philips that he took the Norfolk horse to Mr. Ramadale—did you ever hear that !— Yes. 13678 Is not the Hungarian supposed to be about the hest of the Continental borses !- I don't know, 13599. He had great experience with regard to the importation in France and Germany, and he sens but I have heard a great many people speak of them. 13679. I thought you said they were very good !then I suppose more largely than you have done since?—Cortainly. In those days they had no The smaller bernes that they mount the light cavalry on are better than the light cavalry bosses in the South of France : they are much about the same height thoroughbred in France to any extent. He was the man who imported the original thoroughbred stallions. In fact, I was acting for Mr. Philips at that time. Printed image digitised by the University of Southampton Library Digitisation Unit Printed image digitized by the University of Southempton Library Digitization Unit

12700. Mr. WRINGS. -- Practically, von commerced your curour in Hungary !- No, I did not. 13701. I thought you were born there !- No, I 18702. You know every part of the Continent!-

15703. Mr. Phillips at that time was by far the largest and most important dealer of horses in

14704. You succeeded to his foreign business, and were with him a great deal, and knew what his 13705. Did you hear he gave evidence before a

Egyal Commission some twenty-five years ago 1— Yes, I believe he did; inni I did not take any interest in it in those days. Mr. Philips and Mr. East were 13706. Any evidence Mr. Philips gave would be

absolutely accurate !-- I should think so. He had great knowledge.
19707. Had be gone abroad humsilf!—He was

15706. Do you you ressender his haying a horse called "Norfolk Phenemenon"1—No; that was twenty years before my time.

13700. Do you know yoursolf whether that home went into Yorkshire!—I don't know at all. I

hamen's the allebrast idea 15710. You don't know when the Hackneys had been introduced in Yorkshire !—When I was only a wongster; old Philips used have horses hauught from Market Weighton that he need to show at the York-shire show. He took some burses from Norfolk into

Yorkshire, and tried to breed those Hockneys, and did breed them I believe. 13711. Do you know before you began to luy yourself did Philips import Hackneys into France!—

13712. Was the importation of Hackney stellions in France going on before your time!—Yes; before my time. It is forty years since the first Hackney stallion went into France. 13713. Have you formed any opinion as to whether

blood !-Oh, no. I have not : but I have some very good harness horses got by Hackneys. of narrams noise got by Hackineys. 13714. Do those burses show any softness?...No. 13715. Have you any idea why the Yorkshicemen

did not find a market for them 13715. Do they find a market for the Hackneys they breed there i....Yes, and harness horses got by Hackneys.
13717. Do you think the thoroughlied horse with

action himself would produce action in his proper in the same certain was as the Hackney I-I don't

linew that.

13718. Have you tried it!—Yes. I should not breed from a thoroughbred unless be has action.

13719. Does the Hackney, if he is well heel, possible the property of the state o once action in mis scoon :— res, inclinationally. The only yount in my view of the Hackney is whether he is old enough as a race to give a type. The thorough lired horse is a much older hered, but I don't know whether the Hackney is old enough himself as a race to give a stamp, or what I wish to say is to show himself as much in his progeny as the thoroughbren 13730. But do you find that the produce of the

Hackney with these country mases in France is furly uniform. Cortainly fairly uniform. The Hackmany uniform 1—Certainly fairly uniform. The Hack-ney as we used to know it in England certainly did not give uniformity in his produce, because of the marss. If you breed from a Hackney more and a Hackney stallin I believe it is very good progeny, but I am a great believer in the Hackney put to any 13721. What class of mares are those artillery horses bred from t...I don't know what they are. They are all sorts of things. They must find the Hackney im-

proving the recess yor they would not go on using them.

rearces.

13725. When you refer to being able to get less harness horses from Ireland, is it because they lack settion or trutting power!—No: they lack troiting verse. We find we can get good horses in a better

market than Ireland now 18724. When you take Ireland and draw a line scross the banter-breeding district, do you know any-thing of the country North and West of that line !-

Yos, I know something, but I have never been able to find any colds there. They are got only to buy and to find any colts there. The keen on in North of Ireland. 15725. Do you think there may be a trude in breading harness horses in that district that would pay the

farmers i-Certainly a trade in harness horses, but 13726. Do you think there would be room in the entry to haved both herness horses and hunters i-I don't know that : I can't tell that. I would not

15797. Would you be in favour of having the digrees of borses registered? Would you start a Haotees' Improvement Society in Ireland, the same as the Society here !- Onlie so. 15728. You would be in favour of that !-- I would not use anything hut thoroughbred horses in Ireland. 15759 The way think it would add to the value of

the horses more bought in Ireland by foreigners if they were alie to got an authenticated pedigree with them? -No, I don't think it would be material; the horse speaks for himself 13730. You don't attach importance to pedigree !-

You attach importance to pedigree, but you attach nuch more importance to the form of the lorse. 13731. If you saw a horse that would give satisfaction in form, and heard that his dam or grand-dam

had been got by a Hackney, would that stop you buying it !—I should not buy him as a hunter; as a harvess borse it would not stop me at all-on the 15732. You say these horses have been used in France to impart occurage to the native mares i-Yes.

15753. Do you think the Hackney has lost any of his power to give conseque through his not being used so much now, actually worked! As a matter of fact most of the stallions do nothing arount they are brought out god shown, and then sent to the stud, and do you think he has lost any of his power supposed to be a horse that has done nothing at all. They bring him out in the bridle, and you are

supposed to buy at whatever price is fixed or Directly he goes to France a man gets on him and sides bles. These houses are ridden every morning. A men counds a hugle and eighty men get on eighty 15754. Are they exercised afterwards in the saddlet —Yes. If a Hackney is soft be last to get just the name exercise as a thoroughbred, and if he were not improving the French indigenous horse, he would not

15755. And if he was soft you would find it out? -Oh, wouldn't they ! They would not here, but they

15756. And you would hear of it t-Of course I

0010. 13737. You haven't heard complaints on that soore! No. H I had I should not receive orders from the 13738. Did you buy many Hackneys in the Show 951-Twenty-one 13739. About the same price !- No ; I don't think see cost so much as this year. they cost so much as this year.

13740. In your opinion would Hackney sires be suitable to grade with such woody mares as you have described in the South of France, with had shoulders and half Arab I...I presums they would.

13741. Have you seen any of the produce from 15749. Is the produce better than the meres them-selves i—Yes, stouter. 13743. You have never seen the produce of thes

marss crossed with a thoroughbord horse !- Yes, I 13744. What was the result !-- The first cross was better with the thoroughbred horse than with the

13745. Then would they got too weedy !-- I don't know afterwards. I only saw the first crow, and the projuce by the thoroughbred house was absolutely bigger in his limbs than the produce by the Hackney 13746. Do you know whether any foreign Govern-

ments have sizes from Normandy farmers!—Every Government in Europe buy out of Normandy. 15747. What do they boy!—In Gutoter every year 500 stallions are brought before the commission, and two or three officers in the Asses they nick out perhans 150 out of the 800 stallions which are shown to us at three years old. After we have picked what we want the Italians come in ; after the Italians the Bavarians; and after the Bavarians the Russians.

Normandy is a great depot for the supply of these 13748. And then homes are used for the breeding of cavalry horses !-- Yes.

13749. Do you know whether any other Govern ments were buying Hackneys at this last show !-- Yes.

they were buying for Austro-Hungary, Switzerland. Norway and Sweden. 13750. The CHAUSSIAN.-How many stallions are there under the French Administration 1-15,021 18751 Are they all Hackneys L.-Ob. po. Hackney bears the proportion of one in twenty. country. In Brest there is a station. There is a

station at Perpigners, and at Tarbee, and in Valen-elemens, and if they have a house there that does not read their country be is changed to enother station. 15753. And who settles all that 1-There is a Minister, and he has a staff of eighty-four people andre him. 13754. And they have to decide as to the suitability of the size !- Each man at his station in a local manand he says, "I want so many horses, so many Normans, or so many thoroughbreds, or so many of

this elses or the other." 13756. Can you tell the proportion of thereach brode you have would bear of those stallions !- About one-

15756. That is about the same proportion as Hackneys !- I should think so.

13757. You talk of Mr. Phillips introducing Hackneys forty years ago. In that the same set of animal you call the Hackney now!—No. I was taking only the effect only when a little of since it the show, a Freedman, and he said to me; "Where is the ski Harkmay we used to get?" I said, "We den't want him now." "Yes," he said "I would like to find him now. Ho was commoner and stonger, with splendid action, and a great big head t and pow he says, "three Rackneys are such small fellows. contience with their tails cut, with bitle heads and little feet comparatively to what we need to see in the He has been improved upon, but the question is whether he has been improved upon for the purpose for which he was ordained. have all the big horses that you got from Sir Walter

13758. I gather from you that so far as hunters are concerned you don't approve of Hackney blood! 13759. Do you think it would be injudicious to introduce it largely into any part of Ireland !-- I don't know. I don't think I am the person to give an opinion on that subject. They use, perhaps, werre horses than Rackneys in Ireland—muth worse—but I don't think it would be a very casy matter to set the Hackney and the native to improve the leveling. If you have a good borne and a rative it might be very advantageous in certain parts of Iroland, but you may not Backneys 15 hands or 14.2. That nort, surely, would not be of advantage to Ireland. At

Gilbey, because we want horses for £300 or £400, and when we on to hir Walter it is about £3000

and then we slide off

13760. You think generally the character of the horses in France has been improved during your browledge as for an artillary and cavaley proporties are concerned !- They have been improved in every thing. They hedn't men because offer ween conand now they come over here, and compete with so at Newmarket with their 1200 house, and they have improved in every other degree. No horse is allowed to cover there that is not sound. Directly we have a berny that costs us £3,000, if he is in the Administration, and erosabody tells us he is unsound, be in cut the next day and sold. It would not do here. stallion that makes a noise he is cut. He is not sold

all counts it would not be any good for economic

as a stallion. The Commission adjourned.

APPENDIX A.

REPORTS ON HORSE-BREEDING AND AID GIVEN BY THE STATE IN AUSTRIA.

AND HUNGARY, FRANCE, ITALY, AND PRUSSIA.

REPORT ON HORSE-BREEDING IN AUSTRIA.

Answers to Questions of the Commission on House Banguing in Incland-

Question 1 —Amount of money spent by the Government on Horse-breeding.

The Endorstee of the Austrian Ministry for Agriculture for 1897, give the following figures under the head of Horse-Precing:—

					Extraordinary, ng. of 18 gwides o	Total. to £1.			
State Stode (Rednatz and Piber), State Stallion Depote, Farms for Colle bought by the State, Additions to State Breeding-stock by p	: corchan I	com mois		\$2,450 86,275 6,758	854 5,808	33,30 92,083 6,756			
breeders, 5. Encouragement of Horse breeding, 6. Foal-farms in Nadworms (for Fillies box				25,875 10,062 1,108	1,108	25,87, 10,06 2,21			
Total,			!	162,528	7,770	170,19			

Ministry of Agriculture actually disturnor £174,246 in the unintenance of the State State, and in the succuragement of horse-breeding generally.

The receips of this breach of the Ministry, for 1867, are estimated as follows:—

INCOME PROM HOME BREERING ESTABLISHMENTS.

		Ordinary	Incress.				mm	1
2.	State Stude State Stallie: Colt-forms,	(Badau m Depo	de and to (Cove	Piber ring I), Fees, 4	e.)	£ 8,842 18,466 678	-
		Tota	4.				27,980	

The amount of the receipts (£17,986 as estimated for 1897) is paid into the Ministry of Finance by the Ministry of Agriculture.

Question 2.—The system on which the money is spent.

1. State Stud Forms. 2. Stallien depots.

1. State Steel Person 2. Scalinies depote a Turner con von Steel and a Autoria, via, Radonna and Teles. The object of these scale Teles. The object of these scale and the scale and

The Committee of Inquiry on Horse-breeding, which not in 1876, resulted in the division of the wince Cis. Leithan servitory into five districts, with a view to the distribution of stalliom superially suited to existing lead breeds, viz. —

(a) The Noris district, i.e., Zell, St. Johann, and the neighbouring districts where the heavy Norie head prevails.
(b) An Aloise district, including Tyrol, Salsburg.

Styris, Upper Austria, and a part of Carinhia, whose the "Pringuiser" horses, and crosses of that hardy breed, are mostly used.

(c) A mountain district, including parts of Bohrmia, Moonvia, Siliesia, and Lower Austria, whose various

Meanus, Siliesis, and Lower Austria, where various lighter types of heres are bred. (d.) Galiois and Bakewina, where the local breed (Galisian peasant horse) in small and light. (a.) Delmatis and parts of Corinchia and the coast district, where small hardy little horres are wanted as

pack saimals.

The following classes of stalliers where decided upon for use in these various districts:—

(a.) The Neric district.—The local breeds to be loops as prove as possible, and in Salahurg, especially, only "Pinagaser" stallions to be used.

(N.B. The Pinapauer breed is extremely raceful for draught purposes in hilly districts. The colour is possible white or light ooleur "uphahed" with dark spots. The Pinapauer besses are very strong and hardy, and have good sotion; the lighter class teet quite will enough for heavy corriage werk very bad

ground).

(b.) Stallions similar to the prevailing local breeds.

(c.) Strong heavy stallions, suitable for the production of a heavy cart breach.

(d.) Light stallions, of the carriage or risting-house.

(d) Light stallions, of the carriage or riding-horse chess.
(e) "Lippinaner" stallions, i.e an excellent class of horse bred at the Imperial Stad in Lippins, and which is of mingled Spanish-Relifies and Arab descent. Ministry for Agriculture is guided in selecting stallions for distribution to country stations are to 1. To encourage good local breeds, such as the Noric horse, the Pingarer, and the Humien, or small Carpathian breed. All these are to be kept pure. 2. To improve, by ludicious occasing, any local breeds which have described, or are in danger of

The stallings word are of the following classes ---1. Stallions of English origin-(a.) Thursughland stallions to be used in

districts where the mojority of the moves are big and strong, but not cart-bred. These thoroughbords are mostly hred in the county (6.) Roadster, Olyslessisle, and Suffolk stallions

for the production of heavy carriags and riding horses, also remounts. 9 Objecturers stallings for the production of

median carriage borses and artiflery byrees. 3. Belgian stullious are used to improve and give character to the heavy draught beeeds. 4. The lighter class of Ardennes stallion is used to give size to the small local breed in Galicia.

MANAGEMENT. The State born-breeding establishments have a

military organisation, and a Military Department (Militar Abdurdough-which is an integral part of the standing army-is entrasted with the management of the study, stallion denote, and covering

This Military Department is subordinated to the Imperial Ministry for War in matters rarely military: to the Ministry for Agriculture as regards everything connected with the horse-breeding establishments; and to the Commander of the Local Military Division

in matters of discipline. The purely agricultural part of the stud-farms is worked by civiliage—otherwise both management and scretos are military -- a civil organization having bean tried, and having failed utterly, owing to constant shanges among the employ cawbo were attracted by

higher warm alsowhere. As it is found that the State study at Radoutz and Piber cannot supply all the stallious required for the country districts, entire colts are purchased by the State, and reared at farms kept especially for this purpose. (See See No. 3 to Entrates for 1897).

The leading asinciples by which the Austrian The State breeding-stock is also added to by purchase from private breeders, either in the country or abroad, and the animals bought are distributed to the stude to the stuffion denote or to the crit-farmer (See No. 4 in the according to circumstances.

Estimates). Then No. 5 in the Estimates includes expenditure for rearing voyage stock on commission; for prices given at the various more meetings (£4,000); prime given to breeders (£2,200); subventions to ligensuch

stallions, the property of private owners (£2.2505; subventions to prices at horse shows, &c., and subventions to private owners for rearing forly Item No. 6 in the Estimate represents the cost of the foal farms in Nadworns, where filles purchased

by the State are reared for eventual distribution to the peasants in the power pasts of Gulicia (free of charms) on correlation that they should be used for

Overtices 3.—The avacent of money ment on the approximatement of farmers and other private breaders of horses. Speaking generally, it may be said that the whole

expenditure of the Ministry for Agriculture on horsebeseding in a direct engagemerrous to farmer and private hypothers, as they obtain the use of suitable The more direct advantages offered come under heads Nos. 5 and 6 in the Estimates, amounting to

In these are included as shove stated :-

Prizes given at horse shows and to breeders Subventions to owners of licensed stallions

Subventions to private owners for rearing feels with view to breeding The resultdity of obtaining a State stallies, on

hire, for use in a reivate stud under very favourable expetitions The sale of mores at a price far below their actual value, in the poorer parts, on condition that they are used for breeding ; and last, but not least, the ready market officed to private owners by the frequent parchase, wanto by the Government of spirals saitable for

the State stude, and for cavalry and artiflory recounts. To give a batter idea of the most advantages affered to retvate breeders, a statement is annexed showing the rember and breed of the State stallions of research standing in the coverius stations, in private hands, and hires out .-

These colts are usually bought as yearlings.

- Question 4.—Inducements, if any, held out to private breeders with regard to keeping brood marus. This question has practically already been awared. The easy terms, on which the service of sofitable stallions are available, are, of course, a direct induce-
- stallions ere available, are, of course, a direct inducement to private owners to keep brood maces.

 As an additional inducement, prices or premiuma are distributed by a regularly appointed Price Conmittee, according to the regulations laid down in
- 1872, viz.:—

 1. For broad marcs with foal at fact, from five years old and upwards, if their feel is by a State stelling, by a licensed stelling in private heads, or by a stelling belonging to the owner of the reare in
- "Noris" mares can obtain prizes as fore-year-olds.

 2. For young mares (two years and three years)
 when in foal to a State Ricensod or private stallien.

 3. For coits of two and three years, if they give
 promises of bring militable for stud proposes.
- 4. For stallions (licensed stallions belonging to private owners). No stallion for which a State subvention has been granted one compute.
- In 1973 pressions were also established for one and two year old filles. The prime consist of—

 1. Prime in cash (4—25 gold diseats). Duest
- = 10s.

 2. Silver modals.

 3. Certificates of communication.

 Each recipient of a State prime has to undertake to keep the autural in question for another year, failing which the account has been produced by the communication.
- In 1991, 3,201 prizes were greated.

 Quanties 5.—The system, if any, of registering or of licensing stallicus, the property of private owners. Private owners are accounts get to keep stallicus to over their maxes, and also those of others, as by this means it is toged that how-beceding may gradually
 - be aromyipated from State assistance.

 Private stallions are only encouraged if they are
 satisfield for stud purposes, and their fitness is
 established by license.
 - The Corraittee on Herse-breeding, which sat in 1876, recommended the following amendments of existing laws:—

 1. That all stallions used for covering marse, not
 - owned by the proprietor of the stallion, should be obliged to have a license, even if no covering fee were charged.

 2. The establishment of a regular system of
 - The establishment of a regular system of Licensing Committees.
 The cost of reteriously examination of stallions for which a license is dismanded to be charged to the
- State
 4. The use of unlicensed stallions to be a punishable offence.
 5. Owners of broad mures allowing their marce to be overed by an unlicensed stallion to be punished.
 6. That whileon and only should not be nextured.
 - 6. That stallness and columbrated to the pastured with marce and illies, especially in Galicia, Dikowina, and Dalmatia, where the local breed is small and light.

 These recommendations were adopted by the various revisional distant at different dates, excepting.
- by those of Carinthia, Bohemia, Silesia, and the coast district, where the previously existing laws of 1855, 1805, and 1875 are still in force.
- The regulations in the other provinces are all based on the following principles:—

 1. No private owner may allow his stallien to cover mares owned by others, whether fire a covering for or greatly, unless he has taken out a license for his stallion for the covering easien in question. An

- ivate acception is constitues made in favour of owners of the English theorephrenh and stud owners as regardance there are students there are students. They may be reliaved by the local authorities from the obligation of taking out a table.

 Leave.

 Any owners free to have his own marse covered to the contract of the
 - by his own stallies.

 3. An owner wishing to take out a license for his stallies unset notify his desire to the chief local authorities within a specified period.

 4. In order to delay a horner the stallies were her
 - brought before a Licensing Commission for examination. The Commission must then declare the stallion "fit" or " unfit" for study purposes, and must grant or refuse the license scorelingly.
 - The decision of the Committee is final, and from it there is no appeal.

 5. The owner of a stallion which is declared "fit" for stal purposes receives from the Commission grati-
 - a literate in the form fixed by the regulations. This license emittles the stallion to stand at a fixed place, and to cover the obase for moree described in the license certificate, for the period of one year. In Gallide and Blukwine, however, in view of local
 - In Gallide and Hultowine, however, in wlaw of local conditions, licenses are greated for periods of one to three years.

 6. The Licensing Committees are appointed by the respective, local archiveties for periods of four one to
 - four years, according to the various provincial regulations.

 7. The number of members and formation of these
 - Committees very in the different provinces.

 The number of sumbers varies between three and five. In some provinces a representative of the local authorities in attached to the Committee, and a representative in a tracked to the Committee, and a representative in a tracked to the Committee, and a representative in a tracked to the Committee, and a representative in a tracked to the committee of the committee of
 - sentative of the State Stallion Depth must be on the Committee, as well on a veterinary surgon, either as a voting member or movely in order to give his peofessional opinion on the etallions brought before box. The other members are experts appointed by the head authorities in an horoury consults.
 - the owner of a licensed stellion is obliged to issue a certificate (Declinotic) to the owners of sacres covered by his stallion, and to keep an accurate register of each mares.

then informed with a view to forther procedure according to the circumstances of the case. As already stated, licensed stallions are senstimes granted a State subvention when recognised as ecially suitable for sted purposes in a given locality. This is especially the case with regard to cart stallions. The cases spitable for subvention are brought to the notice of the authorities of the Local State Stud, and by them to that of the Ministry of Agri-

colture. Subventions are granted of 100 guidens (£8 6s. 8d) for a period of three years; see of 100 guidens, with a yearly increase of 100 guidens, for a period of four years. The owner of the stellion obliges binself to keen him well, and to use him for his own and other people's marce during the period for which the sub-vention is grasted. The stalling must cover a specifled namber of mares yearly, the covering fee being

fixed by the owner. In 1891 licenses were granted to 383 stallings belonging to private owners, by which 16,110 maces were covered-i.e., 42 mares per stallion. In the same year subventions were granted to 135

are ted with heres-breeding.

The existing State Starts at Reducts and Files were established in 1792 and 1798 respectively. So their history extends over the last contact. Count Heinrich zir Hardegy, who became manage after the canciusian of Peace in 1815, was the first to

evenuesties horse-breeding as carried on in the State Stude, and to manage it on really scientific principles. He imported at various times a number of thorough-bred Arch stallions, as well as English horses, bought either in England or in Gormany. He improved the study at Kinher and Manhaures (in Honoury) and at the former he commenced breeding English thoroughbreds. Preminms were established both for stallions and mares, and stallings were distributed throughout the provinces. Hardegy aimed particularly at formaling all remounts for the army from the country itself, and required so well that, in 1848, the 21,000 borses

Hardegy was a great believer in Arab blood, but after his death in 1854 his macrossors began to use English thoroughbred blood more and more The following foremember that the offers of the Government to encourage home-breeding were suc-

a stud the increase should be about 80 per cent This may be partly due to the severity of the climate and the great extremes of heat and cold. On the other hand, the increase of breeding-stock in the hands of farmers is much smaller. As the chief object of the State stude is to supply stallions for the various covering stations, and an both these, and the stallion at the study cover at an absent nominal fee, it is difficult to say, from a commercial point of view, whether they are succonsful or not. (At Radautz the Stud thoroughbred etallions cover at 30 guident (£3 10a.) thoroughbred etallions cover at 30 guident (AS 10s. for thoroughbred, and 15 guident for half-bred marrel There is no doubt, however, that the State stories bred throughout the country, in preserving good local breeds, and in aprending the knowledge of breeding

Austrian horse-breeding was also greatly improved

In 1800 the care of the State study and been breeding establishments was transferred from the

The object of the preceding historical sketch is to show that the Government has, at any rate, been sug-

confel in increasing the stock of horses in the conserve

and in improving their quality-thereby ensuring a

good sapply of remounts for the army, and rendering great service to the agricultural data.

It is doubtful, however, whether the existing State stude at Radmits and Filler can be requested as more seasful from all points of view. It appears that the

percentage of fools (i.e., the increase on the broading stock) varies between 60 and 70 per cent, whereas in

secondal in producing two very fine types of carriage-The Kladrober horses are very huge, showy snimals, with great action, and are objetly used in the Court carriages on State occasions. They are de-sounded from Spanish and Italian stock; they are sounced from openion and testan most; they are either bleck, or white, and stand as high as 178 c. m. (172 hands). Attempts to improve the leved by crosses with English thoroughkreak have failed. English thoroughbreels are also successfully resent at Kladrub, and for ten years the Imperial colours were most successful on the turf. The moing cotablishment there was given up in 1876, partly so as not to compute so heavily with private owners. and partly on account of the great expense entailed

LIPPIEL

The Imperial Stud at Lippins is situated at about an hour's drive from Triesia. The recovery was an hour's drive from Triesse. The property was bought by the Archduke Charles in 1580; an Imperial stud was soon after established there, which is still flourishing, and which has produced the celebrated "Lippinssor" breed. The first breeding stock consisted of three "Brimms," six other selected stallions, and twenty-four broad mares, all of which were bought in Spain. To these were added Italian, Danish and a few Arab sizes. During the stoomy vence between 1797 and 1816 the stud suffered much from constant removals. In 1895 a considerable number of Arab stellions were imported, but stellions, belonging to the local "loant" breed, were also used. In 1857 two ware Arab stallions and sixteen mares. purchased in the Syrian desert, were sided to the stud, and with these seres Arch stook was bred.

was found, however, that the pure Arab was not so good for severe carriage work as the Lippinson, and

the Arab thoroughbred stock was therefore applied

to cross the stad-breed. English thoroughbreds were

also used for the same purpose, especially a stallion called "Northern-Light" by "Chanticiser," out of

"Sunflower" by "Hay Middleton," The latter's

							ľ	frs. 1,323,670	£52,941

It is probable that the above subsidies were more then maintained last war, but the returns are not yet

3. The amount of money spent by the Government on the encouragement of formers and other private breeders of horses is included in the above enumerated sums, and there are no special subventions made to this class directly. Private breeders and formers benefit, however, more especially from the premiums given to colto and fillies, brood mares and private stallions, as set forth in the preceding schedule of expenditure. They are also the chief gainers by the sums given in prizes at the district Horse Shows.

4. It will have been observed above that, under the headings of premiums to brood mares (621,500 frames). and pressums to throughbred manie devoted to the production of Anso or Anglo-Arab houses (54,500 france), a gross sum of 676,000 frances (£57,040), in accorded as an inducement to keeping brood mares The former of these totals represents the amount of money given in premiums to brood maree at shows, the latter gives the total value of the premiums, varying from 300 to 500 france, granted to thorough-bred mures in certain districts of the Pyrmees, where they are too anothered about for it to be parable to assemble them in a slow-yard. The premiums in this instance are given on the recommendation of the

The Government does not give any other special encouragement for this purpose to private breeders. 5. Stallions, the property of private owners, most, if their services are open to the public, be examined by the technical Saultory Commission, whose dark is to determine whether or not they are afflicted with

Government Stud Officials.

roaring or interedition on the lines. Only stallions that have been marred free of these two hiereighes are authorized to cover unbits mares. It is the duty of the Prefects of the Departments to bring the mares to the notice of the breeders.

Such stallions are merely registered as "Accepted." There are, however, two other classes of private stallions, namely :---

(a.) "Approved" stallions which are reorgained as capable of improving the breed of horses, and which receive an annual premium from the Government, varying from 300 france (£12) to 2,000 france (£80) It is these premiums which make up the total of 500,000 france (£24,000) quoted in the expenditure schedule under the heading "Premiums to private stallions"; and

(b.) "Authorized" stallions which are judged good enough to maintain the breed of horses, though inospable of improving it. These horses do not receive promiums, but they have an official status which anables their products to take part in Shows subentioned by the State.

6. The Haras de Pompadour, in the Department of the Correse, is the only regular Government Stud Farm in France. Sixty thoroughbred mares are kept there which are solely intended for the production of Amb and Angle-Arsh horses. It is stated that the results are satisfectors

In addition to the Stort Form of Pompadour, the French Government possesses 22 stallion depota, ecotaining 2,800 horses. These stallions stand during the covering season in the country districts in two

and threes, and their services are reserved-at a very Printed image digitised by the University of Southampton Library Digitisation Unit Printed image dicitised by the University of Southampton Library Dicitisation Unit

small covering fee-for mares belonging to private breeders. It is said that, thanks to this system, the production of horses in France is sounly sufficient for the requirements of the army and trule

Although not notually coming within the scope of the questions saked by the Commission on Horsebeending in Ireland, it may be of interest to them to have octain supplementary data concerning horse-

broading in France had before them, The law of Jamesry 18, 1891, fixes the number of Government sizes at 2.810, and this firere is mainsained as nearly as possible in the following protained as nearly as possible in the following pro-portions:—350 thoroughbrid sires (Arab, English, and Auglo-Arab), 1,850 helf-tred sires, and 640 depoths stallings. In 1895, the flowerment stallings covered 157.137 mares, as arrainet 140.045 during the number than has been previously recorded. The

receipts derived from the services of Government stallions amounted to 1.140.103 france (£45.60s). conjunions to a fee of about aix shillings per more The official roturns for 1895 show that 1,215 sixes. belonging to private owners, received certificates of half-bred, and 480 draught horses. A stallion standing at a higher covering for than 100 frames (\$4) is not entitled to a premium, though accorded a certificate of approbation. Eightr-seven thoroughbred and night

half-tred treeting sires were not given premiums for this reason. These "surreyed" area covered 52,497 marcs, an average of about 50 marcs per house One hundred and seventy-eight sires belonging to private persons were officially "authorized." tinotica which on before explained outlides their stock to take part in shows supported by Government.

There haves governd 5.995 sayes in 1895, an average of about 34 mares per horse. Of the private stallions presented to the Sunitary Commission for examination in 1895, 5,755 were accounted us from from the tree hieroiches (couring soul

intermittent oubtholsein) mobilited by the law of August 14, 1885. The abstistics do not state how many mates they covered. The total number of marcs covered in 1895 by (1) Government, (2) "Approved," and (3) "Authorized"

stallions amounted to 222,849, an increase of 18 981 ever the 205.865 mares covered by three three classes of horses in 1894 The above figures would seem to show that home-

breeding is in a flourishing condition in France but the exportations of 1895 ever those of 1894, and an increase on the importations. The exact totals for

REPORT ON HORSE-BREEDING IN ITALY.

British Embasey, Room. February, 25th, 1897.

Excellency, I have the housen; to enclose a Preliminary Report on Morse-breeding in Italy, ogether with a sketch-man of the country indicating the situation

of the central and other depota. This report will formish some of the information sked for in Lord Salisbury's Descatch, No. 4, marked Communical of the 28th January. I revenue to send further report, after personally visiting the Stul-farm at Piss, and the Army Remount Depot at Grossete. The information has been collected from the Annual Official Report for 1895, of the Minister of Apriculture; unfortunately, the report for 1898 has not yet heen published, but will be ready shortly I will notify any changes of importance that have

I have the honour to be Sir. Your obsdient servant, H. R. The Right Honorabin No Clare Ford, a.c.s., &c. REPORT OF HOMES-BREEDING IN ITALY. MINISTRY OF AGRECUTURE AND COMPANIES. ROWS HORSE DEPARTMENT, 1895.

Number of Shillions . There were 582 stallions in the Government Horse Depots on January 1st, 1895. These were divided, according to their breeds, as follows:—

Breeds. English, 12-54 per cent. 80.1 Thoroughbreds. . 14-77 per cent. Angle-Eastern. Three parts heed, 47-88 per cent. Half-bred, . American Tretter, 4-81-per cent. Heavy Dranght. Total.

£11,819

Simpler of Marcs refusal, During the season in the seven central depots, 319 mares were refused for the following reasons: 50

were upder-sized, 40 were mulformed, with serious 13 had tamours, 28 were not in use, 13 were visious, 73 had infectious discover, I was too young, 3 were already in foal, I was too in-bord. Bestiles these, 12 could not be served, because the stallion refuscri to cover them. 57 because the stallion was otherwise employed, I because the stallion was sick.

Service Fees.

The amount received for service of 19,846 mares was £11.819, divided as follows :-

" Melton."

Total. 19.819

By advice of the Council, for the service of the thoroughbrud stallion "Melton," the time for declaring marea covered by him to be burren was extended to angery 3)st, when half the service fee was returned. The measures taken by the Minister for the establishment of new stations, for the eventral suppression of room now existing, for an increased allowance of stallions where there are a larger number of mares, and for the posting of stallions to the different stations. are as follows ;--

New Stations.

"A new station cannot be established except to mountail circumstances, unless it be at least 12 miles distant from one already existing. The Directors of Depote should secertain whether, in the locality where a new station is saled for there is a sufficient number of good-sized mures to justify the detachment of one or more stallions. Those stations should not be retaken. When at the cod of a souson it is found that at a station where one stallion is kept, and the number of mores is less than 35, and the cause is not attributable to any defect in the stallies, and is not of a transitory nature, the Director should wear the Mayor that the following spring the station will only be kept up on trial, and will be suppressed, if the limit of numbers is not attained. Or, he may suggest to the Ministry the immediate abelition of the station. An increased number of stallions may be allowed, when it has been necestriped that during the souson more than 45 mars have been brought to the station."

tained where less than 35 masts are brought for seevice, especially if there are other stations in the

neighbourhood where mores can be conveniently

Uniform Type of Stallian.—Leaving to Private Breakers.—Staff.

In order to ensure breading of a decided and uniform character, and the production of horses audtable for certain districts, it is serviceable not to remove stallions often from their own station, nor to change the class of saimal. A stallion should not be re-

moved from a station, unless for particular reasons, until its has served there for at least three or four years. With regard to the leading of stalling to private breeders, the birer is bound to juy beforehand the service fees for an mony mares an the Ministry have assigned to the stallion relected for the station The massier of mares assisted to each stallion depends upon his general condition, and may be increased, if it is not likely to affect his constitution. The work at the denote was done in 1895 by the following staff:—I Lieutenant-Colonci, I Major, 5 Captains, 7 Lieutenants, and 7 Veterinary Surgeons, forming the managing body; \$31 homo-lempers (of whom 241 were old soldiers, 59 Sergeants, 196 Ontpowds, and 221 soldiers attached to the depoir; 91 soldiers were brought in from exculry regiments during the serving season, and 24 civilian grooms were taken on for a few days, in the place of

soldiers who had fallen till, or were unable to do duty Expenses.
The following three tables show the expenses in men, former, and stabling for the seven central denote ;-

of each direct, in proportion to the pumpler of statious. and one-fourth by the communes in the customs distriet of which the depot is situated.

General properties On the whole the condition of horse-breeding may be considered satisfactory. The breaders are doing

better, and there is more trade in barses, which is essential to the prosperity of the industry. Seedimin.

In Sordinia, for instance, the Director writen:

"That many meen fools are bood them; the breeden are employing a better system, certainly, there is but little stabiling, but that does not apply to harren only ; other animals have to live in the open. Comequently, year-olds; if they do not sell them, there is great difficulty in keeping the finis in the enclosures. The Government Depot is, whatever may be said to the contrary, on encouragement, and even a necessity in Saedmin."

Sicile. Horse-breeding in Sicily is also doing well. The Director at Cotamia writes: "The Military Com-

mission brught 155 good foals, and might well buy 250 more excellent two-year-olds."

In the District of Pies, and especially in the Pro-

vinces of Pisa, Grosseto, and Rome, the horsding of beenes continues to improve. It is from private breeders, and those who have sufficient means and technical knowledge, that the Military Authorities buy really good colts; we must not forget that the greater portion of these hereders use stallions belonging to the depot, or their descendants. Arother reason for their prosperity in this district is the numher of good mares, mostly bred by Government

Crama, Parrara, Rospio. of Crerus, Ferrura, and Reggie d'Emilio. Crema is the most important, that of Reggio the least. In these

districts, which include, bessies the Mniche, the whole unarrous, was in monage, totalies the shrices, the whole valley of Padua, breeders care less for selling horses to the army than in other places. In a great part of Lombardy, and to a certain extent in Venetia and Upper Estilia, a good market is frund for their heres. both in the country, and for exportation; the best of these are sold at good prices, and rocks a fine show in the largest Italian towns, where they are passed off as coming from alread, and are doubtless paid for an nuch. S. Mario di Gassa.

The reports from Santa Maria di Capua are less satisfactory; this district includes the whole southern

Mediterraneon and Adriatic provinces, except Aquila, which belongs to the Pine district; the Ahrumi will honoeforward helong to it. The Director writes: "Resedent of horses do not consider their profession renumerative; they have an idea that the Government ought to buy all the good horses fo for the army, forrettion that though many are required, allowants bediscoul of. Hence, many neglect the breeding of horses for that of moles, which is more profitable. at tursive monthsplid, is worth from £6 to £8, wherean a fool of the same age will ravely fetch more than £4.

A three-year-old make is worth more than £20, a horse of the same age can seldem be sold for that amount in the place where it is bred. The breeding of agains is also of great importance in Sicily, where a quiet and hardy heast of burden is a necessity."

The Director at Forram writes: "Whitst in Loss-

hardy, and especially in the province of Cremons, numbers of houses are bred for exportation, the conteary is the case in the province of Verone; though a smaller number are bred, a considerably greater pro-portion are reared there. The agricultural owners in this neovinos, whose fields produce good coops, and in agricultural rotation excellent clover pasture for several months of the year, go to Cremons, and hay a considerable number of foals, which they rear on their farms. The result is very satisfactory, for colls reared in Cremena som become week and ansemic, with burnal enlargements, and are decimated by periodic ophthalmia ; whereas, with change of food and climate, they become more lively, and develop good muscle, fibre, and tendone."

Adriatic provinces.

Croation Horses. The Director at Recoin mentions the importation of small homes from Croatus and Dalmatis. Reports

from Ferrara and Capua also allude to them. small horses have certainly some advantages; their low price, some at £4, the better class at from £8 to 210, their endurance, speed, good temper, and utility for middle or light draught. The freight from Dalmatia to Italy is under £1; thay are brought over in boat loads, 40 at a time, and are much used by farmers and peasants, as also for drawing the public carriages in almost all the towns of the southern

Exportation.

The Director at Pius mentions the expertation of horses of all ages suitable for light dyaught or suddle, and which increases susually. Thry are purchased by French dealers, and the trade is of benefit to owners, who, for various reasons, have been unable to sell their horses to the Government.

Brobant and Ardennes Stallions. In Lumberdy, the best market, and the highest prices are found for foals got by stallions from Brabaut and the Ardennes. At six months old they are very well grown; but it does not follow that this type of

stallion is most suitable for the whole district. Hackney Stallions,

For the district of Crems, and the greater part of Ferrara, especially along the River Po, the best stallion is the Hackney-stons, strong limbed, and well-

shaped. Bastern Stallions in Surdinia The best type of stallion for Sardinia is undoubtedly

the Eastern, either pure or erosa-bred; they do well there, and are popular. The same resoning should apply to Sicily, but great difficulty is found in using them there; breeders con-

sider them too small, and profer a larger animal, whose produce realize better prices. The Anglo-Eastern renes, which is somowhat larger, in the most popular, English Thoroughbrods.

In Pisa and Emilio the English thoroughbred is corresing in popularity; in the former district no

best than 16 stallious of this breed served in 1895. SERVICE OF STALLIONS DESCRICTS TO PRIVATE

OWNERS AND APPROVED BY GOVERNMENT. Regulations. The regulations passed in 1888 for the approval of

stallices belonging to private broaders remain in force; the following ortiols was solded in 1893:-" The provincial Commissions may refuse to pass a stallion on account of vice, or any wolformation likely to

cause deterioration in the break." · Numbers. In 1895 there were 715 stallions belonging to

private owners approved for public service. Of these there were :--Breeds.

Thoroughbred English, 117 Half beed, . Italian. 328 Eastern,

and the remainder of every other breed and country From the 715 must be dedpoted 3 that died, and 67 that did not serve public maces, leaving \$45, which covered 17,945 maces, an average of 27.88 for each stallies. In 1894 there were 876 stallions shown for approva-

of which 148 were rejected. In 1895 there were 815 shown, and 160 rejected. The following table shows the names of the seven central Government depts, of the provinces our-nected with them, the number of approved private

stallions, and of meres served by them in 1820 :--

Course of Reduction in Numbers of Private Stallions. The number of approved private stellions is con-

siderably less than in previous years. This may be explained by the fact that since 1894 the provincial Commissions have been more strict in their requirements. There were many complaints against their decisions, but the Central Administration were con-vinced they had not exceeded their duties. Formerly

number is smaller, and the Government is bound to provide stallions. There is no tear of harm being done by the concurrence of Government and private stallions, always provided that the latter are really good suimals, and not only free from mal-formation but from vice. The Government are glid enough, if there are sufficient private stallions for the use of breeders, to send the few they have at many owners could get their horses passed even if their disposal elsewhere. There are so many places they were not considered likely to improve the breed; where stallions are in demand, that there is no fear mow, the quality of horses is far superior, though the of the supply exceeding the demand.

Reports from various Districts. The reports from the different districts on this

subject vary considerably. It is reported from Creme that private breeding, which is reported with greater confidence when the Government have appeared the stallions, is increasing, and the competition with the

ment.

From Formers it is reported that among the private

stallions there are many excellent thoroughreds and good American trotters, but they do not compute good American trooper, our they on the Company astrophy with Government horses. At Reggio the From Pisa the report says :-- "The co-operation of

the produce, especially since the new regulation has

been in force; it is a great pity their mamber should he decreasing, at a time when we cannot increase the numbers of our stallness."

S. Maria di Coma.

Marie Area San San San San San

From Santa Maria di Capua it is reported that private breeding is perjudicial in consequence of the

approve of stellions not calculated to improve the

Catania. At Catenia, the opinion is that the Commissions Sardinis. There is no report from Opieri, in Sardinia, as to private brealing, as we may conclude there is no deterioration. From another part of the island we hear that owners appreciate the Government horses,

and are anxious to use them; this would be satufactory, if we did not also know that small owners frequently have recourse to private stallions on

Coursel Remarks

However much some of the over-realons officials

may depreciate private breeding there is no doubt its conditions are far more satisfactory than formerly. There is only one face to be deployed—the law is too

often evade, and it is impossible to execute sufficient rugilance to prevent offences against the law increasing

GENERAL RESCUES OF SERVICE. The number of mares covered by Government and

private stallions was 913 store than in 1894. In 1895, 19.346 mores were covered by Government stalliens. and 17.945 by private stallions; total, 37,791.

Deccurber Sist, 1895, the depots contained 3.955 recover access; this was after the percounts had been

INDIANOS ENCOURACIONEST OF HORSE-PERSONS.

The remaining 2,980 were distributed among the young horse depots, of which there were then six, but our of them liave aines been done away with.

Shede and buildings. The brildings are plain whitewashed or red brick

blooks, and consist of lodgings for the staff, stables for harmen and farm horses, pharmeny, sick horse stable, &c.; at intervals of about half a mile about with tiled roofs, 80 yards long by 15 wide, are creeted to shelter the hay racks where the house food ; these

soldiers from various regiseents are also employed. Labour. The farm is cultivated by hired labourers, at wages July to October, great difficulty is found in providing labourers for the hay and corn has veet, and men hav

to be paid as much so is por day with food and lodg-The borner rations vary from four pounds to eight pounds of cate per day, and unlimited key, during the

to the difficulty in getting it out at the proper time. Purchess of horses.-Price.-Numbers The remount horses are purchased between the months of April and June by a Committee composed of the officer communiting the depos, the Captain attacked, the Veterinary Captain, and a cavalry officer detailed by the Ministry of Was. Notices are pre-

viously issued to all towns in the district, informing reprietors of the date and place at which horses may be hecoght for importion; as a rule, only three and four-year olds are purchased; the urice is fixed by the Ministry of War, and dependage the amount available in the army hedget for the purpose; the average is £24 for three-year olds, and £32 for four-year olds; it is calculated that a colt from the age of three to four years cots 26 for his keep, including all ex-penses. The maximum number kept at Grosseto is 3,000, and at the end of December, by which time those considered fit have been drafted to their regi-

ments, the number is reduced to 1,200. sheds have no lateral walls; at present there are only Height. The minimum sine for three-year olds is 14 hands

best in their runnier is you'ly being increased. The ours is placed in open troughs in the fields, with room for four homes to feed at each knorgh. and half an inch, for four-years olds, 14 hands 24 inches... Printed image digitised by the University of Southwepton Library Digitisation Unit

Distribution to regiments

officer commanding the depot.

The horses are prograffy best in dozen of about twenty-five and mye of every brood, size, and colour ; to the lancers, while the heaviest are detailed to the artillery, engineers, and transport cores

The officer communiting the Cavalry School at Praerolo has the right to select any home he may require for the school; after him the efficer community the maining horses are distributed to the recipants by the

Condition .- Discours. The horses I saw (about 150), seem probable, body

ing at their worst, having only just recovered from the effects of a severe winter in the open, during which they have run absolutely wild, sometimes up to their knees in need; this raud becomes hardened in summer to a consistency of brick, the result being many steales and fractures of limbs. The mortality (about six per cent.) is caused shiefly by pranusonia and the results of castration, for proprietors decline to take the risk and expense of castratrag their colts before they are sold to the Government.

Matheda of econolisism

The beeses, though in poor condition, looked hard and healthy, and most of them had fairly enad action their very emsteuce is an instance of the entrival of the fittest, for those that have pased a winter in the gross will not suffer from exposure to the roost server-The great dofees is want of size and substance, the heavier burses show great want of breedstance, the heaver turnes since great warn or oresu-ing. It is entended that in a monutations country like Italy, large horses are unders. There is no doubt the envalry horses have great powers of endurance-whose energing heavy weights and desig long matches, as I observed during the measurement in 1805, and thele and amplition was retainly not due to attention to avecular or riding. Though sent to their In grocening or riding. Though sent to their regiments when four and a half yours old, they are never used at managerres until six voces ald. They are sent from the depot perfactly unit-sice, never having even had a halter on there. When it to necessary to examine them for medical treatment or to account them, they are driven into an enclosure. from which a narrow passage leads to a corridor mode of iron lottice work, with a padded roof, just wale enough to hold become in single file; when the leader has perched the end of the corridor wooden how are named thorough the miles in front of, and behind each home on that he carmet many in any direction : the besiles in exactly under a standard, which by a pulley mechanism registers the height an the wall of a shed where on efficer sits at a deak and writes a full description of the animal; the dear in front of the description of the animal; the dear in front of the leader is then opened, he pursue into another enclosure, the door is closed, and the past horse taken his place under the standard.

Transport Lorses. Horses that are found to be unsumd, or in any

of the herdsmen or fee farm week; some 100 are so employed. Other versions denote in Italy.

I mentioned in my report of Pehronry 26th that fenr of the six home denote in Italy had been suppressed, but the original intention to do so has not been carried out, and the other five still exist, though on a smaller scale than Geoseto; they are at Persano, near Naples; Bonorva, in Serdinia; Pulmanova, near Udine; Portovechio, near Medene; and Secreta, near Catania, in Sicily.

Stallion denot at Pier. The Government stallion depot at Piss, is situated on the Lang' Arms at the end of one of the principal therengializes of the town. The stabling for ISO horses originally bekenging to Leonald. Grand Duke of Timonay; there is a large siring ground, about an som in excess, laid down in tuef and grovel made, where the horses are exercised for an hour and a half

" Melanian " and " Workington," ... Other stallions. At the time of my visit, March, 1897, there were

two thorsers haved Roelish stallians. " Melanies " and "Workington," which have been beauth by the Government to replace "Malton," who was last year reseld to England, to the great regret of all good judges of horses in Italy. Many of the other stallions had been sent to their stations in the district, but some fifteen remained, all of which will be sent to cat-bring stations before the end of the month; almost every wariety of breed was represented, half-bred English, pure Arab, even between Ecolish and Arab, Relian and Arab, pure Italian, Harkney and Italian, Amerithere was a really good looking home amongst them, executing the two English thoroughbrois.

Deficts in system of breeding. The great fault of Italian home-breeding appears to

be the tendency to me Arab blood; the native mares are stord, active, wire animals, but they have laid shoulders, narrow quarters, and are deficient in substance, all of which defects are predominant in the Arab, except in the very best, and of these there seem to be few, if any, in Italy. The one special account of the few, if any, in Hary. The one special attribute of the Arab, power of enderance, is already possessed by the native Italian race, and it would appear unnecessary to reproduce it is excess. Probably the very best type of minual to breed force in the first instance would be " Workington. and by crowing his descendants with a half-bred broter size a very valuable class of eximal might be produced ; unfortunately the service for for "Workfarmer, whose means will not permit him to spend more than ten shillings, or at the most £2 on breedowners of racebreses; they have each covered flye mares this season, and it is doubtful whether they will serve more than ten each altogether. Introductory,

In a memorandam published by the Royal Munistry of Agriculture in 1896, the position held by the

Government in report to horse-breeding is described as fellows :-"Horse-breeding in Prus-to is mainly depen-

dent upon the stud rasintained by the Governby private breeders.

"According to the cattle census in 1853, the total number of feels born in 1893 was 104,189, to produce which about 180,000 mares must have been covered. The stallions belonging to the Government rural stude (Londgestitte) covered in 1891, 121,887, and in 1893, 156,346 mayes The task of the stud solutinistration has become from year to year more extensive and more difficult; as it is no larger merely a question of

providing stalling smitable to the brawding of homes for sullitary purposes, but who of con-sidering other requirements, notably the demand for heavy draught hovers, epart from the fact that the military anthorities themselves now rennirs greater variety for different erms of the service-from the light cavalry to the heavy artiflery horse

"In addition to this the depressed condition of amigniture has induced meet had owners to denote greater attention to horse-breeding. erder to cover the looses caused by the full of prices in other branches of production. To meet Government Stod Department has found it their stook, and the number of stallions kept for service in the country."

Expenditure included in Estimates of Ministry of Agriculture.

The sums expended by the State in Pressia for the cusorement of borne-breeding fall under two different brads, vin.: (1) those included in the General Estimates of the Ministry of Agriculture for prices and bounties, do.; and (2) the separate estimate for the Government Steel Department. The Estimates of the Minister of Agriculture for 1896-97, contain the following steems in this respect under ordinary expenditore :-

1. Fund for awarding prices at horse races,
2. Fund for prices for the improvement of the breed of Stallions and Maren which are the property of Associations or of private per-

wans; also for bounties on the importation of thoroughbred stud hosses and kindred 9,000 3. For foal pastures, .

Total, .

former famil is asided to the second, and can be carried forward, together with any surplus in the latter, for use in the following year. The amount voted in the Budget for 1896-96 was

Under the heading of "Non-recurrent and Extraordinary Expenditure," the same Estimates for 1895-96 and 1895-97, each contain an item of £3,500 as an "extraordinary supplement to the fund for prime for the improvement of the breed of stallions, do." No 2 above). This brings the total of manay voted for such purposes in each of these two years up to

£23,171, and in the Estimates for 1897-98, which have recently been hid before the Landing, the same The reasons which moved the Ministry of Agricul-

turn to wek for the extraordinary supplement are stated in the Estimates for 1805-96, or follows:-"The present depressed condition of agricul-

ture waders it necessary to give all mossible enconreguent to efforts directed towards the improvement of (among other things) home and cattle beeeling. "The Horsehreeding Fand is abnot entirely

handed over to the Arricaltural Associations for prime at horse shows, and for assisting the importation of good broeding material for consent purposes. A very small portion of it is assigned to the importation of thorough beed horses.

"In all the branches for which this extraordinary vote is saked, the measurity of increased expensiture has made steelf felt. "As regards beese-browling, the object must

be to make the country on independent as possible of importation from abroad in regard to borses for ordinary use, and at the same time to current age in certain provinces the brooding of burses saited to military purposes. "As it is impossible to foreser whether the conditions which make this increased expendi-

ture necessary will be permanent own, the amount required is claimed under Extraordinary Ex-Mode of application of more granted through the Histotry of Agriculture for the encurregment of

The primes granted by the Ministry of Agriculture take the form of (1) becomey prices (cups), (2) mency awards, and (3) free covering tickets for broad maces. It is enstormery to give homoenry prizes to the large landowners and reserve the money awards for the smaller breeders. In the reprince of Silesis all the money evailable is distributed in the form of

free covering tickets. In some parts of the country a large part of the same granted by the State for the amoningement of home-breeding is applied to essisting sivate breeders to surchese good brood mures and private breeders to purchase good brood mures and fosls. In consequence of these awards the fact that a due consideration of descent is the true basis of bereding is becoming more and more appreciated, and has led to the establishment of stud-books and to the formation of associations of horse-breeders. Common action has also in many districts been initiated with a view to breeding towards a special required type, and good results have born atomined in this way in

the breeding of beavy cars bornes in the Rhine Pro-Grants are also made out of Government funds to seriet breeders to propage common runs and feel pertures, and to meintain public breaking in establish . 19.671 ments, which enable the breeders to sell their young borses preseriy broken-in for riding or driving without the laterregtion of a dealer.

Norn.-Any surplus remaining over from the The Government grants distributed through the local agricultural associations for all the above-men-tioned purposes amounted on each foal born to an average of 1s, 10d in 1895-96 and 2s. 5d in 1895-

> Government Stud Farms. The Government Stud Department administers four principal stud feros and seventeen provincial establishments or rural stude (Landgestite), where stallions only are kept for service in the district.

POLICE ORDINANCE BEOPECTIES THE LICENSISS OF PRIVATE STALLIONS IN THE PROVINCE OF BRANDENBURG

On the basis of the powers conferred by § 137 of the aw respecting the General Administration of the Kingdom of the 30th of July, 1883, and by 6 6, 12 and 15 of the Law respecting the Polite Administration of the 11th of March, 1850, and repealing all previous regulations relative to keeping private stallions, it is donned for the extent of the

Province of Brandenbury, with the coment of the 6 1 .-- Private stallions may only be employed to cover manus belonging to other persons, if the com-petent Licensing Board (Schanzows) has certified their

fitness by the issue of a licence (Berechtigungs Schein) 4.2. Each Administrative District (Kreis) shall form a licensing district (Kurbenick), the towns of of East Havelland, Beaudenberg in that of West Havelland, Charlottenburg in the district of Teltow, Frankford a Ober in the district of Lebus, and the same name. If is future a town is severage from the administrative district in which it is situated, the boundaries of the licensing district shall not thoreby

For each licensing district a licensing board (Schauant) shall be established, and one or more liseasing stations (Schauarte) shall be appointed and

publicly made known.

§ 2. The licensing beard shall consist of :--
1. The Royal District Commissioner (Leaderth) or a deputy elected for six years by the District Assembly (Erwing) as Chairman;
2. The Director of the Royal Rural Stud conserved;

of Manageomet of the Provincial Agricultural Association for the Mark Brandechurg and Nieder Lautite, who may belong to several licensing boards : 4. A member to be elected for six years by the 5. A Veterinary Surgeon to be selected, if possible from among the veterinary officials of the district, and accounted by the President of the Government (Head of an administrative division or "Bazirk") concerned.

wwice only. For each member of the Board one or more deputies shall be elected or argointed in the same manner 5 4. The licensing board shall meet in the months of October, November, and December of each year. The place, day and hour of each mosting shall be The place, day and hear of each meeting shall be notified by the District Commissioner, after consulting the members named in § 3, under 2 and 3, at least 14 days before the date in the District Gasette, or, as days settors the date in the Destroy Gasette, or, as regards towns, in any papers which may be used for the realization of off-cial vertices

\$ 5. The owner of a stalling who wishes to use it for covering mores belonging to other persons, must notify the fact to the District Commissioner (Landrath; concerned before the end of Sectionber of each year, presenting at the same time a schedule according to the appropri model A. duly filled in, and station the place where the stallion is permanently stabled. § 6. Only such stallions may be Brensed as luve. correlated their third year, and are without bound-

§ 7. The licensing board, the decisions of which are only valid when all the members (§ 3) are present. decides by majority of votes. ices by majority of votes.

In case an equal number of votes are given for and

against granting a license, it shall be refused.

If a member of the licensing board is unable to attend the mentions at the appropriate time he must notify the fact, as soon as he can foresee such inability, to his deputy and to the Landrath. Such notification shall be considered as a summons to the deputy to

appear at the mosting.

The decisions of the ligensing board are feat and are recorded. Every voting member of the Board may obtain a copy of the records from the Landruth

Stallions which have been licensed in one year may be presented again in the following year,

S. If a stellion is found fit for service by the licensing board, the owner shall receive a license (Berechtigungs Schein), signed by the Chairman of the Board in the form of the annound model B. The amount of covering fee which is noted on the licence. is fixed by the owner, but cannot be either raised or overed during the covering season, for which the licence is issue

The Royal District Commissioner (Landmith) shall publish the descriptions of the licensed stallions. together with the piece where they stand and the

smount of the covering fors.

§ 9. The license (§ 1 and 8) is valid for the covering season following the date of its issue; and each literard stallion must again be presented and examined at each succeeding annual mosting of the

Board, if it is again to be used for covering mares belonging to other persons. licensing board to meet before the dates fixed in 5 4 he must communicate with the Landrath and refund

any expenses which year arise. i 11. Euch licensed stallion must remain, during the covering season, at the place indicated by the meanwhile sold, and the place where it stands consequently altered, the fact must be notified to the Landrath, or, if it is thereby transferred to another

district (Kreis) of the province of Brandenburg, to both the Diviciet Commissioners concerned. If a licensed stallion belongs to several owners it may be taken to their various places of residence for the purpose of covering their own marce. A non-licensed stallion which is the common property of several owners can only be used by one of the same, whose name must be notified in writing to the chairman of the licensing beard, for covering

This Veterinary Surgeon shall have a consultative his own marce 5 12. Every owner of licensed stallions must keep a covering register according to the annexed model C. in which the manes covered by each stallion are to be entered. This register shall be closed at the end of the covering season at latest on the Sixt of July -in each year, and wout he forwarded to the Lands rath with the expired lisence. \$ 15. The following fees sen collected for stallions presented to the licensing board to meet the expenses

of the same :-1. For each stallion licensed ---(e.) The first time, 10 Marks: (b.) On each further occasion, 5 Marks.

9. For each stallies not licensed 3 Marks. \$ 14. Infractions of \$5.1, 9, 11, and 15 of this Police Ordinance are nunishable by fines up to 60 Macks (£3). The same penalty applies to the owners of mores who allow them to be covered by nonlineased stallions belonging to other persons.

\$ 15. This ordinance comes into force on the let of October, 1891. The requisite elections for the Howains boards and other preparations (§ 2, 5, 4, and 5) are to be carried out in good time. Potedam.

We, the Members of the Consultten of the "Cork Agricultural Society," protest in the strongest manner

aminst the introduction of the breed of Harkney heress into Ireland, by the aid of State funds, as being detrimental to the best interests of farmers

and the good of the country at large, tending to descripe that breed of house for which Ireland has hitherto been justly celebrated. Persed naummanishy. Signed on behalf Co. Cork Agricultural Society,

GEO. RETNOLDS, Becretury.

LIMITRICK HORSE SHOW and AGRICULTURAL

Litoprick, 3rd October, 1886. Resolved .- That was the Members of the Core-

mittee of the Lonerick Horse Show and Agricultural Society, protest most strengly against the State-aided introduction of Hackney stalling into any portion of the country, as we believe the blood will seriously deteriorate the class of horses now bred in this country, and in this opinion we are supported by the test judges in England, where the experiment has been tried and reeved a failure, and we mercut the substitute of thoroughboad horses with bone and substance, or of shore as nearly thereughbood as possible, which have proved good only gattern.

Passed ununinously. (Signed). Jos. P. Garrenty.

High Sheriff, Chairman. "BALLINASLOE DISTRICT AGRICULTURAL

Ballingske, 12th Getoker, 1816. Resolved.-That we the Members of the Com-

mittee of the Ballinasico Horse and Agricultural Society, wish to place upon record our objection to the introduction of Harkney blood in any form into We believe that it will be most injurious in results

to the meintenance of the character of high class herees which have been produced in this country, whether as hunters, carriage borses, army remounts,

R. J. Gua. Secretary.

(Signed),

LETTER FROM COLONEL St. QUINTIN.

APPENDIX C. Island Bridge Barracks, Dublin, June 6th, 1897

My Logn.-With reference to the remarks that have come before the Communica on Horse-breeding in Irohand, as to the dealings of Government in this ormiry for remomsting. I will, at your request, or dearour, without going too deeply into details, to put as concessly on I can before you the actual position of the Remount Department, and my reasons for saying that under existing circumstances it appears to me to be impossible that more can be done than is being done to being Government into closer relations with the breedert. I feel that there are two or three erronsons ideas abroad in connection with the horse supply and the requirements of Government. The most general one is that the English Army experiences meet gehrini one it that the angusin army experiences difficulty in complaining its annual remounts. This is far from the case. I could obtain practically any reasonable number required. In the last quarter we had a sudden and unusal demand for horses -for angmentation and usual osculation, and between the middle of February and the end of March I put 783 homes into the Service with their different regiments.

This could not have been done by personal purchase from the breeders, or without the assistance of wellknown reliable designs. I am in the somewhat unique position of regarding the foreign buyers so my best business friends, neeling as I do daily how their demand improves and guarantees our supply, and I so farther and report free tude in the homes of this country as its material enfoguerd in the future against the inevitable developments of electricity, motor ears, i.e., and for any large supply in case of emergency. For assured supply of any business demand the middleman is, under the existing state of our commerce, a necessity, as he is in touch with, and railer more than less controls, the outset. With reference to our Army demand, it is not, if we wished to, of rediciout ties to depose him from this position, and with the large continental and private densed in the horse market, we should, if we cut admit from him, he relapsed to the offscorrings or rejected by Mar-tich larger buyer. It should be noted that foreign military buyers, and the majority of civilian cure also, place themselve in the hands of the dealers, and few attempt, on any large scale, or to any great extent, personal purches, a system which undoubtedly reAPPENDIX C.

enives the support of the winder. Government is most anxious to develop this contact and business of personal purclase, as far as it is compatible with the interests of the public service, and tiece are many ceptlemen in this country who have it much at heart. and to whom my most sincere thanks are due for their exections in the matter; they have at different times at great trouble to thomselver, got together collections of the farmers' horses in their various neighbourhoods for me ; they have not up Remount Cleans at lead shows, and belied in every way thay could. I regret to may almost invariably with the same result, dishrenders some 150 horses annually, to stock the Government farm in Look, beyond that number there is no accommodation. These houses are used for replating consulties and appli orders; but to keen up n continuity of supply for solden or large demands it is necessary to be in touch with the trude, who are continually buying and storing horses, as formers do their cattle, and who have to take all risks whilst in their hunds with change of purchase, and after purchase the remonsibility until the harner are landed with their regiments, and with certain guarantees for the future. This the breeder eguld not and would not do, he would neither keep the herses, till such time as they were required, on the chance of their being taken by Government, nor mough the other risks. Far he it from me to hart the feelings of the people of this country, where I may say my friends are ignomerable, but my greatest difficulty in tending nerconally is the extremely low estimate formed by many as to what is peccessive for a soldier's beese, and the price expected when once the vendor is in direct contact with Government. I mean that in most cases horses brought up have been the round of several fairs, and not till it has been found that they are unsaleable, or will only command a much lower price than the vendor has expected for them, is the Remount market thought of, and then surprise is expressed that the selection is so enreful and that we require something better than an animal unsuitable for other demands. The header also seems to be under the impression that he ought to receive £40 for every antical be may sell to Government, and does not seem to realize that horses have different values, and that the brave, with all its expenses, is expected to be landed in the ranks of the service at an average price of £40. You may rightly say the becoiers should do the best they can for themselves : granted, but it devolves on me, or rather on my Department, to do the best we can for the troops we for the country as lax-payers.

As to the question of the price of horses it is a

difficult one, but one that is so well understood between the breeder and the trade that it practically accommodates itself to circumstances, which must in a trade of the sort fluctuate greatly, but the knowledge of both the breeder and the dealer in this country is so close, and the margin so small, that both can tell almost to a nicety the actual trade value of the animal, and deal accordingly, and a good colt will always fetch his value in the open market. The breeder really looks on the dealer as his best friend, and will sell to him at a lower price than to the Remount Agent, as he is well aware that the dealer will key his high priced as well as low priced stock, and will if satisfied return the following year; whereas the Remount Agent can only touch the Remount Class, and a different man with different

bless may appear or not the following year, and some beseders would not think of selling to me until that partients; dealer had had "first show." On the question of the present system of purchase of four-year-olds instead of three-year-olds I need not enter, except to tell you that up to the persont I have been able to obtain them to my auturaution. You

487

will have many suggestions made to you, as to Government breeding study, reserve depics for young stock, &c., &c., from men ready to give an equiton, but who I can hoully think have studied the details and communators. Though I do not may accepting might not be done on different lines to the present as far as Government is concerned, it produce itself into a question of £ a d, which is most carefully con-trolled, and the power in the hands of those who may take a different view of the eitention, as Government can unlocatedly remount itself efficiently on its present lines.

With regard to the foreign trade, I have it on the best authority that Irish horse brouding is the wonder and envy of continental nations, who support, I may say, maintain their breeding by State aid. True, they have not or only in limited areas, our limestome eximall, to which I attribute the indisputable excellence of our indigenous leved, nor have they invariably stack to the highest strain for producing high class riding horses, but have interningled their breeding with not always the best results, and they consequently attach a high value to our horses of that

As to the riding horses for Government Service, I cannot believe they can be produced to any pitch of excellence except by breeding upwards and not downwards, i.e., from the highest possible strain of blood, and to the true riding type; it is an updoubted fact that blood carries more weath communitively under a strain than bone, and to blood alone I feel assured a due their speed and stamms, and that it makes those what they are, the hest in the world. I hope I have now made the position plain to you, and should you consider these few genalks will help

to olear am some of the erromout ideas now held in this country with regard to the action of the Bersount Department, I trust you will give expression to them. I may say in conclusion that as what I now write may be, much to my regret, almost a farewell to this interest, I would must earnestly commend you to imfor breeding, and to keep up the high standard and excellence of the horses you now possess. I treat the deliberations, and cutcome of this present Commission of which I have the honour to be a suember, may tend to that result.

> I have the honour to hr, My Lord, . Your obelient servant, T. A. St. Quinting · Colonel. A. I. of R. Ireland.

To the Barl of Dunraven, K.F., de., do.
